The function `{gpgme_get_engine_info}` returns a linked list of engine info structures in `{var{info}}`. Each info structure describes the defaults of one configured backend.

The memory for the info structures is allocated the first time this function is invoked, and must not be freed by the caller.

This function returns the error code `{GPG_ERR_NO_ERROR}` if successful, and a system error if the memory could not be allocated.

`{end deftypefun`

Here is an example how you can provide more diagnostics if you receive an error message which indicates that the crypto engine is invalid.

`{example`

```
gpgme_ctx_t ctx;
gpgme_error_t err;
```

`{...}`

```
if (gpgme_err_code (err) == GPG_ERR_INV_ENGINE)
```

```
@{
```

```

gpgme_engine_info_t info;
err = gpgme_get_engine_info (&info);
if (!err)
 @{
 while (info && info->protocol != gpgme_get_protocol (ctx))
 info = info->next;
 if (!info)
 fprintf (stderr, "GPGME compiled without support for protocol %s",
 gpgme_get_protocol_name (info->protocol));
 else if (info->file_name && !info->version)
 fprintf (stderr, "Engine %s not installed properly",
 info->file_name);
 else if (info->file_name && info->version && info->req_version)
 fprintf (stderr, "Engine %s version %s installed, "
 "but at least version %s required", info->file_name,
 info->version, info->req_version);
 else
 fprintf (stderr, "Unknown problem with engine for protocol %s",
 gpgme_get_protocol_name (info->protocol));
 @}
@}
@end example

```

```

@node Engine Configuration
@section Engine Configuration
@cindex engine, configuration of
@cindex configuration of crypto backend

```

You can change the configuration of a backend engine, and thus change the executable program and configuration directory to be used. You can make these changes the default or set them for some contexts individually.

```

@deftypefun gpgme_error_t gpgme_set_engine_info (@w{gpgme_protocol_t @var{proto}}, @w{const char
*@var{file_name}}, @w{const char *@var{home_dir}})
@since{1.1.0}

```

The function `gpgme_set_engine_info` changes the default configuration of the crypto engine implementing the protocol `@var{proto}`.

`@var{file_name}` is the file name of the executable program implementing this protocol, and `@var{home_dir}` is the directory name of the configuration directory for this crypto engine. If `@var{home_dir}` is `NULL`, the engine's default will be used.

The new defaults are not applied to already created GPGME contexts.

This function returns the error code `GPG_ERR_NO_ERROR` if successful, or an error code on failure.

@end deftypefun

The functions `gpgme_ctx_get_engine_info` and `gpgme_ctx_set_engine_info` can be used to change the engine configuration per context. @xref{Crypto Engine}.

@node Public Key Algorithms

@section Public Key Algorithms

@cindex algorithms, public key

@cindex public key algorithms

Public key algorithms are used for encryption, decryption, signing and verification of signatures.

@deftp {Data type} {enum gpgme\_pubkey\_algo\_t}

@tindex gpgme\_pubkey\_algo\_t

The @code{gpgme\_pubkey\_algo\_t} type specifies the set of all public key algorithms that are supported by @acronym{GPGME}. Possible values are:

@table @code

@item GPGME\_PK\_RSA

This value indicates the RSA (Rivest, Shamir, Adleman) algorithm.

@item GPGME\_PK\_RSA\_E

Deprecated. This value indicates the RSA (Rivest, Shamir, Adleman) algorithm for encryption and decryption only.

@item GPGME\_PK\_RSA\_S

Deprecated. This value indicates the RSA (Rivest, Shamir,

Adleman)  
algorithm for signing and verification only.

@item GPGME\_PK\_DSA  
This value indicates DSA, the Digital Signature Algorithm.

@item GPGME\_PK\_ELG  
This value indicates ElGamal.

@item GPGME\_PK\_ELG\_E  
This value also indicates ElGamal and is used specifically in GnuPG.

@item GPGME\_PK\_ECC  
@since{1.5.0}

This value is a generic indicator for elliptic curve algorithms.

@item GPGME\_PK\_ECDSA  
@since{1.3.0}

This value indicates ECDSA, the Elliptic Curve Digital Signature Algorithm as defined by FIPS 186-2 and RFC-6637.

@item GPGME\_PK\_ECDH  
@since{1.3.0}

This value indicates ECDH, the Elliptic Curve Diffie-Hellmann encryption algorithm as defined by RFC-6637.

@item GPGME\_PK\_EDDSA  
@since{1.7.0}

This value indicates the EdDSA algorithm.

@end table  
@end deftp

@deftypefun {const char \*} gpgme\_pubkey\_algo\_name (@w{gpgme\_pubkey\_algo\_t @var{algo}})

The function @code{gpgme\_pubkey\_algo\_name} returns a pointer to a statically allocated string containing a description of the public key algorithm

@var{algo}. This string can be used to output the name of the public key algorithm to the user.

If @var{algo} is not a valid public key algorithm, @code{NULL} is returned.

@end deftypefun

```
@deftypefun {char *} gpgme_pubkey_algo_string (@w{gpgme_subkey_t @var{key}})
@since{1.7.0}
```

The function `gpgme_pubkey_algo_string` is a convenience function to build and return an algorithm string in the same way GnuPG does (e.g. `"rsa2048"` or `"ed25519"`). The caller must free the result using `gpgme_free`. On error (e.g. invalid argument or memory exhausted), the function returns NULL and sets `ERRNO`.

```
@end deftypefun
```

```
@node Hash Algorithms
@section Hash Algorithms
@index algorithms, hash
@index algorithms, message digest
@index hash algorithms
@index message digest algorithms
```

Hash (message digest) algorithms are used to compress a long message to make it suitable for public key cryptography.

```
@deftp {Data type} {enum gpgme_hash_algo_t}
@tindex gpgme_hash_algo_t
```

The

`gpgme_hash_algo_t` type specifies the set of all hash algorithms that are supported by `GPGME`. Possible values are:

```
@table @code
@item GPGME_MD_MD5
@item GPGME_MD_SHA1
@item GPGME_MD_RMD160
@item GPGME_MD_MD2
@item GPGME_MD_TIGER
@item GPGME_MD_HAVAL
@item GPGME_MD_SHA256
@item GPGME_MD_SHA384
@item GPGME_MD_SHA512
@item GPGME_MD_SHA224
@since{1.5.0}
```

```
@item GPGME_MD_MD4
@item GPGME_MD_CRC32
@item GPGME_MD_CRC32_RFC1510
@item GPGME_MD_CRC24_RFC2440
@end table
@end deftp
```

```
@deftypefun {const char *} gpgme_hash_algo_name (@w{gpgme_hash_algo_t @var{algo}})
```

The function `gpgme_hash_algo_name` returns a pointer to a statically allocated string containing a description of the hash algorithm `algo`. This string can be used to output the name of the hash algorithm to the user.

If `algo` is not a valid hash algorithm, `NULL` is returned.

`Error Handling`  
`chapter Error Handling`  
`error handling`

Many functions in `GPGME` can return an error if they fail.

For this reason, the application should always catch the error condition and take appropriate measures, for example by releasing the resources and passing the error up to the caller, or by displaying a descriptive message to the user and cancelling the operation.

Some error values do not indicate a system error or an error in the operation, but the result of an operation that failed properly. For example, if you try to decrypt a tempered message, the decryption will fail. Another error value actually means that the end of a data buffer or list has been reached. The following descriptions explain for many error codes what they mean usually. Some error values have specific meanings if returned by a certain functions. Such cases are described in the documentation of those functions.

`GPGME` uses the `libgpg-error` library. This allows to share the error codes with other components of the GnuPG system, and thus pass error values transparently from the crypto engine, or some helper application of the crypto engine, to the user. This way no information is lost. As a consequence, `GPGME` does not use its own identifiers for error codes, but uses those provided by `libgpg-error`. They usually start with `GPG_ERR_`.

However, `GPGME` does provide aliases for the functions defined in `libgpg-error`, which might be preferred for name space consistency.

`menu`

* Error Values::	The error value and what it means.
* Error Sources::	A list of important error sources.
* Error Codes::	A list of important error codes.
* Error Strings::	How to get a descriptive string from a value.

`end menu`

@node Error Values  
@section Error Values  
@cindex error values  
@cindex error codes  
@cindex error sources

@deftp {Data type} {gpgme\_err\_code\_t}  
The @code{gpgme\_err\_code\_t} type is an alias for the @code{libgpg-error} type @code{gpg\_err\_code\_t}. The error code indicates the type of an error, or the reason why an operation failed.

A list of important error codes can be found in the next section.  
@end deftp

@deftp {Data type} {gpgme\_err\_source\_t}  
The @code{gpgme\_err\_source\_t} type is an alias for the @code{libgpg-error} type @code{gpg\_err\_source\_t}. The error source has not a precisely defined meaning. Sometimes it is the place where the error happened, sometimes it is the place where an error was encoded into an error value. Usually the error source will give an indication to where to look for the problem. This is not always true, but it is attempted to achieve this goal.

A list of important error sources can be found in the next section.  
@end deftp

@deftp {Data type} {gpgme\_error\_t}  
The @code{gpgme\_error\_t} type is an alias for the @code{libgpg-error} type @code{gpg\_error\_t}. An error value like this has always two components, an error code and an error source. Both together form the error value.

Thus, the error value can not be directly compared against an error code, but the accessor functions described below must be used. However, it is guaranteed that only 0 is used to indicate success (@code{GPG\_ERR\_NO\_ERROR}), and that in this case all other parts of the error value are set to 0, too.

Note that in @acronym{GPGME}, the error source is used purely for diagnostical purposes. Only the error code should be checked to test for a certain outcome of a function. The manual only documents the error code part of an error value. The error source is left unspecified and might be anything.

@end deftp

```
@deftypefun {static inline gpgme_err_code_t} gpgme_err_code (@w{gpgme_error_t @var{err}})
```

The static inline function `gpgme_err_code` returns the `gpgme_err_code_t` component of the error value `@var{err}`. This function must be used to extract the error code from an error value in order to compare it with the `GPG_ERR_*` error code macros.

```
@end deftypefun
```

```
@deftypefun {static inline gpgme_err_source_t}
gpgme_err_source (@w{gpgme_error_t @var{err}})
```

The static inline function `gpgme_err_source` returns the `gpgme_err_source_t` component of the error value `@var{err}`. This function must be used to extract the error source from an error value in order to compare it with the `GPG_ERR_SOURCE_*` error source macros.

```
@end deftypefun
```

```
@deftypefun {static inline gpgme_error_t} gpgme_err_make (@w{gpgme_err_source_t @var{source}},
@w{gpgme_err_code_t @var{code}})
```

The static inline function `gpgme_err_make` returns the error value consisting of the error source `@var{source}` and the error code `@var{code}`.

This function can be used in callback functions to construct an error value to return it to the library.

```
@end deftypefun
```

```
@deftypefun {static inline gpgme_error_t} gpgme_error (@w{gpgme_err_code_t @var{code}})
```

The static inline function `gpgme_error` returns the error value consisting of the default error source and the error code `@var{code}`.

For `GPGME` applications, the default error source is `GPG_ERR_SOURCE_USER_1`. You can define `GPGME_ERR_SOURCE_DEFAULT` before including `gpgme.h` to change this default.

This function can be used in callback functions to construct an error value to return it to the library.

```
@end deftypefun
```

The `libgpg-error` library provides error codes for all system error numbers it knows about. If `@var{err}` is an unknown error number, the error code `GPG_ERR_UNKNOWN_ERRNO` is used. The following functions can be used to construct error values from system error numbers.

```
@deftypefun {gpgme_error_t} gpgme_err_make_from_errno (@w{gpgme_err_source_t @var{source}}, @w{int
@var{err}})
```

The function `gpgme_err_make_from_errno` is like `gpgme_err_make`, but it takes a system error like `errno` instead of a `gpgme_err_code_t` error code.

```
@end deftypefun

@deftypefun {gpgme_error_t} gpgme_error_from_errno (@w{int @var{err}})
The function gpgme_error_from_errno
is like gpgme_error,
but it takes a system error like errno instead of a
gpgme_err_code_t error code.
@end deftypefun
```

Sometimes you might want to map system error numbers to error codes directly, or map an error code representing a system error back to the system error number. The following functions can be used to do that.

```
@deftypefun {gpgme_err_code_t} gpgme_err_code_from_errno (@w{int @var{err}})
The function gpgme_err_code_from_errno returns the error code
for the system error @var{err}. If @var{err} is not a known system
error, the function returns GPG_ERR_UNKNOWN_ERRNO.
@end deftypefun
```

```
@deftypefun {int} gpgme_err_code_to_errno (@w{gpgme_err_code_t @var{err}})
The function gpgme_err_code_to_errno returns the system error
for the error code @var{err}. If @var{err} is not an error code
representing a system error, or if this system error is not defined on
this system, the function returns 0.
@end deftypefun
```

```
@node Error Sources
@section
Error Sources
@cindex error codes, list of
```

The library `libgpg-error` defines an error source for every component of the GnuPG system. The error source part of an error value is not well defined. As such it is mainly useful to improve the diagnostic error message for the user.

If the error code part of an error value is `0`, the whole error value will be `0`. In this case the error source part is of course `GPG_ERR_SOURCE_UNKNOWN`.

The list of error sources that might occur in applications using `GPGME` is:

```
@table @code
```

**@item GPG\_ERR\_SOURCE\_UNKNOWN**

The error source is not known. The value of this error source is @code{0}.

**@item GPG\_ERR\_SOURCE\_GPGME**

The error source is @acronym{GPGME} itself. This is the default for errors that occur in the @acronym{GPGME} library.

**@item GPG\_ERR\_SOURCE\_GPG**

The error source is GnuPG, which is the crypto engine used for the OpenPGP protocol.

**@item GPG\_ERR\_SOURCE\_GPGSM**

The error source is GPGSM, which is the crypto engine used for the CMS protocol.

**@item GPG\_ERR\_SOURCE\_GCRYPT**

The error source is @code{libgcrypt}, which is used by crypto engines to perform cryptographic operations.

**@item GPG\_ERR\_SOURCE\_GPGAGENT**

The error source is @command{gpg-agent}, which is used by crypto engines to perform operations with the secret key.

**@item GPG\_ERR\_SOURCE\_PINENTRY**

The error source is @command{pinentry}, which is used by @command{gpg-agent} to query the passphrase to unlock a secret key.

**@item GPG\_ERR\_SOURCE\_SCD**

The error source is the SmartCard Daemon, which is used by @command{gpg-agent} to delegate operations with the secret key to a SmartCard.

**@item GPG\_ERR\_SOURCE\_KEYBOX**

The error source is @code{libkbx}, a library used by the crypto engines to manage local keyrings.

**@item GPG\_ERR\_SOURCE\_USER\_1**

**@item GPG\_ERR\_SOURCE\_USER\_2**

**@item GPG\_ERR\_SOURCE\_USER\_3**

**@item GPG\_ERR\_SOURCE\_USER\_4**

These error sources are not used by any GnuPG component and can be used by other software. For example, applications using

@acronym{GPGME} can use them to mark error values coming from callback handlers. Thus @code{GPG\_ERR\_SOURCE\_USER\_1} is the default for errors created with @code{gpgme\_error} and @code{gpgme\_error\_from\_erno},

unless you define `GPGME_ERR_SOURCE_DEFAULT` before including `gpgme.h`.  
@end table

@node Error Codes

@section Error Codes

@cindex error codes, list of

The library `libgpg-error` defines many error values. Most of them are not used by `GPGME` directly, but might be returned by `GPGME` because it received them from the crypto engine. The below list only includes such error codes that have a specific meaning in `GPGME`, or which are so common that you should know about them.

@table @code

@item GPG\_ERR\_EOF

This value indicates the end of a list, buffer or file.

@item GPG\_ERR\_NO\_ERROR

This value indicates success. The value of this error code is `0`. Also, it is guaranteed that an error value made from the error code `0` will be `0` itself (as a whole). This means that the error source information is lost for this error code, however, as this error code indicates that no error occurred, this is generally not a problem.

@item GPG\_ERR\_GENERAL

This value means that something went wrong, but either there is not enough information about the problem to return a more useful error value, or there is no separate error value for this type of problem.

@item GPG\_ERR\_ENOMEM

This value means that an out-of-memory condition occurred.

@item GPG\_ERR\_E...

System errors are mapped to `GPG_ERR_FOO` where `FOO` is the symbol for the system error.

@item GPG\_ERR\_INV\_VALUE

This value means that some user provided data was out of range. This can also refer to objects. For example, if an empty `gpgme_data_t` object was expected, but one containing data was provided, this error value is returned.

@item GPG\_ERR\_UNUSABLE\_PUBKEY

This value means that some recipients for a message were invalid.

@item GPG\_ERR\_UNUSABLE\_SECKEY

This

value means that some signers were invalid.

@item GPG\_ERR\_NO\_DATA

This value means that a @code{gpgme\_data\_t} object which was expected to have content was found empty.

@item GPG\_ERR\_CONFLICT

This value means that a conflict of some sort occurred.

@item GPG\_ERR\_NOT\_IMPLEMENTED

This value indicates that the specific function (or operation) is not implemented. This error should never happen. It can only occur if you use certain values or configuration options which do not work, but for which we think that they should work at some later time.

@item GPG\_ERR\_DECRYPT\_FAILED

This value indicates that a decryption operation was unsuccessful.

@item GPG\_ERR\_BAD\_PASSPHRASE

This value means that the user did not provide a correct passphrase when requested.

@item GPG\_ERR\_CANCELED

This value means that the operation was canceled.

@item GPG\_ERR\_INV\_ENGINE

This value means that the engine that implements the desired protocol is currently not available. This can either be because the sources were configured to exclude support for this engine, or because the engine is not installed properly.

@item GPG\_ERR\_AMBIGUOUS\_NAME

This value indicates that a user ID or other specifier did not specify a unique key.

@item GPG\_ERR\_WRONG\_KEY\_USAGE

This value indicates that a key is not used appropriately.

@item GPG\_ERR\_CERT\_REVOKED

This value indicates that a key signature was revoked.

@item GPG\_ERR\_CERT\_EXPIRED

This value indicates that a key signature expired.

@item GPG\_ERR\_NO\_CRL\_KNOWN

This value indicates that no certificate revocation list is known for the certificate.

@item GPG\_ERR\_NO\_POLICY\_MATCH

This value indicates that a policy issue occurred.

@item GPG\_ERR\_NO\_SECKEY

This value indicates that no secret key for the user ID is available.

@item GPG\_ERR\_MISSING\_CERT

This value indicates that a key could not be imported because the issuer certificate is missing.

@item GPG\_ERR\_BAD\_CERT\_CHAIN

This value indicates that a key could not be imported because its certificate chain is not good, for example it could be too long.

@item GPG\_ERR\_UNSUPPORTED\_ALGORITHM

This value means a verification failed because the cryptographic algorithm is not supported by the crypto backend.

@item GPG\_ERR\_BAD\_SIGNATURE

This value means a verification failed because the signature is bad.

@item GPG\_ERR\_NO\_PUBKEY

This value means a verification failed because the public key is not available.

@item GPG\_ERR\_USER\_1

@item GPG\_ERR\_USER\_2

@item ...

@item GPG\_ERR\_USER\_16

These error codes are not used by any GnuPG component and can be freely used by other software. Applications using @acronym{GPGME} might use them to mark specific errors returned by callback handlers if no suitable error codes (including the system errors) for these errors exist already.

@end table

@node Error Strings

@section Error Strings

@cindex error values, printing of

@cindex error codes, printing of

@cindex error sources, printing of

@cindex error strings

```
@deftypefun {const char *} gpgme_strerror
(@w{gpgme_error_t @var{err}})
```

The function @code{gpgme\_strerror} returns a pointer to a statically allocated string containing a description of the error code contained in the error value @var{err}. This string can be used to output a diagnostic message to the user.

This function is not thread safe. Use @code{gpgme\_strerror\_r} in multi-threaded programs.

```
@end deftypefun
```

```
@deftypefun {int} gpgme_strerror_r (@w{gpgme_error_t @var{err}}, @w{char *@var{buf}}, @w{size_t @var{buflen}})
```

The function @code{gpgme\_strerror\_r} returns the error string for @var{err} in the user-supplied buffer @var{buf} of size @var{buflen}.

This function is, in contrast to @code{gpgme\_strerror}, thread-safe if a thread-safe @code{strerror\_r} function is provided by the system.

If the function succeeds, 0 is returned and @var{buf} contains the string describing the error. If the buffer was not large enough, ERANGE is returned and @var{buf} contains as much of the beginning of the error string as fits into the buffer.

```
@end deftypefun
```

```
@deftypefun {const char *} gpgme_strsource (@w{gpgme_error_t @var{err}})
```

The function @code{gpgme\_strsource} returns a pointer to a statically allocated string containing a description of the error source contained in the error value @var{err}. This string can be used to output a diagnostic message to the user.

```
@end deftypefun
```

The following example illustrates the use of @code{gpgme\_strerror}:

```
@example
```

```
gpgme_ctx_t ctx;
gpgme_error_t err = gpgme_new (&ctx);
if (err)
@ {
 fprintf (stderr, "%s: creating GpgME context failed: %s: %s\n",
 argv[0], gpgme_strsource (err), gpgme_strerror (err));
 exit (1);
@ }
@end example
```

@node Exchanging Data  
@chapter Exchanging Data  
@cindex data, exchanging

A lot of data has to be exchanged between the user and the crypto engine, like plaintext messages, ciphertext, signatures and information about the keys. The technical details about exchanging the data information are completely abstracted by @acronym{GPGME}.

The

user provides and receives the data via @code{gpgme\_data\_t} objects, regardless of the communication protocol between @acronym{GPGME} and the crypto engine in use.

@deftp {Data type} {gpgme\_data\_t}

The @code{gpgme\_data\_t} type is a handle for a container for generic data, which is used by @acronym{GPGME} to exchange data with the user.

@end deftp

@code{gpgme\_data\_t} objects do not provide notifications on events. It is assumed that read and write operations are blocking until data is available. If this is undesirable, the application must ensure that all GPGME data operations always have data available, for example by using memory buffers or files rather than pipes or sockets. This might be relevant, for example, if the external event loop mechanism is used.

@deftp {Data type} {gpgme\_off\_t}

@since{1.4.1}

On POSIX platforms the @code{gpgme\_off\_t} type is an alias for @code{off\_t}; it may be used interchangeably. On Windows platforms @code{gpgme\_off\_t} is defined as

a long (i.e. 32 bit) for 32 bit

Windows and as a 64 bit signed integer for 64 bit Windows.

@end deftp

@deftp {Data type} {gpgme\_ssize\_t}

The @code{gpgme\_ssize\_t} type is an alias for @code{ssize\_t}. It has only been introduced to overcome portability problems pertaining to the declaration of @code{ssize\_t} by different toolchains.

@end deftp

@node

Memory Based Data Buffers

@subsection Memory Based Data Buffers

Memory based data objects store all data in allocated memory. This is convenient, but only practical for an amount of data that is a fraction of the available physical memory. The data has to be copied from its source and to its destination, which can often be avoided by using one of the other data object

@deftypefun gpgme\_error\_t gpgme\_data\_new (@w{gpgme\_data\_t \*}@var{dh})

The function @code{gpgme\_data\_new} creates a new @code{gpgme\_data\_t} object and returns a handle for it in @var{dh}. The data object is memory based and initially empty.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the data object was successfully created, @code{GPG\_ERR\_INV\_VALUE} if @var{dh} is not a valid pointer, and @code{GPG\_ERR\_ENOMEM} if not enough memory is available.

@end deftypefun

@deftypefun gpgme\_error\_t gpgme\_data\_new\_from\_mem (@w{gpgme\_data\_t \*}@var{dh}), @w{const char \*}@var{buffer}, @w{size\_t @var{size}}, @w{int @var{copy}})

The function @code{gpgme\_data\_new\_from\_mem} creates a new @code{gpgme\_data\_t} object and fills it with @var{size} bytes starting from @var{buffer}.

If @var{copy} is not zero, a private copy of the data is made. If

@var{copy} is zero, the data is taken from the specified buffer as needed, and the user has to ensure that the buffer remains valid for the whole life span of the data object.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the data object was successfully created, @code{GPG\_ERR\_INV\_VALUE} if @var{dh} or @var{buffer} is not a valid pointer, and @code{GPG\_ERR\_ENOMEM} if not enough memory is available.  
@end deotypefun

```
@deftypefun gpgme_error_t gpgme_data_new_from_file (@w{gpgme_data_t *}@var{dh}), @w{const char *}@var{filename}), @w{int @var{copy}})
```

The function @code{gpgme\_data\_new\_from\_file} creates a new @code{gpgme\_data\_t} object and fills it with the content of the file @var{filename}.

If @var{copy} is not zero, the whole file is read in at initialization time and the file is not used anymore after that. This is the only mode supported currently. Later, a value of zero for @var{copy} might cause all reads to be delayed until the data is needed, but this is not yet implemented.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the data object was successfully created, @code{GPG\_ERR\_INV\_VALUE} if @var{dh} or @var{filename} is not a valid pointer, @code{GPG\_ERR\_NOT\_IMPLEMENTED} if @var{code} is zero, and @code{GPG\_ERR\_ENOMEM} if not enough memory is available.  
@end deotypefun

```
@deftypefun gpgme_error_t gpgme_data_new_from_filepart (@w{gpgme_data_t *}@var{dh}), @w{const char *}@var{filename}), @w{FILE *}@var{fp}), @w{off_t @var{offset}}), @w{size_t @var{length}})
```

The function @code{gpgme\_data\_new\_from\_filepart} creates a new @code{gpgme\_data\_t} object and fills it with a part of the file specified by @var{filename} or @var{fp}.

Exactly one of @var{filename} and @var{fp} must be non-zero, the other must be zero. The argument that is not zero specifies the file from which @var{length} bytes are read into the data object, starting from @var{offset}.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the data object was successfully created, @code{GPG\_ERR\_INV\_VALUE} if @var{dh} and exactly one of @var{filename} and @var{fp} is not a valid pointer, and @code{GPG\_ERR\_ENOMEM} if not enough memory is available.  
@end deotypefun

@node File Based Data Buffers

@subsection File Based Data Buffers

File based data objects operate directly on file descriptors or streams. Only a small amount of data is stored in core at any time, so the size of the data objects is not limited by @acronym{GPGME}.

```
@deftypefun gpgme_error_t gpgme_data_new_from_fd (@w{gpgme_data_t *@var{dh}}, @w{int @var{fd}})
```

The function @code{gpgme\_data\_new\_from\_fd} creates a new @code{gpgme\_data\_t} object and uses the file descriptor @var{fd} to read from (if used as an input data object) and write to (if used as an output data object).

When using the data object as an input buffer, the function might read a bit more from the file descriptor than is actually needed by the crypto engine in the desired operation because of internal buffering.

Note that GPGME assumes that the file descriptor is set to blocking mode. Errors during I/O operations, except for EINTR, are usually fatal for crypto operations.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the data object was successfully created, and @code{GPG\_ERR\_ENOMEM} if not enough memory is available.

```
@end deftypefun
```

```
@deftypefun gpgme_error_t gpgme_data_new_from_stream (@w{gpgme_data_t *@var{dh}}, @w{FILE *@var{stream}})
```

The function @code{gpgme\_data\_new\_from\_stream} creates a new @code{gpgme\_data\_t} object and uses the I/O stream @var{stream} to read from (if used as an input data object) and write to (if used as an output data object).

When using the data object as an input buffer, the function might read a bit more from the stream than is actually needed by the crypto engine in the desired operation because of internal buffering.

Note that GPGME assumes that the stream is in blocking mode. Errors during I/O operations, except for EINTR, are usually fatal for crypto operations.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the data object was successfully created, and @code{GPG\_ERR\_ENOMEM} if not enough memory is available.

```
@end deftypefun
```

```
@deftypefun gpgme_error_t gpgme_data_new_from_estream (@w{gpgme_data_t *}@var{dh}),
@w{gpgme_stream_t @var{stream}})
```

The function `gpgme_data_new_from_estream` creates a new `gpgme_data_t` object and uses the `gpgme_stream_t` stream `stream` to read from (if used as an input data object) and write to (if used as an output data object).

When using the data object as an input buffer, the function might read a bit more from the stream than is actually needed by the crypto engine in the desired operation because of internal buffering.

Note that GPGME

assumes that the stream is in blocking mode. Errors during I/O operations, except for `EINTR`, are usually fatal for crypto operations.

The function returns the error code `GPG_ERR_NO_ERROR` if the data object was successfully created, and `GPG_ERR_ENOMEM` if not enough memory is available.

```
@end deftypefun
```

```
@node Callback Based Data Buffers
```

```
@subsection Callback Based Data Buffers
```

If neither memory nor file based data objects are a good fit for your application, you can implement the functions a data object provides yourself and create a data object from these callback functions.

```
@deftp {Data type} {ssize_t (*gpgme_data_read_cb_t) (@w{void *}@var{handle}), @w{void @var{*buffer}},
@w{size_t @var{size}})}
```

```
@tindex gpgme_data_read_cb_t
```

The `gpgme_data_read_cb_t` type is the type of functions which `GPGME` calls if it wants to read data from a user-implemented data object. The function should read up to `size` bytes from the current read position into the space starting at `buffer`. The `handle` is provided by the user at data object creation time.

Note that GPGME assumes that the read blocks until data is available. Errors during I/O operations, except for `EINTR`, are usually fatal for crypto operations.

The function should return the number of bytes read, 0 on EOF, and -1 on error. If an error occurs, `errno` should be set to describe the type of the error.

```
@end deftp
```

```
@deftp {Data type} {ssize_t (*gpgme_data_write_cb_t) (@w{void *}@var{handle}), @w{const void
@var{*buffer}}, @w{size_t @var{size}})}
@tindex gpgme_data_write_cb_t
```

The @code{gpgme\_data\_write\_cb\_t} type is the type of functions which @acronym{GPGME} calls if it wants to write data to a user-implemented data object. The function should write up to @var{size} bytes to the current write position from the space starting at @var{buffer}. The @var{handle} is provided by the user at data object creation time.

Note that GPGME assumes that the write blocks until data is available.

Errors during I/O operations, except for EINTR, are usually fatal for crypto operations.

The function should return the number of bytes written, and -1 on error. If an error occurs, @var{errno} should be set to describe the type of the error.

```
@end deftp
```

```
@deftp {Data type} {off_t (*gpgme_data_seek_cb_t) (@w{void *}@var{handle}), @w{off_t @var{offset}},
@w{int @var{whence}})}
@tindex gpgme_data_seek_cb_t
```

The @code{gpgme\_data\_seek\_cb\_t} type is the type of functions which @acronym{GPGME} calls if it wants to change the current read/write position in a user-implemented data object, just like the @code{lseek} function.

The function should return the new read/write position, and -1 on error. If an error occurs, @var{errno} should be set to describe the type of the error.

```
@end deftp
```

```
@deftp {Data type} {void (*gpgme_data_release_cb_t) (@w{void *}@var{handle})}
@tindex gpgme_data_release_cb_t
```

The @code{gpgme\_data\_release\_cb\_t} type is the type of functions which @acronym{GPGME} calls if it wants to destroy a user-implemented data object. The @var{handle} is provided by the user at data object creation time.

```
@end deftp
```

```
@deftp {Data type} {struct gpgme_data_cbs}
```

This structure is used to store the data callback interface functions described above. It has the following members:

```
@table @code
```

```
@item gpgme_data_read_cb_t read
```

This is the function called by `@acronym{GPGME}` to read data from the data object. It is only required for input data object.

`@item gpgme_data_write_cb_t write`

This is the function called by `@acronym{GPGME}` to write data to the data object. It is only required for output data object.

`@item gpgme_data_seek_cb_t seek`

This is the function called by `@acronym{GPGME}` to change the current read/write pointer in the data object (if available). It is optional.

`@item gpgme_data_release_cb_t release`

This is the function called by `@acronym{GPGME}` to release a data object. It is optional.

`@end table`

`@end deftp`

`@deftypefun gpgme_error_t gpgme_data_new_from_cbs`

`(@w{gpgme_data_t *@var{dh}}, @w{gpgme_data_cbs_t @var{cbs}}, @w{void *@var{handle}})`

The function `@code{gpgme_data_new_from_cbs}` creates a new `@code{gpgme_data_t}` object and uses the user-provided callback functions to operate on the data object.

The handle `@var{handle}` is passed as first argument to the callback functions. This can be used to identify this data object.

The function returns the error code `@code{GPG_ERR_NO_ERROR}` if the data object was successfully created, and `@code{GPG_ERR_ENOMEM}` if not enough memory is available.

`@end deftypefun`

`@node Destroying Data Buffers`

`@section Destroying Data Buffers`

`@cindex data buffer, destruction`

`@deftypefun void gpgme_data_release (@w{gpgme_data_t @var{dh}})`

The function `@code{gpgme_data_release}` destroys the data object with the handle `@var{dh}`. It releases all associated resources that were not provided by the user in the first place.

`@end deftypefun`

`@deftypefun {char *} gpgme_data_release_and_get_mem (@w{gpgme_data_t @var{dh}}, @w{size_t *@var{length}})`

The function `@code{gpgme_data_release_and_get_mem}` is like `@code{gpgme_data_release}`, except that it returns the data buffer and its length that was provided by the object.

The user has to release the buffer with `gpgme_free`. In case the user provided the data buffer in non-copy mode, a copy will be made for this purpose.

In case an error returns, or there is no suitable data buffer that can be returned to the user, the function will return `NULL`. In any case, the data object `dh` is destroyed.

`@end deftypefun`

```
@deftypefun void gpgme_free (@w{void *@var{buffer}})
```

```
@since{1.1.1}
```

The function `gpgme_free` releases the memory returned by `gpgme_data_release_and_get_mem` and `gpgme_pubkey_algo_string`. It should be used instead of the system libraries `free` function in case different allocators are used by a program. This is often the case if `gpgme` is used under Windows as a DLL.

`@end deftypefun`

`@node`

Manipulating Data Buffers

`@section Manipulating Data Buffers`

`@cindex data buffer, manipulation`

Data buffers contain data and meta-data. The following operations can be used to manipulate both.

`@menu`

\* Data Buffer I/O Operations:: I/O operations on data buffers.

\* Data Buffer Meta-Data:: Meta-data manipulation of data buffers.

\* Data Buffer Convenience:: Convenience function for data buffers.

`@end menu`

`@node Data Buffer I/O Operations`

`@subsection Data Buffer I/O Operations`

`@cindex data buffer, I/O operations`

`@cindex data buffer, read`

`@cindex data buffer, write`

`@cindex data buffer, seek`

```
@deftypefun ssize_t gpgme_data_read (@w{gpgme_data_t @var{dh}}, @w{void *@var{buffer}}, @w{size_t @var{length}})
```

The function `gpgme_data_read` reads up to `length` bytes

from the data object with the handle `@var{dh}` into the space starting at `@var{buffer}`.

If no error occurs, the actual amount read is returned. If the end of the data object is reached, the function returns 0.

In all other cases, the function returns -1 and sets `@var{errno}`.  
@end deftypefun

```
@deftypefun ssize_t gpgme_data_write (@w{gpgme_data_t @var{dh}}, @w{const void *@var{buffer}},
@w{size_t @var{size}})
```

The function `@code{gpgme_data_write}` writes up to `@var{size}` bytes starting from `@var{buffer}` into the data object with the handle `@var{dh}` at the current write position.

The function returns the number of bytes actually written, or -1 if an error occurs. If an error occurs, `@var{errno}` is set.  
@end deftypefun

```
@deftypefun off_t gpgme_data_seek (@w{gpgme_data_t @var{dh}}, @w{off_t @var{offset}}, @w{int
@var{whence}})
```

The function `@code{gpgme_data_seek}` changes the current read/write position.

The `@var{whence}` argument specifies how the `@var{offset}` should be interpreted. It must be one of the following symbolic constants:

@table @code

@item SEEK\_SET

Specifies that `@var{offset}` is a count of characters from the beginning of the data object.

@item SEEK\_CUR

Specifies that `@var{offset}` is a count of characters from the current file position. This count may be positive or negative.

@item SEEK\_END

Specifies that `@var{offset}` is a count of characters from the end of the data object. A negative count specifies a position within the current extent of the data object; a positive count specifies a position past the current end. If you set the position past the current end, and actually write data, you will extend the data object with zeros up to that position.

@end table

If successful, the function returns the resulting file position,

measured in bytes from the beginning of the data object. You can use this feature together with `{SEEK_CUR}` to read the current read/write position.

If the function fails, -1 is returned and `{errno}` is set.

`@end deftypefun`

`@node Data Buffer Meta-Data`

`@subsection Data Buffer Meta-Data`

`@cindex data buffer, meta-data`

`@cindex data buffer, file name`

`@cindex data buffer, encoding`

`@deftypefun {char *} gpgme_data_get_file_name`

`(@w{gpgme_data_t} @var{dh})`

`@since{1.1.0}`

The function `{gpgme_data_get_file_name}` returns a pointer to a string containing the file name associated with the data object. The file name will be stored in the output when encrypting or signing the data and will be returned to the user when decrypting or verifying the output data.

If no error occurs, the string containing the file name is returned.

Otherwise, `{NULL}` will be returned.

`@end deftypefun`

`@deftypefun gpgme_error_t gpgme_data_set_file_name (@w{gpgme_data_t} @var{dh}, @w{const char *}@var{file_name})`

`@since{1.1.0}`

The function `{gpgme_data_set_file_name}` sets the file name associated with the data object. The file name will be stored in the output when encrypting or signing the data and will be returned to the user when decrypting or verifying the output data.

The function returns the error code `{GPG_ERR_INV_VALUE}` if `{dh}` is not a valid pointer and `{GPG_ERR_ENOMEM}` if not enough memory is available.

`@end`

`deftypefun`

`@defpt {Data type} {enum gpgme_data_encoding_t}`

`@tindex gpgme_data_encoding_t`

The `{gpgme_data_encoding_t}` type specifies the encoding of a

`{gpgme_data_t}` object. For input data objects, the encoding is useful to give the backend a hint on the type of data. For output data objects, the encoding can specify the output data format on certain operations. Please note that not all backends support all encodings on all operations. The following data types are available:

`@table @code`

`@item GPGME_DATA_ENCODING_NONE`

This specifies that the encoding is not known. This is the default for a new data object. The backend will try its best to detect the encoding automatically.

`@item GPGME_DATA_ENCODING_BINARY`

This specifies that the data is encoding in binary form; i.e. there is no special encoding.

`@item GPGME_DATA_ENCODING_BASE64`

This specifies that the data is encoded using the Base-64 encoding scheme as used by `@acronym{MIME}` and other protocols.

`@item`

`GPGME_DATA_ENCODING_ARMOR`

This specifies that the data is encoded in an armored form as used by OpenPGP and PEM.

`@item GPGME_DATA_ENCODING_MIME`

`@since{1.7.0}`

This specifies that the data is encoded as a MIME part.

`@item GPGME_DATA_ENCODING_URL`

`@since{1.2.0}`

The data is a list of linefeed delimited URLs. This is only useful with `@code{gpgme_op_import}`.

`@item GPGME_DATA_ENCODING_URL0`

`@since{1.2.0}`

The data is a list of binary zero delimited URLs. This is only useful with `@code{gpgme_op_import}`.

`@item GPGME_DATA_ENCODING_URLESC`

`@since{1.2.0}`

The data is a list of linefeed delimited URLs with all control and space characters percent escaped. This mode is is not yet implemented.

@end table

@end deftp

@deftypedefun gpgme\_data\_encoding\_t gpgme\_data\_get\_encoding (@w{gpgme\_data\_t @var{dh}})

The function @code{gpgme\_data\_get\_encoding} returns the encoding of the data object with the handle @var{dh}. If @var{dh} is not a valid pointer (e.g. @code{NULL}) @code{GPGME\_DATA\_ENCODING\_NONE} is

returned.

@end deftypedefun

@deftypedefun gpgme\_error\_t gpgme\_data\_set\_encoding (@w{gpgme\_data\_t @var{dh}}, gpgme\_data\_encoding\_t @var{enc})

The function @code{gpgme\_data\_set\_encoding} changes the encoding of the data object with the handle @var{dh} to @var{enc}.

@end deftypedefun

@deftypedefun {gpgme\_error\_t} gpgme\_data\_set\_flag @

(@w{gpgme\_data\_t @var{dh}}, @

@w{const char \*@var{name}}, @

@w{const char \*@var{value}})

@since{1.7.0}

Some minor properties of the data object can be controlled with flags set by this function. The properties are identified by the following values for @var{name}:

@table @code

@item size-hint

The value is a decimal number with the length gpgme shall assume for this data object. This is useful if the data is provided by callbacks or via file descriptors but the applications knows the total size of the data. If this is set the OpenPGP engine may use this to decide on buffer allocation strategies and to provide a total

value for its

progress information.

@end table

This function returns @code{0} on success.

@end deftypedefun

@node Data Buffer Convenience

@subsection Data Buffer Convenience Functions

@cindex data buffer, convenience

@cindex type of data

@cindex identify

```
@deftp {Data type} {enum gpgme_data_type_t}
@tindex gpgme_data_type_t
@since{1.4.3}
```

The @code{gpgme\_data\_type\_t} type is used to return the detected type of the content of a data buffer.

```
@end deftp
```

```
@table @code
```

```
@item GPGME_DATA_TYPE_INVALID
```

This is returned by @code{gpgme\_data\_identify} if it was not possible to identify the data. Reasons for this might be a non-seekable stream or a memory problem. The value is 0.

```
@item GPGME_DATA_TYPE_UNKNOWN
```

The type of the data is not known.

```
@item GPGME_DATA_TYPE_PGP_SIGNED
```

The data is an OpenPGP signed message. This may be a binary signature, a detached one or a cleartext signature.

```
@item GPGME_DATA_TYPE_PGP_ENCRYPTED
```

```
@since{1.7.0}
```

The data is an OpenPGP encrypted message.

```
@item GPGME_DATA_TYPE_PGP_SIGNATURE
```

```
@since{1.7.0}
```

The

data is an OpenPGP detached signature.

```
@item GPGME_DATA_TYPE_PGP_OTHER
```

This is a generic OpenPGP message. In most cases this will be encrypted data.

```
@item GPGME_DATA_TYPE_PGP_KEY
```

This is an OpenPGP key (private or public).

```
@item GPGME_DATA_TYPE_CMS_SIGNED
```

This is a CMS signed message.

```
@item GPGME_DATA_TYPE_CMS_ENCRYPTED
```

This is a CMS encrypted (enveloped data) message.

```
@item GPGME_DATA_TYPE_CMS_OTHER
```

This is used for other CMS message types.

```
@item GPGME_DATA_TYPE_X509_CERT
```

The data is a X.509 certificate

```
@item GPGME_DATA_TYPE_PKCS12
```

The data is a PKCS#12 message. This is commonly used to exchange private keys for X.509.

```
@end table
```

```
@deftypedef gpgme_data_type_t gpgme_data_identify (@w{gpgme_data_t @var{dh}})
```

@since{1.4.3}

The function `gpgme_data_identify` returns the type of the data with the handle `dh`. If it is not possible to perform the identification, the function returns zero (`GPGME_DATA_TYPE_INVALID`). Note that depending on how the data object has been created the identification may not be possible or the data object may change its internal state (file pointer moved). For file or memory based data object, the state should not change.

@end deftypefun

@c

@c Chapter Contexts

@c

@node Contexts

@chapter Contexts

@cindex context

All cryptographic operations in `GPGME` are performed within a context, which contains the internal state of the operation as well as configuration parameters. By using several contexts you can run several cryptographic operations in parallel, with different configuration.

@deftp {Data type} {gpgme\_ctx\_t}

The `gpgme_ctx_t` type is a handle for a `GPGME` context, which is used to hold the configuration, status and result of cryptographic operations.

@end deftp

@menu

- \* Creating Contexts:: Creating new `GPGME` contexts.
- \* Destroying Contexts:: Releasing `GPGME` contexts.
- \* Result Management:: Managing the result of crypto operations.
- \* Context Attributes:: Setting properties of a context.
- \* Key Management:: Managing keys with `GPGME`.
- \* Crypto Operations:: Using a context for cryptography.
- \* Miscellaneous:: Miscellaneous operations
- \* Run Control:: Controlling how operations are run.

@end menu

@node Creating Contexts

@section Creating Contexts

@cindex context, creation

```
@deftypefun gpgme_error_t gpgme_new (@w{gpgme_ctx_t *@var{ctx}})
```

The function `gpgme_new` creates a new `gpgme_ctx_t` object and returns a handle for it in `@var{ctx}`.

The function returns the error code `GPG_ERR_NO_ERROR` if the context was successfully created, `GPG_ERR_INV_VALUE` if `@var{ctx}` is not a valid pointer, and `GPG_ERR_ENOMEM` if not enough memory is available. Also, it returns `GPG_ERR_NOT_OPERATIONAL` if `gpgme_check_version` was not called to initialize GPGME, and `GPG_ERR_SELFTEST_FAILED` if a selftest failed. Currently, the only selftest is for Windows MingW32 targets to see if `-mms-bitfields` was used (as required).

```
@end deftypefun
```

```
@node Destroying Contexts
```

```
@section Destroying Contexts
```

```
@cindex context, destruction
```

```
@deftypefun void gpgme_release (@w{gpgme_ctx_t @var{ctx}})
```

The function `gpgme_release` destroys the context with the handle `@var{ctx}` and releases all associated resources.

```
@end deftypefun
```

```
@node Result Management
```

```
@section Result Management
```

```
@cindex context, result of operation
```

The detailed result of an operation is returned in operation-specific structures such as `gpgme_decrypt_result_t`. The corresponding retrieval functions such as `gpgme_op_decrypt_result` provide static access to the results after an operation completes. Those structures shall be considered read-only and an application must not allocate such a structure on its own. The following interfaces make it possible to detach a result structure from its associated context and give it a lifetime beyond that of the current operation or context.

```
@deftypefun void gpgme_result_ref (@w{void *@var{result}})
```

```
@since{1.2.0}
```

The function `gpgme_result_ref` acquires an additional reference for the result `@var{result}`, which may be of any type

`gpgme_*_result_t`. As long as the user holds a reference, the

result structure is guaranteed to be valid and unmodified.

@end deftypefun

```
@deftypefun void gpgme_result_unref (@w{void *@var{result}})
@since{1.2.0}
```

The function `gpgme_result_unref` releases a reference for the result `@var{result}`. If this was the last reference, the result structure will be destroyed and all resources associated to it will be released.

@end deftypefun

Note that a context may hold its own references to result structures, typically until the context is destroyed or the next operation is started. In fact, these references are accessed through the `gpgme_op_*_result` functions.

@node Context Attributes

@node Protocol Selection

@subsection Protocol Selection

@cindex context, selecting protocol

@cindex protocol, selecting

```
@deftypefun gpgme_error_t gpgme_set_protocol (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_protocol_t @var{proto}})
```

The function `gpgme_set_protocol` sets the protocol used within the context `@var{ctx}` to `@var{proto}`. All crypto operations will be performed by the crypto engine configured for that protocol. [@xref{Protocols and Engines}](#).

Setting the protocol with `gpgme_set_protocol` does intentionally not check if the crypto engine for that protocol is available and installed correctly. [@xref{Engine Version Check}](#).

The function returns the error code `GPG_ERR_NO_ERROR` if the protocol could be set successfully, and `GPG_ERR_INV_VALUE` if `@var{protocol}` is not a valid protocol.  
`@end deftypefun`

```
@deftypefun gpgme_protocol_t gpgme_get_protocol (@w{gpgme_ctx_t @var{ctx}})
```

The function `gpgme_get_protocol` retrieves the protocol currently use with the context `@var{ctx}`.  
`@end deftypefun`

```
@node Crypto Engine
@subsection Crypto Engine
@cindex context, configuring engine
@cindex engine, configuration per context
```

The following functions can be used to set and retrieve the configuration of the crypto engines of a specific context. The default can also be retrieved without any particular context. [@xref{Engine Information}](#). The default can also be changed globally. [@xref{Engine Configuration}](#).

```
@deftypefun gpgme_engine_info_t gpgme_ctx_get_engine_info (@w{gpgme_ctx_t @var{ctx}})
@since{1.1.0}
```

The function `gpgme_ctx_get_engine_info` returns a linked list of engine info structures. Each info structure describes the configuration of one configured backend, as used by the context `@var{ctx}`.

The result is valid until the next invocation of `gpgme_ctx_set_engine_info` for this particular context.

This function can not fail.  
`@end deftypefun`

```
@deftypefun
 gpgme_error_t gpgme_ctx_set_engine_info (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_protocol_t
 @var{proto}}, @w{const char *@var{file_name}}, @w{const char *@var{home_dir}})
 @since{1.1.0}
```

The function `gpgme_ctx_set_engine_info` changes the configuration of the crypto engine implementing the protocol `@var{proto}` for the context `@var{ctx}`.

`@var{file_name}` is the file name of the executable program implementing this protocol, and `@var{home_dir}` is the directory name of the configuration directory for this crypto engine. If `@var{home_dir}` is `NULL`, the engine's default will be used.

Currently this function must be used before starting the first crypto operation. It is unspecified if and when the changes will take effect if the function is called after starting the first operation on the context `@var{ctx}`.

This function returns the error code `GPG_ERR_NO_ERROR` if successful, or an error code on failure.

```
@end deftypefun
```

```
@node Setting the Sender
```

```
@subsection How to tell
 the engine the sender.
```

```
@cindex context, sender
```

```
@cindex sender
```

```
@cindex From:
```

Some engines can make use of the senders address, for example to figure out the best user id in certain trust models. For verification and signing of mails, it is thus suggested to let the engine know the sender ("From:") address. `GPGME` provides two functions to accomplish that. Note that the esoteric use of multiple "From:" addresses is not supported.

```
@deftypefun gpgme_error_t gpgme_set_sender @
 (@w{gpgme_ctx_t @var{ctx}}, @
 @w{int @var{address}})
```

```
@since{1.8.0}
```

The function `gpgme_set_sender` specifies the sender address for use in sign and verify operations. `@var{address}` is expected to be the `addr-spec` part of an address but may also be a complete mailbox address, in which case this function extracts the `addr-spec` from

it. Using `NULL` for `@var{address}` clears the sender address.

The function returns 0 on success or an error code on failure. The most likely failure is that no valid `addr-spec` was found in `@var{address}`.

`@end deftypefun`

```
@deftypefun @w{const char *} gpgme_get_sender @
 (@w{gpgme_ctx_t @var{ctx}})
```

`@since{1.8.0}`

The function `gpgme_get_sender` returns the current sender address from the context, or `NULL` if none was set. The returned value is valid as long as the `@var{ctx}` is valid and `gpgme_set_sender` has not been called again.

`@end deftypefun`

`@c FIXME`: Unfortunately, using `@acronym` here breaks `texi2dvi`.

`@node ASCII Armor`

`@subsection @acronym{ASCII} Armor`

`@cindex context, armor mode`

`@cindex @acronym{ASCII} armor`

`@cindex armor mode`

```
@deftypefun void gpgme_set_armor (@w{gpgme_ctx_t @var{ctx}}, @w{int @var{yes}})
```

The function `gpgme_set_armor` specifies if the output should be `@acronym{ASCII}` armored. By default, output is not `@acronym{ASCII}` armored.

`@acronym{ASCII}` armored output is disabled if `@var{yes}` is zero, and enabled otherwise.

`@end deftypefun`

```
@deftypefun int gpgme_get_armor (@w{gpgme_ctx_t
 @var{ctx}})
```

The function `gpgme_get_armor` returns 1 if the output is `@acronym{ASCII}` armored, and `0` if it is not, or if `@var{ctx}` is not a valid pointer.

`@end deftypefun`

`@node Text Mode`

@subsection Text Mode  
@cindex context, text mode  
@cindex text mode  
@cindex canonical text mode

```
@deftypefun void gpgme_set_textmode (@w{gpgme_ctx_t @var{ctx}}, @w{int @var{yes}})
```

The function `gpgme_set_textmode` specifies if canonical text mode should be used. By default, text mode is not used.

Text mode is for example used for the RFC2015 signatures; note that the updated RFC 3156 mandates that the mail user agent does some preparations so that text mode is not needed anymore.

This option is only relevant to the OpenPGP crypto engine, and ignored by all other engines.

Canonical text mode is disabled if `@var{yes}` is zero, and enabled otherwise.

```
@end deftypefun
```

```
@deftypefun int gpgme_get_textmode (@w{gpgme_ctx_t @var{ctx}})
```

The function `gpgme_get_textmode` returns

- 1 if canonical text mode is enabled, and `0` if it is not, or if `@var{ctx}` is not a valid pointer.

```
@end deftypefun
```

@node Offline Mode  
@subsection Offline Mode  
@cindex context, offline mode  
@cindex offline mode

```
@deftypefun void gpgme_set_offline (@w{gpgme_ctx_t @var{ctx}}, @w{int @var{yes}})
```

@since{1.6.0}

The function `gpgme_set_offline` specifies if offline mode should be used. Offline mode is disabled if `@var{yes}` is zero, and enabled otherwise. By default, offline mode is disabled.

The details of the offline mode depend on the used protocol and its backend engine. It may eventually be extended to be more stricter and for example completely disable the use of Dirmngr for any engine.

For the CMS protocol the offline mode specifies whether Dirmngr shall be used to do additional validation that might require connecting external services (e.g. CRL / OCSP checks). Here the offline mode only affects the keylist mode `GPGME_KEYLIST_MODE_VALIDATE`.

For the OpenPGP protocol offline mode entirely disables the use of the Dirmngr and will thus guarantee that no network connections are done as part of an operation on this context. It has only an effect with GnuPG versions 2.1.23 or later.

For all other protocols the offline mode is currently ignored.

@end deftypefun

```
@deftypefun int gpgme_get_offline (@w{gpgme_ctx_t @var{ctx}})
@since{1.6.0}
```

The function @code{gpgme\_get\_offline} returns 1 if offline mode is enabled, and @code{0} if it is not, or if @var{ctx} is not a valid pointer.

@end deftypefun

@node Pinentry Mode

@subsection Pinentry Mode

@cindex context, pinentry mode

@cindex pinentry mode

```
@deftypefun gpgme_error_t gpgme_set_pinentry_mode (@w{gpgme_ctx_t @var{ctx}},
@w{gpgme_pinentry_mode_t @var{mode}})
```

@since{1.4.0}

The function @code{gpgme\_set\_pinentry\_mode} specifies the pinentry mode to be used.

For GnuPG >= 2.1 this option is required to be set to

@code{GPGME\_PINENTRY\_MODE\_LOOPBACK} to enable the passphrase callback mechanism in GPGME

through @code{gpgme\_set\_passphrase\_cb}.

@end deftypefun

```
@deftypefun gpgme_pinentry_mode_t gpgme_get_pinentry_mode (@w{gpgme_ctx_t @var{ctx}})
@since{1.4.0}
```

The function @code{gpgme\_get\_pinentry\_mode} returns the mode set for the context.

@end deftypefun

```
@deftp {Data type} {enum gpgme_pinentry_mode_t}
```

```
@tindex gpgme_pinentry_mode_t
```

@since{1.4.0}

The @code{gpgme\_pinentry\_mode\_t} type specifies the set of possible pinentry modes that are supported by @acronym{GPGME} if GnuPG >= 2.1 is used.

The following modes are supported:

@table @code

@item GPGME\_PINENTRY\_MODE\_DEFAULT

@since{1.4.0}

Use the default of the agent, which is ask.

@item GPGME\_PINENTRY\_MODE\_ASK

@since{1.4.0}

Force the use of the Pinentry.

@item GPGME\_PINENTRY\_MODE\_CANCEL

@since{1.4.0}

Emulate use of Pinentry's cancel button.

@item GPGME\_PINENTRY\_MODE\_ERROR

@since{1.4.0}

Return a Pinentry error @code{No Pinentry}.

@item GPGME\_PINENTRY\_MODE\_LOOPBACK

@since{1.4.0}

Redirect Pinentry queries to the caller.

This enables

the use of @code{gpgme\_set\_passphrase\_cb} because pinentry queries are redirected to gpgme.

Note: For 2.1.0 - 2.1.12 this mode requires @code{allow-loopback-pinentry} to be enabled in the @file{gpg-agent.conf} or an agent started with that option.

@end table

@end deftp

@node Included Certificates

@subsection Included Certificates

@cindex certificates, included

@deftypefun void gpgme\_set\_include\_certs (@w{gpgme\_ctx\_t @var{ctx}}, @w{int @var{nr\_of\_certs}})

The function @code{gpgme\_set\_include\_certs} specifies how many

certificates should be included in an S/MIME signed message. By default, only the sender's certificate is included. The possible values of `@var{nr_of_certs}` are:

```
@table @code
@item GPGME_INCLUDE_CERTS_DEFAULT
@since{1.0.3}
```

Fall back to the default of the crypto backend. This is the default for GPGME.

```
@item -2
```

Include all certificates except the root certificate.

```
@item -1
```

Include all certificates.

```
@item 0
```

Include no certificates.

```
@item 1
```

Include the sender's certificate only.

```
@item n
```

Include the first `n` certificates of the certificates path, starting from the sender's certificate. The number `@code{n}` must be positive.

```
@end table
```

Values of `@var{nr_of_certs}` smaller than `-2` are undefined.

This option is only relevant to the CMS crypto engine, and ignored by all other engines.

```
@end dectypedefun
```

```
@dectypedefun int gpgme_get_include_certs (@w{gpgme_ctx_t @var{ctx}})
```

The function `@code{gpgme_get_include_certs}` returns the number of certificates to include into an S/MIME signed message.

```
@end dectypedefun
```

```
@node Key Listing Mode
```

```
@subsection Key Listing Mode
```

```
@cindex key listing mode
```

```
@cindex key listing, mode of
```

```
@dectypedefun gpgme_error_t gpgme_set_keylist_mode (@w{gpgme_ctx_t @var{ctx}},
```

```
@w{gpgme_keylist_mode_t @var{mode}})
```

The function `@code{gpgme_set_keylist_mode}` changes the default behaviour of the key listing functions. The value in `@var{mode}` is a bitwise-or combination of one or multiple of the following bit values:

```
@table @code
```

#### @item GPGME\_KEYLIST\_MODE\_LOCAL

The

`{GPGME_KEYLIST_MODE_LOCAL}` symbol specifies that the local keyring should be searched for keys in the keylisting operation. This is the default.

Using only this option results in a `{--list-keys}`.

#### @item GPGME\_KEYLIST\_MODE\_EXTERN

The `{GPGME_KEYLIST_MODE_EXTERN}` symbol specifies that an external source should be searched for keys in the keylisting operation. The type of external source is dependent on the crypto engine used and whether it is combined with `{GPGME_KEYLIST_MODE_LOCAL}`. For example, it can be a remote keyserver or LDAP certificate server.

Using only this option results in a `{--search-keys}` for `{GPGME_PROTOCOL_OpenPGP}` and something similar to `{--list-external-keys}` for `{GPGME_PROTOCOL_CMS}`.

#### @item GPGME\_KEYLIST\_MODE\_LOCATE

This is a shortcut for the combination of

`{GPGME_KEYLIST_MODE_LOCAL}` and `{GPGME_KEYLIST_MODE_EXTERN}`, which results in a `{--locate-keys}` for `{GPGME_PROTOCOL_OpenPGP}`.

@item

#### GPGME\_KEYLIST\_MODE\_SIGS

The `{GPGME_KEYLIST_MODE_SIGS}` symbol specifies that the key signatures should be included in the listed keys.

#### @item GPGME\_KEYLIST\_MODE\_SIG\_NOTATIONS

@since{1.1.1}

The `{GPGME_KEYLIST_MODE_SIG_NOTATIONS}` symbol specifies that the signature notations on key signatures should be included in the listed keys. This only works if `{GPGME_KEYLIST_MODE_SIGS}` is also enabled.

#### @item GPGME\_KEYLIST\_MODE\_WITH\_TOFU

@since{1.7.0}

The `{GPGME_KEYLIST_MODE_WITH_TOFU}` symbol specifies that information pertaining to the TOFU trust model should be included in the listed keys.

#### @item GPGME\_KEYLIST\_MODE\_WITH\_KEYGRIP

@since{1.14.0}

The `{GPGME_KEYLIST_MODE_WITH_KEYRIP}` symbol specifies that the

keygrip is always included in the listing. The default depends on the version of the backend and the used protocol.

@item GPGME\_KEYLIST\_MODE\_WITH\_SECRET  
@since{1.5.1}

The @code{GPGME\_KEYLIST\_MODE\_WITH\_SECRET} returns information about the presence of a corresponding secret key in a public key listing. A public key listing with this mode is slower than a standard listing but can be used instead of a second run to list the secret keys. This is only supported for GnuPG versions  $\geq 2.1$ . Note that using this option also makes sure that the keygrip is available in the output.

@item GPGME\_KEYLIST\_MODE\_EPHEMERAL  
@since{1.2.0}

The @code{GPGME\_KEYLIST\_MODE\_EPHEMERAL} symbol specifies that keys flagged as ephemeral are included in the listing.

@item GPGME\_KEYLIST\_MODE\_VALIDATE  
@since{0.4.5}

The @code{GPGME\_KEYLIST\_MODE\_VALIDATE} symbol specifies that the backend should do key or certificate validation and not just get the validity information from an internal cache. This might be an expensive operation and is in general not useful. Currently only implemented for the S/MIME backend and ignored for other backends.

@end table

At least one of @code{GPGME\_KEYLIST\_MODE\_LOCAL} and @code{GPGME\_KEYLIST\_MODE\_EXTERN} must be specified. For future binary compatibility, you should get the current mode with @code{gpgme\_get\_keylist\_mode} and modify it by setting or clearing the appropriate bits, and then using that calculated value in the @code{gpgme\_set\_keylisting\_mode} operation. This will leave all other bits in the mode value intact (in particular those that are not used in the current version of the library).

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the mode could be set correctly, and @code{GPG\_ERR\_INV\_VALUE} if @var{ctx} is not a valid pointer or @var{mode} is not a valid mode.  
@end deftypefun

@deftypefun gpgme\_keylist\_mode\_t gpgme\_get\_keylist\_mode (@w{gpgme\_ctx\_t @var{ctx}})

The function `gpgme_get_keylist_mode` returns the current key listing mode of the context `ctx`. This value can then be modified and used in a subsequent `gpgme_set_keylist_mode` operation to only affect the desired bits (and leave all others intact).

The function returns 0 if `ctx` is not a valid pointer, and the current mode otherwise. Note that 0 is not a valid mode value.

@end deftypefun

@node Passphrase Callback  
@subsection Passphrase Callback  
@cindex callback, passphrase  
@cindex passphrase callback

@deftp {Data type} {gpgme\_error\_t (\*gpgme\_passphrase\_cb\_t)(void \*`hook`, const char \*`uid_hint`, const char \*`passphrase_info`, @w{int `prev_was_bad`}, @w{int `fd`})}

@tindex gpgme\_passphrase\_cb\_t

The `gpgme_passphrase_cb_t` type is the type of functions usable as passphrase callback function.

The argument `uid_hint` might contain a string that gives an indication for which user ID the passphrase is required. If this is not available, or not applicable (in the case of symmetric encryption, for example), `uid_hint` will be `NULL`.

The argument `passphrase_info`, if not `NULL`, will give further information about the context in which the passphrase is required. This information is engine and operation specific.

If this is the repeated attempt to get the passphrase, because previous attempts failed, then `prev_was_bad` is 1, otherwise it will be 0.

The user must write the passphrase, followed by a newline character, to the file descriptor `fd`. The function `gpgme_io_writen` should be used for the write operation. Note that if the user returns 0 to indicate success, the user must at least write a newline character before returning from the callback.

If an error occurs, return the corresponding `gpgme_error_t` value. You can use the error code `GPG_ERR_CANCELED` to abort the operation. Otherwise, return `0`.

Note: The `passphrase_cb` only works with GnuPG 1.x and 2.1.x and not

with the 2.0.x series. See `gpgme_set_pinentry_mode` for more details on 2.1.x usage.

`@end deftp`

```
@deftypefun void gpgme_set_passphrase_cb (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_passphrase_cb_t @var{passfunc}}, @w{void *@var{hook_value}})
```

The function `gpgme_set_passphrase_cb` sets the function that is used

when a passphrase needs to be provided by the user to `@var{passfunc}`. The function `@var{passfunc}` needs to be implemented by the user, and whenever it is called, it is called with its first argument being `@var{hook_value}`. By default, no passphrase callback function is set.

Not all crypto engines require this callback to retrieve the passphrase. It is better if the engine retrieves the passphrase from a trusted agent (a daemon process), rather than having each user to implement their own passphrase query. Some engines do not even support an external passphrase callback at all, in this case the error code `GPG_ERR_NOT_SUPPORTED` is returned.

For GnuPG  $\geq$  2.1 the pinentry mode has to be set to `GPGME_PINENTRY_MODE_LOOPBACK` to enable the passphrase callback. See `gpgme_set_pinentry_mode`.

The user can disable the use of a passphrase callback function by calling `gpgme_set_passphrase_cb` with `@var{passfunc}` being `NULL`.

`@end deftypefun`

```
@deftypefun void gpgme_get_passphrase_cb (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_passphrase_cb_t *@var{passfunc}}, @w{void **@var{hook_value}})
```

The function `gpgme_get_passphrase_cb` returns the function that is used when a passphrase needs to be provided by the user in `@var{*passfunc}`, and the first argument for this function in `@var{hook_value}`. If no passphrase callback is set, or `@var{ctx}` is not a valid pointer, `NULL` is returned in both variables.

`@var{passfunc}` or `@var{hook_value}` can be `NULL`. In this case, the corresponding value will not be returned.

`@end deftypefun`

`@node Progress Meter Callback`

`@subsection Progress Meter Callback`

`@cindex callback, progress meter`

`@cindex progress meter callback`

```
@deftp {Data type} {void (*gpgme_progress_cb_t)(void *@var{hook}, const char *@var{what}, int @var{type},
int @var{current}, int @var{total})}
```

```
@tindex gpgme_progress_cb_t
```

The `gpgme_progress_cb_t` type is the type of functions usable as progress callback function.

The arguments are

specific to the crypto engine. More information about the progress information returned from the GnuPG engine can be found in the GnuPG source code in the file `doc/DETAILS` in the section `PROGRESS`.

```
@end deftp
```

```
@deftypedef void gpgme_set_progress_cb (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_progress_cb_t
@var{progfunc}}, @w{void *@var{hook_value}})
```

The function `gpgme_set_progress_cb` sets the function that is used when progress information about a cryptographic operation is available. The function `progfunc` needs to be implemented by the user, and whenever it is called, it is called with its first argument being `hook_value`. By default, no progress callback function is set.

Setting a callback function allows an interactive program to display progress information about a long operation to the user.

The user can disable the use of a progress callback function by calling `gpgme_set_progress_cb` with `progfunc` being `NULL`.

```
@end deftypedef
```

```
@deftypedef void
```

```
gpgme_get_progress_cb (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_progress_cb_t *@var{progfunc}},
@w{void **@var{hook_value}})
```

The function `gpgme_get_progress_cb` returns the function that is used to inform the user about the progress made in `progfunc`, and the first argument for this function in `hook_value`. If no progress callback is set, or `ctx` is not a valid pointer, `NULL` is returned in both variables.

`progfunc` or `hook_value` can be `NULL`. In this case, the corresponding value will not be returned.

```
@end deftypedef
```

```
@node Status Message Callback
```

```
@subsection Status Message Callback
```

```
@cindex callback, status message
```

@cindex status message callback

```
@deftp {Data type} {gpgme_error_t (*gpgme_status_cb_t)(void *@var{hook}, const char *@var{keyword}, const char *@var{args})}
```

```
@tindex gpgme_status_cb_t
```

The @code{gpgme\_status\_cb\_t} type is the type of function usable as a status message callback function.

The argument @var{keyword} is the name of the status message while the @var{args} argument contains any arguments for the status message.

If an error occurs, return the corresponding @code{gpgme\_error\_t} value. Otherwise, return @code{0}.

```
@end deftp
```

```
@deftypefun void gpgme_set_status_cb (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_status_cb_t @var{statusfunc}}, @w{void *@var{hook_value}})
@since{1.6.0}
```

The function @code{gpgme\_set\_status\_cb} sets the function that is used when a status message is received from gpg to @var{statusfunc}. The function @var{statusfunc} needs to be implemented by the user, and whenever it is called, it is called with its first argument being @var{hook\_value}. By default, no status message callback function is set.

The user can disable the use of a status message callback function by calling @code{gpgme\_set\_status\_cb} with @var{statusfunc} being @code{NULL}.

```
@end deftypefun
```

```
@deftypefun void gpgme_get_status_cb (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_status_cb_t *@var{statusfunc}}, @w{void **@var{hook_value}})
@since{1.6.0}
```

The

function @code{gpgme\_get\_status\_cb} returns the function that is used to process status messages from gpg in @var{\*statusfunc}, and the first argument for this function in @var{\*hook\_value}. If no status message callback is set, or @var{ctx} is not a valid pointer, @code{NULL} is returned in both variables.

```
@end deftypefun
```

@node Context Flags

@subsection Context Flags

@cindex flags, of a context

```
@deftypefun {gpgme_error_t} gpgme_set_ctx_flag (@w{gpgme_ctx_t @var{ctx}}, @
```

```
@w{const char *@var{name}}, @
@w{const char *@var{value}})
```

@since{1.7.0}

Some minor properties of the context can be controlled with flags set by this function. The properties are identified by the following values for @var{name}:

@table @code  
@item "redraw"

This flag is normally not changed by the caller because GPGME sets and clears it automatically: The flag is cleared before an operation and set if an operation noticed that the engine has launched a Pinentry.

A Curses based application may use this information to redraw the screen; for example:

@example

```
err = gpgme_op_keylist_start (ctx, "foo@@example.org", 0);
while (!err)
 @ {
 err = gpgme_op_keylist_next (ctx, &key);
 if (err)
 break;
 show_key (key);
 gpgme_key_release (key);
 @ }
if ((s = gpgme_get_ctx_flag (ctx, "redraw")) && *s)
 redraw_screen ();
gpgme_release (ctx);
@end example
```

@item "full-status"

Using a @var{value} of "1" the status callback set by gpgme\_set\_status\_cb returns all status lines with the exception of PROGRESS lines. With the default of "0" the status callback is only called in certain situations.

@item "raw-description"

Setting the @var{value} to "1" returns human readable strings in a raw format. For example the non breaking space characters ("~") will not be removed from the @code{description} field of the @code{gpgme\_tofu\_info\_t} object.

@item "export-session-key"

Using a @var{value}

of "1" specifies that the context should try to export the symmetric session key when decrypting data. By default, or when using an empty string or "0" for @var{value}, session keys are not exported.

#### @item "override-session-key"

The string given in @var{value} is passed to the GnuPG engine to override the session key for decryption. The format of that session key is specific to GnuPG and can be retrieved during a decrypt operation when the context flag "export-session-key" is enabled. Please be aware that using this feature with GnuPG < 2.1.16 will leak the session key on many platforms via ps(1).

#### @item "auto-key-retrieve"

Setting the @var{value} to "1" asks the backend to automatically retrieve a key for signature verification if possible. Note that this option makes a "web bug" like behavior possible. Keyserver or Web Key Directory operators can see which keys you request, so by sending you a message signed by a brand new key (which you naturally will not have on your local keyring), the operator can tell both your IP address and the time when you verified the signature.

#### @item "auto-key-import"

Setting the @var{value} to "1" forces the GPG backend to automatically import a missing key for signature verification from the signature.

#### @item "include-key-block"

Setting the @var{value} to "1" forces the GPG backend to embed the signing key as well as an encryption subkey into the the signature.

#### @item "request-origin"

The string given in @var{value} is passed to the GnuPG engines to request restrictions based on the origin of the request. Valid values are documented in the GnuPG manual and the gpg man page under the option @option{--request-origin}. Requires at least GnuPG 2.2.6 to have an effect.

#### @item "no-symkey-cache"

For OpenPGP disable the passphrase cache used for symmetrical en- and decryption. This cache is based on the message specific salt value. Requires at least GnuPG 2.2.7 to have an effect.

#### @item "ignore-mdc-error"

This flag passes the option @option{--ignore-mdc-error} to gpg. This can be used to force decryption of a message which failed due to a missing integrity check. This flag must be used with great caution

and only if it is a known non-corrupted old message and the decryption result of the former try had the decryption result flag `{legacy_cipher_nomdc}` set. For failsafe reasons this flag is reset after each operation.

@item "auto-key-locate"

The string given in `@var{value}` is passed to `gpg`. This can be used to change the behavior of a `{GPGME_KEYLIST_MODE_LOCATE}` keylisting. Valid values are documented in the GnuPG manual and the `gpg` man page under the option `@option{--auto-key-locate}`. Requires at least GnuPG 2.1.18.

Note: Keys retrieved through `@code{auto-key-locate}` are automatically imported in the keyring.

@item trust-model

@since{1.11.2}

Change the trust-model for all GnuPG engine operations. An empty string sets the trust-model back to the users default. If the trust-model is not supported by GnuPG the behavior is undefined and will likely cause all operations to fail. Example: "tofu+pgp".

This options should be used carefully with a strict version requirement. In some versions of GnuPG setting the trust-model changes the default trust-model for future operations. A change in the trust-model also can have unintended side effects, like rebuilding the trust-db.

@item "extended-edit"

This flag passes the option `@option{--expert}` to `gpg key edit`. This can be used to get additional callbacks in `@code{gpgme_op_edit}`.

@end table

This function returns `@code{0}` on success.

@end deftypefun

```
@deftypefun {const char *} gpgme_get_ctx_flag @
 (@w{gpgme_ctx_t @var{ctx}}, @
 @w{const char *@var{name}})
```

@since{1.8.0}

The value of flags settable by `@code{gpgme_set_ctx_flag}` can be retrieved by this function. If `@var{name}` is unknown the function

returns @code{NULL}. For boolean flags an empty string is returned for False and the string "1" is returned for True; either `atoi(3)` or a test for an empty string can be used to get the boolean value.

@end deftypefun

@node Locale

@subsection Locale

@cindex locale, default

@cindex locale, of a context

A locale setting can be associated with a context. This locale is passed to the crypto engine, and used for applications like the PIN entry, which is displayed to the user when entering a passphrase is required.

The default locale is used to initialize the locale setting of all contexts created afterwards.

```
@deftypefun gpgme_error_t gpgme_set_locale (@w{gpgme_ctx_t @var{ctx}}, @w{int @var{category}},
@w{const char *@var{value}})
@since{0.4.3}
```

The function @code{gpgme\_set\_locale} sets the locale of the context @var{ctx}, or the default locale if @var{ctx} is a null pointer.

The locale settings that should be changed are specified by @var{category}. Supported categories are @code{LC\_CTYPE}, @code{LC\_MESSAGES}, and @code{LC\_ALL}, which is a wildcard you can use if you want to change all the categories at once.

The value to be used for the locale setting is @var{value}, which will be copied to @acronym{GPGME}'s internal data structures. @var{value} can be a null pointer, which disables setting the locale, and will make PIN entry and other applications use their default setting, which is usually not what you want.

Note that the settings are only used if the application runs on a text terminal, and that the settings should fit the configuration of the output terminal. Normally, it is sufficient to initialize the default value at startup.

The function returns an error if not enough memory is available.

@end deftypefun

@node Additional Logs  
@subsection Additional Logs  
@cindex auditlog, of the engine  
@cindex auditlog

Additional logs can be associated with a context. These logs are engine specific and can be obtained with `gpgme_op_getauditlog`.

```
@deftypefun gpgme_error_t gpgme_op_getauditlog @
 (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_data_t @var{output}},
 @
 @w{unsigned int @var{flags}})
@since{1.1.1}
```

The function `gpgme_op_getauditlog` is used to obtain additional logs as specified by `flags` into the `output` data. If

The function returns the error code `GPG_ERR_NO_ERROR` if a log could be queried from the engine, and `GPG_ERR_NOT_IMPLEMENTED` if the log specified in `flags` is not available for this engine. If no log is available `GPG_ERR_NO_DATA` is returned.

The value in `flags` is a bitwise-or combination of one or multiple of the following bit values:

```
@table @code
@item GPGME_AUDITLOG_DIAG
@since{1.11.2}
```

Obtain diagnostic output which would be written to `stderr` in interactive use of the engine. This can be used to provide additional diagnostic information in case of errors in other operations.

Note: If log-file has been set in the configuration the log will be empty and `GPG_ERR_NO_DATA` will be returned.

Implemented for: `GPGME_PROTOCOL_OpenPGP`

```
@item
GPGME_AUDITLOG_DEFAULT
@since{1.11.2}
```

This flag has the value 0 for compatibility reasons. Obtains additional information from the engine by issuing the `GETAUDITLOG` command. For `GPGME_PROTOCOL_CMS` this provides additional information about the X509 certificate chain.

Implemented for: @code{GPGME\_PROTOCOL\_CMS}

@item GPGME\_AUDITLOG\_HTML

@since{1.1.1}

Same as @code{GPGME\_AUDITLOG\_DEFAULT} but in HTML.

Implemented for: @code{GPGME\_PROTOCOL\_CMS}

@end table

@end deftypefun

```
@deftypefun gpgme_error_t gpgme_op_getauditlog_start @
 (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_data_t @var{output}}, @
 @w{unsigned int @var{flags}})
@since{1.1.1}
```

This is the asynchronous variant of @code{gpgme\_op\_getauditlog}.

@end deftypefun

@node Key Management

@section Key Management

@cindex key management

Some of the cryptographic operations require that recipients or signers are specified. This is always done by specifying the respective keys that should be used for the operation. The following section describes how such keys can be selected and manipulated.

@menu

- \* Key objects:: Description of the key structures.
- \* Listing Keys:: Browsing the list of available keys.
- \* Information About Keys:: Requesting detailed information about keys.
- \* Manipulating Keys:: Operations on keys.
- \* Generating Keys:: Creating new key pairs.
- \* Signing Keys:: Adding key signatures to public keys.
- \* Exporting Keys:: Retrieving key data from the key ring.
- \* Importing Keys:: Adding keys to the key ring.
- \* Deleting Keys:: Removing keys from the key ring.
- \* Changing Passphrases:: Change the passphrase of a key.
- \* Changing TOFU Data:: Changing data pertaining to TOFU.
- \* Advanced Key Editing:: Advanced key edit operation.

@end menu

@node Key objects

@subsection Key objects

The keys are represented in GPGME by structures which may only be read by the application but never be allocated or changed. They are valid as long as the key object itself is valid.

```
@deftp {Data type} gpgme_key_t
```

The @code{gpgme\_key\_t} type is a pointer to a key object. It has the following members:

```
@table @code
@item gpgme_keylist_mode_t keylist_mode
@since{0.9.0}
```

The keylist mode that was active when the key was retrieved.

```
@item unsigned int revoked : 1
This is true if the key is revoked.
```

```
@item unsigned int expired : 1
This is true if the key is expired.
```

```
@item unsigned int disabled : 1
This is true if the key is disabled.
```

```
@item unsigned int invalid : 1
This is true if the key is invalid. This might have several reasons,
for a example for the S/MIME backend, it will be set during key
listings if the key could not be validated due to missing
certificates or unmatched policies.
```

```
@item unsigned int can_encrypt : 1
This is true if the key (ie one of its subkeys) can be used for
encryption.
```

```
@item unsigned int can_sign
: 1
This is true if the key (ie one of its subkeys) can be used to create
data signatures.
```

```
@item unsigned int can_certify : 1
This is true if the key (ie one of its subkeys) can be used to create
key certificates.
```

```
@item unsigned int can_authenticate : 1
@since{0.4.5}
```

This is true if the key (ie one of its subkeys) can be used for

authentication.

@item unsigned int is\_qualified : 1  
@since{1.1.0}

This is true if the key can be used for qualified signatures according to local government regulations.

@item unsigned int secret : 1  
This is true if the key is a secret key. Note, that this will always be true even if the corresponding subkey flag may be false (offline/stub keys). This is only set if a listing of secret keys has been requested or if @code{GPGME\_KEYLIST\_MODE\_WITH\_SECRET} is active.

@item unsigned int origin : 5  
@since{1.8.0}

Reserved for the origin of this key.

@item gpgme\_protocol\_t protocol  
This is the protocol supported by this key.

@item char \*issuer\_serial  
If @code{protocol} is @code{GPGME\_PROTOCOL\_CMS}, then this is the issuer serial.

@item char \*issuer\_name  
If @code{protocol} is @code{GPGME\_PROTOCOL\_CMS}, then this is the issuer name.

@item char \*chain\_id  
If @code{protocol} is @code{GPGME\_PROTOCOL\_CMS}, then this is the chain ID, which can be used to build the certificate chain.

@item gpgme\_validity\_t owner\_trust  
If @code{protocol} is @code{GPGME\_PROTOCOL\_OpenPGP}, then this is the owner trust.

@item gpgme\_subkey\_t subkeys  
This is a linked list with the subkeys of the key. The first subkey in the list is the primary key and usually available.

@item gpgme\_user\_id\_t uids  
This is a linked list with the user IDs of the key. The first user ID in the list is the main (or primary) user ID.

@item char \*fpr

@since{1.7.0}

This field gives the fingerprint of the primary key. Note that this is a copy of the fingerprint of the first subkey. For an incomplete key (for example from a verification result) a subkey may be missing but this field may be set nevertheless.

@item unsigned long last\_update

@since{1.8.0}

Reserved for the time of the last update of this key.

@end table

@end deftp

@deftp {Data type} gpgme\_subkey\_t

@since{1.5.0}

The @code{gpgme\_subkey\_t} type is a pointer to a subkey structure. Subkeys are one component of a @code{gpgme\_key\_t} object. In fact, subkeys are those parts that contains the real information about the individual cryptographic keys that belong to the same key object. One @code{gpgme\_key\_t} can contain several subkeys. The first subkey in the linked list is also called the primary key.

The subkey structure has the following members:

@table @code

@item gpgme\_subkey\_t next

This is a pointer to the next subkey structure in the linked list, or @code{NULL} if this is the last element.

@item unsigned int revoked : 1

This is true if the subkey is revoked.

@item unsigned int expired : 1

This is true if the subkey is expired.

@item unsigned int disabled : 1

This is true if the subkey is disabled.

@item unsigned int invalid : 1

This is true if the subkey is invalid.

@item unsigned int can\_encrypt : 1

This is true if the subkey can be used for encryption.

@item unsigned int can\_sign : 1

This is true if the subkey can be used to create data signatures.

@item unsigned int can\_certify : 1

This is true if the subkey can be used to create key certificates.

@item unsigned int can\_authenticate : 1

@since{0.4.5}

This is true if the subkey can be used for authentication.

@item unsigned int is\_qualified : 1

@since{1.1.0}

This is true if the subkey can be used for qualified signatures according to local government regulations.

@item unsigned int is\_de\_vs : 1

@since{1.8.0}

This is true if the subkey complies with the rules for classified information in Germany at the restricted level (VS-NfD). This are currently RSA keys of at least 2048 bits or ECDH/ECDSA keys using a Brainpool curve.

@item unsigned int secret : 1

This is true if the subkey is a secret key. Note that it will be

false if the key is actually a stub key; i.e. a secret key operation is currently not possible (offline-key). This is only set if a listing of secret keys has been requested or if

@code{GPGME\_KEYLIST\_MODE\_WITH\_SECRET} is active.

@item gpgme\_pubkey\_algo\_t pubkey\_algo

This is the public key algorithm supported by this subkey.

@item unsigned int length

This is the length of the subkey (in bits).

@item char \*keyid

This is the key ID of the subkey in hexadecimal digits.

@item char \*fpr

This is the fingerprint of the subkey in hexadecimal digits, if available.

@item char \*keygrip

@since{1.7.0}

The keygrip of the subkey in hex digit form or @code{NULL} if not available.

@item long int timestamp

This is the creation timestamp of the subkey. This is -1 if the timestamp is invalid, and 0 if it is not available.

@item long int expires

This is the expiration timestamp of the subkey, or 0 if the subkey does not expire.

@item unsigned int is\_cardkey : 1

@since{1.2.0}

True if

the secret key is stored on a smart card.

@item char \*card\_number

@since{1.2.0}

The serial number of a smart card holding this key or @code{NULL}.

@item char \*curve

For ECC algorithms the name of the curve.

@end table

@end deftp

@deftp {Data type} gpgme\_user\_id\_t

A user ID is a component of a @code{gpgme\_key\_t} object. One key can have many user IDs. The first one in the list is the main (or primary) user ID.

The user ID structure has the following members.

@table @code

@item gpgme\_user\_id\_t next

This is a pointer to the next user ID structure in the linked list, or @code{NULL} if this is the last element.

@item unsigned int revoked : 1

This is true if the user ID is revoked.

@item unsigned int invalid : 1

This is true if the user ID is invalid.

@item gpgme\_validity\_t validity

This specifies the validity of the user ID.

@item char \*uid

This is the user ID string.

@item char \*name

This is the name component of @code{uid}, if available.

@item char \*comment

This is the comment component of @code{uid}, if available.

@item char \*email

This is the email component of @code{uid}, if available.

@item char \*address;

The mail address (addr-spec from RFC-5322) of the user ID string. This is general the same as the @code{email} part of this structure but might be slightly different. If no mail address is available @code{NULL} is stored.

@item gpgme\_tofu\_info\_t tofu

@since{1.7.0}

If not @code{NULL} information from the TOFU database pertaining to this user id.

@item gpgme\_key\_sig\_t signatures

This is a linked list with the signatures on this user ID.

@item unsigned int origin : 5

@since{1.8.0}

Reserved for the origin of this user ID.

@item unsigned long last\_update

@since{1.8.0}

Reserved for the time of the last update of this user ID.

@item char \*uidhash;

A string used by gpg to identify a user ID. This string can be used at certain prompts of @code{gpgme\_op\_edit} to select a user ID. Users must be prepared to see a @code{NULL} value here. The format

of the  
value is not specified and may depend on the GPGME or GnuPG version.

@end table  
@end deftp

@deftp {Data type} gpgme\_tofu\_info\_t

@since{1.7.0}

The @code{gpgme\_tofu\_info\_t} type is a pointer to a tofu info structure. Tofu info structures are one component of a @code{gpgme\_user\_id\_t} object, and provide information from the TOFU database pertaining to the user ID.

The tofu info structure has the following members:

@table @code

@item gpgme\_key\_sig\_t next

This is a pointer to the next tofu info structure in the linked list, or @code{NULL} if this is the last element.

@item unsigned int validity : 3

This is the TOFU validity. It can have the following values:

@table @code

@item 0

The value @code{0} indicates a conflict.

@item 1

The value @code{1} indicates a key without history.

@item 2

The value @code{2} indicates a key with too little history.

@item 3

The value @code{3} indicates a key with enough history for basic trust.

@item 4

The value @code{4} indicates a key  
with a lot of history.

@end table

@item unsigned int policy : 4

This is the TOFU policy, see @code{gpgme\_tofu\_policy\_t}.

@item unsigned short signcount

This is the number of signatures seen for this binding (or @code{USHRT\_MAX} if there are more than that).

@item unsigned short encrcount

This is the number of encryptions done with this binding (or @code{USHRT\_MAX} if there are more than that).

@item unsigned long signfirst

Number of seconds since Epoch when the first signature was seen with this binding.

@item unsigned long signlast

Number of seconds since Epoch when the last signature was seen with this binding.

@item unsigned long encrfirst

Number of seconds since Epoch when the first encryption was done with this binding.

@item unsigned long encrlast

Number of seconds since Epoch when the last encryption was done with this binding.

@item char \*description

A human-readable string summarizing the TOFU data (or NULL).

@end table

@end deftp

@deftp {Data type} gpgme\_key\_sig\_t

The

@code{gpgme\_key\_sig\_t} type is a pointer to a key signature structure. Key signatures are one component of a @code{gpgme\_key\_t} object, and validate user IDs on the key in the OpenPGP protocol.

The signatures on a key are only available if the key was retrieved via a listing operation with the @code{GPGME\_KEYLIST\_MODE\_SIGS} mode enabled, because it can be expensive to retrieve all signatures of a key.

The signature notations on a key signature are only available if the key was retrieved via a listing operation with the @code{GPGME\_KEYLIST\_MODE\_SIG\_NOTATIONS} mode enabled, because it can be expensive to retrieve all signature notations.

The key signature structure has the following members:

@table @code

@item gpgme\_key\_sig\_t next

This is a pointer to the next key signature structure in the linked list, or @code{NULL} if this is the last element.

@item unsigned int revoked : 1

This is true if the key signature is a revocation signature.

@item unsigned int expired : 1

This is true if the key signature is expired.

@item unsigned int invalid : 1

This is true if the key signature is invalid.

@item unsigned int exportable : 1

This is true if the key signature is exportable.

@item gpgme\_pubkey\_algo\_t pubkey\_algo

This is the public key algorithm used to create the signature.

@item char \*keyid

This is the key ID of the key (in hexadecimal digits) used to create the signature.

@item long int timestamp

This is the creation timestamp of the key signature. This is -1 if the timestamp is invalid, and 0 if it is not available.

@item long int expires

This is the expiration timestamp of the key signature, or 0 if the key signature does not expire.

@item gpgme\_error\_t status

This is the status of the signature and has the same meaning as the member of the same name in a @code{gpgme\_signature\_t} object.

@item unsigned int sig\_class

This specifies the signature class of the key signature. The meaning is specific to the crypto engine.

@item char \*uid

This is the main user ID of the key used to create the signature.

@item char \*name

This is the name component of `@code{uid}`, if available.

`@item char *comment`

This is the comment component of `@code{uid}`, if available.

`@item char *email`

This is the email component of `@code{uid}`, if available.

`@item gpgme_sig_notation_t notations`

This is a linked list with the notation data and policy URLs.

`@end table`

`@end deftp`

`@node Listing Keys`

`@subsection Listing Keys`

`@cindex listing keys`

`@cindex key listing`

`@cindex key listing, start`

`@cindex key ring, list`

`@cindex key ring, search`

`@deftypefun gpgme_error_t gpgme_op_keylist_start (@w{gpgme_ctx_t @var{ctx}}, @w{const char *@var{pattern}}, @w{int @var{secret_only}})`

The function `@code{gpgme_op_keylist_start}` initiates a key listing operation inside the context `@var{ctx}`. It sets everything up so that subsequent invocations of `@code{gpgme_op_keylist_next}` return the keys in the list.

If `@var{pattern}` is `@code{NULL}`, all available keys are returned.

Otherwise,

`@var{pattern}` contains an engine specific expression that is used to limit the list to all keys matching the pattern. Note that the total length of the pattern is restricted to an engine-specific maximum (a couple of hundred characters are usually accepted). The pattern should be used to restrict the search to a certain common name or user, not to list many specific keys at once by listing their fingerprints or key IDs.

If `@var{secret_only}` is not `@code{0}`, the list is restricted to secret keys only.

The context will be busy until either all keys are received (and `@code{gpgme_op_keylist_next}` returns `@code{GPG_ERR_EOF}`), or `@code{gpgme_op_keylist_end}` is called to finish the operation.

The function returns the error code `GPG_ERR_INV_VALUE` if `@var{ctx}` is not a valid pointer, and passes through any errors that are reported by the crypto engine support routines.

```
@end deftypefun
```

```
@deftypefun gpgme_error_t gpgme_op_keylist_ext_start (@w{gpgme_ctx_t @var{ctx}}, @w{const char
*@var{pattern}[]}, @w{int @var{secret_only}}, @w{int @var{reserved}})
```

The function `gpgme_op_keylist_ext_start` initiates an extended key listing operation inside the context `@var{ctx}`. It sets everything up so that subsequent invocations of `gpgme_op_keylist_next` return the keys in the list.

If `@var{pattern}` or `@var{*pattern}` is `NULL`, all available keys are returned. Otherwise, `@var{pattern}` is a `NULL` terminated array of strings that are used to limit the list to all keys matching at least one of the patterns verbatim. Note that the total length of all patterns is restricted to an engine-specific maximum (the exact limit also depends on the number of patterns and amount of quoting required, but a couple of hundred characters are usually accepted). Patterns should be used to restrict the search to a certain common name or user, not to list many specific keys at once by listing their fingerprints or key IDs.

If `@var{secret_only}` is not `0`, the list is restricted to secret keys only.

The value of `@var{reserved}` must be `0`.

The context will be busy until either all keys are received (and `gpgme_op_keylist_next` returns `GPG_ERR_EOF`), or `gpgme_op_keylist_end` is called to finish the operation.

The function returns the error code `GPG_ERR_INV_VALUE` if `@var{ctx}` is not a valid pointer, and passes through any errors that are reported by the crypto engine support routines.

```
@end deftypefun
```

```
@deftypefun gpgme_error_t gpgme_op_keylist_from_data_start @
 (@w{gpgme_ctx_t @var{ctx}}, @
 @w{gpgme_data_t @var{data}}, @
 @w{int @var{reserved}})
```

```
@since{1.8.0}
```

The function `gpgme_op_keylist_from_data_start` initiates a key listing operation inside the context `@var{ctx}`. In contrast to the

other key listing operation the keys are read from the supplied `@var{data}` and not from the local key database. The keys are also not imported into the local key database. The function sets everything up so that subsequent invocations of `@code{gpgme_op_keylist_next}` return the keys from `@var{data}`.

The value of `@var{reserved}` must be `@code{0}`.

This function requires at least GnuPG version 2.1.14 and currently works only with OpenPGP keys.

The context will be busy until either all keys are received (and `@code{gpgme_op_keylist_next}` returns `@code{GPG_ERR_EOF}`), or `@code{gpgme_op_keylist_end}` is called to finish the operation. While the context is busy `@var{data}` may not be released.

The function returns the error code `@code{GPG_ERR_INV_VALUE}` if `@var{ctx}` is not a valid pointer, and passes through any errors that are reported by the crypto engine support routines.

