``)\n\n@Target(CLASS)\ninternal annotation class marker\n\n/**\n * Gives a declaration (a function, a property or
a class) specific name in JavaScript.\n * This may be useful in the following cases:\n * * There are two
functions for which the compiler gives same name in JavaScript, you can\n *   mark one with `@JsName(...)` to
prevent the compiler from reporting error.\n * * You are writing a JavaScript library in Kotlin. The compiler
produces mangled names\n *   for functions with parameters, which is unnatural for usual JavaScript developer.\n *
You can put `@JsName(...)` on functions you want to be available from JavaScript.\n * * For some reason you
want to rename declaration, e.g. there's common term in JavaScript\n *   for a concept provided by the declaration,
which is uncommon in Kotlin.\n * Example:\n * ```` kotlin\n * class Person(val name: String) {\n *     fun

```

```

hello() { \n *      println("Hello $name!")\n *    }\n * \n *    @JsName("helloWithGreeting")\n *    fun
hello(greeting: String) { \n *      println("$greeting $name!")\n *    }\n * }\n * ```\n * \n * @property name the
name which compiler uses both for declaration itself and for all references to the declaration.\n *      It's required
to denote a valid JavaScript identifier.\n * \n * @since 1.1\n
*/\n @Retention(AnnotationRetention.BINARY)\n @Target(CLASS, FUNCTION, PROPERTY, CONSTRUCTOR,
PROPERTY_GETTER, PROPERTY_SETTER)\n annotation class JsName(val name: String)\n \n /**\n * Denotes an
`external` declaration that must be imported from native JavaScript library.\n * \n * The compiler produces the code
relevant for the target module system, for example, in case of CommonJS,\n * it will import the declaration via the
`require(...)` function.\n * \n * The annotation can be used on top-level external declarations (classes, properties,
functions) and files.\n * In case of file (which can't be `external`) the following rule applies: all the declarations in\n
* the file must be `external`. By applying `@JsModule(...)` on a file you tell the compiler to import a JavaScript
object\n * that contain all the declarations from the file.\n * \n * Example:\n * \n * ```\n * \n * kotlin\n *
@JsModule("jquery")\n * external abstract class JQuery() {\n *    // some declarations here\n * }\n * \n *
@JsModule("jquery")\n * external fun JQuery(element: Element): JQuery\n * ```\n * \n * @property import name
of a module to import declaration from.\n *      It is not interpreted by the Kotlin compiler, it's passed as is
directly to the target module system.\n * \n * @see JsNonModule\n * @since 1.1\n
*/\n @Retention(AnnotationRetention.BINARY)\n @Target(CLASS, PROPERTY, FUNCTION, FILE)\n annotation
class JsModule(val import: String)\n \n /**\n * Denotes an `external` declaration that can be used without module
system.\n * \n * By default, an `external` declaration is available regardless your target module system.\n * However,
by applying [JsModule] annotation you can make a declaration unavailable to *plain* module system.\n * Some
JavaScript libraries are distributed both as a standalone downloadable piece of JavaScript and as a module
available\n * as an npm package.\n * To tell the Kotlin compiler to accept both cases, you can augment [JsModule]
with the `@JsNonModule` annotation.\n * For example:\n * \n * ```\n * \n * kotlin\n * @JsModule("jquery")\n *
@JsNonModule\n * @JsName("$")\n * external abstract class JQuery() {\n *    // some declarations here\n * }\n *
\n * @JsModule("jquery")\n * @JsNonModule\n * @JsName("$")\n * external fun JQuery(element: Element):
JQuery\n * ```\n * \n * @see JsModule\n * @since 1.1\n
*/\n @Retention(AnnotationRetention.BINARY)\n @Target(CLASS, PROPERTY, FUNCTION, FILE)\n annotation
class JsNonModule\n \n /**\n * Adds prefix to `external` declarations in a source file.\n * \n * JavaScript does not
have concept of packages (namespaces). They are usually emulated by nested objects.\n * The compiler turns
references to `external` declarations either to plain unprefixed names (in case of *plain* modules)\n * or to plain
imports.\n * However, if a JavaScript library provides its declarations in packages, you won't be satisfied with this.\n
\n * You can tell the compiler to generate additional prefix before references to `external` declarations using the
`@JsQualifier(...)`\n * annotation.\n * \n * Note that a file marked with the `@JsQualifier(...)` annotation can't contain
non-`external` declarations.\n * \n * Example:\n * \n * ```\n * \n * @file:JsQualifier("my.jsPackageName")\n * package
some.kotlinPackage\n * \n * external fun foo(x: Int)\n * \n * external fun bar(): String\n * ```\n * \n * @property value
the qualifier to add to the declarations in the generated code.\n *      It must be a sequence of valid JavaScript
identifiers separated by the `.` character.\n *      Examples of valid qualifiers are: `foo`, `bar.Baz`, `_.$.f`\n * \n *

```

is `NaN` when `x < 1` \* `acosh(+Inf)` is `+Inf` \*  
`fun acosh(x: Double): Double = nativeMath.acosh(x)` \* Computes the inverse hyperbolic tangent of the value `[x]`. \* The returned value is `y` such that `tanh(y) == x`. \* Special cases: \* `tanh(NaN)` is `NaN` \* `tanh(x)` is `NaN` when `x > 1` or `x < -1` \* `tanh(1.0)` is `+Inf` \* `tanh(-1.0)` is `-Inf` \*  
`fun atanh(x: Double): Double = nativeMath.atanh(x)` \* Computes `sqrt(x^2 + y^2)` without intermediate overflow or underflow. \* Special cases: \* returns `+Inf` if any of arguments is infinite \* returns `NaN` if any of arguments is `NaN` and the other is not infinite \*  
`fun hypot(x: Double, y: Double): Double = nativeMath.hypot(x, y)` \* Computes the positive square root of the value `[x]`. \* Special cases: \* `sqrt(x)` is `NaN` when `x < 0` or `x` is `NaN` \*  
`fun sqrt(x: Double): Double = nativeMath.sqrt(x)` \* Computes Euler's number `e` raised to the power of the value `[x]`. \* Special cases: \* `exp(NaN)` is `NaN` \* `exp(+Inf)` is `+Inf` \* `exp(-Inf)` is `0.0` \*  
`fun exp(x: Double): Double = nativeMath.exp(x)` \* Computes `exp(x) - 1`. \* This function can be implemented to produce more precise result for `[x]` near zero. \* Special cases: \* `expm1(NaN)` is `NaN` \* `expm1(+Inf)` is `+Inf` \* `expm1(-Inf)` is `-1.0` \* @see `[exp]` function. \*  
`fun expm1(x: Double): Double = nativeMath.expm1(x)` \* Computes the logarithm of the value `[x]` to the given `[base]`. \* Special cases: \* `log(x, b)` is `NaN` if either `x` or `b` are `NaN` \* `log(x, b)` is `NaN` when `x < 0` or `b <= 0` or `b == 1.0` \* `log(+Inf, +Inf)` is `NaN` \* `log(+Inf, b)` is `+Inf` for `b > 1` and `-Inf` for `b < 1` \* `log(0.0, b)` is `-Inf` for `b > 1` and `+Inf` for `b > 1` \* See also logarithm functions for common fixed bases: `[ln]`, `[log10]` and `[log2]`. \*  
`fun log(x: Double, base: Double): Double { if (base <= 0.0 || base == 1.0) return Double.NaN return nativeMath.log(x) / nativeMath.log(base)}` \* Computes the natural logarithm (base `E`) of the value `[x]`. \* Special cases: \* `ln(NaN)` is `NaN` \* `ln(x)` is `NaN` when `x < 0.0` \* `ln(+Inf)` is `+Inf` \* `ln(0.0)` is `-Inf` \*  
`fun ln(x: Double): Double = nativeMath.log(x)` \* Computes the common logarithm (base 10) of the value `[x]`. \* @see `[ln]` function for special cases. \*  
`fun log10(x: Double): Double = nativeMath.log10(x)` \* Computes the binary logarithm (base 2) of the value `[x]`. \* @see `[ln]` function for special cases. \*  
`fun log2(x: Double): Double = nativeMath.log2(x)` \* Computes `ln(x + 1)`. \* This function can be implemented to produce more precise result for `[x]` near zero. \* Special cases: \* `ln1p(NaN)` is `NaN` \* `ln1p(x)` is `NaN` where `x < -1.0` \* `ln1p(-1.0)` is `-Inf` \* `ln1p(+Inf)` is `+Inf` \* @see `[ln]` function \* @see `[expm1]` function \*  
`fun ln1p(x: Double): Double = nativeMath.log1p(x)` \* Rounds the given value `[x]` to an integer towards positive infinity. \* @return the smallest double value that is greater than the given value `[x]` and is a mathematical integer. \* Special cases: \* `ceil(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer. \*  
`fun ceil(x: Double): Double = nativeMath.ceil(x).unsafeCast<Double>() // TODO: Remove unsafe cast after removing public js.math` \* Rounds the given value `[x]` to an integer towards negative infinity. \* @return the largest double value that is smaller than the given value `[x]` and is a mathematical integer. \* Special cases: \* `floor(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer. \*  
`fun floor(x: Double): Double = nativeMath.floor(x).unsafeCast<Double>()` \* Rounds the given value `[x]` to an integer towards zero. \* @return the value `[x]` having its fractional part truncated. \* Special cases: \* `truncate(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer. \*  
`fun truncate(x: Double): Double = nativeMath.trunc(x)` \* Rounds the given value `[x]` towards the closest integer with ties rounded towards even integer. \* Special cases: \* `round(x)` is `x` where `x` is

*/\n\n@file:kotlin.jvm.JvmName("\nGroupingKt")\n\n@file:kotlin.jvm.JvmMultifileClass\n\npackage
kotlin.collections\n\n/**\n * Represents a source of elements with a [keyOf] function, which can be applied to each
element to get its key.\n * A [Grouping] structure serves as an intermediate step in group-and-fold operations:\n * they group elements by their keys and then fold each group with some aggregating operation.\n * It is created
by attaching `keySelector: (T) -> K` function to a source of elements.\n * To get an instance of [Grouping] use one
of `groupingBy` extension functions:\n * - [Iterable.groupingBy]\n * - [Sequence.groupingBy]\n * -
[Array.groupingBy]\n * - [CharSequence.groupingBy]\n * For the list of group-and-fold operations available,
see the [extension functions](#extension-functions) for `Grouping`.\n *\n\n@SinceKotlin("1.1")\n\npublic interface
Grouping<T, out K> {\n  /** Returns an [Iterator] over the elements of the source of this grouping. *\n  fun
sourceIterator(): Iterator<T>\n  /** Extracts the key of an [element]. *\n  fun keyOf(element: T): K}\n\n/**\n * Groups elements from the [Grouping] source by key and applies [operation] to the elements of each group
sequentially,\n * passing the previously accumulated value and the current element as arguments, and stores the
results in a new map.\n * The key for each element is provided by the [Grouping.keyOf] function.\n *\n * @param operation function is invoked on each element with the following parameters:\n * - `key`: the key of the
group this element belongs to;\n * - `accumulator`: the current value of the accumulator of the group, can be `null`
if it's the first `element` encountered in the group;\n * - `element`: the element from the source being aggregated;\n * - `first`: indicates whether it's the first `element` encountered in the group.\n *\n * @return a [Map] associating
the key of each group with the result of aggregation of the group elements.\n *\n\n@SinceKotlin("1.1")\n\npublic
inline fun <T, K, R> Grouping<T, K>.aggregate(\n  operation: (key: K, accumulator: R?, element: T, first:
Boolean) -> R): Map<K, R> {\n  return aggregateTo(mutableMapOf<K, R>(), operation)\n}\n\n/**\n * Groups
elements from the [Grouping] source by key and applies [operation] to the elements of each group sequentially,\n *
passing the previously accumulated value and the current element as arguments,\n * and stores the results in the
given [destination] map.\n * The key for each element is provided by the [Grouping.keyOf] function.\n *\n

```

@param operation a function that is invoked on each element with the following parameters:  
 · `key`: the key of the group this element belongs to;  
 · `accumulator`: the current value of the accumulator of the group, can be `null` if it's the first element encountered in the group;  
 · `element`: the element from the source being aggregated;  
 · `first`: indicates whether it's the first element encountered in the group.