@end dectypedefun

```
@deftypedefun gpgme_error_t gpgme_op_keylist_next (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_key_t
*@var{r_key}})
```

The function `@code{gpgme_op_keylist_next}` returns the next key in the list created by a previous `@code{gpgme_op_keylist_start}` operation in the context `@var{ctx}`. The key will have one reference for the user. [@xref{Manipulating Keys}](#).

This is the only way to get at `@code{gpgme_key_t}` objects in `@acronym{GPGME}`.

If the last key in the list has already been returned, `@code{gpgme_op_keylist_next}` returns `@code{GPG_ERR_EOF}`.

The function returns the error code `@code{GPG_ERR_INV_VALUE}` if `@var{ctx}` or `@var{r_key}` is not a valid pointer, and `@code{GPG_ERR_ENOMEM}` if there is not enough memory for the operation.

@end dectypedefun

```
@deftypedefun gpgme_error_t gpgme_op_keylist_end (@w{gpgme_ctx_t @var{ctx}})
```

The function `@code{gpgme_op_keylist_end}` ends a pending key list operation in the context `@var{ctx}`.

After the operation completed successfully, the result of the key

listing operation can be retrieved with

```
@code{gpgme_op_keylist_result}.
```

The function returns the error code @code{GPG\_ERR\_INV\_VALUE} if @var{ctx} is not a valid pointer, and @code{GPG\_ERR\_ENOMEM} if at some time during the operation there was not enough memory available.

```
@end deftypefun
```

The following

example illustrates how all keys containing a certain string (@code{g10code}) can be listed with their key ID and the name and email address of the main user ID:

```
@example
```

```
gpgme_ctx_t ctx;
```

```
gpgme_key_t key;
```

```
gpgme_error_t err = gpgme_new (&ctx);
```

```
if (!err)
```

```
@{
```

```
err = gpgme_op_keylist_start (ctx, "g10code", 0);
```

```
while (!err)
```

```
@{
```

```
err = gpgme_op_keylist_next (ctx, &key);
```

```
if (err)
```

```
break;
```

```
printf ("%s:", key->subkeys->keyid);
```

```
if (key->uids && key->uids->name)
```

```
printf (" %s", key->uids->name);
```

```
if (key->uids && key->uids->email)
```

```
printf (" <%s>", key->uids->email);
```

```
putchar ('\n');
```

```
gpgme_key_release (key);
```

```
@}
```

```
gpgme_release (ctx);
```

```
@}
```

```
if (gpg_err_code (err) != GPG_ERR_EOF)
```

```
@{
```

```
fprintf (stderr, "can not list keys: %s\n", gpgme_strerror (err));
```

```
exit (1);
```

```
@}
```

```
@end example
```

```
@defftp {Data type} {gpgme_keylist_result_t}
```

This is a pointer to a structure used to store the result of a

```
@code{gpgme_op_keylist_*}
```

operation. After successfully ending a key

listing operation, you can retrieve the pointer to the result with

`gpgme_op_keylist_result`. The structure contains the following member:

`@table @code`

`@item unsigned int truncated : 1`

This is true if the crypto backend had to truncate the result, and less than the desired keys could be listed.

`@end table`

`@end deftp`

`@deftypefun gpgme_keylist_result_t gpgme_op_keylist_result (@w{gpgme_ctx_t @var{ctx}})`

The function `gpgme_op_keylist_result` returns a

`gpgme_keylist_result_t` pointer to a structure holding the result of a `gpgme_op_keylist_*` operation. The pointer is only valid if the last operation on the context was a key listing operation, and if this operation finished successfully. The returned pointer is only valid until the next operation is started on the context.

`@end deftypefun`

In a simple program, for which a blocking operation is acceptable, the following function can be used to retrieve a single key.

`@deftypefun gpgme_error_t gpgme_get_key (@w{gpgme_ctx_t @var{ctx}}, @w{const char *@var{fpr}}, @w{gpgme_key_t *@var{r_key}}, @w{int @var{secret}})`

The function `gpgme_get_key` gets the key with the fingerprint (or key ID) `@var{fpr}` from the crypto backend and return it in `@var{r_key}`. If `@var{secret}` is true, get the secret key. The currently active keylist mode is used to retrieve the key. The key will have one reference for the user.

If the key is not found in the keyring, `gpgme_get_key` returns the error code `GPG_ERR_EOF` and `@var{r_key}` will be set to `NULL`.

The function returns the error code `GPG_ERR_INV_VALUE` if `@var{ctx}` or `@var{r_key}` is not a valid pointer or `@var{fpr}` is not a fingerprint or key ID, `GPG_ERR_AMBIGUOUS_NAME` if the key ID was not a unique specifier for a key, and `GPG_ERR_ENOMEM` if at some time during the operation there was not enough memory available.

`@end deftypefun`

`@node Information About Keys`

`@subsection`

Information About Keys

`@cindex key, information about`

@cindex key, attributes  
@cindex attributes, of a key

Please see the beginning of this section for more information about  
@code{gpgme\_key\_t} objects.

@deftp {Data type} gpgme\_validity\_t

The @code{gpgme\_validity\_t} type is used to specify the validity of a user ID in a key. The following validities are defined:

@table @code

@item GPGME\_VALIDITY\_UNKNOWN

The user ID is of unknown validity. The string representation of this validity is `?`.

@item GPGME\_VALIDITY\_UNDEFINED

The validity of the user ID is undefined. The string representation of this validity is `q`.

@item GPGME\_VALIDITY\_NEVER

The user ID is never valid. The string representation of this validity is `n`.

@item GPGME\_VALIDITY\_MARGINAL

The user ID is marginally valid. The string representation of this validity is `m`.

@item GPGME\_VALIDITY\_FULL

The user ID is fully valid. The string representation of this validity is `f`.

@item GPGME\_VALIDITY\_ULTIMATE

The user ID is ultimately valid. The string representation of this validity is `u`.

@end table

@end deftp

@node Manipulating Keys

@subsection Manipulating Keys

@cindex key, manipulation

@deftypefun void gpgme\_key\_ref (@w{gpgme\_key\_t} @var{key})

The function @code{gpgme\_key\_ref} acquires an additional reference for the key @var{key}.

@end deftypefun

```
@deftypefun void gpgme_key_unref (@w{gpgme_key_t @var{key}})
```

The function `gpgme_key_unref` releases a reference for the key `@var{key}`. If this was the last reference, the key will be destroyed and all resources associated to it will be released.

@end deftypefun

@c

@c gpgme\_op\_setexpire

@c

```
@deftypefun gpgme_error_t gpgme_op_setexpire @
```

```
(@w{gpgme_ctx_t @var{ctx}}, @
 @w{gpgme_key_t @var{key}}, @
 @w{unsigned long @var{expires}}, @
 @w{const char *@var{subfprs}}, @
 @w{unsigned int @var{reserved}});
```

@since{1.14.1}

The function `gpgme_op_setexpire` sets the expiration time of the

key `@var{key}` or of the specified subkeys.

This function requires at least version 2.1.22 of GnuPG.

`@var{key}` specifies the key to operate on.

`@var{expires}` specifies the expiration time in seconds from now.

To be similar to other usages where expiration times are provided in unsigned long this is similar to the key creation date and so it is in seconds from NOW.

The common case is to use 0 to not set an expiration time.

Note that this parameter takes an unsigned long value and not a `time_t` to avoid problems on systems which use a signed 32 bit `time_t`. Note further that the OpenPGP protocol uses 32 bit values for timestamps and thus can only encode dates up to the year 2106.

`@var{subfprs}` selects the subkey(s) for which the expiration time should be set. If `@var{subfprs}` is set to `NULL`, then the expiration time of the primary key is set. If `@var{subfprs}` is an asterisk (`*`), then the expiration times of all non-revoked and not yet expired subkeys are set.

To select more than one subkey put all subkey fingerprints into one string separated by linefeed characters (`\n`).

@var{reserved} is reserved for later use and must be @code{0}.

@end deftypefun

```
@deftypefun gpgme_error_t gpgme_op_setexpire_start @

@end deftypefun

@node Generating Keys

@subsection Generating Keys

@cindex key, creation

@cindex key ring, add

GPGME provides a set of functions to create public key pairs. Most of these functions require the use of GnuPG 2.1 and later; for older GnuPG versions the @code{gpgme\_op\_genkey} function can be used. Existing code which wants to update to the new functions or new code

which shall supports older GnuPG versions may try the new functions first and provide a fallback to the old function if the error code `GPG_ERR_NOT_SUPPORTED` is received.

```
@c
@c gpgme_op_createkey
@c
@deftypefun gpgme_error_t gpgme_op_createkey @
 (@w{gpgme_ctx_t @var{ctx}}, @
 @w{const char *@var{userid}}, @
 @w{const char *@var{algo}}, @
 @w{unsigned long @var{reserved}}, @
 @w{unsigned long @var{expires}}, @
 @w{gpgme_key_t @var{extrakey}},
 @
 @w{unsigned int @var{flags}});

@since{1.7.0}
```

The function `gpgme_op_createkey` generates a new key for the protocol active in the context `@var{ctx}`. As of now this function does only work for OpenPGP and requires at least version 2.1.13 of GnuPG.

`@var{userid}` is commonly the mail address associated with the key. GPGME does not require a specific syntax but if more than a mail address is given, RFC-822 style format is suggested. The value is expected to be in UTF-8 encoding (i.e. no IDN encoding for mail addresses). This is a required parameter.

`@var{algo}` specifies the algorithm for the new key (actually a keypair of public and private key). For a list of supported algorithms, see the GnuPG manual. If `@var{algo}` is `NULL` or the string "default", the key is generated using the default algorithm of the engine. If the string "future-default" is used the engine may use an algorithm which is planned to be the default in a future release of the engine;

however existing implementation of the protocol may not be able to already handle such future algorithms. For the OpenPGP protocol, the specification of a default algorithm, without requesting a non-default usage via `@var{flags}`, triggers the creation of a primary key plus a secondary key (subkey).

`@var{reserved}` must be set to zero.

`@var{expires}` specifies the expiration time in seconds. If you supply 0, a reasonable expiration time is chosen. Use the flag `GPGME_CREATE_NOEXPIRE` to create keys that do not expire. Note

that this parameter takes an unsigned long value and not a `{time_t}` to avoid problems on systems which use a signed 32 bit `{time_t}`. Note further that the OpenPGP protocol uses 32 bit values for timestamps and thus can only encode dates up to the year 2106.

`{extrakey}` is currently not used and must be set to `{NULL}`. A future version of GPGME may use this parameter to create X.509 keys.

`{flags}` can be set to the bit-wise OR of the following flags:

```
@table @code
@item GPGME_CREATE_SIGN
@itemx GPGME_CREATE_ENCR
@itemx GPGME_CREATE_CERT
@itemx GPGME_CREATE_AUTH
@since{1.7.0}
```

Do not create the key with the default capabilities (key usage) of the requested algorithm but use those explicitly given by these flags: ```signing```, ```encryption```, ```certification```, or ```authentication```. The allowed combinations depend on the algorithm.

If any of these flags are set and a default algorithm has been selected only one key is created in the case of the OpenPGP protocol.

```
@item GPGME_CREATE_NOPASSWD
@since{1.7.0}
```

Request generation of the key without password protection.

```
@item GPGME_CREATE_SELFSIGNED
@since{1.7.0}
```

For an X.509 key do not create a CSR but a self-signed certificate. This has not yet been implemented.

```
@item GPGME_CREATE_NOSTORE
@since{1.7.0}
```

Do not store the created key in the local key database. This has not yet been implemented.

```
@item GPGME_CREATE_WANTPUB
@itemx GPGME_CREATE_WANTSEC
@since{1.7.0}
```

## Return

the public or secret key as part of the result structure.  
This has not yet been implemented.

```
@item GPGME_CREATE_FORCE
@since{1.7.0}
```

The engine does not allow the creation of a key with a user ID already existing in the local key database. This flag can be used to override this check.

```
@item GPGME_CREATE_NOEXPIRE
@since{1.9.0}
```

Request generation of keys that do not expire.

```
@end table
```

After the operation completed successfully, information about the created key can be retrieved with `gpgme_op_genkey_result`.

The function returns zero on success, `GPG_ERR_NOT_SUPPORTED` if the engine does not support the command, or a bunch of other error codes.

```
@end deftypefun
```

```
@deftypefun gpgme_error_t gpgme_op_createkey_start @

 @w{const char *@var{algo}}, @
 @w{unsigned long @var{reserved}}, @
 @w{unsigned long @var{expires}}, @
 @w{unsigned int @var{flags}});

```

@since{1.7.0}

The function `gpgme_op_createsubkey` creates and adds a new subkey to the primary OpenPGP key given by `KEY`. The only allowed protocol in `ctx` is `GPGME_PROTOCOL_OPENPGP`. Subkeys (aka secondary keys) are a concept in the OpenPGP protocol to bind several keys to a primary key. As of now this function requires at least version 2.1.13 of GnuPG.

`key` specifies the key to operate on.

`algo` specifies the algorithm for the new subkey. For a list of supported algorithms, see the GnuPG manual. If `algo` is `NULL` or the string "default", the subkey is generated using the default algorithm for an encryption subkey of the engine. If the string "future-default" is used the engine may use an encryption algorithm which is planned to be the default in a future release of the engine; however existing implementation of the protocol may not be able to already handle such future algorithms.

`reserved` must be set to zero.

`expires` specifies the expiration time in seconds. If you supply 0, a reasonable expiration time is chosen. Use the flag `GPGME_CREATE_NOEXPIRE` to create keys that do not expire. Note that this parameter takes an unsigned long value and not a `time_t` to avoid problems on systems which use a signed 32 bit `time_t`. Note further that the OpenPGP protocol uses 32 bit values for timestamps and thus can only encode dates up to the year 2106.

`flags` takes the same values as described above for `gpgme_op_createkey`.

After the operation completed successfully, information about the

created key can be retrieved with `gpgme_op_genkey_result`.

The function returns zero on success, `GPG_ERR_NOT_SUPPORTED` if the engine does not support the command, or a bunch of other error codes.

`@end deftypefun`

```
@deftypefun gpgme_error_t gpgme_op_createsubkey_start @
 (@w{gpgme_ctx_t @var{ctx}}, @

 @w{unsigned long @var{expires}}, @
 @w{unsigned int @var{flags}});
```

`@since{1.7.0}`

The function `gpgme_op_createsubkey_start` initiates a `gpgme_op_createsubkey` operation; see there for details. It must be completed by calling `gpgme_wait` on the context. [@xref{Waiting For Completion}](#).

`@end deftypefun`

`@c`

`@c gpgme_op_adduid`

`@c`

```
@deftypefun gpgme_error_t
gpgme_op_adduid @
 (@w{gpgme_ctx_t @var{ctx}}, @
 @w{gpgme_key_t @var{key}}, @
 @w{const char *@var{userid}}, @
 @w{unsigned int @var{flags}});
```

`@since{1.7.0}`

The function `gpgme_op_adduid` adds a new user ID to the OpenPGP key given by `KEY`. Adding additional user IDs after key creation is a feature of the OpenPGP protocol and thus the protocol for the context `ctx` must be set to OpenPGP. As of now this function requires at least version 2.1.13 of GnuPG.

`key` specifies the key to operate on.

`userid` is the user ID to add to the key. A user ID is commonly

the mail address to be associated with the key. GPGME does not require a specific syntax but if more than a mail address is given, RFC-822 style format is suggested. The value is expected to be in UTF-8 encoding (i.e. no IDN encoding for mail addresses). This is a required parameter.

@var{flags} are currently not used and must be set to zero.

The function returns zero on success, @code{GPG\_ERR\_NOT\_SUPPORTED} if the engine does not support the command, or a bunch of other error codes.

@end deftypefun

```
@deftypefun gpgme_error_t gpgme_op_adduid_start @
 (@w{gpgme_ctx_t @var{ctx}}, @

@c gpgme\_op\_revuid

@c

```
@deftypefun gpgme_error_t gpgme_op_revuid @
 (@w{gpgme_ctx_t @var{ctx}}, @
 @w{gpgme_key_t @var{key}}, @
 @w{const char *@var{userid}}, @
 @w{unsigned int @var{flags}});
```

@since{1.7.0}

The function @code{gpgme\_op\_revuid} revokes a user ID from the OpenPGP key given by @var{KEY}. Revoking user IDs after key creation is a feature of the OpenPGP protocol and thus the protocol for the context

@var{ctx} must be set to OpenPGP. As of now this function requires at least version 2.1.13 of GnuPG.

@var{key} specifies the key to operate on.

@var{userid} is the user ID to be revoked from the key. The user ID must be given verbatim because the engine does an exact and case sensitive match. Thus the @code{uid} field from the user ID object (@code{gpgme\_user\_id\_t}) is to be used. This is a required parameter.

@var{flags} are currently not used and must be set to zero.

Note that the engine won't allow to revoke the last valid user ID. To change a user ID is better to first add the new user ID, then revoke the old one, and finally publish the key.

The function returns zero on success, @code{GPG\_ERR\_NOT\_SUPPORTED} if the engine does not support the command, or a bunch of other error codes.

@end deftypefun

 @w{const char *@var{userid}}, @
 @w{const char * @var{name}}, @
 @w{const char * @var{value}});
```

@since{1.8.0}

The function `gpgme_op_set_uid_flag` is used to set flags on a user ID from the OpenPGP key given by `KEY`. Setting flags on user IDs after key creation is a feature of the OpenPGP protocol and thus the protocol for the context `ctx` must be set to OpenPGP.

`key` specifies the key to operate on. This parameter is required.

`userid` is the user ID of the key to be manipulated. This user ID must be given verbatim because the engine does an exact and case sensitive match. Thus the `uid` field from the user ID object (`gpgme_user_id_t`) is to be used. This is a required parameter.

`name` names the flag which is to be changed. The only currently supported flag is:

```
@table @code
```

```
@item primary
```

This sets the primary key flag on the given user ID. All other primary key flag on other user IDs are removed. `value` must be given as NULL. For technical reasons this function bumps the creation timestamp of all affected self-signatures up by one second. At least GnuPG version 2.1.20 is required.

```
@end table
```

The function returns zero on success, `GPG_ERR_NOT_SUPPORTED` if the engine does not support the command, or a bunch of other error codes.

```
@end deftypefun
```

```
@deftypefun gpgme_error_t gpgme_op_set_uid_flag_start @
 (@w{gpgme_ctx_t @var{ctx}}, @
 @w{gpgme_key_t @var{key}}, @
 @w{const char *@var{userid}}, @
 @w{const char * @var{name}}),
 @
 @w{const char * @var{value}});
```

```
@since{1.8.0}
```

The function `gpgme_op_set_uid_flag_start` initiates a `gpgme_op_set_uid_flag` operation; see there for details. It must be completed by calling `gpgme_wait` on the context. [Waiting For Completion](#).

```
@end deftypefun
```

```
@c
```

```
@c gpgme_op_genkey
```

```
@c
```

```
@deftypefun gpgme_error_t gpgme_op_genkey @
```

```
 (@w{gpgme_ctx_t @var{ctx}}, @
```

```
 @w{const char *@var{parms}}, @
```

```
 @w{gpgme_data_t @var{public}}, @
```

```
 @w{gpgme_data_t @var{secret}})
```

The function `gpgme_op_genkey` generates a new key pair in the context `ctx`. The meaning of `public` and `secret` depends on the crypto backend.

GPG does not support `public` and `secret`, they should be `NULL`. GnuPG will generate a key pair and add it to the standard key ring. The fingerprint of the generated key is available with `gpgme_op_genkey_result`.

GpgSM requires `public` to be a writable data object. GpgSM will generate

a secret key (which will be stored by `gpg-agent`), and return a certificate request in `public`, which then needs to be signed by the certification authority and imported before it can be used. GpgSM does not make the fingerprint available.

The argument `parms` specifies parameters for the key in an string that looks something like XML. The details about the format of `parms` are specific to the crypto engine used by `ctx`. The first line of the parameters must be `<GnupgKeyParams format="internal">` and the last line must be `</GnupgKeyParams>`. Every line in between the first and last lines is treated as a Header: Value pair. In particular, no XML escaping is necessary if you need to include the characters `<`, `>`, or `&`.

Here is an example for GnuPG as the crypto engine (all parameters of OpenPGP key generation are documented in the GPG manual):

```
@example
```

```
<GnupgKeyParams format="internal">
```

```
Key-Type: default
```

```
Subkey-Type: default
```

```
Name-Real:
```

```
Joe Tester
```

```
Name-Comment: with stupid passphrase
```

```
Name-Email: joe@@foo.bar
```

```
Expire-Date: 0
Passphrase: abc
</GnupgKeyParms>
@end example
```

Here is an example for GpgSM as the crypto engine (all parameters of OpenPGP key generation are documented in the GPGSM manual):

```
@example
<GnupgKeyParms format="internal">
Key-Type: RSA
Key-Length: 1024
Name-DN: C=de,O=g10 code,OU=Testlab,CN=Joe 2 Tester
Name-Email: joe@@foo.bar
</GnupgKeyParms>
@end example
```

Strings should be given in UTF-8 encoding. The only format supported for now is `internal`. The content of the `GnupgKeyParms` container is passed verbatim to the crypto backend. Control statements are not allowed.

After the operation completed successfully, the result can be retrieved with `gpgme_op_genkey_result`.

The function returns the error code `GPG_ERR_NO_ERROR` if the operation could be started successfully, `GPG_ERR_INV_VALUE` if `parms` is not a well-formed string (e.g. does not have the expected tag-like headers and footers), `GPG_ERR_NOT_SUPPORTED` if `public` or `secret` is not valid, and `GPG_ERR_GENERAL` if no key was created by the backend.

```
@end deftypefun
```

```
@deftypefun gpgme_error_t gpgme_op_genkey_start (@w{gpgme_ctx_t @var{ctx}}, @w{const char
*@var{parms}}, @w{gpgme_data_t @var{public}}, @w{gpgme_data_t @var{secret}})
```

The function `gpgme_op_genkey_start` initiates a `gpgme_op_genkey` operation. It can be completed by calling `gpgme_wait` on the context. [@xref{Waiting For Completion}](#).

The function returns the error code `GPG_ERR_NO_ERROR` if the operation could be started successfully, `GPG_ERR_INV_VALUE` if `parms` is not a valid XML string, and `GPG_ERR_NOT_SUPPORTED` if `public` or `secret` is not `NULL`.

```
@end deftypefun
```

```
@c
@c gpgme_op_genkey_result
@c
@deftp {Data type} {gpgme_genkey_result_t}
```

This is a pointer to a structure used to store the result of a `gpgme_op_genkey` operation. After successfully generating a key, you can retrieve the pointer to the result with `gpgme_op_genkey_result`. The structure contains the following members:

```
@table @code
@item unsigned int primary : 1
This flag is set to 1 if a primary key was created and to 0 if not.
```

```
@item unsigned int sub : 1
This flag is set to 1 if a subkey was created and to 0 if not.
```

```
@item unsigned int uid : 1
This flag is set to 1 if a user ID was created and to 0 if not.
```

```
@item char *fpr
This is the fingerprint of the key that was created. If both a primary and a subkey were generated, the fingerprint of the primary key will be returned. If the crypto engine does not provide the fingerprint, fpr will be a null pointer.
```

```
@item gpgme_data_t pubkey
@since{1.7.0}
```

This will eventually be used to return the public key. It is currently not used.

```
@item gpgme_data_t seckey
@since{1.7.0}
```

This will eventually be used to return the secret key. It is currently not used.

```
@end table
@end deftp
```

```
@deftypedefun
gpgme_genkey_result_t gpgme_op_genkey_result (@w{gpgme_ctx_t @var{ctx}})
```

The function `gpgme_op_genkey_result` returns a `gpgme_genkey_result_t` pointer to a structure holding the result of a `gpgme_op_genkey` operation. The pointer is only valid if the last operation on the context was a `gpgme_op_genkey` or `gpgme_op_genkey_start` operation, and if this operation finished successfully. The returned pointer is only valid until the next operation is started on the context.

`@end deftypefun`

`@c`

`@c SIGNING KEYS`

`@c`

`@node Signing Keys`

`@subsection Signing Keys`

`@cindex key, signing`

Key signatures are a unique concept of the OpenPGP protocol. They can be used to certify the validity of a key and are used to create the Web-of-Trust (WoT). Instead of using the `gpgme_op_interact` function along with a finite state machine, GPGME provides a convenient function to create key signatures when using modern GnuPG versions.

`@c`

`@c gpgme_op_keysign`

`@c`

`@deftypefun`

```
gpgme_error_t gpgme_op_keysign (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_key_t @var{key}}, @w{const char *@var{userid}}, @w{unsigned long @var{expires}}, @w{unsigned int @var{flags}});
```

`@since{1.7.0}`

The function `gpgme_op_keysign` adds a new key signature to the public key `KEY`. This function requires at least version 2.1.12 of GnuPG.

`CTX` is the usual context which describes the protocol to use (which must be OpenPGP) and has also the list of signer keys to be used for the signature. The common case is to use the default key for signing other keys. If another key or more than one key shall be used for a key signature, `gpgme_signers_add` can be used.

@xref{Selecting Signers}.

@var{key} specifies the key to operate on.

@var{userid} selects the user ID or user IDs to be signed. If @var{userid} is set to @code{NULL} all valid user IDs are signed. The user ID must be given verbatim because the engine does an exact and case sensitive match. Thus the @code{uid} field from the user ID object (@code{gpgme\_user\_id\_t}) is to be used. To select more than one user ID put them all into one string separated by linefeed characters (@code{\n}) and set the flag @code{GPGME\_KEYSIGN\_LFSEP}.

@var{expires} specifies the expiration time of the new signature in seconds. The common case is to use 0 to not set an expiration date. However, if the configuration of the engine defines a default expiration for key signatures, that is still used unless the flag @code{GPGME\_KEYSIGN\_NOEXPIRE} is used. Note that this parameter takes an unsigned long value and not a @code{time\_t} to avoid problems on systems which use a signed 32 bit @code{time\_t}. Note further that the OpenPGP protocol uses 32 bit values for timestamps and thus can only encode dates up to the year 2106.

@var{flags} can be set to the bit-wise OR of the following flags:

```
@table @code
@item GPGME_KEYSIGN_LOCAL
@since{1.7.0}
```

Instead of creating an exportable key signature, create a key signature which is marked as non-exportable.

```
@item GPGME_KEYSIGN_LFSEP
@since{1.7.0}
```

Although linefeeds are uncommon in user IDs this flag is required to explicitly declare that @var{userid} may contain several linefeed separated user IDs.

```
@item GPGME_KEYSIGN_NOEXPIRE
```

Force the creation of a key signature without an expiration date. This overrides @var{expire} and any local configuration of the engine.

```
@end table
```

The function returns zero on success, @code{GPG\_ERR\_NOT\_SUPPORTED} if the engine does not support the command, or a bunch of other error

codes.

@end deftypefun

```
@deftypefun gpgme_error_t gpgme_op_keysign_start @
 (@w{gpgme_ctx_t @var{ctx}}, @

 @w{gpgme_key_t @var{signing_key}}, @
 @w{const char *@var{userid}}, @
 @w{unsigned int @var{flags}});
```

@since{1.14.1}

The function @code{gpgme\_op\_revsign} revokes key signatures of the public key @var{key} made with the key @var{signing\_key}. This function requires at least version 2.2.24 of GnuPG.

@var{key} specifies the key to operate on.

@var{signing\_key} specifies the key whose signatures shall be revoked.

@var{userid} selects the user ID or user IDs whose signatures shall be revoked. If @var{userid} is set to @code{NULL} the signatures on all user IDs are revoked. The user ID must be given verbatim because the engine does an exact and case sensitive match. Thus the @code{uid} field from the user ID object

(`gpgme_user_id_t`) is to be used. To select more than one user ID put them all into one string separated by linefeeds characters (`\n`) and set the flag `GPGME_REVSIG_LFSEP`.

`flags` can be set to the bit-wise OR of the following flags:

```
@table @code
@item GPGME_REVSIG_LFSEP
@since{1.14.1}
```

Although linefeeds are uncommon in user IDs this flag is required to explicitly declare that `userid` may contain several linefeed separated user IDs.

```
@end table
```

The function returns zero on success, `GPG_ERR_NOT_SUPPORTED` if the engine does not support the command, or a bunch of other error codes.

The function `gpgme_op_revsig_start` initiates a `gpgme_op_revsig` operation; see there for details. It must be completed by calling `gpgme_wait` on the context. [Waiting For Completion](#).

```
@end dectypedefun
```

```
@c
@c EXPORTING KEYS
@c
@node Exporting Keys
@subsection Exporting Keys
@cindex key, export
```

@cindex key ring, export from

Exporting keys means the same as running @command{gpg} with the command @option{--export}. However, a mode flag can be used to change the way the export works. The available mode flags are described below, they may be or-ed together.

@table @code

@item GPGME\_EXPORT\_MODE\_EXTERN

If this bit is set, the output is send directly to the default keyserver. This is currently only allowed for OpenPGP keys. It is good practise to not send more than a few dozens key to a keyserver at one time. Using this flag requires that the @var{keydata} argument of the export function is set to @code{NULL}.

@item GPGME\_EXPORT\_MODE\_MINIMAL

@since{1.3.1}

If this bit is set, the smallest possible key is exported. For OpenPGP keys it removes all signatures except for the latest self-signatures. For X.509 keys it has no effect.

@item GPGME\_EXPORT\_MODE\_SSH

@since{1.4.0}

If this bit is set, the latest authentication key of the requested OpenPGP key is exported in the OpenSSH public key format. This accepts just a single key; to force the export of a specific subkey a fingerprint pattern with an appended exclamation mark may be used.

@item GPGME\_EXPORT\_MODE\_SECRET

@since{1.6.0}

Instead of exporting the public key, the secret key is exported. This may not be combined with @code{GPGME\_EXPORT\_MODE\_EXTERN}. For X.509 the export format is PKCS#8.

@item GPGME\_EXPORT\_MODE\_RAW

@since{1.6.0}

If this flag is used with @code{GPGME\_EXPORT\_MODE\_SECRET} for an X.509 key the export format will be changed to PKCS#1. This flag may not be used with OpenPGP.

@item GPGME\_EXPORT\_MODE\_PKCS12

@since{1.6.0}

If this flag is used with @code{GPGME\_EXPORT\_MODE\_SECRET} for an X.509 key the export format will be changed to PKCS#12 which also includes the certificate. This flag may not be used with OpenPGP.

@item GPGME\_EXPORT\_MODE\_NOUID

@since{1.12.0 - experimental}

Do not export user ids. Works only with certain gpg version.

@end table

@deftypefun gpgme\_error\_t gpgme\_op\_export (@w{gpgme\_ctx\_t @var{ctx}}, @w{const char \*@var{pattern}}, @w{gpgme\_export\_mode\_t @var{mode}}, @w{gpgme\_data\_t @var{keydata}})

The function @code{gpgme\_op\_export} extracts public keys and returns them in the data buffer @var{keydata}. The output format of the key data returned is determined by the @acronym{ASCII} armor attribute set for the context @var{ctx}, or, if that is not set, by the encoding specified for @var{keydata}.

If @var{pattern} is @code{NULL}, all available keys are returned. Otherwise, @var{pattern} contains an engine specific expression that is used to limit the list to all keys matching the pattern.

@var{mode} is usually 0; other values are described above.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the operation completed successfully, @code{GPG\_ERR\_INV\_VALUE} if @var{keydata} is not a valid empty data buffer, and passes through any errors that are reported by the crypto engine support routines.  
@end deftypefun

@deftypefun gpgme\_error\_t gpgme\_op\_export\_start (@w{gpgme\_ctx\_t @var{ctx}}, @w{const char \*@var{pattern}}, @w{gpgme\_export\_mode\_t @var{mode}}, @w{gpgme\_data\_t @var{keydata}})

The function @code{gpgme\_op\_export\_start} initiates a @code{gpgme\_op\_export} operation. It can be completed by calling @code{gpgme\_wait} on the context. @xref{Waiting For Completion}.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the operation could be started successfully, and @code{GPG\_ERR\_INV\_VALUE} if @var{keydata} is not a valid empty data buffer.  
@end deftypefun

@deftypefun gpgme\_error\_t gpgme\_op\_export\_ext (@w{gpgme\_ctx\_t @var{ctx}}, @w{const char

```
*@var{pattern}[], @w{gpgme_export_mode_t @var{mode}}, @w{gpgme_data_t @var{keydata}})
```

The function `gpgme_op_export` extracts public keys and returns them in the data buffer `@var{keydata}`. The output format of the key data returned is determined by the `armor` attribute set for the context `@var{ctx}`, or, if that is not set, by the encoding specified for `@var{keydata}`.

If `@var{pattern}` or `@var{*pattern}` is `NULL`, all available keys are returned. Otherwise, `@var{pattern}` is a `NULL` terminated array of strings that are used to limit the list to all keys matching at least one of the patterns verbatim.

`@var{mode}` is usually 0; other values are described above.

The function returns the error code `GPG_ERR_NO_ERROR` if the operation completed successfully, `GPG_ERR_INV_VALUE` if `@var{keydata}` is not a valid empty data buffer, and passes through any errors that are reported by the crypto engine support routines.

```
@end dectypedefun
```

```
@dectypedefun gpgme_error_t gpgme_op_export_ext_start (@w{gpgme_ctx_t @var{ctx}}, @w{const char
*@var{pattern}[], @w{gpgme_export_mode_t @var{mode}}, @w{gpgme_data_t
@var{keydata}})
```

The function `gpgme_op_export_ext_start` initiates a `gpgme_op_export_ext` operation. It can be completed by calling `gpgme_wait` on the context. [Waiting For Completion](#).

The function returns the error code `GPG_ERR_NO_ERROR` if the operation could be started successfully, and `GPG_ERR_INV_VALUE` if `@var{keydata}` is not a valid empty data buffer.

```
@end dectypedefun
```

```
@dectypedefun gpgme_error_t gpgme_op_export_keys (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_key_t keys[]},
@w{gpgme_export_mode_t @var{mode}}, @w{gpgme_data_t @var{keydata}})
@since{1.2.0}
```

The function `gpgme_op_export_keys` extracts public keys and returns them in the data buffer `@var{keydata}`. The output format of the key data returned is determined by the `armor` attribute set for the context `@var{ctx}`, or, if that is not set, by the encoding specified for `@var{keydata}`.

The keys to export are taken from the `NULL` terminated array `@var{keys}`. Only keys of the currently selected protocol of `@var{ctx}` which do have a fingerprint set are considered for export.

Other keys specified by the `@var{keys}` are ignored. In particular OpenPGP keys retrieved via an external key listing are not included.

`@var{mode}` is usually 0; other values are described above.

The function returns the error code `@code{GPG_ERR_NO_ERROR}` if the operation completed successfully, `@code{GPG_ERR_INV_VALUE}` if `@var{keydata}` is not a valid empty data buffer, `@code{GPG_ERR_NO_DATA}` if no useful keys are in `@var{keys}` and passes through any errors that are reported by the crypto engine support routines.

`@end deftypefun`

```
@deftypefun gpgme_error_t gpgme_op_export_keys_start (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_key_t @var{keys}}[], @w{gpgme_export_mode_t @var{mode}}, @w{gpgme_data_t @var{keydata}})
@since{1.2.0}
```

The function `@code{gpgme_op_export_keys_start}` initiates a `@code{gpgme_op_export_ext}` operation. It can be completed by calling `@code{gpgme_wait}` on the context. [@xref{Waiting For Completion}](#).

The function returns the error code `@code{GPG_ERR_NO_ERROR}` if the operation could be started successfully, and `@code{GPG_ERR_INV_VALUE}` if `@var{keydata}` is not a valid empty data buffer, `@code{GPG_ERR_NO_DATA}` if no useful keys are in `@var{keys}` and passes through any errors that are reported by the crypto engine support routines.

`@end deftypefun`

## `@node Importing Keys`

### `@subsection Importing Keys`

`@cindex key, import`

`@cindex key ring, import to`

Importing keys means the same as running `@command{gpg}` with the command `@option{--import}`.

```
@deftypefun gpgme_error_t gpgme_op_import (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_data_t @var{keydata}})
```

The function `@code{gpgme_op_import}` adds the keys in the data buffer `@var{keydata}` to the key ring of the crypto engine used by `@var{ctx}`.

The format of `@var{keydata}` can be `@acronym{ASCII}` armored, for example, but the details are specific to the crypto engine.

After the operation completed successfully, the result can be retrieved with `@code{gpgme_op_import_result}`.

The function returns the error code `GPG_ERR_NO_ERROR` if the import was completed successfully, `GPG_ERR_INV_VALUE` if `@var{keydata}` if `@var{ctx}` or `@var{keydata}` is not a valid pointer, and `GPG_ERR_NO_DATA` if `@var{keydata}` is an empty data buffer.

```
@end deftypefun
```

```
@deftypefun gpgme_error_t gpgme_op_import_start (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_data_t @var{keydata}})
```

The function `gpgme_op_import_start` initiates a `gpgme_op_import` operation. It can be completed by calling `gpgme_wait` on the context. [@xref{Waiting For Completion}](#).

The function returns the error code `GPG_ERR_NO_ERROR` if the import could be started successfully, `GPG_ERR_INV_VALUE` if `@var{ctx}` or `@var{keydata}` is not a valid pointer, and `GPG_ERR_NO_DATA` if `@var{keydata}` is an empty data buffer.

```
@end deftypefun
```

```
@deftypefun gpgme_error_t gpgme_op_import_keys (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_key_t *@var{keys}})
@since{1.2.0}
```

The function `gpgme_op_import_keys` adds the keys described by the `NULL` terminated array `@var{keys}` to the key ring of the crypto engine used by `@var{ctx}`. It is used to actually import and make keys permanent which have been retrieved from an external source (i.e. using `GPGME_KEYLIST_MODE_EXTERN`) earlier. The external keylisting must have been made with the same context configuration (in particular the same home directory). [@footnote{Thus it is a replacement for the usual workaround of exporting and then importing a key to make an X.509 key permanent.}](#) Note that for OpenPGP this may require another access to the keyserver over the network.

Only keys of the currently selected protocol of `@var{ctx}` are considered for import. Other keys specified by the `@var{keys}` are ignored. As of now all considered keys must have been retrieved using the same method, i.e. the used key listing mode must be identical.

After the operation completed successfully, the result can be retrieved with `gpgme_op_import_result`.

To move keys from one home directory to another, export and import the keydata using `gpgme_op_export` and `gpgme_op_import`.

The function returns the error code `GPG_ERR_NO_ERROR` if the

import was completed successfully, @code{GPG\_ERR\_INV\_VALUE} if @var{ctx} is not a valid pointer, @code{GPG\_ERR\_CONFLICT} if the key listing mode does not match, and @code{GPG\_ERR\_NO\_DATA} if no keys are considered for export.

@end deftypefun

@deftypefun gpgme\_error\_t gpgme\_op\_import\_keys\_start (@w{gpgme\_ctx\_t @var{ctx}}, @w{gpgme\_key\_t \*@var{keys}})  
@since{1.2.0}

The function @code{gpgme\_op\_import\_keys\_start} initiates a @code{gpgme\_op\_import\_keys} operation. It can be completed by calling @code{gpgme\_wait} on the context. @xref{Waiting For Completion}.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the import was completed successfully, @code{GPG\_ERR\_INV\_VALUE} if @var{keydata} if @var{ctx} or @var{keydata} is not a valid pointer, @code{GPG\_ERR\_CONFLICT} if the key listing mode does not match, and @code{GPG\_ERR\_NO\_DATA} if no keys are considered for export.

@end deftypefun

@deftp {Data type} {gpgme\_import\_status\_t}

This is a pointer to a structure used to store a part of the result of a @code{gpgme\_op\_import} operation. For each considered key one status is added that contains information about the result of the import. The structure contains the following members:

@table @code

@item gpgme\_import\_status\_t next

This is a pointer to the next status structure in the linked list, or @code{NULL} if this is the last element.

@item char \*fpr

This is the fingerprint of the key that was considered.

@item gpgme\_error\_t result

If the import was not successful, this is the error value that caused the import to fail. Otherwise the error code is @code{GPG\_ERR\_NO\_ERROR}.

@item unsigned int status

This is a bit-wise OR of the following flags that give more information about what part of the key was imported. If the key was already known, this might be 0.

@table @code

@item GPGME\_IMPORT\_NEW

The key was new.

@item GPGME\_IMPORT\_UID

The key contained new user IDs.

@item GPGME\_IMPORT\_SIG

The key contained new signatures.

@item GPGME\_IMPORT\_SUBKEY

The key contained new sub keys.

@item GPGME\_IMPORT\_SECRET

The key contained a secret key.

@end table

@end table

@end deftp

@deftp {Data type} {gpgme\_import\_result\_t}

This is a pointer to a structure used to store the result of a

@code{gpgme\_op\_import} operation. After a successful import operation, you can retrieve the pointer to the result with

@code{gpgme\_op\_import\_result}. The structure contains the following members:

@table @code

@item int considered

The total number of considered keys.

@item int no\_user\_id

The number of keys without user ID.

@item int imported

The total number of imported keys.

@item int imported\_rsa

The number of imported RSA keys.

@item int unchanged

The number of unchanged keys.

@item

int new\_user\_ids

The number of new user IDs.

@item int new\_sub\_keys

The number of new sub keys.

@item int new\_signatures

The number of new signatures.

@item int new\_revocations

The number of new revocations.

@item int secret\_read

The total number of secret keys read.

@item int secret\_imported

The number of imported secret keys.

@item int secret\_unchanged

The number of unchanged secret keys.

@item int not\_imported

The number of keys not imported.

@item gpgme\_import\_status\_t imports

A list of `gpgme_import_status_t` objects which contain more information about the keys for which an import was attempted.

@item int skipped\_v3\_keys

For security reasons modern versions of GnuPG do not anymore support v3 keys (created with PGP 2.x) and ignores them on import. This counter provides the number of such skipped v3 keys.

@end table

@end deftp

@deftypefun gpgme\_import\_result\_t gpgme\_op\_import\_result (@w{gpgme\_ctx\_t @var{ctx}})

The function `gpgme_op_import_result` returns a

`gpgme_import_result_t`

pointer to a structure holding the result

of a `gpgme_op_import` operation. The pointer is only valid if

the last operation on the context was a `gpgme_op_import` or

`gpgme_op_import_start` operation, and if this operation finished

successfully. The returned pointer is only valid until the next

operation is started on the context.

@end deftypefun

@node Deleting Keys

@subsection Deleting Keys

@cindex key, delete

@cindex key ring, delete from

@deftypefun gpgme\_error\_t gpgme\_op\_delete\_ext (@w{gpgme\_ctx\_t @var{ctx}}, @w{const gpgme\_key\_t

@var{key}}, @w{unsigned int @var{flags}})

@since{1.9.1}

The function `gpgme_op_delete_ext` deletes the key `key` from the key ring of the crypto engine used by `ctx`.

`flags` can be set to the bit-wise OR of the following flags:

`GPGME_DELETE_ALLOW_SECRET`  
@since{1.9.1}

If not set, only public keys are deleted. If set, secret keys are deleted as well, if that is supported.

`GPGME_DELETE_FORCE`  
@since{1.9.1}

If set, the user is not asked to confirm the deletion.

@end table

The function returns the error code `GPG_ERR_NO_ERROR` if the key was deleted successfully, `GPG_ERR_INV_VALUE` if `ctx` or `key` is not a valid pointer, `GPG_ERR_NO_PUBKEY` if `key` could not be found in the keyring, `GPG_ERR_AMBIGUOUS_NAME` if the key was not specified unambiguously, and `GPG_ERR_CONFLICT` if the secret key for `key` is available, but `allow_secret` is zero.

@end deffun

`gpgme_error_t gpgme_op_delete_ext_start (gpgme_ctx_t ctx, const gpgme_key_t key, unsigned int flags)`  
@since{1.9.1}

The function `gpgme_op_delete_ext_start` initiates a `gpgme_op_delete` operation. It can be completed by calling `gpgme_wait` on the context. @xref{Waiting For Completion}.

The function returns the error code `GPG_ERR_NO_ERROR` if the operation was started successfully, and `GPG_ERR_INV_VALUE` if `ctx` or `key` is not a valid pointer.  
@end deffun

The following functions allow only to use one particular flag.

`gpgme_error_t gpgme_op_delete (gpgme_ctx_t ctx, const gpgme_key_t key, int allow_secret)`

Similar to `gpgme_op_delete_ext`, but only the flag `GPGME_DELETE_ALLOW_SECRET` can be provided.

```
@deftypefun gpgme_error_t gpgme_op_delete_start (@w{gpgme_ctx_t @var{ctx}}, @w{const gpgme_key_t @var{key}}, @w{int @var{allow_secret}})
```

Similar to `gpgme_op_delete_ext_start`, but only the flag `GPGME_DELETE_ALLOW_SECRET` can be provided.

```
@node Changing Passphrases
@subsection Changing Passphrases
@cindex passphrase, change
```

```
@deftypefun gpgme_error_t gpgme_op_passwd (@w{gpgme_ctx_t @var{ctx}}, @w{const gpgme_key_t @var{key}}, @w{unsigned int @var{flags}})
```

```
@since{1.3.0}
```

The function `gpgme_op_passwd` changes the passphrase of the private key associated with `@var{key}`. The only allowed value for `@var{flags}` is `0`. The backend engine will usually popup a window to ask for the old and the new passphrase. Thus this function is not useful in a server application (where passphrases are not required anyway).

Note that old `gpg` engines (before version 2.0.15) do not support this command and will silently ignore it.

```
@end deftypefun
```

```
@deftypefun gpgme_error_t gpgme_op_passwd_start (@w{gpgme_ctx_t @var{ctx}}, @w{const gpgme_key_t @var{key}}, @w{unsigned int @var{flags}})
```

```
@since{1.3.0}
```

The function `gpgme_op_passwd_start` initiates a `gpgme_op_passwd` operation. It can be completed by calling `gpgme_wait` on the context. [@xref{Waiting For Completion}](#).

The function returns `0` if the operation was started successfully, and an error code if one of the arguments is not valid or the

```
operation
could not be started.
@end deftypefun
```

```
@c
@c CHANGING TOFU DATA
@c
@node Changing TOFU Data
@subsection Changing TOFU Data
@cindex validity, TOFU
```

The OpenPGP engine features a Trust-On-First-Use (TOFU) key validation model. For resolving conflicts it is necessary to declare the policy for a key. See the GnuPG manual for details on the TOFU implementation.

```
@deftp {Data type} {enum gpgme_tofu_policy_t}
@since{1.7.0}
```

```
@tindex gpgme_tofu_policy_t
The @code{gpgme_tofu_policy_t} type specifies the set of possible
policy values that are supported by @acronym{GPGME}:
```

```
@table @code
@item GPGME_TOFU_POLICY_AUTO
Set the policy to ``auto".
@item GPGME_TOFU_POLICY_GOOD
Set the policy to ``good".
@item GPGME_TOFU_POLICY_BAD
Set the policy to ``bad".
@item GPGME_TOFU_POLICY_ASK
Set the policy to ``ask".
@item GPGME_TOFU_POLICY_UNKNOWN
Set the policy to ``unknown".
@end table
```

```
@end deftp
```

To change the policy for a key the following functions can be used:

```
@deftypefun gpgme_error_t
gpgme_op_tofu_policy @
 (@w{gpgme_ctx_t @var{ctx}}, @
 @w{const gpgme_key_t @var{key}}, @
 @w{gpgme_tofu_policy_t @var{policy}})
```

```
@since{1.7.0}
```

The function `gpgme_op_tofu_policy` changes the TOFU policy of `key`. The valid values for `policy` are listed above. As of now this function does only work for OpenPGP and requires at least version 2.1.10 of GnuPG.

The function returns zero on success, `GPG_ERR_NOT_SUPPORTED` if the engine does not support the command, or a bunch of other error codes.

`@end deftypefun`

```
@deftypefun gpgme_error_t gpgme_op_tofu_policy_start @
 (@w{gpgme_ctx_t @var{ctx}}, @
 @w{const gpgme_key_t @var{key}}, @
 @w{gpgme_tofu_policy_t @var{policy}})
```

`@since{1.7.0}`

The function `gpgme_op_tofu_policy_start` initiates a `gpgme_op_tofu_policy` operation. It can be completed by calling `gpgme_wait` on the context. [Waiting For Completion](#).

The function returns `0` if the operation was started successfully, and an error code if one of the arguments is not valid or the operation could not be started.

`@end deftypefun`

`@node Advanced Key Editing`

`@subsection Advanced Key Editing`

`@cindex key, edit`

```
@defftp {Data type} {gpgme_error_t (*gpgme_interact_cb_t) @
 (@w{void *@var{handle}}, @
 @w{const char *@var{status}}, @
 @w{const char *@var{args}}, @
 @w{int @var{fd}})}
```

`@since{1.7.0}`

`@tindex gpgme_interact_cb_t`

The `gpgme_interact_cb_t` type is the type of functions which `GPGME` calls if a key interact operation is on-going. The status keyword `status` and the argument line `args` are passed through by `GPGME` from the crypto engine. An empty

string represents EOF. The file descriptor `@var{fd}` is -1 for normal status messages. If `@var{status}` indicates a command rather than a status message, the response to the command should be written to `@var{fd}`. The `@var{handle}` is provided by the user at start of operation.

The function should return `@code{GPG_ERR_FALSE}` if it did not handle the status code, `@code{0}` for success, or any other error value.

`@end deftp`

```
@deftypefun gpgme_error_t gpgme_op_interact (@w{gpgme_ctx_t @var{ctx}}, @
@w{gpgme_key_t @var{key}}, @
@w{unsigned int @var{flags}}, @
@w{gpgme_interact_cb_t @var{fnc}}, @
@w{void *@var{handle}}, @
@w{gpgme_data_t @var{out}})
```

`@since{1.7.0}`

The function `@code{gpgme_op_interact}` processes the key `@var{KEY}` interactively, using the interact callback function `@var{FNC}` with the handle `@var{HANDLE}`. The callback is invoked for every status and command request from the crypto engine. The output of the crypto engine is written to the data object `@var{out}`.

Note that the protocol between the callback function and the crypto engine is specific to the crypto engine and no further support in implementing this protocol correctly is provided by `@acronym{GPGME}`.

`@var{flags}` modifies the behaviour of the function; the only defined bit value is:

```
@table @code
@item GPGME_INTERACT_CARD
@since{1.7.0}
```

This is used for smartcard based keys and uses `gpgs` `@code{--card-edit}` command.

`@end table`

The function returns `@code{0}` if the edit operation completes successfully, `@code{GPG_ERR_INV_VALUE}` if `@var{ctx}` or `@var{key}` is not a valid pointer, and any error returned by the crypto engine or the edit callback handler.

`@end deftypefun`

```

@deftypefun gpgme_error_t gpgme_op_interact_start (@w{gpgme_ctx_t @var{ctx}}, @
@w{gpgme_key_t @var{key}}, @
@w{unsigned int @var{flags}}, @
@w{gpgme_interact_cb_t @var{fnc}}, @
@w{void *@var{handle}}, @
@w{gpgme_data_t @var{out}})

```

```
@since{1.7.0}
```

The function `gpgme_op_interact_start` initiates a `gpgme_op_interact` operation. It can be completed by calling `gpgme_wait` on the context. [Waiting For Completion](#).

The function returns `0` if the operation was started successfully, and `GPG_ERR_INV_VALUE` if `ctx` or `key` is not a valid pointer.

```
@end deftypefun
```

```
@node Crypto Operations
```

```
@section Crypto Operations
```

```
@cindex cryptographic operation
```

Sometimes, the result of a crypto operation returns a list of invalid keys encountered in processing the request. The following structure is used to hold information about such a key.

```
@deftp {Data type} {gpgme_invalid_key_t}
```

This is a pointer to a structure used to store a part of the result of a crypto operation which takes user IDs as one input parameter. The structure contains the following members:

```
@table @code
```

```
@item gpgme_invalid_key_t next
```

This is a pointer to the next invalid key structure in the linked list, or `NULL` if this is the last element.

```
@item char *fpr
```

The fingerprint or key ID of the invalid key encountered.

```
@item gpgme_error_t reason
```

An error code describing the reason why the key was found invalid.

```
@end table
```

```
@end deftp
```

```

@menu

* Encrypt:: Encrypting a plaintext.
@end menu

```

```

@node Decrypt
@subsection Decrypt
@cindex decryption
@cindex cryptographic operation, decryption

```

```

@deftypefun gpgme_error_t gpgme_op_decrypt (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_data_t
@var{cipher}}, @w{gpgme_data_t @var{plain}})

```

The function `gpgme_op_decrypt` decrypts the ciphertext in the data object `@var{cipher}` and stores it into the data object `@var{plain}`.

The function returns the error code `GPG_ERR_NO_ERROR` if the ciphertext could be decrypted successfully, `GPG_ERR_INV_VALUE` if `@var{ctx}`, `@var{cipher}` or `@var{plain}` is not a valid pointer, `GPG_ERR_NO_DATA` if `@var{cipher}` does not contain any data to decrypt, `GPG_ERR_DECRYPT_FAILED` if `@var{cipher}` is not a valid cipher text, `GPG_ERR_BAD_PASSPHRASE` if the passphrase for the secret key could not be retrieved, and passes through some errors that are reported by the crypto engine support routines.

```

@end deftypefun

```

```

@deftypefun gpgme_error_t gpgme_op_decrypt_start (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_data_t
@var{cipher}}, @w{gpgme_data_t @var{plain}})

```

The function `gpgme_op_decrypt_start` initiates a `gpgme_op_decrypt` operation. It can be completed by calling `gpgme_wait` on the context. [@xref{Waiting For Completion}](#).

The function returns the error code `GPG_ERR_NO_ERROR` if the operation could be started successfully, and `GPG_ERR_INV_VALUE` if `@var{cipher}` or `@var{plain}` is not a valid pointer.

```

@end deftypefun

```

```

@deftypefun gpgme_error_t gpgme_op_decrypt_ext (@
 @w{gpgme_ctx_t @var{ctx}}, @
 @w{gpgme_decrypt_flags_t @var{flags}}, @

```

```
@w{gpgme_data_t @var{cipher}}, @
@w{gpgme_data_t @var{plain}})
```

@since{1.8.0}

The function @code{gpgme\_op\_decrypt\_ext} is the same as  
@code{gpgme\_op\_decrypt}  
but has an additional argument  
@var{flags}. If @var{flags} is 0 both function behave identically.

The value in @var{flags} is a bitwise-or combination of one or  
multiple of the following bit values:

```
@table @code
@item GPGME_DECRYPT_VERIFY
@since{1.8.0}
```

The @code{GPGME\_DECRYPT\_VERIFY} symbol specifies that this function  
shall exactly act as @code{gpgme\_op\_decrypt\_verify}.

```
@item GPGME_DECRYPT_UNWRAP
@since{1.8.0}
```

The @code{GPGME\_DECRYPT\_UNWRAP} symbol specifies that the output shall  
be an OpenPGP message with only the encryption layer removed. This  
requires GnuPG 2.1.12 and works only for OpenPGP. This is the  
counterpart to @code{GPGME\_ENCRYPT\_WRAP}.

@end table

The function returns the error codes as described for  
@code{gpgme\_op\_decrypt}.  
@end deftypefun

```
@deftypefun gpgme_error_t gpgme_op_decrypt_ext_start (@
 @w{gpgme_ctx_t @var{ctx}}, @
 @w{gpgme_decrypt_flags_t @var{flags}}, @
 @w{gpgme_data_t @var{cipher}}, @

 @w{gpgme_data_t @var{plain}})
```

@since{1.8.0}

The function @code{gpgme\_op\_decrypt\_ext\_start} initiates a  
@code{gpgme\_op\_decrypt\_ext} operation. It can be completed by calling  
@code{gpgme\_wait} on the context. @xref{Waiting For Completion}.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the

operation could be started successfully, and `GPG_ERR_INV_VALUE` if `cipher` or `plain` is not a valid pointer.

`@end deftypefun`

`@deftp {Data type} {gpgme_recipient_t}`

`@since{1.1.0}`

This is a pointer to a structure used to store information about the recipient of an encrypted text which is decrypted in a `gpgme_op_decrypt` operation. This information (except for the status field) is even available before the operation finished successfully, for example in a passphrase callback. The structure contains the following members:

`@table @code`

`@item gpgme_recipient_t next`

This is a pointer to the next recipient structure in the linked list, or `NULL` if this is the last element.

`@item gpgme_pubkey_algo_t`

The public key algorithm used in the encryption.

`@item char *keyid`

This is the key ID of the key (in hexadecimal digits) used as recipient.

`@item gpgme_error_t status`

This is an error number with the error code `GPG_ERR_NO_SECKEY` if the secret key for this recipient is not available, and 0 otherwise.

`@end table`

`@end deftp`

`@deftp {Data type} {gpgme_decrypt_result_t}`

This is a pointer to a structure used to store the result of a `gpgme_op_decrypt` operation. After successfully decrypting data, you can retrieve the pointer to the result with `gpgme_op_decrypt_result`. As with all result structures, it this structure shall be considered read-only and an application must not allocate such a structure on its own. The structure contains the following members:

`@table @code`

`@item char *unsupported_algorithm`

If an unsupported algorithm was encountered, this string describes the algorithm that is not supported.

@item unsigned int wrong\_key\_usage

: 1

@since{0.9.0}

This is true if the key was not used according to its policy.

@item unsigned int legacy\_cipher\_nomdc : 1

@since{1.11.2}

The message was made by a legacy algorithm without any integrity protection. This might be an old but legitimate message.

@item unsigned int is\_mime : 1;

@since{1.11.0}

The message claims that the content is a MIME object.

@item unsigned int is\_de\_vs : 1;

@since{1.10.0}

The message was encrypted in a VS-NfD compliant way. This is a specification in Germany for a restricted communication level.

@item gpgme\_recipient\_t recipients

@since{1.1.0}

This is a linked list of recipients to which this message was encrypted.

@item char \*file\_name

This is the filename of the original plaintext message file if it is known, otherwise this is a null pointer.

@item char \*session\_key

@since{1.8.0}

A textual representation (nul-terminated string) of the session key used in symmetric encryption of the message, if the context has been set to export session

keys (see @code{gpgme\_set\_ctx\_flag, "export-session-key"}), and a session key was available for the most recent decryption operation. Otherwise, this is a null pointer.

You must not try to access this member of the struct unless

@code{gpgme\_set\_ctx\_flag (ctx, "export-session-key")} returns success or @code{gpgme\_get\_ctx\_flag (ctx, "export-session-key")} returns true (non-empty string).

@item char \*symkey\_algo

@since{1.11.0}

A string with the symmetric encryption algorithm and mode using the format "<algo>.<mode>". Note that the deprecated non-MDC encryption mode of

OpenPGP is given as "PGPCFB".

@end table

@end deftp

@deftypefun gpgme\_decrypt\_result\_t gpgme\_op\_decrypt\_result (@w{gpgme\_ctx\_t @var{ctx}})

The function @code{gpgme\_op\_decrypt\_result} returns a

@code{gpgme\_decrypt\_result\_t} pointer to a structure holding the result of a @code{gpgme\_op\_decrypt} operation. The pointer is only valid if the last operation on the context was a

@code{gpgme\_op\_decrypt} or @code{gpgme\_op\_decrypt\_start} operation.

If the operation failed this might be a @code{NULL} pointer. The returned pointer is only valid until the next operation is started on the context.

@end deftypefun

@node Verify

@subsection Verify

@cindex verification

@cindex signature, verification

@cindex cryptographic operation, verification

@cindex cryptographic operation, signature check

@cindex signature notation data

@cindex notation data

@deftypefun gpgme\_error\_t gpgme\_op\_verify (@w{gpgme\_ctx\_t @var{ctx}}, @w{gpgme\_data\_t @var{sig}},

@w{gpgme\_data\_t @var{signed\_text}}, @w{gpgme\_data\_t @var{plain}})

The function @code{gpgme\_op\_verify} verifies that the signature in the data object @var{sig} is a valid signature. If @var{sig} is a detached signature, then the signed text should be provided in @var{signed\_text} and @var{plain} should be a null pointer.

Otherwise, if @var{sig} is a normal (or cleartext) signature, @var{signed\_text} should be a null pointer and @var{plain} should be a writable data object

that will contain the plaintext after successful verification.

The results of the individual signature verifications can be retrieved with @code{gpgme\_op\_verify\_result}.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the operation could be completed successfully, @code{GPG\_ERR\_INV\_VALUE} if @var{ctx}, @var{sig} or @var{plain} is not a valid pointer, @code{GPG\_ERR\_NO\_DATA} if @var{sig} does not contain any data to verify, and passes through any errors that are reported by the crypto engine support routines.

@end deftypefun

@deftypefun gpgme\_error\_t gpgme\_op\_verify\_start (@w{gpgme\_ctx\_t @var{ctx}}, @w{gpgme\_data\_t @var{sig}}, @w{gpgme\_data\_t @var{signed\_text}}, @w{gpgme\_data\_t @var{plain}})

The function @code{gpgme\_op\_verify\_start} initiates a @code{gpgme\_op\_verify} operation. It can be completed by calling @code{gpgme\_wait} on the context. @xref{Waiting For Completion}.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the operation could be started successfully, @code{GPG\_ERR\_INV\_VALUE} if @var{ctx}, @var{sig} or @var{plain} is not a valid pointer, and @code{GPG\_ERR\_NO\_DATA} if @var{sig} or @var{plain} does not contain any data to verify.

@end deftypefun

@deftp {Data type} {gpgme\_sig\_notation\_t}

This is a pointer to a structure used to store a part of the result of a @code{gpgme\_op\_verify} operation. The structure contains the following members:

@table @code

@item gpgme\_sig\_notation\_t next

This is a pointer to the next new signature notation structure in the linked list, or @code{NULL} if this is the last element.

@item char \*name

The name of the notation field. If this is @code{NULL}, then the member @code{value} will contain a policy URL.

@item int name\_len

The length of the @code{name} field. For strings the length is counted without the trailing binary zero.

@item char \*value

The value of the notation field. If @code{name} is @code{NULL}, then this is a policy URL.

@item int value\_len

The length of the @code{value} field. For strings the length is counted without the trailing binary zero.

@item gpgme\_sig\_notation\_flags\_t flags

The accumulated flags field. This field contains the flags associated with the notation data in an accumulated form which can be used as an argument to the function @code{gpgme\_sig\_notation\_add}. The value @code{flags} is a bitwise-or combination of one or multiple of the

following bit values:

```
@table @code
@item GPGME_SIG_NOTATION_HUMAN_READABLE
@since{1.1.0}
```

The @code{GPGME\_SIG\_NOTATION\_HUMAN\_READABLE} symbol specifies that the notation data is in human readable form

```
@item GPGME_SIG_NOTATION_CRITICAL
@since{1.1.0}
```

The @code{GPGME\_SIG\_NOTATION\_CRITICAL} symbol specifies that the notation data is critical.

```
@end table
```

```
@item unsigned int human_readable : 1
```

This is true if the @code{GPGME\_SIG\_NOTATION\_HUMAN\_READABLE} flag is set and false otherwise. This flag is only valid for notation data, not for policy URLs.

```
@item unsigned int critical : 1
```

This is true if the

@code{GPGME\_SIG\_NOTATION\_CRITICAL} flag is set and false otherwise. This flag is valid for notation data and policy URLs.

```
@end table
```

```
@end deftp
```

```
@deftp {Data type} {gpgme_signature_t}
```

This is a pointer to a structure used to store a part of the result of a @code{gpgme\_op\_verify} operation. The structure contains the following members:

```
@table @code
```

```
@item gpgme_signature_t next
```

This is a pointer to the next new signature structure in the linked list, or @code{NULL} if this is the last element.

```
@item gpgme_sigsum_t summary
```

This is a bit vector giving a summary of the signature status. It provides an easy interface to a defined semantic of the signature status. Checking just one bit is sufficient to see whether a signature is valid without any restrictions. This means that you can check for GPGME\_SIGSUM\_VALID like this:

```
@example
```

```
if ((sig.summary & GPGME_SIGSUM_VALID))
@{
 ..do stuff if valid..
@}
else
@{
 ..do stuff if not fully valid..
@}
@end example
```

The defined bits are:

@table @code

@item GPGME\_SIGSUM\_VALID

The signature is fully valid.

@item GPGME\_SIGSUM\_GREEN

The signature is good but one might want to display some extra information. Check the other bits.

@item GPGME\_SIGSUM\_RED

The signature is bad. It might be useful to check other bits and display more information, i.e. a revoked certificate might not render a signature invalid when the message was received prior to the cause for the revocation.

@item GPGME\_SIGSUM\_KEY\_REVOKED

The key or at least one certificate has been revoked.

@item GPGME\_SIGSUM\_KEY\_EXPIRED

The key or one of the certificates has expired. It is probably a good idea to display the date of the expiration.

@item GPGME\_SIGSUM\_SIG\_EXPIRED

The signature has expired.

@item GPGME\_SIGSUM\_KEY\_MISSING

Can't verify due to a missing key or certificate.

@item GPGME\_SIGSUM\_CRL\_MISSING

The CRL (or an equivalent mechanism) is not available.

@item GPGME\_SIGSUM\_CRL\_TOO\_OLD

Available CRL is too old.

@item GPGME\_SIGSUM\_BAD\_POLICY

A policy requirement was not met.

@item GPGME\_SIGSUM\_SYS\_ERROR

A system error occurred.

@item GPGME\_SIGSUM\_TOFU\_CONFLICT

A TOFU conflict was detected.

@end table

@item char \*fpr

This is the fingerprint or key ID of the signature.

@item gpgme\_error\_t status

This is the status of the signature. In particular, the following status codes are of interest:

@table @code

@item GPG\_ERR\_NO\_ERROR

This status indicates that the signature could be verified or that there is no signature. For the combined result this status means that all signatures could be verified.

Note: This does not mean that a valid signature could be found. Check the @code{summary} field for that.

For example a @code{gpgme\_op\_decrypt\_verify} returns a verification result with GPG\_ERR\_NO\_ERROR for encrypted but unsigned data.

@item GPG\_ERR\_SIG\_EXPIRED

This status indicates that the signature is valid but expired. For the combined result this status means that all signatures are valid and expired.

@item GPG\_ERR\_KEY\_EXPIRED

This status indicates that the signature is valid but the key used to verify the signature has expired. For the combined result this status means that all signatures are valid and all keys are expired.

@item GPG\_ERR\_CERT\_REVOKED

This status indicates that the signature is valid but the key used to verify the signature has been revoked. For the combined result this status means that all signatures are valid and all keys are revoked.

@item GPG\_ERR\_BAD\_SIGNATURE

This status indicates that the signature is invalid. For the combined result this status means that all signatures are invalid.

@item GPG\_ERR\_NO\_PUBKEY

This status indicates that the signature could not be verified due to a missing key. For the combined result this status means that all signatures could not be checked due to missing keys.

@item GPG\_ERR\_GENERAL

This status indicates that there was some other error which prevented the signature verification.

@end table

@item gpgme\_sig\_notation\_t notations

This is a linked list with the notation data and policy URLs.

@item unsigned long timestamp

The creation timestamp of this signature.

@item unsigned long exp\_timestamp

The expiration timestamp of this signature, or 0 if the signature does not expire.

@item unsigned int wrong\_key\_usage : 1

This is true if the key was not used according to its policy.

@item unsigned int pka\_trust : 2

This is set to the trust information gained by means of the PKA system.

Values are:

@table @code

@item 0

No PKA information available or verification not possible.

@item 1

PKA verification failed.

@item 2

PKA verification succeeded.

@item 3

Reserved for future use.

@end table

Depending on the configuration of the engine, this metric may also be reflected by the validity of the signature.

@item unsigned int chain\_model : 1

@since{1.1.6}

This is true if the validity of the signature has been checked using the chain model. In the chain model the time the signature has been created must be within the validity period of the certificate and the time the certificate itself has been created must be within the validity period of the issuing certificate. In contrast the default validation model

checks the validity of signature as well at the entire certificate chain at the current time.

@item gpgme\_validity\_t validity

The validity of the signature.

@item gpgme\_error\_t validity\_reason

If a signature is not valid, this provides a reason why.

@item gpgme\_pubkey\_algo\_t

The public key algorithm used to create this signature.

@item gpgme\_hash\_algo\_t

The hash algorithm used to create this signature.

@item char \*pka\_address

The mailbox from the PKA information or @code{NULL}.

@item gpgme\_key\_t key

@since{1.7.0}

An object describing the key used to create the signature. This key object may be incomplete in that it only conveys information available

directly with a signature. It may also be @code{NULL} if such information is not readily available.

@end table

@end deftp

@deftp {Data type} {gpgme\_verify\_result\_t}

This is a pointer to a structure used to store the result of a

@code{gpgme\_op\_verify} operation. After verifying a signature, you can retrieve the pointer to the result with

@code{gpgme\_op\_verify\_result}. If the operation failed this might be a @code{NULL} pointer. The structure contains the following member:

@table @code

@item gpgme\_signature\_t signatures

A linked list with information about all signatures for which a verification was attempted.

@item char \*file\_name

This is the filename of the original plaintext message file if it is known, otherwise this is a null pointer. Warning: The filename is not covered by the signature.

@item unsigned int is\_mime : 1;  
@since{1.11.0}

The message claims that the content is a MIME object. Warning: This flag is not covered by the signature.

@end table  
@end deftp

@deftypefun  
gpgme\_verify\_result\_t gpgme\_op\_verify\_result (@w{gpgme\_ctx\_t @var{ctx}})  
The function @code{gpgme\_op\_verify\_result} returns a  
@code{gpgme\_verify\_result\_t} pointer to a structure holding the result  
of a @code{gpgme\_op\_verify} operation. The pointer is only valid if  
the last operation on the context was a @code{gpgme\_op\_verify},  
@code{gpgme\_op\_verify\_start}, @code{gpgme\_op\_decrypt\_verify} or  
@code{gpgme\_op\_decrypt\_verify\_start} operation, and if this operation  
finished successfully (for @code{gpgme\_op\_decrypt\_verify} and  
@code{gpgme\_op\_decrypt\_verify\_start}, the error code  
@code{GPG\_ERR\_NO\_DATA} counts as successful in this context). The  
returned pointer is only valid until the next operation is started on  
the context.  
@end deftypefun

@node Decrypt and Verify  
@subsection Decrypt and Verify  
@cindex decryption and verification  
@cindex verification and decryption  
@cindex signature check  
@cindex cryptographic operation, decryption and verification

@deftypefun gpgme\_error\_t gpgme\_op\_decrypt\_verify  
(@w{gpgme\_ctx\_t @var{ctx}}, @w{gpgme\_data\_t @var{cipher}}, @w{gpgme\_data\_t @var{plain}})  
The function @code{gpgme\_op\_decrypt\_verify} decrypts the ciphertext in  
the data object @var{cipher} and stores it into the data object  
@var{plain}. If @var{cipher} contains signatures, they will be  
verified.

After the operation completed, @code{gpgme\_op\_decrypt\_result} and  
@code{gpgme\_op\_verify\_result} can be used to retrieve more information  
about the signatures.

If the error code @code{GPG\_ERR\_NO\_DATA} is returned, @var{cipher}  
does not contain any data to decrypt. However, it might still be  
signed. The information about detected signatures is available with  
@code{gpgme\_op\_verify\_result} in this case.

The function returns the error code `GPG_ERR_NO_ERROR` if the ciphertext could be decrypted successfully, `GPG_ERR_INV_VALUE` if `ctx`, `cipher` or `plain` is not a valid pointer, `GPG_ERR_NO_DATA` if `cipher` does not contain any data to decrypt,

`GPG_ERR_DECRYPT_FAILED` if `cipher` is not a valid cipher text, `GPG_ERR_BAD_PASSPHRASE` if the passphrase for the secret key could not be retrieved, and passes through any errors that are reported by the crypto engine support routines.

@end deftypefun

```
@deftypefun gpgme_error_t gpgme_op_decrypt_verify_start (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_data_t @var{cipher}}, @w{gpgme_data_t @var{plain}})
```

The function `gpgme_op_decrypt_verify_start` initiates a `gpgme_op_decrypt_verify` operation. It can be completed by calling `gpgme_wait` on the context. @xref{Waiting For Completion}.

The function returns the error code `GPG_ERR_NO_ERROR` if the operation could be started successfully, `GPG_ERR_INV_VALUE` if `ctx`, `cipher`, `plain` or `r_stat` is not a valid pointer, and `GPG_ERR_NO_DATA` if `cipher` does not contain any data to decrypt.

@end deftypefun

When processing mails it is sometimes useful to extract the actual mail

address (the ``addr-spec'') from a string. GPGME provides this helper function which uses the same semantics as the internal functions in GPGME and GnuPG:

```
@deftypefun @w{char *} gpgme_addrspec_from_uid (@w{const char *@var{uid}})
```

@since{1.7.1}

Return the mail address (called ``addr-spec'' in RFC-5322) from the string `uid` which is assumed to be a user id (called ``address'' in RFC-5322). All plain ASCII characters (i.e. those with bit 7 cleared) in the result are converted to lowercase. Caller must free the result using `gpgme_free`. Returns `NULL` if no valid address was found (in which case `ERRNO` is set to `EINVAL`) or for other errors.

@end deftypefun

@node Sign

@subsection Sign

@cindex signature, creation  
@cindex sign  
@cindex cryptographic operation, signing

A signature can contain signatures by one or more keys. The set of keys used to create a signatures is contained in a context, and is applied to all following signing operations in this context (until the set is changed).

@menu  
\* Selecting Signers::       How to choose the keys to sign with.  
\* Creating a Signature::    How to create a signature.

@end menu

@node Selecting Signers  
@subsubsection Selecting Signers  
@cindex signature, selecting signers  
@cindex signers, selecting

The key or the keys used to create a signature are stored in the context. The following functions can be used to manipulate this list. If no signer has been set into the context a default key is used for signing.

@deftypefun void gpgme\_signers\_clear (@w{gpgme\_ctx\_t @var{ctx}})  
The function @code{gpgme\_signers\_clear} releases a reference for each key on the signers list and removes the list of signers from the context @var{ctx}.

Every context starts with an empty list.  
@end deftypefun

@deftypefun gpgme\_error\_t gpgme\_signers\_add (@w{gpgme\_ctx\_t @var{ctx}}, @w{const gpgme\_key\_t @var{key}})  
The function @code{gpgme\_signers\_add} adds the key @var{key} to the list of signers in the context @var{ctx}.

Calling this function acquires an additional reference for the key.  
@end deftypefun

@deftypefun @w{unsigned int} gpgme\_signers\_count (@w{const gpgme\_ctx\_t @var{ctx}})  
@since{1.4.3}

The function @code{gpgme\_signers\_count} returns the number of signer keys in

the context @var{ctx}.

@end deftypefun

@deftypefun gpgme\_key\_t gpgme\_signers\_enum (@w{const gpgme\_ctx\_t @var{ctx}}, @w{int @var{seq}})

The function @code{gpgme\_signers\_enum} returns the @var{seq}th key in the list of signers in the context @var{ctx}. An additional reference is acquired for the user.

If @var{seq} is out of range, @code{NULL} is returned.

@end deftypefun

@node Creating a Signature

@subsubsection Creating a Signature

@deftp {Data type} {enum gpgme\_sig\_mode\_t}

@tindex gpgme\_sig\_mode\_t

The @code{gpgme\_sig\_mode\_t} type is used to specify the desired type of a signature. The following modes are available:

@table @code

@item

GPGME\_SIG\_MODE\_NORMAL

A normal signature is made, the output includes the plaintext and the signature.

@item GPGME\_SIG\_MODE\_DETACH

A detached signature is made.

@item GPGME\_SIG\_MODE\_CLEAR

A clear text signature is made. The @acronym{ASCII} armor and text mode settings of the context are ignored.

@end table

@end deftp

@deftypefun gpgme\_error\_t gpgme\_op\_sign (@w{gpgme\_ctx\_t @var{ctx}}, @w{gpgme\_data\_t @var{plain}},

@w{gpgme\_data\_t @var{sig}}, @w{gpgme\_sig\_mode\_t @var{mode}})

The function @code{gpgme\_op\_sign} creates a signature for the text in the data object @var{plain} and returns it in the data object

@var{sig}. The type of the signature created is determined by the

@acronym{ASCII} armor (or, if that is not set, by the encoding specified for @var{sig}), the text mode attributes set for the context

@var{ctx} and the requested signature mode @var{mode}.

After the operation completed successfully, the result can be retrieved with @code{gpgme\_op\_sign\_result}.

If an S/MIME

signed message is created using the CMS crypto engine, the number of certificates to include in the message can be specified with `gpgme_set_include_certs`. [Included Certificates](#).

The function returns the error code `GPG_ERR_NO_ERROR` if the signature could be created successfully, `GPG_ERR_INV_VALUE` if `ctx`, `plain` or `sig` is not a valid pointer, `GPG_ERR_NO_DATA` if the signature could not be created, `GPG_ERR_BAD_PASSPHRASE` if the passphrase for the secret key could not be retrieved, `GPG_ERR_UNUSABLE_SECKEY` if there are invalid signers, and passes through any errors that are reported by the crypto engine support routines.

`gpgme_op_sign_start`

```
@deftypefun gpgme_error_t gpgme_op_sign_start (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_data_t @var{plain}}, @w{gpgme_data_t @var{sig}}, @w{gpgme_sig_mode_t @var{mode}})
```

The function `gpgme_op_sign_start` initiates a `gpgme_op_sign` operation. It can be completed by calling `gpgme_wait` on the context. [Waiting For Completion](#).

The function returns the error code `GPG_ERR_NO_ERROR` if the operation could be started successfully, and `GPG_ERR_INV_VALUE` if `ctx`, `plain` or `sig` is not a valid pointer.

`gpgme_new_signature_t`

```
@deftp {Data type} {gpgme_new_signature_t}
```

This is a pointer to a structure used to store a part of the result of a `gpgme_op_sign` operation. The structure contains the following members:

```
@table @code
```

```
@item gpgme_new_signature_t next
```

This is a pointer to the next new signature structure in the linked list, or `NULL` if this is the last element.

```
@item gpgme_sig_mode_t type
```

The type of this signature.

```
@item gpgme_pubkey_algo_t pubkey_algo
```

The public key algorithm used to create this signature.

```
@item gpgme_hash_algo_t hash_algo
```

The hash algorithm used to create this signature.

```
@item unsigned int sig_class
```

The signature class of this signature.

@item long int timestamp

The creation timestamp of this signature.

@item

char \*fpr

The fingerprint of the key which was used to create this signature.

@end table

@end deftp

@defun {Data type} {gpgme\_sign\_result\_t}

This is a pointer to a structure used to store the result of a

@code{gpgme\_op\_sign} operation. After successfully generating a signature, you can retrieve the pointer to the result with

@code{gpgme\_op\_sign\_result}. The structure contains the following members:

@table @code

@item gpgme\_invalid\_key\_t invalid\_signers

A linked list with information about all invalid keys for which a signature could not be created.

@item gpgme\_new\_signature\_t signatures

A linked list with information about all signatures created.

@end table

@end deftp

@defun gpgme\_sign\_result\_t gpgme\_op\_sign\_result (@w{gpgme\_ctx\_t @var{ctx}})

The function @code{gpgme\_op\_sign\_result} returns a

@code{gpgme\_sign\_result\_t} pointer to a structure holding the result of a @code{gpgme\_op\_sign} operation. The pointer is only valid if the last operation on the context was

a @code{gpgme\_op\_sign},

@code{gpgme\_op\_sign\_start}, @code{gpgme\_op\_encrypt\_sign} or

@code{gpgme\_op\_encrypt\_sign\_start} operation. If that operation failed, the function might return a @code{NULL} pointer. The returned pointer is only valid until the next operation is started on the context.

@end defun

@node Signature Notation Data

@subsubsection Signature Notation Data

@cindex notation data

@cindex signature notation data

@cindex policy URL

Using the following functions, you can attach arbitrary notation data to a signature. This information is then available to the user when

the signature is verified.

```
@deftypefun void gpgme_sig_notation_clear (@w{gpgme_ctx_t @var{ctx}})
@since{1.1.0}
```

The function `gpgme_sig_notation_clear` removes the notation data from the context `@var{ctx}`. Subsequent signing operations from this context will not include any notation data.

Every context starts with an empty notation data list.

```
@end deftypefun
```

```
@deftypefun gpgme_error_t gpgme_sig_notation_add
(@w{gpgme_ctx_t @var{ctx}}, @w{const char *@var{name}}, @w{const char *@var{value}},
@w{gpgme_sig_notation_flags_t @var{flags}})
@since{1.1.0}
```

The function `gpgme_sig_notation_add` adds the notation data with the name `@var{name}` and the value `@var{value}` to the context `@var{ctx}`.

Subsequent signing operations will include this notation data, as well as any other notation data that was added since the creation of the context or the last `gpgme_sig_notation_clear` operation.

The arguments `@var{name}` and `@var{value}` must be `NUL`-terminated strings in human-readable form. The flag `GPGME_SIG_NOTATION_HUMAN_READABLE` is implied (non-human-readable notation data is currently not supported). The strings must be in UTF-8 encoding.

If `@var{name}` is `NULL`, then `@var{value}` should be a policy URL.

The function `gpgme_sig_notation_add` returns the error code `GPG_ERR_NO_ERROR` if the notation data could be added successfully, `GPG_ERR_INV_VALUE`

if `@var{ctx}` is not a valid pointer, or if `@var{name}`, `@var{value}` and `@var{flags}` are an invalid combination. The function also passes through any errors that are reported by the crypto engine support routines.

```
@end deftypefun
```

```
@deftypefun gpgme_sig_notation_t gpgme_sig_notation_get (@w{const gpgme_ctx_t @var{ctx}})
@since{1.1.0}
```

The function `gpgme_sig_notation_get` returns the linked list of notation data structures that are contained in the context `@var{ctx}`.

If `@var{ctx}` is not a valid pointer, or there is no notation data added for this context, `@code{NULL}` is returned.

`@end deftypefun`

`@node Encrypt`

`@subsection Encrypt`

`@cindex encryption`

`@cindex cryptographic operation, encryption`

One plaintext can be encrypted for several recipients at the same time. The list of recipients is created independently of any context, and then passed to the encryption operation.

`@menu`

\* Encrypting a Plaintext::     How to encrypt a plaintext.

`@end menu`

`@node Encrypting a`

`Plaintext`

`@subsubsection Encrypting a Plaintext`

```
@deftypefun gpgme_error_t gpgme_op_encrypt (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_key_t
@var{recp}}[], @w{gpgme_encrypt_flags_t @var{flags}}, @w{gpgme_data_t @var{plain}}, @w{gpgme_data_t
@var{cipher}})
```

The function `@code{gpgme_op_encrypt}` encrypts the plaintext in the data object `@var{plain}` for the recipients `@var{recp}` and stores the ciphertext in the data object `@var{cipher}`. The type of the ciphertext created is determined by the `@acronym{ASCII} armor` (or, if that is not set, by the encoding specified for `@var{cipher}`) and the text mode attributes set for the context `@var{ctx}`.

`@var{recp}` must be a `@code{NULL}`-terminated array of keys. The user must keep references for all keys during the whole duration of the call (but see `@code{gpgme_op_encrypt_start}` for the requirements with the asynchronous variant).

The value in `@var{flags}` is a bitwise-or combination of one or multiple of the following bit values:

`@table @code`

`@item GPGME_ENCRYPT_ALWAYS_TRUST`

The

`@code{GPGME_ENCRYPT_ALWAYS_TRUST}` symbol specifies that all the recipients in `@var{recp}` should be trusted, even if the keys do not have a high enough validity in the keyring. This flag should be used with care; in general it is not a good idea to use any untrusted keys.

@item GPGME\_ENCRYPT\_NO\_ENCRYPT\_TO

@since{1.2.0}

The @code{GPGME\_ENCRYPT\_NO\_ENCRYPT\_TO} symbol specifies that no default or hidden default recipients as configured in the crypto backend should be included. This can be useful for managing different user profiles.

@item GPGME\_ENCRYPT\_NO\_COMPRESS

@since{1.5.0}

The @code{GPGME\_ENCRYPT\_NO\_COMPRESS} symbol specifies that the plaintext shall not be compressed before it is encrypted. This is in some cases useful if the length of the encrypted message may reveal information about the plaintext.

@item GPGME\_ENCRYPT\_PREPARE

@itemx GPGME\_ENCRYPT\_EXPECT\_SIGN

The @code{GPGME\_ENCRYPT\_PREPARE} symbol is used with the UI Server protocol to prepare an encryption

(i.e. sending the

@code{PREP\_ENCRYPT} command). With the

@code{GPGME\_ENCRYPT\_EXPECT\_SIGN} symbol the UI Server is advised to also expect a sign command.

@item GPGME\_ENCRYPT\_SYMMETRIC

@since{1.7.0}

The @code{GPGME\_ENCRYPT\_SYMMETRIC} symbol specifies that the output should be additionally encrypted symmetrically even if recipients are provided. This feature is only supported for the OpenPGP crypto engine.

@item GPGME\_ENCRYPT\_THROW\_KEYIDS

@since{1.8.0}

The @code{GPGME\_ENCRYPT\_THROW\_KEYIDS} symbol requests that the identifiers for the decryption keys are not included in the ciphertext.

On the receiving side, the use of this flag may slow down the

decryption process because all available secret keys must be tried.

This flag is only honored for OpenPGP encryption.

@item GPGME\_ENCRYPT\_WRAP

@since{1.8.0}

The @code{GPGME\_ENCRYPT\_WRAP} symbol specifies that the input is an OpenPGP message and not a plain data. This is the counterpart to

`GPGME_DECRYPT_UNWRAP`).

`GPGME_ENCRYPT_WANT_ADDRESS`

`1.11.0`

The

`GPGME_ENCRYPT_WANT_ADDRESS` symbol requests that all supplied keys or key specifications include a syntactically valid mail address. If this is not the case the operation is not even tried and the error code `GPG_ERR_INV_USER_ID` is returned. Only the address part of the key specification is conveyed to the backend. As of now the key must be specified using the `recpstring` argument of the extended encrypt functions. This feature is currently only supported for the OpenPGP crypto engine.

end table

If `GPG_ERR_UNUSABLE_PUBKEY` is returned, some recipients in `recp` are invalid, but not all. In this case the plaintext might be encrypted for all valid recipients and returned in `cipher` (if this happens depends on the crypto engine). More information about the invalid recipients is available with `gpgme_op_encrypt_result`.

If `recp` is `NULL`, symmetric rather than public key encryption is performed.

Symmetrically encrypted cipher text can be deciphered with `gpgme_op_decrypt`. Note that in this case the crypto backend needs to retrieve a passphrase from the user. Symmetric encryption is currently only supported for the OpenPGP crypto backend.

The function returns the error code `GPG_ERR_NO_ERROR` if the ciphertext could be created successfully, `GPG_ERR_INV_VALUE` if `ctx`, `recp`, `plain` or `cipher` is not a valid pointer, `GPG_ERR_UNUSABLE_PUBKEY` if `recp` contains some invalid recipients, `GPG_ERR_BAD_PASSPHRASE` if the passphrase for the symmetric key could not be retrieved, and passes through any errors that are reported by the crypto engine support routines.

end dectyfun

```
@dectyfun gpgme_error_t gpgme_op_encrypt_start (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_key_t @var{recp}}[], @w{gpgme_encrypt_flags_t @var{flags}}, @w{gpgme_data_t @var{plain}}, @w{gpgme_data_t @var{cipher}})
```

The function `gpgme_op_encrypt_start` initiates

a

`gpgme_op_encrypt` operation. It can be completed by calling `gpgme_wait` on the context. [Waiting For Completion](#).

References to the keys only need to be held for the duration of this call. The user can release its references to the keys after this function returns, even if the operation is not yet finished.

The function returns the error code `GPG_ERR_NO_ERROR` if the operation could be started successfully, `GPG_ERR_INV_VALUE` if `@var{ctx}`, `@var{rset}`, `@var{plain}` or `@var{cipher}` is not a valid pointer, and `GPG_ERR_UNUSABLE_PUBKEY` if `@var{rset}` does not contain any valid recipients.

@end deftypefun

```
@deftypefun gpgme_error_t gpgme_op_encrypt_ext @
 (@w{gpgme_ctx_t @var{ctx}}, @
 @w{gpgme_key_t @var{recp}[]}, @
 @w{const char *@var{recpstring}}, @
 @w{gpgme_encrypt_flags_t @var{flags}}, @
 @w{gpgme_data_t @var{plain}}, @w{gpgme_data_t @var{cipher}})
```

@since{1.11.0}

This is an extended version of `gpgme_op_encrypt` with `@var{recpstring}` as additional parameter. If `@var{recp}` is NULL and `@var{recpstring}` is not NULL, the latter is expected to be a linefeed delimited string with the set of key specifications. In contrast to `@var{recp}` the keys are given directly as strings and there is no need to first create key objects. Leading and trailing white space is removed from each line in `@var{recpstring}`. The keys are then passed verbatim to the backend engine.

For the OpenPGP backend several special keywords are supported to modify the operation. These keywords are given instead of a key specification. The currently supported keywords are:

@table @code

@item --hidden

@itemx --no-hidden

These keywords toggle between normal and hidden recipients for all following key specifications. When a hidden recipient is requested the gpg option `-R` (or `-F` in file mode) is used instead of `-r` (`-f` in file mode).

@item --file

@itemx

--no-file

These keywords toggle between regular and file mode for all following key specification. In file mode the option `-f` or `-F`

is passed to gpg. At least GnuPG version 2.1.14 is required to handle these options. The `{GPGME_ENCRYPT_WANT_ADDRESS}` flag is ignored in file mode.

@item --

This keyword disables all keyword detection up to the end of the string. All keywords are treated as verbatim arguments.

@end table

To create a `{recpstring}` it is often useful to employ a `strconcat` style function. For example this function creates a string to encrypt to two keys:

@example

```
char *
xbuild_recstring (const char *key1, const char *key2)
@ {
char *result = gpgrt_strconcat ("--\n", key1, "\n", key2, NULL);
if (!result)
 @ { perror ("strconcat failed"); exit (2); @ }
return result;
@ }
@end example
```

Note the use of the double dash here; unless you want to specify a keyword, it is a good idea to avoid any possible trouble with key specifications starting with a double dash. The used `strconcat` function is available in Libgpg-error 1.28 and later; Libgpg-error (aka Gpgrt) is a dependency of GPGME. The number of arguments to `{gpgrt_strconcat}` is limited to 47 but that should always be sufficient. In case a larger and non-fixed number of keys are to be supplied the following code can be used:

@example

```
char *
xbuild_long_recstring (void)
@ {
gpgrt_stream_t memfp;
const char *s;
void *result;

memfp = gpgrt_fopenmem (0, "w+b");
if (!memfp)
 @ { perror ("fopenmem failed"); exit (2); @ }
gpgrt_fputs ("--", memfp);
while ((s = get_next_keyspec ()))
```

```

@{
 gpgmt_fputc ('\n', memfp);
 gpgmt_fputs (s, memfp);
@}
gpgmt_fputc (0, memfp);
if (gpgmt_ferror (memfp))
 @{ perror ("writing to memstream failed"); exit (2); @}
if (gpgmt_fclose_snatch (memfp, &result, NULL))
 @{ perror ("fclose_snatch failed"); exit (2); @}
return result;
@}
@end example

```

In this example `get_next_keyspec` is expected to return the next key to be added to the string. Please take care: Encrypting to a large number of recipients is often questionable due to security reasons and also for the technicality that all keys are currently passed on the command line to `gpg` which has as a platform specific length limitation.

```

@deftypefun gpgme_error_t gpgme_op_encrypt_ext_start @
 (@w{gpgme_ctx_t @var{ctx}}, @
 @w{gpgme_key_t @var{recp}[]}, @
 @w{const char *@var{recpstring}}, @
 @w{gpgme_encrypt_flags_t @var{flags}}, @
 @w{gpgme_data_t @var{plain}}, @w{gpgme_data_t @var{cipher}})

```

`@since{1.11.0}`

This is an extended version of `gpgme_op_encrypt_start` with `@var{recpstring}` as additional parameter. If `@var{recp}` is NULL and `@var{recpstring}` is not NULL, the latter is expected to be a linefeed delimited string with the set of key specifications. In contrast to `@var{recp}` the keys are given directly as strings and there is no need to first create key objects. The keys are passed verbatim to the backend engine.

`@end deftypefun`

```

@defptr {Data type} {gpgme_encrypt_result_t}

```

This is a pointer to a structure used to store the result of a `gpgme_op_encrypt` operation. After successfully encrypting data, you can retrieve the pointer to the result with `gpgme_op_encrypt_result`. The structure contains the following

members:

@table @code

@item gpgme\_invalid\_key\_t invalid\_recipients

A linked list with information about all invalid keys for which the data could not be encrypted.

@end table

@end deftp

@deftypefun gpgme\_encrypt\_result\_t gpgme\_op\_encrypt\_result (@w{gpgme\_ctx\_t @var{ctx}})

The function @code{gpgme\_op\_encrypt\_result} returns a

@code{gpgme\_encrypt\_result\_t} pointer to a structure holding the result of a @code{gpgme\_op\_encrypt} operation. The pointer is only valid if the last operation on the context was a

@code{gpgme\_op\_encrypt}, @code{gpgme\_op\_encrypt\_start},

@code{gpgme\_op\_sign} or

@code{gpgme\_op\_sign\_start} operation. If this

operation failed, this might be a @code{NULL} pointer. The returned

pointer is only valid until the next operation is started on the

context.

@end deftypefun

@deftypefun gpgme\_error\_t gpgme\_op\_encrypt\_sign (@w{gpgme\_ctx\_t @var{ctx}}, @w{gpgme\_key\_t

@var{recp}[]), @w{gpgme\_encrypt\_flags\_t @var{flags}}, @w{gpgme\_data\_t @var{plain}}, @w{gpgme\_data\_t @var{cipher}})

The function @code{gpgme\_op\_encrypt\_sign} does a combined encrypt and

sign operation. It is used like @code{gpgme\_op\_encrypt}, but the

ciphertext also contains signatures for the signers listed in

@var{ctx}.

The combined encrypt and sign operation is currently only available for the OpenPGP crypto engine.

@end deftypefun

@deftypefun gpgme\_error\_t gpgme\_op\_encrypt\_sign\_start (@w{gpgme\_ctx\_t @var{ctx}}, @w{gpgme\_key\_t

@var{recp}[]), @w{gpgme\_encrypt\_flags\_t @var{flags}}, @w{gpgme\_data\_t @var{plain}}, @w{gpgme\_data\_t @var{cipher}})

The function @code{gpgme\_op\_encrypt\_sign\_start}

initiates a

@code{gpgme\_op\_encrypt\_sign} operation. It can be completed by

calling @code{gpgme\_wait} on the context. @xref{Waiting For

Completion}.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the

operation could be started successfully, and @code{GPG\_ERR\_INV\_VALUE}

if @var{ctx}, @var{rset}, @var{plain} or @var{cipher} is not a valid

pointer.

@end deftypefun

```
@deftypefun gpgme_error_t gpgme_op_encrypt_sign_ext @
 (@w{gpgme_ctx_t @var{ctx}}, @

@node Miscellaneous  
@section Miscellaneous  
operations

Here are some support functions which are sometimes useful.

```
@menu
* Running other Programs:: Running other Programs
* Using the Assuan protocol:: Using the Assuan protocol
* Checking for updates:: How to check for software updates
@end menu
```

```
@node Running other Programs
@subsection Running other Programs
```

GPGME features an internal subsystem to run the actual backend engines. Along with data abstraction object this subsystem can be used to run arbitrary simple programs which even need not be related to cryptographic features. It may for example be used to run tools which are part of the GnuPG system but are not directly accessible with the GPGME API.

```
@deftypefun gpgme_error_t gpgme_op_spawn @
 (@w{gpgme_ctx_t @var{ctx}}, @w{const char *@var{file}}, @
 @w{const char *@var{argv}[]}, @w{gpgme_data_t @var{datain}}, @
 @w{gpgme_data_t @var{dataout}}, @w{gpgme_data_t @var{dataerr}}, @
 @w{unsigned int @var{flags}})
```

```
@since{1.5.0}
```

The function `gpgme_op_spawn` runs the program `@var{file}` with the arguments taken from the NULL terminated array `@var{argv}`. If no arguments are required `@var{argv}` may be given as `NULL`. In the latter case or if `@var{argv}[0]` is the empty string, GPGME uses the basename of `@var{file}` for `@var{argv}[0]`. The file descriptors `stdin`, `stdout`, and `stderr` are connected to the data objects `@var{datain}`, `@var{dataout}`, and `@var{dataerr}`. If NULL is passed for one of these data objects the corresponding file descriptor is connected to `/dev/null`.

The value in `@var{flags}` is a bitwise-or combination of one or multiple of the following bit values:

```
@table @code
@item GPGME_SPAWN_DETACHED
@since{1.5.0}
```

Under Windows this flag inhibits the allocation of a new console for the program. This is useful for a GUI application which needs to call a command line helper tool.

@item GPGME\_SPAWN\_ALLOW\_SET\_FG

@since{1.5.0}

Under Windows

this flag allows the called program to put itself into the foreground.

@end table

@end deftypefun

@deftypefun gpgme\_error\_t gpgme\_op\_spawn\_start @

(@w{gpgme\_ctx\_t @var{ctx}}, @w{const char \*@var{file}}, @w{const char \*@var{argv}[]}, @w{gpgme\_data\_t @var{datain}}, @w{gpgme\_data\_t @var{dataout}}, @w{gpgme\_data\_t @var{dataerr}}, @w{unsigned int @var{flags}})

@since{1.5.0}

This is the asynchronous variant of @code{gpgme\_op\_spawn}.

@end deftypefun

@node Using the Assuan protocol

@subsection Using the Assuan protocol

The Assuan protocol can be used to talk to arbitrary Assuan servers.

By default it is connected to the GnuPG agent, but it may be connected to arbitrary servers by using @code{gpgme\_ctx\_set\_engine\_info}, passing the location of the servers socket as @var{file\_name} argument, and an empty string as @var{home\_dir} argument.

The Assuan protocol functions use three kinds of callbacks to transfer data:

@defftp {Data type}

{gpgme\_error\_t (\*gpgme\_assuan\_data\_cb\_t) @w{void \*@var{opaque}}, @w{const void \*@var{data}}, @w{size\_t @var{datalen}}}

@since{1.2.0}

This callback receives any data sent by the server. @var{opaque} is the pointer passed to @code{gpgme\_op\_assuan\_transact\_start},

@var{data} of length @var{datalen} refers to the data sent.

@end defftp

@defftp {Data type} {gpgme\_error\_t (\*gpgme\_assuan\_inquire\_cb\_t) @

@w{void \*@var{opaque}}, @w{const char \*@var{name}}, @w{const char \*@var{args}}, @w{gpgme\_data\_t \*@var{r\_data}}}

@since{1.2.0}

This callback is used to provide additional data to the Assuan server.

@var{opaque} is the pointer passed to

@code{gpgme\_op\_assuan\_transact\_start}, @var{name} and @var{args} specify what kind of data the server requested, and @var{r\_data} is used to return the actual data.

Note: Returning data is currently not implemented in @acronym{GPGME}.

@end deftp

@deftp {Data type} {gpgme\_error\_t (\*gpgme\_assuan\_status\_cb\_t) @

(@w{void \* @var{opaque}}, @w{const char \* @var{status}}, @  
@w{const char \* @var{args}})}

@since{1.2.0}

This callback receives any status lines sent by the server.

@var{opaque} is the pointer passed to

@code{gpgme\_op\_assuan\_transact\_start}, @var{status} and @var{args} denote the status update sent.

@end deftp

@deftypefun gpgme\_error\_t gpgme\_op\_assuan\_transact\_start @

@w{void * @var{status_cb_value}}, @
@w{gpgme_error_t *@var{op_err}}

```

Send the Assuan `@var{command}` and return results via the callbacks.  
The result of the operation is returned in `@var{op_err}`.

Synchronous variant.  
`@end deftypefun`

`@node` Checking for updates  
`@subsection` How to check for software updates

The GnuPG Project operates a server to query the current versions of software packages related to GnuPG. GPGME can be used to access this online database and check whether a new version of a software package is available.

```

@defpt {Data type} {gpgme_query_swdb_result_t}
@since{1.8.0}

```

This is a pointer to a structure used to store the result of a `@code{gpgme_op_query_swdb}` operation. After successful call to that function, you can retrieve the pointer to the result with `@code{gpgme_op_query_swdb_result}`. The structure contains the following member:

```

@table @code
@item name
This is the name of the package.

```

```

@item iversion
The currently installed version or an empty string. This value is either a copy of the argument given to @code{gpgme_op_query_swdb} or the version of the installed software as figured out by GPGME or GnuPG.

```

```

@item created
This gives the date the file with the list of version numbers has originally been created by the GnuPG project.

```

```

@item retrieved
This gives the date the file was downloaded.

```

```

@item warning

```

If this flag is set either an error has occurred or some of the information in this structure are not properly set. For example if the version number of the installed software could not be figured out, the

`@code{update}` flag may not reflect a required update status.

`@item update`

If this flag is set an update of the software is available.

`@item urgent`

If this flag is set an available update is important.

`@item noinfo`

If this flag is set, no valid information could be retrieved.

`@item unknown`

If this flag is set the given `@code{name}` is not known.

`@item toold`

If this flag is set the available information is not fresh enough.

`@item error`

If this flag is set some other error has occurred.

`@item version`

The version string of the latest released version.

`@item reldate`

The release date of the latest released version.

`@end table`

`@end deftp`

`@deftypefun gpgme_error_t gpgme_op_query_swdb @`

`(@w{gpgme_ctx_t @var{ctx}}, @`

`@w{const char *@var{name}}, @`

`@w{const char *@var{iversion}}, @`

`@w{gpgme_data_t @var{reserved}}))`

`@since{1.8.0}`

Query the software version database for software package `@var{name}` and check against the installed

version given by `@var{iversion}`. If

`@var{iversion}` is given as `@code{NULL}` a check is only done if GPGME can figure out the version by itself (for example when using

"gpgme" or "gnupg"). If `@code{NULL}` is used for `@var{name}` the current gpgme version is checked. `@var{reserved}` must be set to 0.

```
@end deftypefun
```

```
@deftypefun gpgme_query_swdb_result_t gpgme_op_query_swdb_result @
 (@w{gpgme_ctx_t @var{ctx}})
```

```
@since{1.8.0}
```

The function `gpgme_op_query_swdb_result` returns a `gpgme_query_swdb_result_t` pointer to a structure holding the result of a `gpgme_op_query_swdb` operation. The pointer is only valid if the last operation on the context was a successful call to `gpgme_op_query_swdb`. If that call failed, the result might be a `NULL` pointer. The returned pointer is only valid until the next operation is started on the context `@var{ctx}`.

```
@end deftypefun
```

```
@noindent
```

Here is an example on how to check whether GnuPG is current:

```
@example
```

```
#include
```

```
<gpgme.h>
```

```
int
```

```
main (void)
```

```
@{
```

```
 gpg_error_t err;
```

```
 gpgme_ctx_t ctx;
```

```
 gpgme_query_swdb_result_t result;
```

```
 gpgme_check_version (NULL);
```

```
 err = gpgme_new (&ctx);
```

```
 if (err)
```

```
 fprintf (stderr, "error creating context: %s\n", gpg_strerror (err));
```

```
 else
```

```
 @{
```

```
 gpgme_set_protocol (ctx, GPGME_PROTOCOL_GPGCONF);
```

```
 err = gpgme_op_query_swdb (ctx, "gnupg", NULL, 0);
```

```
 if (err)
```

```
 fprintf (stderr, "error querying swdb: %s\n", gpg_strerror (err));
```

```
 else
```

```
 @{
```

```
 result = gpgme_op_query_swdb_result (ctx);
```

```
 if (!result)
```

```
 fprintf (stderr, "error querying swdb\n");
```

```
 if (!result->warning && !result->update)
```

```

 printf ("GnuPG version %s is current\n",
 result->iversion);
else if (!result->warning && result->update)
 printf ("GnuPG version %s can be updated to %s\n",
 result->iversion, result->version);
else
 fprintf (stderr, "error finding the
update status\n");
 @ }
 gpgme_release (ctx);
 @ }
return 0;
@ }
@end example

```

```

@node Run Control
@section Run Control
@cindex run control
@cindex cryptographic operation, running

```

@acronym{GPGME} supports running operations synchronously and asynchronously. You can use asynchronous operation to set up a context up to initiating the desired operation, but delay performing it to a later point.

Furthermore, you can use an external event loop to control exactly when @acronym{GPGME} runs. This ensures that @acronym{GPGME} only runs when necessary and also prevents it from blocking for a long time.

```

@menu
* Waiting For Completion:: Waiting until an operation is completed.
* Using External Event Loops:: Advanced control over what happens when.
* Cancellation:: How to end pending operations prematurely.
@end menu

```

```

@node Waiting For Completion
@subsection Waiting For Completion
@cindex cryptographic operation, wait for
@cindex wait for completion

```

```

@deftypefun
gpgme_ctx_t gpgme_wait (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_error_t *@var{status}}, @w{int
@var{hang}})

```

The function @code{gpgme\_wait} continues the pending operation within the context @var{ctx}. In particular, it ensures the data exchange

between `@acronym{GPGME}` and the crypto backend and watches over the run time status of the backend process.

If `@var{hang}` is true, the function does not return until the operation is completed or cancelled. Otherwise the function will not block for a long time.

The error status of the finished operation is returned in `@var{status}` if `@code{gpgme_wait}` does not return `@code{NULL}`.

The `@var{ctx}` argument can be `@code{NULL}`. In that case, `@code{gpgme_wait}` waits for any context to complete its operation.

`@code{gpgme_wait}` can be used only in conjunction with any context that has a pending operation initiated with one of the `@code{gpgme_op_*_start}` functions except `@code{gpgme_op_keylist_start}` and `@code{gpgme_op_trustlist_start}` (for which you should use the corresponding `@code{gpgme_op_*_next}` functions). If `@var{ctx}` is `@code{NULL}`, all of such contexts are waited upon and possibly returned. Synchronous operations running in parallel, as well as key and trust item list operations, do not affect `@code{gpgme_wait}`.

In a multi-threaded environment, only one thread should ever call `@code{gpgme_wait}` at any time, regardless of whether `@var{ctx}` is specified or not. This means that all calls to this function should be fully synchronized by locking primitives. It is safe to start asynchronous operations while a thread is running in `@code{gpgme_wait}`.

The function returns the `@var{ctx}` of the context which has finished the operation. If `@var{hang}` is false, and the timeout expires, `@code{NULL}` is returned and `@code{*status}` will be set to 0. If an error occurs, `@code{NULL}` is returned and the error is returned in `@code{*status}`.  
`@end deftypefun`

`@node Using External Event Loops`

`@subsection Using External Event`

`Loops`

`@cindex event loop, external`

`@acronym{GPGME}` hides the complexity of the communication between the library and the crypto engine. The price of this convenience is that the calling thread can block arbitrary long waiting for the data returned by the crypto engine. In single-threaded programs, in particular if they are interactive, this is an unwanted side-effect. OTOH, if `@code{gpgme_wait}` is used without the `@var{hang}` option being

enabled, it might be called unnecessarily often, wasting CPU time that could be used otherwise.

The I/O callback interface described in this section lets the user take control over what happens when. `@acronym{GPGME}` will provide the user with the file descriptors that should be monitored, and the callback functions that should be invoked when a file descriptor is ready for reading or writing. It is then the user's responsibility to decide when to check the file descriptors and when to invoke the callback functions. Usually this is done in an event loop, that also checks for events in other parts of the program. If the callback functions are only called when the file descriptors are ready, `@acronym{GPGME}` will never block. This gives the user more control over the program flow, and allows to perform other tasks when `@acronym{GPGME}` would block otherwise.

By using this advanced mechanism, `@acronym{GPGME}` can be integrated smoothly into GUI toolkits like GTK+ even for single-threaded programs.

`@node I/O Callback Interface`

`@subsubsection I/O Callback Interface`

```
@deftp {Data type} {gpgme_error_t
(*gpgme_io_cb_t) (@w{void *@var{data}}, @w{int @var{fd}})}
@tindex gpgme_io_cb_t
```

The `@code{gpgme_io_cb_t}` type is the type of functions which `@acronym{GPGME}` wants to register as I/O callback handlers using the `@code{gpgme_register_io_cb_t}` functions provided by the user.

`@var{data}` and `@var{fd}` are provided by `@acronym{GPGME}` when the I/O callback handler is registered, and should be passed through to the handler when it is invoked by the user because it noticed activity on the file descriptor `@var{fd}`.

The callback handler always returns `@code{0}`, but you should consider the return value to be reserved for later use.

@end deftp

```
@deftp {Data type} {gpgme_error_t (*gpgme_register_io_cb_t) (@w{void *@var{data}}, @w{int @var{fd}},
@w{int @var{dir}}, @w{gpgme_io_cb_t @var{fnc}}, @w{void *@var{fnc_data}}, @w{void **@var{tag}})}
@tindex gpgme_register_io_cb_t
```

The @code{gpgme\_register\_io\_cb\_t} type is the type of functions which can be called by @acronym{GPGME} to register an I/O callback function

@var{fnc} for the file descriptor @var{fd} with the user.

@var{fnc\_data} should be passed as the first argument to @var{fnc} when the handler is invoked (the second argument should be @var{fd}).

If @var{dir} is 0, @var{fnc} should be called by the user when

@var{fd} is ready for writing. If @var{dir} is 1, @var{fnc} should be called when @var{fd} is ready for reading.

@var{data} was provided by the user when registering the

@code{gpgme\_register\_io\_cb\_t} function with @acronym{GPGME} and will always be passed as the first argument when registering a callback function.

For example, the user can use this to determine the event loop to which the file descriptor should be added.

@acronym{GPGME} will call this function when a crypto operation is initiated in a context for which the user has registered I/O callback handler functions with @code{gpgme\_set\_io\_cbs}. It can also call this function when it is in an I/O callback handler for a file descriptor associated to this context.

The

user should return a unique handle in @var{tag} identifying this

I/O callback registration, which will be passed to the

@code{gpgme\_register\_io\_cb\_t} function without interpretation when the file descriptor should not be monitored anymore.

@end deftp

```
@deftp {Data type} {void (*gpgme_remove_io_cb_t) (@w{void *@var{tag}})}
```

The @code{gpgme\_remove\_io\_cb\_t} type is the type of functions which can be called by @acronym{GPGME} to remove an I/O callback handler that was registered before. @var{tag} is the handle that was returned by the @code{gpgme\_register\_io\_cb\_t} for this I/O callback.

@acronym{GPGME} can call this function when a crypto operation is in an I/O callback. It will also call this function when the context is destroyed while an operation is pending.

@end deftp

```
@deftp {Data type} {enum gpgme_event_io_t}
```

```
@tindex gpgme_event_io_t
```

The @code{gpgme\_event\_io\_t} type specifies the type of an event that is

reported to the user by @acronym{GPGME} as a consequence of an I/O operation.

The following events are defined:

@table @code

@item GPGME\_EVENT\_START

The operation is fully initialized now, and you can start to run the registered I/O callback handlers now. Note that registered I/O callback handlers must not be run before this event is signalled.

@var{type\_data} is @code{NULL} and reserved for later use.

@item GPGME\_EVENT\_DONE

The operation is finished, the last I/O callback for this operation was removed. The accompanying @var{type\_data} points to a @code{struct gpgme\_io\_event\_done\_data} variable that contains the status of the operation that finished. This event is signalled after the last I/O callback has been removed.

@item GPGME\_EVENT\_NEXT\_KEY

In a @code{gpgme\_op\_keylist\_start} operation, the next key was received from the crypto engine. The accompanying @var{type\_data} is a @code{gpgme\_key\_t} variable that contains the key with one reference for the user.

@end table

@end deftp

@deftp {Data type} {void (\*gpgme\_event\_io\_cb\_t) (@w{void \*@var{data}}, @w{gpgme\_event\_io\_t @var{type}}, @w{void \*@var{type\_data}})}

The @code{gpgme\_event\_io\_cb\_t} type is the type of functions which can be called by @acronym{GPGME} to signal an event for an operation running in a context which has I/O callback functions registered by the user.

@var{data} was provided by the user when registering the @code{gpgme\_event\_io\_cb\_t} function with @acronym{GPGME} and will always be passed as the first argument when registering a callback function.

For example, the user can use this to determine the context in which this event has occurred.

@var{type} will specify the type of event that has occurred.

@var{type\_data} specifies the event further, as described in the above list of possible @code{gpgme\_event\_io\_t} types.

@acronym{GPGME} can call this function in an I/O callback handler.

@end deftp

@node Registering I/O Callbacks

## @subsubsection Registering I/O Callbacks

@def`tp` {Data type} {struct gpgme\_io\_cbs}

@tindex gpgme\_event\_io\_t

This structure

is used to store the I/O callback interface functions

described in the previous section. It has the following members:

@table @code

@item gpgme\_register\_io\_cb\_t add

This is the function called by @acronym{GPGME} to register an I/O callback handler. It must be specified.

@item void \*add\_priv

This is passed as the first argument to the @code{add} function when it is called by @acronym{GPGME}. For example, it can be used to determine the event loop to which the file descriptor should be added.

@item gpgme\_remove\_io\_cb\_t remove

This is the function called by @acronym{GPGME} to remove an I/O callback handler. It must be specified.

@item gpgme\_event\_io\_cb\_t event

This is the function called by @acronym{GPGME} to signal an event for an operation. It must be specified, because at least the start event must be processed.

@item void \*event\_priv

This is passed as the first argument to the @code{event} function when it is called by @acronym{GPGME}. For example, it can be used to determine

the context in which the event has occurred.

@end table

@end def`tp`

@def`typefun` void gpgme\_set\_io\_cbs (@w{gpgme\_ctx\_t @var{ctx}}, @w{struct gpgme\_io\_cbs \*@var{io\_cbs}})

The function @code{gpgme\_set\_io\_cbs} enables the I/O callback interface for the context @var{ctx}. The I/O callback functions are specified by @var{io\_cbs}.

If @var{io\_cbs}->@code{add} is @code{NULL}, the I/O callback interface is disabled for the context, and normal operation is restored.

@end def`typefun`

@def`typefun` void gpgme\_get\_io\_cbs (@w{gpgme\_ctx\_t @var{ctx}}, @w{struct gpgme\_io\_cbs \*@var{io\_cbs}})

The function @code{gpgme\_get\_io\_cbs} returns the I/O callback functions set with @code{gpgme\_set\_io\_cbs} in @var{io\_cbs}.

@end def`typefun`

@node I/O Callback Example

@subsubsection I/O Callback Example

To actually use an external event loop, you have to implement the I/O callback functions that are used by @acronym{GPGME} to register and unregister file descriptors. Furthermore, you have to actually monitor these file descriptors for activity and call the appropriate I/O callbacks.

The following example illustrates how to do that. The example uses locking to show in which way the callbacks and the event loop can run concurrently. For the event loop, we use a fixed array. For a real-world implementation, you should use a dynamically sized structure because the number of file descriptors needed for a crypto operation in @acronym{GPGME} is not predictable.

@example

```
#include <assert.h>
#include <errno.h>
#include <stdlib.h>
#include <pthread.h>
#include <sys/types.h>
#include <gpgme.h>

/* The following structure holds the result of a crypto operation. */
struct op_result
@{
 int done;
 gpgme_error_t err;
@};

/* The following structure holds the data associated with one I/O
callback. */
struct one_fd
@{
 int fd;
 int dir;
 gpgme_io_cb_t fnc;
 void *fnc_data;
 void *loop;
@};

struct event_loop
@{
 pthread_mutex_t lock;
```

```

#define MAX_FDS 32
/* Unused slots are marked with FD being
-1. */
struct one_fd fds[MAX_FDS];
@ };
@end example

```

The following functions implement the I/O callback interface.

```

@example
gpgme_error_t
add_io_cb (void *data, int fd, int dir, gpgme_io_cb_t fnc, void *fnc_data,
 void **r_tag)
@ {
 struct event_loop *loop = data;
 struct one_fd *fds = loop->fds;
 int i;

 pthread_mutex_lock (&loop->lock);
 for (i = 0; i < MAX_FDS; i++)
 @ {
 if (fds[i].fd == -1)
 @ {
 fds[i].fd = fd;
 fds[i].dir = dir;
 fds[i].fnc = fnc;
 fds[i].fnc_data = fnc_data;
 fds[i].loop = loop;
 break;
 }
 }
 pthread_mutex_unlock (&loop->lock);
 if (i == MAX_FDS)
 return gpg_error (GPG_ERR_GENERAL);
 *r_tag = &fds[i];
 return 0;
@ }

void
remove_io_cb (void *tag)
@ {
 struct one_fd *fd = tag;
 struct event_loop *loop = fd->loop;

 pthread_mutex_lock (&loop->lock);
 fd->fd = -1;
 pthread_mutex_unlock (&loop->lock);
@ }

```

```

void
event_io_cb (void *data, gpgme_event_io_t type, void *type_data)
@{
 struct op_result *result = data;

 /* We
 don't support list operations here. */
 if (type == GPGME_EVENT_DONE)
 @{
 result->done = 1;
 result->err = *type_data;
 @}
 @}
@end example

```

The final missing piece is the event loop, which will be presented next. We only support waiting for the success of a single operation.

```

@example
int
do_select (struct event_loop *loop)
@{
 fd_set rfds;
 fd_set wfds;
 int i, n;
 int any = 0;
 struct timeval tv;
 struct one_fd *fdlist = loop->fds;

 pthread_mutex_lock (&loop->lock);
 FD_ZERO (&rfds);
 FD_ZERO (&wfds);
 for (i = 0; i < MAX_FDS; i++)
 if (fdlist[i].fd != -1)
 FD_SET (fdlist[i].fd, fdlist[i].dir ? &rfds : &wfds);
 pthread_mutex_unlock (&loop->lock);

 tv.tv_sec = 0;
 tv.tv_usec = 1000;

 do
 @{
 n = select (FD_SETSIZE, &rfds, &wfds, NULL, &tv);
 @}
 while (n < 0 && errno == EINTR);

 if (n < 0)

```

```

return n; /* Error or timeout. */

pthread_mutex_lock (&loop->lock);
for (i = 0; i < MAX_FDS && n; i++)
 @ {
 if (fdlist[i].fd
 != -1)
 @ {
 if (FD_ISSET (fdlist[i].fd, fdlist[i].dir ? &rfd : &wfd))
 @ {
 assert (n);
 n--;
 any = 1;
 /* The I/O callback handler can register/remove callbacks,
 so we have to unlock the file descriptor list. */
 pthread_mutex_unlock (&loop->lock);
 (*fdlist[i].fnc) (fdlist[i].fnc_data, fdlist[i].fd);
 pthread_mutex_lock (&loop->lock);
 @ }
 @ }
 @ }
pthread_mutex_unlock (&loop->lock);
return any;
@ }

void
wait_for_op (struct event_loop *loop, struct op_result *result)
@ {
 int ret;

 do
 @ {
 ret = do_select (loop);
 @ }
 while (ret >= 0 && !result->done);
@ }
@end example

```

The main function shows how to put it all together.

```

@example
int
main (int argc, char *argv[])
@ {
 struct event_loop loop;
 struct op_result result;
 gpgme_ctx_t ctx;
 gpgme_error_t err;

```

```

gpgme_data_t sig, text;
int i;
pthread_mutexattr_t attr;
struct gpgme_io_cbs io_cbs =
@{
 add_io_cb,
 &loop,
 remove_io_cb,
 event_io_cb,
 &result
@};

init_gpgme ();

/* Initialize the loop structure. */

/* The mutex must be recursive, since remove_io_cb (which acquires a
 lock) can be called while holding a lock acquired in do_select. */
pthread_mutexattr_init (&attr);
pthread_mutexattr_settype (&attr, PTHREAD_MUTEX_RECURSIVE);
pthread_mutex_init (&loop.lock, &attr);
pthread_mutexattr_destroy (&attr);

for (i = 0; i < MAX_FDS; i++)
 loop.fds[i].fd = -1;

/* Initialize the result structure. */
result.done = 0;

err = gpgme_data_new_from_file (&sig, "signature", 1);
if (!err)
 err = gpgme_data_new_from_file (&text, "text", 1);
if (!err)
 err = gpgme_new (&ctx);
if (!err)
@{
 gpgme_set_io_cbs (ctx, &io_cbs);
 err = gpgme_op_verify_start (ctx, sig, text, NULL);
@}
if (err)
@{
 fprintf (stderr, "gpgme error: %s: %s\n",
 gpgme_strerror (err), gpgme_strerror (err));
 exit (1);

@}

wait_for_op (&loop, &result);

```

```

if (!result.done)
 @ {
 fprintf (stderr, "select error\n");
 exit (1);
 @ }
if (!result.err)
 @ {
 fprintf (stderr, "verification failed: %s: %s\n",
 gpgme_strerror (result.err), gpgme_strerror (result.err));
 exit (1);
 @ }
/* Evaluate verify result. */
@dots { }
return 0;
@ }
@end example

```

@node I/O Callback Example GTK+
@subsection I/O Callback Example GTK+
@index GTK+, using @acronym{GPGME} with

```

The I/O callback interface can be used to integrate @acronym{GPGME} with the GTK+ event loop. The following code snippets shows how this can be done using the appropriate register and remove I/O callback functions. In this example, the private data of the register I/O callback function is unused. The event notifications is missing because it does not require any GTK+ specific setup.

```

@example
#include <gtk/gtk.h>

struct my_gpgme_io_cb
@ {
 gpgme_io_cb_t fnc;
 void *fnc_data;
 guint input_handler_id
@ };

void
my_gpgme_io_cb
(gpointer data, gint source, GdkInputCondition condition)
@ {
 struct my_gpgme_io_cb *iocb = data;
 (*(iocb->fnc)) (iocb->data, source);
@ }

void

```

```

my_gpgme_remove_io_cb (void *data)
@{
 struct my_gpgme_io_cb *iocb = data;
 gtk_input_remove (data->input_handler_id);
@}

void
my_gpgme_register_io_callback (void *data, int fd, int dir, gpgme_io_cb_t fnc,
 void *fnc_data, void **tag)
@{
 struct my_gpgme_io_cb *iocb = g_malloc (sizeof (struct my_gpgme_io_cb));
 iocb->fnc = fnc;
 iocb->data = fnc_data;
 iocb->input_handler_id = gtk_input_add_full (fd, dir
 ? GDK_INPUT_READ
 : GDK_INPUT_WRITE,
 my_gpgme_io_callback,
 0, iocb, NULL);

 *tag = iocb;
 return 0;
@}
@end example

```

```

@node I/O Callback Example GDK
@subsection I/O Callback Example
GDK
@cindex GDK, using @acronym{GPGME} with

```

The I/O callback interface can also be used to integrate @acronym{GPGME} with the GDK event loop. The following code snippets shows how this can be done using the appropriate register and remove I/O callback functions. In this example, the private data of the register I/O callback function is unused. The event notifications is missing because it does not require any GDK specific setup.

It is very similar to the GTK+ example in the previous section.

```

@example
#include <gdk/gdk.h>

struct my_gpgme_io_cb
@{
 gpgme_io_cb_t fnc;
 void *fnc_data;
 gint tag;
@};

```

```

void
my_gpgme_io_cb (gpointer data, gint source, GdkInputCondition condition)
@{
 struct my_gpgme_io_cb *iocb = data;
 (*(iocb->fnc)) (iocb->data, source);
@}

```

```

void
my_gpgme_remove_io_cb (void *data)
@{
 struct my_gpgme_io_cb *iocb = data;
 gdk_input_remove (data->tag);
@}

```

```

void
my_gpgme_register_io_callback (void *data, int fd, int dir, gpgme_io_cb_t fnc,

```

```

 void *fnc_data, void **tag)
@{
 struct my_gpgme_io_cb *iocb = g_malloc (sizeof (struct my_gpgme_io_cb));
 iocb->fnc = fnc;
 iocb->data = fnc_data;
 iocb->tag = gtk_input_add_full (fd, dir ? GDK_INPUT_READ : GDK_INPUT_WRITE,
 my_gpgme_io_callback, iocb, NULL);
 *tag = iocb;
 return 0;
@}
@end example

```

```

@node I/O Callback Example Qt
@subsection I/O Callback Example Qt
@cindex Qt, using @acronym{GPGME} with

```

The I/O callback interface can also be used to integrate @acronym{GPGME} with the Qt event loop. The following code snippets show how this can be done using the appropriate register and remove I/O callback functions. In this example, the private data of the register I/O callback function is unused. The event notifications is missing because it does not require any Qt specific setup.

```

@example
#include <qsocketnotifier.h>
#include <qapplication.h>

```

```

struct IOCB @{
 IOCB(GpgmeIOCb f, void * d, QSocketNotifier * n)

```

@};  
@end example

@node Cancellation  
@subsection Cancellation  
@cindex cryptographic operation, aborting  
@cindex cryptographic operation, cancelling  
@cindex aborting operations  
@cindex cancelling operations

Sometimes you do not want to wait for an operation to finish. @acronym{GPGME} provides two different functions to achieve that. The function @code{gpgme\_cancel} takes effect immediately. When it returns, the operation is effectively canceled. However, it has some limitations and can not be used with synchronous operations. In contrast, the function @code{gpgme\_cancel\_async} can be used with any context and from any thread, but it is not guaranteed to take effect immediately. Instead, cancellation occurs at the next possible time (typically the next time I/O occurs in the target context).

```
@deftypefun gpgme_ctx_t gpgme_cancel (@w{gpgme_ctx_t @var{ctx}})
@since{0.4.5}
```

The function @code{gpgme\_cancel} attempts to cancel a pending operation in the context @var{ctx}. This only works if you use the global event loop or your own event loop.

If you use the global event loop, you must not call @code{gpgme\_wait} during cancellation. After successful cancellation, you can call @code{gpgme\_wait} (optionally waiting on @var{ctx}), and the context @var{ctx} will appear as if it had finished with the error code @code{GPG\_ERR\_CANCEL}.

If you use an external event loop, you must ensure that no I/O callbacks are invoked for this context (for example by halting the event loop). On successful cancellation, all registered I/O callbacks for this context will be unregistered, and a @code{GPGME\_EVENT\_DONE} event with the error code @code{GPG\_ERR\_CANCEL} will be signalled.

The function returns an error code if the cancellation failed (in this case the state of @var{ctx} is not modified).  
@end deftypefun

```
@deftypefun gpgme_ctx_t gpgme_cancel_async (@w{gpgme_ctx_t @var{ctx}})
```

@since{1.1.7}

The function `@code{gpgme_cancel_async}` attempts to cancel a pending operation in the context `@var{ctx}`. This can be called by any thread at any time after starting an operation on the context, but will not take effect immediately. The actual cancellation happens at the next time GPGME processes I/O in that context.

The function returns an error code if the cancellation failed (in this case the state of `@var{ctx}` is not modified).

@end deftypefun

@node Debugging

@appendix How to solve problems

@cindex

debug

@cindex GPGME\_DEBUG

Everyone knows that software often does not do what it should do and thus there is a need to track down problems. This is in particular true for applications using a complex library like `@acronym{GPGME}` and of course also for the library itself. Here we give a few hints on how to solve such problems.

First of all you should make sure that the keys you want to use are installed in the GnuPG engine and are usable. Thus the first test is to run the desired operation using `@command{gpg}` or `@command{gpgsm}` on the command line. If you can't figure out why things don't work, you may use `@acronym{GPGME}`'s built in trace feature. This feature is either enabled using the environment variable `@code{GPGME_DEBUG}` or, if this is not possible, by calling the function `@code{gpgme_set_global_flag}`. The value is the trace level and an optional file name. If no file name is given the trace output is printed to `@code{stderr}`.

@noindent

For example

@smallexample

```
GPGME_DEBUG=9:/home/user/mygpgme.log
```

@end

smallexample

@noindent

(Note that under Windows you use a semicolon in place of the colon to separate the fields.)

A trace level of 9 is pretty verbose and thus you may want to start off with a lower level. The exact definition of the trace levels and the output format may change with any release; you need to check the source code for details. In any case the trace log should be helpful to understand what is going on. Warning: The trace log may reveal sensitive details like passphrases or other data you use in your application. If you are asked to send a log file, make sure that you run your tests only with play data.

@node Deprecated Functions  
@appendix Deprecated Functions  
@cindex deprecated

For backward compatibility @acronym{GPGME} has a number of functions, data types and constants which are deprecated and should not be used anymore. We document here those which are really old to help understanding old code and to allow migration to their modern counterparts.

@strong{Warning:} These interfaces will be removed in a future version of @acronym{GPGME}.

```
@deftypefun void gpgme_key_release (@w{gpgme_key_t @var{key}})
The function @code{gpgme_key_release} is equivalent to
@code{gpgme_key_unref}.
@end deftypefun
```

```
@deftypefun gpgme_error_t gpgme_op_import_ext (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_data_t
@var{keydata}}, @w{int *@var{nr}})
@since{0.3.9}
```

The function @code{gpgme\_op\_import\_ext} is equivalent to:

```
@example
gpgme_error_t err = gpgme_op_import (ctx, keydata);
if (!err)
 @ {
 gpgme_import_result_t result = gpgme_op_import_result (ctx);
 *nr = result->considered;
 @ }
@end example
@end deftypefun
```

```

@defftp {Data type} {gpgme_error_t (*gpgme_edit_cb_t) @
(@w{void *@var{handle}}, @
@w{gpgme_status_code_t @var{status}}, @
@w{const char *@var{args}}, @
@w{int @var{fd}})}
@tindex gpgme_edit_cb_t

```

The @code{gpgme\_edit\_cb\_t} type is the type of functions which @acronym{GPGME} calls if it a key edit operation is on-going. The status code @var{status} and the argument line @var{args} are passed through by @acronym{GPGME} from the crypto engine. The file descriptor @var{fd} is -1 for normal status messages. If @var{status} indicates a command rather than a status message, the response to the command should be written to @var{fd}. The @var{handle} is provided by the user at start of operation.

The function should return @code{GPG\_ERR\_FALSE} if it did not handle the status code, @code{0} for success, or any other error value.

```
@end defftp
```

```

@deftypefun gpgme_error_t gpgme_op_edit (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_key_t @var{key}},
@w{gpgme_edit_cb_t @var{fnc}}, @w{void *@var{handle}}, @w{gpgme_data_t @var{out}})
@since{0.3.9}

```

Note: This function is deprecated, please use @code{gpgme\_op\_interact} instead.

The function @code{gpgme\_op\_edit} processes the key @var{KEY} interactively, using the edit callback function @var{FNC} with the handle @var{HANDLE}. The callback is invoked for every status and command request from the crypto engine. The output of the crypto engine is written to the data object @var{out}.

Note that the protocol between the callback function and the crypto engine is specific to the crypto engine and no further support in implementing this protocol correctly is provided by @acronym{GPGME}.

The function returns the error code @code{GPG\_ERR\_NO\_ERROR} if the edit operation completes successfully, @code{GPG\_ERR\_INV\_VALUE} if @var{ctx} or @var{key} is not a valid pointer, and any error returned by the crypto engine or the edit callback handler.

```
@end deftypefun
```

```

@deftypefun gpgme_error_t gpgme_op_edit_start (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_key_t
@var{key}}, @w{gpgme_edit_cb_t @var{fnc}}, @w{void *@var{handle}}, @w{gpgme_data_t @var{out}})

```

@since{0.3.9}

Note: This function is deprecated, please use  
`gpgme_op_interact_start` instead.

The function `gpgme_op_edit_start` initiates a  
`gpgme_op_edit` operation.

It can be completed by calling  
`gpgme_wait` on the context. [Waiting For Completion](#).

The function returns the error code `GPG_ERR_NO_ERROR` if the  
operation was started successfully, and `GPG_ERR_INV_VALUE` if  
`ctx` or `key` is not a valid pointer.  
@end deffun

```
@deffun gpgme_error_t gpgme_op_card_edit (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_key_t
@var{key}}, @w{gpgme_edit_cb_t @var{fnc}}, @w{void *@var{handle}}, @w{gpgme_data_t @var{out}})
```

Note: This function is deprecated, please use `gpgme_op_interact`  
with the flag `GPGME_INTERACT_CARD` instead.

The function `gpgme_op_card_edit` is analogous to  
`gpgme_op_edit`, but should be used to process the smart card corresponding to the key `key`.  
@end deffun

```
@deffun gpgme_error_t gpgme_op_card_edit_start (@w{gpgme_ctx_t @var{ctx}}, @w{gpgme_key_t
@var{key}}, @w{gpgme_edit_cb_t @var{fnc}}, @w{void *@var{handle}}, @w{gpgme_data_t @var{out}})
```

Note: This function is deprecated,  
please use `gpgme_op_interact_start`  
with the flag `GPGME_INTERACT_CARD` instead.

The function `gpgme_op_card_edit_start` initiates a  
`gpgme_op_card_edit` operation. It can be completed by calling  
`gpgme_wait` on the context. [Waiting For Completion](#).

The function returns the error code `GPG_ERR_NO_ERROR` if the  
operation was started successfully, and `GPG_ERR_INV_VALUE` if  
`ctx` or `key` is not a valid pointer.  
@end deffun

```
@deffun gpgme_error_t gpgme_data_new_with_read_cb (@w{gpgme_data_t *@var{dh}}, @w{int
(*@var{readfunc})} (@w{void *@var{hook}}, @w{char *@var{buffer}}, @w{size_t @var{count}}, @w{size_t
*@var{nread}}), @w{void *@var{hook_value}})
```

The function `gpgme_data_new_with_read_cb` creates a new  
`gpgme_data_t` object and uses the callback function `readfunc`  
to retrieve the data on demand. As the callback function can supply

the data in any way it wants, this is the most flexible data type

`@acronym{GPGME}`

provides. However, it can not be used to write data.

The callback function receives `@var{hook_value}` as its first argument whenever it is invoked. It should return up to `@var{count}` bytes in `@var{buffer}`, and return the number of bytes actually read in `@var{nread}`. It may return `@code{0}` in `@var{nread}` if no data is currently available. To indicate `@code{EOF}` the function should return with an error code of `@code{-1}` and set `@var{nread}` to `@code{0}`. The callback function may support to reset its internal read pointer if it is invoked with `@var{buffer}` and `@var{nread}` being `@code{NULL}` and `@var{count}` being `@code{0}`.

The function returns the error code `@code{GPG_ERR_NO_ERROR}` if the data object was successfully created, `@code{GPG_ERR_INV_VALUE}` if `@var{dh}` or `@var{readfunc}` is not a valid pointer, and `@code{GPG_ERR_ENOMEM}` if not enough memory is available.

`@end deftypefun`

`@deftypefun gpgme_error_t gpgme_data_rewind (@w{gpgme_data_t @var{dh}})`

The function `@code{gpgme_data_rewind}`

is equivalent to:

`@example`

```
return (gpgme_data_seek (dh, 0, SEEK_SET) == -1)
```

```
 ? gpgme_error_from_errno (errno) : 0;
```

`@end example`

`@end deftypefun`

`@deftp {Data type} gpgme_attr_t`

The `@code{gpgme_attr_t}` type is used to specify a key or trust item attribute. The following attributes are defined:

`@table @code`

`@item GPGME_ATTR_KEYID`

This is the key ID of a sub key. It is representable as a string.

`@item GPGME_ATTR_FPR`

This is the fingerprint of a sub key. It is representable as a string.

`@item GPGME_ATTR_ALGO`

This is the crypto algorithm for which the sub key can be used. It is representable as a string and as a number. The numbers correspond to the `@code{enum gcry_pk_algos}` values in the gcrypt library.

`@item GPGME_ATTR_LEN`

This is the key length of a sub key. It is representable as a number.

`@item GPGME_ATTR_CREATED`

This is the timestamp at creation time of a sub key. It is representable as a number.

`@item GPGME_ATTR_EXPIRE`

This is the expiration time of a sub key. It is representable as a number.

`@item GPGME_ATTR_USERID`

This is a user ID. There can be more than one user IDs in a `@var{gpgme_key_t}` object. The first one (with index 0) is the primary user ID. The user ID is representable as a number.

`@item GPGME_ATTR_NAME`

This is the name belonging to a user ID. It is representable as a string.

`@item GPGME_ATTR_EMAIL`

This is the email address belonging to a user ID. It is representable as a string.

`@item GPGME_ATTR_COMMENT`

This is the comment belonging to a user ID. It is representable as a string.

`@item GPGME_ATTR_VALIDITY`

This is the validity belonging to a user ID. It is representable as a string and as a number. See below for a list of available validities.

`@item GPGME_ATTR_UID_REVOKED`

This specifies if a user ID is revoked. It is representable as a number, and is `@code{1}` if the user ID is revoked, and `@code{0}` otherwise.

`@item GPGME_ATTR_UID_INVALID`

This specifies if a user ID is invalid. It is representable as a number, and is `@code{1}` if the user ID is invalid, and `@code{0}` otherwise.

`@item GPGME_ATTR_TYPE`

This returns information about the type of key. For the string function this will either be "PGP" or "X.509". The integer function returns 0 for PGP and 1 for X.509.

@item GPGME\_ATTR\_IS\_SECRET

This specifies if the key is a secret key. It is representable as a number, and is @code{1} if the key is revoked, and @code{0} otherwise.

@item GPGME\_ATTR\_KEY\_REVOKED

This specifies if a sub key is revoked. It is representable as a number, and is @code{1} if the key is revoked, and @code{0} otherwise.

@item GPGME\_ATTR\_KEY\_INVALID

This specifies if a sub key is invalid. It is representable as a number, and is @code{1} if the key is invalid, and @code{0} otherwise.

@item GPGME\_ATTR\_KEY\_EXPIRED

This specifies if a sub key is expired. It is representable as a number, and is @code{1} if the key is expired, and @code{0} otherwise.

@item GPGME\_ATTR\_KEY\_DISABLED

This specifies if a sub key is disabled.

It is representable as a number, and is @code{1} if the key is disabled, and @code{0} otherwise.

@item GPGME\_ATTR\_KEY\_CAPS

This is a description of the capabilities of a sub key. It is representable as a string. The string contains the letter ``e" if the key can be used for encryption, ``s" if the key can be used for signatures, and ``c" if the key can be used for certifications.

@item GPGME\_ATTR\_CAN\_ENCRYPT

This specifies if a sub key can be used for encryption. It is representable as a number, and is @code{1} if the sub key can be used for encryption, and @code{0} otherwise.

@item GPGME\_ATTR\_CAN\_SIGN

This specifies if a sub key can be used to create data signatures. It is representable as a number, and is @code{1} if the sub key can be used for signatures, and @code{0} otherwise.

@item GPGME\_ATTR\_CAN\_CERTIFY

This specifies if a sub key can be used to create key certificates. It is representable as a number, and is @code{1} if the sub key can be used for certifications, and @code{0} otherwise.

@item GPGME\_ATTR\_SERIAL

The X.509 issuer serial attribute of the key. It is representable as a string.

@item GPGME\_ATTR\_ISSUE

The X.509 issuer name attribute of the key. It is representable as a string.

@item GPGME\_ATTR\_CHAINID

The X.509 chain ID can be used to build the certification chain. It is representable as a string.

@end table

@end deftp

```
@deftypefun {const char *} gpgme_key_get_string_attr (@w{gpgme_key_t @var{key}}, @w{gpgme_attr_t @var{what}}, @w{const void *@var{reserved}}, @w{int @var{idx}})
```

The function @code{gpgme\_key\_get\_string\_attr} returns the value of the string-representable attribute @var{what} of key @var{key}. If the attribute is an attribute of a sub key or an user ID, @var{idx} specifies the sub key or user ID of which the attribute value is returned. The argument @var{reserved} is reserved for later use and should be @code{NULL}.

The string returned is only valid as long as the key is valid.

The function returns @code{0}

if an attribute can't be returned as a string, @var{key} is not a valid pointer, @var{idx} out of range, or @var{reserved} not @code{NULL}.

@end deftypefun

```
@deftypefun {unsigned long} gpgme_key_get_ulong_attr (@w{gpgme_key_t @var{key}}, @w{gpgme_attr_t @var{what}}, @w{const void *@var{reserved}}, @w{int @var{idx}})
```

The function @code{gpgme\_key\_get\_ulong\_attr} returns the value of the number-representable attribute @var{what} of key @var{key}. If the attribute is an attribute of a sub key or an user ID, @var{idx} specifies the sub key or user ID of which the attribute value is returned. The argument @var{reserved} is reserved for later use and should be @code{NULL}.

The function returns @code{0} if the attribute can't be returned as a number, @var{key} is not a valid pointer, @var{idx} out of range, or @var{reserved} not @code{NULL}.

@end deftypefun

@c

@c Key Signatures

@c

The signatures on a key are only available if the key was retrieved via a listing operation with the @code{GPGME\_KEYLIST\_MODE\_SIGS}

mode

enabled, because it is expensive to retrieve all signatures of a key.

So, before using the below interfaces to retrieve the signatures on a key, you have to make sure that the key was listed with signatures enabled. One convenient, but blocking, way to do this is to use the function `gpgme_get_key`.

`gpgme_attr_t`

The `gpgme_attr_t` type is used to specify a key signature attribute. The following attributes are defined:

`GPGME_ATTR_KEYID`

`GPGME_ATTR_ALGO`

This is the key ID of the key which was used for the signature. It is representable as a string.

`GPGME_ATTR_CREATED`

This is the crypto algorithm used to create the signature. It is representable as a string and as a number. The numbers correspond to the `gcry_pk_algos` values in the `gcrypt` library.

`GPGME_ATTR_EXPIRE`

This is the timestamp at creation time of the signature. It is representable as a number.

`GPGME_ATTR_USERID`

This is the expiration time of the signature. It is representable as a number.

`GPGME_ATTR_NAME`

This is the user ID associated with the signing key. The user ID is representable as a number.

`GPGME_ATTR_EMAIL`

This is the name belonging to a user ID. It is representable as a string.

`GPGME_ATTR_COMMENT`

This is the email address belonging to a user ID. It is representable as a string.

`GPGME_ATTR_KEY_REVOKED`

This is the comment belonging to a user ID. It is representable as a string.

`GPGME_ATTR_KEY_REVOKED`

This specifies if a key signature is a revocation signature. It is

representable as a number, and is `{1}` if the key is revoked, and `{0}` otherwise.

`@c @item GPGME_ATTR_KEY_EXPIRED`

`@c` This specifies if a key signature is expired. It is representable as `@c` a number, and is `{1}` if the key is revoked, and `{0}` `@c` otherwise.

`@c`

`@item GPGME_ATTR_SIG_CLASS`

This specifies the signature class of a key signature. It is representable as a number. The meaning is specific to the crypto engine.

`@item GPGME_ATTR_SIG_CLASS`

This specifies the signature class of a key signature. It is representable as a number. The meaning is specific to the crypto engine.

`@item GPGME_ATTR_SIG_STATUS`

This is the same value as returned by `{gpgme_get_sig_status}`.

`@end table`

`@end deftp`

`@deftypefun {const char *} gpgme_key_sig_get_string_attr (@w{gpgme_key_t @var{key}}, @w{int @var{uid_idx}}, @w{gpgme_attr_t @var{what}}, @w{const void *@var{reserved}}, @w{int @var{idx}})`

The function `{gpgme_key_sig_get_string_attr}` returns the value of the string-representable attribute `{what}` of the signature `{idx}` on the user ID `{uid_idx}` in the key `{key}`. The argument `{reserved}` is reserved for later use and should be `{NULL}`.

The string returned is only valid as long as the key is valid.

The function returns `{0}` if an attribute can't be returned as a string, `{key}` is not a valid pointer, `{uid_idx}` or `{idx}` out of range, or `{reserved}` not `{NULL}`.

`@end deftypefun`

`@deftypefun {unsigned long} gpgme_key_sig_get_ulong_attr (@w{gpgme_key_t @var{key}}, @w{int @var{uid_idx}}, @w{gpgme_attr_t @var{what}}, @w{const void *@var{reserved}}, @w{int @var{idx}})`

The function `{gpgme_key_sig_get_ulong_attr}` returns the value of the number-representable attribute `{what}` of the signature `{idx}` on the user ID `{uid_idx}` in the key `{key}`. The argument `{reserved}` is reserved for later use and should be `{NULL}`.

The function returns `{0}` if an attribute can't be returned as a string, `@var{key}` is not a valid pointer, `@var{uid_idx}` or `@var{idx}` out of range, or `@var{reserved}` not `{NULL}`.  
@end deftypefun

@defun {Data type} {enum gpgme\_sig\_stat\_t}  
@tindex gpgme\_sig\_stat\_t

The `{gpgme_sig_stat_t}` type holds the result of a signature check, or the combined result of all signatures. The following results are possible:

@table @code

@item GPGME\_SIG\_STAT\_NONE

This status should not occur in normal operation.

@item GPGME\_SIG\_STAT\_GOOD

This status indicates that the signature is valid. For the combined result this status means that all signatures are valid.

@item GPGME\_SIG\_STAT\_GOOD\_EXP

This status indicates that the signature is valid but expired. For the combined result this status means that all signatures are valid and expired.

@item GPGME\_SIG\_STAT\_GOOD\_EXPKEY

This status indicates that the signature is valid but the key used to verify the signature has expired. For the combined result this status means that all signatures are valid and all keys are expired.

@item GPGME\_SIG\_STAT\_BAD

This status indicates that the signature is invalid. For the combined result this status means that all signatures are invalid.

@item GPGME\_SIG\_STAT\_NOKEY

This status indicates that the signature could not be verified due to a missing key. For the combined result this status means that all signatures could not be checked due to missing keys.

@item GPGME\_SIG\_STAT\_NOSIG

This status indicates that the signature data provided was not a real signature.

@item GPGME\_SIG\_STAT\_ERROR

This status indicates that there was some other error which prevented the signature verification.

@item GPGME\_SIG\_STAT\_DIFF

For the combined result this status means that at least two signatures have a different status. You can get each key's status with

@code{gpgme\_get\_sig\_status}.

@end table

@end deftp

```
@deftypefun {const char *} gpgme_get_sig_status (@w{gpgme_ctx_t @var{ctx}}, @w{int @var{idx}},

;;; FIXME: Add I/O callback interface, for integration with clg.

;;; FIXME: Add gpgme_wait?

;;; Streams
;;; -----
;;;
;;; GPGME uses standard streams. You can define your own streams, or
;;; use the existing file or string streams.
;;;
;;; A stream-spec is either a stream, or a list with a stream as its
;;; first argument followed by keyword parameters: encoding,
;;; file-name.
;;;
;;; FIXME: Eventually, we should provide a class that can be mixed
;;; into stream classes and which provides accessors for encoding and
;;; file-names. This interface
 should be provided in addition to the
;;; above sleazy interface, because the sleazy interface is easier to
;;; use (less typing), and is quite sufficient in a number of cases.
;;;
;;; For best results, streams with element type (unsigned-byte 8)
;;; should be used. Character streams may work if armor mode is used.

;;; Do we need to provide access to GPGME data objects through streams
;;; as well? It seems to me that specific optimizations, like
;;; directly writing to file descriptors, is better done by extending

```

;;; the sleazy syntax (stream-spec) instead of customized streams.  
;;; Customized streams do buffering, and this may mess up things. Mmh.

```

\* Overview

:PROPERTIES:

:CUSTOM\_ID: overview

:END:

```
| Version: | 0.0.1 |
| GPGME Version: | 1.13.0 |
| Author: | Ben McGinnes <ben@gnupg.org> |
| Author GPG Key: | DB4724E6FA4286C92B4E55C4321E4E2373590E5D |
| Language: | Australian English, British English |
| xml:lang: | en-AU, en-GB, en |
```

The GPGME Python bindings passed through many hands and numerous phases before, after a fifteen year journey, coming full circle to return to the source. This is a short explanation of that journey.

\*\* In the beginning

:PROPERTIES:

:CUSTOM\_ID: in-the-beginning

:END:

In 2002 John Goerzen released PyME; Python bindings for the GPGME module which utilised the current release of Python of the time and SWIG.<sup>[fn:1]</sup> Shortly after creating it and ensuring it worked he stopped supporting it, though he left his work available on his Gopher site.

\*\* Keeping the flame alive

:PROPERTIES:

:CUSTOM\_ID: keeping-the-flame-alive

:END:

A couple of years later the project was picked up by Igor Belyi and actively developed and maintained by him from 2004 to 2008. Igor's whereabouts at the time of this document's creation are unknown, but the current authors do hope he is well. We're assuming (or hoping) that life did what life does and made continuing untenable.

\*\* Passing the torch

:PROPERTIES:

:CUSTOM\_ID: passing-the-torch

:END:

In 2014 Martin Albrecht wanted to patch a bug in the PyME code and discovered the absence of Igor. Following a discussion on the PyME mailing list he

became the new maintainer for PyME, releasing

version 0.9.0 in May of that year. He remains the maintainer of the original PyME release in Python 2.6 and 2.7 (available via PyPI).

\*\* Coming full circle

:PROPERTIES:

:CUSTOM\_ID: ouroboros

:END:

In 2015 Ben McGinnes approached Martin about a Python 3 version, while investigating how complex a task this would be the task ended up being completed. A subsequent discussion with Werner Koch led to the decision to fold the Python 3 port back into the original GPGME release in the languages subdirectory for non-C bindings under the module name of =pyme3=.

In 2016 this PyME module was integrated back into the GPGME project by Justus Winter. During the course of this work Justus adjusted the port to restore limited support for Python 2, but not as many minor point releases as the original PyME package supports. During the course of this integration the package was renamed to more accurately reflect its status as a component of GPGME. The =pyme3= module was renamed to =gpg= and adopted by the upstream GnuPG team.

In 2017 Justus departed G10code and the GnuPG team. Following this Ben returned to maintain of gpgme Python bindings and continue building them from that point.

\* Relics of the past

:PROPERTIES:

:CUSTOM\_ID: relics-past

:END:

There are a few things, in addition to code specific factors, such as SWIG itself, which are worth noting here.

\*\* The Annoyances of Git

:PROPERTIES:

:CUSTOM\_ID: the-annoyances-of-git

:END:

As anyone who has ever worked with git knows, submodules are a horrible way to deal with pretty much anything. In the interests of avoiding migraines, that was skipped with addition of the PyME code to GPGME.

Instead the files were added to a subdirectory of the =lang/= directory, along with a copy of the entire git log up to that point as a separate file within the =lang/python/docs/= directory.[fn:2]

As the log for PyME is nearly 100KB and the log for GPGME is approximately 1MB, this would cause considerable bloat, as well as some confusion, should the two be merged.

Hence the unfortunate, but necessary, step to simply move the files. A regular repository version has been maintained should it be possible to implement this better in the future.

\*\* The Perils of PyPI

:PROPERTIES:

:CUSTOM\_ID: the-perils-of-pypi

:END:

The early port of the Python 2 =pyme= module as =pyme3= was never added to PyPI while the focus remained on development and testing during 2015 and early 2016. Later in 2016, however, when Justus completed his major integration work and subsequently renamed the module from =pyme3= to =gpg=, some prior releases were also provided through PyPI.

Since these bindings require a matching release of the GPGME libraries in order to function, it was determined that there was little benefit in also providing a copy through PyPI since anyone obtaining the GPGME source code would obtain the Python bindings source code at the same time. Whereas there was the potential to sew confusion amongst Python users installing the module from PyPI, only to discover that without the relevant C files, header files or SWIG compiled binaries, the Python module did them little good.

There are only two files on PyPI which might turn up in a search for this module or a sample of its content:

1. gpg (1.8.0) - Python bindings for GPGME GnuPG cryptography library
2. pyme (0.9.0) - Python support for GPGME GnuPG cryptography library

\*\*\* GPG 180 - Python bindings for GPGME GnuPG cryptography library

```
:PROPERTIES:
:CUSTOM_ID: pypi-gpgme-180
:END:
```

This is the most recent version to reach PyPI and is the version of the official Python bindings which shipped with GPGME 1.8.0. If you have GPGME 1.8.0 installed and /only/ 1.8.0 installed, then it is probably safe to use this copy from PyPI.

As there have been a lot of changes since the release of GPGME 1.8.0, the GnuPG Project recommends not using this version of the module and instead installing the current version of GPGME along with the Python bindings included with that package.

\*\*\* PyME 090 - Python support for GPGME GnuPG cryptography library

```
:PROPERTIES:
:CUSTOM_ID: pypi-gpgme-90
:END:
```

This is the last release of the PyME bindings maintained by Martin Albrecht and is only compatible with Python 2, it will not work with Python 3. This is the version of the software from which the port from Python 2 to Python 3 code was made in 2015.

Users of the more recent Python bindings will recognise numerous points of similarity, but also significant differences. It is likely that the more recent official bindings will feel "more pythonic."

For those using Python 2, there is essentially no harm in using this module, but it may lack a number of more recent features added to GPGME.

\* Footnotes

[fn:1] In all likelihood this would have been Python 2.2 or possibly Python 2.3.

[fn:2] The entire PyME git log and other preceding VCS logs are located in the =gpgme/lang/python/docs/old-commits.log= file.

```
* How to contribute
** No more ChangeLog files
```

Do not modify any of the ChangeLog files in GPGME. Starting on December 1st, 2011 we put change information only in the GIT commit log, and generate a top-level ChangeLog file from logs at "make dist" time. As such, there are strict requirements on the form of the commit log messages. The old ChangeLog files have all be renamed to ChangeLog-2011

```
** Commit log requirements
```

Your commit log should always start with a one-line summary, the second line should be blank, and the remaining lines are usually ChangeLog-style entries for all affected files. However, it's fine -- even recommended -- to write a few lines of prose describing the change, when the summary and ChangeLog entries don't give enough of the big picture. Omit the leading TABs that you're used to seeing in a "real" ChangeLog file, but keep the maximum line length at 72 or smaller, so that the generated ChangeLog lines, each with its leading TAB, will not exceed 80 columns. If you want to add text which shall not be copied to the ChangeLog, separate it by a line

consisting of two dashes at the begin of a line.

Note that `./autogen.sh` installs a git hook to do some basic syntax checking on the commit log message.

Typo fixes and documentation updates don't need a `ChangeLog` entry; thus you would use a commit message like

```
#+begin_example
Fix typo in a comment

--
#+end_example
```

The marker line here is important; without it the first line would appear in the `ChangeLog`.

If you exceptionally need to have longer lines in a commit log you may do this after this scissor line:

```
#+begin_example
----- >8 -----
#+end_example
```

(hash, blank, 24 dashes, blank, scissor, blank, 24 dashes).

Note that such a comment will be removed if the `git commit` option `--cleanup-scissor=` is used.

## \*\* License policy

GPGME is currently licensed under the LGPLv2.1+ with tools and the manual being under the GPLv3+. We may eventually update to a newer version of the licenses or a combination of them. It is thus important, that all contributed code allows for an update of the license; for example we can't accept code under the LGPLv2(only).

If you want to contribute code or documentation to GPGME you are asked to assert that the contribution is in accordance to the "GPGME Developer's Certificate of Origin" as found in the file "DCO". Except for a slight wording change, this DCO is identical to the one used by the Linux kernel. Please take these simple steps:

- Decide which mail address you want to use. Please have your real name in the address and not a pseudonym. Anonymous contributions can only be done if you find a proxy who certifies for you.

- If your employer or school might claim ownership of code written by you; you need to talk to them to make sure that you have the

right to contribute under the DCO.

- Send an OpenPGP signed mail to the gnupg-devel@gnupg.org public mailing list from your mail address. Include a copy of the DCO as found in the official master branch. Insert your name and email address into the DCO in the same way you want to use it later.

Example:

Signed-off-by: Joe R. Hacker <joe@example.org>

If you need it, you may perform simple transformations on the mail address: Replacing "@" by " at " or "." by " dot ".)

- That's it. From now on you only need to add a "Signed-off-by:" line with your name and mail address to the GIT commit message. It is recommended to send the patches using a PGP/MIME signed mail.

#### \*\* Coding standards

Please follow the GNU coding standards. If you are in doubt consult the existing code as an example. Do no re-indent code without a need. If you really need to do it, use a separate commit for such a change.

- C99 syntax should not be used; stick to C90.
- Please do not use C++ `///  
//` style comments.
- Try to fit lines into 80 columns.
- Ignore signed/unsigned pointer mismatches
- No arithmetic on void pointers; cast to `char*` first.

#### \*\* Commit log keywords

- GnuPG-bug-id :: Values are comma or space delimited bug numbers from bug.gnupg.org pertaining to this commit.
- Debian-bug-id :: Same as above but from the Debian bug tracker.
- CVE-id :: CVE id number pertaining to this commit.
- Regression-due-to :: Commit id of the regression fixed by this commit.
- Fixes-commit :: Commit id this commit fixes.
- Reported-by :: Value is a name or mail address of a bug reporte.
- Suggested-by :: Value is a name or mail address of someone how suggested this change.
- Co-authored-by :: Name or mail address of a co-author
- Some-comments-by :: Name or mail address of the author of additional comments (commit log or code).
- Proofread-by :: Sometimes used by translation commits.

- Signed-off-by :: Name or mail address of the developer

\* Debug hints

- Use gpgme-tool for manual tests.

- The envvar GPGME\_DEBUG enables debugging; see debug.[ch] for details.

```

The following are all the past /What's New/ sections for the Python Bindings HOWTO and other documentation.

\*\* What Was New in GPGME 1120

:PROPERTIES:

:CUSTOM\_ID: gpgme-1-12-0

:END:

The most obviously new point for those reading this guide is this section on other new things, but that's hardly important. Not given all the other things which spurred the need for adding this section and its subsections.

\*\*\* New in GPGME 1120

:PROPERTIES:

:CUSTOM\_ID: new-stuff-1-12-0

:END:

There have been quite a number of additions to GPGME and the Python bindings to it since the last release of GPGME with versions 1.11.0 and 1.11.1 in April, 2018.

The bullet points of new additions are:

- an expanded section on [\[\[file:gpgme-python-howto#installation\]\]\[installing\]](#) and [\[\[file:gpgme-python-howto#snafu\]\]\[troubleshooting\]](#) the Python bindings.
- The release of Python 3.7.0; which appears to be working just fine with our bindings, in spite of intermittent reports of problems for many other Python projects with that new release.
- Python 3.7 has been moved to the head of the specified python versions list in the build process.
- In order to fix some other issues, there are certain underlying functions which are more exposed through the [\[\[file:gpgme-python-howto#howto-get-context\]\]\[gpg.Context\(\)\]](#), but ongoing documentation ought to clarify that or otherwise provide the best means of using the bindings. Some additions to `=gpg.core=` and

- the `=Context()`, however, were intended (see below).
- Continuing work in identifying and confirming the cause of oft-reported [\[\[file:gpgme-python-howto#snafu-runtime-not-funtime\]\]](#) [problems installing the Python bindings on Windows].
  - GSOC: Google's Surreptitiously Ordered Conscriptio ... erm ... oh, right; Google's Summer of Code. Though there were two hopeful candidates this year; only one ended up involved with the GnuPG Project directly, the other concentrated on an unrelated third party project with closer ties to one of the GNU/Linux distributions than to the GnuPG Project. Thus the Python bindings benefited from GSOC participant Jacob Adams, who added the `key_import` function; building on prior work by Tobias Mueller.
  - Several new methods functions were added to the `gpg.Context()`, including: [\[\[file:gpgme-python-howto#howto-import-key\]\]](#) [`key_import`], [\[\[file:gpgme-python-howto#howto-export-key\]\]](#) [`key_export`], [\[\[file:gpgme-python-howto#howto-export-public-key\]\]](#) [`key_export_minimal`] and [\[\[file:gpgme-python-howto#howto-export-secret-key\]\]](#) [`key_export_secret`].
  - Importing and exporting examples include versions integrated with Marcel Fest's recently released [\[\[https://github.com/Selfnet/hkp4py\]\]](https://github.com/Selfnet/hkp4py) [HKP for Python] module. Some [\[\[file:gpgme-python-howto#hkp4py\]\]](#) [additional notes on this module] are included at the end of the HOWTO.
  - Instructions for dealing with semi-walled garden implementations like ProtonMail are also included. This is intended to make things a little easier when communicating with users of ProtonMail's services and should not be construed as an endorsement of said service. The GnuPG Project neither favours, nor disfavors ProtonMail and the majority of this deals with interacting with the ProtonMail keyserver.
  - Semi-formalised the location where [\[\[file:gpgme-python-howto#draft-editions\]\]](#) [draft versions] of this HOWTO may periodically be accessible. This is both for the reference of others and testing the publishing of the document itself. Renamed this file at around the same time.
  - The Texinfo documentation build configuration has been replicated from the parent project in order to make to maintain consistency with that project (and actually ship with each release).
  - a reStructuredText (`=.rst=`) version is also generated for Python developers more used to and comfortable with that format as it is the standard Python documentation format and Python developers may wish to use it with Sphinx. Please note that there has been no testing of the reStructuredText version with Sphinx at all. The reST file was generated by the simple expedient of using [\[\[https://pandoc.org/\]\]](https://pandoc.org/) [Pandoc].
  - 
  - Added a new section for [\[\[file:gpgme-python-howto#advanced-use\]\]](#) [advanced or experimental use].
  - Began the advanced use cases with [\[\[file:gpgme-python-howto#cython\]\]](#) [a section] on using the module with [\[\[https://cython.org/\]\]](https://cython.org/) [Cython].
  - Added a number of new scripts to the `=example/howto=` directory; some of which may be in advance of their planned sections of the

HOWTO (and some are just there because it seemed like a good idea at the time).

- Cleaned up a lot of things under the hood.

This is gpgme.info, produced by makeinfo version 6.5 from gpgme.texi.

File: gpgme.info, Node: UI Server Decrypt, Next: UI Server Verify, Prev: UI Server Sign, Up: UI Server Protocol

A.3 UI Server: Decrypt a Message

=====

Decryption may include the verification of OpenPGP messages. This is

due to the often used combined signing/encryption modus of OpenPGP. The client may pass an option to the server to inhibit the signature verification. The following two commands are required to set the input and output file descriptors:

-- Command: INPUT FD=N

Set the file descriptor for the message to be decrypted to N. The message send to the server is either binary encoded or in the case of OpenPGP ASCII armored. For details on the file descriptor, see the description of INPUT in the ENCRYPT section.

-- Command: OUTPUT FD=N

Set the file descriptor to be used for the output. The output is binary encoded. For details on the file descriptor, see the description of INPUT in the ENCRYPT section.

The decryption is started with the command:

-- Command: DECRYPT --protocol=NAME [--no-verify] [--export-session-key]

NAME is the encryption protocol used for the message. For a description of the allowed protocols see the ENCRYPT command.

This argument is mandatory. If the option --no-verify is given, the server

should not try to verify a signature, in case the input

data is an OpenPGP combined message. If the option

--export-session-key is given and the underlying engine knows how to export the session key, it will appear on a status line

File: gpgme.info, Node: UI Server Verify, Next: UI Server Set Input Files, Prev: UI Server Decrypt, Up: UI Server Protocol

#### A.4 UI Server: Verify a Message

=====

The server needs to support the verification of opaque signatures as well as detached signatures. The kind of input sources controls what kind message is to be verified.

-- Command: MESSAGE FD=N

This command is used with detached signatures to set the file descriptor for the signed data to N. The data is binary encoded (used verbatim). For details on the file descriptor, see the description of INPUT in the ENCRYPT section.

-- Command: INPUT FD=N

Set the file descriptor for the opaque message or the signature part

of a detached signature to N. The message send to the server is either binary encoded or in the case of OpenPGP ASCII armored. For details on the file descriptor, see the description of INPUT in the ENCRYPT section.

-- Command: OUTPUT FD=N

Set the file descriptor to be used for the output. The output is binary encoded and only used for opaque signatures. For details on the file descriptor, see the description of INPUT in the ENCRYPT section.

The verification is then started using:

-- Command: VERIFY --protocol=NAME [--silent]

NAME is the signing protocol used for the message. For a description of the allowed protocols see the ENCRYPT command.

This argument is mandatory. Depending on the combination of MESSAGE INPUT and OUTPUT commands, the server needs to select the appropriate verification mode:

MESSAGE and INPUT

This indicates a detached signature. Output data is not applicable.

INPUT

This indicates an opaque signature. As no output command has been given, the server is only required to check the signature.

INPUT and OUTPUT

This indicates an opaque signature. The server shall write the signed data to the file descriptor set by the output command. This data shall even be written if the signatures cant be verified.

With --silent the server shall not display any dialog; this is for example used by the client to get the content of opaque signed messages. The client expects the server to send at least this status information before the final OK response:

-- Status line: SIGSTATUS FLAG DISPLAYSTRING

Returns the status for the signature and a short string explaining the status. Valid values for FLAG are:

none

The message has a signature but it could not not be verified

due to a missing key.

green

The signature is fully valid.

yellow

The signature is valid but additional information was shown regarding the validity of the key.

red

The signature is not valid.

DISPLAYSTRING is a percent-and-plus-encoded string with a short human readable description of the status. For example

```
S SIGSTATUS green Good+signature+from+Keith+Moon+<keith@example.net>
```

Note that this string needs to fit into an Assuan line and should be short enough to be displayed as short one-liner on the clients window. As usual the encoding of this string is UTF-8 and it should be send in its translated form.

The server shall send one status line for every signature found on the message.

File: gpgme.info, Node: UI Server Set Input Files, Next: UI Server Sign/Encrypt Files, Prev: UI Server Verify, Up: UI Server Protocol

#### A.5 UI Server: Specifying the input files to operate on.

=====

All file related UI

server commands operate on a number of input files or directories, specified by one or more FILE commands:

-- Command: FILE [--clear] NAME

Add the file or directory NAME to the list of pathnames to be processed by the server. The parameter NAME must be an absolute path name (including the drive letter) and is percent spaced (in particular, the characters %, = and white space characters are always escaped). If the option --clear is given, the list of files is cleared before adding NAME.

Historical note: The original spec did not define --clear but the keyword --continued after the file name to indicate that more files are to be expected. However, this has never been used and thus removed from the specs.

## A.6 UI Server: Encrypting and signing files.

=====

First,

the input files need to be specified by one or more FILE commands. Afterwards, the actual operation is requested:

-- Command: ENCRYPT\_FILES --nohup

-- Command: SIGN\_FILES --nohup

-- Command: ENCRYPT\_SIGN\_FILES --nohup

Request that the files specified by FILE are encrypted and/or signed. The command selects the default action. The UI server may allow the user to change this default afterwards interactively, and even abort the operation or complete it only on some of the selected files and directories.

What it means to encrypt or sign a file or directory is specific to the preferences of the user, the functionality the UI server provides, and the selected protocol. Typically, for each input file a new file is created under the original filename plus a protocol specific extension (like .gpg or .sig), which contain the encrypted/signed file or a detached signature. For directories, the server may offer multiple options to the user (for example ignore or process recursively).

The ENCRYPT\_SIGN\_FILES command requests a combined sign and encrypt operation. It may not be available for all protocols (for example, it is available for OpenPGP but not for CMS).

The option --nohup is mandatory. It is currently unspecified what should happen if --nohup is not present. Because --nohup is present, the server always returns OK promptly, and completes the operation asynchronously.

## A.7 UI Server: Decrypting and verifying files.

=====

First, the input files need to be specified by one or more FILE commands. Afterwards, the actual operation is requested:

-- Command: DECRYPT\_FILES --nohup  
-- Command: VERIFY\_FILES --nohup  
-- Command: DECRYPT\_VERIFY\_FILES  
--nohup

Request that the files specified by FILE are decrypted and/or verified. The command selects the default action. The UI server may allow the user to change this default afterwards interactively, and even abort the operation or complete it only on some of the selected files and directories.

What it means to decrypt or verify a file or directory is specific to the preferences of the user, the functionality the UI server provides, and the selected protocol. Typically, for decryption, a new file is created for each input file under the original filename minus a protocol specific extension (like .gpg) which contains the original plaintext. For verification a status is displayed for each signed input file, indicating if it is signed, and if yes, if the signature is valid. For files that are signed and encrypted, the VERIFY command transiently decrypts the file to verify the enclosed signature. For directories, the server may offer multiple options to the user (for example ignore or process recursively).

The option --nohup is mandatory. It is currently unspecified what should happen if --nohup is not present. Because --nohup is present, the server always returns OK promptly, and completes the operation asynchronously.

File: gpgme.info, Node: UI Server Import/Export Keys, Next: UI Server Checksum Files, Prev: UI Server Verify/Decrypt Files, Up: UI Server Protocol

#### A.8 UI Server: Managing certificates.

=====

First, the input files need to be specified by one or more FILE commands. Afterwards, the actual operation is requested:

-- Command: IMPORT\_FILES --nohup

Request that the certificates contained in the files specified by FILE are imported into the local certificate databases.

For directories, the server may offer multiple options to the user (for example ignore or process recursively).

The option --nohup is mandatory. It is currently unspecified what should happen if --nohup is not present. Because --nohup

is present, the server always returns OK promptly, and completes the operation asynchronously.

FIXME: It may be nice to support an EXPORT command as well, which is enabled by the context menu of the background of a directory.

File: gpgme.info, Node: UI Server Checksum Files, Next: Miscellaneous UI Server Commands, Prev: UI Server Import/Export Keys, Up: UI Server Protocol

#### A.9 UI Server: Create and verify checksums for files.

=====

First, the input files need to be specified by one or more FILE commands. Afterwards, the actual operation is requested:

-- Command: CHECKSUM\_CREATE\_FILES --nohup  
Request that checksums are created for the files specified by FILE. The choice of checksum algorithm and the destination storage and format for the created checksums depend on the

preferences of the user and the functionality provided by the UI server. For directories, the server may offer multiple options to the user (for example ignore or process recursively).

The option --nohup is mandatory. It is currently unspecified what should happen if --nohup is not present. Because --nohup is present, the server always returns OK promptly, and completes the operation asynchronously.

-- Command: CHECKSUM\_VERIFY\_FILES --nohup  
Request that checksums are created for the files specified by FILE and verified against previously created and stored checksums. The choice of checksum algorithm and the source storage and format for previously created checksums depend on the preferences of the user and the functionality provided by the UI server. For directories, the server may offer multiple options to the user (for example ignore or process recursively).

If the source storage of previously created checksums is available to the user through the Windows shell, this command may also accept such checksum files as FILE arguments. In this case, the UI server should instead verify the checksum of the referenced files as if they were given as INPUT files.

The option --nohup is mandatory. It is currently unspecified what should happen if --nohup is not present. Because --nohup

is present, the server always returns OK promptly, and completes the operation asynchronously.

File: gpgme.info, Node: Miscellaneous UI Server Commands, Prev: UI Server Checksum Files, Up: UI Server Protocol

## A.10 Miscellaneous UI Server Commands

=====

The server needs to implement the following commands which are not related to a specific command:

-- Command: GETINFO WHAT

This is a multi purpose command, commonly used to return a variety of information. The required subcommands as described by the WHAT parameter are:

pid

Return the process id of the server in decimal notation using an Assuan data line.

To allow the server to pop up the windows in the correct relation to the client, the client is advised to tell the server by sending the option:

-- Command option: window-id NUMBER

The NUMBER represents the native window ID of the clients current window. On Windows systems this is a windows handle (HWND) and on X11 systems it is the X Window ID. The number needs to be given as a hexadecimal value so that it is easier to convey pointer values (e.g. HWND).

A client may want to fire up the certificate manager of the server. To do this it uses the Assuan command:

-- Command: START\_KEYMANAGER

The server shall pop up the main window of the key manager (aka certificate manager). The client expects that the key manager is brought into the foreground and that this command immediately returns (does not wait until the key manager has been fully brought up).

A client may want to fire up the configuration dialog of the server. To do this it uses the Assuan command:

-- Command: START\_CONFDIALOG

The server shall pop up its configuration dialog. The client

expects that this dialog is brought into the foreground and that this command immediately returns (i.e. it does not wait until the dialog has been fully brought up).

When doing an operation on a mail, it is useful to let the server know the address of the sender:

-- Command: SENDER [--info] [--protocol=NAME] EMAIL  
EMAIL is the plain ASCII encoded address ("addr-spec" as per RFC-2822) enclosed in angle brackets. The address set with this command is valid until a successful completion of the operation or until a RESET command. A second command overrides the effect of the first one; if EMAIL is not given and --info is not used, the server shall use the default signing key.

If option --info is not given, the server shall also suggest a protocol to use for signing. The client may use this suggested protocol on its own discretion. The same status line as with PREP\_ENCRYPT is used for this.

The option --protocol may be used to give the server a hint on which signing protocol should be preferred.

To allow the UI-server to visually identify a running operation or to associate operations the server MAY support the command:

-- Command: SESSION NUMBER [STRING]  
The NUMBER is an arbitrary value, a server may use to associate simultaneous running sessions. It is a 32 bit unsigned integer with 0 as a special value indicating that no session association shall be done.

If STRING is given, the server may use this as the title of a window or, in the case of an email operation, to extract the senders address. The string may contain spaces; thus no plus-escaping is used.

This command may be used at any time and overrides the effect of the last command. A RESET undoes the effect of this command.

File: gpgme.info, Node: Debugging, Next: Deprecated Functions, Prev: UI Server Protocol, Up: Top

Appendix B How to solve problems

\*\*\*\*\*

Everyone knows that software often does not do what it should do and thus there is a need to track down problems. This is in particular true for applications using a complex library like GPGME and of course also for the library itself. Here we give a few hints on how to solve such problems.

First of all you should make sure that the keys you want to use are installed in the GnuPG engine and are usable. Thus the first test is to run the desired operation using `gpg` or `gpgsm` on the command line. If you can't figure out why things don't work, you may use GPGME's built-in trace feature. This feature is either enabled using the environment variable `GPGME_DEBUG` or, if this is not possible, by calling the function `gpgme_set_global_flag`. The value is the trace level and an optional file name. If no file name is given the trace output is printed to `stderr`.

For example

```
GPGME_DEBUG=9:/home/user/mygpgme.log
```

(Note that under Windows you use a semicolon in place of the colon to separate the fields.)

A trace level of 9 is pretty verbose and thus you may want to start off with a lower level. The exact definition of the trace levels and the output format may change with any release; you need to check the source code for details. In any case the trace log should be helpful to understand what is going on. **Warning:** The trace log may reveal sensitive details like passphrases or other data you use in your application. If you are asked to send a log file, make sure that you run your tests only with play data.

File: [gpgme.info](#), Node: [Deprecated Functions](#), Next: [Library Copying](#), Prev: [Debugging](#), Up: [Top](#)

## Appendix C Deprecated Functions

\*\*\*\*\*

For backward compatibility GPGME has a number of functions, data types and constants which are deprecated and should not be used anymore. We document here those which are really old to help understanding old code and to allow migration to their modern counterparts.

**\*Warning:** These interfaces will be removed in a future version of GPGME.

-- Function: `void gpgme_key_release (gpgme_key_t KEY)`

The function `gpgme_key_release` is equivalent to

gpgme\_key\_unref.

-- Function: gpgme\_error\_t gpgme\_op\_import\_ext (gpgme\_ctx\_t CTX,  
gpgme\_data\_t KEYDATA, int \*NR)  
SINCE: 0.3.9

The function gpgme\_op\_import\_ext is equivalent to:

```
gpgme_error_t err = gpgme_op_import (ctx, keydata);
if (!err)
{
 gpgme_import_result_t result = gpgme_op_import_result (ctx);
 *nr = result->considered;
}
```

-- Data type: gpgme\_error\_t (\*gpgme\_edit\_cb\_t) (void \*HANDLE,  
gpgme\_status\_code\_t STATUS, const char \*ARGS, int FD)

The gpgme\_edit\_cb\_t

type is the type of functions which GPGME

calls if it a key edit operation is on-going. The status code

STATUS and the argument line ARGS are passed through by GPGME from

the crypto engine. The file descriptor FD is -1 for normal status

messages. If STATUS indicates a command rather than a status

message, the response to the command should be written to FD. The

HANDLE is provided by the user at start of operation.

The function should return GPG\_ERR\_FALSE if it did not handle the  
status code, 0 for success, or any other error value.

-- Function: gpgme\_error\_t gpgme\_op\_edit (gpgme\_ctx\_t CTX,  
gpgme\_key\_t KEY, gpgme\_edit\_cb\_t FNC, void \*HANDLE,  
gpgme\_data\_t OUT)  
SINCE: 0.3.9

Note: This function is deprecated, please use gpgme\_op\_interact  
instead.

The function gpgme\_op\_edit processes the key KEY interactively,

using the edit callback function FNC with the handle HANDLE. The

callback is

invoked for every status and command request from the

crypto engine. The output of the crypto engine is written to the

data object OUT.

Note that the protocol between the callback function and the crypto  
engine is specific to the crypto engine and no further support in  
implementing this protocol correctly is provided by GPGME.

The function returns the error code `GPG_ERR_NO_ERROR` if the edit operation completes successfully, `GPG_ERR_INV_VALUE` if `CTX` or `KEY` is not a valid pointer, and any error returned by the crypto engine or the edit callback handler.

-- Function: `gpgme_error_t gpgme_op_edit_start (gpgme_ctx_t CTX, gpgme_key_t KEY, gpgme_edit_cb_t FNC, void *HANDLE, gpgme_data_t OUT)`

SINCE: 0.3.9

Note: This function is deprecated, please use `gpgme_op_interact_start` instead.

The function `gpgme_op_edit_start` initiates a `gpgme_op_edit` operation. It can be completed by calling `gpgme_wait` on the context. \*Note Waiting For Completion::.

The function returns the error code `GPG_ERR_NO_ERROR` if the operation was started successfully, and `GPG_ERR_INV_VALUE` if `CTX` or `KEY` is not a valid pointer.

-- Function: `gpgme_error_t gpgme_op_card_edit (gpgme_ctx_t CTX, gpgme_key_t KEY, gpgme_edit_cb_t FNC, void *HANDLE, gpgme_data_t OUT)`

Note: This function is deprecated, please use `gpgme_op_interact` with the flag `GPGME_INTERACT_CARD` instead.

The function `gpgme_op_card_edit` is analogous to `gpgme_op_edit`, but should be used to process the smart card corresponding to the key `KEY`.

-- Function: `gpgme_error_t gpgme_op_card_edit_start (gpgme_ctx_t CTX, gpgme_key_t KEY, gpgme_edit_cb_t FNC, void *HANDLE, gpgme_data_t OUT)`

Note: This function is deprecated, please use `gpgme_op_interact_start` with the flag `GPGME_INTERACT_CARD` instead.

The function `gpgme_op_card_edit_start` initiates a

`gpgme_op_card_edit` operation. It can be completed by calling `gpgme_wait` on the context. \*Note Waiting For Completion::.

The function returns the error code `GPG_ERR_NO_ERROR` if the operation was started successfully, and `GPG_ERR_INV_VALUE` if `CTX` or `KEY` is not a valid pointer.

-- Function: `gpgme_error_t gpgme_data_new_with_read_cb`  
(`gpgme_data_t *DH`, `int (*READFUNC)` (`void *HOOK`, `char *BUFFER`,  
`size_t COUNT`, `size_t *NREAD`), `void *HOOK_VALUE`)

The function `gpgme_data_new_with_read_cb` creates a new `gpgme_data_t` object and uses the callback function `READFUNC` to retrieve the data on demand. As the callback function can supply the data in any way it wants, this is the most flexible data type GPGME provides. However, it can not be used to write data.

The callback function receives `HOOK_VALUE` as its first argument whenever it is invoked. It should return up to `COUNT` bytes in `BUFFER`, and return the number of bytes

actually read in `NREAD`. It

may return 0 in `NREAD` if no data is currently available. To indicate EOF the function should return with an error code of -1 and set `NREAD` to 0. The callback function may support to reset its internal read pointer if it is invoked with `BUFFER` and `NREAD` being `NULL` and `COUNT` being 0.

The function returns the error code `GPG_ERR_NO_ERROR` if the data object was successfully created, `GPG_ERR_INV_VALUE` if `DH` or `READFUNC` is not a valid pointer, and `GPG_ERR_ENOMEM` if not enough memory is available.

-- Function: `gpgme_error_t gpgme_data_rewind` (`gpgme_data_t DH`)

The function `gpgme_data_rewind` is equivalent to:

```
return (gpgme_data_seek (dh, 0, SEEK_SET) == -1)
? gpgme_error_from_errno (errno) : 0;
```

-- Data type: `gpgme_attr_t`

The `gpgme_attr_t` type is used to specify a key or trust item attribute. The following attributes are defined:

#### `GPGME_ATTR_KEYID`

This is the key ID of a sub key. It is representable as a string.

#### `GPGME_ATTR_FPR`

This is the fingerprint of a sub key. It is representable as a string.

#### `GPGME_ATTR_ALGO`

This is the crypto algorithm for which the sub key can be used. It is representable as a string and as a number. The numbers correspond to the enum `gcry_pk_algos` values in the

gcrypt library.

#### GPGME\_ATTR\_LEN

This is the key length of a sub key. It is representable as a number.

#### GPGME\_ATTR\_CREATED

This is the timestamp at creation time of a sub key. It is representable as a number.

#### GPGME\_ATTR\_EXPIRE

This is the expiration time of a sub key. It is representable as a number.

#### GPGME\_ATTR\_USERID

This is a user ID. There can be more than one user IDs in a GPGME\_KEY\_T object. The first one (with index 0) is the primary user ID. The user ID is representable as a number.

#### GPGME\_ATTR\_NAME

This is the name belonging to a user ID. It is representable as a string.

#### GPGME\_ATTR\_EMAIL

This is the email address belonging to a user ID. It is representable as a string.

#### GPGME\_ATTR\_COMMENT

This is the comment belonging to a user ID. It is representable as a string.

#### GPGME\_ATTR\_VALIDITY

This is the validity belonging to a user ID. It is representable as a string and as a number. See below for a list of available validities.

#### GPGME\_ATTR\_UID\_REVOKED

This specifies if a user ID is revoked. It is representable as a number, and is 1 if the user ID is revoked, and 0 otherwise.

#### GPGME\_ATTR\_UID\_INVALID

This specifies if a user ID is invalid. It is representable as a number, and is 1 if the user ID is invalid, and 0 otherwise.

#### GPGME\_ATTR\_TYPE

This  
returns information about the type of key. For the  
string function this will either be "PGP" or "X.509". The  
integer function returns 0 for PGP and 1 for X.509.

#### GPGME\_ATTR\_IS\_SECRET

This specifies if the key is a secret key. It is  
representable as a number, and is 1 if the key is revoked,  
and 0 otherwise.

#### GPGME\_ATTR\_KEY\_REVOKED

This specifies if a sub key is revoked. It is representable  
as a number, and is 1 if the key is revoked, and 0  
otherwise.

#### GPGME\_ATTR\_KEY\_INVALID

This specifies if a sub key is invalid. It is representable  
as a number, and is 1 if the key is invalid, and 0  
otherwise.

#### GPGME\_ATTR\_KEY\_EXPIRED

This specifies if a sub key is expired. It is representable  
as a number, and is 1 if the key is expired, and 0  
otherwise.

#### GPGME\_ATTR\_KEY\_DISABLED

This specifies if a sub key is disabled. It is  
representable  
as a number, and is 1 if the key is disabled, and 0  
otherwise.

#### GPGME\_ATTR\_KEY\_CAPS

This is a description of the capabilities of a sub key. It is  
representable as a string. The string contains the letter e  
if the key can be used for encryption, s if the key can be  
used for signatures, and c if the key can be used for  
certifications.

#### GPGME\_ATTR\_CAN\_ENCRYPT

This specifies if a sub key can be used for encryption. It is  
representable as a number, and is 1 if the sub key can be  
used for encryption, and 0 otherwise.

#### GPGME\_ATTR\_CAN\_SIGN

This specifies if a sub key can be used to create data  
signatures. It is representable as a number, and is 1 if  
the sub key can be used for signatures, and 0 otherwise.

#### GPGME\_ATTR\_CAN\_CERTIFY

This specifies if a sub key can be used to create key certificates. It is representable as a number, and is 1 if the sub key can be used for certifications, and 0 otherwise.

#### GPGME\_ATTR\_SERIAL

The X.509 issuer serial attribute of the key. It is representable as a string.

#### GPGME\_ATTR\_ISSUE

The X.509 issuer name attribute of the key. It is representable as a string.

#### GPGME\_ATTR\_CHAINID

The X.509 chain ID can be used to build the certification chain. It is representable as a string.

-- Function: `const char * gpgme_key_get_string_attr (gpgme_key_t KEY, gpgme_attr_t WHAT, const void *RESERVED, int IDX)`

The function `gpgme_key_get_string_attr` returns the value of the string-representable attribute `WHAT` of key `KEY`. If the attribute is an attribute of a sub key or an user ID, `IDX` specifies the sub key or user ID of which the attribute value is returned. The argument `RESERVED` is reserved for later use and should be `NULL`.

The string returned is only valid as long as the key is valid.

The function returns 0 if an attribute cant be returned as a string, `KEY` is not a valid pointer, `IDX` out of range, or `RESERVED` not `NULL`.

-- Function: `unsigned long gpgme_key_get_ulong_attr (gpgme_key_t KEY, gpgme_attr_t WHAT, const void *RESERVED, int IDX)`

The function `gpgme_key_get_ulong_attr` returns the value of the number-representable attribute `WHAT` of key `KEY`. If the attribute is an attribute of a sub key or an user ID, `IDX` specifies the sub key or user ID of which the attribute value is returned. The argument `RESERVED` is reserved for later use and should be `NULL`.

The function returns 0 if the attribute cant be returned as a number, `KEY` is not a valid pointer, `IDX` out of range, or `RESERVED` not `NULL`.

The signatures on a key are only available if the key was retrieved via a listing operation with the `GPGME_KEYLIST_MODE_SIGS` mode enabled, because it is expensive to retrieve

all signatures of a key.

So, before using the below interfaces to retrieve the signatures on a key, you have to make sure that the key was listed with signatures enabled. One convenient, but blocking, way to do this is to use the function `gpgme_get_key`.

-- Data type: `gpgme_attr_t`

The `gpgme_attr_t` type is used to specify a key signature attribute. The following attributes are defined:

#### `GPGME_ATTR_KEYID`

This is the key ID of the key which was used for the signature. It is representable as a string.

#### `GPGME_ATTR_ALGO`

This is the crypto algorithm used to create the signature. It is representable as a string and as a number. The numbers correspond to the enum `gcry_pk_algos` values in the `gcrypt` library.

#### `GPGME_ATTR_CREATED`

This is the timestamp at creation time of the signature. It is representable as a number.

#### `GPGME_ATTR_EXPIRE`

This is the expiration time of the signature. It is representable as a number.

#### `GPGME_ATTR_USERID`

This is the user ID associated with the signing key. The user ID is representable as a number.

#### `GPGME_ATTR_NAME`

This is the name belonging to a user ID. It is representable as a string.

#### `GPGME_ATTR_EMAIL`

This is the email address belonging to a user ID. It is representable as a string.

#### `GPGME_ATTR_COMMENT`

This is the comment belonging to a user ID. It is representable as a string.

#### `GPGME_ATTR_KEY_REVOKED`

This specifies if a key signature is a revocation signature.

It is representable as a number, and is 1 if the key is revoked, and 0 otherwise.

#### GPGME\_ATTR\_SIG\_CLASS

This specifies the signature class of a key signature. It is representable as a number. The meaning is specific to the crypto engine.

#### GPGME\_ATTR\_SIG\_CLASS

This specifies the signature class of a key signature. It is representable as a number. The meaning is specific to the crypto engine.