If the [destination] map already has a value corresponding to some key, then the elements being aggregated for that key are never considered as `first`.

@return the [destination] map associating the key of each group with the result of aggregation of the group elements.

```

@SinceKotlin("1.1")
public inline fun <T, K, R, M : MutableMap<in K, R>> Grouping<T, K>.aggregateTo(
    destination: M,
    operation: (key: K, accumulator: R?, element: T, first: Boolean) -> R): M {
    for (e in this.sourceIterator()) {
        val key = keyOf(e)
        val accumulator = destination[key]
        destination[key] = operation(key, accumulator, e, accumulator == null && !destination.containsKey(key))
    }
    return destination
}

```

Groups elements from the [Grouping] source by key and applies [operation] to the elements of each group sequentially, passing the previously accumulated value and the current element as arguments, and stores the results in a new map. An initial value of accumulator is provided by [initialValueSelector] function.

@param initialValueSelector a function that provides an initial value of accumulator for each group. It's invoked with parameters:  
 · `key`: the key of the group;  
 · `element`: the first element being encountered in that group.

@param operation a function that is invoked on each element with the following parameters:  
 · `key`: the key of the group this element belongs to;  
 · `accumulator`: the current value of the accumulator of the group;  
 · `element`: the element from the source being accumulated.

@return a [Map] associating the key of each group with the result of accumulating the group elements.

```

@SinceKotlin("1.1")
public inline fun <T, K, R> Grouping<T, K>.fold(
    initialValueSelector: (key: K, element: T) -> R,
    operation: (key: K, accumulator: R, element: T) -> R): Map<K, R> =
    @Suppress("UNCHECKED_CAST")
    aggregate { key, acc, e, first -> operation(key, if (first) initialValueSelector(key, e) else acc as R, e) }

```

Groups elements from the [Grouping] source by key and applies [operation] to the elements of each group sequentially, passing the previously accumulated value and the current element as arguments, and stores the results in the given [destination] map. An initial value of accumulator is provided by [initialValueSelector] function.

@param initialValueSelector a function that provides an initial value of accumulator for each group. It's invoked with parameters:  
 · `key`: the key of the group;  
 · `element`: the first element being encountered in that group.

If the [destination] map already has a value corresponding to some key, that value is used as an initial value of the accumulator for that group and the [initialValueSelector] function is not called for that group.

@param operation a function that is invoked on each element with the following parameters:  
 · `key`: the key of the group this element belongs to;  
 · `accumulator`: the current value of the accumulator of the group;  
 · `element`: the element from the source being accumulated.

@return the [destination] map associating the key of each group with the result of accumulating the group elements.

```

@SinceKotlin("1.1")
public inline fun <T, K, R, M : MutableMap<in K, R>> Grouping<T, K>.foldTo(
    destination: M,
    initialValueSelector: (key: K, element: T) -> R,
    operation: (key: K, accumulator: R, element: T) -> R): M =
    @Suppress("UNCHECKED_CAST")
    aggregateTo(destination) { key, acc, e, first -> operation(key, if (first) initialValueSelector(key, e) else acc as R, e) }

```

Groups elements from the [Grouping] source by key and applies [operation] to the elements of each group sequentially, passing the previously accumulated value and the current element as arguments, and stores the results in a new map. An initial value of accumulator is the same [initialValue] for each group.

@param operation a function that is invoked on each element with the following parameters:  
 · `accumulator`: the current value of the accumulator of the group;  
 · `element`: the element from the source being accumulated.

@return a [Map] associating the key of each group with the result of accumulating the group elements.

```

@SinceKotlin("1.1")
public inline fun <T, K, R> Grouping<T, K>.fold(
    initialValue: R,
    operation: (accumulator: R, element: T) -> R): Map<K, R> =
    @Suppress("UNCHECKED_CAST")
    aggregate { _, acc, e, first -> operation(if (first) initialValue else acc as R, e) }

```

Groups elements from the [Grouping] source by key and applies [operation] to the elements of each group sequentially, passing the previously accumulated value and the current element as arguments, and stores the results in the given

[destination] map.  
 \* An initial value of accumulator is the same [initialValue] for each group.  
 \* If the [destination] map already has a value corresponding to the key of some group,  
 \* that value is used as an initial value of the accumulator for that group.  
 \* @param operation a function that is invoked on each element with the following parameters:  
 \* - `accumulator`: the current value of the accumulator of the group;  
 \* - `element`: the element from the source being accumulated.  
 \* @return the [destination] map associating the key of each group with the result of accumulating the group elements.

```

  *^@SinceKotlin("1.1")