#### GPGME\_ATTR\_SIG\_STATUS

This is the same value as returned by `gpgme_get_sig_status`.

-- Function: `const char * gpgme_key_sig_get_string_attr`  
(`gpgme_key_t KEY`, `int UID_IDX`, `gpgme_attr_t WHAT`,  
`const void *RESERVED`, `int IDX`)

The function `gpgme_key_sig_get_string_attr` returns the value of the string-representable attribute `WHAT` of the signature `IDX` on the user ID `UID_IDX` in the key `KEY`. The argument `RESERVED` is reserved for later use and should be `NULL`.

The string returned is only valid as long as the key is valid.

The function returns 0 if an attribute can't be returned as a string, `KEY` is not a valid pointer, `UID_IDX` or `IDX` out of range, or `RESERVED` not `NULL`.

-- Function: `unsigned long gpgme_key_sig_get_ulong_attr`  
(`gpgme_key_t KEY`, `int UID_IDX`, `gpgme_attr_t`  
`WHAT`,  
`const void *RESERVED`, `int IDX`)

The function `gpgme_key_sig_get_ulong_attr` returns the value of the number-representable attribute `WHAT` of the signature `IDX` on the user ID `UID_IDX` in the key `KEY`. The argument `RESERVED` is reserved for later use and should be `NULL`.

The function returns 0 if an attribute can't be returned as a string, `KEY` is not a valid pointer, `UID_IDX` or `IDX` out of range, or `RESERVED` not `NULL`.

-- Data type: `enum gpgme_sig_stat_t`

The `gpgme_sig_stat_t` type holds the result of a signature check, or the combined result of all signatures. The following results are possible:

#### GPGME\_SIG\_STAT\_NONE

This status should not occur in normal operation.

#### GPGME\_SIG\_STAT\_GOOD

This status indicates that the signature is valid. For the combined result this status means that all signatures are valid.

#### GPGME\_SIG\_STAT\_GOOD\_EXP

This status indicates that  
the signature is valid but expired.

For the combined result this status means that all signatures are valid and expired.

#### GPGME\_SIG\_STAT\_GOOD\_EXPKEY

This status indicates that the signature is valid but the key used to verify the signature has expired. For the combined result this status means that all signatures are valid and all keys are expired.

#### GPGME\_SIG\_STAT\_BAD

This status indicates that the signature is invalid. For the combined result this status means that all signatures are invalid.

#### GPGME\_SIG\_STAT\_NOKEY

This status indicates that the signature could not be verified due to a missing key. For the combined result this status means that all signatures could not be checked due to missing keys.

#### GPGME\_SIG\_STAT\_NOSIG

This status indicates that the signature data provided was not a real signature.

#### GPGME\_SIG\_STAT\_ERROR

This status indicates that there was some other error which prevented the signature verification.

#### GPGME\_SIG\_STAT\_DIFF

For the combined result this status means that at least two signatures have a different status. You can get each keys status with `gpgme_get_sig_status`.

```
-- Function: const char * gpgme_get_sig_status (gpgme_ctx_t CTX,
int IDX, gpgme_sig_stat_t *R_STAT, time_t *R_CREATED)
```

The function `gpgme_get_sig_status` is equivalent to:

```

gpgme_verify_result_t result;
gpgme_signature_t sig;

result = gpgme_op_verify_result (ctx);
sig = result->signatures;

while (sig && idx)
{
 sig = sig->next;
 idx--;
}
if (!sig || idx)
 return NULL;

if (r_stat)
{
 switch (gpg_err_code (sig->status))
 {
case GPG_ERR_NO_ERROR:
 *r_stat = GPGME_SIG_STAT_GOOD;
 break;

case GPG_ERR_BAD_SIGNATURE:
 *r_stat = GPGME_SIG_STAT_BAD;
 break;

case GPG_ERR_NO_PUBKEY:
 *r_stat = GPGME_SIG_STAT_NOKEY;
 break;

case GPG_ERR_NO_DATA:
 *r_stat = GPGME_SIG_STAT_NOSIG;
 break;

case GPG_ERR_SIG_EXPIRED:
 *r_stat = GPGME_SIG_STAT_GOOD_EXP;
 break;

case GPG_ERR_KEY_EXPIRED:
 *r_stat = GPGME_SIG_STAT_GOOD_EXPKEY;
 break;

default:
 *r_stat = GPGME_SIG_STAT_ERROR;
 break;
}
}

```

```
if (r_created)

GNU Lesser General Public License

\*\*\*\*\*

Version 2.1, February 1999

Copyright 1991, 1999 Free Software Foundation, Inc.  
59 Temple Place Suite 330, Boston, MA 02111-1307, USA

Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts  
as the successor of the GNU Library Public License, version 2, hence the  
version number 2.1.]

Preamble

=====

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software typically libraries of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original authors' reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library.

The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the Lesser General Public License because it does `_Less_` to protect the users freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries.

In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the

users freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a work based on the library and a work that uses the library. The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

## GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called this License). Each licensee is addressed as you.

A library means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The Library, below, refers to any such software library or work which has been distributed under these terms. A work based on the Library means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term modification.)

Source code for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a. The modified work must itself be a software library.

b. You

must cause the files modified to carry prominent notices

stating that you changed the files and the date of any change.

c. You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d. If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied

function or table used by this function

must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But

when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a work that uses the Library. Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a work that uses the Library with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a work that uses the library. The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a work that uses the Library uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a work that uses the Library with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a. Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable work that uses the Library, as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)
- b. Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the users computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
- c. Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- d. If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- e. Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the work that uses the Library must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally

accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:
  - a. Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
  - b. Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.
8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.
9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.
10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and any later version, you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY AS IS WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

=====

If

you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library.

It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the copyright line and a pointer to where the full notice is found.

ONE LINE TO GIVE THE LIBRARY'S NAME AND AN IDEA OF WHAT IT DOES.

Copyright (C) YEAR NAME OF AUTHOR

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307, USA.

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a copyright disclaimer for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

SIGNATURE OF TY COON, 1 April 1990

## GNU General Public License

\*\*\*\*\*

Version 3, 29 June 2007

Copyright 2007 Free Software Foundation, Inc. <<https://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

### Preamble

=====

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know

their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers and authors protection, the GPL clearly explains that there is no warranty for this free software. For both users and authors sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

## TERMS AND CONDITIONS

### 0. Definitions.

This License refers to version 3 of the GNU General Public License.

Copyright also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

The Program refers to any copyrightable work licensed under this License. Each licensee is addressed as you. Licensees and recipients may be individuals or organizations.

To modify a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a modified version of the earlier work or a work based on the earlier work.

A covered work means either the unmodified Program or a work based on the Program.

To propagate a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To convey a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays Appropriate Legal Notices to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

#### 1. Source Code.

The source code for a work means the preferred form of the work for making modifications to it. Object code means any non-source form of a work.

A Standard Interface means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The System Libraries of an executable work include anything, other than the work as a whole, that (a) is included in the normal

form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A Major Component, in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The Corresponding Source for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the works System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

## 2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you,

or provide you with facilities for running those works, provided that you comply with the terms of this

License in conveying all

material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

### 3. Protecting Users Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures

to the extent such

circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the works users, your or third parties legal rights to forbid circumvention of technological measures.

### 4. Conveying Verbatim Copies.

You may convey verbatim copies of the Programs source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

### 5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the

terms of section 4, provided that you also meet all of these conditions:

- a. The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b. The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to keep intact all notices.
- c. You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This

License

gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

- d. If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an aggregate if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilations users beyond what the individual works permit.

Inclusion of a covered work in an aggregate does not cause this License

to apply to the other parts of the aggregate.

## 6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

- a. Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b. Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for

all the

software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c. Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d. Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy

the Corresponding Source along with the object code.

If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e. Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A User Product is either (1) a consumer product, which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for

incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, normally used refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

#### Installation Information for a User Product

means any methods,

procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

#### 7. Additional Terms.

#### Additional

permissions are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a. Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b. Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c. Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d. Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e. Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f. Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered further restrictions within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

## 8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

## 9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

## 10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An entity transaction is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

## 11. Patents.

A contributor is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based.

The work thus licensed is called the contributors contributor version.

A contributors essential patent claims are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, control includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributors essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a patent license is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To grant such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. Knowingly relying means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipients use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the

patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is discriminatory if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

#### 12. No Surrender of Others Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

#### 13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

#### 14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU

General Public License or any later version applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

#### 15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM AS IS WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

#### 16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA

BEING RENDERED INACCURATE OR LOSSES  
SUSTAINED BY YOU OR THIRD  
PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER  
PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF  
THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided  
above cannot be given local legal effect according to their terms,  
reviewing courts shall apply local law that most closely  
approximates an absolute waiver of all civil liability in  
connection with the Program, unless a warranty or assumption of  
liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

=====

If you develop a new program, and you want it to be of the greatest  
possible use to the public, the best way to achieve this is to make it  
free software which everyone can redistribute and change under  
these  
terms.

To do so, attach the following notices to the program. It is safest  
to attach them to the start of each source file to most effectively  
state the exclusion of warranty; and each file should have at least the  
copyright line and a pointer to where the full notice is found.

ONE LINE TO GIVE THE PROGRAM'S NAME AND A BRIEF IDEA OF WHAT IT DOES.  
Copyright (C) YEAR NAME OF AUTHOR

This program is free software: you can redistribute it and/or modify  
it under the terms of the GNU General Public License as published by  
the Free Software Foundation, either version 3 of the License, or (at  
your option) any later version.

This program is distributed in the hope that it will be useful, but  
WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU  
General Public License for more details.

You should have received a copy of the GNU General Public License

along with this program. If not, see <<https://www.gnu.org/licenses/>>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
PROGRAM Copyright (C) YEAR NAME OF AUTHOR
This program comes with ABSOLUTELY NO WARRANTY; for details
type show w. This is free software, and you are
welcome to redistribute it under certain conditions;
type show c for details.
```

The hypothetical commands show w and show c should show the appropriate parts of the General Public License. Of course, your programs commands might be different; for a GUI interface, you would use an about box.

You should also get your employer (if you work as a programmer) or school, if any, to sign a copyright disclaimer for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <<https://www.gnu.org/licenses/>>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <<https://www.gnu.org/philosophy/why-not-lgpl.html>>.

\* Maintenance Mode from 2019

:PROPERTIES:

:CUSTOM\_ID: maintenance-mode

:END:

```
| Version: | 0.0.1 |
| GPGME Version: | 1.13.0 |
| Author: | Ben McGinnes <ben@gnupg.org> |
| Author GPG Key: | DB4724E6FA4286C92B4E55C4321E4E2373590E5D |
| Language: | Australian English, British English |
| xml:lang: | en-AU, en-GB, en |
```

From the beginning of 2019 the Python bindings to GPGME will enter maintenance mode, meaning that new features will not be added and only bug fixes and security fixes will be made.

This also means that documentation beyond that existing at the end of 2018 will not be developed further except to correct errors.

Though use of these bindings appears to have been quite well received, there has been no indication of what demand there is, if any for either financial backing of the current Python bindings development or support contracts with g10code GmbH citing the necessity of including the bindings.

\*\* Maintainer from 2019 onward

:PROPERTIES:

:CUSTOM\_ID: maintenance-mode-bm

:END:

How does this affect the position of GnuPG Python Bindings Maintainer?

Well, I will remain as maintainer of the bindings; but without funding for that position, the amount of time I will be able to dedicate solely to this task will be limited and reduced to volunteered time. As with all volunteered time and effort in free software projects, this will be subject to numerous external imperatives.

\*\* Using the Python Bindings from 2019 and beyond

:PROPERTIES:

:CUSTOM\_ID:

maintenance-mode-blade-runner

:END:

For most, if not all, Python developers using these bindings; they

will continue to just work the same as they always have. Expansions of GPGME itself are usually handled by SWIG with the existing code and thus bindings are generated properly when the bindings are installed alongside GPGME and when the latter is built from source.

In the rare circumstances where that is not enough to address some new addition to GPGME, then that is a bug and thus subject to the maintenance mode provisions (i.e. it will be fixed following a bug report being raised and your humble author will need to remember where the timesheet template was filed, depending on how many years off such an event is).

All the GPGME functionality will continue to be accessible via the lower level, dynamically generated methods which match the GPGME C documentation. While the more intuitively Pythonic higher level layer already covers the vast majority of functionality people require with key generation, signatures, certifications (key signing), encryption, decryption, verification, validation, trust levels and so on.

Any wanted features lacking in the Python bindings are usually lacking because they are missing from GPGME itself (e.g. revoking keys via the API) and in such cases they are usually deliberately excluded. More discussion of these issues can be found in the archives of the [\[\[https://lists.gnupg.org/mailman/listinfo/gnupg-devel\]\]](https://lists.gnupg.org/mailman/listinfo/gnupg-devel) [gnupg-devel mailing list].

Any features existing in the dynamically generated layer for which people want a specific, higher level function included to make it more Pythonic (e.g. to avoid needing to learn or memorise cryptographic mode values or GnuPG status code numbers), would be a feature request and /not/ a bug.

It is still worthwhile requesting it, but the addition of such a feature would not be guaranteed and provided on a purely volunteer basis. Expediting such a request would require funding that request.

Those with a commercial interest in expediting such a feature request already know how to [\[\[https://gnupg.org/cgi-bin/procdonate.cgi?mode=preset\]\]](https://gnupg.org/cgi-bin/procdonate.cgi?mode=preset) [expedite it] (use the message field to state what feature is being requested).

```
** Documentation formats
:PROPERTIES:
:CUSTOM_ID: docs
:END:
```

The documentation has been written in Org mode for GNU Emacs, with both Texinfo and reStructuredText formats generated from that. The Texinfo files are intended for use with the rest of the GnuPG documentation; while the reStructuredText files are intended for use with Docutils and Sphinx, as with other Python projects.

\*\*\* Cautionary Notes regarding Sphinx and EPUB

```
:PROPERTIES:
:CUSTOM_ID: sphinx-made-epubs-suck
:END:
```

Though Python's Docutils in conjunction with Sphinx is capable of generating some very useful HTML sites, as proven by [\[https://readthedocs.org/\]](https://readthedocs.org/)[\[Read the Docs\]](#) and the [\[https://docs.python.org/\]](https://docs.python.org/)[\[Python documentation\]](#), there are a number of output formats it does not handle well. At the top of the list of things it manages to break so atrociously as to be embarrassing is the [\[http://idpf.org/epub/\]](http://idpf.org/epub/)[\[EPUB 3\]](#) format.

The automatically generated EPUB of the CPython documentation always contains hundreds of validation errors and even the modest amount of documentation here [\[https://files.au.adversary.org.s3.amazonaws.com/crypto/gpgme-python/rst/epub/GPGMEPythonBindings.epub\]](https://files.au.adversary.org.s3.amazonaws.com/crypto/gpgme-python/rst/epub/GPGMEPythonBindings.epub)[\[produced a file\]](#) with approximately thirty validation errors. As the volume of documentation content increases, so does the induced errors. Whereas Texinfo doesn't produce EPUB output at all, nor does Org-mode.

Should there ever be genuine demand for this format, lodge a [\[https://dev.gnupg.org/maniphest/task/edit/form/4/\]](https://dev.gnupg.org/maniphest/task/edit/form/4/)[\[feature request\]](#) case marked for [\[https://dev.gnupg.org/p/BenM/\]](https://dev.gnupg.org/p/BenM/)[\[my\]](#) attention. The means of generating such files flawlessly is already available, but is not yet part of the GnuPG build system. Nor is it integrated with a means of converting Org mode input files to the relevant base format automatically, as can already be done when converting Org to reStructuredText or Org to Texinfo. As a certain amount of work would be required to get it done, there would need to be clear demand for that work to be done. Just GNU it!

2011-12-02 Werner Koch <wk@g10code.com>

NB: ChangeLog files are no longer manually maintained. Starting on December 1st, 2011 we put change information only in the GIT commit log, and generate a top-level ChangeLog file from logs at "make dist". See doc/HACKING for details.

2011-10-25 Marcus Brinkmann <marcus@g10code.com>

\* m4/pth.m4: Removed.

\* configure.ac: Remove check for pth and automake conditional HAVE\_PTH.

2011-06-16 Marcus Brinkmann <marcus@g10code.com>

Release 1.3.1

\* configure.ac: Set LT version to C19/A8/R0.

2011-05-06 Marcus Brinkmann <marcus@g10code.com>

\* Makefile.am (SUBDIRS): Remove complus.

\* configure.ac (AC\_CONFIG\_FILES): Remove complus/Makefile.

(BUILD\_COMPLUS): Remove AM\_CONDITIONAL.

\* complus/: Remove very old and stale component.

\* acinclude.m4 (GNUPG\_FIX\_HDR\_VERSION): Remove.

2011-04-14 Werner Koch <wk@g10code.com>

\* configure.ac: Require automake 1.11.

2011-04-06 Werner Koch <wk@g10code.com>

\* autogen.sh (--build-w32):

Support option --build-w64.

\* configure.ac (HAVE\_W64\_SYSTEM): Define.

(INSERT\_\_TYPEDEFS\_FOR\_GPGME\_H): New.

(GPGME\_CONFIG\_HOST): New.

2011-02-02 Marcus Brinkmann <mb@g10code.com>

\* configure.ac (NEED\_LIBASSUAN\_VERSION): Bump to 2.0.2 for system hooks.

2010-12-30 Werner Koch <wk@g10code.com>

\* configure.ac: Support a git revision.

2010-11-03 Werner Koch <wk@g10code.com>

\* configure.ac (AC\_CHECK\_HEADERS): Check for sys/types.h and sys.stat.h.

2010-11-02 Werner Koch <wk@g10code.com>

\* configure.ac (AC\_CHECK\_HEADERS): Check for sys.time.h.

2010-08-19 Werner Koch <wk@g10code.com>

\* configure.ac (AH\_BOTTOM): Define GPG\_ERR\_ENABLE\_ERRNO\_MACROS.

2010-05-12 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Check for setlocale.

2010-05-07 Werner Koch <wk@g10code.com>

\* configure.ac: Change checks to always require libassuan.

2010-05-07 Marcus Brinkmann <marcus@g10code.de>

\* autogen.sh: Update the thing.

\* configure.ac: Check for locale.h.

2010-05-06

Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Detect Windows CE.

(HAVE\_W32CE\_SYSTEM): New symbol and automake conditional.

\* ltmain.sh, m4/libtool.m4: Patch so that it works for Windows CE.

\* configure.ac: Require libgpg-error 1.8.

2010-03-15 Werner Koch <wk@g10code.com>

\* configure.ac (emacs\_local\_vars\_begin)

(emacs\_local\_vars\_read\_only, emacs\_local\_vars\_end): New.

2010-01-22 Werner Koch <wk@g10code.com>

\* autogen.sh (--build-w32): Add --with-libassuan-prefix.

2010-01-11 Marcus Brinkmann <marcus@g10code.de>

Release 1.3.0.

2009-12-22 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Do not use echo -n. Test for \_\_thread.

2009-12-17 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Make largefile check more robust.

2009-12-10 Werner Koch <wk@g10code.com>

\* configure.ac: Check for getgid and getegid.

2009-12-08 Marcus Brinkmann <marcus@g10code.de>

Update to libtool 2.2.6a.

\* configure.ac: Invoke AC\_CONFIG\_MACRO\_DIR.

(AC\_LIBTOOL\_WIN32\_DLL,

AC\_LIBTOOL\_RC): Replace by ...

(LT\_PREREQ, LT\_INIT, LT\_LANG): ... these.

\* config.guess, config.sub, install-sh, ltmain.sh, m4/libtool.m4:

Updated to libtool 2.2.6a.

\* m4/ltoptions.m4, m4/ltsugar.m4, m4/ltversion.m4,

m4/lt~obsolete.m4: New files from libtool 2.2.6a.

2009-11-10 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Activate UIserver if FD passing is enabled and Assuan is available.

2009-10-30 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Check for argp.h and error\_t.

2009-10-26 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (NEED\_GPG\_VERSION\_DEFAULT): Bump to 1.4.0 as 1.3.0 was development versions only.

2009-10-22 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Add support for G13.

2009-10-20 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (AC\_CONFIG\_FILES): Remove assuan/Makefile.

2009-10-20 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Replace internal libassuan by external libassuan.

\* m4/libassuan.m4:

New file.

\* Makefile.am (assuan): Remove variable.

(SUBDIRS): Remove \${assuan}.

\* assuan/: Removed.

2009-06-22 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Add AC\_TYPE\_UINTPTR\_T.

\* assuan/assuan.h [\_ASSUAN\_IN\_GPGME\_BUILD\_ASSUAN]: Declare  
\_gpgme\_io\_connect.

2009-06-18 Marcus Brinkmann <marcus@g10code.de>

Released GPGME 1.2.0.

\* configure.ac (my\_version): Set to 1.2.0.  
(LIBGPGME\_LT\_CURRENT, LIBGPGME\_LT\_AGE): Bump.  
(LIBGPGME\_LT\_REVISION): Reset.

2009-05-05 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Add infrastructure for compile time check of  
\_FILE\_OFFSET\_BITS.

2009-04-19 Moritz <moritz@gnu.org>

\* Makefile.am (DISTCHECK\_CONFIGURE\_FLAGS): Specify --with-gpg.

2009-03-06 Marcus Brinkmann <marcus@g10code.de>

\* assuan/: Update to libassuan SVN 2009-03-06.

2009-01-26 Werner Koch <wk@g10code.com>

\* configure.ac (AC\_CONFIG\_FILES): Add tests/opassuan/Makefile.

2008-12-08 Marcus Brinkmann <marcus@g10code.de>

Release GPGME  
1.1.8.

\* configure.ac: Bump API revision.

2008-11-03 Marcus Brinkmann <marcus@g10code.com>

\* configure.ac: Replace gpgme paths with src.  
\* gpgme: Move to ...  
\* src: ... this new directory.

2008-10-20 Werner Koch <wk@g10code.com>

\* configure.ac (AC\_CONFIG\_FILES): Add gpgme.h.  
(GNUPG\_FIX\_HDR\_VERSION): Remove.

2008-10-17 Marcus Brinkmann <marcus@g10code.com>

Release GPGME 1.1.7.

\* configure.ac (LIBGPGME\_LT\_REVISION): Bump for release.

2008-09-19 Moritz <moritz@gnu.org>

\* configure.ac: Remove bogus "esac".

2008-09-16 Marcus Brinkmann <marcus@g10code.com>

\* configure.ac (\_XOPEN\_SOURCE) [apple-darwin]: Define it.

2008-07-04 Werner Koch <wk@g10code.com>

\* config.guess, config.sub: Update to 2007-11-19. Also update missing et al scripts.

2008-04-01 Werner Koch <wk@g10code.com>

\* configure.ac (AC\_INIT): Fix quoting.

2008-01-30 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Bump required version of automake up to 1.10.

\* autogen.sh: Fix  
aclocal check.

2008-01-04 Marcus Brinkmann <marcus@g10code.de>

Release GPGME 1.1.6.

\* configure.ac: Support gpgconf.

2007-09-27 Marcus Brinkmann <marcus@g10code.de>

\* assuan-pipe-connect.c (pipe\_connect\_gpgme): Do not close process handle here. Use this function also on Unix systems.

\* assuan-pipe-connect.c (pipe\_connect\_gpgme): Fix last change.

\* assuan-pipe-connect.c (pipe\_connect\_gpgme): New function, use it if \_ASSUAN\_IN\_GPGME\_BUILD\_ASSUAN.

2007-09-17 Werner Koch <wk@g10code.com>

\* configure.ac: Use the svn version magic.

2007-09-07 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Check for C++, Qt and support --enable-w32-qt.  
\* m4/pkg.m4: New file.

2007-08-21 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (--enable-w32-glib): Use --enableval, not --withval.

2007-07-16 Marcus Brinkmann <marcus@g10code.de>

\* assuan/assuan-socket.c (\_assuan\_close): Always use close().  
\* assuan/assuan.h (\_gpgme\_io\_close): New prototype.  
(close): New  
macro, define as \_gpgme\_io\_close.

2007-07-13 Marcus Brinkmann <marcus@g10code.de>

\* assuan/assuan-io.c (\_assuan\_simple\_read, \_assuan\_simple\_write):  
Always use read/write (which means \_gpgme\_io\_read and  
\_gpgme\_io\_write).

2007-07-09 Marcus Brinkmann <marcus@g10code.de>

Released 1.1.5.

\* configure.ac (LIBGPGME\_LT\_REVISION): Bump for release.

2007-07-08 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (GPGSM\_DEFAULT) [\*-mingw32\*]: Initialize it.  
(HAVE\_ASSUAN\_H): Set to 1 if we have it.  
(funopen): Use AC\_REPLACE\_FUNCS.  
(USE\_DESCRIPTOR\_PASSING): Define to 1 if we have it. Do not  
define it at all if we don't.  
(NETLIBS) [have\_w32\_system]: Add -lws2\_32.  
(DIRSEP\_C, DIRSEP\_S, EXPSEP\_C, EXPSEP\_S, PATHSEP\_S)  
[HAVE\_DOSISH\_SYSTEM]: Remove definitions.

\* assuan/assuan.h (\_assuan\_funopen): Define to \_gpgme\_funopen.  
\* assuan/funopen.c: Move to ../gpgme/funopen.c.  
\* assuan/Makefile.am (libassuan\_la\_SOURCES): Remove funopen.c.

2007-07-04 Marcus Brinkmann <marcus@g10code.de>

\*

assuan/Makefile.am (INCLUDES): Include \$(top\_srcdir)/gpgme.

\* assuan/assuan.h: Include <ath.h> instead of trying to duplicate the definitions.

\* assuan/: Update files to 2007-07-04 version of assuan.

\* autogen.sh: Use = not == in test.

2007-03-05 Werner Koch <wk@g10code.com>

Released 1.1.4.

\* configure.ac (LIBGPGME\_LT\_REVISION): Bump for release.

\* autogen.sh: New option --force.

2007-01-29 Marcus Brinkmann <marcus@g10code.de>

Released 1.1.3.

\* configure.ac (LIBGPGME\_LT\_REVISION): Bump for release.

2007-01-26 Werner Koch <wk@g10code.com>

\* configure.ac: Changed gpg and gpgsm version checks to work with arbitrary names of the gpg binary. New option --disable-gpg-test and --disable-gpgsm-test.

2007-01-09 Werner Koch <wk@g10code.com>

\* configure.ac (NEED\_GPG\_VERSION, NEED\_GPGSM\_VERSION): Must define after it may have been changed by an option.

2007-01-08 Werner Koch <wk@g10code.com>

\* configure.ac: Require gpg-error 1.4 due to the use of gpg\_error\_from\_syserror.  
(HAVE\_ASSUAN\_H):  
New.

2007-01-05 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Add options --with-gpg-version and --with-gpgsm-version to allow overriding the minimum version requirements.

2006-12-17 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Fix two typos in last change.

2006-12-03 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Use descriptor passing only if --enable-fd-passing is provided.

\* configure.ac: Add check for use of descriptor passing.

2006-11-29 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (NEED\_GPG\_VERSION): Bump to 1.3.0.

2006-09-19 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Turn stpcpy into a replacement function.  
Check for unistd.h and add setenv as replacement function.

2006-07-29 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Check for network libraries and set NETLIBS.

2006-07-06 Marcus Brinkmann <marcus@g10code.de>

\* lang, lang/cl: New subdirectories.

\*

lang/Makefile.am, lang/README: New files.

\* configure.ac (AC\_CONFIG\_FILES): Add lang/Makefile,  
lang/cl/Makefile and lang/cl/gpgme.asd.

\* Makefile.am (SUBDIRS): Add lang.

2006-03-02 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (LIBGPGME\_LT\_REVISION): Bump for release.

2006-02-22 Marcus Brinkmann <marcus@g10code.de>

Released 1.1.1.

\* configure.ac (LIBGPGME\_LT\_CURRENT, LIBGPGME\_LT\_AGE): Bump for release.

(LIBGPGME\_LT\_REVISION): Reset to 0 for release.

2006-01-05 Werner Koch <wk@g10code.com>

\* configure.ac: Test for inline feature.

(AH\_BOTTOM): New to define the pure attribute.

2006-01-03 Werner Koch <wk@g10code.com>

\* configure.ac: Append SVN revision to the version.

2005-11-18 Werner Koch <wk@g10code.com>

\* configure.ac (BUILD\_REVISION): New.

2005-11-17 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Add support for --enable-w32-glib (disabled by default). Invoke AM\_PATH\_GLIB\_2\_0.

2005-11-16 Werner Koch <wk@g10code.com>

\* configure.ac  
(CFLAGS) [W32]: Make sure that -mms-bitfields are used.

2005-11-15 Werner Koch <wk@g10code.com>

\* configure.ac: Create BUILD\_FILEVERSION from SVN Revision.

\* autogen.sh [W32]: Build shared and static versions of the library.

2005-10-20 Marcus Brinkmann <marcus@g10code.de>

\* w32-dll/ChangeLog, w32-dll/build-dll, w32-dll/gpgme.def: Remove files.

\* configure.ac: Instead checking for windres and dlltool, invoke AC\_LIBTOOL\_WIN32\_DLL and AC\_LIBTOOL\_RC.

\* src/Makefile.am [HAVE\_W32\_SYSTEM]: Use libtool, which simplifies the rules.

2005-10-01 Marcus Brinkmann <marcus@g10code.de>

Released 1.1.0.

\* configure.ac (LIBGPGME\_LT\_CURRENT, LIBGPGME\_LT\_AGE): Bump for release.

(LIBGPGME\_LT\_REVISION): Reset to 0 for release.

2005-09-12 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (HAVE\_PTH): Don't add \$PTH\_CFLAGS to \$CFLAGS here.

2005-08-26 Werner Koch <wk@g10code.com>

\* configure.ac (SEPCONSTANTS): New to define DIRSEP\_C et al.

2005-08-19 Werner Koch <wk@g10code.com>

\*

configure.ac [W32]: Create values for versioninfo.rc and list substitute versioninfo.rc.

\* configure.ac: Define ENABLE\_GPGSM.

2005-08-08 Werner Koch <wk@g10code.com>

\* configure.ac (stpcpy): Changed from replace to test.

2005-03-24 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (AH\_BOTTOM): Removed.

2005-03-09 Werner Koch <wk@g10code.com>

\* acinclude.m4 (GNUPG\_CHECK\_VA\_COPY): Assume no when cross-compiling.

\* Makefile.am (EXTRA\_DIST): Include autogen.sh

\* autogen.sh: Added the usual code to build for W32 (--build-w32).

\* configure.ac: Fixed the mingw32 host string, removed OS/2 stuff.

(HAVE\_DRIVE\_LETTERS): Removed.

(HAVE\_W32\_SYSTEM): Added.

(AC\_GNU\_SOURCE): New to replace the identical AH\_VERBATIM.

(AH\_BOTTOM): Added.

2004-12-28 Werner Koch <wk@g10code.com>

Released 1.0.2.

\* Makefile.am (AUTOMAKE\_OPTIONS): Build bzip 2 version.

(ACLOCAL\_AMFLAGS): Add -I m4.

\* configure.ac: Require automake 1.9.3 and autoconf 2.59.

\* acinclude.m4:

Changed quoting for automake 1.9.

\* README: Use SHA1 instead of MD5.

2004-12-11 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Replace ttyname\_r if it doesn't exist (and warn in that case).

2004-12-07 Marcus Brinkmann <marcus@g10code.de>

- \* README: Refer to COPYING.LESSER and "each file" instead of COPYING.
- \* COPYING.LESSER: New file.
- \* gpgme.spec.in (%doc): Add COPYING.LESSER.
- \* acinclude.m4, configure.ac, Makefile.am: Change license to LGPL 2.1 or later.
- \* TODO: Add copyright notice.
- \* README.CVS: Likewise.

\* configure.ac (GPGSM\_VERSION): Fix filter to get it.

2004-10-22 Marcus Brinkmann <marcus@g10code.de>

Released 1.0.1.

- \* configure.ac (LIBGPGME\_LT\_REVISION): Bump up to 2.  
(AC\_INIT): Set version to 1.0.1.
- \* configure.ac: Set HAVE\_GPGSM to true only if \$GPGSM is not "no".

2004-09-30 Marcus Brinkmann <marcus@g10code.de>

Released 1.0.0.

- \* configure.ac (LIBGPGME\_LT\_REVISION): Bump up to 1.  
(AC\_INIT): Set version to 1.0.0.
- \* Makefile.am  
(EXTRA\_DIST): Remove README-alpha.
- \* README-alpha: Remove file.

2004-09-17 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Disable AC\_CONFIG\_MACRO\_DIR for now.

2004-09-14 Marcus Brinkmann <marcus@g10code.de>

- \* configure.ac: Improve diagnostics with version check.
- \* configure.ac: Print diagnostics about found thread libraries at the end. Check for the versions of GPG and GPGSM and print the found versions at the end.  
(HAVE\_GPGSM): Do not require GPGSM to exist and be readable.  
(AC\_CONFIG\_MACRO\_DIR): Invoke with argument m4.
- \* acinclude.m4: Add copyright notice.

(jm\_GLIBC21, AM\_PATH\_GPG\_ERROR, \_AC\_PTH\_ERROR, \_AC\_PTH\_VERBOSE, AC\_CHECK\_PTH): Removed.

2004-06-23 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Check for <sys/uiio.h>.

2004-06-08 Marcus Brinkmann <marcus@g10code.de>

Released 0.9.0.

\* configure.ac (AC\_INIT): Set version number to 0.9.0.  
(LIBGPGME\_LT\_CURRENT, LIBGPGME\_LT\_AGE): Bump up by one.  
(LIBGPGME\_LT\_REVISION): Reset to zero.

2004-05-21

Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (GPGME\_CONFIG\_API\_VERSION): New variable, substitute it.

2004-04-29 Marcus Brinkmann <marcus@g10code.de>

Released 0.4.7.

\* configure.ac (LIBGPGME\_LT\_REVISION): Bump it up.

2004-04-02 Thomas Schwinge <schwinge@nic-nac-project.de>

\* autogen.sh: Added ACLOCAL\_FLAGS.

2004-04-06 Werner Koch <wk@gnupg.org>

Released 0.4.6.

\* config.guess, config.sub, ltmain.sh: Updated to those from libtools 1.5.4.

2004-03-07 Marcus Brinkmann <marcus@g10code.de>

Released 0.4.5.

\* configure.ac (NEED\_GPGSM\_VERSION): Bump up to 1.9.6.

\* Makefile.am (EXTRA\_DIST): Remove autogen.sh and README.CVS.

2004-02-18 Werner Koch <wk@gnupg.org>

\* configure.ac: Make the check for funopen fail with just a warning.

2004-02-11 Werner Koch <wk@gnupg.org>

\* autogen.sh (check\_version): Removed bashism and simplified.

2004-02-10 Werner Koch <wk@gnupg.org>

\* configure.ac: Fixed funopen test change.

2004-02-06 Moritz Schulte  
<mo@g10code.com>

\* configure.ac: Fix funopen replacement mechanism.

2004-01-31 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Add invocation of AC\_SYS\_LARGEFILE, AC\_TYPE\_OFF\_T and AC\_FUNC\_FSEEKO.

2004-01-12 Werner Koch <wk@gnupg.org>

Released 0.4.4.

\* configure.ac: Bumbed LT\_Revision; now at C12/A1/R1.  
(NEED\_GPGSM\_VERSION): Set to 1.9.3.  
(min\_automake\_version): Added.  
\* README.CVS: New.  
\* Makefile.am (EXTRA\_DIST): Added README.CVS.  
\* autogen.sh: Updated.

2003-11-19 Werner Koch <wk@gnupg.org>

\* acinclude.m4: Add AM\_PATH\_GPG\_ERROR.  
\* configure.ac: Check for timegm. Made warning messages more prominent.

2003-10-06 Marcus Brinkmann <marcus@g10code.de>

Released 0.4.3.

\* configure.ac (LIBGPGME\_LT\_CURRENT, LIBGPGME\_LT\_AGE): Bump up by 1.  
(LIBGPGME\_LT\_REVISION): Set to 0.

2003-09-13 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Require libpgp-error 0.5.

\* acinclude.m4: Remove libtool cruft, add jm\_GLIBC21.  
\* configure.ac: Add check for  
getenv\_r, and call jm\_GLIBC21.  
Define HAVE\_THREAD\_SAFE\_GETENV if appropriate.

2003-09-03 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Remove GPGME\_CONFIG\_LIBS and GPGME\_CONFIG\_CFLAGS.

2003-09-02 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Move invocation of AC\_CANONICAL\_HOST up to  
suppress warning by autoconf.

2003-08-30 Robert Schiele <rschiele@uni-mannheim.de>

\* gpgme.spec.in: % {\_infodir}/dir is not packaged,  
remove to prevent checking failure.

2003-08-18 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: If building Assuan, check for funopen and  
fopencookie, and make isascii, putc\_unlocked and memrchr  
replacement functions.  
(AM\_PATH\_GPG\_ERROR): Require 0.3.

2003-07-31 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (AC\_INIT): Bump version to 0.4.3.

2003-07-30 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (LIBGPGME\_LT\_REVISION): Bump up to 1.

Released 0.4.2.

2003-07-08 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac:  
Complain if libgpg-error is not found.

2003-06-22 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (AC\_INIT): Bump version to 0.4.2.

2003-06-06 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (LIBGPGME\_LT\_CURRENT): Bump up to 11.

\* configure.ac: Use AM\_PATH\_GPG\_ERROR.

\* configure.ac: Check for libgpg-error. Define  
GPG\_ERR\_SOURCE\_DEFAULT.

2003-05-26 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (NEED\_GPG\_VERSION): Bump up to 1.2.2.

2003-05-18 Marcus Brinkmann <marcus@g10code.de>

In all files, replace the Gpgme\* type names with the new gpgme\_\*  
type names.

2003-02-01 Marcus Brinkmann <marcus@g10code.de>

\* assuan/: Update files to 2002-11-10 version of assuan.

2003-01-29 Marcus Brinkmann <marcus@g10code.de>

\* bonobo/gpgme.c, bonobo/main.c, bonobo/main.h, bonobo/Makefile,  
bonobo/Makefile.am, bonobo/Makefile.in: Dead files removed.

\* configure.ac: Remove automake conditional BUILD\_BONOBO  
(AC\_CONFIG\_FILES): Remove bonobo/Makefile.

\*

Makefile.am (bonobo): Remove variable.

(SUBDIRS): Remove \${bonobo}.

\* configure.ac: Remove all uses of GNUPG\_CHECK\_TYPEDEF, for byte,  
ushort, ulong, u16 and u32.

\* acinclude.m4 (GNUPG\_CHECK\_TYPEDEF): Remove macro.

2002-12-24 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: New conditional HAVE\_LD\_VERSION\_SCRIPT.  
Call AC\_CANONICAL\_HOST, use host instead target.

2002-12-23 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Bump up to 0.4.1.

Released 0.4.0.

2002-12-23 Marcus Brinkmann <marcus@g10code.de>

\* autogen.sh (automake\_vers): Require 1.7 (really 1.7.1) for the

conditional source distribution bug fix.

2002-12-08 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (LIBGPGME\_LT\_CURRENT): Increase by one.  
(LIBGPGME\_LT\_AGE, LIBGPGME\_LT\_REVISION): Set to 0.

2002-11-28 Marcus Brinkmann <marcus@g10code.de>

\* NEWS: Add note about moving "gpgmeplug" to the "cryptplug" package.  
\* README: Remove instructions related to "gpgmeplug".  
\* configure.ac:  
Remove enable option "gpgmeplug" and automake conditional BUILD\_GPGMEPLUG, as well as the status info about it.  
(GPGMEPLUG): Remove variable.  
\* Makefile.am (gpgmeplug): Remove variable.  
(SUBDIRS): Remove \${gpgmeplug}.  
\* cryptplug.h, gpgme-openpgp.c, gpgmeplug.dox, gpgme-smime.c, Makefile.am, gpgmeplug.c, ChangeLog: Files removed.

2002-11-22 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Disable GPGSM for all dosish systems.

2002-10-12 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Add automake conditional HAVE\_GPGSM.

2002-10-08 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (AC\_INIT): Bump version up to 0.4.0.  
(NEED\_GPG\_VERSION): Bump up to 1.2.0.  
(NEED\_GPGSM\_VERSION): Bump up to 0.9.0.  
\* README: Update version numbers.  
\* NEWS: Start entry for 0.4.0.

2002-09-20 Werner Koch <wk@gnupg.org>

Released 0.3.11.

\* configure.ac: Bump up LIBGPGME\_LT\_REVISION.

\* configure.ac (AC\_CHECK\_HEADERS): Check for sys/select.h.

2002-09-04 Marcus Brinkmann  
<marcus@g10code.de>

\* autogen.sh (autoconf\_vers): Bump up to 2.53 to get the @&t@  
quadrigraph. Always cutting the edge!

2002-09-02 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Create and substitute LTLIBOBS.

2002-09-02 Marcus Brinkmann <marcus@g10code.de>

Released 0.3.10.

\* NEWS: Update for 0.3.9 release.

\* configure.ac: Bump up LIBGPGME\_LT\_REVISION.

2002-08-29 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.spec.in: Changed user name in Wojciech Polak's email  
address from ghostface to polak per request by himself.

2002-08-28 Werner Koch <wk@gnupg.org>

\* acinclude.m4 (GNUPG\_CHECK\_VA\_COPY): New.

\* configure.ac: Use it.

2002-08-23 Werner Koch <wk@gnupg.org>

\* configure.ac (GPGME\_CONFIG\_CFLAGS): Renamed from GPGME\_CFLAGS  
and removed the libpath because it is set by the config script.

2002-08-21 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Bump version number to 0.3.10.

\* NEWS: Add template for development version.

2002-08-21

Marcus Brinkmann <marcus@g10code.de>

Released 0.3.9.

\* NEWS: Update for 0.3.9 release.

\* Makefile.am (EXTRA\_DIST): Add gpgme.spec.in.

2002-08-21 Marcus Brinkmann <marcus@g10code.de>

\* jnlib/argparse.c, jnlib/argparse.h, jnlib/ChangeLog,  
jnlib/dotlock.c, jnlib/dotlock.h, jnlib/libjnlib-config.h,  
jnlib/logging.c, jnlib/logging.h, jnlib/Makefile.am,

jnlib/mischelp.h, jnlib/README, jnlib/stringhelp.c,  
jnlib/stringhelp.h, jnlib/strlist.c, jnlib/strlist.h,  
jnlib/types.h, jnlib/xmalloc.c, jnlib/xmalloc.h: Remove files.

2002-08-21 Marcus Brinkmann <marcus@g10code.de>

- \* Makefile.am (SUBDIRS): Remove jnlib.
- \* configure.ac: Don't check for unsigned short or unsigned long.  
Don't check for memicmp, strlwr, strtoul, memmove, stricmp.  
Make stpcpy a replaced function.  
Don't define HAVE\_JNLIB\_LOGGING.  
Don't generate jnlib/Makefile.

2002-07-02 Werner Koch <wk@gnupg.org>

- \* configure.ac: Bumbed version number to 0.3.9; add a comment on  
when to change it.

- \* gpgme.spec.in:  
New. Contributed by Wojciech Polak.
- \* Makefile.am (dist-hook): New.

- \* AUTHORS: Added Wojciech and bug reporting addresses.

2002-06-25 Werner Koch <wk@gnupg.org>

Released 0.3.8.

- \* configure.ac: Bumbed LT version to 9/3/0.  
(NEED\_GPGSM\_VERSION): Need 0.3.8 due to fixed export command.

2002-06-04 Marcus Brinkmann <marcus@g10code.de>

Released 0.3.7.

- \* configure.ac (AC\_INIT): Set version to 0.3.7.  
(LIBGPGME\_LT\_REVISION): Add one.
- \* README: Document version requirement correctly.

2002-06-02 Marcus Brinkmann <marcus@g10code.de>

- \* acinclude.m4: Fix Pth check so that it doesn't error out if pth  
is not found.

2002-06-02 Marcus Brinkmann <marcus@g10code.de>

- \* configure.ac: Add checks for Pth and pthreads.

\* acinclude.m4: Add slightly hacked check for pth (seems to be an autoconf version problem).

2002-05-21 Werner Koch <wk@gnupg.org>

\* configure.ac (NEED\_GPGSM\_VERSION): We need gpgsm 0.3.7.

2002-05-03 Werner Koch <wk@gnupg.org>

Released 0.3.6.

2002-04-05

Marcus Brinkmann <marcus@g10code.de>

\* acconfig.h: File removed.

\* configure.ac (NEED\_GPG\_VERSION): Add description.

(NEED\_GPGSM\_VERSION): Likewise.

(HAVE\_DOSISH\_SYSTEM): Likewise.

(HAVE\_DRIVE\_LETTERS): Likewise.

(GPG\_PATH): Likewise.

(GPGSM\_PATH): Likewise.

\* acinclude.m4 (GNUPG\_CHECK\_TYPEDEF): Likewise.

2002-04-01 Werner Koch <wk@gnupg.org>

Released 0.3.5.

2002-03-17 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac: Add automake conditional HAVE\_DOSISH\_SYSTEM.

2002-03-04 Werner Koch <wk@gnupg.org>

\* configure.ac: Bumbed version to 0.3.4-cvs to continue development.

Released 0.3.4.

\* configure.ac: Bumbed LT version numbers to (7,1,0), requires gpgsm 0.3.1.

2002-03-03 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (AC\_INIT): Change version number to snapshot CVS version.

2002-02-13 Werner Koch <wk@gnupg.org>

\* configure.ac (vasprintf,fopencookie): Add checks.

2002-02-12 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (AC\_INIT):

Bump version to 0.3.3.

\* jnlib/Makefile.am: Revert to older version that includes xmalloc but not dotlock and some other files. Reported by Stphane Corthsy.

2002-02-10 Marcus Brinkmann <marcus@g10code.de>

\* Released 0.3.2.

\* configure.ac (AC\_INIT): Bump version to 0.3.2.

\* jnlib/libjnlibconfig.h: Revert to older version that doesn't expect libgcrypt. Reported by Jose Carlos Garcia Sogo <jsogo@debian.org>.

2002-02-09 Marcus Brinkmann <marcus@g10code.de>

\* Released 0.3.1.

\* configure.ac (LIBGPGME\_LT\_CURRENT): Bump it up to 6!

(NEED\_GPGSM\_VERSION): Bump it up to 0.3.0!

(AC\_INIT): Bump version to 0.3.1

2002-01-22 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (HAVE\_JNLIB\_LOGGING): Define always for assuan.

2001-12-19 Werner Koch <wk@gnupg.org>

\* configure.ac (VERSION,PACKAGE): Defined and subst. Used for AM\_INIT\_AUTOMAKE and moved all version number more to the top.

2001-12-18 Marcus Brinkmann <marcus@g10code.de>

\* autogen.sh (libtool\_vers):

Bump to 1.4.

\* configure.ac (LIBGPGME\_LT\_CURRENT): Increment.

(LIBGPGME\_LT\_AGE): Reset.

Improve comment.

Fix wrong comment character.

2001-12-18 Werner Koch <wk@gnupg.org>

\* acinclude.m4 (GNUPG\_FIX\_HDR\_VERSION): Fixed for new automake.

2001-12-14 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (GPG): Substitute this variable.  
(GPGSM): Likewise.

2001-11-22 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (AC\_CONFIG\_FILES): Add tests/gpg/Makefile and  
tests/gpgsm/Makefile.

2001-11-21 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (gpgmeplug): New variable, set to gpgmeplug if  
[BUILD\_GPGMEPLUG].  
\* configure.ac (AC\_CONFIG\_FILES): Add gpgmeplug/Makefile.  
Support --enable-gpgmeplug.

2001-11-21 Marcus Brinkmann <marcus@g10code.de>

\* autogen.sh: Tighten version dependencies.

2001-11-20 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (SUBDIRS): Support building the assuan library  
(currently if GPGSM\_PATH is set)..  
\* configure.ac: Support building  
the assuan library.  
\* assuan: New directory, populated with the Assuan library  
(copied from the newpg repository).

2001-11-20 Marcus Brinkmann <marcus@g10code.de>

\* configure.ac (NEED\_GPGSM\_VERSION): New variable. Treat it  
similarly to NEED\_GPG\_VERSION.  
\* acconfig.h: Likewise.

2001-11-18 Marcus Brinkmann <marcus@g10code.de>

\* configure.in: Renamed to ...  
\* configure.ac: ... this. Update to autoconf 2.52. Lots of small  
changes in the transition. Support --with-gpg=PATH and  
--with-gpgsm=PATH options. Check if test suites can be run.  
\* acconfig.h: Add GPGSM\_PATH.  
\* Makefile.am: New variable `tests', set to `tests' if  
RUN\_GPG\_TESTS.  
(SUBDIRS): Replace string `tests' with variable `tests'.

2001-10-22 Marcus Brinkmann <marcus@g10code.de>

\* autogen.sh: Invoke automake with '-a' (add missing files).  
Do not invoke configure.

2001-09-17 Werner Koch <wk@gnupg.org>

Released 0.2.3.

\* configure.in (NEED\_GPG\_VERSION): Set to 1.0.6. Incremented LT  
current  
and age.

\* Makefile.am (SUBDIRS): Add doc

2001-06-12 Werner Koch <wk@gnupg.org>

Released 0.2.2.

2001-04-05 Werner Koch <wk@gnupg.org>

\* configure.in (NEED\_GPG\_VERSION): Set to 1.0.4g

2001-04-02 Werner Koch <wk@gnupg.org>

Released 0.2.1.

Changed the copyright notices all over the place.

2001-02-28 Werner Koch <wk@gnupg.org>

Released 0.2.0.

2001-01-18 Werner Koch <wk@gnupg.org>

\* autogen.sh: Added option --build-w32.

2011-05-11 Marcus Brinkmann <marcus@g10code.com>

\* gpgsm/Makefile.am (DISTCLEANFILES): Move to ...  
(CLEANFILES): ... here.  
(clean-local): New rule.  
\* gpg/Makefile.am (DISTCLEANFILES): Move to ...  
(CLEANFILES): ... here.

2011-05-05 Marcus Brinkmann <marcus@g10code.com>

\* gpg/Makefile.am: Unset GPG\_AGENT\_INFO when setting up local configuration.  
(clean-local): Shut down local gpg-agent.

2011-05-04 Marcus Brinkmann <marcus@g10code.com>

\* gpg/t-import.c (check\_result): Complete secret key pair counting and disable status check, as GPG 2.1 currently emits two IMPORT\_OK lines and we only look at the first.

2011-04-27 Marcus Brinkmann <marcus@g10code.com>

\* gpg/Makefile.am (DISTCLEANFILES):  
Add S.gpg-agent.  
(mkdemodirs, ./Alpha/Secret.gpg): Remove targets.  
(GNUPGHOME): Export as absolute build directory (for gpg-agent).  
(./pubring.gpg): Remove --homedir option, import secdemo.asc.  
(clean-local): Rewrite.  
\* gpg/secdemo.asc: New file.  
\* gpg/pubkey-1.asc, gpg/seckey-1.asc: Change passphrase to "abc" (now needed as GnuPG 2.1 asks for secret key passphrase on import).  
\* gpg/t-keylist.c (keys): Update key info for Joe Random Hacker.  
(main): Disable check for can\_encrypt, as this is now in a different subkey.  
\* gpg/t-encrypt-sign.c (check\_result): Allow RMD160 hash algorithm.  
\* gpg/t-import.c (check\_result): One secret key pair now counts as two secret keys, allow that.

2009-11-03 Werner Koch <wk@g10code.com>

\* run-support.h (fail\_if\_err): Include program name.

\* run-sign.c (main): Add option --uiserver.

2009-10-26 Marcus Brinkmann <marcus@g10code.de>

\* opassuan/t-command.c: Update to new interface.

2009-10-15 Werner Koch <wk@g10code.com>

\* run-verify.c:  
New.

2009-08-06 Werner Koch <wk@g10code.com>

\* run-sign.c: New.

2009-07-07 Werner Koch <wk@g10code.com>

\* run-keylist.c (main): Add options --cms and --openpgp.

\* gpg/pgp-keylist.c: Rename to ...

\* run-keylist.c: ... this.

\* gpg/pgp-import.c: Rename to ...

\* run-import.c: ... this.

\* gpg/pgp-export.c: Rename to ...

\* run-export.c: ... this.

\* run-support.h: New. Copied from gpg/t-support.h.

\* gpg/Makefile.am (noinst\_PROGRAMS): Remove them.

\* Makefile.am (noinst\_PROGRAMS): Add them.

(noinst\_HEADERS): New.

2009-06-22 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-support.h (passphrase\_cb): Implement write() according to  
the book to silence compiler warning.

\* gpgsm/t-support.h (passphrase\_cb): Likewise.

2009-06-16 Werner Koch <wk@g10code.com>

\* gpg/pgp-import.c: New.

\* gpg/t-support.h (print\_import\_result, nonnull): Factored out  
from other tools.

\* gpg/pgp-export.c, gpg/pgp-keylist.c: New.

2009-06-09 Werner Koch <wk@g10code.com>

\* gpg/Makefile.am  
(./pubring.gpg): Ignore errors in case of  
already imported keys. Add --no-permission-warning and remove  
obsolete --allow-secret-key-import.  
\* gpg/mkdemodirs.in (GPG): Add --no-permission-warning.  
  
\* gpg/t-edit.c (edit\_fnc): Use gpgme\_io\_write.

2009-04-19 Moritz <moritz@gnu.org>

\* gpg/Makefile.am (EXTRA\_DIST): Replaced mkdemodirs with mkdemodirs.in.  
(mkdemodirs): New target.  
(clean-local): Added command for removing mkdemodirs script.  
(./Alpha/Secret.gpg): Added dependency on mkdemodirs.

\* gpg/mkdemodirs: Renamed to ...  
\* gpg/mkdemodirs.in: ... here.  
\* gpg/mkdemodirs.in (GPG): Derive value from @GPG@ instead of  
hard-coding "gpg".

2009-02-24 Werner Koch <wk@g10code.com>

\* opassuan/t-command.c: Adjust for changed new op\_assuan interface.

2009-02-03 Werner Koch <wk@g10code.com>

\* gpg/t-keylist.c (main): Check that new fields is\_cardkey and  
card\_number are not set.

2009-01-26 Werner Koch <wk@g10code.com>

\* opassuan/: New.  
\* opassuan/Makefile.am:  
New.  
\* opassuan/t-command.c: New.

2008-12-03 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (INCLUDES): Fix path to include file.  
\* gpg/Makefile.am (INCLUDES), gpgsm/Makefile.am (INCLUDES): Likewise.

2008-11-18 Werner Koch <wk@g10code.com>

\* gpgsm/cms-decrypt.c: New.

2008-11-03 Marcus Brinkmann <marcus@g10code.com>

- \* gpgsm/Makefile.am (INCLUDES, LDADD): Replace gpgme path with src.
- \* gpg/Makefile.am (INCLUDES, LDADD, t\_thread1\_LDADD): Likewise.
- \* Makefile.am (LDADD): Likewise.

2008-10-30 Werner Koch <wk@g10code.com>

- \* gpgsm/cms-keylist.c: New.

2008-06-19 Werner Koch <wk@g10code.com>

- \* gpg/t-gpgconf.c (dump\_arg): Add new types. Print strings in quotes.

2008-01-28 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/Makefile.am (DISTCLEANFILES): Add pubring.kbx~.

2008-01-10 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/t-gpgconf.c (main): Allow for dirmngr not to be available.

- \* gpg/Makefile.am (./gpg-agent.conf): Correct pinentry path.

- \* gpg/pinentry:

New file.

- \* gpg/Makefile.am (DISTCLEANFILES, all-local): Add gpg-agent.conf (./gpg-agent.conf): New target. (EXTRA\_DIST): Add pinentry.

- \* gpg/t-gpgconf.c (main): Exit early if compiled without gpgconf.

2008-01-04 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/Makefile.am (CLEANFILES): Add pubring.kbx and dirmngr.conf.

- \* Makefile.am (TESTS\_ENVIRONMENT): Use absolute path for GNUPGHOME.

- \* gpg/Makefile.am (TESTS\_ENVIRONMENT): Use absolute path for GNUPGHOME.

- \* gpgsm/Makefile.am (TESTS\_ENVIRONMENT): Use absolute path for GNUPGHOME.

- \* gpg/Makefile.am (TESTS): Add t-gpgconf.

t-gpgconf.c: New file.

2007-11-23 Marcus Brinkmann <marcus@g10code.de>

- \* gpgsm/t-verify.c (show\_auditlog): Check for GPG\_ERR\_ASS\_UNKNOWN\_CMD.

2007-11-23 Werner Koch <wk@g10code.com>

\* gpgsm/t-verify.c (check\_result): Don't exit on error but set a flag.  
(main): Consult flag for return value.  
(show\_auditlog): New.  
(main): Use it.

2007-09-27 Marcus Brinkmann <marcus@g10code.de>

\* t-engine-info.c  
(check\_engine\_info): Fix debug output.  
\* gpg/Makefile.am (tests\_unix): New variable.  
(TESTS): Use it.  
\* gpg/t-support.h (passphrase\_cb) [HAVE\_W32\_SYSTEM]: Use WriteFile instead of write.  
\* gpg/t-wait.c [HAVE\_W32\_SYSTEM]: Define sleep as \_sleep.

2007-09-14 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/t-verify.c (main): Release TEXT and SIG.

2007-07-12 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/Makefile.am (key\_id): Change := into =.

2007-07-12 Werner Koch <wk@g10code.com>

\* gpgsm/t-support.h (init\_gpgme) [W32]: Do not init the locales as  
the constants are not available.

2007-02-26 Werner Koch <wk@g10code.com>

\* gpg/t-verify.c (double\_plaintext\_sig): New.  
(main): Check it.

2006-12-02 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/t-keylist.c (main): Skip unknown keys. Newer versions of  
GPGSM import more keys than older ones.

2005-12-06 Werner Koch <wk@g10code.com>

\* gpg/t-keylist.c (main): Changed for that secondary keys now have  
a fingerprint.  
\*  
gpg/t-keylist-sig.c (main): Ditto.  
\* gpgsm/t-keylist.c (main): Ditto. The test used to be wrong.

2005-10-18 Werner Koch <wk@g10code.com>

\* gpg/pubdemo.asc, gpg/secdemo.asc: Add 2 expired subkeys to Whisky.  
\* gpg/t-keylist.c: Reordered list to match new demo keyring. Add arg for number of subkeys and for extra checking function.  
(main): Enhanced a few error outputs. Changed subkey counting. Call extra checking function.  
(check\_whisky): New.

2005-10-07 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/t-keylist.c (main): Allow for an email address as a second uid.  
  
\* gpg/t-sig-notation.c: Change critical notation to something GnuPG understands.

2005-10-01 Marcus Brinkmann <marcus@g10code.de>

\* gpg/Makefile.am (EXTRA\_DIST): Remove gpg.conf.  
(DISTCLEANFILES): Add gpg.conf.  
(all-local): Add gpg.conf.  
(./gpg.conf): New target.  
\* gpg/gpg.conf: Remove file.  
  
\* gpg/Makefile.am (EXTRA\_DIST): Add gpg.conf.  
  
\* gpg/Makefile.am (TESTS): Add t-sig-notation.  
\* gpg/t-sig-notation.c  
(check\_result): New file.  
\* gpg/t-verify.c (check\_result): Also check the length of the notation data.  
\* gpg/gpg.conf: New file.

2005-09-30 Marcus Brinkmann <marcus@g10code.de>

\* gpg/Makefile.am (TESTS): Add t-filename.  
\* gpg/t-filename.c: New file.

2005-09-23 Werner Koch <wk@g10code.com>

\* gpg/t-support.h (init\_gpgme) [W32]: Don't use LC\_MESSAGES.  
  
\* gpg/t-encrypt-large.c: New test.  
\* gpg/Makefile.am (TESTS): Add t-encrypt-large.

2005-06-03 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/Makefile.am (TESTS): Add t-wait.
- \* gpg/t-wait.c (main): New test.

2004-12-07 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/mkdemodirs: Add copyright notice.
- \* gpgsm/Makefile.am, gpgsm/t-support.h, gpgsm/t-decrypt.c, gpgsm/t-encrypt.c, gpgsm/t-export.c, gpgsm/t-genkey.c, gpgsm/t-import.c, gpgsm/t-keylist.c, gpgsm/t-sign.c, gpgsm/t-verify.c, gpg/Makefile.am, gpg/t-decrypt.c, gpg/t-decrypt-verify.c, gpg/t-edit.c, gpg/t-encrypt.c, gpg/t-encrypt-sign.c, gpg/t-encrypt-sym.c, gpg/t-eventloop.c, gpg/t-export.c, gpg/t-genkey.c, gpg/t-import.c, gpg/t-keylist.c, gpg/t-keylist-sig.c, gpg/t-sign.c, gpg/t-signers.c, gpg/t-support.h, gpg/t-thread1.c, gpg/t-trustlist.c, gpg/t-verify.c, Makefile.am, t-data.c, t-engine-info.c, t-version.c: Change license to LGPL.

2004-08-17 Marcus Brinkmann <marcus@g10code.de>

- \* gpgsm/t-keylist.c (struct): Add new fields VALIDITY and KEY\_LENGTH.  
(main): Use them.
- \* gpgsm/t-import.c (check\_result): New argument total\_stat.  
(main): Pass this argument. Reduce number of total considered keys to 1 for the second test.

2004-04-05 Werner Koch <wk@gnupg.org>

- \* gpgsm/Makefile.am: Changed the faked system time to 20011213T12000.

2004-03-07 Marcus Brinkmann <marcus@g10code.de>

- \* gpgsm/t-keylist.c: Add chain IDs.

2004-03-03 Werner Koch <wk@gnupg.org>

- \* gpgsm/t-export.c (main): Also check exporting 2 certificates.

2004-02-17 Werner Koch <wk@gnupg.org>

- \* gpgsm/t-import.c (check\_result): gpgsm does now return info in the result->imports; adjust for that.
- \* gpgsm/Makefile.am (TESTS\_ENVIRONMENT): Reset the GPG\_AGENT\_INFO.

Include config.h at the top of each C source. This is required due to LFS support.

- \* gpg/t-keylist-sig.c (main): s/class/sig\_class/.
- \* gpg/t-signers.c (check\_result): Ditto.
- \* gpg/t-sign.c (check\_result): Ditto.
- \* gpg/t-encrypt-sign.c (check\_result): Ditto.
- \* gpgsm/t-sign.c (check\_result): Ditto.

2004-01-12 Werner Koch <wk@gnupg.org>

- \* gpg/t-keylist-sig.c (main): Temporary disabled one test due top gpg 1.3.4 problems.
- \* gpg/t-import.c (check\_result): Likewise.

2003-11-19 Werner Koch <wk@gnupg.org>

- \* gpg/t-support.h (DIM): Added.
- \* gpg/t-verify.c (check\_result): Rewrote test for notations because the order of notations is not guaranteed.
- \* gpgsm/t-support.h (fail\_if\_err): Also print the numeric values.

2003-10-06 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/t-eventloop.c: Include <sys/types.h> for old systems.
- \* gpgsm/Makefile.am (DISTCLEANFILES): Add random\_seed.
- \* gpg/t-thread1.c (thread\_one): Do not call initialize\_gpgme. Likewise.

2003-09-14 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/t-thread1.c (main): Call init\_gpgme here. (initialize\_gpgme): Function removed.
- \* gpg/t-thread1.c: New file.
- \* gpg/Makefile.am (TESTS): Add t-thread1.c. (t\_thread1\_LDADD): New variable. (LDADD): Remove GPG Error lib.
- \* gpgsm/Makefile.am (LDADD): Likewise.
- \* gpg/t-import.c (main): Likewise.
- \* gpg/t-keylist-sig.c (main): Likewise.

- \* gpg/t-keylist.c (main): Likewise.
- \* gpg/t-sign.c (main): Likewise.
- \* gpg/t-signers.c (main): Likewise.
- \* gpg/t-trustlist.c (main): Likewise.
- \* gpgsm/t-support.h: Include <stdlib.h> and <locale.h>.
- (init\_gpgme): New function.
- \* gpg/t-support.h: Likewise.
- \* gpgsm/t-verify.c (main): Call init\_gpgme.
- \* gpgsm/t-decrypt.c (main): Likewise.
- \* gpgsm/t-encrypt.c (main): Likewise.
- \* gpgsm/t-export.c (main): Likewise.
- \* gpgsm/t-genkey.c (main): Likewise.
- \* gpgsm/t-import.c (main):  
Likewise.
- \* gpgsm/t-keylist.c (main): Likewise.
- \* gpgsm/t-sign.c (main): Likewise.
- \* gpg/t-verify.c (main): Call init\_gpgme.
- \* gpg/t-decrypt-verify.c (main): Likewise.
- \* gpg/t-decrypt.c (main): Likewise.
- \* gpg/t-edit.c (main): Likewise.
- \* gpg/t-encrypt-sign.c (main): Likewise.
- \* gpg/t-encrypt-sym.c (main): Likewise.
- \* gpg/t-encrypt.c (main): Likewise.
- \* gpg/t-eventloop.c (main): Likewise.
- \* gpg/t-export.c (main): Likewise.
- \* gpg/t-genkey.c (main): Likewise.

2003-08-14 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/t-sign.c (check\_result): Change output format for signature class to unsigned int.
- \* gpg/t-signers.c (check\_result): Likewise.
- \* gpg/t-encrypt-sign.c (check\_result): Likewise.
- \* gpgsm/t-sign.c (check\_result): Likewise.

2003-07-31 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/t-verify.c (check\_result): Change type of SUMMARY to unsigned int.
- \* gpg/t-decrypt-verify.c (check\_verify\_result): Likewise.
- \* gpg/t-keylist-sig.c (keys): Change type of member CLASS to unsigned int.
- \* t-data.c (read\_cb): Change type of AMOUNT to unsigned int.
- \* t-version.c (version): Remove unused variable.

2003-07-22 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (AM\_CPPFLAGS): New variable.  
(LDADD): Add @GPG\_ERROR\_LIBS@.  
\* gpg/Makefile.am (AM\_CPPFLAGS): New variable.  
(LDADD): Add @GPG\_ERROR\_LIBS@.  
\* gpgsm/Makefile.am (AM\_CPPFLAGS): New variable.  
(LDADD): Add @GPG\_ERROR\_LIBS@.

2003-06-06 Marcus Brinkmann <marcus@g10code.de>

Everywhere: Use libgpg-error error codes.

\* gpg/Makefile.am (noinst\_HEADERS): New variable.  
\* gpg/t-support.h: New file.  
\* gpgsm/Makefile.am (noinst\_HEADERS): New variable.  
\* gpgsm/t-support.h: New file.

2003-05-29 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-encrypt-sym.c (main): Adapt to new syntax.  
\* gpg/t-encrypt.c (main): Likewise.  
\* gpg/t-eventloop.c (main): Likewise.  
\* gpg/t-encrypt-sign.c (main): Likewise.  
\* gpgsm/t-export.c (main): Likewise.  
\* gpgsm/t-encrypt.c (main): Likewise.

2003-05-28 Marcus  
Brinkmann <marcus@g10code.de>

\* gpg/t-eventloop.c (main): Rewrite recipient management.  
\* gpg/t-encrypt-sign.c (main): Likewise.  
\* gpg/t-encrypt.c (main): Likewise.  
\* gpg/t-export.c (main): Likewise.  
\* gpgsm/t-encrypt.c (main): Likewise.  
\* gpgsm/t-export.c (main): Likewise.

2003-05-27 Marcus Brinkmann <marcus@g10code.de>

\* gpg/Makefile.am (TESTS): Order t-keylist and t-keylist-sig after  
t-import.  
\* gpg/t-edit.c (edit\_fnc): Fix primary UID for keylisting tests.  
\* gpg/t-keylist.c: Change order of user IDs.  
\* gpg/t-keylist-sig.c: Likewise.  
\* gpg/t-import.c: Add support for gpg in CVS.

2003-05-27 Marcus Brinkmann <marcus@g10code.de>

\* t-data.c: Remove TEST\_OUT\_CB.  
(main): Likewise.

- \* gpg/t-trustlist.c (main): Access ITEM directly.
- \* (t-decrypt-verify.c, t-decrypt.c, t-edit.c, t-encrypt-sign.c, t-encrypt-sym.c, t-sign.c, t-signers.c): Include <unistd.h>. (passphrase\_cb): Rewritten.
- \* t-edit.c (edit\_fnc): Rewritten.

2003-05-04 Marcus Brinkmann <marcus@g10code.de>

- \*
- gpg/t-keylist-sig.c (main): Remove timestamp check.
- \* gpgsm/t-keylist.c: Add check for timestamp.
- \* gpg/Makefile.am (TESTS): Add t-keylist-sig.
- \* gpg/t-keylist-sig.c: New file.

2003-04-30 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/t-eventloop.c (main): Do not call print\_op\_info. (print\_op\_info): Function removed.
- \* gpg/t-keylist.c: Rewritten.
- \* gpgsm/t-keylist.c (main): Rewritten.
- \* gpg/t-edit.c (main): Do not use gpgme\_key\_get\_as\_xml. Use gpgme\_key\_unref instead gpgme\_key\_release.
- \* gpg/t-signers.c (main): Use gpgme\_key\_unref instead gpgme\_key\_release.

2003-04-29 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/t-trustlist.c: Rewritten.
- \* gpg/t-verify.c (main): Rewritten.
- \* gpg/t-decrypt-verify.c: Rewritten.
- \* gpgsm/t-verify.c (main): Rewritten.

2003-04-28 Marcus Brinkmann <marcus@g10code.de>

- \* gpgsm/t-decrypt.c (main): Rewritten.
- \* gpg/t-decrypt.c: Rewritten.
- \* gpg/t-signers.c: Rewritten.

2003-04-27 Marcus Brinkmann <marcus@g10code.de>

\*

gpg/t-encrypt-sign.c (check\_result): Rewritten.

- \* gpg/t-sign.c: Rewritten.
- \* gpgsm/t-sign.c: Rewritten.
- \* gpg/t-encrypt.c: Check for invalid recipients.
- \* gpgsm/t-encrypt.c: Likewise.

- \* gpg/t-import.c (check\_result): Really use FPR.
- \* gpgsm/t-import.c (check\_result): Rewritten.

2003-04-25 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/t-import.c: Rewritten.
- \* gpgsm/t-genkey.c: Rewritten.
- \* gpgsm/Makefile.am (noinst\_PROGRAMS): Add t-genkey.
- \* gpg/t-genkey.c: Include <stdlib.h>.
- (main): Check result->fpr before checking its length.

2003-04-24 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/t-genkey.c: Rewritten to match new semantics.

2003-02-06 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/t-decrypt.c (passphrase\_cb): Fix to new prototype.
- \* gpg/t-decrypt-verify.c (passphrase\_cb): Likewise.
- \* gpg/t-edit.c (passphrase\_cb): Likewise.
- \* gpg/t-encrypt-sign.c (passphrase\_cb): Likewise.
- \* gpg/t-encrypt-sym.c (passphrase\_cb): Likewise.
- \* gpg/t-sign.c (passphrase\_cb): Likewise.
- \*
- gpg/t-signers.c (passphrase\_cb): Likewise.

2003-01-30 Marcus Brinkmann <marcus@g10code.de>

- \* t-engine-info.c: Use file\_name instead path throughout.
- \* Makefile.am (TESTS): Add t-engine-info.
- \* t-engine-info.c: New file.
- \* gpg/t-encrypt.c (main): Don't print engine info.
- \* gpg/t-eventloop.c (main): Likewise.
- \* gpg/t-encrypt-sign.c (main): Likewise.
- \* gpgsm/t-encrypt.c (main): Likewise.

2002-12-24 Marcus Brinkmann <marcus@g10code.de>

- \* gpgsm/t-verify.c (main): Adjust caller of gpgme\_op\_verify.

\* gpg/t-verify.c (main): Likewise.  
\* gpg/t-decrypt-verify.c (main): Likewise for  
gpgme\_op\_decrypt\_verify.

2002-12-23 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/Makefile.am (./gpgsm.conf): Add a faked system time to  
avoid certification's expiry.  
\* gpgsm/t-encrypt.c (main): Use the short certification name.

2002-11-19 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-genkey.c (main): Add missing argument to gpgme\_op\_genkey  
invocation.

2002-10-09 Marcus Brinkmann  
<marcus@g10code.de>

\* gpg/t-decrypt.c (print\_data): Update to new gpgme\_data\_read  
interface, and use gpgme\_engine\_check\_version instead  
gpgme\_check\_version.  
\* gpg/t-decrypt-verify.c (print\_data): Likewise.  
\* gpg/t-edit.c (main): Likewise.  
\* gpg/t-encrypt.c (print\_data): Likewise.  
\* gpg/t-encrypt-sign.c (print\_data): Likewise.  
\* gpg/t-encrypt-sym.c (print\_data): Likewise.  
\* gpg/t-eventloop.c (print\_data): Likewise.  
\* gpg/t-export.c (print\_data): Likewise.  
\* gpg/t-sign.c (print\_data): Likewise.  
\* gpg/t-signers.c (print\_data): Likewise.  
\* gpgsm/t-decrypt.c (print\_data): Likewise.  
\* gpgsm/t-encrypt.c (print\_data): Likewise.  
\* gpgsm/t-export.c (print\_data): Likewise.  
\* gpgsm/t-sign.c (print\_data): Likewise.  
\* gpg/t-verify.c (main): Likewise for gpgme\_op\_verify.  
\* gpgsm/t-verify.c (main): Likewise for gpgme\_op\_verify.  
\* t-data.c (read\_once\_test): Likewise.  
(write\_test): Update for new behaviour of data objects.  
(main): Remove type test.

2002-09-30 Werner Koch <wk@gnupg.org>

\*  
gpgsm/t-keylist.c (doit): Add arg SECRET.  
(main): Add option --secret.

2002-09-28 Marcus Brinkmann <marcus@g10code.de>

\* t-version.c: Include <string.h>. Reported by Stphane Corthsy.

2002-09-02 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-keylist.c (main): Test PATTERN for NULL before printing.  
Reported by Dr. Stefan Dalibor <Dr.Stefan.Dalibor@bfa.de>.

2002-08-01 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-edit.c: Also add a test for the expire command (testing  
the passphrase callback).

2002-07-28 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-edit.c: New file.  
\* gpg/Makefile (TESTS): Add t-edit.

2002-07-25 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-encrypt-sym.c (main): Change type of I to size\_t and  
rename to LEN.  
\* gpg/t-verify.c (main): Likewise. Submitted by Stphane  
Corthsy.

2002-07-03 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-eventloop.c: New file.  
\* gpg/Makefile (TESTS): Add t-eventloop.

2002-06-26 Werner Koch <wk@gnupg.org>

\*  
gpgsm/t-import.c (print\_op\_info): New.  
(main): Print operation info.

2002-06-25 Werner Koch <wk@gnupg.org>

\* gpgsm/Makefile.am (DISTCLEANFILES): new.

2002-06-25 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/Makefile.am (TESTS): Add t-export.  
gpgsm/t-export.c: New file.

2002-06-20 Werner Koch <wk@gnupg.org>

\* gpgsm/t-sign.c (main): Also test a normal signature.

\* gpg/Makefile (TESTS\_ENVIRONMENT): Set GPG\_AGENT\_INFO empty.  
\* gpg/t-signers.c, gpg/t-sign.c, gpg/t-encrypt-sym.c  
\* gpg/t-encrypt-sign.c, gpg/t-decrypt.c  
\* gpg/t-decrypt-verify.c (main): Changed the GPG\_AGENT\_INFO check to match the one in ../gpgme/rungpg.c.

2002-06-12 Werner Koch <wk@gnupg.org>

\* gpgsm/t-keylist.c (doit): Print operation info if available.

2002-06-10 Werner Koch <wk@gnupg.org>

\* gpgsm/t-verify.c (print\_sig\_stat): Print the error token.

2002-06-04 Werner Koch <wk@gnupg.org>

\* gpgsm/t-encrypt.c (main): Add a simple option parser and allow to specify an encryption key.

2002-05-26 Marcus Brinkmann <marcus@g10code.de>

\* gpg/Makefile.am (all-local): Remove dependency on ./secring.gpg.  
(./secring.gpg): Remove target, and move all rules for this target to ...  
(./pubring.gpg): ... here. This was necessary because GnuPG 1.0.7 does create an empty secring.gpg file when importing public keys.

2002-05-08 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/t-verify.c (validity\_string): New.  
(print\_sig\_stat): Print expire time and validity.  
(status\_string): Add new expired stati.

2002-05-03 Werner Koch <wk@gnupg.org>

\* gpg/t-verify.c (validity\_string): New.  
(print\_sig\_stat): Print expire time and validity.  
(status\_string): Add new expired stati.

2002-04-05 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/Makefile.am (./trustlist.txt): Put more into this file to prevent use of gpg-agent.  
(./gpg-agent.conf): Remove target.  
(all-local): Remove ./gpg-agent.conf.

2002-04-05 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/t-keylist.c  
(main): Use gpgme\_engine\_check\_version instead  
gpgme\_check\_engine.  
\* gpgsm/t-encrypt.c (main): Likewise.

2002-03-06 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-encrypt-sym.c: New file.  
\* gpg/Makefile.am (TESTS): Add t-encrypt-sym.

2002-03-05 Marcus Brinkmann <marcus@g10code.de>

\* gpg/Makefile.am (CLEANFILES): Remove random\_seed, which is now  
in DISTCLEANFILES.

2002-03-04 Werner Koch <wk@gnupg.org>

\* gpg/Makefile.am (DISTCLEANFILES): Added.

2002-03-03 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-verify.c (main): Add a few more sanity checks, and a check  
for normal signatures.

2002-02-26 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-encrypt-sign.c: New file.  
\* gpg/Makefile.am (TESTS): Add t-encrypt-sign.

2002-02-13 Werner Koch <wk@gnupg.org>

\* gpgsm/Makefile.am (private-keys-v1.d): Don't  
fail when the directory already exists.

2002-02-12 Marcus Brinkmann <marcus@g10code.de>

\* gpg/Makefile.am (CLEANFILES): New target.  
(distclean-local): Rename to  
...  
(clean-local): ... this.

2002-02-09 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/Makefile.am (./private-keys-v1.d/\$(key\_id).key): Fix rule.

2002-02-09 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/t-genkey.c: New file (not added to Makefile.am because of gpg-agent bug).

2002-02-08 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/Makefile.am (key\_id): Update value.  
(all-local): Add .key to keyid filename.  
(./private-keys-v1.d/\$(key\_id)): Renamed to ...  
(./private-keys-v1.d/\$(key\_id).key): ... this.  
(all-local): Add ./gpgsm.conf, ./trustlist.txt.  
(./gpgsm.conf, ./trustlist.txt): New target.  
\* gpgsm/567064FE6D14A17B2D811ABB407728BC558AA455: Renamed to ...  
\* gpgsm/32100C27173EF6E9C4E9A25D3D69F86D37A4F939: ... this.

2002-01-30 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-import.c (print\_op\_info): New function.  
(main): Use it.

2002-01-22 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-signers.c (passphrase\_cb): Change type of r\_hd to void\*\*.  
\* gpg/t-sign.c (passphrase\_cb):  
Likewise.  
\* gpg/t-decrypt-verify.c (passphrase\_cb): Likewise.  
\* gpg/t-decrypt.c (passphrase\_cb): Likewise.

2001-12-19 Marcus Brinkmann <marcus@g10code.de>

\* gpg/t-decrypt-verify.c: Don't include `mcheck.h'. Reported by  
Stphane Corthisy.

2001-12-19 Marcus Brinkmann <marcus@g10code.de>

\* gpg/Makefile.am (EXTRA\_DIST): Add missing line continuation.

2001-12-19 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/Makefile.am (EXTRA\_DIST): Add \$(key\_id).

2001-12-16 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/Makefile: Rename `pubcerts.kbx' to `pubring.kbx'.

2001-12-15 Marcus Brinkmann <marcus@g10code.de>

\* gpgsm/t-keylist.c (check\_two\_contexts): Set protocols.

2001-12-14 Marcus Brinkmann <marcus@g10code.de>

- \* gpgsm/t-sign.c: New file.
- \* gpgsm/Makefile.am (TESTS): Add t-sign.

2001-12-14 Marcus Brinkmann <marcus@g10code.de>

- \* gpgsm/t-decrypt.c: New file.
- \* gpgsm/567064FE6D14A17B2D811ABB407728BC558AA455: Likewise.
- \* gpgsm/Makefile.am (TESTS): Add t-decrypt.
- (key\_id): New variable.
- (all-local): New target ./private-keys-v1.d/\${key\_id} added.
- (./private-keys-v1.d/\${key\_id}): New target.

2001-12-14 Marcus Brinkmann <marcus@g10code.de>

- \* gpgsm/t-verify.c: New file.
- \* gpgsm/Makefile.am (TESTS): Add t-verify.

2001-12-14 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/Makefile.am (GPG): Set to @GPG\_PATH@.
- (./pubring.gpg): Use \$(GPG) instead gpg.
- (./secring.gpg): Likewise.
- \* gpgsm/t-import.c (main): Remove third test case.
- \* gpgsm/Makefile.am (GPGSM): Set to @GPGSM@.
- (all-local): New target.
- (./pubcerts.kbx): Likewise.
- \* gpgsm/t-encrypt.c: New file.
- \* gpgsm/Makefile.am (TESTS): Add t-encrypt.

2001-12-14 Marcus Brinkmann <marcus@g10code.de>

- \* gpgsm/t-keylist.c: New file.
- \* gpgsm/Makefile.am (TESTS): Add t-keylist.

2001-12-13 Marcus Brinkmann <marcus@g10code.de>

- \* gpgsm/cert\_dfn\_pca01.der: New file.
- \* gpgsm/cert\_dfn\_pca15.der: Likewise.
- \* gpgsm/cert\_g10code\_test1.der: Likewise.
- \* gpgsm/t-import.c: Likewise.
- \*
- gpgsm/Makefile.am (EXTRADIST): Add new files.
- (TESTS): Add t-import.

2001-11-22 Marcus Brinkmann <marcus@g10code.de>

- \* gpg/: New directory.
- \* Makefile.am, t-verify.c, t-encrypt.c, t-signers.c, t-trustlist.c, t-sign.c, t-keylist.c, t-import.c, t-genkey.c, t-export.c, t-decrypt-verify.c, t-decrypt.c, t-version.c, t-data.c, mkdemodirs. cipher-1.asc, cipher-2.asc, geheim.txt, pubdemo.asc, pubkey-1.asc, secdemo.asc, seckey-1.asc): Move to sub directory gpg/.
  
- \* gpg/Makefile.am (INCLUDES): Include gpgme/, not include/ and intl/.
- (LDD): Correct relative path to gpgme library.
- (TESTS): Remove t-version and t-data.
- \* gpg/t-verify.c, gpg/t-encrypt.c, gpg/t-signers.c, gpg/t-trustlist.c, gpg/t-sign.c, gpg/t-keylist.c, gpg/t-import.c, gpg/t-genkey.c, gpg/t-export.c, gpg/t-decrypt-verify.c, gpg/t-decrypt.c, t-version.c, t-data.c): Include gpgme.h, not "../gpgme/gpgme.h".
  
- \* Makefile.am: New file.
- \* gpgsm/: New directory.
- \* gpgsm/Makefile.am: New file.

2001-11-16 Marcus  
Brinkmann <marcus@g10code.de>

- \* Makefile.am (TESTS): Add t-decrypt-verify.
- \* t-decrypt-verify.c: New file.
- \* cipher-2.asc: Likewise.

2001-11-02 Marcus Brinkmann <marcus@g10code.de>

- \* t-data.c: Include stddef.h.
- (read\_once\_test): Change type of READ to size\_t.
- (read\_test): Likewise.
- (write\_test): Likewise.

2001-10-29 Marcus Brinkmann <marcus@g10code.de>

- \* t-signers.c: New file.
- \* Makefile.am (TESTS): Add t-signers.

2001-10-22 Marcus Brinkmann <marcus@g10code.de>

- \* Makefile.am (TEST\_ENVIRONMENT): Revert last change.

2001-10-22 Marcus Brinkmann <marcus@g10code.de>

- \* Makefile.am (TEST\_ENVIRONMENT): Set environment to \$(srcdir),

not current directory.

2001-10-22 Marcus Brinkmann <marcus@g10code.de>

\* t-data.c (write\_test): New function.  
(main): Invoke write\_test for all rounds except TEST\_OUT\_CB.

2001-10-22 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (INCLUDES): Remove spurious duplicate to silence automake.

2001-10-16 Marcus Brinkmann <marcus@g10code.de>

\*  
t-version.c: New file.  
\* t-data.c: Likewise.  
\* t-data-1.txt: Likewise.  
\* t-data-2.txt: Likewise.  
\* Makefile.am (TESTS): Add t-version, t-data.

2001-09-17 Werner Koch <wk@gnupg.org>

\* t-keylist.c (check\_two\_contexts): New.

2001-09-03 Werner Koch <wk@gnupg.org>

\* t-encrypt.c (print\_op\_info): New and use it after each operation.

2001-08-28 Werner Koch <wk@gnupg.org>

\* t-sign.c (print\_op\_info): New and use it after each operation.

2001-03-15 Werner Koch <wk@gnupg.org>

\* t-keylist.c (doit): List subkeys too, show caps.

2001-02-13 Werner Koch <wk@gnupg.org>

\* t-verify.c (print\_sig\_stat): Repaled along by unsigned long because we don't use the config stuff here.

2001-02-12 Werner Koch <wk@gnupg.org>

\* tests/t-verify.c (print\_sig\_stat): Print info about the keys.

Last time the most obviously new thing was adding the /What's New/
section to the HOWTO. Now it's moving it out of the HOWTO.

** New in GPGME 1130

```

:PROPERTIES:  
:CUSTOM\_ID: new-stuff-1-13-0  
:END:

Additions since GPGME 1.12.0 include:

- Moving the /What's New/ section out of the basic [[file:gpgme-python-howto.org][HOWTO]] document and into its own file so as to more readily include other documents beyond that HOWTO.
- Moving the preceding, archival, segments into [[file:what-was-new.org][another file]].
- Added =gpg.version.versionintlist= to make it easier for Python developers to check for a specific version number, even with beta versions (it will drop the "-betaN" part).
- Added expanded detail on issues pertaining to installing for Windows users.
- Bindings enter [[file:maintenance-mode][maintenance mode]] from January, 2019.
- Added documentation on maintenance mode and what changes can be made to the code when in that status. Essentially that boils down to bug fixes only and no feature requests.
- The import-keys-hkp.py example script, which uses the =hkp4py= module to search the SKS servers for a key, has been tightened up to search for both hexadecimal key IDs and user ID strings with reduced chance of unnecessary repetition. There may still be some repetition if a key includes a user ID matching the hexadecimal value of a key ID.

GNU LESSER GENERAL PUBLIC LICENSE  
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.

59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the

Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

^L

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The

former contains code derived from the library, whereas the latter must be combined with the library in order to run.  
^L

## GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to

exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public

License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

^L

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete

corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work

that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

^L

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a)

Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood

that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

- b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
- c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

^L

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

^L

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to

refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

^L

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free

Software Foundation; we sometimes make exceptions for this.

Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

^L

#### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library.

It is safest to attach them to the start of each source file to most

effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990  
Ty Coon, President of Vice

That's all there is to it!

```

This document provides basic instruction in how to use the GPGME Python bindings to programmatically leverage the GPGME library.

\*\* Python 2 versus Python

3

:PROPERTIES:

:CUSTOM\_ID: py2-vs-py3

:END:

Though the GPGME Python bindings themselves provide support for both Python 2 and 3, the focus is unequivocally on Python 3 and specifically from Python 3.4 and above. As a consequence all the examples and instructions in this guide use Python 3 code.

Much of it will work with Python 2, but much of it also deals with Python 3 byte literals, particularly when reading and writing data. Developers concentrating on Python 2.7, and possibly even 2.6, will need to make the appropriate modifications to support the older string and unicode types as opposed to bytes.

There are multiple reasons for concentrating on Python 3; some of which relate to the immediate integration of these bindings, some of which relate to longer term plans for both GPGME and the python bindings and some of which relate to the impending EOL period for Python 2.7. Essentially, though, there is little value in tying the bindings to a version of the language which is a dead end and the advantages offered by Python 3 over Python 2 make handling the data types with which GPGME deals considerably easier.

## \*\* Examples

```
:PROPERTIES:
:CUSTOM_ID: howto-python3-examples
:END:
```

All of the examples found in this document can be found as Python 3 scripts in the `=lang/python/examples/howto=` directory.

## \*\* Unofficial Drafts

```
:PROPERTIES:
:CUSTOM_ID: unofficial-drafts
:END:
```

In addition to shipping with each release of GPGME, there is a section on locations to read or download [\[#draft-editions\]\[draft editions\]](#) of this document from at the end of it. These are unofficial versions produced in between major releases.

## \*\* What's New

```
:PROPERTIES:
:CUSTOM_ID: new-stuff
:END:
```

Full details of what is new are now available in the [\[\[file:what-is-new.org\]\[What's New\]\]](#) file and archives of the preceding `/What's New/` sections are available in the [\[\[file:what-was-new\]\[What Was New\]\]](#) file.

### \*\*\* New in GPGME 1130

```
:PROPERTIES:

new-stuff-1-13-0
:END:
```

See the [\[\[file:what-is-new#new-stuff-1-13-0\]\[What's New\]\]](#) document for what is new in version 1.13.0.

### \*\*\* New in GPGME 1120

```
:PROPERTIES:
:CUSTOM_ID: new-stuff-1-12-0
:END:
```

See the [\[\[file:what-was-new#new-stuff-1-12-0\]\[What Was New\]\]](#) document for what was new in version 1.12.0.

```
* GPGME Concepts
:PROPERTIES:
:CUSTOM_ID: gpgme-concepts
:END:
```

```
** A C API
:PROPERTIES:
:CUSTOM_ID: gpgme-c-api
:END:
```

Unlike many modern APIs with which programmers will be more familiar with these days, the GPGME API is a C API. The API is intended for use by C coders who would be able to access its features by including the `=gpgme.h=` header file with their own C source code and then access its functions just as they would any other C headers.

This is a very effective method of gaining complete access to the API and in the most efficient manner possible. It does, however, have the drawback that it cannot be directly used by other languages without some means of providing an interface to those languages. This is where the need for bindings in various languages stems.

```
** Python bindings
:PROPERTIES:
:CUSTOM_ID: gpgme-python-bindings
:END:
```

The Python bindings for GPGME provide a higher level means of accessing the complete feature set of GPGME itself. It also provides a more pythonic means of calling these API functions.

The bindings are generated dynamically with SWIG and the copy of `=gpgme.h=` generated when GPGME is compiled.

This means that a version of the Python bindings is fundamentally tied to the exact same version of GPGME used to generate that copy of `=gpgme.h=`.

```
** Difference between the Python bindings and other GnuPG Python packages
:PROPERTIES:
:CUSTOM_ID: gpgme-python-bindings-diffs
:END:
```

There have been numerous attempts to add GnuPG support to Python over

the years. Some of the most well known are listed here, along with what differentiates them.

```
*** The python-gnupg package maintained
by Vinay Sajip
:PROPERTIES:
:CUSTOM_ID: diffs-python-gnupg
:END:
```

This is arguably the most popular means of integrating GPG with Python. The package utilises the `subprocess` module to implement wrappers for the `gpg` and `gpg2` executables normally invoked on the command line (`gpg.exe` and `gpg2.exe` on Windows).

The popularity of this package stemmed from its ease of use and capability in providing the most commonly required features.

Unfortunately it has been beset by a number of security issues in the past; most of which stemmed from using unsafe methods of accessing the command line via the `subprocess` calls. While some effort has been made over the last two to three years (as of 2018) to mitigate this, particularly by no longer providing shell access through those subprocess calls, the wrapper is still somewhat limited in the scope of its GnuPG features coverage.

The python-gnupg package is available under the MIT license.

```
*** The gnupg package created
and maintained by Isis Lovecruft
:PROPERTIES:
:CUSTOM_ID: diffs-isis-gnupg
:END:
```

In 2015 Isis Lovecruft from the Tor Project forked and then re-implemented the python-gnupg package as just gnupg. This new package also relied on subprocess to call the `gpg` or `gpg2` binaries, but did so somewhat more securely.

The naming and version numbering selected for this package, however, resulted in conflicts with the original python-gnupg and since its functions were called in a different manner to python-gnupg, the release of this package also resulted in a great deal of consternation when people installed what they thought was an upgrade that subsequently broke the code relying on it.

The gnupg package is available under the GNU General Public License

version 3.0 (or any later version).

\*\*\* The PyME package maintained by Martin Albrecht

```
:PROPERTIES:
:CUSTOM_ID: diffs-pyme
:END:
```

This package is the origin of these bindings, though they are somewhat different now.

For details of when and how the PyME package was folded back into GPGME itself see the [\[\[file:short-history.org\]\]](http://file:short-history.org) [Short History] document.[fn:1]

The PyME package was first released in 2002 and was also the first attempt to implement a low level binding to GPGME. In doing so it provided access to considerably more functionality than either the `=python-gnupg=` or `=gnupg=` packages.

The PyME package is only available for Python 2.6 and 2.7.

Porting the PyME package to Python 3.4 in 2015 is what resulted in it being folded into the GPGME project and the current bindings are the end result of that effort.

The PyME package is available under the same dual licensing as GPGME itself: the GNU General Public License version 2.0 (or any later version) and the GNU Lesser General Public License version 2.1 (or any later version).

\* GPGME Python bindings installation

```
:PROPERTIES:
:CUSTOM_ID: gpgme-python-install
:END:
```

\*\* No PyPI

```
:PROPERTIES:
:CUSTOM_ID: do-not-use-pypi
:END:
```

Most

third-party Python packages and modules are available and distributed through the Python Package Installer, known as PyPI.

Due to the nature of what these bindings are and how they work, it is infeasible to install the GPGME Python bindings in the same way.

This is because the bindings use SWIG to dynamically generate C bindings against `=gpgme.h=` and `=gpgme.h=` is generated from `=gpgme.h.in=` at compile time when GPGME is built from source. Thus to include a package in PyPI which actually built correctly would require either statically built libraries for every architecture bundled with it or a full implementation of C for each architecture.

See the additional notes regarding `[[#snafu-ffi][CFFI and SWIG]]` at the end of this section for further details.

#### \*\* Requirements

```
:PROPERTIES:
:CUSTOM_ID: gpgme-python-requirements
:END:
```

The GPGME Python bindings only have three requirements:

1. A suitable version of Python 2 or Python 3. With Python 2 that means CPython 2.7 and with Python 3 that means CPython 3.4 or higher.
2. `[[https://www.swig.org][SWIG]]`.
3. GPGME itself. Which also means that all of GPGME's dependencies must be installed too.

#### \*\*\* Recommended Additions

```
:PROPERTIES:
:CUSTOM_ID: gpgme-python-recommendations
:END:
```

Though none of the following are absolute requirements, they are all recommended for use with the Python bindings. In some cases these recommendations refer to which version(s) of CPython to use the bindings with, while others refer to third party modules which provide a significant advantage in some way.

1. If possible, use Python 3 instead of 2.
2. Favour a more recent version of Python since even 3.4 is due to reach EOL soon. In production systems and services, Python 3.6 should be robust enough to be relied on.
3. If possible add the following Python modules which are not part of the standard library: `[[http://docs.python-requests.org/en/latest/index.html][Requests]]`, `[[https://cython.org/][Cython]]`, `[[https://pendulum.eustace.io/][Pendulum]]` and `[[https://github.com/Selfnet/hkp4py][hkp4py]]`.

Chances are quite high that at least the first one and maybe two of

those will already be installed.

Note that, as with Cython, some of advanced use case scenarios will bring with them additional requirements. Most of these will be fairly well known and commonly installed ones, however, which are in many cases likely to have already been installed on many systems or be familiar to Python programmers.

**\*\* Installation**

```
:PROPERTIES:
:CUSTOM_ID: installation
:END:
```

Installing the Python bindings is effectively achieved by compiling and installing GPGME itself.

Once SWIG is installed with Python and all the dependencies for GPGME are installed you only need to confirm that the version(s) of Python you want the bindings installed for are in your `=$PATH=`.

By default GPGME will attempt to install the bindings for the most recent or highest version number of Python 2 and Python 3 it detects in `=$PATH=`. It specifically checks for the `=python=` and `=python3=` executables first and then checks for specific version numbers.

For Python 2 it checks for these executables in this order: `=python=`, `=python2=` and `=python2.7=`.

For Python 3 it checks for these executables in this order: `=python3=`, `=python3.7=`, `=python3.6=`, `=python3.5=` and `=python3.4=`.<sup>[fn:2]</sup>

On systems where `=python=` is actually `=python3=` and not `=python2=` it may be possible that `=python2=` may be overlooked, but there have been no reports of that actually occurring as yet.

In the three months or so since the release of Python 3.7.0 there has been extensive testing and work with these bindings with no issues specifically relating to the new version of Python or any of the new features of either the language or the bindings. This has also been the case with Python 3.7.1rc1. With that in mind and given the release of Python 3.7.1 is scheduled for around the same time as GPGME 1.12.0, the order of preferred Python versions has been changed to move Python 3.7 ahead of Python 3.6.

```
*** Installing GPGME
:PROPERTIES:
:CUSTOM_ID: install-gpgme
:END:
```

See the GPGME `=README=` file for details of how to install GPGME from source.

```
** Known Issues
:PROPERTIES:
:CUSTOM_ID: snafu
:END:
```

There are a few known issues with the current build process and the Python bindings. For the most part these are easily addressed should they be encountered.

```
*** Breaking Builds
:PROPERTIES:
:CUSTOM_ID: snafu-a-swig-of-this-builds-character
:END:
```

Occasionally when installing GPGME with the Python bindings included it may be observed that the `=make=` portion of that process induces a large very number of warnings and, eventually errors which end that part of the build process. Yet following that with `=make check=` and `=make install=` appears to work seamlessly.

The cause of this is related to the way SWIG needs to be called to dynamically generate the C bindings for GPGME in the first place. So the entire process will always produce `=lang/python/python2-gpg/=` and `=lang/python/python3-gpg/=` directories. These should contain the build output generated during compilation, including the complete bindings and module installed into `=site-packages=`.

Occasionally the errors in the early part or some other conflict (e.g. not installing as `*/root/*` or `*/su/*`) may result in nothing being installed to the relevant `=site-packages=` directory and the build directory missing a lot of expected files. Even when this occurs, the solution is actually quite simple and will always work.

That solution is simply to run the following commands as either the `*root*` user or prepended with `=sudo -H=[fn:3]` in the `=lang/python/=` directory:

```
#+BEGIN_SRC shell
/path/to/pythonX.Y setup.py build
/path/to/pythonX.Y setup.py build
/path/to/pythonX.Y setup.py install
#+END_SRC
```

Yes, the build command does need to be run twice. Yes, you still need to run the potentially failing or incomplete steps during the =configure=, =make= and =make install= steps with installing GPGME. This is because those steps generate a lot of essential files needed, both by and in order to create, the bindings (including both the =setup.py= and =gpgme.h= files).

\*\*\*\* IMPORTANT Note

```
:PROPERTIES:
:CUSTOM_ID: snafu-swig-build-note
:END:
```

If specifying a selected number of languages to create bindings for, try to leave Python last. Currently the majority of the other language bindings are also preceding Python of either version when listed alphabetically (not counting the Qt bindings).

If Python is set to precede one of the other languages then it is possible that the errors described here may interrupt the build process before generating bindings for those other languages. In these cases it may be preferable to configure all preferred language bindings separately with alternative =configure= steps for GPGME using the =--enable-languages=\$LANGUAGE= option.

Alternatively

=make= (or =gmake=, depending on your platform) may be run with the the =-k= option, which tells make to keep going even if errors are encountered. In that case the failure of one language's set of bindings to build should not hamper another language's bindings to build.

\*\*\* Reinstalling Responsibly

```
:PROPERTIES:
:CUSTOM_ID: snafu-lessons-for-the-lazy
:END:
```

Regardless of whether you're installing for one version of Python or several, there will come a point where reinstallation is required. With most Python module installations, the installed files go into the

relevant site-packages directory and are then forgotten about. Then the module is upgraded, the new files are copied over the old and that's the end of the matter.

While the same is true of these bindings, there have been intermittent issues observed on some platforms which have benefited significantly from removing all the previous installations of the bindings before installing the updated versions.

#### Removing

the previous version(s) is simply a matter of changing to the relevant `=site-packages=` directory for the version of Python in question and removing the `=gpg/=` directory and any accompanying egg-info files for that module.

In most cases this will require root or administration privileges on the system, but the same is true of installing the module in the first place.

#### \*\*\* Multiple installations

```
:PROPERTIES:
:CUSTOM_ID: snafu-the-full-monty
:END:
```

For a variety of reasons it may be either necessary or just preferable to install the bindings to alternative installed Python versions which meet the requirements of these bindings.

On POSIX systems this will generally be most simply achieved by running the manual installation commands (`build`, `build`, `install`) as described in the previous section for each Python installation the bindings need to be installed to.

As per the SWIG documentation: the compilers, libraries and runtime used to build GPGME and the Python Bindings `*must*` match those used to compile Python itself, including the version number(s) (at least going by major version numbers and probably minor numbers too).

On most POSIX systems, including OS X, this will very likely be the case in most, if not all, cases.

Note that from GPGME [<https://dev.gnupg.org/rMff6ff616aea6f59b7f2ce1176492850ecdf3851e>][1.12.1]] the default installation installs to each version of Python it can find first. That is that it will currently install for the first copies of Python versions 2.7, 3.4, 3.5, and so on up until the current dev branch that it finds. Usually this will be in the

same prefix as GPGME itself, but is dictated by the `=$PATH=` when the installation is performed. The above instructions can still be performed on other python installations which the installer does not find, including alternative prefixes.

\*\*\* Won't Work With Windows

```
:PROPERTIES:
:CUSTOM_ID: snafu-runtime-not-funtime
:END:
```

There are semi-regular reports of Windows users having considerable difficulty in installing and using the Python bindings at all. Very often, possibly even always, these reports come from Cygwin users and/or MinGW users and/or Msys2 users. Though not all of them have been confirmed, it appears that these reports have also come from people who installed Python using the Windows installer files from the [\[\[https://python.org\]\]](https://python.org) [Python website] (i.e. mostly MSI installers, sometimes self-extracting `.exe` files).

The Windows versions of Python are not built using Cygwin, MinGW or Msys2; they're built using Microsoft Visual Studio. Furthermore the version used is /considerably/ more advanced than the version which MinGW obtained a small number of files from many years ago in order to be able to compile anything at all. Not only that, but there are changes to the version of Visual Studio between some micro releases, though that is particularly the case with Python 2.7, since it has been kept around far longer than it should have been.

There are two theoretical solutions to this issue:

1. Compile and install the GnuPG stack, including GPGME and the Python bindings using the same version of Microsoft Visual Studio used by the Python Foundation to compile the version of Python installed.

If there are multiple versions of Python then this will need to be done with each different version of Visual Studio used for those versions of Python.

2. Compile and install Python using the same tools used by choice, such as MinGW or Msys2.

Do *\*not\** use the official Windows installer for Python unless following the first method.

In this type of situation it may even be for the best to accept that there are less limitations on permissive software than free software and simply opt to use a recent version of the Community Edition of Microsoft Visual Studio to compile and build all of it, no matter what.

Investigations into the extent or the limitations of this issue are ongoing.

The following

table lists the version of Microsoft Visual Studio which needs to be used when compiling GPGME and the Python bindings with each version of the CPython binary released [<https://www.python.org/downloads/windows/>][for Windows]:

CPython	Microsoft product name	runtime filename	
2.7.6	Visual Studio 2008	MSVCR90.DLL	
3.4.0	Visual Studio 2010	MSVCR100.DLL	
3.5.0	Visual Studio 2015	*see below*	
3.6.0	Visual Studio 2015	*see below*	
3.7.0	Visual Studio 2017*	*see below*	

It is important to note that MingW and Msys2 ship with the Visual C runtime from Microsoft Visual Studio 2005 and are thus *incompatible* with all the versions of CPython which can be used with the GPGME Python bindings.

It is also important to note that from CPython 3.5 onwards, the Python Foundation has adopted the reworking of the Visual C runtime which was performed for Visual Studio 2015 and aimed at resolving many of these kinds

of issues. Much greater detail on these issues and the correct file(s) to link to are available from Matthew Brett's invaluable page, [[https://matthew-brett.github.io/pydagogue/python\\_msvc.html](https://matthew-brett.github.io/pydagogue/python_msvc.html)][Using Microsoft Visual C with Python]. It is also worth reading the

Microsoft Developer Network blog post on [<http://blogs.msdn.com/b/vcblog/archive/2015/03/03/introducing-the-universal-crt.aspx>][the universal CRT]] and Steve

Dower's blog posts on Python extensions ([<http://stevedower.id.au/blog/building-for-python-3-5>][part 1]] and [<http://stevedower.id.au/blog/building-for-python-3-5-part-two>][part 2]]).

The second of those two posts by Steve Dower contains the details of specific configuration options required for compiling anything to be used with official CPython releases. In addition to those configuration and compiler settings to use, the versions of Visual Studio prior to Visual Studio 2015 did not support 64-bit systems by default. So compiling a 64-bit version of these bindings for a 64-bit version of CPython 2.7 or 3.4 requires additional work.

In addition to the blog posts, the [\[\[https://wiki.python.org/moin/WindowsCompilers\]\]](https://wiki.python.org/moin/WindowsCompilers) [Windows compilers] wiki page on the CPython wiki is another essential reference on the relevant versions of Visual Studio to use and the degree of compatibility with CPython releases.

Eventually someone will ask why there isn't an installable binary for Windows, which the GPGME of the licenses do not preclude as long as the source code is available in conjunction with such a release.

The sheer number of versions of Visual Studio in conjunction with differing configuration options depending on the target Windows version and whether the architecture is 64-bit or 32-bit makes it difficult to provide a correct binary installer for Windows users. At the bare minimum doing so would require the GnuPG project compile ten different versions of the bindings with each release; both 32-bit and 64-bit versions for CPython 2.7 and 3.4, with 64-bit versions for both x86-64 (i.e. Intel and AMD) and ARM architectures for CPython 3.5, 3.6, 3.7 and later releases. That's the bare \*minimum\*, it'd probably be higher.

Additionally, with only a binary installation used in conjunction with the CPython installer from `=python.org=` the advanced options available which utilise `[[#cython]]` [Cython] will not be able to be used at all. Cython depends on being able to compile the C code it generates and that too would need to utilise a matching runtime to both the installed version of CPython and these bindings in order to work with the bindings.

Considering all of that, what do we recommend?

1. Use a recent version of CPython; at least 3.5, but ideally 3.6 or later.
2. Use Visual Studio 2015 or the standalone build tools for Visual Studio 2017 (or later).
3. Compile both CPython and GPGME with these bindings using the tools selected in step 2.
4. Ignore MingW, Msys2 and the official CPython binary installers.
5. Be thankful the answer to this question wasn't simply to say something like, install Linux or install FreeBSD (or even Apple's OS X).

\*\*\* CFFI is the Best and GPGME should use it instead of SWIG

```
:PROPERTIES:
:CUSTOM_ID: snafu-cffi
:END:
```

There are many reasons for favouring [\[\[https://cffi.readthedocs.io/en/latest/overview.html\]\]](https://cffi.readthedocs.io/en/latest/overview.html) and proponents of it are

quite happy to repeat these things as if all it would take to switch from SWIG to CFFI is repeating that list as if it were a new concept.

The fact is that there are things which Python's CFFI implementation cannot handle in the GPGME C code. Beyond that there are features of SWIG which are simply not available with CFFI at all. SWIG generates the bindings to Python using the `=gpgme.h=` file, but that file is not a single version shipped with each release, it too is generated when GPGME is compiled.

CFFI is currently unable to adapt to such a potentially mutable codebase. If there were some means of applying SWIG's dynamic code generation to produce the Python/CFFI API modes of accessing the GPGME libraries (or the source source code directly), but such a thing does not exist yet either and it currently appears that work is needed in at least one of CFFI's dependencies before any of this can be addressed.

So if you're a massive fan of CFFI; that's great, but if you want this project to switch to CFFI then rather than just insisting that it should, I'd suggest you volunteer to bring CFFI up to the level this project needs.

If you're actually seriously considering doing so, then I'd suggest taking the `=gpgme-tool.c=` file in the `GPGME =src/=` directory and getting that to work with any of the CFFI API methods (not the ABI methods, they'll work with pretty much anything). When you start running into trouble with "ifdefs" then you'll know what sort of things are lacking. That doesn't even take into account the amount of work saved via SWIG's code generation techniques either.

\*\*\*

```
Virtualised Environments
:PROPERTIES:
:CUSTOM_ID: snafu-venv
:END:
```

It is fairly common practice amongst Python developers to, as much as possible, use packages like `virtualenv` to keep various things that are

to be installed from interfering with each other. Given how much of the GPGME bindings is often at odds with the usual pythonic way of doing things, it stands to reason that this would be called into question too.

As it happens the answer as to whether or not the bindings can be used with virtualenv, the answer is both yes and no.

In general we recommend installing to the relevant path and matching prefix of GPGME itself. Which means that when GPGME, and ideally the rest of the GnuPG stack, is installed to a prefix like `=/usr/local=` or `=/opt/local=` then the bindings would need to be installed to the main Python installation and not a virtualised abstraction. Attempts to separate the two in the past have been known to cause weird and intermittent errors ranging from minor annoyances to complete failures in the build process.

As a consequence we only recommend building with and installing to the main Python installations within the same prefix as GPGME is installed to or which are found by GPGME's configuration stage immediately prior to running the make commands. Which is exactly what the compiling and installing process of GPGME does by default.

Once that is done, however, it appears that a copy of the compiled module may be installed into a virtualenv of the same major and minor version matching the build. Alternatively it is possible to utilise a `=sites.pth=` file in the `=site-packages/=` directory of a virtualenv installation, which links back to the system installations corresponding directory in order to import anything installed system wide. This may or may not be appropriate on a case by case basis.

Though extensive testing of either of these options is not yet complete, preliminary testing of them indicates that both are viable as long as the main installation is complete. Which means that certain other options normally restricted to virtual environments are also available, including integration with pythonic test suites (e.g. [\[\[https://docs.pytest.org/en/latest/index.html\]\]](https://docs.pytest.org/en/latest/index.html)`[[pytest]]`) and other large projects.

That said, it is worth reiterating the warning regarding non-standard installations. If one were to attempt to install the bindings only to a virtual environment without somehow also including the full GnuPG stack (or enough of it as to include GPGME) then it is highly likely that errors would be encountered at some point and more than a little likely that the build process itself would break.

If a degree of separation from the main operating system is still

required in spite of these warnings, then consider other forms of virtualisation. Either a virtual machine (e.g. [\[\[https://www.virtualbox.org/\]\]](https://www.virtualbox.org/)[[VirtualBox]]), a hardware emulation layer (e.g. [\[\[https://www.qemu.org/\]\]](https://www.qemu.org/)[[QEMU]]) or an application container (e.g. [\[\[https://www.docker.com/why-docker/\]\]](https://www.docker.com/why-docker/)[[Docker]]).

Finally it should be noted that the limited tests conducted thus far have been using the `=virtualenv=` command in a new directory to create the virtual python environment. As opposed to the standard `=python3 -m venv=` and it is possible that this will make a difference depending on the system and version of Python in use. Another option is to run the command `=python3 -m virtualenv /path/to/install/virtual/thingy=` instead.

\*\*\* Post installation

```
:PROPERTIES:
:CUSTOM_ID: snafu-docs
:END:
```

Following installation it is recommended to move the `=post_installer.py=` script from the `=lang/python/examples/howto/=` directory to the `=lang/python/=` directory and run it. This will fix or restore files needed by Sphinx which may be removed during a distribution build for release. It will also generate reST files from Org mode files with Pandoc and generate Texinfo files from Org mode files with GNU Emacs and Org mode (in batch mode). Additionally it will fix the UTF-8 declaration line in the Texinfo files (Emacs expects "UTF-8" to be "utf-8").

\* Fundamentals

```
:PROPERTIES:
:CUSTOM_ID: howto-fund-a-mental
:END:
```

Before we can get to the fun stuff, there are a few matters regarding GPGME's design which hold true whether you're dealing with the C code directly or these Python bindings.

\*\* No REST

```
:PROPERTIES:
:CUSTOM_ID: no-rest-for-the-wicked
:END:
```

The first part of which is or will be fairly blatantly obvious upon

viewing the first example, but it's worth reiterating anyway. That being that this API is *not* a REST API. Nor indeed could it ever be one.

Most, if not all, Python programmers (and not just Python programmers) know how easy it is to work with a RESTful API. In fact they've become so popular that many other APIs attempt to emulate REST-like behaviour as much as they are able. Right down to the use of JSON formatted output to facilitate the use of their API without having to retrain developers.

This API does not do that. It would not be able to do that and also provide access to the entire C API on which it's built. It does, however, provide a very pythonic interface on top of the direct bindings and it's this pythonic layer that this HOWTO deals with.

**\*\* Context**

:PROPERTIES:

:CUSTOM\_ID: howto-get-context

:END:

One of the reasons which prevents this API from being RESTful is that most operations require more than one instruction to the API to perform the task. Sure, there are certain functions which can be performed simultaneously, particularly if the result known or strongly anticipated (e.g. selecting and encrypting to a key known to be in the public keybox).

There are many more, however, which cannot be manipulated so readily: they must be performed in a specific sequence and the result of one operation has a direct bearing on the outcome of subsequent operations. Not merely by generating an error either.

When dealing with this type of persistent state on the web, full of both the RESTful and REST-like, it's most commonly referred to as a session. In GPGME, however, it is called a context and every operation type has one.

**\* Working with keys**

:PROPERTIES:

:CUSTOM\_ID: howto-keys

:END:

```
** Key selection
:PROPERTIES:
:CUSTOM_ID: howto-keys-selection
:END:
```

Selecting keys to encrypt to or to sign with will be a common occurrence when working with GPGMe and the means available for doing so are quite simple.

They do depend on utilising a Context; however once the data is recorded in another variable, that Context does not need to be the same one which subsequent operations are performed.

The easiest way to select a specific key is by searching for that key's key ID or fingerprint, preferably the full fingerprint without any spaces in it. A long key ID will probably be okay, but is not advised and short key IDs are already a problem with some being generated to match specific patterns. It does not matter whether the pattern is upper or lower case.

So this is the best method:

```
#+BEGIN_SRC python -i
import gpg

k = gpg.Context().keylist(pattern="258E88DCBD3CD44D8E7AB43F6ECB6AF0DEADBEEF")
keys = list(k)
#+END_SRC
```

This is passable and very likely to be common:

```
#+BEGIN_SRC python -i
import gpg

k = gpg.Context().keylist(pattern="0x6ECB6AF0DEADBEEF")
keys = list(k)
#+END_SRC
```

And this is a really bad idea:

```
#+BEGIN_SRC python -i
import gpg

k = gpg.Context().keylist(pattern="0xDEADBEEF")
keys = list(k)
#+END_SRC
```

Alternatively it may be that the intention is to create a list of keys which all match a particular search string. For instance all the addresses at a particular domain, like this:

```
#+BEGIN_SRC python -i
import gpg

ncsc = gpg.Context().keylist(pattern="ncsc.mil")
nsa = list(ncsc)
#+END_SRC
```

```
*** Counting keys
:PROPERTIES:
:CUSTOM_ID: howto-keys-counting
:END:
```

Counting the number of keys in your public keybox (=pubring.kbx=), the format which has superseded the old keyring format (=pubring.gpg= and =secring.gpg=), or the number of secret keys is a very simple task.

```
#+BEGIN_SRC python -i
import gpg

c = gpg.Context()
seckeys = c.keylist(pattern=None, secret=True)
pubkeys = c.keylist(pattern=None, secret=False)

seclist = list(seckeys)
secnum = len(seclist)

publist = list(pubkeys)
pubnum = len(publist)

print("""
Number of secret keys: {0}
Number of public keys: {1}
""".format(secnum, pubnum))
#+END_SRC
```

NOTE: The `[[#cython][Cython]]` introduction in the `[[#advanced-use][Advanced and Experimental]]` section uses this same key counting code with Cython to demonstrate some areas where Cython can improve performance even with the bindings. Users with large public keyrings or keyboxes, for instance, should consider these options if they are comfortable with using Cython.

```
** Get key
:PROPERTIES:
:CUSTOM_ID: howto-get-key
:END:
```

An alternative method of getting a single key via its fingerprint is available directly within a Context with `=Context().get_key=`. This is the preferred method of selecting a key in order to modify it, sign or certify it and for obtaining relevant data about a single key as a part of other functions; when verifying a signature made by that key, for instance.

By default this method will select public keys, but it can select secret keys as well.

This first example demonstrates selecting the current key of Werner Koch, which is due to expire at the end of 2018:

```
#+BEGIN_SRC python -i
import gpg

fingerprint = "80615870F5BAD690333686D0F2AD85AC1E42B367"
key = gpg.Context().get_key(fingerprint)
#+END_SRC
```

Whereas this example demonstrates selecting the author's current key with the `=secret=` key word argument set to `=True=`:

```
#+BEGIN_SRC python -i
import gpg

fingerprint = "DB4724E6FA4286C92B4E55C4321E4E2373590E5D"
key = gpg.Context().get_key(fingerprint, secret=True)
#+END_SRC
```

It is, of course, quite possible to select expired, disabled and revoked keys with this function, but only to effectively display information about those keys.

It is also possible to use both unicode or string literals and byte literals with the fingerprint when getting a key in this way.

```
** Importing keys
:PROPERTIES:
```

```
:CUSTOM_ID: howto-import-key
```

```
:END:
```

Importing keys is possible with the `key_import()` method and takes one argument which is a bytes literal object containing either the binary or ASCII armoured key data for one or more keys.

The following example retrieves one or more keys from the SKS key servers via the web using the requests module. Since requests returns the content as a bytes literal object, we can then use that directly to import the resulting data into our keybox.

```
#+BEGIN_SRC python -i
import gpg
import os.path
import requests

c = gpg.Context()
url = "https://sks-keyservers.net/pks/lookup"
pattern = input("Enter the pattern to search for key or user IDs: ")
payload = {"op": "get", "search": pattern}

r = requests.get(url, verify=True, params=payload)
result
= c.key_import(r.content)

if result is not None and hasattr(result, "considered") is False:
 print(result)
elif result is not None and hasattr(result, "considered") is True:
 num_keys = len(result.imports)
 new_revs = result.new_revocations
 new_sigs = result.new_signatures
 new_subs = result.new_sub_keys
 new_uids = result.new_user_ids
 new_scr = result.secret_imported
 nochange = result.unchanged
 print("""
The total number of keys considered for import was: {0}

 Number of keys revoked: {1}
 Number of new signatures: {2}
 Number of new subkeys: {3}
 Number of new user IDs: {4}
 Number of new secret keys: {5}
 Number of unchanged keys: {6}

The key IDs for all considered keys were:
""".format(num_keys, new_revs, new_sigs, new_subs, new_uids, new_scr,
```

```

 nochange))
 for i in range(num_keys):
 print("{0}\n".format(result.imports[i].fpr))
else:
 pass
#+END_SRC

```

NOTE: When searching for a key ID of any length or a fingerprint (without spaces), the SKS servers require the the leading =0x= indicative of hexadecimal be included. Also note that the old short key IDs (e.g. =0xDEADBEEF=) should no longer be used due to the relative ease by which such key IDs can be reproduced, as demonstrated by the Evil32 Project in 2014 (which was subsequently exploited in 2016).

Testing for whether a string in any given search is or may be a hexadecimal value which may be missing the leading =0x= is a simple matter of using a try/except statement which attempts to convert the string as hex to an integer and then back to hex; then using that to search with. Raising a ValueError simply results in treating the string as a string. This is the method and logic utilised in the =import-keys-hkp.py= script (see below).

```

*** Working with ProtonMail
:PROPERTIES:
:CUSTOM_ID: import-protonmail
:END:

```

Here is a variation on the example above which checks the constrained ProtonMail keyserver for ProtonMail public keys.

```

#+BEGIN_SRC python -i
import gpg
import requests
import sys

print("""
This script searches the ProtonMail key server for the specified key and
imports it.
""")

c = gpg.Context(armor=True)
url = "https://api.protonmail.ch/pks/lookup"
ksearch = []

```

```

if len(sys.argv) >= 2:
 keyterm = sys.argv[1]
else:
 keyterm = input("Enter the key ID, UID or search string: ")

if keyterm.count("@") == 2 and keyterm.startswith("@") is True:
 ksearch.append(keyterm[1:])
 ksearch.append(keyterm[1:])
 ksearch.append(keyterm[1:])
elif keyterm.count("@") == 1 and keyterm.startswith("@") is True:
 ksearch.append("{}@protonmail.com".format(keyterm[1:]))
 ksearch.append("{}@protonmail.ch".format(keyterm[1:]))
 ksearch.append("{}@pm.me".format(keyterm[1:]))
elif keyterm.count("@") == 0:
 ksearch.append("{}@protonmail.com".format(keyterm))
 ksearch.append("{}@protonmail.ch".format(keyterm))
 ksearch.append("{}@pm.me".format(keyterm))
elif keyterm.count("@") ==
2 and keyterm.startswith("@") is False:
 uidlist = keyterm.split("@")
 for uid in uidlist:
 ksearch.append("{}@protonmail.com".format(uid))
 ksearch.append("{}@protonmail.ch".format(uid))
 ksearch.append("{}@pm.me".format(uid))
elif keyterm.count("@") > 2:
 uidlist = keyterm.split("@")
 for uid in uidlist:
 ksearch.append("{}@protonmail.com".format(uid))
 ksearch.append("{}@protonmail.ch".format(uid))
 ksearch.append("{}@pm.me".format(uid))
else:
 ksearch.append(keyterm)

for k in ksearch:
 payload = {"op": "get", "search": k}
 try:
 r = requests.get(url, verify=True, params=payload)
 if r.ok is True:
 result = c.key_import(r.content)
 elif r.ok is False:
 result = r.content
 except Exception as e:
 result = None

if result is not None and hasattr(result, "considered") is False:
 print("{} for {}".format(result.decode(), k))
elif result is not None

```

and `hasattr(result, "considered")` is `True`:

```
num_keys = len(result.imports)
new_revs = result.new_revocations
new_sigs = result.new_signatures
new_subs = result.new_sub_keys
new_uids = result.new_user_ids
new_scert = result.secret_imported
nochange = result.unchanged
print("""
```

The total number of keys considered for import was: {0}

With UIDs wholly or partially matching the following string:

```
{1}
```

```
Number of keys revoked: {2}
Number of new signatures: {3}
Number of new subkeys: {4}
Number of new user IDs: {5}
Number of new secret keys: {6}
Number of unchanged keys: {7}
```

The key IDs for all considered keys were:

```
"".format(num_keys, k, new_revs, new_sigs, new_subs, new_uids, new_scert,
 nochange))
for i in range(num_keys):
 print(result.imports[i].fpr)
print("")
elif result is None:
 print(e)
#+END_SRC
```

Both the above example, `[[./examples/howto/pmkey-import.py][pmkey-import.py]]`,

and a version which prompts

for an alternative GnuPG home directory, `[[./examples/howto/pmkey-import-alt.py][pmkey-import-alt.py]]`, are available with the other examples and are executable scripts.

Note that while the ProtonMail servers are based on the SKS servers, their server is related more to their API and is not feature complete by comparison to the servers in the SKS pool. One notable difference being that the ProtonMail server does not permit non ProtonMail users to update their own keys, which could be a vector for attacking ProtonMail users who may not receive a key's revocation if it had been compromised.

\*\*\* Importing with HKP for Python

```
:PROPERTIES:
```

```
:CUSTOM_ID: import-hkp4py
:END:
```

Performing the same tasks with the [\[\[https://github.com/Selfnet/hkp4py\]\]](https://github.com/Selfnet/hkp4py) [\[\[hkp4py module\]\]](#) (available via PyPI) is not too much different, but does provide a number of options of benefit to end users. Not least of which being the ability to perform some

checks on a key before importing it or not. For instance it may be the policy of a site or project to only import keys which have not been revoked. The hkp4py module permits such checks prior to the importing of the keys found.

```
#+BEGIN_SRC python -i
import gpg
import hkp4py
import sys

c = gpg.Context()
server = hkp4py.KeyServer("hkps://hkps.pool.sks-keyservers.net")
results = []
keys = []

if len(sys.argv) > 2:
 pattern = " ".join(sys.argv[1:])
elif len(sys.argv) == 2:
 pattern = sys.argv[1]
else:
 pattern = input("Enter the pattern to search for keys or user IDs: ")

if pattern is not None:
 try:
 key = server.search(hex(int(pattern, 16)))
 keyed = True
 except ValueError as ve:
 key = server.search(pattern)
 keyed = False

 if key is not None:
 keys.append(key[0])
 if keyed is True:
 try:
 fob = server.search(pattern)
 except:
 fob = None
 if fob is not
None:
 keys.append(fob[0])
```

```

else:
 pass
else:
 pass

for logrus in pattern.split():
 try:
 key = server.search(hex(int(logrus, 16)))
 hexed = True
 except ValueError as ve:
 key = server.search(logrus)
 hexed = False

 if key is not None:
 keys.append(key[0])
 if hexed is True:
 try:
 fob = server.search(logrus)
 except:
 fob = None
 if fob is not None:
 keys.append(fob[0])
 else:
 pass
 else:
 pass

if len(keys) > 0:
 for key in keys:
 import_result = c.key_import(key.key_blob)
 results.append(import_result)

for result in results:
 if result is not None and hasattr(result, "considered") is False:
 print(result)
 elif result is not None and hasattr(result, "considered") is True:
 num_keys = len(result.imports)
 new_revs = result.new_revocations
 new_sigs = result.new_signatures
 new_subs = result.new_sub_keys
 new_uids = result.new_user_ids
 new_scert = result.secret_imported
 nochange = result.unchanged
 print("""
The total number of keys considered for import was: {0}

Number of keys revoked: {1}

```

Number of new signatures: {2}  
Number of new subkeys: {3}  
Number of new user IDs: {4}  
Number of new secret keys: {5}  
Number of unchanged keys: {6}

The key IDs for all considered keys were:

```
"".format(num_keys, new_revs, new_sigs, new_subs, new_uids, new_scrt,
 nochange))
for i in range(num_keys):
 print(result.imports[i].fpr)
print("")
else:
 pass
#+END_SRC
```

Since the hkp4py module handles multiple keys just as effectively as one (=keys= is a list of responses per matching key), the example above is able to do a little bit more with the returned data before anything is actually imported.

```
*** Importing from ProtonMail with HKP for Python
:PROPERTIES:
:CUSTOM_ID: import-protonmail-hkp4py
:END:
```

Though this can provide certain benefits even when working with ProtonMail, the scope is somewhat constrained there due to the limitations of the ProtonMail keyserver.

For instance, searching the SKS keyserver pool for the term "gnupg" produces hundreds of results from any time the word appears in any part of a user ID. Performing the same search on the ProtonMail keyserver returns zero results, even though there are at least two test accounts which include it as part of the username.

The cause of this discrepancy is the deliberate configuration of that server by ProtonMail to require an exact match of the full email address of the ProtonMail user whose key is being requested. Presumably this is intended to reduce breaches of privacy of their users as an email address must already be known before a key for that address can be obtained.

```
** Exporting keys
:PROPERTIES:
:CUSTOM_ID: howto-export-key
:END:
```

Exporting keys remains a reasonably simple task, but has been separated into three different functions for the OpenPGP cryptographic engine. Two of those functions are for exporting public keys and the third is for exporting secret keys.

```
*** Exporting public keys
:PROPERTIES:
:CUSTOM_ID: howto-export-public-key
:END:
```

There are two methods of exporting public keys, both of which are very similar to the other. The default method, `=key_export()`, will export a public key or keys matching a specified pattern as normal. The alternative, the `=key_export_minimal()` method, will do the same thing except producing a minimised output with extra signatures and third party signatures or certifications removed.

```
#+BEGIN_SRC
python -i
import gpg
import os.path
import sys

print("""
This script exports one or more public keys.
""")

c = gpg.Context(armor=True)

if len(sys.argv) >= 4:
 keyfile = sys.argv[1]
 logrus = sys.argv[2]
 homedir = sys.argv[3]
elif len(sys.argv) == 3:
 keyfile = sys.argv[1]
 logrus = sys.argv[2]
 homedir = input("Enter the GPG configuration directory path (optional): ")
elif len(sys.argv) == 2:
 keyfile = sys.argv[1]

```

\*\*\* Exporting secret keys

```

:PROPERTIES:
:CUSTOM_ID: howto-export-secret-key
:END:

```

Exporting secret keys is, functionally, very similar to exporting public keys; save for the invocation of `=pinentry=` via `=gpg-agent=` in order to securely enter the key's passphrase and authorise the export.

The following example exports the secret key to a file which is then

set with the same permissions as the output files created by the command line secret key export options.

```
#+BEGIN_SRC python -i
import gpg
import os
import os.path
import sys

print("""
This script exports one or more secret keys.

The gpg-agent and pinentry are invoked to authorise the export.
""")

c = gpg.Context(armor=True)

if len(sys.argv) >= 4:
 keyfile = sys.argv[1]
 logrus = sys.argv[2]
 homedir = sys.argv[3]
elif len(sys.argv) == 3:
 keyfile = sys.argv[1]
 logrus = sys.argv[2]
 homedir = input("Enter the GPG configuration directory path (optional): ")
elif len(sys.argv) == 2:
 keyfile = sys.argv[1]
 logrus = input("Enter the UID matching the secret key(s) to export: ")
 homedir = input("Enter the GPG configuration directory path (optional): ")
else:
 keyfile = input("Enter the path and filename to save the secret key to: ")
 logrus = input("Enter the UID matching the secret key(s) to export: ")
 homedir = input("Enter the GPG configuration directory path (optional): ")

if len(homedir) == 0:
 homedir = None
elif homedir.startswith("~"):
 userdir = os.path.expanduser(homedir)
 if os.path.exists(userdir) is True:
 homedir = os.path.realpath(userdir)
 else:
 homedir = None
else:
 homedir = os.path.realpath(homedir)

if os.path.exists(homedir) is False:
 homedir = None
else:
```

```

if os.path.isdir(homedir) is False:
 homedir = None
else:
 pass

if homedir is not None:
 c.home_dir = homedir
else:
 pass

try:
 result = c.key_export_secret(pattern=logrus)
except:
 result = c.key_export_secret(pattern=None)

if result is not None:
 with open(keyfile, "wb") as f:
 f.write(result)
 os.chmod(keyfile, 0o600)
else:
 pass
#+END_SRC

```

Alternatively the approach of the following script can be used. This longer example saves the exported secret key(s) in files in the GnuPG home directory, in addition to setting the file permissions as only readable and writable by the user. It also exports the secret key(s) twice in order to output both GPG binary (=gpg=) and ASCII armoured (=asc=) files.

```

#+BEGIN_SRC python -i
import gpg
import os
import os.path
import subprocess
import sys

print("""
This script exports one or more secret keys as both ASCII armored and binary
file formats, saved in files within the user's GPG home directory.

The gpg-agent and pinentry are invoked to authorise the export.
""")

```

\*\*\* Sending public keys to the SKS Keyservers

```
:PROPERTIES:
:CUSTOM_ID: howto-send-public-key
:END:
```

As with the previous section on importing keys, the `hkp4py` module adds another option with exporting keys in order to send them to the public keyservers.

The following example demonstrates how this may be done.

```
#+BEGIN_SRC python -i
import gpg
import hkp4py
import os.path
import sys

print("""
This script sends one or more public keys to the SKS keyservers and is
essentially a slight variation on the export-key.py script.
""")

c = gpg.Context(armor=True)
server
= hkp4py.KeyServer("hkps://hkps.pool.sks-keyservers.net")

if len(sys.argv) > 2:
 logrus = " ".join(sys.argv[1:])
elif len(sys.argv) == 2:
 logrus = sys.argv[1]
else:
 logrus = input("Enter the UID matching the key(s) to send: ")

if len(logrus) > 0:
 try:
 export_result = c.key_export(pattern=logrus)
 except Exception as e:
 print(e)
 export_result = None
else:
 export_result = c.key_export(pattern=None)

if export_result is not None:
 try:
 try:
 send_result = server.add(export_result)
 except:
 send_result = server.add(export_result.decode())
```

```

 if send_result is not None:
 print(send_result)
 else:
 pass
except Exception as e:
 print(e)
else:
 pass
#+END_SRC

```

An expanded version of this script with additional functions for specifying an alternative homedir location is in the examples directory as `=send-key-to-keyserver.py=`.

The `=hkp4py=` module appears to handle both string and byte literal text data equally well, but the GPGME bindings deal primarily with byte literal data only and so this script sends in that format first, then tries the string literal form.

```

* Basic Functions
:PROPERTIES:
:CUSTOM_ID: howto-the-basics
:END:

```

The most frequently called features of any cryptographic library will be the most fundamental tasks for encryption software. In this section we will look at how to programmatically encrypt data, decrypt it, sign it and verify signatures.

```

** Encryption
:PROPERTIES:
:CUSTOM_ID: howto-basic-encryption
:END:

```

Encrypting is very straight forward. In the first example below the message, `=text=`, is encrypted to a single recipient's key. In the second example the message will be encrypted to multiple recipients.

```

*** Encrypting to one key
:PROPERTIES:
:CUSTOM_ID: howto-basic-encryption-single
:END:

```

Once the the Context is set the main issues with encrypting data is

essentially reduced  
to key selection and the keyword arguments  
specified in the `=gpg.Context().encrypt()` method.

Those keyword arguments are: `=recipients=`, a list of keys encrypted to (covered in greater detail in the following section); `=sign=`, whether or not to sign the plaintext data, see subsequent sections on signing and verifying signatures below (defaults to `=True=`); `=sink=`, to write results or partial results to a secure sink instead of returning it (defaults to `=None=`); `=passphrase=`, only used when utilising symmetric encryption (defaults to `=None=`); `=always_trust=`, used to override the trust model settings for recipient keys (defaults to `=False=`); `=add_encrypt_to=`, utilises any preconfigured `=encrypt-to=` or `=default-key=` settings in the user's `=gpg.conf=` file (defaults to `=False=`); `=prepare=`, prepare for encryption (defaults to `=False=`); `=expect_sign=`, prepare for signing (defaults to `=False=`); `=compress=`, compresses the plaintext prior to encryption (defaults to `=True=`).

```
#+BEGIN_SRC python -i
import
 gpg

a_key = "0x12345678DEADBEEF"
text = b""Some text to test with.
```

Since the text in this case must be bytes, it is most likely that the input form will be a separate file which is opened with `"rb"` as this is the simplest method of obtaining the correct data format.

```
"""
```

```
c = gpg.Context(armor=True)
rkey = list(c.keylist(pattern=a_key, secret=False))
ciphertext, result, sign_result = c.encrypt(text, recipients=rkey, sign=False)
```

with `open("secret_plans.txt.asc", "wb")` as `afile`:

```
 afile.write(ciphertext)
#+END_SRC
```

Though this is even more likely to be used like this; with the plaintext input read from a file, the recipient keys used for encryption regardless of key trust status and the encrypted output also encrypted to any preconfigured keys set in the `=gpg.conf=` file:

```
#+BEGIN_SRC python -i
import gpg

a_key = "0x12345678DEADBEEF"
```

```

with open("secret_plans.txt", "rb") as afile:
 text = afile.read()

c = gpg.Context(armor=True)
rkey = list(c.keylist(pattern=a_key, secret=False))
ciphertext,
result, sign_result = c.encrypt(text, recipients=rkey, sign=True,
 always_trust=True,
 add_encrypt_to=True)

```

```

with open("secret_plans.txt.asc", "wb") as afile:
 afile.write(ciphertext)
#+END_SRC

```

If the `=recipients=` parameter is empty then the plaintext is encrypted symmetrically. If no `=passphrase=` is supplied as a parameter or via a callback registered with the `=Context()=` then an out-of-band prompt for the passphrase via `pinentry` will be invoked.

```

*** Encrypting to multiple keys
:PROPERTIES:
:CUSTOM_ID: howto-basic-encryption-multiple
:END:

```

Encrypting to multiple keys essentially just expands upon the key selection process and the recipients from the previous examples.

The following example encrypts a message (`=text=`) to everyone with an email address on the `=gnupg.org=` domain, `[fn:4]` but does `/not/` encrypt to a default key or other key which is configured to normally encrypt to.

```

#+BEGIN_SRC python -i
import gpg

text = b""Oh look, another test message.

```

The same rules apply as with the previous example and more likely than not, the message will actually be drawn from reading the contents of a file or, maybe, from entering data at an `input()` prompt.

Since the text in this case must be bytes, it is most likely that the input form will be a separate file which is opened with `"rb"` as this is the simplest method of obtaining the correct data format.

```
"""
```

```
c = gpg.Context(armor=True)
rpattern = list(c.keylist(pattern="@gnupg.org", secret=False))
logrus = []

for i in range(len(rpattern)):
 if rpattern[i].can_encrypt == 1:
 logrus.append(rpattern[i])

ciphertext, result, sign_result = c.encrypt(text, recipients=logrus,
 sign=False, always_trust=True)

with open("secret_plans.txt.asc", "wb") as afile:
 afile.write(ciphertext)
#+END_SRC
```

All it would take to change the above example to sign the message and also encrypt the message to any configured default keys would be to change the `=c.encrypt=` line to this:

```
#+BEGIN_SRC python -i
ciphertext, result, sign_result = c.encrypt(text, recipients=logrus,
 always_trust=True,
 add_encrypt_to=True)
#+END_SRC
```

The only keyword arguments requiring modification are those for which the default values are changing. The default value of `=sign=` is `=True=`, the default of `=always_trust=` is `=False=`, the default of `=add_encrypt_to=` is `=False=`.

If `=always_trust=` is not set to `=True=` and any of the recipient keys are not trusted (e.g. not signed or locally signed) then the encryption will raise an error. It is possible to mitigate this somewhat with something more like this:

```
#+BEGIN_SRC python -i
import gpg

with open("secret_plans.txt.asc", "rb") as afile:
 text = afile.read()

c = gpg.Context(armor=True)
rpattern = list(c.keylist(pattern="@gnupg.org",
 secret=False))
logrus = []
```

```

for i in range(len(rpattern)):
 if rpattern[i].can_encrypt == 1:
 logrus.append(rpattern[i])

try:
 ciphertext, result, sign_result = c.encrypt(text, recipients=logrus,
 add_encrypt_to=True)
except gpg.errors.InvalidRecipients as e:
 for i in range(len(e.recipients)):
 for n in range(len(logrus)):
 if logrus[n].fpr == e.recipients[i].fpr:
 logrus.remove(logrus[n])
 else:
 pass
try:
 ciphertext, result, sign_result = c.encrypt(text,
 recipients=logrus,
 add_encrypt_to=True)
 with open("secret_plans.txt.asc", "wb") as afile:
 afile.write(ciphertext)
except:
 pass
#+END_SRC

```

This will attempt to encrypt to all the keys searched for, then remove invalid recipients if it fails and try again.

```

** Decryption
:PROPERTIES:
:CUSTOM_ID: howto-basic-decryption
:END:

```

Decrypting something encrypted to a key in one's secret keyring is fairly straight forward.

In this example code, however, preconfiguring either `=gpg.Context()` or `=gpg.core.Context()` as `=c=` is unnecessary because there is no need to modify the Context prior to conducting the decryption and since the Context is only used once, setting it to `=c=` simply adds lines for no gain.

```

#+BEGIN_SRC python -i
import gpg

ciphertext = input("Enter path and filename of encrypted file: ")

```

```
newfile = input("Enter path and filename of file to save decrypted data to: ")
```

```
with open(ciphertext, "rb") as cfile:
 try:
 plaintext, result, verify_result = gpg.Context().decrypt(cfile)
 except gpg.errors.GPGMEError as e:
 plaintext = None
 print(e)

if plaintext is not None:
 with open(newfile, "wb") as nfile:
 nfile.write(plaintext)

 else:
 pass
#+END_SRC
```

The data available in `plaintext` in this example is the decrypted content as a byte object, the recipient key IDs and algorithms in `result` and the results of verifying any signatures of the data in `verify_result`.

If `gpg.Context().decrypt(cfile, verify=False)` is called instead, then `verify_result` will be returned as `None` and the rest remains as described here.

**\*\* Signing text and files**

```
:PROPERTIES:
:CUSTOM_ID: howto-basic-signing
:END:
```

The following sections demonstrate how to specify keys to sign with.

**\*\*\* Signing key selection**

```
:PROPERTIES:
:CUSTOM_ID: howto-basic-signing-signers
:END:
```

By default GPGME and the Python bindings will use the default key configured for the user invoking the GPGME API. If there is no default key specified and there is more than one secret key available it may be necessary to specify the key or keys with which to sign messages and files.

```
#+BEGIN_SRC python -i
import gpg
```

```
logrus = input("Enter
the email address or string to match signing keys to: ")
hancock = gpg.Context().keylist(pattern=logrus, secret=True)
sig_src = list(hancock)
#+END_SRC
```

The signing examples in the following sections include the explicitly designated `=signers=` parameter in two of the five examples; once where the resulting signature would be ASCII armoured and once where it would not be armoured.

While it would be possible to enter a key ID or fingerprint here to match a specific key, it is not possible to enter two fingerprints and match two keys since the `patten` expects a string, bytes or None and not a list. A string with two fingerprints won't match any single key.

```
*** Normal or default signing messages or files
:PROPERTIES:
:CUSTOM_ID: howto-basic-signing-normal
:END:
```

The normal or default signing process is essentially the same as is most often invoked when also encrypting a message or file. So when the encryption component is not utilised, the result is to produce an encoded and signed output which may or may not be ASCII armoured and which may or may not also be compressed.

By default compression will be used unless GnuPG detects that the plaintext is already compressed. ASCII armouring will be determined according to the value of `=gpg.Context().armor=`.

The compression algorithm is selected in much the same way as the symmetric encryption algorithm or the hash digest algorithm is when multiple keys are involved; from the preferences saved into the key itself or by comparison with the preferences with all other keys involved.

```
#+BEGIN_SRC python -i
import gpg

text0 = """Declaration of ... something.

"""
text = text0.encode()
```

```
c = gpg.Context(armor=True, signers=sig_src)
signed_data, result = c.sign(text, mode=gpg.constants.sig.mode.NORMAL)
```

with open("/path/to/statement.txt.asc", "w") as afile:

```
 afile.write(signed_data.decode())
```

```
#+END_SRC
```

Though everything in this example is accurate, it is more likely that reading the input data from another file and writing the result to a new file will be performed more like the way it is done in the next example. Even if the output format is ASCII armoured.

```
#+BEGIN_SRC python -i
```

```
import gpg
```

with open("/path/to/statement.txt", "rb") as tfile:

```
 text = tfile.read()
```

```
c = gpg.Context()
```

```
signed_data, result = c.sign(text, mode=gpg.constants.sig.mode.NORMAL)
```

with open("/path/to/statement.txt.sig", "wb") as afile:

```
 afile.write(signed_data)
```

```
#+END_SRC
```

```
*** Detached signing messages and files
```

```
:PROPERTIES:
```

```
:CUSTOM_ID: howto-basic-signing-detached
```

```
:END:
```

Detached signatures will often be needed in programmatic uses of GPGME, either for signing files (e.g. tarballs of code releases) or as a component of message signing (e.g. PGP/MIME encoded email).

```
#+BEGIN_SRC python -i
```

```
import gpg
```

```
text0 = """Declaration of ... something.
```

```
"""
```

```
text = text0.encode()
```

```
c = gpg.Context(armor=True)
```

```
signed_data, result = c.sign(text, mode=gpg.constants.sig.mode.DETACH)
```

```
with open("/path/to/statement.txt.asc",
" w") as afile:
 afile.write(signed_data.decode())
#+END_SRC
```

As with normal signatures, detached signatures are best handled as byte literals, even when the output is ASCII armoured.

```
#+BEGIN_SRC python -i
import gpg

with open("/path/to/statement.txt", "rb") as tfile:
 text = tfile.read()

c = gpg.Context(signers=sig_src)
signed_data, result = c.sign(text, mode=gpg.constants.sig.mode.DETACH)

with open("/path/to/statement.txt.sig", "wb") as afile:
 afile.write(signed_data)
#+END_SRC
```

```
*** Clearsigning messages or text
:PROPERTIES:
:CUSTOM_ID: howto-basic-signing-clear
:END:
```

Though PGP/in-line messages are no longer encouraged in favour of PGP/MIME, there is still sometimes value in utilising in-line signatures. This is where clear-signed messages or text is of value.

```
#+BEGIN_SRC python -i
import gpg

text0 = """Declaration of ... something.

"""
text = text0.encode()

c = gpg.Context()
signed_data, result = c.sign(text, mode=gpg.constants.sig.mode.CLEAR)

with
open("/path/to/statement.txt.asc", "w") as afile:
 afile.write(signed_data.decode())
#+END_SRC
```

In spite of the appearance of a clear-signed message, the data handled

by GPGME in signing it must still be byte literals.

```
#+BEGIN_SRC python -i
import gpg

with open("/path/to/statement.txt", "rb") as tfile:
 text = tfile.read()

c = gpg.Context()
signed_data, result = c.sign(text, mode=gpg.constants.sig.mode.CLEAR)

with open("/path/to/statement.txt.asc", "wb") as afile:
 afile.write(signed_data)
#+END_SRC
```

```
** Signature verification
:PROPERTIES:
:CUSTOM_ID: howto-basic-verification
:END:
```

Essentially there are two principal methods of verification of a signature. The first of these is for use with the normal or default signing method and for clear-signed messages. The second is for use with files and data with detached signatures.

The following example is intended for use with the default signing method where the file was not ASCII armoured:

```
#+BEGIN_SRC python
-i
import gpg
import time

filename = "statement.txt"
gpg_file = "statement.txt.gpg"

c = gpg.Context()

try:
 data, result = c.verify(open(gpg_file))
 verified = True
except gpg.errors.BadSignatures as e:
 verified = False
 print(e)

if verified is True:
 for i in range(len(result.signatures)):
```

```

 sign = result.signatures[i]
 print("""Good signature from:
{0}
with key {1}
made at {2}
""".format(c.get_key(sign.fpr).uids[0].uid, sign.fpr,
 time.ctime(sign.timestamp)))
else:
 pass
#+END_SRC

```

Whereas this next example, which is almost identical would work with normal ASCII armoured files and with clear-signed files:

```

#+BEGIN_SRC python -i
import gpg
import time

filename = "statement.txt"
asc_file = "statement.txt.asc"

c = gpg.Context()

try:
 data, result = c.verify(open(asc_file))
 verified = True
except gpg.errors.BadSignatures as e:
 verified = False
 print(e)

if verified is True:
 for i in range(len(result.signatures)):
 sign = result.signatures[i]
 print("""Good signature from:
{0}
with key {1}
made at {2}
""".format(c.get_key(sign.fpr).uids[0].uid, sign.fpr,
 time.ctime(sign.timestamp)))
else:
 pass
#+END_SRC

```

In both of the previous examples it is also possible to compare the original data that was signed against the signed data in =data= to see if it matches with something like this:

```

#+BEGIN_SRC python -i

```

```
with open(filename, "rb") as afile:
```

```
 text = afile.read()
```

```
if text == data:
```

```
 print("Good signature.")
```

```
else:
```

```
 pass
```

```
#+END_SRC
```

The following two examples, however, deal with detached signatures.

With his method of verification the data that was signed does not get returned since it is already being explicitly referenced in the first argument of `c.verify`. So `data` is `None` and only the information in `result` is available.

```
#+BEGIN_SRC python -i
```

```
import gpg
```

```
import time
```

```
filename = "statement.txt"
```

```
sig_file = "statement.txt.sig"
```

```
c = gpg.Context()
```

```
try:
```

```
 data,
```

```
 result = c.verify(open(filename), open(sig_file))
```

```
 verified = True
```

```
except gpg.errors.BadSignatures as e:
```

```
 verified = False
```

```
 print(e)
```

```
if verified is True:
```

```
 for i in range(len(result.signatures)):
```

```
 sign = result.signatures[i]
```

```
 print("""Good signature from:
```

```
{0}
```

```
with key {1}
```

```
made at {2}
```

```
""").format(c.get_key(sign.fpr).uids[0].uid, sign.fpr,
 time.ctime(sign.timestamp)))
```

```
else:
```

```
 pass
```

```
#+END_SRC
```

```
#+BEGIN_SRC python -i
```

```
import gpg
```

```
import time
```

```

filename = "statement.txt"
asc_file = "statement.txt.asc"

c = gpg.Context()

try:
 data, result = c.verify(open(filename), open(asc_file))
 verified = True
except gpg.errors.BadSignatures as e:
 verified = False
 print(e)

if verified is True:
 for i in range(len(result.signatures)):
 sign = result.signatures[i]
 print("""Good signature from:
{0}
with key {1}
made at {2}
""".format(c.get_key(sign.fpr).uids[0].uid, sign.fpr,
 time.ctime(sign.timestamp)))
 else:
 pass
#+END_SRC

```

\*

```

Creating keys and subkeys
:PROPERTIES:
:CUSTOM_ID: key-generation
:END:

```

The one thing, aside from GnuPG itself, that GPGME depends on, of course, is the keys themselves. So it is necessary to be able to generate them and modify them by adding subkeys, revoking or disabling them, sometimes deleting them and doing the same for user IDs.

In the following examples a key will be created for the world's greatest secret agent, Danger Mouse. Since Danger Mouse is a secret agent he needs to be able to protect information to =SECRET= level clearance, so his keys will be 3072-bit keys.

The pre-configured =gpg.conf= file which sets cipher, digest and other preferences contains the following configuration parameters:

```

#+BEGIN_SRC conf
expert

```

```

allow-freeform-uid
allow-secret-key-import
trust-model tofu+pgp
tofu-default-policy unknown
enable-large-rsa
enable-dsa2
cert-digest-algo SHA512
default-preference-list TWOFISH CAMELLIA256 AES256 CAMELLIA192 AES192 CAMELLIA128
AES BLOWFISH IDEA CAST5 3DES SHA512 SHA384 SHA256 SHA224 RIPEMD160 SHA1 ZLIB BZIP2 ZIP
Uncompressed
personal-cipher-preferences TWOFISH CAMELLIA256 AES256 CAMELLIA192 AES192 CAMELLIA128 AES
BLOWFISH IDEA CAST5 3DES
personal-digest-preferences SHA512 SHA384 SHA256 SHA224 RIPEMD160 SHA1
personal-compress-preferences ZLIB BZIP2 ZIP Uncompressed
#+END_SRC

```

```

** Primary key
:PROPERTIES:
:CUSTOM_ID: keygen-primary
:END:

```

Generating a primary key uses the `create_key` method in a Context. It contains multiple arguments and keyword arguments, including: `userid`, `algorithm`, `expires_in`, `expires`, `sign`, `encrypt`, `certify`, `authenticate`, `passphrase` and `force`. The defaults for all of those except `userid`, `algorithm`, `expires_in`, `expires` and `passphrase` is `False`. The defaults for `algorithm` and `passphrase` is `None`. The default for `expires_in` is `0`. The default for `expires` is `True`. There is no default for `userid`.

If `passphrase` is left as `None` then the key will not be generated with a passphrase, if `passphrase` is set to a string then that will be the passphrase and if `passphrase` is set to `True` then `gpg-agent` will launch `pinentry` to prompt for a passphrase. For the sake of convenience, these examples will keep `passphrase` set to `None`.

```

#+BEGIN_SRC python -i
import gpg

c = gpg.Context()

c.home_dir = "~/.gnupg-dm"
userid = "Danger Mouse <dm@secret.example.net>"

dmkey = c.create_key(userid, algorithm="rsa3072", expires_in=31536000,
 sign=True, certify=True)

```

```
#+END_SRC
```

One thing to note here is the use of setting the `=c.home_dir=` parameter. This enables generating the key or keys in a different location. In this case to keep the new key data created for this example in a separate location rather than adding it to existing and active key store data. As with the default directory, `=~/gnupg=`, any temporary or separate directory needs the permissions set to only permit access by the directory owner. On posix systems this means setting the directory permissions to 700.

The `=temp-homedir-config.py=` script in the HOWTO examples directory will create an alternative homedir with these configuration options already set and the correct directory and file permissions.

The successful generation of the key can be confirmed via the returned `=GenkeyResult=` object, which includes the following data:

```
#+BEGIN_SRC python -i
print("""
Fingerprint: {0}
Primary Key: {1}
Public Key: {2}
Secret Key: {3}
Sub Key: {4}
User IDs: {5}
""").format(dmkey.fpr, dmkey.primary, dmkey.pubkey, dmkey.seckey, dmkey.sub,
 dmkey.uid)
#+END_SRC
```

Alternatively the information can be confirmed using the command line program:

```
#+BEGIN_SRC shell
bash-4.4$ gpg --homedir ~/.gnupg-dm -K
~/.gnupg-dm/pubring.kbx

sec rsa3072 2018-03-15 [SC] [expires: 2019-03-15]
177B7C25DB99745EE2EE13ED026D2F19E99E63AA
uid [ultimate] Danger Mouse <dm@secret.example.net>

bash-4.4$
#+END_SRC
```

As with generating keys manually, to preconfigure expanded preferences for the cipher, digest and compression algorithms, the `=gpg.conf=` file must contain those details in the home directory in which the new key

is being generated. I used a cut down version of my own =gpg.conf= file in order to be able to generate this:

```
#+BEGIN_SRC shell
bash-4.4$ gpg --homedir ~/.gnupg-dm --edit-key 177B7C25DB99745EE2EE13ED026D2F19E99E63AA showpref
quit
Secret key is available.

sec rsa3072/026D2F19E99E63AA
 created: 2018-03-15 expires: 2019-03-15 usage: SC
 trust: ultimate validity: ultimate
[ultimate] (1). Danger Mouse <dm@secret.example.net>

[ultimate] (1). Danger Mouse <dm@secret.example.net>
 Cipher: TWOFISH, CAMELLIA256, AES256, CAMELLIA192, AES192, CAMELLIA128, AES, BLOWFISH,
IDEA, CAST5, 3DES

bash-4.4$
#+END_SRC
```

```
** Subkeys
:PROPERTIES:
:CUSTOM_ID: keygen-subkeys
:END:
```

Adding subkeys to a primary key is fairly similar to creating the primary key with the =create\_subkey= method. Most of the arguments are the same, but not quite all. Instead of the =userid= argument there is now a =key= argument for selecting which primary key to add the subkey to.

In the following example an encryption subkey will be added to the primary key. Since Danger Mouse is a security conscious secret agent, this subkey will only be valid for about six months, half the length of the primary key.

```
#+BEGIN_SRC python -i
import gpg

c = gpg.Context()
c.home_dir = "~/.gnupg-dm"

key = c.get_key(dmkey.fpr, secret=True)
```

```
dmsub = c.create_subkey(key, algorithm="rsa3072", expires_in=15768000,
 encrypt=True)
#+END_SRC
```

As with the primary key, the results here can be checked with:

```
#+BEGIN_SRC python -i
print("""
Fingerprint: {0}
Primary Key: {1}
 Public Key: {2}
 Secret Key: {3}
Sub Key: {4}
User IDs: {5}
""").format(dmsub.fpr, dmsub.primary, dmsub.pubkey, dmsub.seckey, dmsub.sub,
 dmsub.uid)
#+END_SRC
```

As well as on the command line with:

```
#+BEGIN_SRC shell
bash-4.4$ gpg --homedir ~/.gnupg-dm -K
~/.gnupg-dm/pubring.kbx

sec rsa3072 2018-03-15 [SC] [expires: 2019-03-15]
177B7C25DB99745EE2EE13ED026D2F19E99E63AA
uid [ultimate] Danger Mouse <dm@secret.example.net>
ssb rsa3072 2018-03-15 [E] [expires: 2018-09-13]

bash-4.4$
#+END_SRC
```

```
** User IDs
:PROPERTIES:
:CUSTOM_ID: keygen-uids
:END:
```

```
*** Adding User IDs
:PROPERTIES:
:CUSTOM_ID: keygen-uids-add
:END:
```

By comparison to creating primary keys and subkeys, adding a new user ID to an existing key is much simpler. The method used to do this is `=key_add_uid=` and the only arguments it takes are for the `=key=` and the new `=uid=`.

```

#+BEGIN_SRC python -i
import gpg

c = gpg.Context()
c.home_dir = "~/gnupg-dm"

dmfpr
= "177B7C25DB99745EE2EE13ED026D2F19E99E63AA"
key = c.get_key(dmfpr, secret=True)
uid = "Danger Mouse <danger.mouse@secret.example.net>"

c.key_add_uid(key, uid)
#+END_SRC

```

Unsurprisingly the result of this is:

```

#+BEGIN_SRC shell
bash-4.4$ gpg --homedir ~/.gnupg-dm -K
~/.gnupg-dm/pubring.kbx

sec rsa3072 2018-03-15 [SC] [expires: 2019-03-15]
177B7C25DB99745EE2EE13ED026D2F19E99E63AA
uid [ultimate] Danger Mouse <danger.mouse@secret.example.net>
uid [ultimate] Danger Mouse <dm@secret.example.net>
ssb rsa3072 2018-03-15 [E] [expires: 2018-09-13]

bash-4.4$
#+END_SRC

```

```

*** Revoking User IDs
:PROPERTIES:
:CUSTOM_ID: keygen-uids-revoke
:END:

```

Revoking a user ID is a fairly similar process, except that it uses the `=key_revoke_uid=` method.

```

#+BEGIN_SRC python -i
import gpg

c = gpg.Context()
c.home_dir = "~/gnupg-dm"

dmfpr = "177B7C25DB99745EE2EE13ED026D2F19E99E63AA"
key = c.get_key(dmfpr, secret=True)
uid

```

```
= "Danger Mouse <danger.mouse@secret.example.net>"
```

```
c.key_revoke_uid(key, uid)
#+END_SRC
```

```
** Key certification
:PROPERTIES:
:CUSTOM_ID: key-sign
:END:
```

Since key certification is more frequently referred to as key signing, the method used to perform this function is `=key_sign=`.

The `=key_sign=` method takes four arguments: `=key=`, `=uids=`, `=expires_in=` and `=local=`. The default value of `=uids=` is `=None=` and which results in all user IDs being selected. The default value of both `=expires_in=` and `=local=` is `=False=`; which results in the signature never expiring and being able to be exported.

The `=key=` is the key being signed rather than the key doing the signing. To change the key doing the signing refer to the signing key selection above for signing messages and files.

If the `=uids=` value is not `=None=` then it must either be a string to match a single user ID or a list of strings to match multiple user IDs. In this case the matching of those strings must be precise and it is case sensitive.

To sign Danger Mouse's key for just the initial user ID with a signature which will last a little over a month, do this:

```
#+BEGIN_SRC python -i
import gpg

c = gpg.Context()
uid = "Danger Mouse <dm@secret.example.net>"

dmfpr = "177B7C25DB99745EE2EE13ED026D2F19E99E63AA"
key = c.get_key(dmfpr, secret=True)
c.key_sign(key, uids=uid, expires_in=2764800)
#+END_SRC
```

```
*** Verifying key certifications
:PROPERTIES:
:CUSTOM_ID: key-sign-verify
```

:END:

```
#+BEGIN_SRC python -i
import gpg
import time

c = gpg.Context()
dmfpr = "177B7C25DB99745EE2EE13ED026D2F19E99E63AA"
keys = list(c.keylist(pattern=dmuid, mode=gpg.constants.keylist.mode.SIGS))
key = keys[0]

for user in key.uids:
 for sig in user.signatures:
 print("0x{0}".format(sig.keyid), "", time.ctime(sig.timestamp), "",
 sig.uid)
#+END_SRC
```

Which for Danger Mouse displays the following:

```
#+BEGIN_EXAMPLE
0x92E3F6115435C65A Thu Mar 15 13:17:44 2018 Danger Mouse <dm@secret.example.net>
0x321E4E2373590E5D Mon Nov 26 12:46:05 2018 Ben McGinnes <ben@adversary.org>
#+END_EXAMPLE
```

The two key signatures listed are for the self-certification of Danger Mouse's key made when the key was created in March, 2018; and the second is a signature made by the author and set to expire at the end of the year. Note that the second signature was made with the following code (including the preceding code to display the output of the certifications or key signatures):

```
#+BEGIN_SRC python -i
import gpg
import math
import pendulum
import time

hd = "/home/dm/.gnupg"
c = gpg.Context()
d = gpg.Context(home_dir=hd)
dmfpr = "177B7C25DB99745EE2EE13ED026D2F19E99E63AA"
dmuid = "Danger Mouse <dm@secret.example.net>"
dkeys = list(c.keylist(pattern=dmuid))
dmkey = dkeys[0]

c.key_import(d.key_export(pattern=None))

tp = pendulum.period(pendulum.now(tz="local"), pendulum.datetime(2019, 1, 1))
```

```

ts = tp.total_seconds()
total_secs = math.ceil(ts)
c.key_sign(dmkey, uids=dmuid, expires_in=total_secs)

d.key_import(c.key_export(pattern=dmuid))
keys
= list(c.keylist(pattern=dmuid, mode=gpg.constants.keylist.mode.SIGS))
key = keys[0]

for user in key.uids:
 for sig in user.signatures:
 print("0x{0}".format(sig.keyid), "", time.ctime(sig.timestamp), "",
 sig.uid)
#+END_SRC

```

Note that this final code block includes the use of a module which is *not* part of Python's standard library, the [\[\[https://pendulum.eustace.io/\]\[pendulum module\]\]](https://pendulum.eustace.io/). Unlike the standard datetime module, pendulum makes working with dates and times significantly easier in Python; just as the requests module makes working with HTTP and HTTPS easier than the builtin modules do.

Though neither requests nor pendulum are required modules for using the GPGME Python bindings, they are both highly recommended more generally.

\* Advanced or Experimental Use Cases

```

:PROPERTIES:
:CUSTOM_ID: advanced-use
:END:

```

\*\* C plus Python plus SWIG plus Cython

```

:PROPERTIES:
:CUSTOM_ID: cython
:END:

```

In

spite of the apparent incongruence of using Python bindings to a C interface only to generate more C from the Python; it is in fact quite possible to use the GPGME bindings with [\[\[http://docs.cython.org/en/latest/index.html\]\[Cython\]\]](http://docs.cython.org/en/latest/index.html). Though in many cases

the benefits may not be obvious since the most computationally intensive work never leaves the level of the C code with which GPGME itself is interacting with.

Nevertheless, there are some situations where the benefits are demonstrable. One of the better and easier examples being the one of

the early examples in this HOWTO, the `keycounting` code. Running that example as an executable Python script, `keycount.py` (available in the `examples/howto/` directory), will take a noticeable amount of time to run on most systems where the public keybox or keyring contains a few thousand public keys.

Earlier in the evening, prior to starting this section, I ran that script on my laptop; as I tend to do periodically and timed it using `time` utility, with the following results:

```
#+BEGIN_SRC shell
bash-4.4$ time keycount.py
```

```
Number of secret keys: 23
Number of public keys: 12112
```

```
real 11m52.945s
user 0m0.913s
sys 0m0.752s
```

```
bash-4.4$
#+END_SRC
```

Sometime after that I imported another key and followed it with a little test of Cython. This test was kept fairly basic, essentially lifting the material from the [http://docs.cython.org/en/latest/src/tutorial/cython\\_tutorial.html](http://docs.cython.org/en/latest/src/tutorial/cython_tutorial.html) [Cython Basic Tutorial] to demonstrate compiling Python code to C. The first step was to take the example key counting code quoted previously, essentially from the importing of the `gpg` module to the end of the script:

```
#+BEGIN_SRC python -i
import gpg

c = gpg.Context()
seckeys = c.keylist(pattern=None, secret=True)
pubkeys = c.keylist(pattern=None, secret=False)

seclist = list(seckeys)
secnum = len(seclist)

publist = list(pubkeys)
pubnum = len(publist)

print("""
 Number of secret keys: {0}
```

Number  
of public keys: {1}

```
"".format(secnum, pubnum))
#+END_SRC
```

Save that into a file called =keycount.pyx= and then create a  
=setup.py= file which contains this:

```
#+BEGIN_SRC python -i
from distutils.core import setup
from Cython.Build import cythonize

setup(
 ext_modules = cythonize("keycount.pyx")
)
#+END_SRC
```

Compile it:

```
#+BEGIN_SRC shell
bash-4.4$ python setup.py build_ext --inplace
bash-4.4$
#+END_SRC
```

Then run it in a similar manner to =keycount.py=:

```
#+BEGIN_SRC shell
bash-4.4$ time python3.7 -c "import keycount"
```

Number of secret keys: 23  
Number of public keys: 12113

```
real 6m47.905s
user 0m0.785s
sys 0m0.331s
```

```
bash-4.4$
#+END_SRC
```

Cython turned =keycount.pyx= into an 81KB =keycount.o= file in the  
=build/= directory, a 24KB =keycount.cpython-37m-darwin.so= file to be  
imported into Python 3.7 and a 113KB =keycount.c= generated C source  
code file of nearly three thousand lines. Quite a bit bigger than the  
314 bytes of the =keycount.pyx= file or the full  
1,452 bytes of the  
full executable =keycount.py= example script.

On the other hand it ran in nearly half the time; taking 6 minutes and 47.905 seconds to run. As opposed to the 11 minutes and 52.945 seconds which the CPython script alone took.

The `=keycount.pyx=` and `=setup.py=` files used to generate this example have been added to the `=examples/howto/advanced/cython/=` directory. The example versions include some additional options to annotate the existing code and to detect Cython's use. The latter comes from the [\[http://docs.cython.org/en/latest/src/tutorial/pure.html#magic-attributes-within-the-pxd\]](http://docs.cython.org/en/latest/src/tutorial/pure.html#magic-attributes-within-the-pxd) [Magic Attributes] section of the Cython documentation.

\* Miscellaneous extras and work-arounds

```
:PROPERTIES:
:CUSTOM_ID: cheats-and-hacks
:END:
```

Most of the things in the following sections are here simply because there was no better place to put them, even though some are only peripherally related to the GPGME Python bindings. Some are also workarounds for functions not integrated with GPGME as yet. This is especially true of the first of these, dealing with `[[#group-lines]][group lines]`.

\*\* Group lines

```
:PROPERTIES:
:CUSTOM_ID: group-lines
:END:
```

There is not yet an easy way to access groups configured in the `gpg.conf` file from within GPGME. As a consequence these central groupings of keys cannot be shared amongst multiple programs, such as MUAs readily.

The following code, however, provides a work-around for obtaining this information in Python.

```
#+BEGIN_SRC python -i
import subprocess
import sys

if sys.platform == "win32":
 gpgconfcmd = "gpgconf.exe --list-options gpg"
else:
 gpgconfcmd = "gpgconf --list-options gpg"
```

```

process = subprocess.Popen(gpgconfgcmd.split(), stdout=subprocess.PIPE)
procom = process.communicate()

if sys.version_info[0] == 2:
 lines = procom[0].splitlines()
else:
 lines = procom[0].decode().splitlines()

for line in lines:
 if line.startswith("group") is True:
 break

groups = line.split(":-")[-1].replace("'",
 ").split(',')

group_lines = []
group_lists = []

for group in groups:
 group_lines.append(group.split("="))
 group_lists.append(group.split("="))

for glist in group_lists:
 glist[1] = glist[1].split()
#+END_SRC

```

The result of that code is that `group_lines` is a list of lists where `group_lines[i][0]` is the name of the group and `group_lines[i][1]` is the key IDs of the group as a string.

The `group_lists` result is very similar in that it is a list of lists. The first part, `group_lists[i][0]` matches `group_lines[i][0]` as the name of the group, but `group_lists[i][1]` is the key IDs of the group as a list.

A demonstration of using the `groups.py` module is also available in the form of the executable `mutt-groups.py` script. This second script reads all the group entries in a user's `gpg.conf` file and converts them into crypt-hooks suitable for use with the Mutt and Neomutt mail clients.

```

** Keyserver access for Python
:PROPERTIES:
:CUSTOM_ID:
hkp4py
:END:

```

The [\[\[https://github.com/Selfnet/hkp4py\]\]](https://github.com/Selfnet/hkp4py) module by Marcel Fest was originally a port of the old [\[\[https://github.com/dgladkov/python-hkp\]\]](https://github.com/dgladkov/python-hkp) module from Python 2 to Python 3 and updated to use the [\[\[http://docs.python-requests.org/en/latest/index.html\]\]](http://docs.python-requests.org/en/latest/index.html) module instead. It has since been modified to provide support for Python 2.7 as well and is available via PyPI.

Since it rewrites the `=hkp=` protocol prefix as `=http=` and `=hkps=` as `=https=`, the module is able to be used even with servers which do not support the full scope of keyserver functions.<sup>[fn:5]</sup> It also works quite readily when incorporated into a [\[\[#cython\]\]](#) generated and compiled version of any code.

```
*** Key import format
:PROPERTIES:
:CUSTOM_ID: hkp4py-strings
:END:
```

The `hkp4py` module returns key data via requests as string literals (`=r.text=`) instead of byte literals (`=r.content=`). This means that the returned key data must be encoded to UTF-8 when importing that key material using a `=gpg.Context().key_import(=` method.

For this reason an alternative method has been added to the `=search=` function of `=hkp4py.KeyServer(=` which returns the key in the correct format as expected by `=key_import=`. When importing using this module, it is now possible to import with this:

```
#+BEGIN_SRC python -i
for key in keys:
 if key.revoked is False:
 gpg.Context().key_import(key.key_blob)
 else:
 pass
#+END_SRC
```

Without that recent addition it would have been necessary to encode the contents of each `=hkp4py.KeyServer().search()[i].key=` in `=hkp4py.KeyServer().search(=` before trying to import it.

An example of this is included in the [\[\[#howto-import-key\]\]](#) section of this HOWTO and the corresponding executable version of that example is available in the `=lang/python/examples/howto=` directory as normal; the executable version is the `=import-keys-hkp.py=` file.

\*\* GPGME version checking

```
:PROPERTIES:
:CUSTOM_ID: gpgme-version-check
:END:
```

For various reasons it may be necessary to check which version of GPGME the bindings have been built against; including whether a minimum required version of GPGME is in use.

For the most part the `=gpg.version.versionstr=` and `=gpg.version.versionlist=` methods have been quite sufficient. The former returns the same string as `=gpgme-config --version=`, while the latter returns the major, minor and patch values in a list.

To check if the installed bindings have actually been built against the current installed `libgpgme` version, this check can be performed:

```
#+BEGIN_SRC python -i
import gpg
import subprocess
import sys

gpgme_version_call = subprocess.Popen(["gpgme-config", "--version"],
 stdout=subprocess.PIPE,
 stderr=subprocess.PIPE)
gpgme_version_str = gpgme_version_call.communicate()

if sys.version_info[0] == 2:
 gpgme_version = gpgme_version_str[0].strip()
elif sys.version_info[0]
>= 3:
 gpgme_version = gpgme_version_str[0].decode().strip()
else:
 gpgme_version = None

if gpgme_version is not None:
 if gpgme_version == gpg.version.versionstr:
 print("The GPGME Python bindings match libgpgme.")
 else:
 print("The GPGME Python bindings do NOT match libgpgme.")
else:
 print("Upgrade Python and reinstall the GPGME Python bindings.")
#+END_SRC
```

For many developers, however, the preferred checking means checking for a minimum version or point release. This is now readily available via the `=gpg.version.versionintlist=` method (added in version `=1.12.1-beta79=`). It is also now possible to easily check whether the installed GPGME Python bindings were built from a development or beta

branch of the GPGME source code.

The following code demonstrates how both of those methods may be used:

```
#+BEGIN_SRC python -i
import gpg

try:
 if gpg.version.is_beta is True:
 print("The installed GPGME Python bindings were built from beta code.")
 else:
 print("The installed GPGME Python bindings are a released version.")
except Exception as e:
 print(e)

try:
 if gpg.version.versionintlist[0] == 1:
 if gpg.version.versionintlist[1] == 12:
 if gpg.version.versionintlist[2] == 1:
 print("This is the minimum version for using versionintlist.")
 elif gpg.version.versionintlist[2] > 1:
 print("The versionintlist method is available.")
 else:
 pass
 elif gpg.version.versionintlist[1] > 12:
 print("The versionintlist method is available.")
 else:
 pass
 elif gpg.version.versionintlist[0] > 1:
 print("The versionintlist method is available.")
 else:
 pass
except Exception as e:
 print(e)
#+END_SRC
```

The points where `=pass=` is used in the above example will most likely also produce an `=Exception=` error since those results should only occur in versions which do not have the `=gpgme.version.is_beta=` and `=gpgme.version.versionintlist=` methods available.

```
* Copyright and Licensing
:PROPERTIES:
:CUSTOM_ID: copyright-and-license
:END:
```

\*\* Copyright

:PROPERTIES:

:CUSTOM\_ID: copyright

:END:

Copyright The GnuPG Project, 2018.

\*\* Draft Editions of this HOWTO

:PROPERTIES:

:CUSTOM\_ID: draft-editions

:END:

Draft editions of this HOWTO may be periodically available directly from the author at any of the following URLs:

- <https://files.au.adversary.org/crypto/gpgme-python-howto.html> [GPGME Python Bindings HOWTO draft (HTML single file, AWS S3 SSL)]
- <http://files.au.adversary.org/crypto/gpgme-python-howto.html> [GPGME Python Bindings HOWTO draft (HTML single file, AWS S3 no SSL)]
- <https://files.au.adversary.org/crypto/gpgme-python-howto-split/index.html> [GPGME Python Bindings HOWTO draft (HTML multiple files, AWS S3 SSL)]
- <http://files.au.adversary.org/crypto/gpgme-python-howto/index.html> [GPGME Python Bindings HOWTO draft (HTML multiple files, AWS S3 no SSL)]

These draft versions have been generated from this document via GNU

Emacs <https://orgmode.org/> [Org mode] to =.texi= and <https://www.gnu.org/software/texinfo/> [GNU Texinfo] to HTML. Though it is

likely that the specific <https://files.au.adversary.org/crypto/gpgme-python-howto/> [file]

<http://files.au.adversary.org/crypto/gpgme-python-howto.org/> [version] used will be on the same server

with the generated output formats. Occasionally I may include the Org

mode generated XHTML versions:

- <https://files.au.adversary.org/crypto/gpgme-python-howto.xhtml> [GPGME Python Bindings HOWTO draft (HTML single file, AWS S3 SSL)]
- <http://files.au.adversary.org/crypto/gpgme-python-howto.xhtml> [GPGME Python Bindings HOWTO draft (HTML single file, AWS S3 no SSL)]

That XHTML version, however, is exported in a way which inherits a

colour scheme from <https://github.com/holomorph/emacs-zenburn> [the author's Emacs theme] (which is a higher contrast

version

of <http://kippura.org/zenburnpage/> [Zenburn] ported by <https://github.com/holomorph> [Holomorph]). So it's

fine for people who

prefer dark themed web pages, but not so great for everyone else.

The GNU Texinfo and reStructured Text versions ship with the software, while the GNU Emacs Info version is generated from the Texinfo version using GNU Texinfo or GNU Makeinfo. The Texinfo format is generated from the original Org mode source file in Org mode itself either within GNU Emacs or via the command line by invoking Emacs in batch mode:

```
#+BEGIN_SRC shell
emacs gpgme-python-howto.org --batch -f org-texinfo-export-to-texinfo --kill
emacs gpgme-python-howto --batch -f org-texinfo-export-to-texinfo --kill
#+END_SRC
```

The reStructuredText format is also generated from the Org mode source file, except it is generated using [\[\[https://pandoc.org\]\[Pandoc\]\]](https://pandoc.org) with either of the following commands (depending on the filename):

```
#+BEGIN_SRC shell
pandoc -f org -t rst+smart -o gpgme-python-howto.rst
gpgme-python-howto.org
pandoc -f org -t rst+smart -o gpgme-python-howto.rst gpgme-python-howto
#+END_SRC
```

Note that the Org mode source files are identified as such via a mode line at the top of each file and have had their `.org` file extensions dropped in order to make scripted generation of output formats easier and not require renaming files post-conversion.

Due to a bug in Org mode's texinfo conversion method, the recommended steps for generating the Texinfo files for all the files in the `=lang/python/doc/src/=` directory are as follows:

```
#+BEGIN_SRC shell
for x in * ; do
 emacs $x --batch -f org-texinfo-export-to-texinfo --kill
 cat $x.texi | sed -e 's/@documentencoding UTF-8/@documentencoding utf-8/g' > ../texinfo/$x.texi
 pandoc -f org -t rst+smart -o ../rst/$x.rst $x
done ;
rm -fv *.texi
cd ../texinfo
mkdir info
mkdir html
for x in *.texi ; do
 makeinfo -v $x
 makeinfo --html --no-split $x
done ;
mv *.info info/
mv
```

```
*.html html/
#+END_SRC
```

This code snippet includes the generation of the reStructuredText files and would be expected to be run from the =doc/src/= directory containing the Org mode source files. It also assumes that the commands are being run on POSIX compliant systems with basic tools like sed, the Bourne shell and GNU Emacs[fn:6] available. The code snippet also includes the steps for generating the Emacs Info files and HTML files from the Texinfo files. Using reStructuredText files with Sphinx is best left for the documentation of that project.

In addition to these there is a significantly less frequently updated version as a HTML [[https://files.au.adversary.org/crypto/gpgme-python/dita/webhelp/index.html][WebHelp site]] (AWS S3 SSL); generated from DITA XML source files, which can be found in [[https://dev.gnupg.org/source/gpgme/browse/ben%252Fhowto-dita/][an alternative branch]] of the GPGME git repository.

Various generated output formats may occasionally be found in subdirectories of the [[https://s3.amazonaws.com/files.au.adversary.org/crypto/gpgme-python][gpgme-python]] directory. In particular within the [[https://s3.amazonaws.com/files.au.adversary.org/crypto/gpgme-python/dita][DITA]], [[https://s3.amazonaws.com/files.au.adversary.org/crypto/gpgme-python/rst][reStructuredText]] and [[https://s3.amazonaws.com/files.au.adversary.org/crypto/gpgme-python/texinfo][Texinfo]] subdirectories. The =rst= directory contains output files generated with Sphinx and may include a considerable number of its possible output formats, but there are no guarantees as to how recent these are or even if they are present.