```

```

groups in a single match of a regular expression.
 * This collection has size of `groupCount + 1` where
`groupCount` is the count of groups in the regular expression.
 * Groups are indexed from 1 to `groupCount` and
group with the index 0 corresponds to the entire match.
 * An element of the collection at the particular index
can be `null`,
 * if the corresponding group in the regular expression is optional and
 * there was no match
captured by that group.
 * public interface MatchGroupCollection : Collection<MatchGroup?> {
 * Returns a group with the specified [index].
 * @return An instance of [MatchGroup] if the group with the
specified [index] was matched or `null` otherwise.
 * Groups are indexed from 1 to the count of groups in
the regular expression. A group with the index 0
 * corresponds to the entire match.
 * public operator
fun get(index: Int): MatchGroup?
 * Extends [MatchGroupCollection] by introducing a way to get
matched groups by name, when regex supports it.
 * @SinceKotlin("1.1")
 * public interface
MatchNamedGroupCollection : MatchGroupCollection {
 * Returns a named group with the specified
[name].
 * @return An instance of [MatchGroup] if the group with the specified [name] was matched or `null`
otherwise.
 * public operator fun get(name: String): MatchGroup?
 * Represents the results from
a single regular expression match.
 * public interface MatchResult {
 * The range of indices in the original
string where match was captured.
 * public val range: IntRange
 * The substring from the input string
captured by this match.
 * public val value: String
 * A collection of groups matched by the regular
expression.
 * This collection has size of `groupCount + 1` where `groupCount` is the count of groups in
the regular expression.
 * Groups are indexed from 1 to `groupCount` and group with the index 0 corresponds to
the entire match.
 * public val groups: MatchGroupCollection
 * A list of matched indexed group
values.
 * This list has size of `groupCount + 1` where `groupCount` is the count of groups in the regular
expression.
 * Groups are indexed from 1 to `groupCount` and group with the index 0 corresponds to the entire
match.
 * If the group in the regular expression is optional and there were no match captured by that
group,
 * corresponding item in [groupValues] is an empty string.
 * @sample:
samples.text.Regexps.matchDestructuringToGroupValues
 * public val groupValues: List<String>
 * An instance of [MatchResult.Destructured] wrapper providing components for destructuring assignment
of group values.
 * component1 corresponds to the value of the first group, component2
 * of the second, and so on.
 * @sample: samples.text.Regexps.matchDestructuring
 * public val
destructured: Destructured
get() = Destructured(this)
 * Returns a new [MatchResult] with the results for the
next match, starting at the position
 * at which the last match ended (at the character after the last matched
character).
 * public fun next(): MatchResult?
 * Provides components for destructuring
assignment of group values.
 * [component1] corresponds to the value of the first group, [component2]
 * of the second, and so on.
 * If the group in the regular expression is optional and there were no
match captured by that group,
 * corresponding component value is an empty string.
 * @sample:
samples.text.Regexps.matchDestructuringToGroupValues
 * public class Destructured internal

\* @see [exp] function.  
`public expect fun expm1(x: Double): Double`  
 Computes the logarithm of the value [x] to the given [base].  
 Special cases:  
 - `log(x, b)` is `NaN` if either `x` or `b` are `NaN`  
 - `log(x, b)` is `NaN` when `x < 0` or `b <= 0` or `b == 1.0`  
 - `log(+Inf, +Inf)` is `NaN`  
 - `log(+Inf, b)` is `+Inf` for `b > 1` and `-Inf` for `b < 1`  
 - `log(0.0, b)` is `-Inf` for `b > 1` and `+Inf` for `b < 1`  
 See also logarithm functions for common fixed bases: `[ln]`, `[log10]` and `[log2]`.

\*  
`public expect fun log(x: Double, base: Double): Double`  
 Computes the natural logarithm (base `E`) of the value [x].  
 Special cases:  
 - `ln(NaN)` is `NaN`  
 - `ln(x)` is `NaN` when `x < 0.0`  
 - `ln(+Inf)` is `+Inf`  
 - `ln(0.0)` is `-Inf`

\*  
`public expect fun ln(x: Double): Double`  
 Computes the common logarithm (base 10) of the value [x].  
 @see `[ln]` function for special cases.

\*  
`public expect fun log10(x: Double): Double`  
 Computes the binary logarithm (base 2) of the value [x].  
 @see `[ln]` function for special cases.

\*  
`public expect fun log2(x: Double): Double`  
 Computes `ln(x + 1)`.  
 This function can be implemented to produce more precise result for [x] near zero.  
 Special cases:  
 - `ln1p(NaN)` is `NaN`  
 - `ln1p(x)` is `NaN` where `x < -1.0`  
 - `ln1p(-1.0)` is `-Inf`  
 - `ln1p(+Inf)` is `+Inf`  
 @see `[ln]` function  
 @see `[expm1]` function

\*  
`public expect fun ln1p(x: Double): Double`  
 Rounds the given value [x] to an integer towards positive infinity.  
 @return the smallest double value that is greater than the given value [x] and is a mathematical integer.  
 Special cases:  
 - `ceil(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

\*  
`public expect fun ceil(x: Double): Double`  
 Rounds the given value [x] to an integer towards negative infinity.  
 @return the largest double value that is smaller than the given value [x] and is a mathematical integer.  
 Special cases:  
 - `floor(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

\*  
`public expect fun floor(x: Double): Double`  
 Rounds the given value [x] to an integer towards zero.  
 @return the value [x] having its fractional part truncated.  
 Special cases:  
 - `truncate(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

\*  
`public expect fun truncate(x: Double): Double`  
 Rounds the given value [x] towards the closest integer with ties rounded towards even integer.  
 Special cases:  
 - `round(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

\*  
`public expect fun round(x: Double): Double`  
 Returns the absolute value of the given value [x].  
 Special cases:  
 - `abs(NaN)` is `NaN`  
 @see `absoluteValue` extension property for `[Double]`

\*  
`public expect fun abs(x: Double): Double`  
 Returns the sign of the given value [x]:  
 - `-1.0` if the value is negative,  
 - zero if the value is zero,  
 - `1.0` if the value is positive  
 Special case:  
 - `sign(NaN)` is `NaN`

\*  
`public expect fun sign(x: Double): Double`  
 Returns the smaller of two values.  
 If either value is `NaN`, then the result is `NaN`.  
 @see `[min]`

\*  
`public expect fun min(a: Double, b: Double): Double`  
 Returns the greater of two values.  
 If either value is `NaN`, then the result is `NaN`.  
 @see `[max]`

\*  
`public expect fun max(a: Double, b: Double): Double`  
 // extensions  
 Raises this value to the power [x].  
 Special cases:  
 - `b.pow(0.0)` is `1.0`  
 - `b.pow(1.0) == b`  
 - `b.pow(NaN)` is `NaN`  
 - `NaN.pow(x)` is `NaN` for `x != 0.0`  
 - `b.pow(Inf)` is `NaN` for `abs(b) == 1.0`  
 - `b.pow(x)` is `NaN` for `b < 0` and `x` is finite and not an integer

\*  
`public expect fun Double.pow(x: Double): Double`  
 Raises this value to the integer power [n].  
 See the other overload of `[pow]` for details.

\*  
`public expect fun Double.pow(n: Int): Double`  
 Returns the absolute value of this value.  
 Special cases:  
 - `NaN.absoluteValue` is `NaN`  
 @see `abs` function

\*  
`public expect val Double.absoluteValue: Double`  
 Returns the sign of this value:  
 - `-1.0` if the value is negative,  
 - zero if the value is zero,  
 - `1.0` if the value is positive  
 Special case:  
 - `NaN.sign` is `NaN`

\*  
`public expect val Double.sign: Double`  
 Returns this value with the sign bit same as of the `[sign]` value.  
 If `[sign]` is `NaN` the sign of the result is undefined.

\*  
`public expect fun Double.withSign(sign: Double): Double`  
 Returns this value with the sign bit same as of the `[sign]` value.

`public expect fun asinh(x: Float): Float` Computes the inverse hyperbolic cosine of the value [x]. The returned value is positive `y` such that `cosh(y) == x`. Special cases: `acosh(NaN)` is `NaN` - `acosh(x)` is `NaN` when `x < 1` - `acosh(+Inf)` is `+Inf`

`public expect fun acosh(x: Float): Float` Computes the inverse hyperbolic tangent of the value [x]. The returned value is `y` such that `tanh(y) == x`. Special cases: `tanh(NaN)` is `NaN` - `tanh(x)` is `NaN` when `x > 1` or `x < -1` - `tanh(1.0)` is `+Inf` - `tanh(-1.0)` is `-Inf`

`public expect fun atanh(x: Float): Float` Computes `sqrt(x^2 + y^2)` without intermediate overflow or underflow. Special cases: - returns `+Inf` if any of arguments is infinite - returns `NaN` if any of arguments is `NaN` and the other is not infinite

`public expect fun hypot(x: Float, y: Float): Float` Computes the positive square root of the value [x]. Special cases: `sqrt(x)` is `NaN` when `x < 0` or `x` is `NaN`

`public expect fun sqrt(x: Float): Float` Computes Euler's number `e` raised to the power of the value [x]. Special cases: `exp(NaN)` is `NaN` - `exp(+Inf)` is `+Inf` - `exp(-Inf)` is `0.0`

`public expect fun exp(x: Float): Float` Computes `exp(x) - 1`. This function can be implemented to produce more precise result for [x] near zero. Special cases: `expm1(NaN)` is `NaN` - `expm1(+Inf)` is `+Inf` - `expm1(-Inf)` is `-1.0` @see [exp] function

`public expect fun expm1(x: Float): Float` Computes the logarithm of the value [x] to the given [base]. Special cases: `log(x, b)` is `NaN` if either `x` or `b` are `NaN` - `log(x, b)` is `NaN` when `x < 0` or `b <= 0` or `b == 1.0` - `log(+Inf, +Inf)` is `NaN` - `log(+Inf, b)` is `+Inf` for `b > 1` and `-Inf` for `b < 1` - `log(0.0, b)` is `-Inf` for `b > 1` and `+Inf` for `b > 1`

See also logarithm functions for common fixed bases: [ln], [log10] and [log2].

`public expect fun log(x: Float, base: Float): Float` Computes the natural logarithm (base `E`) of the value [x]. Special cases: `ln(NaN)` is `NaN` - `ln(x)` is `NaN` when `x < 0.0` - `ln(+Inf)` is `+Inf` - `ln(0.0)` is `-Inf`

`public expect fun ln(x: Float): Float` Computes the common logarithm (base 10) of the value [x]. @see [ln] function for special cases.

`public expect fun log10(x: Float): Float` Computes the binary logarithm (base 2) of the value [x]. @see [ln] function for special cases.

`public expect fun log2(x: Float): Float` Computes `ln(a + 1)`. This function can be implemented to produce more precise result for [x] near zero. Special cases: `ln1p(NaN)` is `NaN` - `ln1p(x)` is `NaN` where `x < -1.0` - `ln1p(-1.0)` is `-Inf` - `ln1p(+Inf)` is `+Inf` @see [ln] function @see [expm1] function

`public expect fun ln1p(x: Float): Float` Rounds the given value [x] to an integer towards positive infinity. @return the smallest Float value that is greater than the given value [x] and is a mathematical integer. Special cases: `ceil(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

`public expect fun ceil(x: Float): Float` Rounds the given value [x] to an integer towards negative infinity. @return the largest Float value that is smaller than the given value [x] and is a mathematical integer. Special cases: `floor(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

`public expect fun floor(x: Float): Float` Rounds the given value [x] to an integer towards zero. @return the value [x] having its fractional part truncated. Special cases: `truncate(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

`public expect fun truncate(x: Float): Float` Rounds the given value [x] towards the closest integer with ties rounded towards even integer. Special cases: `round(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

`public expect fun round(x: Float): Float` Returns the absolute value of the given value [x]. Special cases: `abs(NaN)` is `NaN` @see absoluteValue extension property for [Float]

`public expect fun abs(x: Float): Float` Returns the sign of the given value [x]: `-1.0` if the value is negative, `0.0` if the value is zero, `1.0` if the value is positive. Special case: `sign(NaN)` is `NaN`

`public expect fun sign(x: Float): Float` Returns the smaller of two values. If either value is `NaN`, then the result is

`NaN`.  
`SinceKotlin("1.2")` public expect fun `min(a: Float, b: Float): Float` Returns the greater of two values.  
`SinceKotlin("1.2")` public expect fun `max(a: Float, b: Float): Float` Raises this value to the power `[x]`.  
Special cases:  
`b.pow(0.0)` is `1.0`  
`b.pow(1.0)` is `b`  
`b.pow(NaN)` is `NaN`  
`NaN.pow(x)` is `NaN` for `x != 0.0`  
`b.pow(Inf)` is `NaN` for `abs(b) == 1.0`  
`b.pow(x)` is `NaN` for `b < 0` and `x` is finite and not an integer.  
`SinceKotlin("1.2")` public expect fun `Float.pow(x: Float): Float` Raises this value to the integer power `[n]`.  
See the other overload of `[pow]` for details.  
`SinceKotlin("1.2")` public expect fun `Float.pow(n: Int): Float` Returns the absolute value of this value.  
Special cases:  
`NaN.absoluteValue` is `NaN`  
@see `abs` function  
`SinceKotlin("1.2")` public expect val `Float.absoluteValue: Float` Returns the sign of this value:  
`-1.0` if the value is negative,  
`0` if the value is zero,  
`1.0` if the value is positive  
Special case:  
`NaN.sign` is `NaN`  
`SinceKotlin("1.2")` public expect val `Float.sign: Float` Returns this value with the sign bit same as of the `[sign]` value.  
If `[sign]` is `NaN` the sign of the result is undefined.  
`SinceKotlin("1.2")` public expect fun `Float.withSign(sign: Float): Float` Returns this value with the sign bit same as of the `[sign]` value.  
`SinceKotlin("1.2")` public expect fun `Float.withSign(sign: Int): Float` Rounds this `[Float]` value to the nearest integer and converts the result to `[Int]`.  
Ties are rounded towards positive infinity.  
Special cases:  
`x.roundToInt() == Int.MAX_VALUE` when `x > Int.MAX_VALUE`  
`x.roundToInt() == Int.MIN_VALUE` when `x < Int.MIN_VALUE`  
@throws `IllegalArgumentException` when this value is `NaN`  
`Float.roundToInt(): Int` Rounds this `[Float]` value to the nearest integer and converts the result to `[Long]`.  
Ties are rounded towards positive infinity.  
Special cases:  
`x.roundToLong() == Long.MAX_VALUE` when `x > Long.MAX_VALUE`  
`x.roundToLong() == Long.MIN_VALUE` when `x < Long.MIN_VALUE`  
@throws `IllegalArgumentException` when this value is `NaN`  
`Float.roundToLong(): Long` Returns the absolute value of the given value `[n]`.  
Special cases:  
`abs(Int.MIN_VALUE)` is `Int.MIN_VALUE` due to an overflow  
@see `absoluteValue` extension property for `[Int]`  
`SinceKotlin("1.2")` public expect fun `abs(n: Int): Int` Returns the smaller of two values.  
`SinceKotlin("1.2")` public expect fun `min(a: Int, b: Int): Int` Returns the greater of two values.  
`SinceKotlin("1.2")` public expect fun `max(a: Int, b: Int): Int` Returns the absolute value of this value.  
Special cases:  
`Int.MIN_VALUE.absoluteValue` is `Int.MIN_VALUE` due to an overflow  
@see `abs` function  
`SinceKotlin("1.2")` public expect val `Int.absoluteValue: Int` Returns the sign of this value:  
`-1` if the value is negative,  
`0` if the value is zero,  
`1` if the value is positive  
`SinceKotlin("1.2")` public expect val `Int.sign: Int` Returns the absolute value of the given value `[n]`.  
Special cases:  
`abs(Long.MIN_VALUE)` is `Long.MIN_VALUE` due to an overflow  
@see `absoluteValue` extension property for `[Long]`  
`SinceKotlin("1.2")` public expect fun `abs(n: Long): Long` Returns the smaller of two values.  
`SinceKotlin("1.2")` public expect fun `min(a: Long, b: Long): Long` Returns the greater of two values.  
`SinceKotlin("1.2")` public expect fun `max(a: Long, b: Long): Long` Returns the absolute value of this value.  
Special cases:  
`Long.MIN_VALUE.absoluteValue` is `Long.MIN_VALUE` due to an overflow  
@see `abs` function  
`SinceKotlin("1.2")` public expect val `Long.absoluteValue: Long` Returns the sign of this value:  
`-1` if the value is negative,  
`0` if the value is zero,  
`1` if the value is positive  
`SinceKotlin("1.2")` public expect val `Long.sign: Int`

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications

represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without

modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade

names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
  
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
  
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier

identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");

you may not use this file except in compliance with the License.

You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software

distributed under the License is distributed on an "AS IS" BASIS,

WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied.

See the License for the specific language governing permissions and

limitations under the License.

Full text: <http://creativecommons.org/licenses/by/2.5/legalcode>

License

THE WORK (AS DEFINED BELOW) IS PROVIDED UNDER THE TERMS OF THIS CREATIVE COMMONS PUBLIC LICENSE ("CCPL" OR "LICENSE"). THE WORK IS PROTECTED BY COPYRIGHT AND/OR OTHER APPLICABLE LAW. ANY USE OF THE WORK OTHER THAN AS AUTHORIZED UNDER THIS LICENSE OR COPYRIGHT LAW IS PROHIBITED.

BY EXERCISING ANY RIGHTS TO THE WORK PROVIDED HERE, YOU ACCEPT AND AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. THE LICENSOR GRANTS YOU THE RIGHTS CONTAINED HERE IN CONSIDERATION OF YOUR ACCEPTANCE OF SUCH TERMS AND CONDITIONS.

## 1. Definitions

"Collective Work" means a work, such as a periodical issue, anthology or encyclopedia, in which the Work in its entirety in unmodified form, along with a number of other contributions, constituting separate and independent works in themselves, are assembled into a collective whole. A work that constitutes a Collective Work will not be considered a Derivative Work (as defined below) for the purposes of this License.

"Derivative Work" means a work based upon the Work or upon the Work and other pre-existing works, such as a translation, musical arrangement, dramatization, fictionalization, motion picture version, sound recording, art reproduction, abridgment, condensation, or any other form in which the Work may be recast, transformed, or adapted, except that a work that constitutes a Collective Work will not be considered a Derivative Work for the purpose of this License. For the avoidance of doubt, where the Work is a musical composition or sound recording, the synchronization of the Work in timed-relation with a moving image ("synching") will be considered a Derivative

Work for the purpose of this License.

"Licensor" means the individual or entity that offers the Work under the terms of this License.

"Original Author" means the individual or entity who created the Work.

"Work" means the copyrightable work of authorship offered under the terms of this License.

"You" means an individual or entity exercising rights under this License who has not previously violated the terms of this License with respect to the Work, or who has received express permission from the Licensor to exercise rights under this License despite a previous violation.

2. Fair Use Rights. Nothing in this license is intended to reduce, limit, or restrict any rights arising from fair use, first sale or other limitations on the exclusive rights of the copyright owner under copyright law or other applicable laws.

3. License Grant. Subject to the terms and conditions of this License, Licensor hereby grants You a worldwide, royalty-free, non-exclusive, perpetual (for the duration of the applicable copyright) license to exercise the rights in the Work as stated below:

to reproduce the Work, to incorporate the Work into one or more Collective Works, and to reproduce the Work as incorporated in the Collective Works;

to create and reproduce Derivative Works;

to distribute copies or phonorecords of, display publicly, perform publicly, and perform publicly by means of a digital audio transmission the Work including as incorporated in Collective Works;

to distribute copies or phonorecords of, display publicly, perform publicly, and perform publicly by means of a digital audio transmission Derivative Works.

For the avoidance of doubt, where the work is a musical composition:

Performance Royalties Under Blanket Licenses. Licensor waives the exclusive right to collect, whether individually or via a performance rights society (e.g. ASCAP, BMI, SESAC), royalties for the public performance or public digital performance (e.g. webcast) of the Work.

Mechanical Rights and Statutory Royalties. Licensor waives the exclusive right to collect, whether individually or via a music rights agency or designated agent (e.g. Harry Fox Agency), royalties for any phonorecord You create from the Work ("cover version") and distribute, subject to the compulsory license created by 17 USC Section 115 of the US Copyright Act (or the equivalent in other jurisdictions).

Webcasting Rights and Statutory Royalties. For the avoidance of doubt, where the Work is a sound recording, Licensor waives the exclusive right to collect, whether individually or via a performance-rights society (e.g. SoundExchange), royalties for the public digital performance (e.g. webcast) of the Work, subject to the compulsory license created by 17 USC Section 114 of the US Copyright Act (or the equivalent in other jurisdictions).

The above rights may be exercised in all media and formats whether now known or hereafter devised. The above rights include the right to make such modifications as are technically necessary to exercise the rights in other media and formats. All rights not expressly granted by Licensor are hereby reserved.

4. Restrictions. The license granted in Section 3 above is expressly made subject to and limited by the following restrictions:

You may distribute, publicly display, publicly perform, or publicly digitally perform the Work only under the terms of this License, and You must include a copy of, or the Uniform Resource Identifier for, this License with every copy or phonorecord of the Work You distribute, publicly display, publicly perform, or publicly digitally perform. You may not offer or impose any terms on the Work that alter or restrict the terms of this License or the

recipients' exercise of the rights granted hereunder. You may not sublicense the Work. You must keep intact all notices that refer to this License and to the disclaimer of warranties. You may not distribute, publicly display, publicly perform, or publicly digitally perform the Work with any technological measures that control access or use of the Work in a manner inconsistent with the terms of this License Agreement. The above applies to the Work as incorporated in a Collective Work, but this does not require the Collective Work apart from the Work itself to be made subject to the terms of this License. If You create a Collective Work, upon notice from any Licensor You must, to the extent practicable, remove from the Collective Work any credit as required by clause 4(b), as requested. If You create a Derivative Work, upon notice from any Licensor You must, to the extent practicable, remove from the Derivative Work any credit as required by clause 4(b), as requested.

If you distribute, publicly display, publicly perform, or publicly digitally perform the Work or any Derivative Works or Collective Works, You must keep intact all copyright notices for the Work and provide, reasonable to the medium or means You are utilizing: (i) the name of the Original Author (or pseudonym, if applicable) if supplied, and/or (ii) if the Original Author and/or Licensor designate another party or parties (e.g. a sponsor institute, publishing entity, journal) for attribution in Licensor's copyright notice, terms of service or by other reasonable means, the name of such party or parties; the title of the Work if supplied; to the extent reasonably practicable, the Uniform Resource Identifier, if any, that Licensor specifies to be associated with the Work, unless such URI does not refer to the copyright notice or licensing information for the Work; and in the case of a Derivative Work, a credit identifying the use of the Work in the Derivative Work (e.g., "French translation of the Work by Original Author," or "Screenplay based on original Work by Original Author"). Such credit may be implemented in any reasonable manner; provided, however, that in the case of a Derivative Work or Collective Work, at a minimum such credit will appear where any other comparable authorship credit appears and in a manner at least as prominent as such other comparable authorship credit.

#### 5. Representations, Warranties and Disclaimer

UNLESS OTHERWISE MUTUALLY AGREED TO BY THE PARTIES IN WRITING, LICENSOR OFFERS THE WORK AS-IS AND MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND CONCERNING THE WORK, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF TITLE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NONINFRINGEMENT, OR THE ABSENCE OF LATENT OR OTHER DEFECTS, ACCURACY, OR THE PRESENCE OF ABSENCE OF ERRORS, WHETHER OR NOT DISCOVERABLE. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OF IMPLIED WARRANTIES, SO SUCH EXCLUSION MAY NOT APPLY TO YOU.

6. Limitation on Liability. EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT WILL LICENSOR BE LIABLE TO YOU ON ANY LEGAL THEORY FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES ARISING OUT OF THIS LICENSE OR THE USE OF THE WORK, EVEN IF LICENSOR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### 7. Termination

This License and the rights granted hereunder will terminate automatically upon any breach by You of the terms of this License. Individuals or entities who have received Derivative Works or Collective Works from You under this License, however, will not have their licenses terminated provided such individuals or entities remain in full compliance with those licenses. Sections 1, 2, 5, 6, 7, and 8 will survive any termination of this License.

Subject to the above terms and conditions, the license granted here is perpetual (for the duration of the applicable copyright in the Work). Notwithstanding the above, Licensor reserves the right to release the Work under different

license terms or to stop distributing the Work at any time; provided, however that any such election will not serve to withdraw this License (or any other license that has been, or is required to be, granted under the terms of this License), and this License will continue in full force and effect unless terminated as stated above.

## 8. Miscellaneous

Each time You distribute or publicly digitally perform the Work or a Collective Work, the Licensor offers to the recipient a license to the Work on the same terms and conditions as the license granted to You under this License.

Each time You distribute or publicly digitally perform a Derivative Work, Licensor offers to the recipient a license to the original Work on the same terms and conditions as the license granted to You under this License.

If any provision of this License is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this License, and without further action by the parties to this agreement, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

No term or provision of this License shall be deemed waived and no breach consented to unless such waiver or consent shall be in writing and signed by the party to be charged with such waiver or consent.

This License constitutes the entire agreement between the parties with respect to the Work licensed here. There are no understandings, agreements or representations with respect to the Work not specified here. Licensor shall not be bound by any additional provisions that may appear in any communication from You. This License may not be modified without the mutual written agreement of the Licensor and You.

# 1.37 saxon-xslt-and-xquery-processor 10.1

## 1.37.1 Available under license :

No license file was found, but licenses were detected in source scan.

<!-- SVG 1.1 Font Module ..... -->
<!-- file: svg-font.mod
```

This is SVG, a language for describing two-dimensional graphics in XML.  
Copyright 2001, 2002 W3C (MIT, INRIA, Keio), All Rights Reserved.  
Revision: \$Id: svg-font.mod,v 1.4 2002/11/14 15:11:02 fujisawa Exp \$

This DTD module is identified by the PUBLIC and SYSTEM identifiers:

```
PUBLIC "-//W3C//ELEMENTS SVG 1.1 Font//EN"
SYSTEM "http://www.w3.org/Graphics/SVG/1.1/DTD/svg-font.mod"
```

```
..... -->
```

```
<!-- Font
```

```
font, font-face, glyph, missing-glyph, hkern, vkern, font-face-src,
font-face-uri, font-face-format, font-face-name, definition-src
```

This module declares markup to provide support for template.

```
<!-- Basic Tables
```

table, caption, tr, th, td

This table module declares elements and attributes defining a table model based fundamentally on features found in the widely-deployed HTML 3.2 table model. While this module mimics the content model and table attributes of HTML 3.2 tables, the element types declared herein also includes all HTML 4 common and most of the HTML 4 table attributes.

```

<!-- Common Attributes

This module declares many of the common attributes for the XHTML DTD.

%NS.decl.attrib; is declared in the XHTML QName module.

Note that this file was extended in XHTML Modularization 1.1 to include declarations of "global" versions of the attribute collections. The global versions of the attributes are for use on elements in other namespaces. The global version of "common" includes the xmlns declaration for the prefixed version of the xhtml namespace. If you are only using a specific attribute or an individual attribute collection, you must also include the XHTML.xmlns.attrib.prefixed PE on your elements.

<!-- SVG Template Qualified Name Module ..... -->
<!-- file: svg-template-qname.mod

```

This is SVG, a language for describing two-dimensional graphics in XML.