These draft editions are not official documents and the version of documentation in the master branch or which ships with released versions is the only official documentation. Nevertheless, these draft editions may occasionally be of use by providing more accessible web versions which are updated between releases. They are provided on the understanding that they may contain errors or may contain content subject to change prior to an official release.

```

\* Footnotes

[fn:1] =short-history= and/or =short-history.html=.

[fn:2] With no issues reported specific to Python 3.7, the release of Python 3.7.1 at around the same time as GPGME 1.12.0 and the testing with Python 3.7.1rc1, there is no reason to delay moving 3.7 ahead of 3.6 now. Production environments with more conservative requirements will always enforce their own policies anyway and installation to each supported minor release is quite possible too.

[fn:3] Yes, even if you use virtualenv with everything you do in Python. If you want to install this module as just your user account then you will need to manually configure, compile and install the /entire/ GnuPG stack as that user as well. This includes libraries which are not often installed that way. It can be done and there are circumstances under which it is worthwhile, but generally only on POSIX systems which utilise single user mode (some even require it).

[fn:4] You probably don't really want to do this. Searching the keyservers for "gnupg.org" produces over 400 results, the majority of which aren't actually at the gnupg.org domain, but just included a comment regarding the project in their key somewhere.

[fn:5] Such as with ProtonMail servers. This also means that restricted servers which only advertise either HTTP or HTTPS end points and not HKP or HKPS end points must still be identified as HKP or HKPS within the Python Code. The =hkp4py= module will rewrite these appropriately when the connection is made to the server.

[fn:6] Okay, Emacs might not necessarily qualify as a basic tool, but it is common enough that having it installed on a system isn't too great an expectation, nor is it difficult to add to most POSIX systems, even if the users of those systems do not personally use it.

2011-04-06 Werner Koch <wk@g10code.com>

- \* gpgme-config.in: Add option --host. Change options --cflags and  
--libs to collapse duplicate include and lib dirs. Try to put  
extra libs at the end.
- \* gpgme.h.in: Use INSERT\_\_TYPEDEFS\_FOR\_GPGME\_H to include platform  
specific typedefs.

2011-02-03 Werner Koch <wk@g10code.com>

- \* extra-stati.h: New.
- \* mkstatus: Extend to also process extra-stati.h
- \* Makefile.am (main\_sources): Add extra-stati.h  
(status-table.h): Depend on extra-stati.h and adjust rule.

2011-02-03

Marcus Brinkmann <marcus@g10code.com>

- \* w32-io.c (\_gpgme\_io\_socket): Return fd, not res.

2011-02-02 Marcus Brinkmann <mb@g10code.com>

- \* assuan-support.c (my\_socket, my\_connect): New functions.

(\_gpgme\_assuan\_system\_hooks): Add my\_Socket, my\_connect.  
\* priv-io.h (\_gpgme\_io\_socket): New prototype.  
\* w32-io.c (pid\_to\_handle, handle\_to\_oid, fd\_to\_handle): Remove macros.  
(is\_socket): Remove function.  
(\_gpgme\_io\_spawn) [HAVE\_W32CE\_SYSTEM]: Remove some dead code.  
(\_gpgme\_io\_spawn): Translate handles before DuplicateHandle them.

2011-02-02 Marcus Brinkmann <mb@g10code.com>

\* w32-util.c (mkstemp): Don't use CreateFile instead of open (the function is not used on Windows CE, and the callers were not adjusted).

2011-01-21 Marcus Brinkmann <mb@g10code.com>

\* engine-gpgconf.c (\_gpgme\_conf\_opt\_change): Fix the case that is not self-assignment.

2010-12-08 Werner Koch <wk@g10code.com>

\* gpgme-tool.c (strcpy\_escaped\_plus): New.  
(DIM, xtoi\_1, xtoi\_2): New.  
(cmd\_keylist):  
Allow for multiple patterns.

2010-11-23 Marcus Brinkmann <mb@g10code.com>

\* w32-io.c (create\_reader, create\_writer): Use small stack size on Windows CE.

2010-11-23 Marcus Brinkmann <mb@g10code.com>

\* gpgme.h.in (gpgme\_conf\_arg\_new): Make VALUE arg const void \*.  
\* gpgconf.c (\_gpgme\_conf\_arg\_new): Likewise.  
(gpgme\_conf\_arg\_new): Likewise.  
\* engine-gpgconf.c (\_gpgme\_conf\_arg\_new): Likewise.  
(gpgconf\_write): Remove debug hack.

2010-11-19 Marcus Brinkmann <mb@g10code.com>

\* engine-gpgconf.c (\_gpgme\_conf\_opt\_change): Support self-assignment. Requested by Marc Mutz.

2010-11-17 Marcus Brinkmann <mb@g10code.com>

\* vasprintf.c (int\_vasprintf) [HAVE\_W32CE\_SYSTEM]: Just use a fixed size buffer, as va\_copy is not easy to fake.

2010-11-15 Marcus Brinkmann <mb@g10code.com>

- \* w32-ce.h (strcasecmp, strdup) [\_MSC\_VER]: Define.
- \* genkey.c, passphrase.c: Include util.h.
  
- \* w32-util.c (\_gpgme\_w32ce\_get\_debug\_envvar): Fix return value.

2010-11-15 Werner Koch <wk@g10code.com>

- \*  
data-compat.c (gpgme\_data\_new\_from\_filepart)  
(gpgme\_data\_new\_from\_file) [W32CE && \_MSC\_VER]: Return not  
GPG\_ERR\_NOT\_IMPLEMENTED.
  
- \* w32-ce.h (HKEY\_PERFORMANCE\_DATA, HKEY\_CURRENT\_CONFIG, \_IOLBF)  
(abort) [\_MSC\_VER]: Provide these macros.
  
- \* ath.h [W32CE && \_MSC\_VER]: Include winsock2.h.
  
- \* ath.c (ath\_read, ath\_write) [W32CE && \_MSC\_VER]: Do not call  
non-available functions.

2010-11-04 Werner Koch <wk@g10code.com>

- \* w32-ce.h [\_MSC\_VER && W32CE]: Undef leave.
- \* export.c: Include util.h so that we get the above undef.
  
- \* memrchr.c: Remove. Used to be a replacement function required  
by the formerly included assuan code.

2010-11-03 Werner Koch <wk@g10code.com>

- \* debug.c (\_gpgme\_debug) [W32CE]: Replace localtime by GetLocalTime.
  
- \* signers.c (gpgme\_signers\_clear): Remove useless return.  
Reported by Patrick Spendrin.
  
- \* w32-util.c: s/\_\_\_inline\_\_\_/GPG\_ERR\_INLINE/
  
- \* setenv.c: Include string.h due to our strerror replacement.
  
- \* w32-ce.h (access, bsearch):  
New macros.
- \* w32-ce.c (\_gpgme\_wince\_access): New.  
(RegQueryValueExA): Change DATA to a void\*.  
(\_gpgme\_wince\_bsearch): New. Taken from glibc 2.6.

Guard include of sys/stat.h and sys/types.h.

2010-11-02 Werner Koch <wk@g10code.com>

\* data-fd.c (read, write, lseek) [W32CE && ! \_\_MINGW32CE\_\_]: New.  
Taken from Pedro Alves Public Domain code.

\* w32-ce.h (SHGetSpecialFolderPath): Remove our defines and  
prototypes. We use the system provided prototypes now.

\* w32-ce.c: Include shlobj.h

(\_WIN32\_IE): Define to 0x0400

(CreateFileA): New.

\* w32-util.c: Explicitly include windows headers before util.h.

(\_gpgme\_w32ce\_get\_debug\_envvar): Do not use wchar\_t strings for  
read\_w32\_registry\_string.

(mkstemp): Use CreateFile instead of open.

\* w32-io.c (handle\_to\_fd, fd\_tohandle): Add. We need them for W32.

\* w32-util.c (\_WIN32\_IE): Define to 0x0400.

\* util.h [W32]: Include windows.h.

\* w32-sema.c: Do not include windows.h directly.

\* ath.c (ssize\_t, pid\_t)[\_MSC\_VER]: Add new  
types.

\* gpgme.c (gpgme\_result\_ref, gpgme\_result\_unref): Do not use a  
void pointer in pointer arithmetic.

\* w32-util.c: Include util.h prior to ath.h. Don't include  
windows.h directly.

(F\_OK): Define if not defined.

\* w32-ce.c: Include string.h.

(RegQueryValueExA): Use WINAPI modifier to match the declaration.

\* vfs-create.c: Include string.h because under W32CE with MSC we  
get a warning related to our strerror replacement.

\* encrypt-sign.c: Include stdlib.h, string.h and errno.h.

\* priv-io.h [W32CE]: Include w32-ce.h

\* w32-ce.h: Include winsock2.h and ws2tcpip.h.

(\_MSV\_VER): Remove useless macro.

(pid\_t): Add typedef.

Guard all includes of unistd.h and sys/time.h.

2010-10-28 Marcus Brinkmann <marcus@g10code.com>

\* opassuan.c (gpgme\_op\_assuan\_transact\_ext): Fix uninitialized  
value use. Reported by Marc Mutz.

2010-10-07 Werner Koch <wk@g10code.com>

\* gpgme-tool.c (ARGP\_ERR\_UNKNOWN): Use EDEADLK if available.

\* w32-util.c (`_gpgme_w32ce_get_debug_envvar`) [W32CE]:  
New.  
\* debug.c (`debug_init`) [W32CE]: Use new function.

2010-09-16 Werner Koch <wk@g10code.com>

\* import.c: Include "util.h".  
(`parse_import`): Return `GPG_ERR_MISSING_ISSUER_CERT`.  
\* util.h: Add fallback define for `GPG_ERR_MISSING_ISSUER_CERT`.  
\* op-support.c: Include "util.h".  
(`_gpgme_parse_inv_recip`): Handle new code 12.

2010-09-02 Marcus Brinkmann <marcus@g10code.de>

\* error.c (`gpgme_err_code_to_errno`): Fix cut and paste bug (thanks  
to Marc Mutz).

2010-09-01 Marcus Brinkmann <marcus@g10code.de>

\* w32-io.c: Revert change from 2009-06-18, as it created a race  
condition.

2010-08-18 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.def: Add `gpgme_err_code_from_syserror` and `gpgme_err_set_errno`.  
\* libgpgme.vers: Likewise.  
\* gpgme.h.in (`gpgme_error_from_errno`): Fix return type to  
`gpgme_error_t`.  
(`gpgme_err_code_from_syserror`, `gpgme_err_set_errno`): New prototype.  
(`gpgme_error_from_syserror`): New inline function (why are  
`gpgme_err_make_from_errno` and `gpgme_error_from_errno`  
not inline  
functions?).  
\* error.c (`gpgme_error_from_errno`): Fix return type to `gpgme_error_t`.  
(`gpgme_err_set_errno`, `gpgme_err_code_from_syserror`): New functions.

2010-08-03 Marcus Brinkmann <marcus@g10code.de>

\* gpgme-tool.c (`result_encrypt_to_xml`, `result_sign_to_xml`)  
(`result_verify_to_xml`, `result_import_to_xml`)  
(`result_genkey_to_xml`): Check vigorously for null pointers.

\* w32-io.c (`GPGCEDEV_IOCTL_ASSIGN_RVID`): New macro.  
(`_gpgme_io_spawn`): Use `ASSIGN_RVID`.

2010-06-11 Marcus Brinkmann <marcus@g10code.de>

\* w32-io.c (\_gpgme\_io\_spawn): Remove debug printf.

2010-06-10 Marcus Brinkmann <marcus@g10code.de>

\* gpgme-tool.c (gpgme\_server): Use special hack for Windows CE to get at stdin and stdout.

\* engine-gpgsm.c (gpgsm\_new): Translate returned achild\_fds back to child\_fds.

\* debug.h (TRACE\_SUC6): New macro.

\* w32-io.c (MAX\_SLAFD): New macro.

(fd\_table): New static variable.

(new\_fd, release\_fd): New functions.

(fd\_to\_handle, handle\_to\_fd, handle\_to\_socket):

Remove macros.

(MAX\_READERS, MAX\_WRITERS): Increase to 64.

(notify\_table): Increase to MAX\_SLAFD.

(struct reader\_context\_s, struct writer\_context\_s): Add member file\_sock.

(reader, writer): Use file\_hd vs file\_sock to decide if socket operations to use. Remove auto-detect mode.

(create\_reader, create\_writer): Set file\_sock. Unblock pending thread only if this is a pipe fd.

(\_gpgme\_io\_pipe): Allocate fds from table and return slot indices instead of windows handles. This allows to properly handle RVIDs.

(\_gpgme\_io\_close): Handle dup'ed file descriptors.

(build\_commandline) [HAVE\_W32\_SYSTEM]: Use RVID from fd table now.

(\_gpgme\_io\_spawn): Use fd table now.

(\_gpgme\_io\_fd2str): Use RVID from fd table now.

(\_gpgme\_io\_dup): Implement using fd table.

(\_gpgme\_io\_socket): Allocate fds from table.

(\_gpgme\_io\_connect): Use fd from table.

\* w32-glib-io.c (find\_channel): Check that the slot is used.

2010-06-09 Marcus Brinkmann <marcus@g10code.de>

\* w32-io.c [HAVE\_W32CE\_SYSTEM]:

Include assuan.h and winioctl.h.

(GPGCEDEV\_IOCTL\_UNBLOCK) [HAVE\_W32CE\_SYSTEM]: Define.

(set\_synchronize) [HAVE\_W32CE\_SYSTEM]: Stub it out.

(is\_socket): Allow to return -1 for auto-detect (old behaviour).

(is\_socket) [HAVE\_W32CE\_SYSTEM]: Return -1.

(reader): Handle auto-detect case. Handle ctx->stop\_me before checking for EOF.

(destroy\_reader) [HAVE\_W32CE\_SYSTEM]: Unblock a pending reader.

(writer): Handle auto-detect case. Handle ctx->stop\_me with  
ERROR\_BUSY.  
(destroy\_writer) [HAVE\_W32CE\_SYSTEM]: Unblock a pending writer.  
(\_gpgme\_io\_pipe) [HAVE\_W32CE\_SYSTEM]: Implement in terms of a  
half-pipe.  
(build\_commandline) [HAVE\_W32CE\_SYSTEM]: New function.  
(\_gpgme\_io\_spawn) [HAVE\_W32CE\_SYSTEM]: Implement it differently  
for this platform.  
(\_gpgme\_io\_fd2str) [HAVE\_W32CE\_SYSTEM]: Implement it for RVIDs.  
(\_gpgme\_io\_dup) [HAVE\_W32CE\_SYSTEM]: Stub it out.

\* gpgme-tool.c (result\_add\_timestamp): Add missing NULL argument.  
(result\_sign\_to\_xml): Protect against NULL  
fingerprint.  
(struct server): New members input\_fd, input\_filename,  
input\_stream output\_fd, output\_filename, output\_stream,  
message\_filename, message\_stream.  
(server\_reset\_fds): Deallocate those.  
(server\_parse\_fd): New function.  
(server\_data\_obj): Take optional filename argument and direction  
argument. Also take new argument to return a filestream that  
needs to be closed after destroying the data object.  
Change all callers, too.  
(input\_notify, output\_notify): Removed.  
(cmd\_input, cmd\_output): New functions.  
(gpgme\_server): Do not register input and output notifier.  
(register\_commands): Use cmd\_input and cmd\_output.  
(cmd\_message): Rewritten to use server\_parse\_fd.  
(cmd\_delete, cmd\_keylist): Fix inverted option check.  
(main) [HAVE\_W32CE\_SYSTEM]: Sleep a bit to work around bug in ssh.

\* genkey.c (gpgme\_op\_genkey): Return err with TRACE\_ERR.

2010-05-12 Marcus Brinkmann <marcus@g10code.de>

\* conversion.c (\_gpgme\_timegm) [HAVE\_W32\_SYSTEM]: New static  
function.  
(\_gpgme\_parse\_timestamp)  
[HAVE\_W32\_SYSTEM]: Use it.

\* gpgme-tool.c (main): Protect call to setlocale with  
HAVE\_SETLOCALE.

\* Makefile.am (system\_components): Remove custom cppflags from  
RCCOMPILER (because gpg-error adds -idirafter that makes RC bail.  
[HAVE\_W32CE\_SYSTEM]: Add w32-ce.h and w32-ce.c, clear  
libexec\_PROGRAMS.

\* w32-ce.h, w32-ce.c: New files.

\* priv-io.h: Include <sys/types.h>

\* util.h: Likewise.

2010-05-11 Marcus Brinkmann <marcus@g10code.de>

\* w32-util.c: Include ath.h

(HAVE\_ALLOW\_SET\_FOREGROUND\_WINDOW) [!HAVE\_W32CE\_SYSTEM]: Define it.

(RTLD\_LAZY, dlopen, dlclose,

dlclose) [!HAVE\_ALLOW\_SET\_FOREGROUND\_WINDOW]: Don't define anymore.

(\_gpgme\_allow\_set\_foreground\_window) [!HAVE\_ALLOW\_SET\_FOREGROUND\_WINDOW]: Make it a stub.

(read\_w32\_registry\_string): Use FooA variants of Windows functions instead of Foo (which dispatches depending on UNICODE).

[!HAVE\_W32CE\_SYSTEM]: Don't check environment.

(w32\_shgetfolderpath): Remove.

(find\_program\_at\_standard\_place): Call SHGetSpecialFolderPath

(which is available on all Windows systems and also Windows CE).

(mkstemp): Use ath\_self instead of getpid.

(\_gpgme\_mkstemp): Use GetTempPathA instead of GetTempPath.

\* gpgme.h.in: Use \_WIN32 instead of \_MSC\_VER. Include time.h for time\_t.

2010-05-07 Marcus Brinkmann <marcus@g10code.de>

\* engine-g13.c, gpgme.c, engine-gpgsm.c, engine-gpg.c, op-support.c, engine-assuan.c, gpgme-tool.c: Include <locale.h> only if available with HAVE\_LOCALE\_H and conditionalize use of LC\_CTYPE on its definition.

\* engine-gpgconf.c: Do not include <locale.h>.

\* engine-gpgsm.c (gpgsm\_new, start): Cast between int and assuan\_fd\_t.

\* assuan-support.c (my\_pipe, my\_close, my\_read, my\_write): Likewise.

\* gpgme-tool.c (server\_data\_obj, server\_reset\_fds, gpgme\_server), (my\_recvmsg, my\_sendmsg, my\_spawn): Likewise.

\* engine-assuan.c (start): Likewise.

\* engine-g13.c (start): Likewise.

2010-05-06 Marcus Brinkmann <marcus@g10code.de>

\* w32-glib-io.c, w32-io.c, w32-qt-io.cpp,

w32-sema.c, w32-util.c:

Do not include <signal.h>.

\* sign.c, data-user.c, conversion.c, debug.c, verify.c, data.c, decrypt.c, delete.c, assuan-support.c, import.c, engine-gpgsm.c, data-mem.c, op-support.c, w32-io.c, w32-util.c, data-compat.c: Use gpg\_error\_from\_syserror instead gpg\_error\_from\_errno, and use gpg\_err\_set\_errno to set error number.  
\* setenv.c: Include <gpg-error.h> and define \_\_set\_errno to use gpg\_err\_set\_errno.  
\* gpgme-tool.c (ARGP\_ERR\_UNKNOWN): Define to EDEADLOCK (which is mapped in Windows CE) instead of E2BIG (which is not).  
(gt\_import\_keys): Initialize err.

2010-04-19 Marcus Brinkmann <marcus@g10code.de>

\* assuan-support.c (my\_spawn): Cast to avoid warning.  
\* engine-g13.c (g13\_new): Make ARGV array of pointer to const char.  
(g13\_assuan\_simple\_command) [!USE\_DESCRIPTOR\_FUNCTION]: Don't define.  
\* ops.h (\_gpgme\_key\_append\_name): Same in prototype.  
\* key.c (\_gpgme\_key\_append\_name): Make SRC argument pointer to const char.  
\* posix-util.c  
(\_gpgme\_get\_uiserver\_socket\_path): Make HOMEDIR const.  
\* vfs-mount.c (gpgme\_op\_vfs\_transact\_start): Never define this potentially useful but currently unused function.  
\* vfs-create.c (gpgme\_op\_vfs\_transact\_start): Likewise.

2010-04-16 Werner Koch <wk@g10code.com>

\* w32-io.c (is\_socket): New.  
(reader, writer): Use it to figure out the API to use.

2010-03-15 Werner Koch <wk@g10code.com>

\* gpgme.h.in: Add autoconf template to set generated file to read-only in an emacs buffer.

2010-03-12 Werner Koch <wk@g10code.com>

\* gpgme.h.in (GPGME\_STATUS\_SUCCESS): Use the right file for the change; see below.

\* passwd.c (op\_data\_t): New.  
(passwd\_start): Setup OPD.  
(passwd\_status\_handler): Return GPG\_ERR\_NOT\_SUPPORTED if needed.  
\* context.h (OPDATA\_PASSWD): New.  
\* gpgme.h (GPGME\_STATUS\_SUCCESS): New.

2010-03-09 Werner Koch <wk@g10code.com>

\* engine-gpgsm.c (gpgsm\_keylist): Try to start the agent.

2010-02-17 Werner Koch <wk@g10code.com>

\* posix-io.c (notify\_table):

Change implementation.

(notify\_table\_item\_t, notify\_table\_size, notify\_table\_lock): New.

(\_gpgme\_io\_close, \_gpgme\_io\_set\_close\_notify): Adjust for new implementation.

2010-02-16 Werner Koch <wk@g10code.com>

\* gpgme-tool.c (spacep, has\_option, skip\_options): New.

(cmd\_export): Implement option --minimal.

\* gpgme.h.in (GPGME\_EXPORT\_MODE\_MINIMAL): New.

\* export.c (export\_start, export\_ext\_start): Implement it.

\* engine-gpg.c (export\_common): Ditto.

2010-01-25 Werner Koch <wk@g10code.com>

\* w32-io.c (\_gpgme\_io\_connect): Fix return code check to make it work.

\* version.c (do\_subsystem\_inits): Remove superfluous second WSAStartup.

2010-01-22 Werner Koch <wk@g10code.com>

\* w32-io.c (writer): Try to use send first.

(reader): Try to use recv first.

2010-01-08 Werner Koch <wk@g10code.com>

\* engine-gpg.c (gpg\_passwd): New.

(\_gpgme\_engine\_ops\_gpg): Register.

\* passwd.c (parse\_error): New.

(passwd\_status\_handler): Use it.

2010-01-07 Marcus Brinkmann <marcus@g10code.de>

\*

gpgme-tool.c (result\_xml\_write\_cb\_t, struct result\_xml\_state):

New types.

(MAX\_TAGS): New macro.

(result\_init, result\_xml\_indent, result\_xml\_tag\_start)

(result\_xml\_tag\_data, result\_xml\_tag\_end, result\_add\_error)  
(result\_add\_pubkey\_algo, result\_add\_hash\_algo, result\_add\_keyid)  
(result\_add\_fpr, result\_add\_timestamp, result\_add\_sig\_mode)  
(result\_add\_value, result\_add\_string, result\_encrypt\_to\_xml)  
(result\_decrypt\_to\_xml, result\_sign\_to\_xml)  
(result\_verify\_to\_xml, result\_import\_to\_xml)  
(result\_genkey\_to\_xml, result\_keylist\_to\_xml)  
(result\_vfs\_mount\_to\_xml): New functions.  
(gt\_result): Rewritten.

2010-01-05 Werner Koch <wk@g10code.com>

\* gpgme-tool.c (gt\_passwd, cmd\_passwd): New.  
(register\_commands): Register.

\* gpgme.h.in (gpgme\_op\_passwd\_start, gpgme\_op\_passwd): New.  
\* libgpgme.vers, gpgme.def: Add new functions.  
\* passwd.c: New.  
\* Makefile.am (main\_sources): Add passwd.c  
\* engine.c, engine.h (\_gpgme\_engine\_op\_passwd): New.  
\* engine-backend.h (struct  
engine\_ops): Add PASSWD.  
\* engine-gpgsm.c (gpgsm\_passwd): New.  
(\_gpgme\_engine\_ops\_gpgsm): Register.  
(gpgsm\_reset): Reset only if we have a connection.

\* gpgme.h.in (GPGME\_PK\_ECDSA, GPGME\_PK\_ECDH): New.  
\* gpgme.c (gpgme\_pubkey\_algo\_name): Add them.

2009-12-22 Marcus Brinkmann <marcus@g10code.de>

\* debug.c: Test for TLS, not \_\_GNU\_\_

2009-12-15 Marcus Brinkmann <marcus@g10code.de>

\* assuan-support.c (my\_spawn): Calloc, not malloc, the fd\_items.

2009-12-10 Werner Koch <wk@g10code.com>

\* debug.c (debug\_init): Test on sgid process.

2009-12-08 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (LTRCCOMPILER): Refactor with ...  
(RCCOMPILER): ... this new macro.  
(SUFFIXES): Add .lo.  
(gpgme\_res\_ldflag): Removed.  
(gpgme\_res): Use libtool object file name here.

(libpgpme\_la\_LDFLAGS): Remove gpgme\_res\_ldflag usage.

(libpgpme\_la\_LIBADD): Add gpgme\_res.

\* ath.c (ath\_self) [HAVE\_W32\_SYSTEM]: Fix typo.

2009-12-02 Werner Koch <wk@g10code.com>

\* gpgconf.c (gpgme\_conf\_arg\_release):

No return in a function

returning void. Reported by Wyllys Ingersoll.

2009-12-01 Werner Koch <wk@g10code.com>

\* gpgme-tool.c (cmd\_getauditlog): Add flag --html.

(hlp\_getauditlog): New.

\* gpgme-tool.c (GT\_GCC\_A\_SENTINEL, GT\_GCC\_A\_PRINTF): New.

(gt\_write\_status): Use sentinel.

(argp\_error, log\_error): Use printf attribute.

(argp\_parse): Remove extra argument to argp\_error.

(\_gt\_progress\_cb, gt\_get\_engine\_info, gt\_get\_keylist\_mode)

(gt\_result): Add NULL arg.

2009-11-26 Marcus Brinkmann <marcus@g10code.de>

\* opassuan.c (opassuan\_start): Allocate result structure before beginning operation.

2009-11-25 Marcus Brinkmann <marcus@g10code.de>

\* gpgme-tool.c (gpgme\_server): Use assuan\_fd\_t and assuan\_fdopen on fds.

2009-11-13 <wk@g10code.com>

\* sign.c (\_gpgme\_sign\_status\_handler): Handle SIG\_CREATED\_SEEN.

\* engine-uisever.c (uisever\_sign): Make sending SENDER optional.

2009-11-10 Marcus Brinkmann <marcus@g10code.de>

\* op-support.c (\_gpgme\_op\_reset):

Instead of last change, only set

sub protocol if it is not the default.

2009-11-10 Werner Koch <wk@g10code.com>

\* op-support.c (\_gpgme\_op\_reset): Ignore GPG\_ERR\_NOT\_IMPLEMENTED

while setting the sub protocol.

\* engine-uiserver.c (uiserver\_new): Pass fdpassing flag to  
assuan\_socket\_connect.  
(set\_recipients): Replace fingerprint by user id.

\* engine-gpgsm.c (set\_recipients): Fix non-terminating loop in  
case of a missing key.

2009-11-10 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.c (gpgme\_new): Set default sub protocol.  
\* gpgme-tool.c: Implement get sub protocol.

\* gpgme.h.in (gpgme\_get\_sub\_protocol): Add prototype.  
\* gpgme.def, libgpgme.vers: Add gpgme\_get\_sub\_protocol.  
\* context.h (struct gpgme\_context): New member sub\_protocol.  
\* gpgme.c (gpgme\_set\_sub\_protocol): Set CTX->sub\_protocol.  
(gpgme\_get\_sub\_protocol): New function.  
\* op-support.c (\_gpgme\_op\_reset): Set sub protocol.

\* Makefile.am (uiserver\_components): New variable.  
(main\_sources):  
Add it.  
\* ops.h, key.c (\_gpgme\_key\_append\_name): Take CONVERT argument,  
implement it. Adjust callers.  
(gpgme\_key\_from\_uid): New function.  
\* gpgme.h.in (gpgme\_protocol\_t): Add GPGME\_PROTOCOL\_DEFAULT.  
(gpgme\_encrypt\_flags\_t): Add GPGME\_ENCRYPT\_PREPARE,  
GPGME\_ENCRYPT\_EXPECT\_SIGN.  
(gpgme\_set\_sub\_protocol, gpgme\_key\_from\_uid): New functions.  
\* libgpgme.vers, gpgme.def: Add new functions.  
\* gpgme.c (gpgme\_set\_protocol): Add UIServer protocol.  
(gpgme\_set\_sub\_protocol): New function.  
(gpgme\_get\_protocol\_name): Add UIServer and default protocol.  
\* assuan-support.c: Return correct error values, implement  
socketpair for POSIX.  
\* priv-io.h, posix-io.c, w32-io.c, w32-glib-io.c,  
w32-qt-io.cpp (\_gpgme\_io\_spawn): Add ATFORK and ATFORKVALUE  
arguments. Implement it for POSIX. Adjust all callers.  
\* engine.h, engine-backend.h (\_gpgme\_engine\_set\_protocol)  
(\_gpgme\_engine\_op\_decrypt\_verify): New prototypes. Adjust all  
users.  
\* engine.c (engine\_ops, gpgme\_get\_engine\_info): Add UIServer  
engine.  
(\_gpgme\_engine\_set\_protocol,  
\_gpgme\_engine\_op\_decrypt\_verify): New  
function.  
\* decrypt-verify.c (decrypt\_verify\_start): Call

\_gpgme\_engine\_op\_decrypt\_verify.  
\* util.h, posix-util.c,  
w32-util.c (\_gpgme\_get\_uiserver\_socket\_path): New function.  
\* engine-gpgsm.c (gpgsm\_set\_fd): Fix \_gpgme\_io\_pipe invocation.  
\* gpgme-tool.c: Some support for UIServer protocol.  
\* engine-uiserver.c: New file.

2009-11-09 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (gpgsm\_new): Close server side FDs.

2009-11-06 Marcus Brinkmann <marcus@g10code.de>

\* gpgme-tool.c (struct gpgme\_tool): New members write\_data and  
write\_data\_hook.  
(gt\_write\_data): New function.  
(gt\_result): Output vfs\_mount result.  
(server\_write\_data): New function.  
(gpgme\_server): Initialize write\_data members.

2009-11-05 Marcus Brinkmann <marcus@g10code.de>

\* engine-g13.c (struct engine\_g13): Remove members RESULT\_CB and  
RESULT\_CB\_VALUE.

(g13\_assuan\_simple\_command, status\_handler): Don't use those  
anymore.

(g13\_transact): Remove them from argument list, too.

\* vfs-mount.c (\_gpgme\_vfs\_mount\_status\_handler): New function.

(\_gpgme\_op\_vfs\_mount): Pass it to transact.

\* engine-assuan.c (lass\_new): Update use of assuan\_socket\_connect.

\* engine-gpgsm.c (gpgsm\_new): Update use of assuan\_pipe\_connect.

\* engine-g13.c (g13\_new): Likewise.

\* priv-io.h (IOspawn\_FLAG\_NOCLOSE): New flag.

\* w32-io.c (\_gpgme\_io\_spawn): Implement this flag.

\* posix-io.c (\_gpgme\_io\_spawn): Likewise.

\* w32-glib-io.c (\_gpgme\_io\_spawn): Likewise.

\* assuan-support.c (my\_spawn): Set this flag.

\* decrypt.c (gpgme\_op\_decrypt\_start): Fix use of debug macro.

\* decrypt-verify.c (gpgme\_op\_decrypt\_verify\_start): Likewise.

\* delete.c (gpgme\_op\_delete\_start): Likewise.

\* edit.c (gpgme\_op\_edit\_start, gpgme\_op\_card\_edit\_start):

Likewise.

\* encrypt.c (gpgme\_op\_encrypt\_start): Likewise.

\* encrypt-sign.c (gpgme\_op\_encrypt\_sign\_start): Likewise.

\* export.c (gpgme\_op\_export\_start, gpgme\_op\_export\_ext\_start)

(gpgme\_op\_export\_keys\_start,  
gpgme\_op\_export\_keys): Likewise.  
\* genkey.c (gpgme\_op\_genkey\_start): Likewise.  
\* getauditlog.c (gpgme\_op\_getauditlog\_start): Likewise.  
\* import.c (gpgme\_op\_import\_start, gpgme\_op\_import\_keys\_start):  
Likewise.  
\* opassuan.c (gpgme\_op\_assuan\_transact\_start): Likewise.  
\* sign.c (gpgme\_op\_sign\_start): Likewise.  
\* verify.c (gpgme\_op\_verify\_start): Likewise.  
\* vfs-create.c (gpgme\_op\_vfs\_create): Likewise.  
\* vfs-mount.c (gpgme\_op\_vfs\_mount): Likewise.

2009-11-04 Marcus Brinkmann <marcus@g10code.de>

\* ath.h (ath\_self): New prototype. Include <stdint.h>  
\* ath.c, ath-pth.c, ath-pthread.c (ath\_self): New function.  
\* debug.h: Rewrite most macros to beautify debug output.  
(\_gpgme\_debug\_buffer): Remove tagname and tag argument.  
(\_gpgme\_debug\_frame\_begin, \_gpgme\_debug\_frame\_end): New prototypes.  
\* debug.c: Include <time.h>. Don't include assuan.h.  
(frame\_nr, FRAME\_NR): New thread-specific variable and macro.  
(debug\_init): Do not initialize assuan.  
Call \_gpgme\_debug after  
initialization instead using printf directly.  
(\_gpgme\_debug): Do not call debug\_init (we now ensure proper  
initialization by user). Add timestamp and thread/process ID.  
(\_gpgme\_debug\_buffer): Do not take tagname and tag argument.  
(\_gpgme\_debug\_frame\_begin, \_gpgme\_debug\_frame\_end): New functions.  
\* version.c (gpgme\_check\_version\_internal, gpgme\_check\_version):  
Fix debug string. Do not initialize assuan.  
\* posix-io.c (get\_max\_fds): Use 0 not NULL (nicer debug output).

2009-11-04 Werner Koch <wk@g10code.com>

\* gpgme-tool.c (register\_commands): Add HELP feature.

2009-11-03 Werner Koch <wk@g10code.com>

\* gpgme.h.in (GPGME\_PROTOCOL\_UISERVER): New.

2009-11-03 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (main\_sources): Change g13.c to vfs-mount.c. Add  
vfs-create.c  
\* vfs-create.c: New file.  
\* g13.c: Renamed to ...  
\* vfs-mount.c: ... this new file.  
\* gpgme.h.in (gpgme\_op\_vfs\_create): New prototype.

\* gpgme.def, libgpgme.vers: Add gpgme\_op\_vfs\_create.

\*

gpgme-tool.c (gt\_vfs\_create, cmd\_vfs\_create): New functions.

(register\_commands): Add VFS\_CREATE and CREAET.

2009-11-02 Marcus Brinkmann <marcus@g10code.de>

\* debug.h (\_gpgme\_debug\_buffer): Make TAG argument const const.

\* debug.c (\_gpgme\_debug\_buffer): Likewise.

\* gpgme-tool.c (input\_notify, output\_notify): Adjust type to new  
assuan interface.

\* decrypt.c (gpgme\_op\_decrypt\_result): Remove unused variable.

\* opassuan.c (gpgme\_op\_assuan\_transact): Fix return value.

2009-10-30 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (noinst\_PROGRAMS): New target gpgme-tool.

(gpgme\_tool\_LDADD): New variable.

\* gpgme-tool.c: New file.

\* ops.h (\_gpgme\_sig\_notation\_clearm \_gpgme\_signers\_clear): New  
prototypes.

\* gpgme.c (gpgme\_set\_protocol): Allow GPGME\_PROTOCOL\_GPGCONF (when  
had that gone missing?).

(\_gpgme\_sig\_notation\_clear): New function without debug output.

(gpgme\_release): Call it and \_gpgme\_signers\_clear.

\* signers.c (\_gpgme\_signers\_clear): New

function without debug output.

\* g13.c (gpgme\_op\_vfs\_mount): Add debug output.

\* assuan-support.c (my\_spawn): Allow fd\_child\_list to be NULL.

\* conversion.c (\_gpgme\_encode\_percent\_string): Fix infinite loop.

\* debug.h: Put tag in front of debug lines, should make for nicer  
output.

\* engine-assuan.c (lass\_new): Use our new system hooks for libassuan.

\* engine-g13.c (g13\_new): Remove redundant assuan context allocation.

\* version.c (gpgme\_check\_version\_internal): Delay debug output  
until after gpgme\_check\_version was called.

2009-10-28 Marcus Brinkmann <marcus@g10code.de>

\* signers.c, encrypt-sign.c, encrypt.c, delete.c, keylist.c,  
edit.c, import.c, export.c: Fix last change in debug output.

2009-10-27 Marcus Brinkmann <marcus@g10code.de>

\* edit.c (gpgme\_op\_edit\_start, gpgme\_op\_edit)

(gpgme\_op\_card\_edit\_start, gpgme\_op\_card\_edit): Add debug output.

\* encrypt-sign.c (gpgme\_op\_encrypt\_sign\_start)

(gpgme\_op\_encrypt\_sign): Likewise.

- \* encrypt.c (gpgme\_op\_encrypt\_start, gpgme\_op\_encrypt) (gpgme\_op\_encrypt\_result): Likewise.
- \* export.c (gpgme\_op\_export\_start, gpgme\_op\_export) (gpgme\_op\_export\_ext\_start, gpgme\_op\_export\_ext) (gpgme\_op\_export\_keys\_start, gpgme\_op\_export\_keys): Likewise.
- \* genkey.c (gpgme\_op\_genkey\_start, gpgme\_op\_genkey) (gpgme\_op\_genkey\_result): Likewise.
- \* getauditlog.c (gpgme\_op\_getauditlog\_start) (gpgme\_op\_getauditlog): Likewise.
- \* import.c (gpgme\_op\_import\_result, gpgme\_op\_import\_start) (gpgme\_op\_import): Likewise.
- \* keylist.c (gpgme\_op\_keylist\_result, keylist\_colon\_handler) (gpgme\_op\_keylist\_start, gpgme\_op\_keylist\_ext\_start) (gpgme\_op\_keylist\_next, gpgme\_op\_keylist\_end, gpgme\_get\_key): Likewise.
- \* opassuan.c (gpgme\_op\_assuan\_transact\_start) (gpgme\_op\_assuan\_transact\_ext, gpgme\_op\_assuan\_result) (gpgme\_op\_assuan\_transact): Likewise.
- \* signers.c (gpgme\_signers\_add, gpgme\_signers\_clear): Likewise.
- \* trustlist.c (gpgme\_op\_trustlist\_start) (gpgme\_op\_trustlist\_next, gpgme\_op\_trustlist\_end): Likewise.
- \* verify.c (gpgme\_op\_verify\_start, gpgme\_op\_verify) (gpgme\_op\_verify\_result): Likewise.

2009-10-26 Marcus Brinkmann <marcus@g10code.de>

- \* gpgme.h.in (struct gpgme\_io\_event\_done\_data) (gpgme\_io\_event\_done\_data\_t): New types.
- (struct \_gpgme\_op\_assuan\_result): Deprecate the err member.
- (gpgme\_op\_assuan\_result): Deprecate (for now).
- (gpgme\_op\_assuan\_transact\_ext): New prototype.
- (gpgme\_op\_assuan\_transact): Deprecate.
- (struct \_gpgme\_op\_g13\_result): Replace with ...
- (struct \_gpgme\_op\_vfs\_mount\_result): ... this.
- (gpgme\_op\_g13\_mount): Replace with ...
- (gpgme\_op\_vfs\_mount): ... this.
- \* gpgme.def (gpgme\_op\_assuan\_transact\_ext, gpgme\_wait\_ext) (gpgme\_op\_vfs\_mount\_result, gpgme\_op\_vfs\_mount): New.
- (gpgme\_op\_g13\_mount): Remove.
- \* libgpgme.vers: Likewise.
- \* engine-backend.h (struct engine\_ops): Remove RESULT\_CB and RESULT\_CB\_VALUE args in opassuan\_transact member. Add CANCEL\_OP member.
- \* ops.h (\_gpgme\_cancel\_with\_err, \_gpgme\_wait\_on\_condition): Add OP\_ERR argument.
- (\_gpgme\_wait\_one\_ext):

New prototype.

- \* context.h (ctx\_op\_data\_id\_t): Add OPDATA\_VFS\_MOUNT.
- \* engine-g13.c (g13\_cancel\_op): New function.
- (parse\_status): Remove declaration.
- (g13\_assuan\_simple\_command): Do nothing with status lines for now.
- (status\_handler): Update opaque value access.
- (\_gpgme\_engine\_ops\_g13): Add new cancel\_op member.
- \* gpgme.c (\_gpgme\_cancel\_with\_err): Add new parameter OP\_ERR.
- Handle operational errors.
- (gpgme\_cancel, gpgme\_io\_read, gpgme\_io\_write): Add debug output.
- \* data.c (\_gpgme\_data\_inbound\_handler)
- (\_gpgme\_data\_outbound\_handler): Adjust opaque value access.
- \* engine-gpg.c (command\_handler, status\_handler)
- (colon\_line\_handler): Likewise.
- \* engine-gpgsm.c (status\_handler): Likewise.
- \* engine-gpg.c (\_gpgme\_engine\_ops\_gpg): Add cancel\_op member.
- \* engine-gpgsm.c (\_gpgme\_engine\_ops\_gpgsm): Likewise.
- \* g13.c: Rewritten (and will be rewritten again).
- \* engine.h (\_gpgme\_engine\_op\_assuan\_transact): Remove result\_cb and result\_cb\_value parameters from prototype.
- (\_gpgme\_engine\_cancel\_op):
- New prototype.
- \* engine.c (engine\_ops) [! ENABLE\_ASSUAN]: Add missing comma.
- (\_gpgme\_engine\_op\_assuan\_transact): Remove result\_cb and result\_cb\_value parameter.
- (\_gpgme\_engine\_cancel\_op): New function.
- \* wait.h (\_gpgme\_run\_io\_cb): Add new argument OP\_ERR.
- (struct io\_cb\_data): New struct to pass opaque data and get a op\_err return value. Needed because we can't modify I/O callback handler signature because it is exposed to the user.
- \* wait.c (\_gpgme\_run\_io\_cb): Add OP\_ERR parameter. Handle operational errors.
- \* wait-user.c (\_gpgme\_user\_io\_cb\_handler): Handle operational errors.
- \* wait-private.c (\_gpgme\_wait\_on\_condition): New argument to retrieve the operational result. Handle operational errors in session based protocols.
- (\_gpgme\_wait\_one\_ext): New function.
- (\_gpgme\_wait\_one): Pass argument in invocation of \_gpgme\_wait\_on\_condition.
- \* wait-global.c (struct ctx\_list\_item): Add member OP\_ERR.
- (ctx\_done): New argument OP\_ERR.
- (ctx\_wait): New argument OP\_ERR.
- (gpgme\_wait\_ext): New function based on gpgme\_wait but handling operational errors.
- (gpgme\_wait): Implement in term of gpgme\_wait\_ext.
- \* keylist.c (gpgme\_op\_keylist\_next): Pass argument in invocation

of `_gpgme_wait_on_condition`.  
\* `trustlist.c` (`gpgme_op_trustlist_next`): Pass argument in invocation of `_gpgme_wait_on_condition`.  
\* `engine-assuan.c` (struct `engine_llass`): Replace members `RESULT_CB` and `RESULT_CB_VALUE` by `LAST_OP_ERR`.  
(`_gpgme_engine_assuan_last_op_err`): Add this hack function.  
(`llass_cancel_op`): New function.  
(`_gpgme_engine_llass_ops`): Add `cancel_op` member.  
(`llass_status_handler`): Update opaque value access.  
(`llass_transact`): Remove `RESULT_CB` and `RESULT_CB_VALUE` arguments.  
\* `opassuan.c`: Move compat hacks to the end of file.  
(`opassuan_start`): Do not set `OPD->result.err`.  
Do not pass `RESULT_Cb` and `CTX` to `_gpgme_engine_op_assuan_transact`.  
(`gpgme_op_assuan_transact_ext`): New function.

\* `debug.h` (`DEBUG_GLOBAL`): New debug level.  
\* `conversion.c` (`gnupg_errors`, `_gpgme_map_gnupg_error`): Removed.  
\* `data-user.c` (`gpgme_data_new_from_cbs`): Add debug output.  
\* `data-fd.c` (`gpgme_data_new_from_fd`): Likewise.  
\* `data-stream.c` (`gpgme_data_new_from_stream`): Likewise.  
\* `decrypt.c` (`gpgme_op_decrypt_result`, `gpgme_op_decrypt_start`) (`gpgme_op_decrypt`): Likewise.  
\* `delete.c` (`gpgme_op_delete_start`, `gpgme_op_delete`): Likewise.  
\* `decrypt-verify.c` (`gpgme_op_decrypt_verify_start`) (`gpgme_op_decrypt_verify`): Likewise.  
\* `sign.c` (`gpgme_op_sign_result`): Fix debug message.  
\* `data-mem.c` (`gpgme_data_new`): Improve debug output.  
\* `verify.c` (`parse_trust`): Use `atoi` instead of `_gpgme_map_gnupg_error`.  
\* `decrypt.c` (`_gpgme_decrypt_status_handler`): Likewise.

2009-10-22 Marcus Brinkmann <marcus@g10code.de>

\* `Makefile.am`: Remove `@NETLIBS@` from `LIBADDs`.  
(`g13_components`): New variable.  
(`main_sources`): Add `$(g13_components)`.  
\* `g13.c`, `engine-g13.c`: New files.  
\* `engine.c` (`engine_ops`): Check for assuan for assuan engine, add `g13 engine`.  
\* `util.h` (`_gpgme_get_g13_path`, `_gpgme_encode_percent_string`): New prototypes.  
\* `conversion.c` (`_gpgme_encode_percent_string`): New function.  
\* `gpgme.h.in` (`gpgme_protocol_t`): Add `GPGME_PROTOCOL_G13`.  
(`struct_gpgme_op_g13_result`, `gpgme_g13_result_t`): New types.  
(`gpgme_op_g13_mount`): New function.  
\* `gpgme.def`, `libgpgme.vers`: Add `gpgme_op_g13_mount`.

- \* gpgme.c (gpgme\_set\_protocol): Allow GPGME\_PROTOCOL\_G13.
- (gpgme\_get\_protocol\_name): Add GPGME\_PROTOCOL\_G13.
- \* posix-util.c (\_gpgme\_get\_g13\_path): New function.
- \* w32-util.c (\_gpgme\_get\_g13\_path): New function.
- \* engine-backend.h (\_gpgme\_engine\_ops\_g13): New declaration.

2009-10-20 Marcus Brinkmann <marcus@g10code.de>

- \* gpgme-config.in (netlibs): Remove.
- (assuan\_cflags, assuan\_libs): Add.
  
- \* Makefile.am (assuan\_cppflags, assuan\_libobjs): Removed.
- (gpgsm\_components): Move engine-assuan.c to ...
- (assuan\_components): ... this new variable.
- (main\_sources): Add this new variable.
- (AM\_CPPFLAGS): Remove \$(assuan\_cppflags).
- (AM\_CFLAGS): Add @LIBASSUAN\_CFLAGS@.
- (libgpgme\_la\_DEPENDENCIES,
- libgpgme\_pth\_la\_DEPENDENCIES)
- (libgpgme\_glib\_la\_DEPENDENCIES, libgpgme\_qt\_la\_DEPENDENCIES)
- (libgpgme\_pthread\_la\_DEPENDENCIES): Remove \$(assuan\_libobjs).
- (libgpgme\_la\_LIBADD, libgpgme\_pth\_la\_LIBADD)
- (libgpgme\_glib\_la\_LIBADD, libgpgme\_qt\_la\_LIBADD))
- (libgpgme\_pthread\_la\_LIBADD): Replace \$(assuan\_libobjs) by
- @LIBASSUAN\_LIBS@.
- \* priv-io.h [HAVE\_W32\_SYSTEM]: Declare \_gpgme\_io\_recvmsg,
- \_gpgme\_io\_sendmsg, \_gpgme\_io\_waitpid.
- \* engine-backend.h: Define with [ENABLE\_ASSUAN] instead
- of [ENABLE\_GPGSM].
- \* posix-io.c (\_gpgme\_io\_waitpid): Make non-static.
- \* util.h (ENABLE\_ASSUAN): Declare \_gpgme\_assuan\_system\_hooks,
- \_gpgme\_assuan\_malloc\_hooks, \_gpgme\_assuan\_log\_cb.
- \* engine-gpgsm.c: Don't map assuan error codes. Use
- assuan\_release instead of assuan\_disconnect.
- (map\_assuan\_error): Remove function.
- (gpgsm\_new): Use new assuan context interface.
- \* engine-assuan.c: Use assuan\_release instead of
- assuan\_disconnect.
- (llass\_new): Use new assuan context
- interface.

2009-10-07 <wk@g10code.com>

- \* priv-io.h [W32]: Include windows.h instead of sys/socket.h.

2009-08-06 Werner Koch <wk@g10code.com>

- \* op-support.c (\_gpgme\_parse\_inv\_recip): Allow for no fingerprint.

\* engine-gpgsm.c (gpgsm\_sign): Hook up the status func for the SIGNER command.  
\* gpgme.h.in (GPGME\_STATUS\_INV\_SGMR, GPGME\_STATUS\_NO\_SGMR): New.  
\* sign.c (op\_data\_t): Add fields IGNORE\_INV\_RECPC and INV\_SGMR\_SEEN.  
(\_gpgme\_op\_sign\_init\_result): Factor code out to ...  
(sign\_init\_result): .. new. Init new fields.  
(sign\_start): Use sign\_init\_result.  
(\_gpgme\_sign\_status\_handler): Take care of the new INV\_SGMR.  
Return an error if no signature has been created.

2009-07-07 Werner Koch <wk@g10code.com>

\* engine-gpgsm.c (struct engine\_gpgsm): Add fields  
input\_helper\_data and input\_helper\_memory.  
(close\_notify\_handler): Release these new fields.  
(gpgsm\_import): Implement the keyarray feature.  
  
\* engine-gpg.c (gpg\_import): Actually return GPG\_ERR\_INV\_VALUE.  
  
\*  
engine-gpgsm.c (gpgsm\_import): Return an error for unknown data  
encodings.

2009-06-22 Marcus Brinkmann <marcus@g10code.de>

\* debug.h: Everywhere, use %p instead of 0x%x to print pointer.  
[HAVE\_STDINT\_H]: Include <stdint.h>.  
(\_TRACE, TRACE, TRACE0, TRACE1, TRACE2, TRACE3, TRACE6): Cast tag  
to (uintptr\_t) before casting it to (void\*) to silence GCC  
warning.  
  
\* gpgme.h.in (\_GPGME\_DEPRECATED\_OUTSIDE\_GPGME): New macro.  
\* sign.c (\_GPGME\_IN\_GPGME): Define it.  
\* keylist.c (\_GPGME\_IN\_GPGME): Define it.  
  
\* debug.c (\_gpgme\_debug\_begin, \_gpgme\_debug\_add): Handle error in  
vasprintf and asprintf.  
  
\* priv-io.h: Include <sys/socket.h>. Declare \_gpgme\_io\_connect.

2009-06-18 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h.in (GPGME\_CONF\_PATHNAME): Revert last change, it's  
back! (GPA still uses it...)  
  
\* gpgme.def: Fix stupid typo.  
\* w32-io.c (\_gpgme\_io\_pipe): Add missing declaration.

\* gpgme.h.in (GPGME\_CONF\_PATHNAME): Remove obsolete macro.

\* w32-io.c (\_gpgme\_io\_pipe): Allocate reader/writer thread right away.  
(\_gpgme\_io\_read, \_gpgme\_io\_write, \_gpgme\_io\_select)  
(\_gpgme\_io\_dup): Never allocate threads here.  
(find\_writer, find\_reader): Check return value of thread creation function.

\* context.h (CTX\_OP\_DATA\_MAGIC): New macro.  
(struct ctx\_op\_data): New member MAGIC.  
\* op-support.c (\_gpgme\_op\_data\_lookup): Initialize magic.  
\* gpgme.c (gpgme\_result\_unref, gpgme\_result\_ref): Check magic.

2009-06-16 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.c (gpgme\_result\_unref): Hot fix to release a lock.  
\* gpgme.c (result\_ref\_lock): New global variable.  
(gpgme\_result\_ref, gpgme\_result\_unref): use it.

2009-06-16 Werner Koch <wk@g10code.com>

\* version.c: Include stdlib.h.  
\* gpgme.h.in (gpgme\_data\_encoding\_t): Add GPGME\_DATA\_ENCODING\_URL, GPGME\_DATA\_ENCODING\_URLESC, GPGME\_DATA\_ENCODING\_URL0.  
\* data.c (gpgme\_data\_set\_encoding): Adjust for new values.  
\* engine-gpg.c (string\_from\_data): New.  
(gpg\_import): Implement --fetch-key feature.  
\* gpgme.h.in  
(gpgme\_op\_export\_keys\_start, gpgme\_op\_export\_keys): New.  
\* gpgme.def, libgpgme.vers: Add them.  
\* export.c (gpgme\_op\_export\_keys\_start, gpgme\_op\_export\_keys): New.  
(export\_keys\_start): New.  
\* gpgme.h.in (gpgme\_export\_mode\_t, GPGME\_EXPORT\_MODE\_EXTERN): New.  
(gpgme\_op\_export\_start, gpgme\_op\_export, gpgme\_op\_export\_ext\_start)  
(gpgme\_op\_export\_ext): Change arg RESERVED to MODE of new compatible type.  
\* export.c (gpgme\_export\_ext\_start, gpgme\_op\_export)  
(gpgme\_op\_export\_ext\_start, gpgme\_op\_export\_ext): Ditto.  
(export\_start): Ditto.  
\* engine.c (\_gpgme\_engine\_op\_export): Ditto.  
\* engine-backend.h (struct engine\_ops): Ditto.

- \* engine-gpgsm.c (gpgsm\_export, gpgsm\_export\_ext): Ditto.
- \* engine-gpg.c (gpg\_export, gpg\_export\_ext): Ditto. Implement mode EXTERN.
- (gpg\_export, gpg\_export\_ext): Factor common code out to ..
- (export\_common): .. this.
  
- \* gpgme.h.in (gpgme\_op\_import\_keys\_start, gpgme\_op\_import\_keys): New.
- \* gpgme.def, libgpgme.vers: Add them.
- \* import.c (gpgme\_op\_import\_keys\_start, gpgme\_op\_import\_keys): New.
- (\_gpgme\_op\_import\_keys\_start): New.
- \* engine.c (\_gpgme\_engine\_op\_import): Add arg KEYARRAY.
- \* engine-backend.h (struct engine\_ops): Ditto.
- \* engine-gpgsm.c (gpgsm\_import): Ditto. Not functional.
- \* engine-gpg.c (gpg\_import): Ditto. Implement it.

2009-06-15 Marcus Brinkmann <marcus@g10code.de>

- \* gpgme.h.in (gpgme\_result\_ref, gpgme\_result\_unref): Add prototypes.
- \* gpgme.def, libgpgme.vers (gpgme\_result\_ref, gpgme\_result\_unref): Add these.
- \* context.h (struct ctx\_op\_data): Add member "references".
- \* gpgme.c (gpgme\_result\_ref, gpgme\_result\_unref): New functions.
- (\_gpgme\_release\_result): Use gpgme\_result\_unref.
- \* op-support.c (\_gpgme\_op\_data\_lookup): Initialize references.

2009-06-12 Werner Koch <wk@g10code.com>

- \* gpgme-w32spawn.c (translate\_get\_from\_file): Parse optional spawn flags. Add new arg R\_FLAGS. Fix segv on file w/o LF.
- (translate\_handles): Add new arg R\_FLAGS. Avoid possible segv.
- (main): Pass flags for my\_spawn.
- (my\_spawn):
- Add arg FLAGS and implement AllowSetForegroundWindow.
  
- \* priv-io.h (IOSPAWN\_FLAG\_ALLOW\_SET\_FG): New.
- \* w32-io.c (\_gpgme\_io\_spawn): Add arg FLAGS and implement it.
- \* w32-glib-io.c (\_gpgme\_io\_spawn): Ditto.
- \* w32-qt-io.cpp (\_gpgme\_io\_spawn): Ditto.
- \* posix-io.c (\_gpgme\_io\_spawn): Add dummy arg FLAGS.
- \* engine-gpg.c (start): Call spawn with new flag.
  
- \* w32-util.c (\_gpgme\_allow\_set\_foreground\_window): Rename to \_gpgme\_allow\_set\_foreground\_window. Change all callers.
- \* posix-util.c (\_gpgme\_allow\_set\_foreground\_window): Ditto.

2009-06-10 Werner Koch <wk@g10code.com>

\* w32-util.c (\_gpgme\_allow\_set\_foreground\_window): Add trace support.

2009-06-09 Werner Koch <wk@g10code.com>

\* engine-gpg.c (gpg\_io\_event): Test for cmd.fd.

\* version.c (gpgme\_check\_version\_internal): Make result const.

\* gpgme.c: Include priv-io.h.

(gpgme\_io\_read, gpgme\_io\_write): New.

\* libgpgme.vers (GPGME\_1.1): Add them.

\* gpgme.def: Ditto.

\* Makefile.am (main\_sources): Remove gpgme.h.

(include\_HEADERS):

Rename to nodist\_include\_HEADERS so that a

VPATH build won't use the distributed one.

\* util.h (GPG\_ERR\_NOT\_OPERATIONAL): Define.

2009-05-28 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h.in (gpgme\_check\_version\_internal): New prototype.

(gpgme\_check\_version): New macro, overriding function of the same name.

\* libgpgme.vers, gpgme.def: Add gpgme\_check\_version\_internal.o

\* context.h (\_gpgme\_selftest): New variable declaration.

\* version.c: Include "context.h".

(gpgme\_check\_version): Set \_gpgme\_selftest on success.

(gpgme\_check\_version\_internal): New function.

\* gpgme.c (\_gpgme\_selftest): Define it.

(gpgme\_new): Check the selftest result.

2009-05-18 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h.in (gpgme\_encrypt\_flags\_t): Add

GPGME\_ENCRYPT\_NO\_ENCRYPT\_TO.

\* engine-gpg.c (gpg\_encrypt): Pass --no-encrypt-to to gpg if GPGME\_ENCRYPT\_NO\_ENCRYPT\_TO flag is set.

2009-05-14 Werner Koch <wk@g10code.com>

\* gpgme.h.in (gpgme\_status\_code\_t):

Explicitly initialize for

better maintainability and to help debugging.

2009-05-05 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h.in: Add compile time check for \_FILE\_OFFSET\_BITS.

2009-04-15 Marcus Brinkmann <marcus@g10code.de>

\* posix-io.c (\_gpgme\_io\_socket, \_gpgme\_io\_connect): New functions.

\* w32-io.c (\_gpgme\_io\_connect): Fix stupid error.

2009-04-08 Marcus Brinkmann <marcus@g10code.de>

\* w32-glib-io.c (giochannel\_table): New members used, fd, socket.

(find\_channel): Drop CREATE argument.

(new\_dummy\_channel\_from\_fd, new\_channel\_from\_fd)

(new\_channel\_from\_socket): New functions.

(\_gpgm\_io\_fd2str): Implement for sockets.

(\_gpgme\_io\_write, \_gpgme\_io\_read): Translate EAGAIN errors correctly.

(\_gpgme\_io\_pipe): Fix for new channel bookkeeping.

(\_gpgme\_io\_close, \_gpgme\_io\_dup): Likewise.

(wsa2errno, \_gpgme\_io\_socket, \_gpgme\_io\_connect): New.

\* w32-io.c (MAX\_READERS, MAX\_WRITERS): Bump up to 40.

(wsa2errno, \_gpgme\_io\_socket, \_gpgme\_io\_connect): New.

\* w32-qt-io.cpp

(\_gpgme\_io\_socket, \_gpgme\_io\_connect): New stubs.

\* version.c [HAVE\_W32\_SYSTEM]: Include "windows.h.

(do\_subsystem\_inits) [HAVE\_W32\_SYSTEM]: Call WSAStartup.

\* engine-assuan.c (lass\_status\_handler): Ignore EAGAIN errors.

2009-03-18 Werner Koch <wk@g10code.com>

\* gpgme.h.in (GPGME\_KEYLIST\_MODE\_EPHEMERAL): New.

\* engine-gpgsm.c (gpgsm\_keylist): Send new option.

2009-03-13 Werner Koch <wk@g10code.com>

\* gpgme-config.in: Make sure locale is set to C.

2009-02-24 Werner Koch <wk@g10code.com>

\* gpgme.h.in (struct \_gpgme\_op\_assuan\_result): New.

(gpgme\_assuan\_result\_t): New.

(gpgme\_op\_assuan\_result): Change return type.

(struct \_gpgme\_assuan\_sendfnc\_ctx)

(gpgme\_assuan\_sendfnc\_ctx\_t, gpgme\_assuan\_sendfnc\_t): Remove.

(gpgme\_assuan\_inquire\_cb\_t): Changed.

\* opassuan.c (op\_data\_t): Make use of a result structure.

(gpgme\_op\_assuan\_result): Change return type.

(opassuan\_start): Use result structure.

(result\_cb): Ditto.  
\* engine-assuan.c (struct \_gpgme\_assuan\_sendfnc\_ctx):  
Remove.  
(inquire\_cb\_sendfnc): Remove.  
(inquire\_cb): Change for new callback scheme. Not yet finished.  
(llass\_status\_handler): Allow sending a CANCEL from the inquire CB.

2009-02-04 Werner Koch <wk@g10code.com>

\* w32-glib-io.c (\_gpgme\_io\_spawn): Make ARGV argument const to  
match prototype.  
\* w32-qt-io.cpp (\_gpgme\_io\_spawn): Ditto.

2009-02-03 Werner Koch <wk@g10code.com>

\* gpgme.h.in (struct \_gpgme\_subkey): Add fields IS\_CARDKEY and  
CARD\_NUMBER..  
\* key.c (gpgme\_key\_unref): Release field CARD\_NUMBER.  
\* keylist.c (keylist\_colon\_handler): Factor common code out to ...  
(parse\_sec\_field15): New. Set card number.

2009-01-26 Werner Koch <wk@g10code.com>

\* opassuan.c, dirinfo.c, engine-assuan.c: New.  
\* Makefile.am: Add them.  
\* engine-backend.h: Add \_gpgme\_engine\_ops\_assuan.  
(struct engine\_ops): Add field OPASSUAN\_TRANSACT. Update all  
engine initializers.  
\* Makefile.am (gpgsm\_components): Add engine-assuan.c.  
\* gpgme.h.in (gpgme\_protocol\_t): Add GPGME\_PROTOCOL\_ASSUAN.  
(gpgme\_assuan\_data\_cb\_t,  
gpgme\_assuan\_sendfnc\_ctx\_t)  
(gpgme\_assuan\_inquire\_cb\_t, gpgme\_assuan\_status\_cb\_t): New.  
(gpgme\_op\_assuan\_transact\_start, gpgme\_op\_assuan\_transact): New.  
\* gpgme.c (gpgme\_get\_protocol\_name): Ditto.  
(gpgme\_set\_protocol): Support it.  
\* engine.c (gpgme\_get\_engine\_info): Ditto.  
(engine\_ops): Register it.  
(\_gpgme\_engine\_op\_assuan\_transact): New.  
\* libgpgme.vers (gpgme\_op\_assuan\_transact\_start)  
(gpgme\_op\_assuan\_transact): New.  
\* gpgme.def (gpgme\_op\_assuan\_transact\_start)  
(gpgme\_op\_assuan\_transact): New.  
\* engine-backend.h (struct engine\_ops): Add GET\_HOME\_DIR and  
initialize to NULL for all engines.  
\* engine.c (engine\_get\_home\_dir): New.  
(gpgme\_get\_engine\_info): Use it.  
(\_gpgme\_set\_engine\_info): Use it.

- \* engine.h (engine\_assuan\_result\_cb\_t): New.
- \* context.h (ctx\_op\_data\_id\_t): Add OPDATA\_ASSUAN.
- \* util.h (GPG\_ERR\_UNFINISHED): Define if not yet defined.
- \* version.c (gpgme\_check\_version): Protect trace arg against NULL.

2009-01-19 Werner

Koch <wk@g10code.com>

- \* runpgg.c: Rename to engine-gpg.c
- \* Makefile.am (main\_sources): Ditto.

2008-12-03 Marcus Brinkmann <marcus@g10code.de>

- \* Makefile.am (status-table.h): Use \$(builddir) to find gpgme.h.

2008-11-18 Werner Koch <wk@g10code.com>

- \* version.c (do\_subsystem\_inits): Always initialize I/O subsystem. Fixes regression from 2007-08-02.
- \* decrypt.c (\_gpgme\_decrypt\_status\_handler): Use \_gpgme\_map\_gnupg\_error to parse the error code for decrypt.algorithm.

2008-10-30 Marcus Brinkmann <marcus@g10code.de>

- \* wait-private.c (\_gpgme\_wait\_on\_condition): Remove unused variable IDX.
- \* wait-global.c: Include ops.h to silence gcc warning.
- (\_gpgme\_wait\_global\_event\_cb): Pass error value directly.
- \* wait-user.c: Include ops.h to silence gcc warning.
- \* posix-io.c (\_gpgme\_io\_spawn): Make ARGV argument const to silence gcc warning. Cast argument to execv to silence warning.
- \* w32-io.c (\_gpgme\_io\_spawn): Likewise.
- \* priv-io.h (\_gpgme\_io\_spawn): Likewise for prototype.

2008-10-24 Werner Koch <wk@g10code.com>

- \* runpgg.c (gpg\_keylist\_preprocess): Escape backslashes too.

2008-10-23 Marcus Brinkmann <marcus@g10code.de>

- \* runpgg.c (gpg\_keylist\_preprocess): Convert percent escaped string to C coded string.

2008-10-20 Werner Koch <wk@g10code.com>

- \* Makefile.am (EXTRA\_DIST): Add gpgme.h.in.
- \* gpgme.h: Rename to gpgme.h.in.
- \* gpgme.h.in (GPGME\_VERSION): Use autoconf substitution.
- \* posix-io.c: Include sys/uio.h. Fixes bug #818.

2008-10-18 Marcus Brinkmann <marcus@g10code.com>

- \* w32-util.c (find\_program\_in\_registry): Don't define. (`_gpgme_get_gpg_path`, `_gpgme_get_gpgsm_path`) (`_gpgme_get_gpgconf_path`): Do not check for fooProgram in the registry anymore. It is now no longer possible to overwrite the default location in that way.

2008-10-17 Werner Koch <wk@g10code.com>

- \* w32-glib-io.c (`_gpgme_io_fd2str`): Use "%d" and not "%ld" to work around a bug in mingw32.

2008-09-23 Marcus Brinkmann <marcus@g10code.com>

- \* gpgme.c (`gpgme_sig_notation_clear`): Clear CTX->sig\_notations. Submitted by "Daniel Mueller" <daniel@danm.de>

2008-09-16 Marcus Brinkmann <marcus@g10code.com>

- \* `runpg.c` (`gpg_new`): Don't use `errno` with `ttyname_r`.

2008-08-11 Marcus Brinkmann <marcus@g10code.com>

- \* `runpg.c` (`gpg_cancel`): Remove `cmd fd` before `status fd`.
- \* `gpgme.c` (`_gpgme_cancel_with_err`): New function. (`gpgme_cancel`): Reimplement in terms of `_gpgme_cancel_with_err`.
- \* `wait-private.c` (`_gpgme_wait_on_condition`): Use `_gpgme_cancel_with_err`.
- \* `wait-user.c` (`_gpgme_user_io_cb_handler`): Likewise.
- \* `wait-global.c` (`_gpgme_wait_global_event_cb`, `gpgme_wait`): Likewise.

2008-08-08 Marcus Brinkmann <marcus@g10code.com>

- \* `runpg.c` (`command_handler`): Remove I/O callback on error, too.

2008-06-29 Marcus Brinkmann <marcus@g10code.com>

\* gpgme.c (gpgme\_cancel\_async): Remove unused variable.

2008-06-27 Marcus Brinkmann <marcus@g10code.de>

\* libgpgme.vers: Add gpgme\_cancel\_async.

\* gpgme.def: Likewise.

\* context.h:

Include "sema.h".

(struct gpgme\_context): New members lock and canceled.

\* gpgme.c (gpgme\_new): Initialize lock.

(gpgme\_release): Destroy lock.

(gpgme\_cancel\_async): New function.

\* op-support.c (\_gpgme\_op\_reset): Reset the canceled flag.

\* wait-global.c (gpgme\_wait): Check cancel flag before processing any I/O callbacks.

\* wait-private.c (\_gpgme\_wait\_on\_condition): Likewise.

\* wait-user.c (\_gpgme\_user\_io\_cb\_handler): Likewise.

2008-06-26 Werner Koch <wk@g10code.com>

\* w32-util.c (\_gpgme\_mkstemp): Replace sprint by stpcpy.

(mkstemp): Need to use GetSystemTimeAsFileTime for better compatibility.

2008-06-25 Marcus Brinkmann <marcus@g10code.de>

\* gpgme-w32spawn.c: New file.

\* Makefile.am (libexec\_PROGRAMS) [HAVE\_W32\_SYSTEM]: New variable with gpgme-w32spawn.

\* engine-gpgsm.c (gpgsm\_new): Use server translated handles.

(gpgsm\_set\_locale): Return early if locale value is NULL.

\* util.h (\_gpgme\_mkstemp)

(\_gpgme\_get\_w32spawn\_path) [HAVE\_W32\_SYSTEM]: New function prototypes.

\*

w32-util.c: Include <stdint.h>, <sys/stat.h> and <unistd.h>.

(letters, mkstemp, \_gpgme\_mkstemp, \_gpgme\_get\_w32spawn\_path): New functions.

\* runpgg.c (gpg\_decrypt, gpg\_encrypt, gpg\_encrypt\_sign)

(gpg\_genkey, gpg\_import, gpg\_verify, gpg\_sign): Pass data over special filename FD rather than stdin.

(struct arg\_and\_data\_s): Add member ARG\_LOCP.

(struct fd\_data\_map\_s): Add member ARG\_LOC.

(struct engine\_gpg): Add member ARG\_LOC to status and colon.

(\_add\_arg, add\_arg\_with\_locp): New function.

(add\_arg\_ext): Reimplement in terms of \_add\_arg.

(gpg\_new): Remember argument location for status FD.

(build\_argv): Set argument location if requested. Also set argument location of fd\_data\_map for data items.

(start): Adjust caller of \_gpgme\_io\_spawn.

\* priv-io.h (struct spawn\_fd\_item\_s): Add members peer\_name and arg\_loc.

(\_gpgme\_io\_spawn): Remove parent fd list argument.

\* posix-io.c (get\_max\_fds): New function.

(\_gpgme\_io\_dup): Add tracing.

(\_gpgme\_io\_spawn):  
Remove parent fd list. Change meaning of child fd list to contain all child fds that should be inherited. Close all other file descriptors after fork.

\* w32-io.c, w32-glib-io.c, w32-qt-io.c(\_gpgme\_io\_spawn): Remove parent fd list. Change meaning of child fd list to contain all child fds that should be inherited. Do not inherit any file descriptors, but DuplicateHandle them. Spawn process through wrapper process. Provide wrapper process with a temporary file containing handle translation data. Return translated handle names.

\* w32-io.c (reader): Add more tracing output.

(\_gpgme\_io\_read): Likewise.

\* engine-gpgconf.c (gpgconf\_read): Adjust caller of \_gpgme\_io\_spawn.

\* version.c (\_gpgme\_get\_program\_version): Likewise.

2008-06-20 Werner Koch <wk@g10code.com>

\* engine-gpgconf.c (gpgconf\_read): Change ARGV initialization for compatibility with old compilers. Fix amount of memmove. Fix CR removal.

2008-06-19 Werner Koch <wk@g10code.com>

\* gpgme.h (GPGME\_CONF\_PATHNAME):  
Replace by GPGME\_CONF\_FILENAME,  
change all callers and provide compatibility macro.

(gpgme\_conf\_type\_t): Add complex types 34..37.

\* engine-gpgconf.c (gpgconf\_parse\_option, arg\_to\_data)

(\_gpgme\_conf\_arg\_new, \_gpgme\_conf\_arg\_release): Add new types.

2008-06-19 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgconf.c (gpgconf\_parse\_option): Fix comma detection.

2008-05-09 Werner Koch <wk@g10code.com>

\* engine-gpgconf.c (gpgconf\_read): Do not pass empty lines to the callback.

2008-05-07 Werner Koch <wk@g10code.com>

\* engine-gpgconf.c (gpgconf\_write): Change argv[0] to a self-explaining string. Needs a proper fix, though.

\* runpgg.c (gpg\_keylist, gpg\_keylist\_ext): Factor common code out to ..

(gpg\_build\_keylist\_options): .. new. Allow combination of extern and intern mode.

(gpg\_new): DFT\_TTYNAME is an array, thus check the first character.

2008-05-06 Werner Koch <wk@g10code.com>

\* version.c (extract\_version\_string): New.

(\_gpgme\_get\_program\_version):

Use it to allow for suffixes in the version line.

2008-04-28 Werner Koch <wk@g10code.com>

\* engine-gpgconf.c (gpgconf\_read): Fixed segv. Avoid memmove for each line.

2008-04-22 Marcus Brinkmann <marcus@g10code.de>

\* w32-qt-io.cpp, kdpipeiodevice.cpp: New versions from Frank Osterfeld, implement blocking select.

2008-03-11 Marcus Brinkmann <marcus@g10code.de>

\* data.c (gpgme\_data\_read, gpgme\_data\_write): Retry on EINTR.

2008-03-06 Marcus Brinkmann <marcus@g10code.de>

\* key.c (\_gpgme\_key\_add\_sig): Terminate UID in case SRC is NULL. Reported by Marc Mutz.

2008-03-05 Marcus Brinkmann <marcus@g10code.de>

\* decrypt.c (release\_op\_data): Release OPD->result.recipients.

\* encrypt.c (release\_op\_data): Release invalid\_recipient.

2008-02-15 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgconf.c (gpgconf\_read): Fix end-of-line handline.

2008-02-14 Werner Koch <wk@g10code.com>

\* w32-io.c (\_gpgme\_io\_spawn): Add arg R\_PID to return the pid.  
\* posix-io.c  
(\_gpgme\_io\_spawn): Ditto.  
\* w32-glib-io.c (\_gpgme\_io\_spawn): Ditto.  
\* w32-qt-io.cpp (\_gpgme\_io\_spawn): Ditto.  
\* priv-io.h (\_gpgme\_io\_spawn): Adjust prototyp and change all callers.  
\* runpgg.c (start): Call \_gpgme\_allow\_set\_foreground\_window.

\* w32-util.c (\_gpgme\_allow\_set\_foreground\_window): New.  
\* posix-util.c (\_gpgme\_allow\_set\_foreground\_window): New.  
\* engine-gpgsm.c (default\_inq\_cb): New.  
(gpgsm\_new) [W32]: Enable pinentry notifications.  
(status\_handler): Handle inquiries.

2008-01-30 Marcus Brinkmann <marcus@g10code.de>

\* kdpipelineio.c: New version by Frank Osterfeld, fixes race condition.

2008-01-28 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (map\_input\_enc): Rename to ...  
(map\_data\_enc): ... this. Also change all callers.  
(gpgsm\_encrypt, gpgsm\_export, gpgsm\_export\_ext, gpgsm\_genkey)  
(gpgsm\_sign): Set encoding for output.

2008-01-28 Werner Koch <wk@g10code.com>

\* keylist.c (gpgme\_get\_key): Skip duplicated keys. Fixes bug 876.

2008-01-14

Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgconf.c (gpgconf\_config\_load\_cb): Fix program\_name field.

2008-01-10 Marcus Brinkmann <marcus@g10code.de>

\* kdpipelineio.c: New version from Frank Osterfeld.

\* engine-gpgconf.c (gpgconf\_config\_load\_cb2): Handle the flag NO\_ARG\_DESC.

2008-01-04 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (gpgconf\_components): New variable.  
(main\_sources): Add gpgconf.c.

\* gpgme.h (gpgme\_protocol\_t): New protocol GPGME\_PROTOCOL\_GPGCONF.  
(gpgme\_conf\_level\_t, gpgme\_conf\_type\_t, gpgme\_conf\_arg\_t)  
(gpgme\_conf\_opt\_t, gpgme\_conf\_comp\_t, gpgme\_conf\_arg\_new)  
(gpgme\_conf\_arg\_release, gpgme\_conf\_opt\_change)  
(gpgme\_conf\_release, gpgme\_op\_conf\_load, gpgme\_op\_conf\_save): New  
types.  
\* gpgconf.c, engine-gpgconf.c: New files.  
\* engine.h: (\_gpgme\_engine\_op\_conf\_load,  
\_gpgme\_engine\_op\_conf\_save): New prototypes.  
\* op-support.c (\_gpgme\_op\_reset): Ignore not implemented locale  
function.  
\* posix-util.c (\_gpgme\_get\_gpgconf\_path): New  
function.  
\* w32-util.c (\_gpgme\_get\_gpgconf\_path): New function.  
\* engine-gpgsm.c:  
(\_gpgme\_engine\_ops\_gpgsm): Add stubs for conf\_load and conf\_save.  
\* runpgg.c:  
(\_gpgme\_engine\_ops\_gpg): Add stubs for conf\_load and conf\_save.  
\* gpgme.def: Add new gpgconf related interfaces.  
\* libgpgme.vers: Likewise.  
\* util.h (\_gpgme\_get\_gpgconf\_path): New prototype.  
\* gpgme.h (gpgme\_protocol\_t): Add GPGME\_PROTOCOL\_GPGCONF.  
\* engine-backend.h (\_gpgme\_engine\_ops\_gpgconf): New prototype.  
(struct engine\_ops): Add members for conf\_load and conf\_save.  
\* engine.c (engine\_ops): Add \_gpgme\_engine\_ops\_gpgconf.  
(\_gpgme\_engine\_op\_conf\_load,  
\_gpgme\_engine\_op\_conf\_save): New functions.  
(gpgme\_get\_engine\_info): Allow protocol GPGME\_PROTOCOL\_GPGCONF.

2007-11-28 Marcus Brinkmann <marcus@g10code.de>

\* w32-util.c (\_gpgme\_get\_gpg\_path, \_gpgme\_get\_gpgsm\_path): Search  
for installation directory. Remove old fallback default.  
(find\_program\_in\_inst\_dir): New function.

2007-11-26 Werner Koch <wk@g10code.com>

\*  
engine-gpgsm.c (struct engine\_gpgsm): Add field INLINE\_DATA and  
always reset it before calling start.  
(gpgsm\_new): Clear it.  
(status\_handler): Implement it.  
(gpgsm\_getauditlog) [USE\_DESCRIPTOR\_PASSING]: Use INLINE\_DATA.

2007-11-23 Werner Koch <wk@g10code.com>

\* op-support.c (\_gpgme\_op\_reset): Implement a no-reset flag.  
\* getauditlog.c (getauditlog\_start): Use that flag.

2007-11-20 Werner Koch <wk@g10code.com>

\* op-support.c (\_gpgme\_parse\_inv\_recv): Add new reason code 11.

2007-11-22 Werner Koch <wk@g10code.com>

\* gpgme.h (gpgme\_op\_getauditlog\_start, gpgme\_op\_getauditlog): New.

\* libgpgme.vers: Ditto.

\* gpgme.def: Ditto.

\* getauditlog.c: New.

\* engine-backend.h (struct engine\_ops): Add member GETAUDITLOG.

\* engine-gpgsm.c (gpgsm\_getauditlog): New.

(\_gpgme\_engine\_ops\_gpgsm): Insert new function.

(gpgsm\_new): Try to enable audit log support.

\* runpgg.c (\_gpgme\_engine\_ops\_gpg): Insert dummy entry.

2007-11-12 Marcus Brinkmann <marcus@g10code.de>

\*

kdpipelinedevice.cpp: New version from Frank Osterfeld.

2007-10-11 Marcus Brinkmann <marcus@g10code.de>

\* kdpipelinedevice.cpp: New version from Frank Osterfeld.

2007-10-09 Marcus Brinkmann <marcus@g10code.de>

\* kdpipelinedevice.cpp: New version from Frank Osterfeld and Marc Mutz.

2007-10-05 Marcus Brinkmann <marcus@g10code.de>

\* kdpipelinedevice.cpp, w32-qt-io.cpp: New versions from Frank Osterfeld.

2007-10-04 Marcus Brinkmann <marcus@g10code.de>

\* kdpipelinedevice.h, kdpipelinedevice.cpp, kdpipelinedevice.moc, w32-qt-io.cpp: New versions from Frank Osterfeld.

2007-10-02 Marcus Brinkmann <marcus@g10code.de>

\* kdpipelinedevice.cpp, kdpipelinedevice.moc: New versions.

\* w32-qt-io.cpp (\_gpgme\_io\_fd2str): Print actual\_fd if available.

(\_gpgme\_io\_dup): Only acquire a reference, do not actually dup.

Submitted by Frank Osterfeld.

\* priv-io.h, engine-gpgsm.c: Add comments.  
\* w32-qt-io.cpp (\_gpgme\_io\_select): Remove code handling frozen FDs.  
\* w32-glib-io.c (\_gpgme\_io\_close):  
Always dereference the channel,  
even if not primary.  
(\_gpgme\_io\_dup): Acquire a reference. Replace unused  
implementation by assertion.

2007-09-28 Werner Koch <wk@g10code.com>

\* engine-gpgsm.c (iocb\_data\_t): Add SERVER\_FD\_STR.  
(gpgsm\_new): Set it.  
(gpgsm\_set\_fd): Use it.  
  
\* w32-glib-io.c (find\_channel): Add a new primary flag.  
(\_gpgme\_io\_close): Close channel only if primary.  
(\_gpgme\_io\_dup): Put newfd into the table as shallow copy.  
  
\* priv-io.h (struct io\_select\_fd\_s): Remove member FROZEN.  
\* w32-io.c (\_gpgme\_io\_select): Ditto.  
\* w32-glib-io.c (\_gpgme\_io\_select): Ditto.  
  
\* posix-io.c (\_gpgme\_io\_select): Ditto.  
\* runpgg.c (read\_status): Ditto.  
\* wait.c (fd\_table\_put): Ditto.  
  
\* runpgg.c (gpg\_io\_event): Add tracing.  
(start): Use gpg\_io\_event for sending the start event.  
\* engine-gpgsm.c (gpgsm\_io\_event): Add tracing.  
(start): Use gpgsm\_io\_event for sending the start event.  
\* wait.c (\_gpgme\_add\_io\_cb, \_gpgme\_run\_io\_cb): Add tracing.

2007-09-28 Marcus Brinkmann  
<marcus@g10code.de>

\* kdpipelinedevice.moc, w32-qt-io.cpp, kdpipelinedevice.cpp: New  
versions from Frank Osterfeld.

2007-09-27 Marcus Brinkmann <marcus@g10code.de>

\* w32-glib-io.c (\_gpgme\_io\_spawn),  
w32-qt-io.cpp (\_gpgme\_io\_spawn), w32-io.c (\_gpgme\_io\_spawn): Close  
the process handle, return 0.  
  
\* gpgme.h (gpgme\_protocol\_t): Add GPGME\_PROTOCOL\_UNKNOWN.  
\* gpgme.c (gpgme\_get\_protocol\_name): Implement support for  
GPGME\_PROTOCOL\_UNKNOWN.

\* kdpipelineio.h: Fix last change.

\* w32-glib-io.c (\_gpgme\_io\_pipe), w32-qt-io.c (\_gpgme\_io\_pipe),  
w32-io.c (\_gpgme\_io\_pipe), posix-io.c (\_gpgme\_io\_pipe): Fix debug  
output.

2007-09-25 Marcus Brinkmann <marcus@g10code.de>

\* conversion.c, keylist.c: Include <sys/types.h>.

\* kdpipelineio.h: Use namespace \_gpgme\_.

\* kdpipelineio.cpp: Use namespace \_gpgme\_.

[Q\_OS\_WIN32 && NOMINMAX]: Do not define NOMINMAX again.

\* w32-qt-io.cpp: Change namespace of KDPipelineIODevice to  
\_gpgme\_::KDPipelineIODevice.

2007-09-17 Werner Koch <wk@g10code.com>

\*

rungpg.c (gpg\_new): Make robust against undefined ttyname or  
ttytype.

2007-09-14 Werner Koch <wk@g10code.com>

\* data-mem.c (gpgme\_data\_release\_and\_get\_mem): Fix tracing bug.

2007-09-14 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.c (gpgme\_release): Call gpgme\_sig\_notation\_clear.

2007-09-13 Marcus Brinkmann <marcus@g10code.de>

\* rungpg.c (gpg\_new): Handle return value of \_gpgme\_getenv (fixes  
small memory leak).

2007-09-07 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (libgpgme\_qt\_la\_SOURCES): Move  
moc\_kdpipelineio.cpp to EXTRA\_DIST, as this is only included by  
another file (it's more like a header file than a cpp file, but  
automake doesn't know that).

\* w32-qt-io.cpp (\_gpgme\_io\_spawn): Fix several cast errors and typos.

\* w32-io.c (\_gpgme\_io\_write): Use TRACE\_SYSRES instead of TRACE\_SYS.

(libgpgme\_qt\_la\_LIBADD): Add QT4\_CORE\_LIBS, not QT4\_CORE\_LIB.

\* kdpipelineio.h, kdpipelineio.cpp, moc\_kdpipelineio.cpp,  
kdpipelineio.moc, w32-qt-io.c:

New files.

- \* Makefile.am (ltlib\_gpgme\_extra): Rename to ltlib\_gpgme\_glib.
- (ltlib\_gpgme\_qt): New variable.
- (lib\_LTLIBRARIES): Add \$(ltlib\_gpgme\_qt).
- (libgpgme\_qt\_la\_SOURCES): New variable.
- (AM\_CPPFLAGS): Add @QT4\_CORE\_INCLUDES@
- (AM\_CFLAGS): Add @QT4\_CORE\_CFLAGS@.
- (libgpgme\_qt\_la\_LDFLAGS, libgpgme\_qt\_la\_DEPENDENCIES)
- (libgpgme\_qt\_la\_LIBADD): New variables.

- \* sema.h (struct critsect\_s): Rename "private" to "priv" to make C++ users happy. Change users.
- \* posix-sema.c (\_gpgme\_sema\_cs\_enter, \_gpgme\_sema\_cs\_leave) (\_gpgme\_sema\_cs\_destroy): Likewise.
- \* w32-sema.c (critsect\_init, \_gpgme\_sema\_cs\_enter) (\_gpgme\_sema\_cs\_leave, \_gpgme\_sema\_cs\_destroy): Likewise.
- \* w32-glib-io.c (gpgme\_get\_giochannel): Change return type to void\*.
- (gpgme\_get\_fdptr): New function.
- \* w32-io.c (gpgme\_get\_fdptr): New function
- \* gpgme.def: Add gpgme\_get\_fdptr.

2007-08-22 Marcus Brinkmann <marcus@g10code.de>

- \* w32-io.c (\_gpgme\_io\_write): Return early if COUNT is zero.
- (writer): Remove superfluous check.

2007-08-20 Marcus Brinkmann <marcus@g10code.de>

- \* gpgme.h: Move include of gpg-error.h out of extern "C".

2007-08-07 Werner Koch <wk@g10code.com>

- \* gpgme.h (struct \_gpgme\_signature): Add member CHAIN\_MODEL.
- \* verify.c (parse\_trust): Set Chain\_MODEL.

2007-08-02 Werner Koch <wk@g10code.com>

- \* w32-glib-io.c (\_gpgme\_io\_spawn): Use DETACHED\_PROCESS flag.
- \* w32-io.c (\_gpgme\_io\_spawn): Ditto.
- (\_gpgme\_io\_write): Map ERROR\_NO\_DATA to EPIPE.
- \* debug.c (\_gpgme\_debug): Enable assuan logging.
- (\_gpgme\_debug\_subsystem\_init): New.
- \* version.c (do\_subsystem\_inits): Disable assuan logging and initialize the debug system.
- (gpgme\_check\_version): Do not trace before the subsystems are initialized.

2007-07-17 Marcus Brinkmann <marcus@g10code.de>

- \* debug.c: Include <errno.h> and "debug.h".
- (\_gpgme\_debug): Save and restore ERRNO.
- (TOHEX): New macro.
- (\_gpgme\_debug\_buffer): New function.
- \* conversion.c, data-compat.c, data-mem.c, data.c, engine-gpgsm.c, gpgme.c, keylist.c, posix-io.c, runpgg.c, sign.c, version.c, w32-io.c, wait.c: Replace DEBUG macros by TRACE\_\* variants. In most of these files, add many more tracepoints.

2007-07-16 Marcus Brinkmann <marcus@g10code.de>

- \* engine-gpgsm.c (status\_handler): Do not send BYE here.
  
- \* w32-io.c (struct reader\_context\_s, struct writer\_context\_s): New members REFCOUNT.
- (create\_reader, create\_writer): Initialize C->refcount to 1.
- (destroy\_reader, destroy\_writer): Only destroy if C->refcount drops to 0.
- (find\_reader, find\_writer, kill\_reader, kill\_writer): Beautify.
- \* priv-io.h (\_gpgme\_io\_dup): New prototype.
- \* posix-io.c (\_gpgme\_io\_dup): New function.
- \* w32-io.c (\_gpgme\_io\_dup): Likewise.
- \* w32-glib-io.c (\_gpgme\_io\_dup): Likewise.
- \* engine-gpgsm.c (start): Reverting to version 2007-07-10.

2007-07-13 Marcus Brinkmann <marcus@g10code.de>

- \* data-user.c (user\_read, user\_write, user\_seek): Set errno and return -1 instead returning the error code directly.
- \* data-compat.c (old\_user\_seek): Likewise.
- \* gpgme.c (gpgme\_sig\_notation\_add): Return error properly.
  
- \* Revert the "close\_notify\_handler" returns int stuff. Always close in the \_gpgme\_io\_close implementations.
- \* engine-gpgsm.c (status\_handler): Try to terminate the connection in case of error.
- \* w32-io.c (\_gpgme\_io\_read): Return C->error\_code in ERRNO.
- (\_gpgme\_io\_write): Likewise.
  
- \* priv-io.h (\_gpgme\_io\_set\_close\_notify): Change type of HANDLER to \_gpgme\_close\_notify\_handler.
- (\_gpgme\_close\_notify\_handler): New type.
- (\_gpgme\_io\_dup): Remove prototype.

\* posix-io.c (notify\_table, \_gpgme\_io\_set\_close\_notify): Change type of HANDLER to \_gpgme\_close\_notify\_handler\_t.  
(\_gpgme\_io\_close): Do not close the FD if handler returns 0.  
(\_gpgme\_io\_dup): Remove function.

\* w32-io.c (notify\_table, \_gpgme\_io\_set\_close\_notify, \_gpgme\_io\_close): Change type of HANDLER to \_gpgme\_close\_notify\_handler\_t.  
(\_gpgme\_io\_close): Do not close the FD if handler returns 0.  
(\_gpgme\_io\_dup): Remove function.

\* w32-glib-io.c  
(\_gpgme\_io\_dup): Remove function.  
(\_gpgme\_io\_set\_close\_notify, notify\_table): Change type of HANDLER to \_gpgme\_close\_notify\_handler\_t.  
(\_gpgme\_io\_close): Do not close the FD if handler returns 0.

\* runpg.c (close\_notify\_handler): Change return type to int, return 1.

\* engine-gpgsm.c (close\_notify\_handler): Change return type to int, return 0 for status FD and 1 for all other FDs.  
(start): Do not duplicate the status FD.

2007-07-12 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am: Replace implicit rule by suffix rule. Add SUFFIXES for that.

2007-07-12 Werner Koch <wk@g10code.com>

\* version.c (do\_subsystem\_inits) [W32]: Make sure that the socket system has been started.

2007-07-10 Marcus Brinkmann <marcus@g10code.de>

\* priv-io.h (\_gpgme\_io\_dup): New prototype.  
\* posix-io.c (\_gpgme\_io\_dup): New function.  
\* w32-io.c (\_gpgme\_io\_dup): Likewise.  
\* w32-glib-io.c (\_gpgme\_io\_dup): Likewise.  
\* engine-gpgsm.c (start): Use \_gpgme\_dup() instead of dup().

2007-07-08

Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c [HAVE\_W32\_SYSTEM]: Enable the bunch of the file.  
\* funopen.c (funopen): Rename to \_gpgme\_funopen.

2007-04-30 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (gpgsm\_new): Fix error handling for ttyname\_r.  
\* runpg.c (gpg\_new): Likewise.

Submitted by Stephen Tether.

2007-02-26 Werner Koch <wk@g10code.com>

- \* verify.c (op\_data\_t): New element PLAINTEXT\_SEEN.
- (\_gpgme\_verify\_status\_handler): Return an error if more than one plaintext has been seen.
- (parse\_error): New arg SET\_STATUS. Also detect it based on an ERROR status (gpg > 1.4.6).

2007-01-26 Werner Koch <wk@g10code.com>

- \* w32-io.c (build\_commandline): Fixed stupid quoting bug.
- \* w32-glib-io.c (build\_commandline): Ditto.
- \* runpgp.c (gpg\_set\_locale): Avoid dangling pointer after free.
- \* gpgme-config.in: New options --get-gpg and --get-gpgsm.

2007-01-18 Marcus Brinkmann <marcus@g10code.de>

- \* data.h (\_gpgme\_data\_get\_fd): Add prototype.
- (gpgme\_data\_get\_fd\_cb):  
New type.
- (struct \_gpgme\_data\_cbs): New member get\_fd.
- \* data.c (\_gpgme\_data\_get\_fd): New function.
- \* data-fd.c (fd\_get\_fd): New function.
- (fd\_cbs): Add fd\_get\_fd.
- \* data-stream.c (stream\_get\_fd): New function.
- (stream\_cbs): Add stream\_get\_fd.
- \* data-mem.c (mem\_cbs): Add NULL for get\_fd callback.
- \* data-user.c (user\_cbs): Likewise.
- \* engine-gpgsm.c (gpgsm\_set\_fd) [USE\_DESCRIPTOR\_PASSING]: Try to short-cut by passing the data descriptor directly.

2007-01-17 Marcus Brinkmann <marcus@g10code.de>

- \* w32-io.c (build\_commandline): Quote all command line arguments.
- \* w32-glib-io.c (build\_commandline): Likewise.

2007-01-10 Werner Koch <wk@g10code.com>

- \* ttyname\_r.c (ttyname\_r) [W32]: Return a dummy name.

2007-01-08 Werner Koch <wk@g10code.com>

- \* version.c (do\_subsystem\_inits): Do assuan init only if building with Assuan.

\* setenv.c: Include assuan-def.h only if building with Assuan support.

\* op-support.c (\_gpgme\_op\_reset): Set LC\_MESSAGES only if defined.

\* engine-gpgsm.c (gpgsm\_set\_locale): Ditto.

\* runpgg.c (gpg\_set\_locale): Ditto.

2006-12-17 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.c (gpgme\_set\_protocol): Shut down the engine when switching protocols.

(gpgme\_ctx\_set\_engine\_info): Likewise for engine info.

\* engine.h (\_gpgme\_engine\_reset): New function prototype.

\* engine.c (\_gpgme\_engine\_reset): New function.

\* engine-backend.h (struct engine\_ops): New member RESET.

\* runpgg.c (\_gpgme\_engine\_ops\_gpg): Add NULL for reset function.

\* engine-gpgsm.c (\_gpgme\_engine\_ops\_gpgsm)

[USE\_DESCRIPTOR\_PASSING]: Add gpgsm\_reset for reset.

(\_gpgme\_engine\_ops\_gpgsm) [!USE\_DESCRIPTOR\_PASSING]: Add NULL for reset function.

(gpgsm\_reset) [USE\_DESCRIPTOR\_PASSING]: New function.

\* op-support.c (\_gpgme\_op\_reset): Try to use the engine's reset function if available.

\* engine-gpgsm.c (gpgsm\_new): Move code to dup status\_fd to ... (start): ... here.

\* posix-io.c (\_gpgme\_io\_recvmsg, \_gpgme\_io\_sendmsg): New functions.

\*

engine.h (\_gpgme\_engine\_new): Remove arguments lc\_ctype and lc\_messages from prototype.

(\_gpgme\_engine\_set\_locale): New prototype.

\* engine.c (\_gpgme\_engine\_set\_locale): New function.

\* op-support.c (\_gpgme\_op\_reset): Call \_gpgme\_engine\_set\_locale.

\* engine-backend.h (struct engine\_ops): Add new member SET\_LOCALE.

Remove arguments lc\_messages and lc\_ctype from member NEW.

\* engine-gpgsm.c (struct engine\_gpgsm): New members lc\_ctype\_set and lc\_messages\_set.

(gpgsm\_new): Remove lc\_messages and lc\_ctype arguments.

(gpgsm\_set\_locale): New function.

(\_gpgme\_engine\_ops\_gpgsm): Add gpgsm\_set\_locale.

\* runpgg.c (struct engine\_gpg): Add new members lc\_messages and lc\_ctype.

(gpg\_release): Release lc\_messages and lc\_ctype if set.

(gpg\_new): Remove lc\_messages and lc\_ctype arguments.

(gpg\_set\_locale): New function.

(\_gpgme\_engine\_ops\_gpg): Add gpg\_set\_locale.  
(add\_arg): Implement in terms of:  
(add\_arg\_ext): New function.  
(start): Set lc-messages and lc-ctype arguments here.

2006-12-03

Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (struct engine\_gpgsm): Move members input\_fd\_server, output\_fd\_server, message\_fd\_server to ...  
(iocb\_data): ... here (as server\_fd).  
(close\_notify\_handler): Reset tags as well.  
(gpgsm\_new): Implement support for descriptor passing.  
(fd\_type\_t): New type.  
(gpgsm\_clear\_fd): New function. Use it instead of \_gpgsm\_io\_close for unused communication channels.  
(gpgsm\_set\_fd): Rewritten to support descriptor passing. All relevant callers adjusted as well (previously of \_gpgme\_io\_close).

2006-12-02 Marcus Brinkmann <marcus@g10code.de>