Copyright 2001, 2002 W3C (MIT, INRIA, Keio), All Rights Reserved.

Revision: \$Id: svg-template-qname.mod,v 1.1 2002/04/20 18:08:11 fujisawa Exp \$

This DTD module is identified by the PUBLIC and SYSTEM identifiers:

```
PUBLIC "-//W3C//ENTITIES SVG Template Qualified Name//EN"
SYSTEM "svg-template-qname.mod"
```

```
..... -->
```

```
<!-- Template Qualified Name
```

This module is contained in two parts, labeled Section 'A' and 'B':

Section A declares parameter entities to support namespace-qualified names, namespace declarations, and name prefixing for SVG and extensions.

Section B declares parameter entities used to provide namespace-qualified names for all SVG element types:

```
-->
```

```
<!-- Section A: Template XML Namespace Framework ..... -->
```

```
<!-- 1. Declare a %MODULE.prefixed; conditional section keyword, used
to activate namespace prefixing. The default value should
inherit '%NS.prefixed;' from the DTD driver, so that unless
overridden, the default behaviour follows the overall DTD
prefixing scheme.
```

```
-->
```

```
<!ENTITY % NS.prefixed "IGNORE" >
<!ENTITY % MODULE.prefixed "%NS.prefixed;" >
```

```
<!-- 2. Declare a parameter entity (eg., %MODULE.xmlns;) containing
the URI reference used to identify the Template namespace:
```

```
-->
```

```
<!ENTITY % MODULE.xmlns "http://template-namespace-uri" >
```

```
<!-- 3. Declare parameter entities (eg., %MODULE.prefix;) containing
the default namespace prefix string(s) to use when prefixing
is enabled. This may be overridden in the DTD driver or the
internal subset of an document instance. If no default prefix
is desired, this may be declared as an empty string.
```

```
-->
```

```
<!ENTITY % MODULE.prefix "" >
```

```
<!-- 4. Declare parameter entities (eg., %MODULE.pfx;) containing the
colonized prefix(es) (eg., '%MODULE.prefix;:') used when
prefixing is active, an empty string when it is not.
```

```
-->
```

```
<![%MODULE.prefixed;[
<!ENTITY % MODULE.pfx "%MODULE.prefix;:" >
```

```

]]>
<!ENTITY % MODULE.pfx "" >

<!-- 5. The parameter entity %MODULE.xmlns.extra.attrib; may be
redeclared to contain any non-Template namespace declaration
attributes for namespaces embedded in SVG. The default
is an empty string.
-->
-->
<![%MODULE.pfx;[
<!ENTITY % MODULE.xmlns.extra.attrib
  "xmlns:%MODULE.prefix; %URI.datatype; #FIXED '%MODULE.xmlns;'" >
]]>
<!ENTITY % MODULE.xmlns.extra.attrib "" >

<!ENTITY % SVG.xmlns.extra.attrib
  "%MODULE.xmlns.extra.attrib;"
>

<!-- Section B: SVG Qualified Names :::::::::::::::::::: -->

<!-- 6. This section declares parameter entities used to provide
namespace-qualified names for all Template element types.
-->
-->

<!-- module: svg-template.mod ..... -->

<!-- Bidirectional Override (bdo) Element

This module declares the element 'bdo', used to override the Unicode bidirectional algorithm for selected fragments of text.

DEPENDENCIES:

Relies on the conditional section keyword %XHTML.bidi; declared as "INCLUDE". Bidirectional text support includes both the bdo element and the 'dir' attribute.

-->

```
<!ENTITY % bdo.element "INCLUDE" >
<![%bdo.element;[
<!ENTITY % bdo.content
  "( #PCDATA | %Inline.mix; )*"
>
<!ENTITY % bdo.qname "bdo" >
<!ELEMENT %bdo.qname; %bdo.content; >
<!-- end of bdo.element -->]]>
```

```
<!ENTITY % bdo.attlist "INCLUDE" >

```
<!-- Qualified Name
```

This module is contained in two parts, labeled Section 'A' and 'B':

Section A declares parameter entities to support namespace-

qualified names, namespace declarations, and name prefixing for SVG and extensions.

Section B declares parameter entities used to provide namespace-qualified names for all SVG element types:

-->

<!-- Section A: SVG XML Namespace Framework :::::::::::::::::::: -->

<!-- 1. Declare a %SVG.prefixes; conditional section keyword, used to activate namespace prefixing. The default value should inherit '%NS.prefixes;' from the DTD driver, so that unless overridden, the default behaviour follows the overall DTD prefixing scheme.

-->

<!ENTITY % NS.prefixes "IGNORE" >  
<!ENTITY % SVG.prefixes "%NS.prefixes;" >

<!-- 2. Declare a parameter entity (eg., %SVG.xmlns;) containing the URI reference used to identify the SVG namespace:

-->

<!ENTITY % SVG.xmlns "http://www.w3.org/2000/svg" >  
<!ENTITY % XLINK.xmlns "http://www.w3.org/1999/xlink" >

<!-- 3. Declare parameter entities (eg., %SVG.prefix;) containing the default namespace prefix string(s) to use when prefixing is enabled. This may be overridden in the DTD driver or the internal subset of an document instance. If no default prefix is desired, this may be declared as an empty string.

-->

<!ENTITY % SVG.prefix "" >  
<!ENTITY % XLINK.prefix "xlink" >

<!-- 4. Declare parameter entities (eg., %SVG.pfx;) containing the colonized prefix(es) (eg., '%SVG.prefix;:') used when prefixing is active, an empty string when it is not.

-->

<![%SVG.prefixes;  
<!ENTITY % SVG.pfx "%SVG.prefix;:" >  
]]>  
<!ENTITY % SVG.pfx "" >  
<!ENTITY % XLINK.pfx "%XLINK.prefix;:" >

<!-- 5. The parameter entity %SVG.xmlns.extra.attrib; may be redeclared to contain any non-SVG namespace declaration attributes for namespaces embedded in SVG. The default is an empty string.

-->

```

<!ENTITY % SVG.xmlns.extra.attrib "" >

<!-- Declare a parameter entity XLINK.xmlns.attrib containing
the XML Namespace declarations for XLink.
-->
<!ENTITY % XLINK.xmlns.attrib
"xmlns:%XLINK.prefix; %URI.datatype; #FIXED '%XLINK.xmlns;'"
>

<!-- Declare a parameter entity %NS.decl.attrib; containing
all XML Namespace declarations used in the DTD, plus the
xmlns declaration for SVG, its form dependent on whether
prefixing is active.
-->
<![%SVG.prefixed;[
<!ENTITY % NS.decl.attrib
"xmlns:%SVG.prefix; %URI.datatype; #FIXED '%SVG.xmlns;'
%XLINK.xmlns.attrib;
%SVG.xmlns.extra.attrib;"
>
]]>
<!ENTITY % NS.decl.attrib
"%XLINK.xmlns.attrib;
%SVG.xmlns.extra.attrib;"
>

<!-- Declare a parameter entity %SVG.xmlns.attrib; containing
all XML namespace declaration attributes used by SVG,
including a default xmlns attribute when prefixing is
inactive.
-->
<![%SVG.prefixed;[
<!ENTITY % SVG.xmlns.attrib
"%NS.decl.attrib;"
>
]]>
<!ENTITY % SVG.xmlns.attrib
"xmlns %URI.datatype; #FIXED '%SVG.xmlns;'
%XLINK.xmlns.attrib;"
>

<!-- Section B: SVG Qualified Names :::::::::::::::::::: -->

<!-- 6. This section declares parameter entities used to provide
namespace-qualified names for all SVG element types.
-->

<!-- XHTML Role Attribute Qname (Qualified Name) Module

This module is contained in two parts, labeled Section 'A' and 'B':

Section A declares parameter entities to support namespace-qualified names, namespace declarations, and name prefixing for XHTML Role and extensions.

Section B declares parameter entities used to provide namespace-qualified names for the XHTML role attribute:

```
%role.qname; the xmlns-qualified name for @role
```

```
...
```

XHTML Role extensions would create a module similar to this one.

-->

<!-- Section A: XHTML Role Attribute XML Namespace Framework ::::::::::: -->

<!-- 1. Declare a %XHTML-ROLE.prefixed; conditional section keyword, used to activate namespace prefixing. The default value should inherit '%NS.prefixed;' from the DTD driver, so that unless overridden, the default behavior follows the overall DTD prefixing scheme.

-->

```
<!ENTITY % NS.prefixed "IGNORE" >
```

```
<!ENTITY % XHTML-ROLE.prefixed "%NS.prefixed;" >
```

<!-- 2. Declare a parameter entity (eg., %XHTML-ROLE.xmlns;) containing the URI reference used to identify the XHTML Role Attribute namespace

-->

```
<!ENTITY % XHTML-ROLE.xmlns "http://www.w3.org/1999/xhtml" >
```

<!-- 3. Declare parameter entities (eg., %XML.prefix;) containing the default namespace prefix string(s) to use when prefixing is enabled. This may be overridden in the DTD driver or the

internal subset of an document instance. If no default prefix is desired, this may be declared as an empty string.

NOTE: As specified in [XMLNAMES], the namespace prefix serves as a proxy for the URI reference, and is not in itself significant.

-->

```
<!ENTITY % XHTML-ROLE.prefix "" >
```

<!-- 4. Declare parameter entities (eg., %XHTML-ROLE.pfx;) containing the colonized prefix(es) (eg., '%XHTML-ROLE.prefix;:') used when prefixing is active, an empty string when it is not.

-->

```
<![%XHTML-ROLE.prefixed;[
<!ENTITY % XHTML-ROLE.pfx "%XHTML-ROLE.prefix;" >
]]>
<!ENTITY % XHTML-ROLE.pfx "" >
```

<!-- declare qualified name extensions here ..... -->

```
<!ENTITY % xhtml-role-qname-extra.mod "" >
%xhtml-role-qname-extra.mod;
```

<!-- 5. The parameter entity %XHTML-ROLE.xmlns.extra.attrib; may be redeclared to contain any non-XHTML Role Attribute namespace declaration attributes for namespaces embedded in XML. The default is an empty string. XLink should be included here if used in the DTD.

-->

```
<!ENTITY % XHTML-ROLE.xmlns.extra.attrib "" >
```

<!-- Section B: XML Qualified Names ..... -->

<!-- 6. This section declares parameter entities used to provide namespace-qualified names for the XHTML role attribute.

-->

```
<!ENTITY % xhtml-role.role.qname "%XHTML-ROLE.pfx;role" >
```

<!-- The following defines a PE for use in the attribute sets of elements in other namespaces that want to incorporate the XML Event attributes. Note that in this case the XHTML-ROLE.pfx should always be defined. -->

```

```
..... -->
```

```
<!-- XHTML 1.1 Document Model
```

This module describes the groupings of elements that make up  
common content models for XHTML elements.

XHTML has three basic content models:

- %Inline.mix; character-level elements
- %Block.mix; block-like elements, eg., paragraphs and lists
- %Flow.mix; any block or inline elements

Any parameter entities declared in this module may be used  
to create element content models, but the above three are  
considered 'global' (insofar as that term applies here).

The reserved word '#PCDATA' (indicating a text string) is now  
included explicitly with each element declaration that is  
declared as mixed content, as XML requires that this token  
occur first in a content model specification.

```
-->
```

```
<!-- Extending the Model
```

While in some cases this module may need to be rewritten to  
accommodate changes to the document model, minor extensions  
may be accomplished by redeclaring any of the three \*.extra;

parameter entities to contain extension element types as follows:

%Misc.extra; whose parent may be any block or inline element.

%Inline.extra; whose parent may be any inline element.

%Block.extra; whose parent may be any block element.

If used, these parameter entities must be an OR-separated list beginning with an OR separator ("|"), eg., "| a | b | c"

All block and inline \*.class parameter entities not part of the \*struct.class classes begin with "|" to allow for exclusion from mixes.

<!-- Basic Forms

This forms module is based on the HTML 3.2 forms model, with the WAI-requested addition of the label element. While this module essentially mimics the content model and attributes of HTML 3.2 forms, the element types declared herein also include all HTML 4 common attributes.

form, label, input, select, option, textarea

-->

<!-- XHTML QName Module ..... -->
<!-- file: xhtml-qname-1.mod
```

This is XHTML, a reformulation of HTML as a modular XML application.  
 Copyright 1998-2000 W3C (MIT, INRIA, Keio), All Rights Reserved.  
 Revision: \$Id: xhtml-qname-1.mod,v 1.1 2001/02/13 12:24:22 ht Exp \$ SMI

This DTD module is identified by the PUBLIC and SYSTEM identifiers:

```
PUBLIC "-//W3C//ENTITIES XHTML Qualified Names 1.0//EN"
SYSTEM "http://www.w3.org/TR/xhtml-modulization/DTD/xhtml-qname-1.mod"
```

```
Revisions:
(none)
..... -->
```

```
<!-- XHTML QName (Qualified Name) Module
```

This module is contained in two parts, labeled Section 'A' and 'B':

Section A declares parameter entities to support namespace-qualified names, namespace declarations, and name prefixing for XHTML and extensions.

Section B declares parameter entities used to provide namespace-qualified names for all XHTML element types:

```
%applet.qname; the xmlns-qualified name for <applet>
%base.qname;   the xmlns-qualified name for <base>
...
```

XHTML extensions would create a module similar to this one. Included in the XHTML distribution is a template module ('template-qname-1.mod') suitable for this purpose.

-->

```
<!-- Section A: XHTML XML Namespace Framework ..... -->
```

```
<!-- 1. Declare a %XHTML.prefixed; conditional section keyword, used
to activate namespace prefixing. The default value should
inherit '%NS.prefixed;' from the DTD driver, so that unless
overridden, the default behaviour follows the overall DTD
prefixing scheme.
```

-->

```
<!ENTITY % NS.prefixed "IGNORE" >
<!ENTITY % XHTML.prefixed "%NS.prefixed;" >
```

```
<!-- 2. Declare a parameter entity (eg., %XHTML.xmlns;) containing
the URI reference used to identify the XHTML namespace:
```

-->

```
<!ENTITY % XHTML.xmlns "http://www.w3.org/1999/xhtml" >
```

```
<!-- 3. Declare parameter entities (eg., %XHTML.prefix;) containing
the default namespace prefix string(s) to use when prefixing
is enabled. This may be overridden in the DTD driver or the
internal subset of an document instance. If no default prefix
is desired, this may be declared as an empty string.
```

NOTE: As specified in [XMLNAMES], the namespace prefix serves as a proxy for the URI reference, and is not in itself significant.

-->

```
<!ENTITY % XHTML.prefix "" >
```

```
<!-- 4. Declare parameter entities (eg., %XHTML.pfx;) containing the
colonized prefix(es) (eg., '%XHTML.prefix;:') used when
prefixing is active, an empty string when it is not.
```

-->

```
<![%XHTML.prefixed;[
<!ENTITY % XHTML.pfx "%XHTML.prefix;:" >
]]>
<!ENTITY % XHTML.pfx "" >
```

```

<!-- declare qualified name extensions here ..... -->
<!ENTITY % xhtml-qname-extra.mod "" >
%xhtml-qname-extra.mod;

<!-- 5. The parameter entity %XHTML.xmlns.extra.attrib; may be
redeclared to contain any non-XHTML namespace declaration
attributes for namespaces embedded in XHTML. The default
is an empty string. XLink should be included here if used
in the DTD.
-->
<!ENTITY % XHTML.xmlns.extra.attrib "" >

<!-- The remainder of Section A is only followed in XHTML, not extensions. -->

<!-- Declare a parameter entity %NS.decl.attrib; containing
all XML Namespace declarations used in the DTD, plus the
xmlns declaration for XHTML, its form dependent on whether
prefixing is active.
-->
<![%XHTML.prefixed;[
<!ENTITY % NS.decl.attrib
  "xmlns:%XHTML.prefix; %URI.datatype; #FIXED '%XHTML.xmlns;'

File mmlalias.ent produced by the XSL script entities.xml  
from input data in unicode.xml.

Copyright 1998 - 2009 W3C.

Use and distribution of this code are permitted under the terms of the W3C Software Notice and License.

<http://www.w3.org/Consortium/Legal/2002/copyright-software-20021231.html>

Please report any errors to David Carlisle  
via the public W3C list [www-math@w3.org](mailto:www-math@w3.org).

The numeric character values assigned to each entity  
(should) match the Unicode assignments in Unicode 5.x.

References to the VARIANT SELECTOR 1 character (&#x0FE00;)  
should match the uses listed in Unicode Technical Report 25.

-->

<!--

Public identifier: `-//W3C//ENTITIES MathML Aliases//EN//XML`  
System identifier: `http://www.w3.org/2003/entities/2007/mmlalias.ent`

The public identifier should always be used verbatim.  
The system identifier may be changed to suit local requirements.

Typical invocation:

```
<!ENTITY % mmlalias PUBLIC
  "-//W3C//ENTITIES MathML Aliases//EN//XML"
  "http://www.w3.org/2003/entities/2007/mmlalias.ent"
>
%mmlalias;
```

```

Revisions:

```

#2000-10-22: added qname declarations for ruby elements
..... -->

```

```

<!-- XHTML QName (Qualified Name) Module

```

This module is contained in two parts, labeled Section 'A' and 'B':

Section A declares parameter entities to support namespace-qualified names, namespace declarations, and name prefixing for XHTML and extensions.

Section B declares parameter entities used to provide namespace-qualified names for all XHTML element types:

```

%applet.qname; the xmlns-qualified name for <applet>
%base.qname;   the xmlns-qualified name for <base>
...

```

XHTML extensions would create a module similar to this one.

Included in the XHTML distribution is a template module

('template-qname-1.mod') suitable for this purpose.

-->

<!-- Section A: XHTML XML Namespace Framework :::::::::::::::::::: -->

<!-- 1. Declare a %XHTML.prefixed; conditional section keyword, used to activate namespace prefixing. The default value should inherit '%NS.prefixed;' from the DTD driver, so that unless overridden, the default behaviour follows the overall DTD prefixing scheme.

-->

<!ENTITY % NS.prefixed "IGNORE" >

<!ENTITY % XHTML.prefixed "%NS.prefixed;" >

<!-- By default, we always permit XHTML attribute collections to have namespace-qualified prefixes as well.

-->

<!ENTITY % XHTML.global.attrs.prefixed "INCLUDE" >

<!-- By default, we allow the XML Schema attributes on the root element.

-->

<!ENTITY % XHTML.xsi.attrs "INCLUDE" >

<!-- 2. Declare a parameter entity (eg., %XHTML.xmlns;) containing the URI reference used to identify the XHTML namespace:

-->

<!ENTITY % XHTML.xmlns "http://www.w3.org/1999/xhtml" >

<!-- 3. Declare parameter entities (eg., %XHTML.prefix;) containing the default namespace prefix string(s) to use when prefixing is enabled. This may be overridden in the DTD driver or the internal subset of an document instance. If no default prefix is desired, this may be declared as an empty string.

NOTE: As specified in [XMLNAMES], the namespace prefix serves as a proxy for the URI reference, and is not in itself significant.

-->

<!ENTITY % XHTML.prefix "xhtml" >

<!-- 4. Declare parameter entities (eg., %XHTML.pfx;) containing the colonized prefix(es) (eg., '%XHTML.prefix;:') used when prefixing is active, an empty string when it is not.

..... -->

<!-- XHTML+RDFa Document Model

This module describes the groupings of elements that make up  
common content models for XHTML elements.

XHTML has three basic content models:

%Inline.mix; character-level elements

%Block.mix; block-like elements, eg., paragraphs and lists

%Flow.mix; any block or inline elements

Any parameter entities declared in this module may be used to create element content models, but the above three are considered 'global' (insofar as that term applies here).

The reserved word '#PCDATA' (indicating a text string) is now included explicitly with each element declaration that is declared as mixed content, as XML requires that this token occur first in a content model specification.

-->

<!-- Extending the Model

While in some cases this module may need to be rewritten to accommodate changes to the document model, minor extensions may be accomplished by redeclaring any of the three \*.extra; parameter entities to contain extension element types as follows:

%Misc.extra; whose parent may be any block or inline element.

%Inline.extra; whose parent may be any inline element.

%Block.extra; whose parent may be any block element.

If used, these parameter entities must be an OR-separated list beginning with an OR separator ("|"), eg., "| a | b | c"

All block and inline \*.class parameter entities not part of the \*struct.class classes begin with "|" to allow for exclusion from mixes.

-->

<!-- ..... Optional Elements in head ..... -->

```
<!ENTITY % HeadOpts.mix
  "( %script.qname; | %style.qname; | %meta.qname;
  | %link.qname; | %object.qname; )*"

<!-- Document Structure
```

title, head, body, html

The Structure Module defines the major structural elements and their attributes.

Note that the content model of the head element type is redeclared when the Base Module is included in the DTD.

The parameter entity containing the XML namespace URI value used for XHTML is '%XHTML.xmlns;', defined in the Qualified Names module.