\* version.c: Include "assuan.h".  
(do\_subsystem\_inits): Call assuan\_set\_assuan\_err\_source.

2006-12-01 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (libgpgme\_real\_la\_SOURCES): Rename to main\_sources.  
(libgpgme\_la\_SOURCES, libgpgme\_pthread\_la\_SOURCES, libgpgme\_glib\_la\_SOURCES, libgpgme\_pth\_la\_SOURCES): Add \$(main\_sources).  
(libgpgme\_la\_DEPENDENCIES, libgpgme\_la\_LIBADD, libgpgme\_pthread\_la\_DEPENDENCIES, libgpgme\_pthread\_la\_LIBADD, libgpgme\_pth\_la\_DEPENDENCIES, libgpgme\_pth\_la\_LIBADD, libgpgme\_glib\_la\_DEPENDENCIES, libgpgme\_glib\_la\_LIBADD): Remove libgpgme-real.la.  
(noinst\_LTLIBRARIES): Removed.  
(libgpgme\_glib\_la\_CFLAGS, libgpgme\_pth\_la\_CFLAGS): Removed.  
(AM\_CFLAGS): New variable.

2006-11-30 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c: Replace AssuanError with gpg\_error\_t and ASSUAN\_CONTEXT with assuan\_context\_t.

2006-11-29 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (gpgsm\_new): Check return value of  
assuan\_pipe\_connect.

\* runpg.c: Include <unistd.h>.

(gpg\_new): Support --display, --ttyname, --ttytype, --lc-ctype and  
--lc-messages. Fixes issue 734.

2006-10-24 Marcus Brinkmann <marcus@g10code.de>

\* trustlist.c (gpgme\_op\_trustlist\_next): Return error if OPD is  
NULL.

2006-10-23 Marcus Brinkmann <marcus@g10code.de>

\* wait-global.c (gpgme\_wait): Unlock CTX\_LIST\_LOCK while calling  
\_gpgme\_engine\_io\_event().

\*

keylist.c (gpgme\_op\_keylist\_next): Return error if OPD is NULL.

2006-09-25 Marcus Brinkmann <marcus@g10code.de>

\* data-mem.c (gpgme\_data\_release\_and\_get\_mem): Release the data  
object properly.

2006-09-22 Marcus Brinkmann <marcus@g10code.de>

\* keylist.c (keylist\_colon\_handler): Move debug output after  
initialising KEY.

2006-07-29 Marcus Brinkmann <marcus@g10code.de>

\* gpgme-config.in (Options): Add NETLIBS.

\* Makefile.am (libgpgme\_la\_LIBADD, libgpgme\_pthread\_la\_LIBADD,  
libgpgme\_pth\_la\_LIBADD, libgpgme\_glib\_la\_LIBADD): Add NETLIBS.

\* runpg.c (read\_status): Fix comparison disguising as an  
assignment.

2005-03-24 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.c (gpgme\_set\_locale): Remove conditional on  
HAVE\_W32\_SYSTEM, and just check for LC\_MESSAGES.

2006-07-16 Marcus Brinkmann <marcus@g10code.de>

\* runpg.c (read\_status): Strip potential carriage return.

\* genkey.c (get\_key\_parameter): Skip potential carriage return.

\* version.c (`_gpgme_get_program_version`):

Strip potential carriage

return.

\* data.c (`gpgme_data_set_file_name`): Allow to clear the file name by passing NULL.

2006-06-22 Marcus Brinkmann <marcus@g10code.de>

\* keylist.c (`gpgme_get_key`): Also clone the engine info.

2006-03-06 Marcus Brinkmann <marcus@g10code.de>

\* `gpgme-config.in` (`cflags_pth`): Revert accidental removal of pthread support with last change.

2006-02-28 Marcus Brinkmann <marcus@g10code.de>

\* `w32-glib-io.c` (`O_BINARY`) [`!O_BINARY`]: New macro. (`_gpgme_io_pipe`): Open pipes in binary mode.

2006-02-22 Marcus Brinkmann <marcus@g10code.de>

\* `engine.c` (`gpgme_engine_check_version`): Reimplemented to allow checking the version correctly even after changing the engine information. Bug reported by Stphane Corthsy.

\* `rungpg.c` (`read_colon_line`): Invoke colon preprocess handler if it is set.

(`colon_preprocessor_t`): New type.

(`struct engine_gpg`): New member `colon.preprocess_fnc`.

(`gpg_keylist_preprocess`): New function.

\* `keylist.c`

(`keylist_colon_handler`): Allow short key IDs.

2006-02-15 Marcus Brinkmann <marcus@g10code.de>

\* `w32-io.c` (`create_writer`): Make `C->have_data` a manually reset event.

(`writer`): Move code from end of if block to beginning, so it is also run the first time.

(`_gpgme_io_write`): Move assert check after error check. Reset the `is_empty` event, and also do it eagerly.

(`_gpgme_io_select`): Unconditionally wait for the `is_empty` event.

2006-01-26 Werner Koch <wk@g10code.com>

\* `w32-util.c` (`_gpgme_get_conf_int`): New.

\* posix-util.c (\_gpgme\_get\_conf\_int): New.  
\* w32-io.c (get\_desired\_thread\_priority): New.  
(create\_reader, create\_writer): Use it here.

2006-01-04 Werner Koch <wk@g10code.com>

\* debug.h (\_gpgme\_debug\_srcname): New. Use it with the debug macros.

\* w32-glib-io.c (\_gpgme\_io\_set\_nonblocking): Add debug statements. Disable error return for failed nonblocking call.

2006-01-03 Marcus Brinkmann <marcus@g10code.de>

\* w32-glib-io.c (\_gpgme\_io\_close): Only close fd if there is no channel for it.

2005-12-31 Marcus Brinkmann <marcus@g10code.de>

\* w32-glib-io.c (find\_channel): Set channel to unbuffered.  
(\_gpgme\_io\_select): Fix debug output.

2005-12-23 Werner Koch <wk@g10code.com>

\* gpgme.h (struct \_gpgme\_signature): Append field PKA\_ADDRESS.  
\* verify.c (release\_op\_data, \_gpgme\_verify\_status\_handler): Set this field.

2005-12-20 Werner Koch <wk@g10code.com>

\* gpgme.h (gpgme\_status\_code\_t): Added GPGME\_STATUS\_PKA\_TRUST\_BAD and GPGME\_STATUS\_PKA\_TRUST\_GOOD.  
(struct \_gpgme\_signature): New field pka\_trust.  
\* verify.c (\_gpgme\_verify\_status\_handler): Set pka\_trust.

2005-12-06 Werner Koch <wk@g10code.com>

\* keylist.c (keylist\_colon\_handler): Store fingerprints of the subkeys. Reset the secret flag of subkeys for stub secret keys.  
(NR\_FIELDS): Bumped up to 16

2005-11-27 Marcus Brinkmann <marcus@g10code.de>

\* engine.c (\_gpgme\_set\_engine\_info): Use new\_file\_name in engine\_get\_version invocation. Reported by Stphane Corthsy.

2005-11-24

Marcus Brinkmann <marcus@g10code.de>

\* w32-glib-io.c (\_gpgme\_io\_fd2str): Remove debug printf.

2005-11-18 Werner Koch <wk@g10code.com>

\* w32-glib-io.c: Include glib.h before windows to avoid a symbol shadowing warning.

(find\_channel): Better use g\_io\_channel\_win32\_new\_fd instead of the autodetection function g\_io\_channel\_unix\_new.

(\_gpgme\_io\_select): Rewritten. It is now a fully working select implementation.

2005-11-18 Marcus Brinkmann <marcus@g10code.de>

\* priv-io.h (\_gpgme\_io\_fd2str): New prototype.

\* posix-io.c (\_gpgme\_io\_fd2str): New function.

\* w32-io.c (\_gpgme\_io\_fd2str): New function.

\* runpgg.c: Use this new function.

\* w32-glib-io.c (\_gpgme\_io\_fd2str): Rewrote the file handle code again. Two's company, three's the musketeers.

\* w32-glib-io.c: Rewrote the file handle code. We don't create system fds for every handle (doesn't work for inherited handles), but we create pseudo fds in a private namespace that designate a handle and potentially a giochannel.

2005-11-18 Werner Koch <wk@g10code.com>

\* versioninfo.rc.in: Set file version to LT-version + Svn-revision.

2005-11-17 Marcus Brinkmann <marcus@g10code.de>

\* w32-glib-io.c: New file.

\* gpgme.def (gpgme\_get\_giochannel): Add symbol.

\* Makefile.am (system\_components) [HAVE\_DOSISH\_SYSTEM]: Remove w32-io.c.

(ltlib\_gpgme\_extra): New variable.

(lib\_LTLIBRARIES): Add \$(ltlib\_gpgme\_extra).

(system\_components\_not\_extra): New variable.

(libgpgme\_la\_SOURCES, libgpgme\_pthread\_la\_SOURCES,

libgpgme\_pth\_la\_SOURCES): Add \$(system\_components\_not\_extra).

(libgpgme\_glib\_la\_LDFLAGS, libgpgme\_glib\_la\_DEPENDENCIES,

libgpgme\_glib\_la\_LIBADD, libgpgme\_glib\_la\_CFLAGS)

[BUILD\_W32\_GLIB]: New variables.

\* gpgme-config.in (glib): New option.

\* gpgme.m4 (AM\_PATH\_GPGME\_GLIB): New macro.

2005-11-17 Marcus Brinkmann <marcus@g10code.de>

- \* priv-io.h (\_gpgme\_io\_waitpid, \_gpgme\_io\_kill): Removed.
- \* w32-io.c (\_gpgme\_io\_waitpid, \_gpgme\_io\_kill): Removed.
- \* posix-io.c (\_gpgme\_io\_kill):  
Removed.
- (\_gpgme\_io\_waitpid): Declare static.

2005-10-24 Marcus Brinkmann <marcus@g10code.de>

- \* w32-io.c (\_gpgme\_io\_spawn): Don't minimize window, hide it.

2005-10-21 Werner Koch <wk@g10code.com>

- \* Makefile.am: Fixed cut+paste problem

2005-10-20 Marcus Brinkmann <marcus@g10code.de>

- \* Makefile.am: Build versioninfo.lo, not versioninfo.o. Also, fix the whole mess.

2005-10-16 Marcus Brinkmann <marcus@g10code.de>

- \* runpgg.c (gpgg\_edit): Don't add a key argument if in card edit mode.

2005-10-06 Marcus Brinkmann <marcus@g10code.de>

- \* Makefile.am (gpgme.dll gpgme.dll.a): Use \$(srcdir) for gpgme.def.
- \* gpgme.h (gpgme\_free): New prototype.
- \* data-mem.c (gpgme\_free): New function.
- \* libgpgme.vers (GPGME\_1.1): Add gpgme\_free.
- \* gpgme.def: Add gpgme\_free.

2005-10-02 Marcus Brinkmann <marcus@g10code.de>

- \* util.h (\_gpgme\_decode\_percent\_string): Add new argument BINARY to prototype.
- \* verify.c (parse\_notation): Likewise for invocation.
- \* conversion.c (\_gpgme\_decode\_percent\_string):  
Likewise to  
declaration. If set, do not replace '\0' characters with a  
printable string.
- \* gpgme.h (struct \_gpgme\_key\_sig): New field notations.
- \* ops.h (\_gpgme\_parse\_notation): New prototype.

- \* sig-notation.c (\_gpgme\_parse\_notation): New function.
- \* key.c (gpgme\_key\_unref): Free all signature notations.
- \* keylist.c (op\_data\_t): New member tmp\_keysig.  
(finish\_key): Clear OPD->tmp\_keysig.
- \* gpgme.c (gpgme\_set\_keylist\_mode): Remove check.
- \* runpgg.c (gpg\_keylist): Support listing signature notations.  
(gpg\_keylist\_ext): Likewise.

2005-10-01 Marcus Brinkmann <marcus@g10code.de>

- \* engine.h (\_gpgme\_set\_engine\_info): Add prototype.
- \* engine-backend.h (struct engine\_ops): Change return type of  
get\_file\_name() to const char \* to silence gcc warning.
- \* engine.c (engine\_get\_file\_name): Change return type to const  
char \* to silence gcc warning.  
(gpgme\_get\_engine\_info): Use transitional variable to go from  
const char \* to char \* to silence gcc warning.  
(\_gpgme\_set\_engine\_info):  
Likewise.
- \* engine-gpgsm.c (struct engine\_gpgsm): Change type of LINE to  
char \* to silence gcc warning.  
(gpgsm\_new): Make ARGV a pointer to const char.  
(status\_handler): Change type of SRC, END, DST, ALINE and NEWLINE  
to char \* to silence gcc warning.

- \* gpgme.def: Add gpgme\_data\_set\_file\_name,  
gpgme\_data\_get\_file\_name, gpgme\_sig\_notation\_clear,  
gpgme\_sig\_notation\_add and gpgme\_sig\_notation\_get.
- \* libgpgme.vers: Add gpgme\_sig\_notation\_clear,  
gpgme\_sig\_notation\_add and gpgme\_sig\_notation\_get.
- \* Makefile.am (libgpgme\_real\_la\_SOURCES): Add sig-notation.c.
- \* context.h (struct gpgme\_context): New field sig\_notations.
- \* gpgme.h (struct \_gpgme\_sig\_notation): New member value\_len and  
critical.  
(GPGME\_SIG\_NOTATION\_CRITICAL): New symbol.  
(gpgme\_sig\_notation\_flags\_t): New type.  
(gpgme\_sig\_notation\_add, gpgme\_sig\_notation\_clear,  
gpgme\_sig\_notation\_get): New prototypes.
- \* ops.h (\_gpgme\_sig\_notation\_create, \_gpgme\_sig\_notation\_free):  
New prototypes.  
\*
- sig-notation.c (\_gpgme\_sig\_notation\_free): New file.
- \* verify.c (parse\_notation): Use support functions.  
(release\_op\_data): Likewise.
- \* runpgg.c (append\_args\_from\_sig\_notations): New function.  
(gpg\_encrypt\_sign, gpg\_sign): Call it.

2005-09-30 Marcus Brinkmann <marcus@g10code.de>

- \* data.h (struct gpgme\_data): New member file\_name.
- \* data.c (gpgme\_data\_set\_filename): New function.
- (\_gpgme\_data\_release): Free DH->filename if necessary.
- (gpgme\_data\_get\_filename): New function.
- \* runpg.c (gpg\_encrypt): Set filename option.
- (gpg\_encrypt\_sign): Likewise.
- (gpg\_sign): Likewise.
- \* libgpgme.vers (GPGME\_1.1): Add gpgme\_data\_set\_file\_name and gpgme\_data\_get\_file\_name.

\* decrypt.c, verify.c, gpgme.h: Replace plaintext\_filename with file\_name.

2005-09-29 Marcus Brinkmann <marcus@g10code.de>

- \* gpgme.h (struct \_gpgme\_key): Add field is\_qualified.
- (struct \_gpgme\_subkey): Likewise.
- \* keylist.c (set\_subkey\_capability, set\_mainkey\_capability): Set field is\_qualified.

2005-09-23

Werner Koch <wk@g10code.com>

- \* w32-io.c (\_gpgme\_io\_pipe): Removed use of environment variable again.
- (create\_reader, create\_writer): Set thread priority higher.

2005-09-19 Werner Koch <wk@g10code.com>

- \* w32-io.c (\_gpgme\_io\_pipe): New environment variable to change the size of the pipe buffer.

2005-09-13 Werner Koch <wk@g10code.com>

- \* ath.c: Changes to make it work under W32.

2005-09-12 Marcus Brinkmann <marcus@g10code.de>

- \* Makefile.am (libgpgme\_la\_SOURCES): Set to ath.h and ath.c.
- (ath\_pth\_src, ath\_pthread\_src): Removed.
- (w32\_o\_files): Replace ath-compat.o with ath.o.
- (libgpgme\_pth\_la\_CFLAGS): New variable.
- \* ath-compat.c, ath-pthread-compat.c, ath-pth-compat.c: Removed.
- \* ath.h (ath\_pthread\_available, ath\_pth\_available): Removed.
- (ath\_init) [!\_ATH\_EXT\_SYM\_PREFIX]: Do not define macro.
- (struct ath\_ops, ath\_init) [\_ATH\_COMPAT]: Removed.
- (\_ATH\_COMPAT): Macro removed.

\* posix-sema.c (\_gpgme\_sema\_subsystem\_init): Do not call  
\_gpgme\_ath\_init.

2005-09-12

Marcus Brinkmann <marcus@g10code.de>

\* keylist.c (release\_op\_data): Do not free opd->tmp\_uid.

2005-09-07 Werner Koch <wk@g10code.com>

\* w32-io.c (build\_commandline): Quote argv[0].

2005-08-26 Marcus Brinkmann <marcus@g10code.de>

\* runpg.c (command\_handler): Use \_gpgme\_io\_write instead of write.

\* edit.c (command\_handler): Do not depend on PROCESSED being  
available.

\* engine.h (engine\_command\_handler\_t): Add new argument processed.

\* ops.h (\_gpgme\_passphrase\_command\_handler\_internal): Rename  
prototype to ...

(\_gpgme\_passphrase\_command\_handler): ... this one.

\* passphrase.c (\_gpgme\_passphrase\_command\_handler\_internal):

Rename to ...

(\_gpgme\_passphrase\_command\_handler): ... this one.

\* edit.c (command\_handler): Add new argument processed. Remove  
local variable with the same name. Always return processed as  
true.

\* runpg.c (command\_handler): Send a newline character if the  
handler did not.

2005-08-26 Werner Koch <wk@g10code.com>

\* w32-util.c (read\_w32\_registry\_string):

Updated from code used by

GnuPG. This allows for expanding strings and features the  
implicit fallback key.

(w32\_shgetfolderpath, find\_program\_at\_standard\_place): New.

(\_gpgme\_get\_gpg\_path, \_gpgme\_get\_gpgsm\_path): With no registry  
entry, locate the programs at the standard place.

(dlopen, dlsym, dlclose): New, so that we can keep on using what  
we are accustomed to.

\* debug.c (debug\_init): Use PATHSEP\_C so that under W32 a  
semicolon is used which allows us to create files with drive  
letters.

\* w32-io.c (\_gpgme\_io\_read, \_gpgme\_io\_write): Print content in debug mode too.

2005-07-27 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h (gpgme\_status\_code\_t): Add GPGME\_STATUS\_PLAINTEXT.  
(struct \_gpgme\_op\_decrypt\_result): New member plaintext\_filename.  
(struct \_gpgme\_op\_verify\_result): Likewise.  
\* ops.h (\_gpgme\_parse\_plaintext): Add prototype.  
\* op-support.c (\_gpgme\_parse\_plaintext): New function.  
\* decrypt.c (release\_op\_data): Release  
OPD->result.plaintext\_filename.  
(\_gpgme\_decrypt\_status\_handler):  
Handle GPGME\_STATUS\_PLAINTEXT.  
\* verify.c (release\_op\_data): Release  
OPD->result.plaintext\_filename.  
(\_gpgme\_verify\_status\_handler): Handle GPGME\_STATUS\_PLAINTEXT.

2005-08-08 Werner Koch <wk@g10code.com>

\* util.h (stpcpy): Renamed to ..  
(\_gpgme\_stpcpy): .. this and made inline. This avoids duplicate definitions when linking statically.  
\* stpcpy.c: Removed.

2005-08-19 Werner Koch <wk@g10code.com>

\* gpgme.def: New.  
\* versioninfo.rc.in: New.  
\* Makefile.am: Adds support for building a W32 DLL.  
\* ttynam\_r.c (ttynam\_r) [W32]: Return error.  
\* ath-compat.c [W32]: select and co are not yet supported; return error.  
\* data-stream.c (stream\_seek): Use ftell if ftello is not available.

2005-07-26 Marcus Brinkmann <marcus@g10code.de>

\* keylist.c (gpgme\_get\_key): Allow key IDs.

2005-06-20 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.m4: Only call GPGME\_CONFIG if found.

2005-06-03 Marcus Brinkmann <marcus@g10code.de>

\*

gpgme.h (struct \_gpgme\_signature): New members pubkey\_algo and hash\_algo.  
\* verify.c (parse\_valid\_sig): Parse pubkey and hash algo numbers.  
(parse\_new\_sig): Parse pubkey, hash algo and timestamp for ERRSIG.

(\_gpgme\_decrypt\_status\_handler): Fix last change.

\* gpgme.h (struct \_gpgme\_recipient): New structure.  
(gpgme\_recipient\_t): New type.  
(struct \_gpgme\_op\_decrypt\_result): Add member recipients.  
\* decrypt.c (op\_data\_t): New member last\_recipient\_p.  
(\_gpgme\_op\_decrypt\_init\_result): Initialize last\_recipient\_p.  
(parse\_enc\_to): New function.  
(\_gpgme\_decrypt\_status\_handler): Handle status ENC\_TO and NO\_SECKEY.

\* wait-global.c (gpgme\_wait): Break out of the fd processing loop after an error.  
Reported by Igor Belyi <gpgme@katehok.ac93.org>.

2005-06-02 Marcus Brinkmann <marcus@g10code.de>

\* wait.h (\_gpgme\_run\_io\_cb): New prototype.  
\* wait.c (\_gpgme\_run\_io\_cb): New function.  
\* wait-global.c (gpgme\_wait): Call it.  
\* wait-user.c (\_gpgme\_user\_io\_cb\_handler): Likewise.  
\*  
wait-private.c (\_gpgme\_wait\_on\_condition): Likewise.

2005-06-02 Werner Koch <wk@g10code.com>

\* passphrase.c (\_gpgme\_passphrase\_status\_handler): Take care of GPGME\_STATUS\_NEED\_PASSPHRASE\_PIN.  
(\_gpgme\_passphrase\_command\_handler\_internal): Also act on the key "passphrase.pin.ask".

\* gpgme.h: Added status codes GPGME\_STATUS\_SIG\_SUBPACKET, GPGME\_STATUS\_NEED\_PASSPHRASE\_PIN, GPGME\_STATUS\_SC\_OP\_FAILURE, GPGME\_STATUS\_SC\_OP\_SUCCESS, GPGME\_STATUS\_CARDCTRL, GPGME\_STATUS\_BACKUP\_KEY\_CREATED.

2005-05-28 Marcus Brinkmann <marcus@g10code.de>

\* data-user.c: Include <errno.h>.

2005-05-17 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.c (gpgme\_new): Set the CTX->include\_certs default to the

default.

2005-05-11 Marcus Brinkmann <marcus@g10code.de>

\* w32-io.c (\_gpgme\_io\_select): Fix loop increment.

2005-05-05 Marcus Brinkmann <marcus@g10code.de>

\* data-user.c (user\_release): Only call user hook if provided.

(user\_seek): Return EBADF if no user hook is provided.

(user\_read):

Likewise.

(user\_write): Likewise.

2005-04-28 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h (GPGME\_INCLUDE\_CERTS\_DEFAULT): New macro.

\* engine-gpgsm.c (gpgsm\_sign): Send the include-certs option after the reset, just for cleanliness, and do not send it at all if the default is requested.

\* gpgme.c (gpgme\_set\_include\_certs): Allow to use GPGME\_INCLUDE\_CERTS\_DEFAULT.

2005-04-21 Werner Koch <wk@g10code.com>

\* verify.c (calc\_sig\_summary): Set the key revoked bit.

2005-04-14 Marcus Brinkmann <marcus@g10code.de>

\* wait-global.c (gpgme\_wait): Use LI->ctx when checking a context in the list, not the user-provided CTX.

Reported by Igor Belyi <gpgme@katehok.ac93.org>.

\* wait-global.c (gpgme\_wait): If no context is found, and we should not hang, set \*status to 0 and return NULL.

Reported by Igor Belyi <gpgme@katehok.ac93.org>.

2005-03-24 Marcus Brinkmann <marcus@g10code.de>

\* data.h (EOPNOTSUPP) [\_WIN32]: Remove definition.

\* data.c (EOPNOTSUPP) [HAVE\_W32\_SYSTEM]:

Remove definition.

(gpgme\_data\_read, gpgme\_data\_write, gpgme\_data\_seek): Return ENOSYS instead EOPNOTSUPP.

\* data-compat.c (EOPNOTSUPP) [HAVE\_W32\_SYSTEM]: Remove definition.

(gpgme\_error\_to\_errno): Map GPG\_ERR\_NOT\_SUPPORTED to ENOSYS.

2005-03-24 Marcus Brinkmann <marcus@g10code.de>

- \* io.h: Rename to ...
- \* priv-io.h: ... this.
- \* Makefile.am (libpgpme\_real\_la\_SOURCES): Change io.h to priv-io.h.
- \* data.c, engine-gpgsm.c, posix-io.c, runpgg.c, version.c, w32-io.c, wait-private.c, wait-global.c, wait-user.c, wait.c: Change all includes of "io.h" to "priv-io.h"

2005-03-09 Werner Koch <wk@g10code.com>

- \* w32-util.c (\_gpgme\_get\_gpg\_path, \_gpgme\_get\_gpgsm\_path): Do not cast away type checks.
- \* io.h [W32]: Do not include stdio.h. If it is needed do it at the right place.
- \* data.h [W32]: Removed kludge for EOPNOTSUP.
- \* data.c, data-compat.c [W32]: Explicitly test for it here.

Replaced use of \_WIN32 by HAVE\_W32\_SYSTEM except for public header files.

2005-03-07

Timo Schulz <twoaday@g10code.de>

- \* gpgme.h: [\_WIN32] Removed ssize\_t typedef.
- \* ath.h: [\_WIN32] Added some (dummy) types.
- \* io.h: [\_WIN32] include stdio.h.
- \* data.h: [\_WIN32] Define EOPNOTSUPP.
- \* w32-io.c [\_WIN32] (\_gpgme\_io\_subsystem\_init): New.
- \* gpgme.c [\_WIN32] (gpgme\_set\_locale): Disabled.

2004-12-12 Marcus Brinkmann <marcus@g10code.de>

- \* engine.c (\_gpgme\_set\_engine\_info): Fix assertion.

2004-12-11 Marcus Brinkmann <marcus@g10code.de>

- \* util.h [HAVE\_CONFIG\_H && HAVE\_TTYNAME\_R] (ttyname\_r): Define prototype.
- \* ttyname\_r.c: New file.

2004-12-07 Marcus Brinkmann <marcus@g10code.de>

- \* putc\_unlocked.c, funopen.c: I just claim copyright on these files and change their license to LGPL, because they are totally trivial wrapper functions.

\* isascii.c: Change copyright notice to the one from ctype/ctype.h in the GNU C Library (CVS Head 2004-10-10), where isascii is defined as a macro doing exactly the same as the function in this file.

\* memchr.c: Update from the GNU C Library (CVS Head 2001-07-06).

\* stpcpy.c: Update from the GNU C Library (CVS Head 2004-10-10).

\* ath.c, ath-compat.c, ath.h, ath-pth.c, ath-pth-compat.c, ath-pthread.c, ath-pthread-compat.c, context.h, conversion.c, data.c, data-compat.c, data-fd.c, data.h, data-mem.c, data-stream.c, data-user.c, debug.c, debug.h, decrypt.c, decrypt-verify.c, delete.c, edit.c, encrypt.c, encrypt-sign.c, engine-backend.h, engine.c, engine-gpgsm.c, engine.h, error.c, export.c, genkey.c, get-env.c, gpgme.c, gpgme.h, import.c, io.h, key.c, keylist.c, mkstatus, Makefile.am, ops.h, op-support.c, passphrase.c, posix-io.c, posix-sema.c, posix-util.c, progress.c, runpgg.c, sema.h, sign.c, signers.c, trust-item.c, trustlist.c, util.h, verify.c, version.c, w32-io.c, w32-sema.c, w32-util.c, wait.c, wait-global.c, wait.h, wait-private.c, wait-user.c: Change license to LGPL.

2004-12-07 Marcus Brinkmann <marcus@g10code.de>

\* libgpgme.vers  
(GPGME\_1.1): New version.

\* engine-backend.h (struct engine\_ops): Add argument FILE\_NAME to member get\_version(). Add arguments FILE\_NAME and HOME\_DIR to member new(). Change return type of get\_file\_name and get\_version to char \*.

\* engine-gpgsm.c (gpgsm\_get\_version): Change return type to char pointer. Do not cache result.  
(gpgsm\_new): Add file\_name and home\_dir argument, and use them instead of the defaults, if set.

\* runpgg.c (struct engine\_gpg): New member file\_name.  
(gpg\_get\_version): Change return type to char pointer, and do not cache result.  
(gpg\_release): Free gpg->file\_name.  
(gpg\_new): Take new arguments file\_name and home\_dir. Set the --homedir argument if HOME\_DIR is not NULL. Set gpg->file\_name.  
(start): Use gpg->file\_name instead \_gpgme\_get\_gpg\_path, if set.

\* engine.h (\_gpgme\_engine\_info\_copy, \_gpgme\_engine\_info\_release):  
New prototypes.  
(\_gpgme\_engine\_new): Change first argument to gpgme\_engine\_info\_t info.

\* engine.c: Include <assert.h>.  
(gpgme\_get\_engine\_info):  
Set \*INFO within the lock. Move  
ENGINE\_INFO and ENGINE\_INFO\_LOCK to ....

(engine\_info, engine\_info\_lock): ... here. New static variables.  
(engine\_get\_version): Add file\_name argument to  
get\_version invocation. Change return type to char pointer.  
(gpgme\_engine\_check\_version): Rewritten to free() the return value  
of engine\_get\_version after using it.  
(\_gpgme\_engine\_info\_release): New function.  
(gpgme\_get\_engine\_info): Rewritten.  
(\_gpgme\_engine\_info\_copy): New function.  
(\_gpgme\_set\_engine\_info): New function.  
(gpgme\_set\_engine\_info): New function.  
(\_gpgme\_engine\_new): Change first argument to gpgme\_engine\_info\_t  
info, and use that.  
\* gpgme.h (struct \_gpgme\_engine\_info): Change type of file\_name  
and version to char \* (remove the const). New member home\_dir.  
(gpgme\_set\_engine\_info, gpgme\_ctx\_get\_engine\_info,  
gpgme\_ctx\_set\_engine\_info): New prototypes.  
\* context.h (struct gpgme\_context): New member engine\_info.  
\* gpgme.c (gpgme\_new): Allocate CTX->engine\_info.  
(gpgme\_release):  
Deallocate CTX->engine\_info.  
(gpgme\_ctx\_get\_engine\_info, gpgme\_ctx\_set\_engine\_info): New  
functions.  
\* op-support.c (\_gpgme\_op\_reset): Look for correct engine info and  
pass it to \_gpgme\_engine\_new.  
\* version.c (gpgme\_check\_version): Adjust to  
\_gpgme\_compare\_versions returning an int.  
(\_gpgme\_compare\_versions): Return an int value, not a const char  
pointer.  
\* ops.h (\_gpgme\_compare\_versions): Same for prototype.

2004-10-03 Marcus Brinkmann <marcus@g10code.de>

\* verify.c (parse\_trust): If no reason is provided, set  
SIG->validity\_reason to 0.  
(calc\_sig\_summary): Set GPGME\_SIGSUM\_CRL\_TOO\_OLD if appropriate.

2004-10-22 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (map\_assuan\_error): Return 0 if ERR is 0.  
(start): Call map\_assuan\_error on return value of  
assuan\_write\_line.

2004-10-05 Marcus Brinkmann <marcus@g10code.de>

\* op-support.c (\_gpgme\_op\_data\_lookup): Use char pointer for  
pointer arithmetic.

2004-09-30 Marcus Brinkmann

<marcus@g10code.de>

\* gpgme.m4: Implement the --api-version check.

\* runpgg.c (read\_status): Move the polling of the output data pipe to just before removing the command fd, from just before adding it. This avoids buffering problems.

\* data.c (\_gpgme\_data\_inbound\_handler): Use \_gpgme\_io\_read, not read, to improve debug output.

2004-09-29 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h (GPGME\_IMPORT\_NEW, GPGME\_IMPORT\_UID, GPGME\_IMPORT\_SIG, GPGME\_IMPORT\_SUBKEY, GPGME\_IMPORT\_SECRET, (GPGME\_KEYLIST\_MODE\_LOCAL, GPGME\_KEYLIST\_MODERN\_EXTERN, GPGME\_KEYLIST\_MODE\_SIGS, GPGME\_KEYLIST\_MODE\_VALIDATE): Change from enum to macros.

(gpgme\_keylist\_mode\_t): Define as unsigned int.

(gpgme\_key\_t): Change type of keylist\_mode to gpgme\_keylist\_mode\_t.

2004-09-23 Marcus Brinkmann <marcus@g10code.de>

\* data.c (\_gpgme\_data\_outbound\_handler): Close the file descriptor if we get an EPIPE.

\* data-stream.c (stream\_seek): Call ftello and return the current offset.

\* data.h (struct gpgme\_data): Change type of data.mem.offset to off\_t.

\* data.c (gpgme\_data\_seek): Check dh->cb->seek callback, not read callback. If SEEK\_CUR, adjust the offset by the pending buffer size. Clear pending buffer on success.

2004-09-14 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.m4: Add copyright notice.

2004-08-18 Marcus Brinkmann <marcus@g10code.de>

\* passphrase.c (\_gpgme\_passphrase\_status\_handler): Always run the status handler.

2004-08-17 Marcus Brinkmann <marcus@g10code.de>

\* `runpg.c` (`build_argv`): Use `--no-sk-comment`, not `--no-comment`.

2004-06-23 Marcus Brinkmann <marcus@g10code.de>

\* `key.c` (`_gpgme_key_append_name`): Make sure tail points to the byte following the uid.

(`_gpgme_key_add_sig`): Likewise. Don't use `calloc`, but `malloc` and `memset`.

2004-06-02 Marcus Brinkmann <marcus@g10code.de>

\* `libpggme.vers`: Remove C-style comment, which is not supported by older `binutils`.

2004-05-21 Marcus Brinkmann <marcus@g10code.de>

\* `gpgme-config.in` (Options):  
Support `--api-version`.

\* `libpggme.vers`: List all `gpgme` symbols under version `GPGME_1.0`.

\* `decrypt.c` (`_gpgme_decrypt_status_handler`): Fix last change.

\* `verify.c` (`parse_error`): Likewise.

\* `verify.c` (`parse_error`): Do not skip location of where token.

\* `gpgme.h` (`gpgme_status_code_t`): Add `GPGME_STATUS_REVKEYSIG`.

\* `verify.c` (`_gpgme_verify_status_handler`): Add handling of `GPGME_STATUS_REVKEYSIG`.

(`parse_trust`): Likewise.

2004-05-21 Marcus Brinkmann <marcus@g10code.de>

\* `gpgme.h` (`struct _gpgme_decrypt_result`): New fields `wrong_key_usage` and `_unused`.

\* `decrypt.c` (`_gpgme_decrypt_status_handler`): Don't skip over character after a matched string, as in a protocol error this could skip over the trailing binary zero.

Handle `decrypt.keyusage` error notifications.

\* `gpgme.h` (`struct _gpgme_key`): New member `keylist_mode`.

\* `keylist.c` (`keylist_colon_handler`): Set the `keylist_mode` of `KEY`.

2004-04-29 Marcus Brinkmann <marcus@g10code.de>

\* `gpgme.h` (`struct _gpgme_signature`):

Change member `WRONG_KEY_USAGE`

to unsigned int. Same for member `_unused`.

\* keylist.c (set\_mainkey\_trust\_info): Rewritten.  
(set\_subkey\_capability): Handle 'd' (disabled).  
(set\_mainkey\_capability): Rewritten.

2004-04-22 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.m4: Quote first argument to AC\_DEFUN.

2004-04-21 Werner Koch <wk@gnupg.org>

\* key.c (gpgme\_key\_unref): Allow passing NULL like free does.  
The rule of least surprise.

2004-04-15 Werner Koch <wk@gnupg.org>

\* verify.c (prepare\_new\_sig, \_gpgme\_verify\_status\_handler): Remove  
unused result.signatures items.

\* keylist.c (gpgme\_get\_key): Return an error if FPR is NULL.

2004-04-08 Werner Koch <wk@gnupg.org>

\* verify.c (\_gpgme\_verify\_status\_handler): Ignore the error status  
if we can't process it.

\* decrypt-verify.c (decrypt\_verify\_status\_handler): Backed out  
yesterday's hack. It is not any longer required.

2004-04-07 Werner Koch <wk@gnupg.org>

\* decrypt-verify.c (decrypt\_verify\_status\_handler):  
Hack to cope  
with meaningless error codes from the verify status function.

2004-04-05 Werner Koch <wk@gnupg.org>

\* gpgme.h: Add GPGME\_STATUS\_NEWSIG.

\* verify.c (parse\_error): Compare only the last part of the where  
token.

(prepare\_new\_sig): New.

(parse\_new\_sig): Use prepare\_new\_sig when required.

(\_gpgme\_verify\_status\_handler): Handle STATUS\_NEWSIG.

\* engine-gpgsm.c (gpgsm\_keylist\_ext): Send with-validation  
option. Fixed pattern construction.

(status\_handler): Add debugging output.

2004-03-23 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (gpgsm\_new): Protect `_only_tty` related code with `isatty()`. Submitted by Bernhard Herzog.

2004-03-11 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (gpgsm\_new): Protect all tty related code with `isatty()`.

\* `runpgg.c` (`gpg_cancel`): Set `GPG->fd_data_map` to `NULL` after releasing it.

\* engine-gpgsm.c (`gpgsm_cancel`): Only call `assuan_disconnect` if `GPGSM->assuan_ctx` is not `NULL`. Set it to `NULL` afterwards.

2004-03-07

Marcus Brinkmann <marcus@g10code.de>

\* `gpgme-config.in`: Do not emit `include` and `lib` directory for prefix `"/usr"` or `""`.

2004-03-03 Werner Koch <wk@gnupg.org>

\* engine-gpgsm.c (`gpgsm_export_ext`): Properly insert a space between patterns.

2004-02-18 Werner Koch <wk@gnupg.org>

\* `gpgme-config.in`: Ignore setting of `--prefix`.

2004-02-25 Marcus Brinkmann <marcus@g10code.de>

\* `runpgg.c` (`gpg_cancel`): New function.

(`gpg_release`): Call it here.

(`_gpgme_engine_ops_gpg`): Add it here.

\* engine-gpgsm.c (`gpgsm_cancel`): Fix last change.

2004-02-24 Marcus Brinkmann <marcus@g10code.de>

\* `gpgme.c` (`gpgme_cancel`): New function.

\* engine-backend.h (struct `engine_ops`): New member `cancel`.

\* engine.h (`_gpgme_engine_cancel`): New prototype.

\* engine.c (`_gpgme_engine_cancel`): New function.

\* engine-gpgsm.c (`_gpgme_engine_ops_gpgsm`): Add new member `cancel`.

(`gpgsm_cancel`): New function.

(`gpgsm_release`): Use it.

\* `runpgg.c` (`_gpgme_engine_ops_gpg`): Add new member `cancel`.

2004-02-17

Werner Koch <wk@gnupg.org>

- \* gpgme.h: Add GPGME\_KEYLIST\_MODE\_VALIDATE.
- \* engine-gpgsm.c (gpgsm\_keylist): Send this to gpgsm.

2004-02-15 Werner Koch <wk@gnupg.org>

- \* memchr.c (memchr): Fixed implementation. Problem pointed out by Adriaan de Groot.

2004-02-01 Marcus Brinkmann <marcus@g10code.de>

- \* runpg.c (build\_argv): Use --no-comment, not --comment "".
- \* data-compat.c (gpgme\_data\_new\_from\_filepart): Call fseeko if available.
- \* data-stream.c (stream\_seek): Likewise.

2004-01-16 Werner Koch <wk@gnupg.org>

- \* conversion.c (\_gpgme\_map\_gnupg\_error): Handle numerical codes as used by GnuPG 1.9.x

2004-01-13 Marcus Brinkmann <marcus@g10code.de>

- \* gpgme.h (struct \_gpgme\_key\_sig): Fix comment on REVOKED.

2004-01-12 Werner Koch <wk@gnupg.org>

- \* sign.c: Include util.h for prototype of \_gpgme\_parse\_timestamp.

2003-12-25 Marcus Brinkmann <marcus@g10code.de>

- \* gpgme.h (\_GPGME\_D\_CLASS): Revert this change.
- (struct \_gpgme\_key\_sig): For C++ compilers, rename class member to \_obsolete\_class. Add new member sig\_class.
- (struct \_gpgme\_new\_signature): Same here.
- \* key.c (gpgme\_key\_sig\_get\_ulong\_attr): Use CERTSIG->sig\_class, not CERTSIG->class.
- \* keylist.c (keylist\_colon\_handler): Likewise for KEYSIG, but keep setting KEYSIG->class, too. Rename variable CLASS to SIG\_CLASS.
- \* sign.c (parse\_sig\_created): Set SIG->sig\_class.

2003-12-22 Werner Koch <wk@gnupg.org>

- \* gpgme.h (\_GPGME\_D\_CLASS): Kludge for C++ compatibility without

changing the C API.

2003-11-19 Werner Koch <wk@gnupg.org>

- \* conversion.c (\_gpgme\_parse\_timestamp): New.
- (atoi\_1, atoi\_2, atoi\_4): New.
- \* keylist.c (parse\_timestamp): Removed. Changed all callers to use the new function.
- \* verify.c (parse\_valid\_sig): Ditto. Repalced the errno check.
- \* sign.c (parse\_sig\_created): Ditto.

2003-10-31 Werner Koch <wk@gnupg.org>

- \* keylist.c (parse\_timestamp): Detect ISO 8601 timestamps and try to convert them.

2003-10-10 Marcus Brinkmann <marcus@g10code.de>

- \* genkey.c (get\_key\_parameter): Make a copy of the key parameters. Submitted by Miguel Coca <e970095@zipi.fi.upm.es>.

2003-10-06 Marcus Brinkmann <marcus@g10code.de>

- \* data-compat.c: Include <sys/time.h> before <sys/stat.h> for broken systems.
- \* engine-gpgsm.c (map\_assuan\_error): If ERR is -1, return sensible error.
- \* io.h (\_gpgme\_io\_subsystem\_init): New prototype.
- \* posix-io.c (\_gpgme\_io\_subsystem\_init): Add function.
- (\_gpgme\_io\_spawn): Do not fixup signal handler here.
- \* version.c (do\_subsystem\_inits): Call \_gpgme\_io\_subsystem\_init.
- \* debug.c (debug\_init): Drop const qualifier from E.
- \* ath.h (struct ath\_ops): Make ADDR argument of CONNECT prototype const.
- (ath\_connect): Make ADDR argument const.
- \* ath-pthread.c (ath\_connect): Likewise.
- \* ath-pth.c (ath\_connect): Likewise.
- \* ath-compatible.c (ath\_connect): Likewise.
- \* ath.c (ath\_connect): Likewise.
- \* ath.h [HAVE\_SYS\_SELECT\_H]: Include <sys/select.h> for fd\_set.
- [!HAVE\_SYS\_SELECT\_H]: Include <sys/time.h>.

\*  
conversion.c (\_gpgme\_hextobyte): Drop "unsigned" from type of SRC argument.  
\* util.h (\_gpgme\_hextobyte): Likewise for prototype.  
  
\* gpgme.h: Remove trailing comma in enum.  
  
\* runpgg.c: Do not include <time.h>, <sys/time.h>, <sys/types.h>, <signal.h>, <fcntl.h>, or "unistd.h".

2003-10-02 Marcus Brinkmann <marcus@g10code.de>

\* engine-backend.h (struct engine\_ops): Add argument TYPE.  
\* engine.c (\_gpgme\_engine\_op\_edit): Likewise.  
\* engine.h: Likewise.  
\* runpgg.c (gpg\_edit): Likewise. Use it.  
\* edit.c (edit\_start): Likewise. Pass it on.  
(gpgme\_op\_edit\_start, gpgme\_op\_edit): Likewise.  
(gpgme\_op\_card\_edit\_start, gpgme\_op\_card\_edit): New functions.

2003-09-30 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h (gpg\_strerror\_r): Change prototype to match gpg\_strerror\_r change.  
\* error.c (gpg\_strerror\_r): Likewise, also update implementation.  
  
\* gpgme.c (gpgme\_hash\_algo\_name): Change name of RMD160 to RIPEMD160, name of TIGER to TIGER192, name of CRC32-RFC1510 to CRC32RFC1510,  
and name of CRC24-RFC2440 to CRC24RFC2440.

2003-09-14 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h: Add prototype for gpgme\_set\_locale.  
  
\* gpgme.h: Define macro \_GPGME\_INLINE depending on the compiler characteristics and use that instead \_\_inline\_\_.  
  
\* context.h (struct gpgme\_context): New members lc\_ctype and lc\_messages.  
\* gpgme.c: Include <locale.h>.  
(def\_lc\_lock, def\_lc\_ctype, def\_lc\_messages): New static variables.  
(gpgme\_set\_locale): New function.  
\* engine.c (\_gpgme\_engine\_new): Add arguments lc\_ctype and lc\_messages.  
\* engine.h (\_gpgme\_engine\_new): Likewise.  
\* engine-gpgsm.c (gpgsm\_new): Likewise.

- \* `rungpg.c` (`gpg_new`): Likewise.
- \* `engine-backend.h` (`struct engine_ops`): Likewise to `NEW`.
- \* `op-support.c` (`_gpgme_op_reset`): Likewise to invocation of `_gpgme_engine_new`.

2003-09-13 Marcus Brinkmann <marcus@g10code.de>

- \* `gpgme.h` (`gpgme_strerror_r`): New prototype.
- \* `error.c` (`gpgme_strerror_r`): New function.
  
- \* `get-env.c`: New file.
- \* `util.h` (`_gpgme_getenv`):  
Add prototype.
- \* `Makefile.am` (`libgpgme_real_la_SOURCES`): Add `get-env.c`.
- \* `rungpg.c` (`build_argv`): Use `_gpgme_getenv`.
- \* `debug.c` (`debug_init`): Likewise.
- \* `engine-gpgsm.c` (`gpgsm_new`): Likewise.  
(`gpgsm_new`): Use `ttyname_r`.
- \* `w32-io.c` (`_gpgme_io_spawn`): Disable debugging for now.

2003-09-03 Marcus Brinkmann <marcus@g10code.de>

- \* `gpgme-config.in`: Use `$libdir`, not `@libdir@`, for the `echo` command.
  
- \* `gpgme-config.in`: Rewritten.
- \* `gpgme.m4`: Rewritten.

2003-08-19 Marcus Brinkmann <marcus@g10code.de>

The `ath` files (`ath.h`, `ath.c`, `ath-pth.c`, `ath-pthread.c`, `ath-compat.c`, `ath-pth-compat.c` and `ath-pthread-compat.c`) have been updated to have better thread support, and the `Makefile.am` was changed to reflect that.

- \* `util.h` [`!HAVE_FOPENCOOKIE`]: Remove `fopencookie` declaration.
- \* `engine-gpgsm.c` (`gpgsm_assuan_simple_command`): Set `ERR` to return value of `status_fnc`.
- \* `rungpg.c` (`start`): Return `SAVED_ERRNO`, not `errno`.

2003-08-18 Marcus Brinkmann <marcus@g10code.de>

- \* `rungpg.c` (`start`):  
Use `saved_errno` instead `errno`.

2003-08-18 Marcus Brinkmann <marcus@g10code.de>

- \* `funopen.c`, `putc_unlocked.c`, `isascii.c`, `memrchr.c`: New files.

\* fopencookie.c: File removed.

2003-08-15 Marcus Brinkmann <marcus@g10code.de>

\* gpgme-config.in: Put gpg-error related flags after gpgme's.

2003-08-14 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h (struct \_gpgme\_new\_signature): Rename member CLASS to \_OBSOLETE\_CLASS, add member CLASS with type unsigned int.

\* sign.c (parse\_sig\_created): Also set SIG->\_unused\_class for backward compatibility.

2003-08-04 Marcus Brinkmann <marcus@g10code.de>

\* verify.c (parse\_new\_sig): Fix status parsing case.

2003-07-31 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h (struct \_gpgme\_subkey): Add flag CAN\_AUTHENTICATE. Lower \_UNUSED to 23 bits.

(struct \_gpgme\_key): Likewise.

\* keylist.c (set\_mainkey\_capability): Support 'a' and 'A'.

(set\_subkey\_capability): Support 'a'.

\* keylist.c (gpgme\_get\_key): Check if there is more than one key

listed, and return GPG\_ERR\_AMBIGUOUS\_NAME in that case.

\* util.h (\_gpgme\_decode\_c\_string): Change type of LEN argument to size\_t.

(\_gpgme\_decode\_percent\_string): Likewise.

\* conversion.c (\_gpgme\_decode\_c\_string): Likewise.

(\_gpgme\_decode\_percent\_string): Likewise.

(\_gpgme\_map\_gnupg\_error): Change type of I to unsigned int.

\* signers.c (gpgme\_signers\_clear): Likewise.

(gpgme\_signers\_enum): New unsigned variable SEQNO, set to SEQ. Use SEQNO instead SEQ.

\* wait.c (fd\_table\_put): Change type of I and J to unsigned int.

\* wait-global.c (\_gpgme\_wait\_global\_event\_cb): Change type of IDX to unsigned int.

(gpgme\_wait): Change type of I and IDX to unsigned int.

\* wait-private.c (\_gpgme\_wait\_on\_condition): Change type of IDX and I to unsigned int.

\* posix-io.c (\_gpgme\_io\_close): Cast return value of macro DIM to int to suppress gcc warning.

(\_gpgme\_io\_set\_close\_notify): Likewise.

(\_gpgme\_io\_select): Change type of I to unsigned int.

\* engine.c (gpgme\_get\_engine\_info):  
Change type of PROTO to  
unsigned int.  
\* wait-user.c (\_gpgme\_user\_io\_cb\_handler): Change type of IDX and  
I to unsigned int.

2003-07-29 Marcus Brinkmann <marcus@g10code.de>

\* decrypt-verify.c (decrypt\_verify\_status\_handler): Expand silly  
and wrong expression.  
\* encrypt-sign.c (encrypt\_sign\_status\_handler): Likewise.  
\* encrypt.c (encrypt\_sym\_status\_handler): Likewise.  
\* sign.c (sign\_status\_handler): Likewise.  
\* verify.c (verify\_status\_handler): Likewise.  
\* decrypt.c (decrypt\_status\_handler): Likewise.

\* engine.c (gpgme\_get\_engine\_info): Initialize NULL.

2003-07-23 Marcus Brinkmann <marcus@g10code.de>

\* gpgme-config.in (gpg\_error\_libs): Quote GPG\_ERROR\_CFLAGS and  
GPG\_ERROR\_LIBS when setting the corresponding variables.  
Reported by Stphane Corthsy.

2003-07-22 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (set\_recipients): Move declaration of NEWLEN to  
the beginning of the block.

2003-06-22 Marcus Brinkmann <marcus@g10code.de>

\* data-mem.c (mem\_write):  
Copy original buffer content.

2003-06-22 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h (gpgme\_user\_ids\_release, gpgme\_user\_ids\_append): Remove  
prototypes.

2003-06-06 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (AM\_CPPFLAGS): Add @GPG\_ERROR\_CFLAGS@.  
\* gpgme-config.in (gpg\_error\_libs, gpg\_error\_cflags): New variables.  
Print them.

\* op-support.c (\_gpgme\_parse\_inv\_userid): Rename to  
\_gpgme\_parse\_inv\_recp and change to new datatype.

\* ops.h (\_gpgme\_parse\_inv\_key): Fix prototype.

\* gpgme.h (struct \_gpgme\_invalid\_user\_id): Rename to  
\_\_gpgme\_invalid\_key. Rename field ID to KEY.  
(gpgme\_invalid\_user\_id\_t): Rename to gpgme\_invalid\_key\_t.  
(struct \_gpgme\_op\_encrypt\_result): Here, too.  
(struct \_gpgme\_op\_sign\_result): Likewise.  
\* encrypt.c (struct op\_data): Likewise.  
(release\_op\_data): Likewise.  
\* sign.c (struct op\_data): Likewise.  
(release\_op\_data): Likewise.

\* posix-io.c (\_gpgme\_io\_read): Save errno across debug calls.  
(\_gpgme\_io\_write): Likewise.  
(\_gpgme\_io\_pipe):  
Likewise.  
(\_gpgme\_io\_select): Likewise.

\* runpgg.c (struct engine\_gpg): Remove arg\_error.  
(add\_arg): Don't set arg\_error.  
(add\_data): Likewise.  
(start): Don't check arg\_error.  
(gpg\_new): Check return value of add\_arg.  
\* verify.c (parse\_notation): Free allocated memory at error.

2003-06-05 Marcus Brinkmann <marcus@g10code.de>

Everywhere: Use libgpg-error error codes.

\* Makefile.am (EXTRA\_DIST): Remove mkerrors.  
(BUILT\_SOURCES): Remove errors.c.  
(MOSTLYCLEANFILES): Likewise.  
(libgpgme\_la\_SOURCES): Likewise. Add error.c.  
(errors.c): Remove target.  
\* mkerrors: File removed.  
\* error.c: New file.

\* gpgme.h (gpgme\_error\_t): Change to type gpg\_error\_t.  
(gpgme\_err\_code\_t, gpgme\_err\_source\_t): New types.  
(gpgme\_err\_code, gpgme\_err\_source, gpgme\_error, gpgme\_err\_make):  
New static inline functions.  
(gpgme\_strsource, gpgme\_err\_code\_from\_errno,  
gpgme\_err\_code\_to\_errno, gpgme\_err\_make\_from\_errno,  
gpgme\_error\_from\_errno): New prototypes.

2003-05-29 Marcus  
Brinkmann <marcus@g10code.de>

\* gpgme.h (gpgme\_op\_export\_start): Change second arg to const char \*.  
(gpgme\_op\_export): Likewise.

(gpgme\_op\_export\_ext\_start): New prototype.

(gpgme\_op\_export\_ext): Likewise.

\* engine.h: Likewise for \_gpgme\_engine\_op\_export and \_gpgme\_engine\_op\_export\_ext.

\* engine-backend.h (struct engine\_ops): Change second argument of prototype of export to const char \*, and add reserved int as third argument. Add prototype for export\_ext.

\* engine.c (\_gpgme\_engine\_op\_export\_ext): New function.

(\_gpgme\_engine\_op\_export): Change second argument of prototype of export to const char \*, and add reserved int as third argument.

\* runpgg.c (gpg\_export): Change second argument of prototype of export to const char \*, and add reserved int as third argument.

(gpg\_export\_ext): New function.

(gpg\_keylist\_ext): Break loop at error.

(\_gpgme\_engine\_ops\_gpg): Add gpg\_export\_ext.

\* engine-gpgsm.c (gpgsm\_export): Change second argument of prototype of export to const char \*, and add reserved int as third argument.

(gpgsm\_export\_ext): New function.

(\_gpgme\_engine\_ops\_gpgsm): Add gpgsm\_export\_ext.

\* export.c (export\_start): Change second argument of prototype of export to const char \*, and add reserved int as third argument.

(gpgme\_op\_export\_start): Likewise.

(export\_ext\_start): New function.

(gpgme\_op\_export\_ext\_start): Likewise.

(gpgme\_op\_export\_ext): Likewise.

\* gpgme.h (gpgme\_keylist\_mode\_t): New type for anonymous enum.

(gpgme\_sigsum\_t): New type for anonymous enum.

\* encrypt-sign.c (encrypt\_sign\_start): Check for errors earlier, and return an error if RECP is not set.

\* Makefile.am (libgpgme\_la\_SOURCES): Remove user-id.c.

\* user-id.c: Remove file.

\* ops.h: Remove prototype for \_gpgme\_user\_ids\_all\_valid.

\* gpgme.h (gpgme\_encrypt\_flags\_t): New type.

(gpgme\_op\_encrypt\_start): Change second parameter to type gpgme\_key\_t[], and add third parameter.

(gpgme\_op\_encrypt): Likewise.

(gpgme\_op\_encrypt\_sign\_start): Likewise.

(gpgme\_op\_encrypt\_sign): Likewise.

\* encrypt.c (encrypt\_start): Likewise.

(gpgme\_op\_encrypt\_start): Likewise.

(gpgme\_op\_encrypt): Likewise. Pass flags to engine.

\* encrypt-sign.c (encrypt\_sign\_start): Likewise.

(gpgme\_op\_encrypt\_sign\_start): Likewise.  
(gpgme\_op\_encrypt\_sign): Likewise.  
\* engine-backend.h (struct engine\_ops): Likewise for prototypes of encrypt and encrypt\_sign.  
\* engine.h: Likewise for prototypes of \_gpgme\_engine\_op\_encrypt and \_gpgme\_engine\_op\_encrypt\_sign.  
\* engine.c (\_gpgme\_engine\_op\_encrypt): Likewise.  
(\_gpgme\_engine\_op\_encrypt\_sign): Likewise.  
\* runpgg.c (gpg\_encrypt): Likewise.  
(gpg\_encrypt\_sign): Likewise.  
\* runpgg.c (gpg\_encrypt): Check flags for always trust option.  
\* engine-gpgsm.c (gpgsm\_encrypt): Likewise.  
(set\_recipients): Rewritten to use keys instead user IDs.  
\* runpgg.c (append\_args\_from\_recipients): Rewritten to use keys instead user IDs.  
\* encrypt.c (\_gpgme\_encrypt\_status\_handler): Change errors returned to GPGME\_Invalid\_Key and GPGME\_General\_Error.

2003-05-28

Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c: Rename GpgsmObject to engine\_gpgsm\_t.  
(struct gpgsm\_object\_s): Rename to struct engine\_gpgsm.  
\* runpgg.c: Rename GpgObject to engine\_gpg\_t.  
(struct gpg\_object\_s): Rename to struct engine\_gpg.  
  
\* context.h (struct gpgme\_context): Change EngineObject to engine\_object\_t.  
(enum ctx\_op\_data\_type): Rename to ctx\_op\_data\_id\_t.  
(ctx\_op\_data\_t): New type.  
(struct gpgme\_context): Use it.  
\* ops.h (\_gpgme\_op\_data\_lookup): Use new type name.  
\* op-support.c (\_gpgme\_op\_data\_lookup): Likewise.  
\* engine.c: Rename EngineObject to engine\_t in the file. Also EngineStatusHandler to engine\_status\_handler\_t, EngineCommandHandler to engine\_command\_handler\_t and EngineColonLineHandler to engine\_colon\_line\_handler.  
\* runpgg.c (start): Likewise.  
\* engine-gpgsm.c: Likewise.  
\* engine-backend.h (struct engine\_ops): Likewise  
\* engine.h (struct engine\_object\_s): Rename to struct engine.  
(EngineObject): Rename to engine\_t. Also everywhere else in the file.  
(EngineStatusHandler): Rename to engine\_status\_handler\_t.  
(EngineColonLineHandler): Rename to engine\_colon\_line\_handler\_t.  
(EngineCommandHandler): Rename to engine\_command\_handler\_t.

\* engine-gpgsm.c (gpgsm\_export): Fix bug in last change.

\* Makefile.am (libgpgme\_la\_SOURCES): Remove recipient.c, add user-id.c.

\* gpgme.h (gpgme\_recipients\_t): Removed.  
(gpgme\_recipients\_new, gpgme\_recipients\_release, gpgme\_recipients\_add\_name, gpgme\_recipients\_add\_name\_with\_validity, gpgme\_recipients\_count, gpgme\_recipients\_enum\_open, gpgme\_recipients\_enum\_read, gpgme\_recipients\_enum\_close): Removed.  
(gpgme\_op\_encrypt, gpgme\_op\_encrypt\_start, gpgme\_op\_encrypt\_sign, gpgme\_op\_encrypt\_sign\_start, gpgme\_op\_export\_start, gpgme\_op\_export): Change second argument to gpgme\_user\_id\_t.  
(gpgme\_user\_ids\_release): New prototype.  
(gpgme\_user\_ids\_append): Likewise.

\* ops.h (\_gpgme\_recipients\_all\_valid): Remove.  
(\_gpgme\_user\_ids\_all\_valid): Add.

\* context.h  
(struct gpgme\_recipients): Removed.

\* user-id.c: New file.

\* recipient.c: Removed file.

\* runpg.c (append\_args\_from\_recipients): Change last arg to gpgme\_user\_id\_t. Reimplement.  
(gpg\_encrypt): Change second arg to gpgme\_user\_id\_t.  
(gpg\_encrypt\_sign): Likewise.  
(gpg\_export): Likewise. Rewrite user ID list code.

\* engine.c (\_gpgme\_engine\_op\_encrypt): Change second arg to gpgme\_user\_id\_t.  
(\_gpgme\_engine\_op\_encrypt\_sign): Likewise.  
(\_gpgme\_engine\_op\_export): Likewise.

\* engine.h (\_gpgme\_engine\_op\_encrypt, \_gpgme\_engine\_op\_encrypt\_sign, \_gpgme\_engine\_op\_export): Likewise.

\* engine-gpgsm.c (set\_recipients): Likewise. Rewrite loop code.  
(gpgsm\_encrypt): Likewise.  
(gpgsm\_export): Likewise.

\* engine-backend.h (struct engine\_ops): Likewise for members ENCRYPT, ENCRYPT\_SIGN and EXPORT.

\* export.c (export\_start, gpgme\_op\_export\_start, gpgme\_op\_export): Likewise.

\* encrypt.c (encrypt\_start): Likewise. Don't check for count of recipients.  
(gpgme\_op\_encrypt\_start): Likewise.  
(gpgme\_op\_encrypt): Likewise.

\* encrypt-sign.c (encrypt\_sign\_start): Likewise.  
(gpgme\_op\_encrypt\_sign): Likewise.  
(gpgme\_op\_encrypt\_sign\_start): Likewise.

2003-05-27 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h (struct \_gpgme\_op\_import\_result): Add skipped\_new\_keys.  
\* import.c (parse\_import\_res): Add skipped\_new\_keys parser.

\* op-support.c (\_gpgme\_parse\_inv\_userid): Add missing break statements.

\* encrypt.c (gpgme\_op\_encrypt): Use gpgme\_error\_t instead of int.

2003-05-27 Marcus Brinkmann <marcus@g10code.de>

\* encrypt.c (gpgme\_op\_encrypt\_result): Use intermediate variable HOOK to avoid compiler warning. Don't ask, you don't want to know.

(\_gpgme\_encrypt\_status\_handler): Likewise.

(\_gpgme\_op\_encrypt\_init\_result): Likewise.

\* decrypt.c (gpgme\_op\_decrypt\_result): Likewise.

(\_gpgme\_decrypt\_status\_handler): Likewise.

(\_gpgme\_op\_decrypt\_init\_result): Likewise.

\* verify.c (gpgme\_op\_verify\_result): Likewise.

(\_gpgme\_verify\_status\_handler): Likewise.

(\_gpgme\_op\_verify\_init\_result):

Likewise.

\* edit.c (edit\_status\_handler): Likewise.

(command\_handler): Likewise.

(edit\_start): Likewise.

\* genkey.c (gpgme\_op\_genkey\_result): Likewise.

(genkey\_status\_handler): Likewise.

(genkey\_start): Likewise.

\* import.c (gpgme\_op\_import\_result): Likewise.

(import\_status\_handler): Likewise.

(\_gpgme\_op\_import\_start): Likewise.

\* trustlist.c (gpgme\_op\_trustlist\_next): Likewise.

(\_gpgme\_op\_trustlist\_event\_cb): Likewise.

(gpgme\_op\_trustlist\_start): Likewise.

\* keylist.c (gpgme\_op\_keylist\_result): Likewise.

(keylist\_colon\_handler): Likewise.

(keylist\_status\_handler): Likewise.

(\_gpgme\_op\_keylist\_event\_cb): Likewise.

(gpgme\_op\_keylist\_start): Likewise.

(gpgme\_op\_keylist\_ext\_start): Likewise.

(gpgme\_op\_keylist\_next): Likewise.

\* passphrase.c (\_gpgme\_passphrase\_status\_handler): Likewise.

(\_gpgme\_passphrase\_command\_handler\_internal): Likewise.

\* sign.c (gpgme\_op\_sign\_result): Likewise.

(\_gpgme\_sign\_status\_handler): Likewise.

(\_gpgme\_op\_sign\_init\_result):

Likewise.

\* passphrase.c (\_gpgme\_passphrase\_command\_handler\_internal): Fix access to pointer type.

2003-05-26 Marcus Brinkmann <marcus@g10code.de>

\* engine.h (EngineCommandHandler): Change last argument to int fd.

\* gpgme.h (gpgme\_passphrase\_cb\_t): Rewritten to take parts of the description and fd.

(gpgme\_edit\_cb\_t): Change last argument to int fd.

\* ops.h (\_gpgme\_passphrase\_command\_handler\_internal): New prototype.

\* passphrase.c: Include <assert.h>.

(op\_data\_t): Rename userid\_hint to uid\_hint, remove last\_pw\_handle.

(release\_op\_data): Check values before calling free.

(\_gpgme\_passphrase\_status\_handler): Likewise.

(\_gpgme\_passphrase\_command\_handler\_internal): New function.

(\_gpgme\_passphrase\_command\_handler): Rewritten.

\* edit.c (edit\_status\_handler): Pass -1 as fd argument.

(command\_handler): Update prototype. New variable processed. Use it to store return value of

\_gpgme\_passphrase\_command\_handler\_internal which is now used instead \_gpgme\_passphrase\_command\_handler.

Use it also to check

if we should call the user's edit function. Pass fd to user's edit function.

\* runpg.c (struct gpg\_object\_s): Change type of cmd.cb\_data to void \*.

(gpg\_release): Check value before calling free. Do not release cmd.cb\_data.

(command\_cb): Function removed.

(command\_handler): New function. Thus we don't use a data object for command handler stuff anymore, but handle it directly. This allows proper error reporting (cancel of passphrase requests, for example). Also all callbacks work via direct writes to the file descriptor (so that passphrases are not kept in insecure memory).

(gpg\_set\_command\_handler): Rewritten to use even more ugly hacks.

(read\_status): Check cmd.keyword before calling free. Install command\_handler as the I/O callback handler with GPG as private data.

\* runpg.c (gpg\_new): Add --enable-progress-filter to gpg invocation.

\* decrypt-verify.c (\_gpgme\_op\_decrypt\_verify\_start): Rename to decrypt\_verify\_start.

(gpgme\_op\_decrypt\_verify\_start):

Call decrypt\_verify\_start.

(gpgme\_op\_decrypt\_verify): Likewise.

\* verify.c (verify\_status\_handler): New function that also calls progress status handler.

(\_gpgme\_op\_verify\_start): Set status handler to verify\_status\_handler.  
Rename to (verify\_start).  
(gpgme\_op\_verify\_start): Call verify\_start.  
(gpgme\_op\_verify): Likewise.  
\* encrypt.c (encrypt\_status\_handler): New function.  
(\_gpgme\_encrypt\_sym\_status\_handler): Call progress status handler.  
Make static. Rename to encrypt\_sym\_status\_handler.  
(encrypt\_start): Set status handler to encrypt\_sym\_status\_handler  
or encrypt\_status\_handler.  
\* sign.c (sign\_status\_handler): New function.  
(sign\_start): Set status handler to sign\_status\_handler.  
\* decrypt.c (decrypt\_status\_handler): New function that also calls  
progress status handler.  
(decrypt\_start): Set status handler to decrypt\_status\_handler.  
\* encrypt-sign.c (encrypt\_sign\_status\_handler): Likewise.  
\* decrypt-verify.c (decrypt\_verify\_status\_handler):  
Call  
\_gpgme\_progress\_status\_handler.  
  
\* conversion.c (\_gpgme\_decode\_c\_string): Add missing break  
statement.  
  
\* recipient.c (gpgme\_recipients\_add\_name\_with\_validity): Add one  
to buffer to allocate.

2003-05-19 Marcus Brinkmann <marcus@g10code.de>

\* verify.c (parse\_new\_sig): Fix ERRSIG case.  
Submitted by Benjamin Lee <benjaminlee@users.sf.net>.

2003-05-18 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h: The following types are renamed. The old name is kept  
as a deprecated typedef.  
(GpgmeCtx): Rename to gpgme\_ctx\_t.  
(GpgmeData): Rename to gpgme\_data\_t.  
(GpgmeRecipients): Rename to gpgme\_recipients\_t.  
(GpgmeError): Rename to gpgme\_error\_t.  
(GpgmeDataEncoding): Rename to gpgme\_data\_encoding\_t.  
(GpgmePubKeyAlgo): Rename to gpgme\_pubkey\_algo\_t.  
(GpgmeHashAlgo): Rename to gpgme\_hash\_algo\_t.  
(GpgmeSigStat): Rename to gpgme\_sig\_stat\_t.  
(GpgmeSigMode): Rename to gpgme\_sig\_mode\_t.  
(GpgmeAttr): Rename to gpgme\_attr\_t.  
(GpgmeValidity): Rename to gpgme\_validity\_t.  
(GpgmeProtocol):  
Rename to gpgme\_protocol\_t.  
(GpgmeStatusCode): Rename to gpgme\_status\_code\_t.

(GpgmeEngineInfo): Rename to gpgme\_engine\_info\_t.  
(GpgmeSubkey): Rename to gpgme\_subkey\_t.  
(GpgmeKeySig): Rename to gpgme\_keysig\_t.  
(GpgmeUserID): Rename to gpgme\_user\_id\_t.  
(GpgmePassphraseCb): Rename to gpgme\_passphrase\_cb\_t.  
(GpgmeProgressCb): Rename to gpgme\_progress\_cb\_t.  
(GpgmeEditCb): Rename to gpgme\_edit\_cb\_t.  
(GpgmeIOCb): Rename to gpgme\_io\_cb\_t.  
(GpgmeRegisterIOCb): Rename to gpgme\_register\_io\_cb\_t.  
(GpgmeRemoveIOCb): Rename to gpgme\_remove\_io\_cb\_t.  
(GpgmeEventIO): Rename to gpgme\_event\_io\_t.  
(GpgmeEventIOCb): Rename to gpgme\_event\_io\_cb\_t.  
(GpgmeIOCbs): Rename to gpgme\_io\_cbs.  
(gpgme\_io\_cbs\_t): New type.  
(GpgmeDataReadCb): Rename to gpgme\_data\_read\_cb\_t.  
(GpgmeDataWriteCb): Rename to gpgme\_data\_write\_cb\_t.  
(GpgmeDataSeekCb): Rename to gpgme\_data\_seek\_cb\_t.  
(GpgmeDataReleaseCb): Rename to gpgme\_data\_release\_cb\_t.  
(GpgmeDataCbs): Rename to gpgme\_data\_cbs.  
(gpgme\_data\_cbs\_t):  
New type.  
(GpgmeInvalidUserID): Rename to gpgme\_invalid\_user\_id\_t.  
(GpgmeEncryptResult): Rename to gpgme\_encrypt\_result\_t.  
(GpgmeDecryptResult): Rename to gpgme\_decrypt\_result\_t.  
(GpgmeNewSignature): Rename to gpgme\_new\_signature\_t.  
(GpgmeSignResult): Rename to gpgme\_sign\_result\_t.  
(GpgmeSigNotation): Rename to gpgme\_sig\_notation\_t.  
(GpgmeSignature): Rename to gpgme\_signature\_t.  
(GpgmeVerifyResult): Rename to gpgme\_verify\_result\_t.  
(GpgmeImportStatus): Rename to gpgme\_import\_status\_t.  
(GpgmeImportResult): Rename to gpgme\_import\_result\_t.  
(GpgmeGenKeyResult): Rename to gpgme\_genkey\_result\_t.  
(GpgmeKeyListResult): Rename to gpgme\_keylist\_result\_t.  
(GpgmeTrustItem): Rename to gpgme\_trust\_item\_t.  
\* gpgme.h (gpgme\_deprecated\_error\_t): New type, swallowing macros  
GPGME\_No\_Recipients, GPGME\_Invalid\_Recipient and  
GPGME\_No\_Passphrase.  
\* data.h (struct gpgme\_data\_s): Rename to struct gpgme\_data.  
\* context.h (struct gpgme\_context\_s): Rename to struct  
gpgme\_context.  
(struct  
gpgme\_recipients\_s): Rename to gpgme\_recipients.

2003-05-18 Marcus Brinkmann <marcus@g10code.de>

\* keylist.c (finish\_key): Clear OPD->tmp\_uid.

2003-05-18 Marcus Brinkmann <marcus@g10code.de>

\* verify.c (\_gpgme\_verify\_status\_handler): Return GPGME\_No\_Data for NODATA status without signatures.

2003-05-05 Marcus Brinkmann <marcus@g10code.de>

\* key.c (\_gpgme\_key\_append\_name): Use decoded string to parse user id.  
(\_gpgme\_key\_add\_sig): Likewise.

2003-05-04 Marcus Brinkmann <marcus@g10code.de>

\* context.h (struct gpgme\_context\_s): Remove member op\_info.

\* key.c (\_gpgme\_key\_add\_sig): Initialize SIG->uid.

\* gpgme.h (GpgmeError): Add deprecated values for GPGME\_Invalid\_Type and GPGME\_Invalid\_Mode.

2003-04-30 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h (gpgme\_get\_op\_info): Remove prototype.

\* ops.h (\_gpgme\_set\_op\_info,  
\_gpgme\_data\_release\_and\_return\_string, \_gpgme\_data\_get\_as\_string,  
\_gpgme\_data\_append, \_gpgme\_data\_append\_string,  
\_gpgme\_data\_append\_string\_for\_xml,  
\_gpgme\_data\_append\_for\_xml,  
\_gpgme\_data\_append\_percentstring\_for\_xml): Likewise.  
(\_gpgme\_progress\_status\_handler): Change first arg to void \*.

\* progress.c (\_gpgme\_progress\_status\_handler): Likewise.

\* conversion.c: Do not include <string.h>, <errno.h>, <ctype.h>,  
and <sys/types.h>, but <string.h>.

(\_gpgme\_data\_append): Remove function.

(\_gpgme\_data\_append\_string): Likewise.

(\_gpgme\_data\_append\_for\_xml): Likewise.

(\_gpgme\_data\_append\_string\_for\_xml): Likewise.

(\_gpgme\_data\_append\_percentstring\_for\_xml): Likewise.

\* data-mem.c (\_gpgme\_data\_get\_as\_string): Likewise.

(\_gpgme\_data\_release\_and\_return\_string): Likewise.

\* gpgme.c (gpgme\_get\_op\_info): Likewise.

(\_gpgme\_set\_op\_info): Likewise.

\* gpgme.h (struct \_gpgme\_key): New structure.

(GpgmeKey): Define using \_gpgme\_key.

(struct \_gpgme\_subkey): New structure.

(GpgmeSubKey): New type.

(struct \_gpgme\_key\_sig): New structure.

(GpgmeKeySig): New type.

(struct \_gpgme\_user\_id): New structure.

(GpgmeUserID):  
New type.  
(struct \_gpgme\_op\_keylist\_result): New structure.  
(GpgmeKeyListResult): New type.  
(gpgme\_op\_keylist\_result): New function.  
(gpgme\_key\_get\_as\_xml): Remove prototype.  
\* context.h (struct gpgme\_context\_s): Remove members tmp\_key,  
tmp\_uid, key\_cond and key\_queue.  
(struct key\_queue\_item\_s): Remove structure.  
(struct user\_id\_s): Remove structure.  
(struct gpgme\_recipients\_s): Replace with simple  
GpgmeUserID list.  
\* gpgme.c (gpgme\_release): Do not release CTX->tmp\_key.  
\* ops.h (\_gpgme\_key\_add\_subkey, \_gpgme\_key\_append\_name,  
\_gpgme\_key\_add\_sig, \_gpgme\_trust\_item\_new): New prototypes.  
\* runpg.c (command\_cb): Return GpgmeError instead int.  
New variable ERR. Use it to hold return value of cmd handler.  
(gpg\_delete): Access fingerprint of key directly.  
(append\_args\_from\_signers): Likewise.  
(gpg\_edit): Likewise.  
(append\_args\_from\_recipients): Use GpgmeUserID for recipient list.  
\* engine-gpgsm.c: Do not include "key.h".  
(gpgsm\_delete): Access fingerprint of key  
directly.  
(gpgsm\_sign): Likewise.  
(set\_recipients): Use GpgmeUserID for recipients. Invert invalid  
user ID flag.  
\* key.h: File removed.  
\* key.c: Completely reworked to use exposed GpgmeKey data types.  
\* keylist.c: Likewise.  
\* recipient.c: Completely reworked to use GpgmeUserID.

2003-04-29 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h (gpgme\_get\_key): Remove force\_update argument.  
\* key-cache.c: File removed.  
\* Makefile.am (libgpgme\_la\_SOURCES): Remove key-cache.c.  
\* ops.h (\_gpgme\_key\_cache\_add, \_gpgme\_key\_cache\_get): Remove  
prototypes.  
\* keylist.c (\_gpgme\_op\_keylist\_event\_cb): Don't call  
\_gpgme\_key\_cache\_add.  
(gpgme\_get\_key): New function.  
\* verify.c (gpgme\_get\_sig\_key): Remove last argument to  
gpgme\_get\_key invocation.  
  
\* gpgme.h (struct \_gpgme\_trust\_item): New structure.  
(GpgmeTrustItem): New type.  
(gpgme\_trust\_item\_ref, gpgme\_trust\_item\_unref): New prototypes.

\* context.h (struct trust\_queue\_item\_s): Remove structure.  
 (struct gpgme\_context\_s): Remove trust\_queue member.  
 \* Makefile.am (libgpgme\_la\_SOURCES): Add trust-item.c.  
 \* trust-item.c: New file.  
 \* trustlist.c: Do not include <stdio.h> or <time.h>, but "gpgme.h".  
 (struct trust\_queue\_item\_s): Change to new type op\_data\_t.  
 (trust\_status\_handler): Change first argument to void \*.  
 (trust\_colon\_handler): Likewise.  
 (\_gpgme\_op\_trustlist\_event\_cb): Use op\_data\_t type.  
 (gpgme\_op\_trustlist\_start): Use op\_data\_t and rework error handling.  
 (gpgme\_op\_trustlist\_next): Use op\_data\_t.  
 (gpgme\_trust\_item\_release): Remove function.  
 (gpgme\_trust\_item\_get\_string\_attr): Likewise.  
 (gpgme\_trust\_item\_get\_int\_attr): Likewise.

\* verify.c (calc\_sig\_summary): Do not set GPGME\_SIGSUM\_SYS\_ERROR for bad signatures.

2003-04-28 Marcus Brinkmann <marcus@g10code.de>

\* context.h: Remove OPDATA\_VERIFY\_COLLECTING.  
 (struct gpgme\_context\_s): Remove member notation.  
 \* gpgme.h: Make enum for GPGME\_KEYLIST\_MODE\_\* values.

\* gpgme.h (struct \_gpgme\_sig\_notation): New structure.  
 (GpgmeSigNotation): New type.  
 (struct \_gpgme\_signature): New structure.  
 (GpgmeSignature): New type.  
 (struct \_gpgme\_op\_verify\_result): New structure.  
 (GpgmeVerifyResult): New type.  
 (gpgme\_op\_verify\_result): New prototype.  
 (gpgme\_get\_notation): Remove prototype.  
 \* ops.h (\_gpgme\_op\_verify\_init\_result): New prototype.  
 (\_gpgme\_verify\_status\_handler): Change first argument to void \*.  
 \* util.h (\_gpgme\_decode\_percent\_string, \_gpgme\_map\_gnupg\_error):  
 New prototypes.  
 \* conversion.c (\_gpgme\_decode\_percent\_string): New function.  
 (gnupg\_errors): New static global.  
 (\_gpgme\_map\_gnupg\_error): New function.  
 \* gpgme.c (gpgme\_release): Don't release CTX->notation.  
 (gpgme\_get\_notation): Remove function.  
 \* decrypt-verify.c (\_gpgme\_op\_decrypt\_verify\_start): Call  
 \_gpgme\_op\_verify\_init\_result.  
 \* verify.c: Do not include <stdio.h>, <assert.h> and "key.h", but

do include "gpgme.h".  
(struct verify\_result): Replace with ...  
(op\_data\_t): ... this type.  
(release\_verify\_result): Remove function.  
(release\_op\_data):  
New function.  
(is\_token): Remove function.  
(skip\_token): Remove function.  
(copy\_token): Remove function.  
(gpgme\_op\_verify\_result): New function.  
(calc\_sig\_summary): Rewritten.  
(finish\_sig): Remove function.  
(parse\_new\_sig): New function.  
(parse\_valid\_sig): New function.  
(parse\_notation): New function.  
(parse\_trust): New function.  
(parse\_error): New function.  
(\_gpgme\_verify\_status\_handler): Rewritten. Change first argument to void \*.  
(\_gpgme\_op\_verify\_start): Rework error handling. Call \_gpgme\_op\_verify\_init\_result.  
(gpgme\_op\_verify): Do not release or clear CTX->notation.  
(gpgme\_get\_sig\_status): Rewritten.  
(gpgme\_get\_sig\_string\_attr): Likewise.  
(gpgme\_get\_sig\_ulong\_attr): Likewise.  
(gpgme\_get\_sig\_key): Likewise.

\* gpgme.h (struct \_gpgme\_op\_decrypt\_result): New structure.  
(GpgmeDecryptResult): New type.  
(gpgme\_op\_decrypt\_result): New prototype.  
\* ops.h (\_gpgme\_op\_decrypt\_init\_result): New prototype.  
(\_gpgme\_decrypt\_status\_handler): Fix prototype.  
(\_gpgme\_decrypt\_start):  
Remove prototype.  
\* decrypt-verify.c: Do not include <stdio.h>, <stdlib.h>, <string.h> and <assert.h>, "util.h" and "context.h", but "gpgme.h".  
(decrypt\_verify\_status\_handler): Change first argument to void \*, and rework error handling.  
(\_gpgme\_op\_decrypt\_verify\_start): New function.  
(gpgme\_op\_decrypt\_verify\_start): Rewrite using \_gpgme\_op\_decrypt\_verify\_start.  
(gpgme\_op\_decrypt\_verify): Likewise.  
\* decrypt.c: Include <string.h>, "gpgme.h" and "util.h".  
(struct decrypt\_result): Change to typedef op\_data\_t, rewritten.  
(is\_token): Remove function.  
(release\_op\_data): New function.  
(skip\_token): Remove function.

(gpgme\_op\_decrypt\_result): New function.  
(\_gpgme\_decrypt\_status\_handler): Change first argument to void \*.  
Rework error handling.  
(\_gpgme\_decrypt\_start): Rename to ...  
(decrypt\_start): ... this. Call \_gpgme\_op\_decrypt\_init\_result.  
(\_gpgme\_op\_decrypt\_init\_result): New function.  
(gpgme\_op\_decrypt\_start): Use decrypt\_start.  
(gpgme\_op\_decrypt): Likewise.

2003-04-27

Marcus Brinkmann <marcus@g10code.de>

\* encrypt-sign.c: Do not include <stddef.h>, <stdio.h>, <stdlib.h>, <string.h>, <assert.h> and "util.h", but "gpgme.h".  
(\_gpgme\_op\_encrypt\_sign\_start): Rename to ...  
(encrypt\_sign\_start): ... this.  
(gpgme\_op\_encrypt\_sign\_start): Use encrypt\_sign\_start, not \_gpgme\_op\_encrypt\_sign\_start.  
(gpgme\_op\_encrypt\_sign): Likewise.

\* gpgme.h (GpgmeEncryptResult): New data type.  
(gpgme\_op\_encrypt\_result): New prototype.  
\* ops.h (\_gpgme\_op\_encrypt\_init\_result): New prototype.  
(\_gpgme\_op\_encrypt\_status\_handler): Fix prototype.  
\* encrypt-sign.c (\_gpgme\_op\_encrypt\_sign\_start): Call \_gpgme\_op\_encrypt\_init\_result.  
\* encrypt.c: Do not include <stdio.h>, <assert.h>, "util.h" and "wait.h". Include <errno.h> and "gpgme.h".  
(SKIP\_TOKEN\_OR\_RETURN): Remove macro.  
(struct encrypt\_result): Rename to ...  
(op\_data\_t): ... new data type. Rewrite for user result data.  
(append\_xml\_encinfo): Remove function.  
(release\_op\_data): New function.  
(gpgme\_op\_encrypt\_result):  
New function.  
(\_gpgme\_op\_encrypt\_status\_handler): Change first argument to void \*.  
Rewrite result parsing.  
(\_gpgme\_op\_encrypt\_sym\_status\_handler): Change first argument to void \*.  
(\_gpgme\_op\_encrypt\_init\_result): New function.  
(\_gpgme\_op\_encrypt\_start): Rename to ...  
(encrypt\_start): ... this.  
(gpgme\_op\_encrypt\_start): Use encrypt\_start, not gpgme\_op\_encrypt\_start.  
(gpgme\_op\_encrypt): Likewise.

\* gpgme.h (GpgmePubKeyAlgo, GpgmeHashAlgo, GpgmeInvalidUserID, GpgmeNewSignature, GpgmeSignResult): New data types.

(gpgme\_op\_sign\_result, gpgme\_pubkey\_algo\_name, gpgme\_hash\_algo\_name): New prototypes.  
\* gpgme.c (gpgme\_pubkey\_algo\_name): New function.  
(gpgme\_hash\_algo\_name): Likewise.  
\* ops.h (\_gpgme\_parse\_inv\_userid, \_gpgme\_op\_sign\_init\_result): New prototype.  
(\_gpgme\_op\_sign\_status\_handler): Fix prototype.  
\* op-support.c: Include <errno.h> and <string.h>.  
(\_gpgme\_parse\_inv\_userid): New function.  
\* sign.c: Include <errno.h> and "gpgme.h", but not <stdio.h>, <assert.h> and "util.h".  
(SKIP\_TOKEN\_OR\_RETURN): Remove macro.  
(struct sign\_result): Change to op\_data\_t type and rework it.  
(release\_sign\_result): Rename to ...  
(release\_op\_data): ... this and rewrite it.  
(append\_xml\_info): Remove function.  
(gpgme\_op\_sign\_result): New function.  
(parse\_sig\_created): New function.  
(\_gpgme\_sign\_status\_handler): Change first argument to void \*.  
Rewrite the function to use the new result structure and functions.  
(\_gpgme\_op\_sign\_init\_result): New function.  
(\_gpgme\_op\_sign\_start): Rename to ...  
(sign\_start): ... this. Call \_gpgme\_op\_sign\_init\_result.  
(gpgme\_op\_sign\_start): Use sign\_start instead \_gpgme\_op\_sign\_start.  
(gpgme\_op\_sign): Likewise.  
\* encrypt-sign.c (\_gpgme\_op\_encrypt\_sign\_start): Call \_gpgme\_op\_sign\_init\_result.  
  
\* delete.c: Include <errno.h> and "gpgme.h", but not "util.h" or "key.h".  
(enum delete\_problem): Move into function delete\_status\_handler.  
(delete\_status\_handler): Change first argument to void \*. Parse delete problem with strtol instead atoi. Return better error values.  
(\_gpgme\_op\_delete\_start): Rename to ...  
(delete\_start): ... this. Rework error handling.  
(gpgme\_op\_delete\_start): Use delete\_start instead \_gpgme\_op\_delete\_start.  
(gpgme\_op\_delete): Likewise.  
\* gpgme.h (GpgmeDataType): Removed.

2003-04-25 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h: Change GPGME\_IMPORT\_PRIVATE to GPGME\_IMPORT\_SECRET.  
\* import.c (parse\_import\_res): Parse unchanged field.

\* gpgme.h: New enum for GPGME\_IMPORT\_NEW, GPGME\_IMPORT\_UID, GPGME\_IMPORT\_SIG, GPGME\_IMPORT\_SUBKEY, GPGME\_IMPORT\_PRIVATE. (GpgmeError): GPGME\_Unknown\_Reason, GPGME\_Not\_Found, GPGME\_Ambiguous\_Specification, GPGME\_Wrong\_Key\_Usage, GPGME\_Key\_Revoked, GPGME\_Key\_Expired, GPGME\_No\_CRL\_Known, GPGME\_CRL\_Too\_Old, GPGME\_Policy\_Mismatch, GPGME\_No\_Secret\_Key, GPGME\_Key\_Not\_Trusted, GPGME\_Issuer\_Missing, GPGME\_Chain\_Too\_Long, GPGME\_Unsupported\_Algorithm, GPGME\_Sig\_Expired, GPGME\_Bad\_Signature, GPGME\_No\_Public\_Key added as new error codes.

(struct \_gpgme\_import\_status): New structure.

(GpgmeImportStatus): New type.

(struct \_gpgme\_op\_import\_result): New structure.

(GpgmeImportResult): New type.

(gpgme\_op\_import\_result): New function.

\* import.c: Include <errno.h> and "gpgme.h", but not "util.h".

(struct import\_result): Change to type op\_data\_t.

(release\_import\_result): Rename to ...

(release\_op\_data): ... this.

(append\_xml\_impinfo): Function removed.

(gpgme\_op\_import\_result): New function.

(parse\_import): New function.

(parse\_import\_res): Likewise.

(import\_status\_handler): Change first argument to void \*. Rewrite to use new functions.

(\_gpgme\_op\_import\_start): Rework error handling.

\* edit.c: Do not include <assert.h>, "util.h", but "gpgme.h".

(edit\_resut): Change to typedef for op\_data\_t.

(edit\_status\_handler): Change first argument to void \*.

Rework error handling.

(command\_handler): Rework error handling.

(\_gpgme\_op\_edit\_start): Rename to ...

(edit\_start): ... this. Rework

error handling.

(gpgme\_op\_edit\_start): Rewrite using edit\_start.

(gpgme\_op\_edit): Likewise.

\* ops.h (\_gpgme\_passphrase\_start): Remove prototype.

\* passphrase.c: Do not include <assert.h>, "util.h" or "debug.h", but "gpgme.h".

(struct passphrase\_result): Change to typedef for op\_data\_t.

(release\_passphrase\_result): Rename to release\_op\_data.

(\_gpgme\_passphrase\_status\_handler): Change first argument to void \*.

Use new op\_data\_t type.

(\_gpgme\_passphrase\_command\_handler): Use new op\_data\_t type.

(\_gpgme\_passphrase\_start): Remove function.

\* decrypt.c (\_gpgme\_decrypt\_start): Rewrite error handling. Do

not call `_gpgme_passphrase_start`, but install command handler.

- \* `encrypt.c` (`_gpgme_op_encrypt_start`): Likewise.
- \* `encrypt-sign.c` (`_gpgme_op_encrypt_sign_start`): Likewise.
- \* `sign.c` (`_gpgme_op_sign_start`): Likewise.

  

- \* `context.h` (struct `gpgme_context_s`): Remove member `initialized`, `use_cms` and `help_data_1`. Add member `protocol`. Make `use_armor` and `use_textmode` bit flags.
- Make `keylist_mode`, `include_certs`, `signers_len` and `signers_size` unsigned.
- \* `gpgme.c` (`gpgme_new`): Initialize `CTX->protocol`.
- (`gpgme_set_protocol`): Do not check `CTX`. Use `CTX->protocol`.
- (`gpgme_get_protocol`): Likewise.
- (`gpgme_release`): Do not release `CTX->help_data_1`.
- \* `op-support.c` (`_gpgme_op_reset`): Use `CTX->protocol`.

  

- \* `wait-private.c` (`_gpgme_wait_private_event_cb`): Remove variable `CTX`.

  

- \* `data.c`: Do not include `<assert.h>`, but `"gpgme.h"`.
- (`_gpgme_data_inbound_handler`): Expand `_gpgme_data_append`, because it will go. Do not assert `DH`.
- (`_gpgme_data_outbound_handler`): Do not assert `DH`.

  

- \* `export.c`: Do not include `<stdlib.h>`, `"debug.h"` and `"util.h"`, but `"gpgme.h"`.
- (`export_status_handler`): Change type of first argument to `void *`.
- (`_gpgme_op_export_start`): Rename to ...
- (`export_start`): ... this. Rework error handling.
- (`gpgme_op_export_start`): Rewritten to use `export_start` instead `_gpgme_op_export_start`.
- (`gpgme_op_export`): Likewise.

  

- \* `gpgme.h` (`GpgmeError`): Add `GPGME_Busy`, `GPGME_No_Request`.
- (`GPGME_No_Recipients`, `GPGME_Invalid_Recipient`, `GPGME_No_Passphrase`): New macros.

  

- \* `key.c` (`gpgme_key_get_string_attr`): Fix validity attribute.

2003-04-24 Marcus Brinkmann <marcus@g10code.de>

- \* `gpgme.h` (struct `_gpgme_op_genkey_result`): New structure.
- (`GpgmeGenKeyResult`): New type.
- (`gpgme_op_genkey`): Drop last argument.
- (`gpgme_op_genkey_result`): New function.
- \* `genkey.c`: Do not include `"util.h"`, but `"gpgme.h"`.
- (struct `genkey_result`): Replace with ...
- (`op_data_t`): ... this new type.

(release\_genkey\_result): Replace with ...

(release\_op\_data): ... this new function.

(gpgme\_op\_genkey\_result): New function.

(genkey\_status\_handler): Rewritten using new op\_data\_t type.

(get\_key\_parameter): New function.

(\_gpgme\_op\_genkey\_start): Renamed to

(genkey\_start): ... this and rewritten.

(gpgme\_op\_genkey\_start): Use genkey\_start instead  
\_gpgme\_op\_genkey\_start.

(gpgme\_op\_genkey): Rewritten. Remove FPR argument.

\* context.h (struct gpgme\_context\_s): Remove member  
verbosity.

\* gpgme.c (gpgme\_new): Do not set member verbosity.

\* engine.h (\_gpgme\_engine\_set\_verbosity): Remove prototype.

\* engine.c (\_gpgme\_engine\_set\_verbosity): Remove function.

\* engine-backend.h (struct engine\_ops): Remove set\_verbosity.

\* engine-gpgsm.c (\_gpgme\_engine\_ops\_gpgsm): Remove set\_verbosity member.

\* runpgg.c (\_gpgme\_engine\_ops\_gpg): Likewise.

(gpg\_set\_verbosity): Remove function.

\* decrypt.c (\_gpgme\_decrypt\_start): Don't call  
\_gpgme\_engine\_set\_verbosity.

\* delete.c (\_gpgme\_op\_delete\_start): Likewise.

\* edit.c (\_gpgme\_op\_edit\_start): Likewise.

\* encrypt.c (\_gpgme\_op\_encrypt\_start): Likewise.

\* encrypt-sign.c (\_gpgme\_op\_encrypt\_sign\_start): Likewise.

\* export.c (\_gpgme\_op\_export\_start): Likewise.

\* genkey.c (\_gpgme\_op\_genkey\_start): Likewise.

\* import.c (\_gpgme\_op\_import\_start): Likewise.

\* keylist.c (gpgme\_op\_keylist\_start): Likewise.

(gpgme\_op\_keylist\_ext\_start): Likewise.

\* sign.c (\_gpgme\_op\_sign\_start): Likewise.

\* verify.c (\_gpgme\_op\_verify\_start):  
Likewise.

\* Makefile.am (libgpgme\_la\_SOURCES): Add key-cache.c.

\* key.c (key\_cache\_initialized, key\_cache\_size,  
key\_cache\_max\_chain\_length, ): Removed.

(struct key\_cache\_item\_s, key\_cache\_lock, key\_cache,  
key\_cache\_unused\_items, hash\_key, \_gpgme\_key\_cache\_add,  
\_gpgme\_key\_cache\_get, gpgme\_get\_key): Moved to ...

\* key-cache.c: ... here. New file.

\* key.h (\_gpgme\_key\_cache\_init): Remove prototypes.

(\_gpgme\_key\_cache\_add, \_gpgme\_key\_cache\_get): Move to ...

\* ops.h: ... here.

\* version.c: Do not include "key.h".

(do\_subsystem\_inits): Do not call \_gpgme\_key\_cache\_init.

- \* mkstatus: Strip trailing comma.
- \* gpgme.h (GpgmeStatus): Pretty print.
  
- \* gpgme.h (GpgmeError): Rename GPGME\_No\_Passphrase to GPGME\_Bad\_Passphrase.