```
-->
```

```
<!-- title: Document Title ..... -->
```

```
<!-- The title element is not considered part of the flow of text.
```

It should be displayed, for example as the page header or window title. Exactly one title is required per document.

```
-->
```

```

<!-- ..... -->
<!-- XHTML Legacy Markup Module ..... -->
<!-- file: xhtml-legacy-1.mod
```

This is an extension of XHTML, a reformulation of HTML as a modular XML application.  
Copyright 1998-2005 W3C (MIT, ERCIM, Keio), All Rights Reserved.  
Revision: \$Id: xhtml-legacy-1.mod,v 4.1 2001/04/10 09:42:30 altheim Exp \$ SMI

This DTD module is identified by the PUBLIC and SYSTEM identifiers:

```
PUBLIC "-//W3C//ELEMENTS XHTML Legacy Markup 1.0//EN"
SYSTEM "http://www.w3.org/MarkUp/DTD/xhtml-legacy-1.mod"
```

Revisions:

(none)

```
..... -->
```

```
<!-- HTML Legacy Markup
```

font, basefont, center, s, strike, u, dir, menu, isindex

(plus additional datatypes and attributes)

This optional module declares additional markup for simple presentation-related markup based on features found in the HTML 4 Transitional and Frameset DTDs. This relies on inclusion of the Legacy Redclarations module. This module also declares the frames, inline frames and object modules.

This is to allow XHTML 1.1 documents to be transformed for display on HTML browsers where CSS support is inconsistent or unavailable.

```
-->
```

```
<!-- Constructing a Legacy DTD
```

To construct a DTD driver obtaining a close approximation of the HTML 4 Transitional and Frameset DTDs, declare the Legacy Redclarations module as the pre-framework redeclaration

parameter entity (%xhtml-prefw-redecl.mod;) and INCLUDE its conditional section:

```
...
<!ENTITY % xhtml-prefw-redecl.module "INCLUDE" >
<![%xhtml-prefw-redecl.module;[
<!ENTITY % xhtml-prefw-redecl.mod
    PUBLIC "-//W3C//ELEMENTS XHTML Legacy Redeclarations 1.0//EN"
        "xhtml-legacy-redecl-1.mod" >
%xhtml-prefw-redecl.mod;]]>
```

Such a DTD should be named with a variant FPI and redeclare the value of the %XHTML.version; parameter entity to that FPI:

```
"-//Your Name Here//DTD XHTML Legacy 1.1//EN"
```

IMPORTANT: see also the notes included in the Legacy Redeclarations Module for information on how to construct a DTD using this module.

-->

<!-- Intrinsic Event Attributes
```

These are the event attributes defined in HTML 4,  
Section 18.2.3 "Intrinsic Events". This module must be  
instantiated prior to the Attributes Module but after  
the Datatype Module in the Modular Framework module.

"Note: Authors of HTML documents are advised that changes  
are likely to occur in the realm of intrinsic events  
(e.g., how scripts are bound to events). Research in  
this realm is carried on by members of the W3C Document  
Object Model Working Group (see the W3C Web site at  
<http://www.w3.org/> for more information)."

```
-->
```

```
<!-- NOTE: Because the ATTLIST declarations in this module occur
before their respective ELEMENT declarations in other
modules, there may be a dependency on this module that
should be considered if any of the parameter entities used
```

for element type names (eg., %a.qname;) are redeclared.

<!-- Modular Framework

This required module instantiates the modules needed  
to support the XHTML modularization model, including:

- + datatypes
- + namespace-qualified names
- + common attributes
- + document model
- + character entities

The Intrinsic Events module is ignored by default but  
occurs in this module because it must be instantiated  
prior to Attributes but after Datatypes.

<!-- Client-side Image Maps
```

```
    area, map
```

This module declares elements and attributes to support client-side image maps. This requires that the Image Module (or a module declaring the img element type) be included in the DTD.

These can be placed in the same document or grouped in a separate document, although the latter isn't widely supported

```

<!-- Modular Framework
```

This required module instantiates the modules needed  
to support the XHTML modularization model, including:

- + notations
- + datatypes
- + namespace-qualified names
- + common attributes
- + document model
- + character entities

The Intrinsic Events module is ignored by default but  
occurs in this module because it must be instantiated  
prior to Attributes but after Datatypes.

<!-- Name Identifier

'name' attribute on form, img, a, map, applet, frame, iframe

This module declares the 'name' attribute on element types when it is used as a node identifier for legacy linking and scripting support. This does not include those instances when 'name' is used as a container for form control, property or metainformation names.

This module should be instantiated following all modules it modifies.

<!-- XHTML RDFa QName Module ..... -->
<!-- file: xhtml-rdfa-qname-1.mod
```

This is XHTML RDFa - the RDFa Attribute Module for XHTML.

Copyright 2007 W3C (MIT, ERCIM, Keio), All Rights Reserved.

This DTD module is identified by the PUBLIC and SYSTEM identifiers:

```
PUBLIC "-//W3C//ENTITIES XHTML RDFa Attribute Qnames 1.0//EN"
SYSTEM "http://www.w3.org/Markup/DTD/xhtml-rdfa-qname-1.mod"
```

Revisions:

(none)

```
..... -->
```

```
<!-- XHTML RDFa Attribute QName (Qualified Name) Module
```

This module is contained in two parts, labeled Section 'A' and 'B':

Section A declares parameter entities to support namespace-qualified names, namespace declarations, and name prefixing for XHTML RDFa and extensions.

Section B declares parameter entities used to provide namespace-qualified names for the XHTML RDFa elements and attributes:

```
%link.qname; the xmlns-qualified name for link
```

```
...
```

XHTML RDFa extensions would create a module similar to this one.

```
-->
```

<!-- Section A: XHTML RDFa Attribute XML Namespace Framework ..... -->

<!-- 1. Declare a %XHTML-RDFA.prefixed; conditional section keyword, used to activate namespace prefixing. The default value should inherit '%NS.prefixed;' from the DTD driver, so that unless overridden, the default behavior follows the overall DTD prefixing scheme.

-->

```
<!ENTITY % NS.prefixed "IGNORE" >
<!ENTITY % XHTML-RDFA.prefixed "%NS.prefixed;" >
```

<!-- 2. Declare a parameter entity (eg., %XHTML-RDFA.xmlns;) containing the URI reference used to identify the XHTML RDFa Attribute namespace

-->

```
<!ENTITY % XHTML-RDFA.xmlns "http://www.w3.org/1999/xhtml" >
```

<!-- 3. Declare parameter entities (eg., %XML.prefix;) containing the default namespace prefix string(s) to use when prefixing is enabled. This may be overridden in the DTD driver or the internal subset of an document instance. If no default prefix is desired, this may be declared as an empty string.

NOTE: As specified in [XMLNAMES], the namespace prefix serves as a proxy for the URI reference, and is not in itself significant.

-->

```
<!ENTITY % XHTML-RDFA.prefix "" >
```

<!-- 4. Declare parameter entities (eg., %XHTML-RDFA.pfx;) containing the colonized prefix(es) (eg., '%XHTML-RDFA.prefix;:') used when prefixing is active, an empty string when it is not.

-->

```
<![%XHTML-RDFA.prefixed;[
<!ENTITY % XHTML-RDFA.pfx "%XHTML-RDFA.prefix;:" >
]]>
<![%XHTML.prefix;[
<!ENTITY % XHTML-RDFA.pfx "%XHTML.prefix;:" >
]]>
<!ENTITY % XHTML-RDFA.pfx "" >
```

<!-- declare qualified name extensions here ..... -->

```
<!ENTITY % xhtml-rdfa-qname-extra.mod "" >
%xhtml-rdfa-qname-extra.mod;
```

<!-- 5. The parameter entity %XHTML-RDFA.xmlns.extra.attrib; may be redeclared to contain any non-XHTML RDFa Attribute namespace declaration attributes for namespaces embedded in XML. The default is an empty string. XLink should be included here if used in the DTD.

-->  
<!ENTITY % XHTML-RDFA.xmlns.extra.attrib "" >

<!-- Section B: XML Qualified Names ..... -->

<!-- 6. This section declares parameter entities used to provide namespace-qualified names for the XHTML RDFa attribute modules.

Note that these names are NOT prefixed to be compatible with XHTML Modularization 1.1

-->

SYSTEM "http://www.w3.org/MarkUp/DTD/xhtml-applet-1.mod"

Revisions:

#2001-02-20: added PCDATA to content model of applet

..... -->

<!-- Java Applets

applet

This module declares the applet element type and its attributes,  
used to provide support for Java applets. The 'alt' attribute is  
now required (as it is on images). One of either code or object  
attributes must be present. In the document, place param elements  
before other content within the <applet> element.

Note that use of this module requires instantiation of the Param  
Element Module.

-->

<!-- Legacy Redeclarations
```

This optional module replaces the Modular Framework module, interspersing redeclarations of various parameter entities to allow for inclusions of Transitional markup in the XHTML 1.1 document model. This instantiates the modules needed to support the XHTML modularization model, including:

- + notations
- + datatypes
- + namespace-qualified names
- + common attributes
- + document model
- + character entities

By default, the Object module is included, with Frames and IFrames ignored.

The Intrinsic Events module is ignored by default but occurs in this module because it must be instantiated prior to Attributes but after Datatypes.

<!-- XHTML Ruby Module ..... -->
<!-- file: xhtml-ruby-1.mod
```

This is XHTML, a reformulation of HTML as a modular XML application.  
Copyright 1999-2001 W3C (MIT, INRIA, Keio), All Rights Reserved.

Revision: \$Id: xhtml-ruby-1.mod,v 1.1 2008/06/21 19:42:10 smccarro Exp \$

This module is based on the W3C Ruby Annotation Specification:

<http://www.w3.org/TR/ruby>

This DTD module is identified by the PUBLIC and SYSTEM identifiers:

PUBLIC "-//W3C//ELEMENTS XHTML Ruby 1.0//EN"  
SYSTEM "http://www.w3.org/TR/ruby/xhtml-ruby-1.mod"

..... -->

<!-- Ruby Elements

ruby, rbc, rtc, rb, rt, rp

This module declares the elements and their attributes used to support ruby annotation markup.

-->

<!-- declare qualified element type names:

-->

<!ENTITY % ruby.qname "ruby" >

<!ENTITY % rbc.qname "rbc" >

<!ENTITY % rtc.qname "rtc" >

<!ENTITY % rb.qname "rb" >

<!ENTITY % rt.qname "rt" >

<!ENTITY % rp.qname "rp" >

<!-- rp fallback is included by default.

-->

<!ENTITY % Ruby.fallback "INCLUDE" >

<!ENTITY % Ruby.fallback.mandatory "IGNORE" >

<!-- Complex ruby is included by default; it may be overridden by other modules to ignore it.

-->

<!ENTITY % Ruby.complex "INCLUDE" >

<!-- Fragments for the content model of the ruby element -->

<![%Ruby.fallback;[

<!-- Link element

link

This module declares the link element type and its attributes,  
which could (in principle) be used to define document-level links  
to external resources such as:

- a) for document specific toolbars/menus, e.g. start, contents,  
previous, next, index, end, help
- b) to link to a separate style sheet (rel="stylesheet")
- c) to make a link to a script (rel="script")
- d) by style sheets to control how collections of html nodes are  
rendered into printed documents
- e) to make a link to a printable version of this document  
e.g. a postscript or pdf version (rel="alternate" media="print")

-->

```
<html>
<head>
  <title>Package overview: net.sf.saxon.ma.trie</title>

</head>
<body>
<p>This package contains a general-purpose implementation of immutable hash trie maps,
used to underpin the Saxon implementation of XSLT 3.0 maps.</p>

<p>The implementation was written by Michael S. Froh (msfroh) and released under an MIT license.
It was forked from github project msfroh/functional_snippets on 28 March 2014. Very little code
has been changed during the integration with Saxon, but a great deal of un-needed code has been
removed. In addition, it has been retrofitted from Java 7 to Java 5.</p>

<p>The code betrays Scala origins in the use of classes such as Option, which is a class that
provided a type-safe way of handling null values, and Tuple2 which can hold any pair of values.</p>

</body>
</html>
```

<!-- Embedded Objects
```

```
    object
```

This module declares the object element type and its attributes,  
used to embed external objects as part of XHTML pages. In the  
document, place param elements prior to the object elements  
that require their content.

Note that use of this module requires instantiation of the  
Param Element Module prior to this module.

<!-- XHTML Access Attribute QName (Qualified Name) Module

This module is contained in two parts, labeled Section 'A' and 'B':

Section A declares parameter entities to support namespace-qualified names, namespace declarations, and name prefixing for XHTML Access and extensions.

Section B declares parameter entities used to provide namespace-qualified names for the XHTML access element:

```
%XHTML-ACCESS.access.qname; the xmlns-qualified name for access
...
```

XHTML Access extensions would create a module similar to this one.

-->

<!-- Section A: XHTML Access Attribute XML Namespace Framework ::::::::::::::: -->

<!-- 1. Declare a %XHTML-ACCESS.prefixed; conditional section keyword, used to activate namespace prefixing. The default value should inherit '%NS.prefixed;' from the DTD driver, so that unless overridden, the default behavior follows the overall DTD prefixing scheme.

-->

```
<!ENTITY % NS.prefixed "IGNORE" >
<!ENTITY % XHTML-ACCESS.prefixed "%NS.prefixed;" >
```

<!-- 2. Declare a parameter entity (eg., %XHTML-ACCESS.xmlns;) containing the URI reference used to identify the XHTML Access Attribute namespace

-->

```
<!ENTITY % XHTML-ACCESS.xmlns "http://www.w3.org/1999/xhtml" >
```

<!-- 3. Declare parameter entities (eg., %XML.prefix;) containing the default namespace prefix string(s) to use when prefixing

is enabled. This may be overridden in the DTD driver or the internal subset of an document instance. If no default prefix is desired, this may be declared as an empty string.

NOTE: As specified in [XMLNAMES], the namespace prefix serves as a proxy for the URI reference, and is not in itself significant.

-->

```
<!ENTITY % XHTML-ACCESS.prefix "" >
```

<!-- 4. Declare parameter entities (eg., %XHTML-ACCESS.pfx;) containing the colonized prefix(es) (eg., '%XHTML-ACCESS.prefix;:') used when prefixing is active, an empty string when it is not.

-->

```
<![%XHTML-ACCESS.prefixed;[
```

```
<!ENTITY % XHTML-ACCESS.pfx "%XHTML-ACCESS.prefix;:" >
```

```
]]>
```

```
<!ENTITY % XHTML-ACCESS.pfx "" >
```

<!-- declare qualified name extensions here ..... -->

```
<!ENTITY % xhtml-access-qname-extra.mod "" >
```

```
%xhtml-access-qname-extra.mod;
```

<!-- 5. The parameter entity %XHTML-ACCESS.xmlns.extra.attrib; may be redeclared to contain any non-XHTML Access namespace declaration attributes for namespaces embedded in XML. The default is an empty string. XLink should be included here if used in the DTD.

-->

```
<!ENTITY % XHTML-ACCESS.xmlns.extra.attrib "" >
```

<!-- Section B: XML Qualified Names ..... -->

<!-- 6. This section declares parameter entities used to provide namespace-qualified names for the XHTML Access element.

-->

```
<!ENTITY % XHTML-ACCESS.access.qname "%XHTML-ACCESS.pfx;access" >
```

<!-- end of xhtml-access-qname-1.mod -->

..... -->

<!-- Intrinsic Event Attributes

These are the event attributes defined in HTML 4,  
Section 18.2.3 "Intrinsic Events". This module must be  
instantiated prior to the Attributes Module but after  
the Datatype Module in the Modular Framework module.

"Note: Authors of HTML documents are advised that changes  
are likely to occur in the realm of intrinsic events  
(e.g., how scripts are bound to events). Research in  
this realm is carried on by members of the W3C Document  
Object Model Working Group (see the W3C Web site at  
<http://www.w3.org/> for more information)."

-->

<!-- NOTE: Because the ATTLIST declarations in this module occur  
before their respective ELEMENT declarations in other  
modules, there may be a dependency on this module that  
should be considered if any of the parameter entities used  
for element type names (eg., %a.qname;) are redeclared.

## 1.38 jakarta-annotations-api 1.3.5

### 1.38.1 Available under license :

# Eclipse Public License - v 2.0

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS ECLIPSE PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

#### 1. DEFINITIONS

"Contribution" means:

a) in the case of the initial Contributor, the initial content  
Distributed under this Agreement, and

b) in the case of each subsequent Contributor:

- i) changes to the Program, and
- ii) additions to the Program;

where such changes and/or additions to the Program originate from and are Distributed by that particular Contributor. A Contribution "originates" from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include changes or additions to the Program that are not Modified Works.

"Contributor" means any person or entity that Distributes the Program.

"Licensed Patents" mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions Distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement or any Secondary License (as applicable), including Contributors.

"Derivative Works" shall mean any work, whether in Source Code or other form, that is based on (or derived from) the Program and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship.

"Modified Works" shall mean any work in Source Code or other form that results from an addition to, deletion from, or modification of the contents of the Program, including, for purposes of clarity any new file in Source Code form that contains any contents of the Program. Modified Works shall not include works that contain only declarations, interfaces, types, classes, structures, or files of the Program solely in each case in order to link to, bind by name, or subclass the Program or Modified Works thereof.

"Distribute" means the acts of a) distributing or b) making available in any manner that enables the transfer of a copy.

"Source Code" means the form of a Program preferred for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Secondary License" means either the GNU General Public License, Version 2.0, or any later versions of that license, including any

exceptions or additional permissions as identified by the initial Contributor.

## 2. GRANT OF RIGHTS

a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, Distribute and sublicense the Contribution of such Contributor, if any, and such Derivative Works.

b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in Source Code or other form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.

c) Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to Distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.

d) Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

e) Notwithstanding the terms of any Secondary License, no Contributor makes additional grants to any Recipient (other than those set forth in this Agreement) as a result of such Recipient's receipt of the Program under the terms of a Secondary License (if permitted under the terms of Section 3).

## 3. REQUIREMENTS

3.1 If a Contributor Distributes the Program in any form, then:

a) the Program must also be made available as Source Code, in accordance with section 3.2, and the Contributor must accompany the Program with a statement that the Source Code for the Program is available under this Agreement, and informs Recipients how to obtain it in a reasonable manner on or through a medium customarily used for software exchange; and

b) the Contributor may Distribute the Program under a license different than this Agreement, provided that such license:

i) effectively disclaims on behalf of all other Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;

ii) effectively excludes on behalf of all other Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;

iii) does not attempt to limit or alter the recipients' rights in the Source Code under section 3.2; and

iv) requires any subsequent distribution of the Program by any party to be under a license that satisfies the requirements of this section 3.

3.2 When the Program is Distributed as Source Code:

a) it must be made available under this Agreement, or if the Program (i) is combined with other material in a separate file or files made available under a Secondary License, and (ii) the initial Contributor attached to the Source Code the notice described in Exhibit A of this Agreement, then the Program may be made available under the terms of such Secondary Licenses, and

b) a copy of this Agreement must be included with each copy of the Program.

3.3 Contributors may not remove or alter any copyright, patent, trademark, attribution notices, disclaimers of warranty, or limitations of liability ("notices") contained within the Program from any copy of the Program which they Distribute, provided that Contributors may add their own appropriate notices.

#### 4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a commercial product offering, such Contributor ("Commercial Contributor") hereby agrees to defend and indemnify every other Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: a) promptly notify the Commercial Contributor in writing of such claim, and b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

## 5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, AND TO THE EXTENT PERMITTED BY APPLICABLE LAW, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

## 6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, AND TO THE EXTENT PERMITTED BY APPLICABLE LAW, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## 7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. The Eclipse Foundation is the initial Agreement Steward. The Eclipse Foundation may assign the responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be Distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published,

Contributor may elect to Distribute the Program (including its Contributions) under the new version.

Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved. Nothing in this Agreement is intended to be enforceable by any entity that is not a Contributor or Recipient. No third-party beneficiary rights are created under this Agreement.

#### Exhibit A - Form of Secondary Licenses Notice

"This Source Code may also be made available under the following Secondary Licenses when the conditions for such availability set forth in the Eclipse Public License, v. 2.0 are satisfied: {name license(s), version(s), and exceptions or additional permissions here}."

Simply including a copy of this Agreement, including this Exhibit A is not sufficient to license the Source Code under Secondary Licenses.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

---

## The GNU General Public License (GPL) Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor  
Boston, MA 02110-1335  
USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free

Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either

verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in

themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