- \* passphrase.c (\_gpgme\_passphrase\_status\_handler): Use GPGME\_Bad\_Passphrase instead GPGME\_No\_Passphrase.
  
- \* gpgme.h (GpgmeError): Rename GPGME\_No\_Recipients to GPGME\_No\_UserID and GPGME\_Invalid\_Recipient to GPGME\_Invalid\_UserID.
- \* encrypt.c (\_gpgme\_encrypt\_status\_handler): Use GPGME\_No\_UserID instead GPGME\_No\_Recipients and GPGME\_Invalid\_UserID instead GPGME\_Invalid\_Recipient.
- (\_gpgme\_op\_encrypt\_start): Likewise.
  
- \* gpgme.h (GpgmeError): Remove GPGME\_Busy and GPGME\_No\_Request.
- \* wait-user.c (\_gpgme\_wait\_user\_event\_cb): Don't clear CTX->pending.
- \* wait-private.c (\_gpgme\_wait\_private\_event\_cb): Likewise.
- \* wait-global.c (gpgme\_wait): Likewise.
- \* verify.c (\_gpgme\_op\_verify\_start): Likewise.
- (gpgme\_get\_sig\_status): Don't check pending flag.
- (gpgme\_get\_sig\_string\_attr): Likewise.
- (gpgme\_get\_sig\_ulong\_attr): Likewise.
- (gpgme\_get\_sig\_key): Likewise.
- \* op-support.c (\_gpgme\_op\_reset): Likewise.
- \* trustlist.c (gpgme\_op\_trustlist\_start): Don't clear pending flag.
- (gpgme\_op\_trustlist\_next): Don't check or clear pending flag.
- (gpgme\_op\_trustlist\_end): Likewise.
- \* sign.c (\_gpgme\_op\_sign\_start): Likewise.
- \* context.h (struct gpgme\_context\_s): Remove member PENDING.
- \* decrypt.c (\_gpgme\_decrypt\_start): Likewise.
- \* delete.c (\_gpgme\_op\_delete\_start): Likewise.
- \* edit.c (\_gpgme\_op\_edit\_start): Likewise.
- \* encrypt.c (\_gpgme\_op\_encrypt\_start): Likewise.
- \* encrypt-sign.c (\_gpgme\_op\_encrypt\_sign\_start): Likewise.
- \* export.c (\_gpgme\_op\_export\_start): Likewise.
- \* genkey.c (\_gpgme\_op\_genkey\_start): Likewise.
- \* import.c (\_gpgme\_op\_import\_start): Likewise.
- \* key.c (gpgme\_get\_key): Likewise.
- \* keylist.c (gpgme\_op\_keylist\_start): Likewise.
- (gpgme\_op\_keylist\_ext\_start): Likewise.
- (gpgme\_op\_keylist\_next): Likewise.
- (gpgme\_op\_keylist\_end): Likewise.
- \* data-compat.c (gpgme\_error\_to\_errno): Don't convert EBUSY.

2003-02-06 Marcus Brinkmann <marcus@g10code.de>

- \* gpgme.h (GpgmePassphraseCb): Change type to return GpgmeError, and add argument for returning the result string.
- (gpgme\_cancel): Remove prototype.
- \* gpgme.c (gpgme\_cancel): Remove function.
- \* context.h (struct gpgme\_context\_s): Remove member cancel.
- \* passphrase.c (\_gpgme\_passphrase\_command\_handler): Call the passphrase callback in the new way.

2003-01-30

Marcus Brinkmann <marcus@g10code.de>

- \* edit.c (\_gpgme\_edit\_status\_handler): Call the progress status handler.

2003-02-05 Marcus Brinkmann <marcus@g10code.de>

- \* wait-user.c (\_gpgme\_wait\_user\_remove\_io\_cb): Move check for no I/O handlers left to ...
- (\_gpgme\_user\_io\_cb\_handler): ... here.

2003-02-04 Marcus Brinkmann <marcus@g10code.de>

- \* trustlist.c (trustlist\_colon\_handler): Release ITEM if name could not be allocated.
- (gpgme\_trust\_item\_release): Only release name if it is allocated.
- Reported by Marc Mutz <Marc.Mutz@uni-bielefeld.de>.

2003-02-04 Marcus Brinkmann <marcus@g10code.de>

- \* runpgg.c (read\_status): If the status handler returns an error, return it.
- (status\_handler): If read\_status fails, just return the error.

2003-02-01 Marcus Brinkmann <marcus@g10code.de>

- \* engine-gpgsm.c (start): Handle all errors, not only most of them.
- (xtoi\_1, xtoi\_2): Remove macro.
- (status\_handler): Replace use of xtoi\_2 with \_gpgme\_hextobyte.

2003-02-01 Marcus

Brinkmann <marcus@g10code.de>

- \* engine-gpgsm.c (map\_assuan\_error): Replace ASSUAN\_Bad\_Certificate\_Path with ASSUAN\_Bad\_Certificate\_Chain.
- (gpgsm\_new): Use assuan\_pipe\_connect instead assuan\_pipe\_connect2.

\* util.h (DIMof): Remove macro.

\* ops.h (\_gpgme\_op\_event\_cb, \_gpgme\_op\_event\_cb\_user, \_gpgme\_data\_unread): Prototypes removed.

2003-01-30 Marcus Brinkmann <marcus@g10code.de>

\* types.h: File removed.

\* Makefile.am (libgpgme\_la\_SOURCES): Remove types.h.

\* io.h (struct spawn\_fd\_item\_s): Do not include "types.h".

\* key.h: Likewise.

\* context.h: Likewise.

\* engine-gpgsm.h: Likewise.

\* engine.h: Include "gpgme.h" instead "types.h". Add prototypes for EngineStatusHandler, EngineColonLineHandler and EngineCommandHandler.

(\_gpgme\_engine\_set\_status\_handler): Change parameter type from GpgmeStatusHandler to EngineStatusHandler.

(\_gpgme\_engine\_set\_command\_handler): Change parameter type from GpgmeCommandHandler to EngineCommandHandler.

(\_gpgme\_engine\_set\_colon\_line\_handler):

Change parameter type from

GpgmeColonLineHandler to EngineColonLineHandler.

\* engine-backend.h: Include "engine.h" instead "types.h".

(struct engine\_ops): Change Gpgme\*Handler parameters in members set\_command\_handler, set\_colon\_line\_handler and set\_status\_handler to Engine\*Handler.

\* engine.c (\_gpgme\_engine\_set\_status\_handler): Change parameter type from GpgmeStatusHandler to EngineStatusHandler.

(\_gpgme\_engine\_set\_command\_handler): Change parameter type from GpgmeCommandHandler to EngineCommandHandler.

(\_gpgme\_engine\_set\_colon\_line\_handler): Change parameter type from GpgmeColonLineHandler to EngineColonLineHandler.

\* runpg.c (struct gpg\_object\_s): Change type of member status.fnc from GpgmeStatusHandler to EngineStatusHandler. Change type of member colon.fnc from GpgmeColonLineHandler to EngineColonLineHandler. Change type of member cmd.fnc from GpgmeCommandHandler to EngineCommandHandler.

\* engine-gpgsm.c (struct gpgsm\_object\_s): Likewise.

\* runpg.c

(gpg\_set\_status\_handler): Change parameter type from GpgmeStatusHandler to EngineStatusHandler.

\* engine-gpgsm.c (gpgsm\_set\_status\_handler): Likewise.

(assuan\_simple\_command): Likewise.

\* runpg.c (gpg\_set\_colon\_line\_handler): Change parameter type from GpgmeColonLineHandler to EngineColonLineHandler.

\* engine-gpgsm.c (gpgsm\_set\_colon\_line\_handler): Likewise.

\* `runpgg.c` (`gpg_set_command_handler`): Change parameter type from `GpgmeCommandHandler` to `EngineCommandHandler`.

\* `engine-gpgsm.c` (`status_handler`): Do not close status fd at end of function.

\* `ops.h` (`_gpgme_op_data_lookup`): Add prototype.

\* `op-support.c`: Include `<stdlib.h>`.

(`_gpgme_op_data_lookup`): New function.

\* `decrypt.c` (`_gpgme_release_decrypt_result`): Function removed.

(`struct decrypt_result_s`): Rename to ...

(`struct decrypt_resul`): ... this.

(`DecryptResult`): New type.

(`_gpgme_decrypt_status_handler`): Don't use

`test_and_allocate_result`, but use `_gpgme_op_data_lookup` to retrieve result data object.

\* `sign.c`

(`_gpgme_release_sign_result`): Function removed.

(`release_sign_result`): New function.

(`struct sign_result_s`): Rename to ...

(`struct sign_result`): ... this.

(`SignResult`): New type.

(`_gpgme_sign_status_handler`): Don't use

`test_and_allocate_result`, but use `_gpgme_op_data_lookup` to retrieve result data object.

\* `encrypt.c` (`struct encrypt_result_s`): Rename to ...

(`struct encrypt_result`): ... this.

(`_gpgme_release_encrypt_result`): Function removed.

(`release_encrypt_result`): New function.

(`_gpgme_encrypt_status_handler`): Don't use

`test_and_allocate_result`, but use `_gpgme_op_data_lookup` to retrieve result data object.

\* `verify.c` (`struct verify_result_s`): Rename to ...

(`struct verify_result`): ... this. Remove member `next`.

(`VerifyResult`): New type.

(`_gpgme_release_verify_result`): Function removed.

(`release_verify_result`): New function.

(`finish_sig`): Change first argument to type `VerifyResult`. Diddle the type of the `op_data` structure.

(`add_notation`): Change first argument to type `VerifyResult`.

(`_gpgme_verify_status_handler`): Don't use

`test_and_allocate_result`, but use `_gpgme_op_data_lookup` to retrieve result data object.

\* `passphrase.c` (`struct passphrase_result_s`): Rename to ...

(`struct passphrase_result`): ... this. Remove member `next`.

(`PassphraseResult`): New type.

(`_gpgme_release_passphrase_result`): Function removed.

(release\_passphrase\_result): New function.  
(\_gpgme\_passphrase\_status\_handler): Don't use test\_and\_allocate\_result, but use \_gpgme\_op\_data\_lookup to retrieve result data object.  
(\_gpgme\_passphrase\_command\_handler): Likewise.  
\* keylist.c (struct keylist\_result\_s): Rename to ...  
(struct keylist\_result): ... this. Remove member next.  
(KeylistResult): New type.  
(\_gpgme\_release\_keylist\_result): Function removed.  
(release\_keylist\_result): New function.  
(keylist\_status\_handler): Don't use test\_and\_allocate\_result, but use \_gpgme\_op\_data\_lookup to retrieve result data object.  
\* edit.c (struct edit\_result\_s): Rename to ...  
(struct edit\_result): ... this. Remove member next.  
(EditResult): New type.  
(\_gpgme\_release\_edit\_result): Function removed.  
(release\_edit\_result): New function.  
(edit\_status\_handler): Don't use test\_and\_allocate\_result, but use \_gpgme\_op\_data\_lookup to retrieve result data object.  
(command\_handler): Likewise.  
\* types.h (DecryptResult, SignResult, EncryptResult, PassphraseResult, ImportResult, DeleteResult, GenKeyResult, KeylistResult, EditResult): Types removed.  
\* ops.h: Don't include "types.h", but "gpgme.h" and "context.h".  
(test\_and\_allocate\_result): Remove macro.  
(\_gpgme\_release\_decrypt\_result): Remove prototype.  
(\_gpgme\_decrypt\_result): Remove prototype.  
(\_gpgme\_release\_sign\_result): Remove prototype.  
(\_gpgme\_release\_encrypt\_result): Remove prototype.  
(\_gpgme\_release\_passphrase\_result): Remove prototype.  
(\_gpgme\_release\_import\_result): Remove prototype.  
(\_gpgme\_release\_delete\_result): Remove prototype.  
(\_gpgme\_release\_genkey\_result): Remove prototype.  
(\_gpgme\_release\_keylist\_result):  
Remove prototype.  
(\_gpgme\_release\_edit\_result): Remove prototype.  
(\_gpgme\_release\_verify\_result): Remove prototype.  
\* gpgme.c (\_gpgme\_release\_result): Rewritten.  
\* context.h (enum ctx\_op\_data\_type): New enum.  
(struct ctx\_op\_data): New structure.  
(struct gpgme\_context\_s): Replace the member result with a member op\_data.  
(fail\_on\_pending\_request): Remove macro.  
\* op-support.c (\_gpgme\_op\_reset): Expand macro fail\_on\_pending\_request.

\* util.h: Don't include "types.h" or "debug.h", but include "gpgme.h".

2003-01-19 Marcus Brinkmann <marcus@g10code.de>

\* `rungpg.c` (`_gpgme_engine_ops_gpg`): Remove `gpg_start`.

(`gpg_start`): Rename to ...

(`start`): ... this function. Change arguments to `GpgObject`.

(`gpg_decrypt`): Call `start`.

(`gpg_edit`): Likewise.

(`gpg_encrypt`): Likewise.

(`gpg_encrypt_sign`): Likewise.

(`gpg_export`): Likewise.

(`gpg_import`): Likewise.

(`gpg_keylist`): Likewise.

(`gpg_keylist_ext`): Likewise.

(`gpg_trustlist`): Likewise.

(`gpg_verify`): Likewise.

\*

`engine-gpgsm.c` (`_gpgme_engine_ops_encrypt`): Remove `gpgsm_start`.

(`gpgsm_start`): Rename to ...

(`struct gpgsm_object_s`): Remove member `command`.

(`gpgsm_release`): Don't free `command`.

(`start`): ... this function. Change arguments to `GpgsmObject` and `const char *`.

(`gpgsm_decrypt`): Call `start`.

(`gpgsm_delete`): Likewise.

(`gpgsm_encrypt`): Likewise.

(`gpgsm_export`): Likewise.

(`gpgsm_genkey`): Likewise.

(`gpgsm_import`): Likewise.

(`gpgsm_keylist`): Likewise.

(`gpgsm_keylist_ext`): Likewise.

(`gpgsm_verify`): Likewise.

\* `decrypt.c` (`_gpgme_decrypt_start`): Don't call

`_gpgme_engine_start`.

\* `delete.c` (`_gpgme_op_delete_start`): Likewise.

\* `edit.c` (`_gpgme_op_edit_start`): Likewise.

\* `encrypt.c` (`_gpgme_op_encrypt_start`):

\* `encrypt-sign.c` (`_gpgme_op_encrypt_sign_start`):

\* `export.c` (`_gpgme_op_export_start`): Likewise.

\* `genkey.c` (`_gpgme_op_genkey_start`): Likewise.

\* `import.c` (`_gpgme_op_import_start`): Likewise.

\* `keylist.c` (`gpgme_op_keylist_ext_start`): Likewise.

(`gpgme_op_keylist_start`):

Likewise.

\* `sign.c` (`_gpgme_op_sign_start`): Likewise.

\* trustlist.c (gpgme\_op\_trustlist\_start): Likewise.

\* verify.c (\_gpgme\_op\_verify\_start): Likewise.

\* engine-backend.h (struct engine\_ops): Remove member start.

\* engine.h (\_gpgme\_engine\_start): Remove prototype.

\* engine.c (\_gpgme\_engine\_start): Remove function.

2003-01-19 Miguel Coca <mcoca@gnu.org>

\* w32-io.c (\_gpgme\_io\_select): Add missing argument in calls to  
DEBUG\_BEGIN.

\* w32-util.c: Include "sema.h".

(find\_program\_in\_registry): Change DEBUG1 to DEBUG2, fixes compilation  
error.

2003-01-29 Marcus Brinkmann <marcus@g10code.de>

\* types.h: Remove byte and ulong types.

\* util.h (\_gpgme\_hextobyte): Change prototype to unsigned char  
instead byte.

\* conversion.c (\_gpgme\_hextobyte): Change argument to unsigned  
char instead byte.

(\_gpgme\_decode\_c\_string): Likewise, and beautify. Also support a  
few more escaped characters. Be more strict about buffer size.

(\_gpgme\_data\_append\_percentstring\_for\_xml): Change  
type of SRC,

BUF and DST to unsigned char instead byte.

\* progress.c (\_gpgme\_progress\_status\_handler): Use unsigned char  
instead byte.

\* debug.c (trim\_spaces): Likewise.

\* util.h (mk\_error): Remove macro.

\* conversion.c, data.c, data-compat.c, decrypt.c, delete.c,  
edit.c, encrypt.c, encrypt-sign.c, engine.c, engine-gpgsm.c,  
export.c, genkey.c, gpgme.c, import.c, key.c, keylist.c,  
passphrase.c, progress.c, recipient.c, runpg.c, sign.c,  
signers.c, trustlist.c, verify.c, wait.c, wait-global.c,  
wait-private (literally everywhere): Expand the mk\_error macro.

\* context.h (wait\_on\_request\_or\_fail): Remove macro.

\* context.h (gpgme\_context\_s): Remove member ERROR.

\* types.h (GpgmeStatusHandler): Change return type to GpgmeError.

(GpgmeCommandHandler): Change return type to GpgmeError and add  
new argument RESULT.

\* gpgme.h (GpgmeIOCb): Change return type to GpgmeError.

(GpgmeEventIO): New event GPGME\_EVENT\_START.

(GpgmeIdleFunc): Remove type.

(gpgme\_register\_idle): Remove prototype.

\* data.c: Include <assert.h>.

(\_gpgme\_data\_inbound\_handler): Change return type to GpgmeError. Return any error instead ignoring it, don't close file descriptor on error.

(\_gpgme\_data\_outbound\_handler): Likewise.

\* decrypt.c: Do not include <stdio.h>, <string.h> and <assert.h>.

(\_gpgme\_decrypt\_status\_handler): Change return type to GpgmeError. Return error instead setting ctx->error. Return success at end of function.

(gpgme\_op\_decrypt): Don't work around the old kludge anymore.

\* decrypt-verify.c (decrypt\_verify\_status\_handler): Change return type to GpgmeError. Return possible errors.

\* delete.c: Do not include <stdio.h>, <string.h>, <time.h> and <assert.h>.

(delete\_status\_handler): Change return type to GpgmeError. Return error instead setting ctx->error. Return success at end of function.

\* edit.c: Do not include <stdio.h> and <string.h>.

(\_gpgme\_edit\_status\_handler): Change type to GpgmeError, make static and rename to ...

(edit\_status\_handler):  
... this. Return error directly.

(command\_handler): Change return type to GpgmeError, add result argument. Return error directly.

\* encrypt.c (status\_handler\_finish): Remove function.

(\_gpgme\_encrypt\_status\_handler): Change return type to GpgmeError. Return error directly.

(\_gpgme\_encrypt\_sym\_status\_handler): Likewise.

\* encrypt-sign.c (encrypt\_sign\_status\_handler): Likewise.

\* engine-gpgsm.c (close\_notify\_handler): Do not signal done event anymore.

(status\_handler): Change return type to GpgmeError. Diddle things around a bit to return errors directly.

(start): Send start event.

\* export.c: Do not include <stdio.h>, <string.h> and <assert.h>.

(export\_status\_handler): Change return type to GpgmeError. Don't check ctx->error.

\* genkey.c: Do not include <stdio.h> and <assert.h>.

(genkey\_status\_handler): Change return type to GpgmeError. Don't check ctx->error. Return errors directly.

\* gpgme.c (\_gpgme\_release\_result): Do not initialize ctx->error.

(\_gpgme\_op\_event\_cb):  
Function removed.

(\_gpgme\_op\_event\_cb\_user): Likewise.

\* import.c: Do not include <stdio.h>, <string.h> and <assert.h>.

(import\_status\_handler): Change return type to GpgmeError. Don't check ctx->error.

\* keylist.c (keylist\_colon\_handler, keylist\_status\_handler, finish\_key): Change return type to GpgmeError, return error directly.

\* Makefile (libgpgme\_la\_SOURCES): Add wait-global.c, wait-private.c and wait-user.c

\* ops.h (test\_and\_allocate\_result): Return error instead setting ctx->error.

(\_gpgme\_data\_inbound\_handler, \_gpgme\_data\_outbound\_handler, \_gpgme\_verify\_status\_handler, \_gpgme\_decrypt\_status\_handler, \_gpgme\_sign\_status\_handler, \_gpgme\_encrypt\_status\_handler, \_gpgme\_passphrase\_status\_handler, \_gpgme\_progress\_status\_handler): Change return type to GpgmeError.

(\_gpgme\_passphrase\_command\_handler): Change return type to GpgmeError and add new argument RESULT.

\* op-support.c: Use new callback functions, and change private data to ctx everywhere.

\* passphrase.c

(\_gpgme\_passphrase\_status\_handler): Change return type to GpgmeError, return error directly.

(\_gpgme\_passphrase\_command\_handler): Change return type to GpgmeError, add result argument. Return results accordingly.

\* progress.c (\_gpgme\_progress\_status\_handler): Change return type to GpgmeError, return errors directly.

\* runpgg.c (status\_handler): Change return type to GpgmeError. Return error directly.

(close\_notify\_handler): Don't send done event.

(colon\_line\_handler): Change return type to GpgmeError, return errors directly.

\* runpgg.c (start): Send start event.

\* sign.c (\_gpgme\_sign\_status\_handler): Change return type to GpgmeError, return errors directly.

\* trustlist.c (trustlist\_status\_handler): Change return type to GpgmeError. Return 0.

(trustlist\_colon\_handler): Change return type GpgmeError. Return errors directly.

\* verify.c (add\_notation): Change return type to GpgmeError, return errors directly.

(\_gpgme\_verify\_status\_handler): Likewise.

\* wait.h

(struct fd\_table): Remove lock member.

(struct wait\_item\_s): Moved here from wait.c.

(struct tag): New structure.

(\_gpgme\_wait\_event\_cb): Remove prototype.

(\_gpgme\_wait\_private\_event\_cb, \_gpgme\_wait\_global\_event\_cb, \_gpgme\_wait\_user\_add\_io\_cb, \_gpgme\_wait\_user\_remove\_io\_cb, \_gpgme\_wait\_user\_event\_io\_cb): New prototypes.

\* wait.c: Don't include <stdio.h>.

(ftd\_global, ctx\_done\_list, ctx\_done\_list\_size, ctx\_done\_list\_length, ctx\_done\_list\_lock, idle\_function): Remove global variable.

(gpgme\_register\_idle, do\_select, \_gpgme\_wait\_event\_cb): Remove function.

(gpgme\_wait): Move to file wait-global.c.

(\_gpgme\_add\_io\_cb): Take ctx as private argument, initialize ctx member in wait item and tag.

(\_gpgme\_remove\_io\_cb): Take ctx from tag. Don't use FDT lock.

(\_gpgme\_wait\_one, \_gpgme\_wait\_on\_condition): Move to wait-private.c.

(gpgme\_fd\_table\_init): Don't initialize FDT->lock.

(gpgme\_fd\_table\_deinit): Don't destroy FDT->lock.

(\_gpgme\_fd\_table\_put): Make static and rename to ...

(fd\_table\_put): ... this function. Don't use FDT->lock.

(struct wait\_item\_s): Move to wait.h.

\* wait-global.c: New file.

\* wait-private.c: New file.

\* wait-user.c: New file.

\* key.c (gpgme\_key\_sig\_get\_string\_attr): Use validity\_to\_string instead of trust\_to\_string to calculate validity.

2003-01-30 Marcus Brinkmann <marcus@g10code.de>

\* types.h (EngineObject): Move typedef to ...

\* engine.h: ... here.

\* types.h (GpgObject): Move typedef to ...

\* runpgg.c: ... here.

\* types.h (GpgsmObject): Move typedef to ...

\* engine-gpgsm.c: ... here.

\* util.h (return\_if\_fail, return\_null\_if\_fail, return\_val\_if\_fail): Remove macro.

\* gpgme.c (gpgme\_cancel): Don't use return\_if\_fail.

\* key.c (gpgme\_key\_ref): Likewise.

\* signers.c (gpgme\_signers\_enum): Likewise.

(gpgme\_signers\_clear): Likewise.

\* engine-backend.h (struct engine\_ops): Rename get\_path to get\_file\_name.

\* gpgme.h (struct \_gpgme\_engine\_info): Rename member path to file\_name.

\* version.c: Do not include <stdio.h>, <stdlib.h>, context.h and util.h. Other clean ups.

(parse\_version\_number): Protect more seriously against

overflow.

(gpgme\_get\_engine\_info): Move to ...

\* engine.c (gpgme\_get\_engine\_info): ... here.

(\_gpgme\_engine\_get\_info): Function removed.

(\_gpgme\_engine\_get\_path): Make static and rename to ...

(engine\_get\_file\_name): .. this.

(\_gpgme\_engine\_get\_version): Make static and rename to ...

(engine\_get\_version): ... this.

(\_gpgme\_engine\_get\_req\_version): Make static and rename to ...

(engine\_get\_req\_version): ... this.

\* engine.h (\_gpgme\_engine\_get\_path, \_gpgme\_engine\_get\_version, \_gpgme\_engine\_req\_version, \_gpgme\_engine\_get\_info.): Remove prototypes.

\* gpgme.h (enum GpgmeProtocol): Remove GPGME\_PROTOCOL\_AUTO.

\* gpgme.c (gpgme\_set\_protocol): Don't handle GPGME\_PROTOCOL\_AUTO.

(gpgme\_get\_protocol\_name): New function.

\* engine-backend.h (struct engine\_ops): New member get\_req\_version, remove member check\_version.

\* engine.h (\_gpgme\_Engine\_get\_version): New prototype.

\*

rungpg.c (gpg\_get\_req\_version): New function.

(gpg\_check\_version): Function removed.

(\_gpgme\_engine\_ops\_gpg): Add gpg\_get\_req\_version, remove gpg\_check\_version.

\* engine-gpgsm.c (gpgsm\_get\_req\_version): New function.

(gpgsm\_check\_version): Function removed.

(\_gpgme\_engine\_ops\_gpgsm): Add gpgsm\_get\_req\_version, remove gpgsm\_check\_version.

\* engine.c: Include ops.h.

(\_gpgme\_engine\_get\_req\_version): New function.

(gpgme\_engine\_check\_version): Rewritten.

\* version.c (gpgme\_get\_engine\_info): Rewritten.

\* gpgme.h (gpgme\_engine\_info): New structure.

(GpgmeEngineInfo): New type.

2003-01-06 Werner Koch <wk@gnupg.org>

\* keylist.c (set\_mainkey\_capability): Handle 'd' and 'D' used since gpg 1.3 to denote disabled keys.

2003-01-06 Marcus Brinkmann <marcus@g10code.de>

\* data-mem.c: Include <string.h>.

\* engine.c: Likewise.

2003-01-06 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (libgpgme\_la\_DEPENDENCIES): Correct bug in last change.

2002-12-24 Marcus

Brinkmann <marcus@g10code.de>

\* gpgme.h (gpgme\_op\_verify, gpgme\_op\_decrypt\_verify): Drop R\_STAT argument.

\* decrypt-verify.c (gpgme\_op\_decrypt\_verify): Drop R\_STAT argument.

\* verify.c (gpgme\_op\_verify): Drop R\_STAT argument.

(\_gpgme\_intersect\_stati): Function removed.

\* ops.h (\_gpgme\_intersect\_stati): Remove prototype.

2002-12-24 Marcus Brinkmann <marcus@g10code.de>

\* libgpgme.vers: New file.

\* Makefile.am (EXTRA\_DIST): Add libgpgme.vers.

(libgpgme\_version\_script\_cmd): New variable.

(libgpgme\_la\_LDFLAGS): Add libgpgme\_version\_script\_cmd here.

(libgpgme\_la\_DEPENDENCIES): New variable.

2002-12-23 Marcus Brinkmann <marcus@g10code.de>

\* key.c (gpgme\_key\_get\_string\_attr): Don't accept GPGME\_ATTR\_IS\_SECRET.

(otrust\_to\_string): New function.

(gpgme\_key\_get\_as\_xml): Use it.

(validity\_to\_string): New function.

(gpgme\_key\_get\_string\_attr): Beautify using above functions.

(gpgme\_key\_get\_ulong\_attr): Likewise.

2002-12-23 Marcus Brinkmann <marcus@g10code.de>

\* data-mem.c

(mem\_release): Fix gcc warning.

\* data-user.c (user\_release): Likewise.

2002-12-06 Marcus Brinkmann <marcus@g10code.de>

\* data.h (gpgme\_data\_release\_cb): Change return type to void.

(gpgme\_data\_read\_cb): Change return type to ssize\_t.

\* data.c (gpgme\_data\_read): Likewise.

\* data-stream.c (stream\_read): Likewise.

\* data-fd.c (fd\_read): Likewise.

\* data-mem.c (mem\_read): Likewise.

(mem\_release): Change return type to void.

\* data-user.c (user\_read): Change return type to ssize\_t.

(user\_release): Change return type to void.

\* data-compat.c (old\_user\_read): Change return type to ssize\_t.  
\* gpgme.h (GpgmeDataReadCb): Likewise.  
(gpgme\_data\_read): Likewise.  
(GpgmeDataSeekCb): Change return type to off\_t.

2002-12-04 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h: Add prototype for gpgme\_get\_key.  
\* key.c (gpgme\_get\_key): New function.  
\* verify.c (gpgme\_get\_sig\_key): Rewrite using gpgme\_get\_key.

\* gpgme.h: Add prototypes for new interfaces  
gpgme\_key\_sig\_get\_string\_attr  
and gpgme\_key\_get\_ulong\_attr.  
(enum GpgmeAttr): New attribute GPGME\_ATTR\_SIG\_CLASS.  
\* gpgme.c (gpgme\_set\_keylist\_mode): Allow GPGME\_KEYLIST\_MODE\_SIGS.  
\* key.h (struct certsig\_s): New members ALGO, NAME\_PART,  
EMAIL\_PART, COMMENT\_PART, NAME, SIG\_STAT and SIG\_CLASS.

\* conversion.c (\_gpgme\_decode\_c\_string): Add new parameter LEN.  
Use that to determine if allocation is desired or not.  
\* util.h: Adjust prototype of \_gpgme\_decode\_c\_string.  
\* keylist.c (keylist\_colon\_handler): Adjust caller of  
\_gpgme\_decode\_c\_string.

\* key.h (struct gpgme\_key\_s): New member last\_uid.  
\* key.c (\_gpgme\_key\_append\_name): Rewritten using  
\_gpgme\_decode\_c\_string and the last\_uid pointer.  
(my\_isdigit): Macro removed.  
(ALLOC\_CHUNK): Likewise.  
\* keylist.c (set\_userid\_flags): Use last\_uid member of KEY.

\* context.h (struct user\_id\_s): New member last\_certsig.  
\* key.h: Add prototype for \_gpgme\_key\_add\_certsig.  
\* key.c (\_gpgme\_key\_add\_certsig): New function.  
(set\_user\_id\_part): Move function  
before \_gpgme\_key\_add\_certsig.  
(parse\_user\_id): Change first argument to SRC, add new arguments  
NAME, EMAIL and COMMENT. Change code to use these arguments  
instead going through UID. Move function before  
\_gpgme\_add\_certsig.  
(parse\_x509\_user\_id): Likewise.  
(\_gpgme\_key\_append\_name): Adjust arguments to parse\_x509\_user\_id  
and parse\_user\_id invocation.  
(one\_certsig\_as\_xml): New function.  
(one\_uid\_as\_xml): Print signatures.  
\* context.h (struct gpgme\_context\_s): New member TMP\_UID.  
\* keylist.c (keylist\_colon\_handler): Rewritten, implement "sig"

record entries.

\* key.c (get\_certsig): New function.  
(gpgme\_key\_sig\_get\_string\_attr): Likewise.  
(gpgme\_key\_sig\_get\_ulong\_attr): Likewise.

\* keylist.c: Include <ctype.h>.  
(my\_isdigit): Macro removed.  
(set\_mainkey\_trust\_info): Use isdigit, not my\_isdigit.  
(set\_userid\_flags): Likewise.  
(set\_subkey\_trust\_info): Likewise.  
(set\_ownertrust): Likewise.  
(finish\_key): Move function up a bit and remove prototype.

\* runpgg.c (gpg\_keylist\_ext):  
Correct precedence of signature  
listing mode.  
(gpg\_keylist\_ext): Implement signature listing mode.

2002-11-25 Marcus Brinkmann <marcus@g10code.de>

\* runpgg.c (\_gpgme\_gpg\_spawn): Do not set parent fds to -1.  
\* posix-io.c (\_gpgme\_io\_spawn): Call \_gpgme\_io\_close instead close  
for parent fds.  
\* w32-io.c (\_gpgme\_io\_spawn): Call \_gpgme\_io\_close instead  
CloseHandle for parent fds.

2002-11-22 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h [\_MSC\_VER]: Define ssize\_t as long.

2002-11-22 Werner Koch <wk@gnupg.org>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_new): Save the result of a first  
setlocale before doing another setlocale.

2002-11-21 Marcus Brinkmann <marcus@g10code.de>

\* decrypt.c: Some beautyfication.  
  
\* verify.c (\_gpgme\_verify\_status\_handler): Treat  
GPGME\_STATUS\_UNEXPECTED like GPGME\_STATUS\_NODATA.  
Reported by Miguel Coca <e970095@zipi.fi.upm.es>.

2002-11-19 Marcus Brinkmann <marcus@g10code.de>

\* genkey.c: Only include <config.h> if [HAVE\_CONFIG\_H].  
(struct

genkey\_result\_s): Add new member FPR.  
(\_gpgme\_release\_genkey\_result): Free RESULT->fpr if set.  
(genkey\_status\_handler): Extract the fingerprint from the status line.  
(gpgme\_op\_genkey): Add new argument FPR and return the fingerprint in it.  
\* gpgme.h: Adjust prototype of gpgme\_op\_genkey.

2002-11-19 Marcus Brinkmann <marcus@g10code.de>

\* runpg.c (gpg\_keylist): Add --with-fingerprint to gpg invocation twice, to get fingerprints on subkeys. Suggested by Timo Schulz <twoaday@freakmail.de>.  
(gpg\_keylist\_ext): Likewise.

2002-11-05 Marcus Brinkmann <marcus@g10code.de>

\* import.c (append\_xml\_impinfo): Use \_gpgme\_data\_append\_string\_for\_xml rather than \_gpgme\_data\_append\_string for the field content.  
Submitted by Miguel Coca <e970095@zipi.fi.upm.es>.

2002-10-10 Marcus Brinkmann <marcus@g10code.de>

\* runpg.h, engine-gpgsm.h: File removed.  
\* engine-backend.h: New file.  
\* Makefile.am (gpgsm\_components): New variable, set depending on automake conditional HAVE\_GPGSM.  
(libgpgme\_la\_SOURCES):  
Add engine-backend.h, remove runpg.h and engine-gpgsm.h. Replace engine-gpgsm.c with \${gpgsm\_components}.  
(status-table.h): Depend on gpgme.h, not runpg.h.  
\* conversion.c: Include <stdlib.h>.  
\* engine-gpgsm.c: Do not set ENABLE\_GPGSM here. Include "engine-backend.h" instead "engine-gpgsm.h". Reorder some functions and remove all function prototypes.  
(\_gpgme\_gpgsm\_get\_version): Make static and rename to ...  
(gpgsm\_get\_version): ... this.  
(\_gpgme\_gpgsm\_check\_version): Make static and rename to ...  
(gpgsm\_check\_version): ... this.  
(\_gpgme\_gpgsm\_new): Make static. Change argument type from GpgsmObject \* to void \*\*. Call gpgsm\_release instead \_gpgme\_gpgsm\_release.  
(\_gpgme\_gpgsm\_op\_decrypt): Make static and rename to ...  
(gpgsm\_check\_decrypt): ... this.  
(\_gpgme\_gpgsm\_op\_delete): Make static and rename to ...  
(gpgsm\_check\_delete): ... this.  
(\_gpgme\_gpgsm\_set\_recipients): Make static and rename to ...

(gpgsm\_check\_set\_recipients): ... this.

(\_gpgme\_gpgsm\_op\_encrypt):  
Make static and rename to ...

(gpgsm\_encrypt): ... this.

(\_gpgme\_gpgsm\_op\_export): Make static and rename to ...

(gpgsm\_export): ... this.

(\_gpgme\_gpgsm\_op\_genkey): Make static and rename to ...

(gpgsm\_genkey): ... this.

(\_gpgme\_gpgsm\_op\_import): Make static and rename to ...

(gpgsm\_import): ... this.

(\_gpgme\_gpgsm\_op\_keylist): Make static and rename to ...

(gpgsm\_keylist): ... this.

(\_gpgme\_gpgsm\_op\_keylist\_ext): Make static and rename to ...

(gpgsm\_keylist\_ext): ... this.

(\_gpgme\_gpgsm\_op\_sign): Make static and rename to ...

(gpgsm\_sign): ... this.

(\_gpgme\_gpgsm\_op\_trustlist): Make static and rename to ...

(gpgsm\_trustlist): ... this.

(\_gpgme\_gpgsm\_op\_verify): Make static and rename to ...

(gpgsm\_verify): ... this.

(gpgsm\_status\_handler): Rename to ...

(status\_handler): ... this.

(\_gpgme\_gpgsm\_set\_status\_handler): Make static and rename to ...

(gpgsm\_set\_status\_handler): ... this.

(\_gpgme\_gpgsm\_set\_colon\_line\_handler): Make static  
and rename to ...

(gpgsm\_set\_colon\_line\_handler): ... this.

(\_gpgme\_gpgsm\_add\_io\_cb): Rename to ...

(add\_io\_cb): ... this.

(\_gpgme\_gpgsm\_start): Make static and rename to ...

(gpgsm\_start): ... this.

(\_gpgme\_gpgsm\_set\_io\_cb): Make static and rename to ...

(gpgsm\_set\_io\_cb): ... this.

(\_gpgme\_gpgsm\_io\_event): Make static and rename to ...

(gpgsm\_io\_event): ... this.

(struct \_gpgme\_engine\_ops\_gpgsm): New variable.

[!ENABLE\_GPGSM]: Removed.

\* engine.c: Do not include <time.h>, <sys/types.h>, <string.h>, <assert.h>, "io.h", "runpg.h" and "engine-gpgsm.h". Include <stdlib.h> and "engine-backend.h".

(struct engine\_object\_s): Rewritten.

(engine\_ops): New variable.

\* engine.c (\_gpgme\_engine\_get\_path, \_gpgme\_engine\_get\_version, \_gpgme\_engine\_check\_version, \_gpgme\_engine\_new, \_gpgme\_engine\_release, \_gpgme\_engine\_set\_verbosity, \_gpgme\_engine\_set\_status\_handler, \_gpgme\_engine\_set\_command\_handler, \_gpgme\_engine\_set\_colon\_line\_handler, \_gpgme\_engine\_op\_decrypt,

\_gpgme\_engine\_op\_delete,  
 \_gpgme\_engine\_op\_edit,  
 \_gpgme\_engine\_op\_encrypt, \_gpgme\_engine\_op\_encrypt\_sign,  
 \_gpgme\_engine\_op\_export, \_gpgme\_engine\_op\_genkey,  
 \_gpgme\_engine\_op\_import, \_gpgme\_engine\_op\_keylist,  
 \_gpgme\_engine\_op\_keylist\_ext, \_gpgme\_engine\_op\_sign,  
 \_gpgme\_engine\_op\_trustlist, \_gpgme\_engine\_op\_verify,  
 \_gpgme\_engine\_start, \_gpgme\_engine\_set\_io\_cbs,  
 \_gpgme\_engine\_io\_event): Reimplement.  
 \* engine.h: Fix a few comments and a variable name in a prototype.  
 \* ops.h: Do not include "rungpg.h".  
 \* passphrase.c: Include config.h only if [HAVE\_CONFIG\_H]. Do not  
 include "rungpg.h".  
 \* recipient.c: Likewise.  
 \* signers.c: Likewise.  
 \* version.c: Likewise.  
 \* rungpg.c: Likewise. Include "engine-backend.h". Reorder  
 functions and remove prototypes.  
 (\_gpgme\_gpg\_get\_version): Make static and rename to ...  
 (gpg\_get\_version): ... this.  
 (\_gpgme\_gpg\_check\_version): Make static and rename to ...  
 (gpg\_check\_version): ... this.  
 (\_gpgme\_gpg\_new): Make static. Change argument type from  
 GpgObject  
 \* to void \*\*. Call gpg\_release instead  
 \_gpgme\_gpg\_release.  
 (\_gpgme\_gpg\_op\_decrypt): Make static and rename to ...  
 (gpg\_check\_decrypt): ... this.  
 (\_gpgme\_gpg\_op\_delete): Make static and rename to ...  
 (gpg\_check\_delete): ... this.

 (gpg\_import): ... this.  
 (\_gpgme\_gpg\_op\_keylist): Make static and rename to ...  
 (gpg\_keylist): ... this.  
 (\_gpgme\_gpg\_op\_keylist\_ext): Make static and rename to ...  
 (gpg\_keylist\_ext): ... this.  
 (\_gpgme\_gpg\_op\_sign): Make static and rename to ...  
 (gpg\_sign): ... this.  
 (\_gpgme\_gpg\_op\_trustlist): Make static and rename to ...  
 (gpg\_trustlist): ... this.

(\_gpgme\_gpg\_op\_verify):  
Make static and rename to ...  
(gpg\_verify): ... this.  
(gpg\_status\_handler): Rename to ...  
(status\_handler): ... this.  
(\_gpgme\_gpg\_set\_status\_handler): Make static and rename to ...  
(gpg\_set\_status\_handler): ... this.  
(\_gpgme\_gpg\_set\_colon\_line\_handler): Make static and rename to ...  
(gpg\_set\_colon\_line\_handler): ... this.  
(gpgme\_gpg\_add\_io\_cb): Rename to ...  
(add\_io\_cb): ... this.  
(\_gpgme\_gpg\_start): Make static and rename to ...  
(gpg\_start): ... this.  
(\_gpgme\_gpg\_set\_io\_cb): Make static and rename to ...  
(gpg\_set\_io\_cb): ... this.  
(\_gpgme\_gpg\_io\_event): Make static and rename to ...  
(gpg\_io\_event): ... this.  
(struct \_gpgme\_engine\_ops\_gpg): New variable.

2002-10-10 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_verify) [!ENABLE\_GPGSM]: Add missing argument.

2002-10-09 Marcus Brinkmann <marcus@g10code.de>

\* data.h, data-user.c, data-stream.c, data-mem.c, data-fd.c, data-compat.c: New file. Really check them in this time, completes  
2002-10-08 change.

\* runpg.h (GpgStatusHandler): Rename type to GpgmeStatusHandler and move to ...  
\* types.h (GpgmeStatusHandler): ... here.  
\* runpg.h (GpgColonLineHandler): Rename type to GpgmeColonLineHandler. and move to ...  
\* types.h (GpgmeColonLineHandler): ... here.  
\* runpg.h (GpgCommandHandler): Rename type to GpgmeCommandHandler. and move to ...  
\* types.h (GpgmeCommandHandler): ... here.  
\* engine.h: Don't include "runpg.h".  
(\_gpgme\_engine\_set\_status\_handler): Change type of argument from GpgStatusHandler to GpgmeStatusHandler.  
(\_gpgme\_engine\_set\_colon\_line\_handler): Change type of argument from GpgColonLineHandler to GpgmeColonLineHandler.  
(\_gpgme\_engine\_set\_command\_handler): Change type of argument from GpgCommandHandler to GpgmeCommandHandler.  
\* engine-gpgsm.h: Don't include "runpg.h".

(\_gpgme\_gpgsm\_set\_status\_handler): Change type of argument from GpgStatusHandler to GpgmeStatusHandler.

(\_gpgme\_gpgsm\_set\_colon\_line\_handler): Change type of argument from GpgColonLineHandler to GpgmeColonLineHandler.

\* engine-gpgsm.c: Do not include "rungpg.h".

(struct gpgsm\_object\_s): Change type of status.fnc to GpgmeStatusHandler. Change type of colon.fnc to GpgmeColonLineHandler.

(gpgsm\_assuan\_simple\_command): Change type of argument from GpgStatusHandler to GpgmeStatusHandler.

(\_gpgme\_gpgsm\_set\_status\_handler): Likewise.

(\_gpgme\_gpgsm\_set\_colon\_line\_handler): Change type of argument from GpgColonLineHandler to GpgmeColonLineHandler.

\* rungpg.h (\_gpgme\_gpg\_set\_status\_handler): Change type of argument from GpgStatusHandler to GpgmeStatusHandler.

(\_gpgme\_gpg\_set\_colon\_line\_handler): Change type of argument from GpgColonLineHandler to GpgmeColonLineHandler.

(\_gpgme\_gpg\_set\_command\_handler): Change type of argument from GpgCommandHandler to GpgmeCommandHandler.

\* rungpg.c (struct gpg\_object\_s): Change type of status.fnc to GpgmeStatusHandler. Change type of colon.fnc to GpgmeColonLineHandler. Change type of cmd.fnc to GpgmeCommandLineHandler.

(\_gpgme\_gpg\_set\_status\_handler): Change type of argument FNC to GpgmeStatusHandler.

(\_gpgme\_gpg\_set\_colon\_line\_handler): Change type of argument FNC to GpgmeColonLineHandler.

(\_gpgme\_gpg\_set\_command\_handler): Change type of argument FNC to GpgmeCommandHandler.

\* engine.c (\_gpgme\_engine\_set\_status\_handler): Change type of argument FNC to GpgmeStatusHandler.

(\_gpgme\_engine\_set\_colon\_line\_handler): Change type of argument FNC to GpgmeColonLineHandler.

(\_gpgme\_engine\_set\_command\_handler): Change type of argument FNC to GpgmeCommandHandler.

\* rungpg.h (\_gpgme\_gpg\_enable\_pipemode): Remove prototype.

\* rungpg.c (struct gpg\_object\_s): Remove PM.

(pipemode\_cb): Prototype removed.

(add\_pm\_data): Function removed.

(\_gpgme\_gpg\_enable\_pipemode): Likewise.

(pipemode\_copy): Likewise.

(pipemode\_cb): Likewise.

(add\_arg): Don't check for pipemode.

(add\_data): Likewise.

(\_gpgme\_gpg\_set\_status\_handler): Likewise.

(\_gpgme\_gpg\_set\_colon\_line\_handler):  
Likewise.  
(\_gpgme\_gpg\_set\_command\_handler): Likewise.  
(\_gpgme\_gpg\_spawn): Likewise.  
(\_gpgme\_gpg\_spawn): Don't set PM.active.  
(\_gpgme\_gpg\_op\_verify): Remove pipemode case.  
\* verify.c (\_gpgme\_op\_verify\_start): Remove pipemode case.

\* runpgp.h (\_gpgme\_gpg\_add\_arg, \_gpgme\_gpg\_add\_data,  
\_gpgme\_gpg\_add\_pm\_data, \_gpgme\_gpg\_housecleaning,  
\_gpgme\_gpg\_set\_simple\_line\_handler): Prototype removed.  
(\_gpgme\_gpg\_set\_verbosity): New prototype.  
\* runpgp.c (\_gpgme\_gpg\_add\_data): Make static and rename to ...  
(add\_data): ... this.  
(\_gpgme\_gpg\_add\_pm\_data): Call add\_data, not \_gpgme\_gpg\_add\_data.  
(\_gpgme\_gpg\_set\_command\_handler): Likewise.  
(\_gpgme\_gpg\_op\_decrypt, \_gpgme\_gpg\_op\_edit, \_gpgme\_gpg\_op\_encrypt,  
\_gpgme\_gpg\_op\_encrypt\_sign, \_gpgme\_gpg\_op\_export,  
\_gpgme\_gpg\_op\_genkey, \_gpgme\_gpg\_op\_import, \_gpgme\_gpg\_op\_sign,  
\_gpgme\_gpg\_op\_verify): Likewise.  
(\_gpgme\_gpg\_add\_pm\_data): Rename to ...  
(add\_pm\_data): ... this.  
(\_gpgme\_gpg\_op\_verify): Call add\_pm\_data, not  
\_gpgme\_gpg\_add\_pm\_data.  
(\_gpgme\_gpg\_add\_arg):  
Make static and rename to ...  
(add\_arg): ... this.  
(\_gpgme\_gpg\_set\_command\_handler, \_gpgme\_gpg\_new,  
\_gpgme\_gpg\_op\_decrypt, \_gpgme\_gpg\_op\_delete,  
\_gpgme\_append\_gpg\_args\_from\_signers, \_gpgme\_gpg\_op\_edit,  
\_gpgme\_append\_gpg\_args\_from\_recipients, \_gpgme\_gpg\_op\_encrypt,  
\_gpgme\_gpg\_op\_encrypt\_sign, \_gpgme\_gpg\_op\_export,  
\_gpgme\_gpg\_op\_genkey, \_gpgme\_gpg\_op\_import, \_gpgme\_gpg\_op\_keylist,  
\_gpgme\_gpg\_op\_keylist\_ext, \_gpgme\_gpg\_op\_trustlist,  
\_gpgme\_gpg\_op\_sign, \_gpgme\_gpg\_op\_verify): Use add\_arg, not  
\_gpgme\_gpg\_add\_arg.  
(\_gpgme\_gpg\_set\_verbosity): New function.  
(struct gpg\_object\_s): Remove member simple from colon.  
(\_gpgme\_gpg\_set\_colon\_line\_handler): Don't initialize simple.  
(\_gpgme\_gpg\_set\_simple\_line\_handler): Removed function.  
(read\_colon\_line): Don't check the GPG->colon.simple.  
\* engine.c (\_gpgme\_engine\_set\_verbosity): Call  
\_gpgme\_gpg\_set\_verbosity instead \_gpgme\_gpg\_add\_arg.

2002-10-08 Marcus Brinkmann <marcus@g10code.de>

\* util.h (\_gpgme\_malloc,

\_gpgme\_realloc, \_gpgme\_calloc,  
 \_gpgme\_strdup, \_gpgme\_free): Remove prototypes.  
 (xtrymalloc, xtrycalloc, xtryrealloc, xtrystrdup, xfree): Remove  
 macros.

\* util.c: File removed.

\* Makefile.am (libgpgme\_la\_SOURCES): Remove util.h.

\* conversion.c (\_gpgme\_decode\_c\_string): Use malloc instead of  
 xtrymalloc, realloc instead of xtryrealloc, calloc instead of  
 xtrycalloc, free instead of xfree.

(\_gpgme\_data\_append\_percentstring\_for\_xml): Likewise.

\* data.c (\_gpgme\_data\_new, \_gpgme\_data\_release): Likewise.

\* data-compat.c (gpgme\_data\_new\_from\_filepart): Likewise.

\* data-mem.c (mem\_write, mem\_release, gpgme\_data\_new\_from\_mem,  
 \_gpgme\_data\_get\_as\_string): Likewise.

\* debug.c (debug\_init): Likewise.

\* decrypt.c (\_gpgme\_release\_decrypt\_result): Likewise.

\* delete.c (\_gpgme\_release\_delete\_result): Likewise.

\* edit.c (\_gpgme\_release\_edit\_result, \_gpgme\_op\_edit\_start):  
 Likewise.

\* encrypt.c (\_gpgme\_release\_encrypt\_result): Likewise.

\* engine.c (\_gpgme\_engine\_get\_info, \_gpgme\_engine\_new,  
 \_gpgme\_engine\_release):  
 Likewise.

\* engine-gpgsm.c (\_gpgme\_gpgsm\_new, \_gpgme\_gpgsm\_release,  
 \_gpgme\_gpgsm\_op\_decrypt, \_gpgme\_gpgsm\_op\_delete,  
 gpgsm\_set\_recipients, \_gpgme\_gpgsm\_op\_encrypt,  
 \_gpgme\_gpgsm\_op\_export, \_gpgme\_gpgsm\_op\_genkey,  
 \_gpgme\_gpgsm\_op\_import, \_gpgme\_gpgsm\_op\_keylist,  
 \_gpgme\_gpgsm\_op\_keylist\_ext, \_gpgme\_gpgsm\_op\_sign,  
 \_gpgme\_gpgsm\_op\_verify, gpgsm\_status\_handler): Likewise.

\* genkey.c (\_gpgme\_release\_genkey\_result): Likewise.

\* gpgme.c (gpgme\_new, gpgme\_release): Likewise.

\* import.c (\_gpgme\_release\_import\_result): Likewise.

\* key.c (\_gpgme\_key\_cache\_init, \_gpgme\_key\_cache\_add, key\_new,  
 add\_subkey, gpgme\_key\_release, \_gpgme\_key\_append\_name): Likewise.

\* keylist.c (\_gpgme\_release\_keylist\_result, keylist\_colon\_handler,  
 \_gpgme\_op\_keylist\_event\_cb, gpgme\_op\_keylist\_next): Likewise.

\* ops.h (test\_and\_allocate\_result): Likewise.

\* passphrase.c (\_gpgme\_release\_passphrase\_result,  
 \_gpgme\_passphrase\_status\_handler,  
 \_gpgme\_passphrase\_command\_handler): Likewise.

\*

progress.c (\_gpgme\_progress\_status\_handler): Likewise.

\* recipient.c (gpgme\_recipients\_new, gpgme\_recipients\_release,  
 gpgme\_recipients\_add\_name\_with\_validity): Likewise.

\* runpg.c (\_gpgme\_gpg\_new, \_gpgme\_gpg\_release,  
 \_gpgme\_gpg\_add\_arg, \_gpgme\_gpg\_add\_data,  
 \_gpgme\_gpg\_set\_colon\_line\_handler, free\_argv, free\_fd\_data\_map,

build\_argv, \_gpgme\_gpg\_spawn, read\_status, read\_colon\_line):  
Likewise.

- \* sign.c (\_gpgme\_release\_sign\_result): Likewise.
- \* signers.c (\_gpgme\_signers\_add): Likewise.
- \* trustlist.c (trust\_item\_new, trustlist\_colon\_handler, \_gpgme\_op\_trustlist\_event\_cb, gpgme\_op\_trustlist\_next, gpgme\_trustitem\_release): Likewise.
- \* verify.c (\_gpgme\_release\_verify\_result, finish\_sig): Likewise.
- \* version.c (gpgme\_get\_engine\_info, \_gpgme\_get\_program\_version):  
Likewise.
- \* w32-io.c (create\_reader, create\_writer, destroy\_reader, destroy\_writer, build\_commandline, \_gpgme\_io\_spawn): Likewise.
- \* w32-sema.c (critsect\_init, \_gpgme\_sema\_cs\_destroy): Likewise.
- \* w32-util.c (read\_w32\_registry\_string):  
Likewise.
- \* wait.c (\_gpgme\_fd\_table\_deinit, \_gpgme\_fd\_table\_put, \_gpgme\_wait\_event\_cb, \_gpgme\_add\_io\_cb, \_gpgme\_remove\_io\_cb)
- \* data-compat.c: Include <stdlib.h>.

2002-10-08 Marcus Brinkmann <marcus@g10code.de>

New data object component:

- \* gpgme.h (GpgmeDataReadCb, GpgmeDataWriteCb, GpgmeDataSeekCb, GpgmeDataReleaseCb): New types.
- (struct GpgmeDataCbs): New structure.
- (gpgme\_data\_read): Changed prototype to match that of read() closely.
- (gpgme\_data\_write): Similar for write().
- (gpgme\_data\_seek, gpgme\_data\_new\_from\_cbs, gpgme\_data\_new\_from\_fd, gpgme\_data\_new\_from\_stream): New prototypes.
- (gpgme\_data\_get\_type, gpgme\_check\_engine): Prototype removed.
- \* Makefile.am (libgpgme\_la\_SOURCES): Add data.h, data-fd.c, data-stream.c, data-mem.c, data-user.c and data-compat.c.
- \* data.c: Reimplemented from scratch.
- \* (data-compat.c, data-fd.c, data.h, data-mem.c, data-stream.c, data-user.c): New file.
- \* context.h (struct gpgme\_data\_s): Removed.
- \* conversion.c:  
Include <errno.h> and <sys/types.h>.
- (\_gpgme\_data\_append): New function.
- \* data.c (\_gpgme\_data\_append\_string): Move to ...
- \* conversion.c (\_gpgme\_data\_append\_string): ... here.
- \* data.c (\_gpgme\_data\_append\_for\_xml): Move to ...
- \* conversion.c (\_gpgme\_data\_append\_for\_xml): ... here.
- \* data.c (\_gpgme\_data\_append\_string\_for\_xml): Move to ...
- \* conversion.c (\_gpgme\_data\_append\_string\_for\_xml): ... here.
- \* data.c (\_gpgme\_data\_append\_percentstring\_for\_xml): Move to ...

- \* conversion.c (\_gpgme\_data\_append\_percentstring\_for\_xml): ... here.
- \* ops.h (\_gpgme\_data\_get\_mode, \_gpgme\_data\_set\_mode): Prototype removed.
- \* types.h (GpgmeDataMode): Type removed.
- \* decrypt.c (\_gpgme\_decrypt\_start): Don't check data type or mode.
- \* edit.c (\_gpgme\_op\_edit\_start): Likewise.
- \* encrypt.c (\_gpgme\_op\_encrypt\_start): Likewise.
- \* encrypt-sign.c (\_gpgme\_op\_encrypt\_sign\_start): Likewise.
- \* encrypt-sign.c (\_gpgme\_op\_encrypt\_sign\_start): Likewise.
- \* export.c (\_gpgme\_op\_export\_start): Likewise.
- \*
- genkey.c (\_gpgme\_op\_genkey\_start): Likewise.
- \* import.c (\_gpgme\_op\_import\_start): Likewise.
- \* sign.c (\_gpgme\_op\_sign\_start): Likewise.
- \* verify.c (\_gpgme\_op\_verify\_start): Likewise.
- 
- \* encrypt.c (gpgme\_op\_encrypt): Remove hack that returns invalid no recipient if no data was returned.
- \* encrypt-sign.c (gpgme\_op\_encrypt\_sign): Remove hack that returns no recipient if no data was returned.
- \* encrypt-sign.c (gpgme\_op\_encrypt\_sign): Remove hack that returns no recipient if no data was returned.
- 
- \* engine.c (\_gpgme\_engine\_op\_verify): Add new argument to differentiate detached from normal signatures.
- \* engine.h (\_gpgme\_engine\_op\_verify): Likewise for prototype.
- \* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_verify): Likewise. Don't check mode of data argument.
- \* engine-gpgsm.h (\_gpgme\_gpgsm\_op\_verify): Likewise for prototype.
- \* gpgme.h (gpgme\_op\_verify\_start): Likewise for prototype.
- (gpgme\_op\_verify): Likewise for prototype.
- \* runpg.c (\_gpgme\_gpg\_op\_verify): Likewise.
- \* runpg.h
- (\_gpgme\_gpg\_op\_verify): Likewise for prototype.
- \* verify.c (\_gpgme\_op\_verify\_start): Likewise.
- (gpgme\_op\_verify\_start): Likewise.
- (gpgme\_op\_verify): Likewise.
- 
- \* runpg.c (struct arg\_and\_data\_s): New member INBOUND to hold direction of data object.
- (\_gpgme\_gpg\_add\_data): Add new argument INBOUND. Use it to determine direction of data object.
- (\_gpgme\_gpg\_add\_pm\_data, \_gpgme\_gpg\_set\_command\_handler, \_gpgme\_gpg\_op\_decrypt, \_gpgme\_gpg\_op\_edit, \_gpgme\_gpg\_op\_encrypt, \_gpgme\_gpg\_op\_encrypt\_sign, \_gpgme\_gpg\_op\_export, \_gpgme\_gpg\_op\_genkey, \_gpgme\_gpg\_op\_import, \_gpgme\_gpg\_op\_sign,

\_gpgme\_gpg\_op\_verify): Add new argument to \_gpgme\_gpg\_add\_data invocation.

(build\_argv): Use new member INBOUND to determine direction of file descriptor. Don't check the data type.

\* runpgp.h (\_gpgme\_gpg\_add\_data): Add new argument to prototype.

\* gpgme.c (gpgme\_get\_op\_info): Don't call \_gpgme\_data\_get\_as\_string if CTX->op\_info is NULL.

\* version.c (gpgme\_check\_engine): Function removed.

2002-09-30

Werner Koch <wk@gnupg.org>

\* keylist.c (keylist\_colon\_handler): Take care when printing a NULL with the DEBUG.

\* engine-gpgsm.c (struct gpgsm\_object\_s): New member ANY.  
(gpgsm\_status\_handler): Run the colon function to indicate EOF.  
(\_gpgme\_gpgsm\_set\_colon\_line\_handler): Better reset ANY here.

2002-09-28 Marcus Brinkmann <marcus@g10code.de>

\* conversion.c (\_gpgme\_hextobyte): Prevent superfluous multiplication with base. Reported by Stphane Corthsy.

\* keylist.c (gpgme\_op\_keylist\_ext\_start): Use private asynchronous operation type in invocation of \_gpgme\_op\_reset.

2002-09-20 Werner Koch <wk@gnupg.org>

\* ath.c: Include sys/time.h if sys/select.h is not available.

2002-09-13 Marcus Brinkmann <marcus@g10code.de>

\* keylist.c (keylist\_status\_handler): Do not call finish\_key() here.  
(gpgme\_op\_keylist\_ext\_start): Set CTX->tmp\_key to NULL.

2002-09-03 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (assuan\_libobjs): Remove @LTLIBOBJ@ as we link them into gpgme unconditionally.  
(libgpgme\_la\_LIBADD): Change @LIBOBJ@ into @LTLIBOBJ@.

2002-09-02 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (assuan\_libobjs): Use @LTLIBOBJ@ instead @LIBOBJ@.

2002-09-02 Marcus Brinkmann <marcus@g10code.de>

\* debug.c (\_gpgme\_debug\_add): Test \*LINE, not LINE.  
(\_gpgme\_debug\_end): Likewise.  
Reported by Dr. Stefan Dalibor <Dr.Stefan.Dalibor@bfa.de>.

2002-09-02 Marcus Brinkmann <marcus@g10code.de>

\* posix-io.c (\_gpgme\_io\_select): Don't use a non-constant struct  
initializer.  
\* version.c (\_gpgme\_get\_program\_version): Likewise.  
Reported by Dr. Stefan Dalibor <Dr.Stefan.Dalibor@bfa.de>.

2002-09-02 Marcus Brinkmann <marcus@g10code.de>

\* conversion.c (\_gpgme\_decode\_c\_string): Set DESTP before  
modifying DEST.  
  
\* conversion.c (\_gpgme\_decode\_c\_string): Fix off by one error in  
last change.  
\* runpg.c (\_gpgme\_append\_gpg\_args\_from\_signers): Move before  
\_gpgme\_op\_edit so its prototype is known early on.  
  
\* conversion.c: New  
file.  
\* util.h: Add prototypes for \_gpgme\_decode\_c\_string and  
\_gpgme\_hextobyte.  
\* keylist.c (keylist\_colon\_handler): Call \_gpgme\_decode\_c\_string  
on issuer name.  
\* Makefile.am (libgpgme\_la\_SOURCES): Add conversion.c  
\* key.c (\_gpgme\_key\_append\_name): Replace calls to hextobyte by  
calls to \_gpgme\_hextobyte.  
(hash\_key): Likewise.

2002-09-01 Marcus Brinkmann <marcus@g10code.de>

\* op-support.c (\_gpgme\_op\_reset): Set CTX->pending after calling  
\_gpgme\_engine\_release, as this will reset pending to zero in the  
event done callback on cancelled operations.

2002-08-30 Marcus Brinkmann <marcus@g10code.de>

\* runpg.c (\_gpgme\_gpg\_op\_edit): Add args from signers.  
Suggested by Miguel Coca <e970095@zipi.fi.upm.es>.  
  
\* runpg.c (\_gpgme\_gpg\_op\_edit): Add bogus ctx argument.  
\* runpg.h: Also to prototype.

\* engine.c (\_gpgme\_engine\_op\_edit): Likewise.

\* engine.h: Likewise.

\* edit.c (\_gpgme\_op\_edit\_start): Likewise.

2002-08-29 Werner Koch <wk@gnupg.org>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_sign):

Implement signer

selection.

\* vasprintf.c (va\_copy): Define macro if not yet defined.

2002-08-29 Marcus Brinkmann <marcus@g10code.de>

\* passphrase.c (\_gpgme\_passphrase\_status\_handler): Reset

CTX->result.passphrase->no\_passphrase if passphrase is given (good or bad). Submitted by Jean DIRAISON <jean.diraison@free.fr>.

2002-08-28 Marcus Brinkmann <marcus@g10code.de>

\* posix-io.c (\_gpgme\_io\_spawn): Use a double-fork approach.

Return 0 on success, -1 on error.

\* version.c (\_gpgme\_get\_program\_version): Don't wait for the child.

\* engine.c (\_gpgme\_engine\_housecleaning): Function removed.

(do\_reaping): Likewise.

(\_gpgme\_engine\_add\_child\_to\_reap\_list): Likewise.

(struct reap\_s): Removed.

(reap\_list): Likewise.

(reap\_list\_lock): Likewise.

\* engine.h (\_gpgme\_engine\_io\_event): Remove prototypes for

\_gpgme\_engine\_housecleaning and  
\_gpgme\_engine\_add\_child\_to\_reap\_list.

\* runpg.c (\_gpgme\_gpg\_release): Don't add child to reap list.

(struct gpg\_object\_s): Remove

PID member.

(\_gpgme\_gpg\_new): Don't initialize GPG->pid.

(\_gpgme\_gpg\_spawn): Don't set GPG->pid.

\* wait.c (run\_idle): Removed.

(gpgme\_wait): Run idle\_function directly.

2002-08-21 Marcus Brinkmann <marcus@g10code.de>

\* encrypt-sign.c (encrypt\_sign\_status\_handler): Remove dead  
variables encrypt\_info and encrypt\_info\_len.

\* trustlist.c (gpgme\_op\_trustlist\_start): Set colon line handler.

\* posix-sema.c (sema\_fatal): Remove function.

All these reported by Stphane Corthsy.

2002-08-23 Werner Koch <wk@gnupg.org>

\* gpgme-config.in: Made --prefix work for --libs.

2002-08-21 Marcus Brinkmann <marcus@g10code.de>

\* ath.h: Update list of symbols that get a prefix: Rename the ath\_mutex\_\*\_available symbols to ath\_\*\_available.

2002-08-21 Marcus Brinkmann <marcus@g10code.de>

\* stpcpy.c: New file from gnulib.  
\* Makefile.am (assuan\_libobjs): Remove jnlib.

2002-08-20 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h: Add prototype for gpgme\_op\_import\_ext.  
\* import.c  
(struct import\_result\_s): New member `nr\_considered'.  
Rename `any\_imported' to `nr\_imported'.  
(import\_status\_handler): Increment nr\_imported. Set nr\_considered if appropriate.  
(gpgme\_op\_import\_ext): New function.  
(gpgme\_op\_import): Implement in terms of gpgme\_op\_import\_ext.

2002-08-20 Werner Koch <wk@gnupg.org>

\* gpgme.m4: Replaced with a new and faster version. This does not anymore try to build test programs. If we really need test programs, we should add an option to gpgme-config to do so.

\* vasprintf.c (int\_vasprintf): Hack to handle NULL passed for %s.

2002-08-20 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.c (\_gpgme\_set\_op\_info): Append data on subsequent calls.  
\* encrypt-sign.c (encrypt\_sign\_status\_handler): Remove op\_info handling.

2002-08-19 Werner Koch <wk@gnupg.org>

\* decrypt.c (is\_token, skip\_token): Duplicated from verify.c  
(gpgme\_op\_decrypt): Hack to properly return Decryption\_Failed..  
(\_gpgme\_decrypt\_status\_handler): Create an operation info.

2002-08-14

Werner Koch <wk@gnupg.org>

\* key.h (struct certsig\_s): New. Use it in gpgme\_key\_s.

\* key.c (gpgme\_key\_release): Release it. We need to add more code of course.  
(\_gpgme\_key\_append\_name): Use memset to initialize the struct.  
\* gpgme.h (GPGME\_KEYLIST\_MODE\_SIGS): New.  
\* runpgg.c (\_gpgme\_gpg\_op\_keylist): Include sigs in listing depending non the list mode.

\* key.c (gpgme\_key\_get\_string\_attr): Use GPGME\_ATTR\_TYPE to return information about the key type (PGP or X.509).  
(gpgme\_key\_get\_ulong\_attr): Likewise.

\* keylist.c (keylist\_colon\_handler): Include 1 in the check for valid algorithms so that RSA is usable. Store the issuer name and serial number also for "crs" records. Parse the expire date for subkeys.  
(set\_userid\_flags): Put them onto the last appended key.

2002-07-29 Marcus Brinkmann <marcus@g10code.de>

\* runpgg.c (\_gpgme\_gpg\_op\_edit): Use --with-colons.

2002-07-28 Marcus Brinkmann <marcus@g10code.de>

\* data.c (gpgme\_data\_read): For GPGME\_DATA\_TYPE\_NONE, return EOF instead an error.

The following changes make it possible to flush an inbound data pipe before invoking a command handler:

\* posix-io.c (\_gpgme\_io\_select): Accept new argument NONBLOCK to \_gpgme\_io\_select. Set timeout of 0 if this is set.  
\* w32-io.c (\_gpgme\_io\_select): Likewise.  
\* io.h: Add new argument NONBLOCK to \_gpgme\_io\_select prototype.  
\* wait.c (do\_select): Add new argument to \_gpgme\_io\_select invocation.  
\* runpgg.h (\_gpgme\_gpg\_set\_command\_handler): Add new argument linked\_data to prototype.  
\* engine.h (\_gpgme\_engine\_set\_command\_handler): Likewise.  
\* engine.c (\_gpgme\_engine\_set\_command\_handler): Likewise.  
\* passphrase.c (\_gpgme\_passphrase\_start): Pass NULL as linked\_data argument to \_gpgme\_engine\_set\_command\_handler.  
\* runpgg.c (struct gpg\_object\_s): New members linked\_data and linked\_idx in CMD.  
(\_gpgme\_gpg\_new): Initialize those new members.  
(\_gpgme\_gpg\_set\_command\_handler): Accept new argument linked\_data.  
(build\_argv): Handle linked\_data

in the same hack as `cb_data`.

(`read_status`): If `linked_data` is in use, flush the pipe before activating the command handler.

\* `gpgme.h`: Add prototypes for `gpgme_op_edit_start` and `gpgme_op_edit`.

The next changes export the status codes to the user:

\* `decrypt.c` (`_gpgme_decrypt_status_handler`): Likewise, also prefix all `STATUS_` with `GPGME_`.

\* `delete.c` (`delete_status_handler`): Likewise.

\* `decrypt-verify.c` (`decrypt_verify_status_handler`): Likewise.

\* `encrypt.c` (`_gpgme_encrypt_status_handler`): Likewise.

(`_gpgme_encrypt_sym_status_handler`): Likewise.

\* `encrypt-sign.c` (`encrypt_sign_status_handler`): Likewise.

\* `engine-gpgsm.c` (`parse_status`): Likewise.

(`gpgsm_status_handler`): Likewise.

(`gpgsm_set_recipients`): Likewise.

\* `export.c` (`export_status_handler`): Likewise.

\* `genkey.c` (`genkey_status_handler`): Likewise.

\* `import.c` (`append_xml_impinfo`): Likewise.

(`import_status_handler`): Likewise.

\* `keylist.c` (`keylist_status_handler`): Likewise.

\* `passphrase.c` (`_gpgme_passphrase_status_handler`):

Likewise.

(`command_handler`): Likewise.

\* `progress.c` (`_gpgme_progress_status_handler`): Likewise.

\* `sign.c` (`_gpgme_sign_status_handler`): Likewise.

\* `trustlist.c` (`trustlist_status_handler`): Likewise.

\* `verify.c` (`_gpgme_verify_status_handler`): Likewise.

\* `gpgme.h` (`GpgmeEditCb`): New type.

\* `rungpg.h` (`GpgStatusCode`): Rename and move to ...

\* `gpgme.h` (`GpgmeStatusCode`): ... this and here.

\* `Makefile.am` (`status-table.h`): Run `mkstatus` on `gpgme.h`, not `rungpg.h`.

\* `mkstatus`: Prefix `STATUS` with `GPGME_`.

\* `rungpg.h` (`GpgStatusHandler`, `GpgCommandHandler`): Change type accordingly.

\* `ops.h` (`_gpgme_verify_status_handler`,  
`_gpgme_decrypt_status_handler`, `_gpgme_sign_status_handler`,  
`_gpgme_encrypt_status_handler`, `_gpgme_passphrase_status_handler`,  
`_gpgme_progress_status_handler`): Likewise.

\* `rungpg.c` (`struct gpg_object_s`): Likewise for `CMD.code`.

These changes add an edit operation to GPGME:

\* `context.h` (`struct gpgme_context_s`): New member `RESULT.edit`. \*

`ops.h`: Add prototype

for `_gpgme_release_edit_result` and  
`_gpgme_passphrase_command_handler`.  
\* `passphrase.c` (`command_handler`): Make non-static and rename to ...  
(`_gpgme_passphrase_command_handler`): ... this.  
(`_gpgme_passphrase_start`): Use new name for command handler.  
\* `types.h`: Add `EditResult` type.  
\* `gpgme.c` (`_gpgme_release_result`): Release EDIT result.  
\* `edit.c`: New file.  
\* `Makefile.am` (`libgpgme_la_SOURCES`): Add `edit.c`.  
(`libgpgme_la_LDADD`): Rename to `libgpgme_la_LIBADD`, and include  
`assuan_libobjs`.  
(`assuan_libobjs`): New variable, set this instead  
`libgpgme_la_LIBADD`.  
\* `engine.h` (`_gpgme_engine_op_edit`): New prototype.  
\* `engine.c` (`_gpgme_engine_op_edit`): New function.  
\* `rungpg.h` (`_gpgme_gpg_op_edit`): New prototype.  
\* `rungpg.c` (`_gpgme_gpg_op_edit`): New function.

2002-07-27 Marcus Brinkmann <marcus@g10code.de>

\* `delete.c` (`delete_problem`): New case ambiguous specification.  
(`delete_status_handler`): Handle new case (poorly).

2002-07-25 Marcus Brinkmann <marcus@g10code.de>

\* `engine-gpgsm.c`  
(`_gpgme_gpgsm_op_delete`): Implement this.

2002-07-25 Marcus Brinkmann <marcus@g10code.de>

\* `Makefile.am` (`libgpgme_la_LDADD`): Add `@LIBOBJS@` for `vasprintf` and  
`fopencookie`.  
\* `vasprintf.c`: Update to more recent `libiberty` version.  
\* `debug.h`: Replace `#elif` with `#elif`.

Submitted by Stphane Corthsy:

\* `util.h` (`vasprintf`): Correct prototype.  
\* `encrypt-sign.c`: Include `<stddef.h>`.  
(`encrypt_sign_status_handler`): Change type of `ENCRYPT_INFO_LEN` to  
`size_t`.  
\* `ath-pthread.c`: Include `<stdlib.h>`, not `<malloc.h>`.  
\* `ath-pth.c`: Likewise.

2002-07-25 Marcus Brinkmann <marcus@g10code.de>

\* `wait.c` (`fdt_global`): Make static. Reported by Stphane  
Corthsy.

- \* `rungpg.c` (`_gpgme_gpg_op_keylist_ext`): Skip empty string patterns. Reported by Stphane Corthsy.
- \* `key.c` (`gpgme_key_get_as_xml`): Add OTRUST attribute. Requested by Stphane Corthsy.
- (`gpgme_key_get_string_attr`): Add GPGME\_ATTR\_SIG\_SUMMARY case to silence gcc warning.
- \* `rungpg.c` (`_gpgme_gpg_new`): Always set utf8 as charset.

2002-07-03

Marcus Brinkmann <marcus@g10code.de>

- \* `gpgme.c` (`gpgme_set_io_cbs`): Deal with CTX being NULL.
- \* `gpgme.c` (`_gpgme_op_event_cb_user`): New function.
- \* `op-support.c` (`_gpgme_op_reset`): Support a new mode of operation for private or user event loop. Use new user event callback wrapper.
- \* `trustlist.c` (`gpgme_op_trustlist_start`): Use this new mode.
- \* `keylist.c` (`gpgme_op_keylist_start`): Likewise.
- \* `rungpg.c` (`_gpgme_gpg_io_event`): New function.
- \* `rungpg.h` (`_gpgme_gpg_io_event`): New prototype.
- \* `engine-gpgsm.c` (`_gpgme_gpg_io_event`): New function.
- \* `engine-gpgsm.h` (`_gpgme_gpgsm_io_event`): New prototype.
- \* `engine.c` (`_gpgme_engine_io_event`): New function.
- \* `engine.h` (`_gpgme_engine_io_event`): New prototype.
- \* `keylist.c` (`finish_key`): Call `_gpgme_engine_io_event`, and move the real work for the default IO callback routines to ...
- (`_gpgme_op_keylist_event_cb`): ... here. New function.
- \* `trustlist.c` (`trustlist_colon_handler`): Signal GPGME\_EVENT\_NEXT\_TRUSTITEM. Move queue manipulation to ...
- (`_gpgme_op_trustlist_event_cb`): ... here. New function.
- \* `gpgme.c` (`_gpgme_op_event_cb`): Call `_gpgme_op_keylist_event_cb` and `_gpgme_op_trustlist_event_cb` when appropriate.
- \* `ops.h` (`_gpgme_op_keylist_event_cb`): New prototype.
- (`_gpgme_op_trustlist_event_cb`): Likewise.
- \* `op-support.c` (`_gpgme_op_reset`): Add comment why we don't use the user provided event handler directly.
- \* `gpgme.h` (`GpgmeRegisterIOCb`): Return `GpgmeError` value, and TAG in a pointer argument.
- \* `wait.c` (`_gpgme_add_io_cb`): Likewise.
- \* `wait.h` (`_gpgme_add_io_cb`): Likewise for prototype.
- \* `rungpg.c` (`_gpgme_gpg_add_io_cb`): Call `IO_CBS->add` with new argument. Fix up error handling.
- \* `engine-gpgsm.c` (`_gpgme_gpgsm_add_io_cb`): Call `IO_CBS->add` with

new argument, fix up error handling.

2002-07-03 Werner Koch <wk@gnupg.org>

\* encrypt.c (status\_handler\_finish): New.  
(\_gpgme\_encrypt\_status\_handler): Moved some code out to the new  
function and call this function also in case we get into the  
status  
handler with an error which might happen due to a kludge in  
engine-gpgsm.c

2002-06-28 Marcus Brinkmann <marcus@g10code.de>

\* keylist.c (gpgme\_op\_keylist\_ext\_start): Always use our own FD  
table (eg use synchronous mode).

2002-06-27 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h: Fix documentation of key attribute retrieval functions.

2002-06-28 Marcus Brinkmann <marcus@g10code.de>

\* ops.h (\_gpgme\_wait\_on\_condition): Remove HANG argument from  
prototype and change return type to GpgmeError.  
(\_gpgme\_wait\_one): New prototype.  
\* wait.c (gpgme\_wait): Replace with the meat from  
\_gpgme\_wait\_on\_condition here, and remove the support for  
conditions.  
(\_gpgme\_wait\_on\_condition): Remove HANG argument from prototype  
and change return type to GpgmeError. Replace with meat from  
\_gpgme\_wait\_one and add support for conditions.  
(\_gpgme\_wait\_one): Just call \_gpgme\_wait\_on\_condition without  
condition.  
\* keylist.c (gpgme\_op\_keylist\_ext\_start): Always use our own FD  
table (eg  
use synchronous mode).  
(gpgme\_op\_keylist\_next): Remove HANG argument from  
\_gpgme\_wait\_on\_condition. Check its return value.  
\* trustlist.c (gpgme\_op\_trustlist\_start): Always use our own FD  
table (eg use synchronous mode).  
(gpgme\_op\_trustlist\_next): Remove HANG argument from  
\_gpgme\_wait\_on\_condition. Check its return value.

2002-06-26 Werner Koch <wk@gnupg.org>

\* engine-gpgsm.c (map\_assuan\_error): Map No\_Data\_Available to EOF.

\* import.c (append\_xml\_impinfo): Kludge to print fingerprint

instead of keyid for use with gpgsm.

(import\_status\_handler): Set a flag to know whether any import occurred.

(gpgme\_op\_import): Return -1 if no certificate was imported.

2002-06-25 Werner Koch <wk@gnupg.org>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_set\_io\_cbs) [ENABLE\_GPGSM]: Fixed function arguments.

2002-06-25 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_export): Only export the keys listed in RECP.

\* export.c (gpgme\_op\_export): If no data was returned, return GPGME\_No\_Recipients.

2002-06-25 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_export): Implement.

2002-06-21 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (gpgsm\_assuan\_simple\_command): Return ERR.

(parse\_status): New function.

(gpgsm\_status\_handler): Use parse\_status.

(gpgsm\_assuan\_simple\_command): Accept new arguments STATUS\_FNC and STATUS\_FNC\_VALUE and process status messages.

(gpgsm\_set\_recipients): Pass new arguments to gpgsm\_assuan\_simple\_command.

(gpgsm\_set\_fd): Likewise.

(\_gpgme\_gpgsm\_op\_keylist): Likewise.

(\_gpgme\_gpgsm\_op\_keylist\_ext): Likewise.

(\_gpgme\_gpgsm\_op\_sign): Likewise.

2002-06-21 Marcus Brinkmann <marcus@g10code.de>

\* wait.c (\_gpgme\_remove\_io\_cb): Unlock FDT->lock.

2002-06-20 Werner Koch <wk@gnupg.org>

\* runpg.c (build\_argv): Ignore GPG\_AGENT\_INFO if set but empty.

\* verify.c (calc\_sig\_summary): Set bad policy for wrong key usage.

(skip\_token): New.

(\_gpgme\_verify\_status\_handler): Watch out for wrong key usage.

(gpgme\_get\_sig\_string\_attr): Hack to return info on the key

usage. Does now make use of the former RESERVED argument which has been renamed to WHATIDX.

(gpgme\_get\_sig\_ulong\_attr): Renamed RESERVED to WHATIDX.

2002-06-14 Marcus Brinkmann <marcus@g10code.de>

\* wait.c (do\_select): Return -1 on error, and 0 if nothing to run.

(\_gpgme\_wait\_one): Only set HANG to zero if do\_select returned an error, or there are no more file descriptors to wait on.

(\_gpgme\_wait\_on\_condition): Ignore return value from do\_select for now.

2002-06-13 Werner Koch <wk@gnupg.org>

\* verify.c (gpgme\_op\_verify): Make sure that we never access an uninitialized result structure.

2002-06-12 Werner Koch <wk@gnupg.org>

\* keylist.c (struct keylist\_result\_s): New.

(\_gpgme\_release\_keylist\_result): Release it here

(keylist\_status\_handler): Handle truncated.

(append\_xml\_keylistinfo): New.

\* gpgme.c (\_gpgme\_release\_result): and use it here.

\* types.h: Declare the new type here.

\*

context.h (struct gpgme\_context\_s): Use it here.

2002-06-11 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_release): Close status\_cb.fd.

(\_gpgme\_gpgsm\_new): Duplicate status file descriptor, so we can use our own close notification mechanism without interfering with assuan.

2002-06-11 Werner Koch <wk@gnupg.org>

\* gpgme.h: Add GPGME\_ATTR\_SIG\_SUMMARY and the GPGME\_SIGSUM\_ constants.

\* verify.c (calc\_sig\_summary): New.

(gpgme\_get\_sig\_ulong\_attr): And use it here.

2002-06-10 Werner Koch <wk@gnupg.org>

\* runpg.h: Add new status codes TRUNCATED and ERROR.

\* verify.c (is\_token, copy\_token): New.

(\_gpgme\_verify\_status\_handler): Use copy\_token, handle the new ERROR status and store the errorcode used withgpgsm and trust

status codes.

\* gpgme.h: New attribute ERR TOK.

\* key.c (gpgme\_key\_get\_string\_attr): Add dummy case for it.

(gpgme\_get\_sig\_string\_attr): Use it here to return the last error.

2002-06-10 Marcus Brinkmann <marcus@g10code.de>

\*

engine-gpgsm.c (\_gpgme\_gpgsm\_start): Move the code that sets the close notification for the status fd to ...

(\_gpgme\_gpgsm\_new): ... here.

\* wait.h: Include "sema.h". Remove prototypes of

\_gpgme\_remove\_proc\_from\_wait\_queue and

\_gpgme\_register\_pipe\_handler. Add prototypes of

\_gpgme\_fd\_table\_init, \_gpgme\_fd\_table\_deinit, \_gpgme\_fd\_table\_put,

\_gpgme\_add\_io\_cb, \_gpgme\_remove\_io\_cb, \_gpgme\_wait\_event\_cb and

\_gpgme\_wait\_one..

\* wait.c: Remove global variables PROC\_QUEUE, PROC\_QUEUE\_LOCK,

FD\_TABLE\_SIZE, FD\_TABLE, FD\_TABLE\_LOCK. New global variables

FDT\_GLOBAL, CTX\_DONE\_LIST, CTX\_DONE\_LIST\_SIZE,

CTX\_DONE\_LIST\_LENGTH and CTX\_DONE\_LIST\_LOCK. Remove struct

proc\_s. Replace struct wait\_item\_s.

(\_gpgme\_fd\_table\_init): New function.

(\_gpgme\_fd\_table\_deinit): Likewise.

(\_gpgme\_fd\_table\_put): Likewise.

(set\_process\_done): Remove function.

(do\_select): Take argument FDT. Use that to decide which fds to select on.

(\_gpgme\_remove\_proc\_from\_wait\_queue): Remove function.

(\_gpgme\_wait\_event\_cb):

New function.

(\_gpgme\_wait\_one): Likewise.

(\_gpgme\_register\_pipe\_handler): Remove function.

(\_gpgme\_add\_io\_cb): New function.

(\_gpgme\_remove\_io\_cb): Likewise.

(\_gpgme\_freeze\_fd): Remove function.

(\_gpgme\_thaw\_fd): Remove function.

\* runpg.c (struct fd\_data\_map\_s): Add new member TAG.

(struct gpg\_object\_s): Likewise for STATUS and COLON. Add member

IDX to CMD. Add new member IO\_CBS.

(close\_notify\_handler): New variables POSSIBLY\_DONE and NOT\_DONE.

For each I/O callback, check if it should be unregistered. If all

callbacks have been unregistered, trigger GPGME\_EVENT\_DONE.

Remove member RUNNING.

(\_gpgme\_gpg\_new): Initialize new members.

(\_gpgme\_gpg\_release): Check PID not RUNNING. Don't call

\_gpgme\_remove\_proc\_from\_wait\_queue. Close GPG->CMD.FD if set.

(build\_argv): Store away the index instead the file descriptor for

CMD.

(`_gpgme_gpg_add_io_cb`): New function.

(`_gpgme_gpg_spawn`): Use `_gpgme_gpg_add_io_cb` to register IO callbacks.

(`gpg_status_handler`):

Change return type to void, remove PID argument, close filedescriptor if EOF or error occurs.

(`read_status`): Use `_gpgme_gpg_add_io_cb` instead `_gpgme_thaw_fd`. Use `IO_CBS->remove` instead `_gpgme_freeze_fd`.

(`gpg_colon_line_handler`): Change return type to void, remove PID argument, close filedescriptor if EOF or error occurs.

(`command_cb`): Use `IO_CBS->remove` instead `_gpgme_freeze_fd`.

(`_gpgme_gpg_set_io_cbs`): New function.

\* `runpg.h` (`_gpgme_gpg_set_io_cbs`): Prototype for `_gpgme_gpg_set_io_cbs`.

\* `gpgme.h` (`GpgmeIOCb`): New type.

(`GpgmeRegisterIOCb`): Likewise.

(`GpgmeRemoveIOCb`): Likewise.

(`GpgmeEventIO`): Likewise.

(`GpgmeEventIOCb`): Likewise.

(`struct GpgmeIOCs`): New structure to hold I/O callbacks.

(`gpgme_set_op_io_cbs`): New prototype.

(`gpgme_get_op_io_cbs`): Likewise.

\* `ops.h`: New prototype for `_gpgme_op_event_cb`. Remove prototypes for `_gpgme_freeze_fd` and `_gpgme_thaw_fd`. Remove PID argument from `_gpgme_data_inbound_handler` and `_gpgme_data_outbound_handler` prototype.

Add prototype for `_gpgme_op_reset`.

Add synchronous argument to `_gpgme_decrypt_start` prototype.

\* `io.h`: Beautification.

\* `gpgme.c`: Include "wait.h".

(`gpgme_new`): Initialize FDT.

(`gpgme_set_io_cbs`): New function.

(`gpgme_get_io_cbs`): Likewise.

(`_gpgme_op_event_cb`): Likewise.

\* `data.c` (`_gpgme_data_inbound_handler`): Change return type to void. Drop PID argument. Close FD on error and EOF.

(`write_mem_data`): Don't close FD here ...

(`write_cb_data`): ... or here ...

(`_gpgme_data_outbound_handler`): ... but here. Change return type to void. Drop PID argument.

\* `context.h`: Include "wait.h".

(`struct gpgme_context_s`): New members FDT and `IO_CBS`.

\* `op-support.c`: New file.

\* `Makefile.am` (`libgpgme_la_SOURCES`): Add `op-support.c`.

\* `ops.h`: Add prototype for `_gpgme_op_reset()`.

\* `decrypt.c` (`_gpgme_decrypt_start`): New argument `SYNCHRONOUS`. Use `_gpgme_op_reset`.

(gpgme\_op\_decrypt\_start): Add synchronous argument.  
(gpgme\_op\_decrypt): Likewise. Use `_gpgme_wait_one` instead  
`gpgme_wait`.  
\*  
delete.c (gpgme\_op\_delete\_start): Rename to ...  
(`_gpgme_op_delete_start`): ... this. New argument SYNCHRONOUS.  
Use `_gpgme_op_reset`. Make function static.  
(gpgme\_op\_delete\_start): Just a wrapper around  
`_gpgme_op_delete_start` now.  
(gpgme\_op\_delete): Add synchronous argument. Use `_gpgme_wait_one`  
instead `gpgme_wait`.  
\* encrypt.c: Include "wait.h".  
(gpgme\_op\_encrypt\_start): Rename to ...  
(`_gpgme_op_encrypt_start`): ... this. New argument SYNCHRONOUS.  
Use `_gpgme_op_reset`. Make function static.  
(gpgme\_op\_encrypt\_start): Just a wrapper around  
`_gpgme_op_encrypt_start` now.  
(gpgme\_op\_encrypt): Add synchronous argument. Use `_gpgme_wait_one`  
instead `gpgme_wait`.  
\* encrypt\_sign.c (gpgme\_op\_encrypt\_sign\_start): Rename to ...  
(`_gpgme_op_encrypt_sign_start`): ... this. New argument  
SYNCHRONOUS. Use `_gpgme_op_reset`. Make function static.  
(gpgme\_op\_encrypt\_sign\_start): Just a wrapper around  
`_gpgme_op_encrypt_sign_start` now.  
(gpgme\_op\_encrypt\_sign): Add synchronous argument.  
Use  
`_gpgme_wait_one` instead `gpgme_wait`.  
\* export.c (gpgme\_op\_export\_start): Rename to ...  
(`_gpgme_op_export_start`): ... this. New argument SYNCHRONOUS.  
Use `_gpgme_op_reset`. Make function static.  
(gpgme\_op\_export\_start): Just a wrapper around  
`_gpgme_op_export_start` now.  
(gpgme\_op\_export): Add synchronous argument. Use `_gpgme_wait_one`  
instead `gpgme_wait`.  
\* genkey.c (gpgme\_op\_genkey\_start): Rename to ...  
(`_gpgme_op_genkey_start`): ... this. New argument SYNCHRONOUS.  
Use `_gpgme_op_reset`. Make function static.  
(gpgme\_op\_genkey\_start): Just a wrapper around  
`_gpgme_op_genkey_start` now.  
(gpgme\_op\_genkey): Add synchronous argument. Use `_gpgme_wait_one`  
instead `gpgme_wait`.  
\* import.c (gpgme\_op\_import\_start): Rename to ...  
(`_gpgme_op_import_start`): ... this. New argument SYNCHRONOUS.  
Use `_gpgme_op_reset`. Make function static.  
(gpgme\_op\_import\_start): Just a wrapper around  
`_gpgme_op_import_start` now.  
(gpgme\_op\_import): Add synchronous argument. Use `_gpgme_wait_one`  
instead

gpgme\_wait.  
\* keylist.c (gpgme\_op\_keylist\_start): Use \_gpgme\_op\_reset.  
(gpgme\_op\_keylist\_ext\_start): Likewise.  
\* sign.c (gpgme\_op\_sign\_start): Rename to ...  
(\_gpgme\_op\_sign\_start): ... this. New argument SYNCHRONOUS. Use \_gpgme\_op\_reset. Make function static.  
(gpgme\_op\_sign\_start): Just a wrapper around \_gpgme\_op\_sign\_start now.  
(gpgme\_op\_sign): Add synchronous argument. Use \_gpgme\_wait\_one instead gpgme\_wait.  
\* trustlist.c (gpgme\_op\_trustlist\_start): Use \_gpgme\_op\_reset.  
\* verify.c (gpgme\_op\_verify\_start): Rename to ...  
(\_gpgme\_op\_verify\_start): ... this. New argument SYNCHRONOUS. Use \_gpgme\_op\_reset. Make function static.  
(gpgme\_op\_verify\_start): Just a wrapper around \_gpgme\_op\_verify\_start now.  
(gpgme\_op\_verify): Add synchronous argument. Use \_gpgme\_wait\_one instead gpgme\_wait.  
\* engine-gpgsm.c (iocb\_data\_t): New type.  
(struct gpgsm\_object\_s): New member status\_cb. Replace input\_fd and input\_data with input\_cb. Replace output\_fd and output\_data with output\_cb. Replace message\_fd and message\_data with message\_cb. New member io\_cbs.  
(\_gpgme\_gpgsm\_new): Initialize all new members (and drop the old ones).  
(close\_notify\_handler): New variable POSSIBLY\_DONE. For each I/O callback, check if it should be unregistered. If all callbacks have been unregistered, trigger GPGME\_EVENT\_DONE.  
(\_gpgme\_gpgsm\_release): Remove variable PID. Use new variable names to close the file descriptors.  
(\_gpgme\_gpgsm\_op\_decrypt): Use new variable names,  
(\_gpgme\_gpgsm\_op\_encrypt): Likewise.  
(\_gpgme\_gpgsm\_op\_genkey): Likewise.  
(\_gpgme\_gpgsm\_op\_import): Likewise.  
(\_gpgme\_gpgsm\_op\_keylist): Likewise.  
(\_gpgme\_gpgsm\_op\_keylist\_ext): Likewise.  
(\_gpgme\_gpgsm\_op\_sign): Likewise.  
(\_gpgme\_gpgsm\_op\_verify): Likewise.  
(gpgsm\_status\_handler): Drop argument PID. Change return type to void. Close status pipe before returning because of EOF or error.  
(\_gpgme\_gpgsm\_add\_io\_cb): New function.  
(\_gpgme\_gpgsm\_start): Use \_gpgme\_gpgsm\_add\_io\_cb to register callback function.  
(\_gpgme\_gpgsm\_set\_io\_cbs): New function.  
\* engine-gpgsm.h: New prototype for \_gpgme\_gpgsm\_set\_io\_cbs.  
\* engine.c (\_gpgme\_engine\_set\_io\_cbs): New function.

\* engine.h: New prototype for \_gpgme\_engine\_set\_io\_cbs.

2002-06-04 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (libgpgme\_la\_SOURCES): Remove mutex.h.

2002-06-03 Marcus Brinkmann <marcus@g10code.de>

\* key.c: Include <ctype.h>.

(\_gpgme\_key\_append\_name): Skip one more char when processing escaped char. Submitted by Marc Mutz <mutz@kde.org>. Handle hexadecimal encodings. Also reported by Marc. Thanks!

2002-06-02 Marcus Brinkmann <marcus@g10code.de>

\* ath.h: Enable the \_gpgme\_prefix. Fix all those prefix macros.

\* posix-sema.c: Use that prefix here.

\* posix-io.c: Include "ath.h".

(\_gpgme\_io\_read): Use \_gpgme\_ath\_read instead read.

(\_gpgme\_io\_write): Use \_gpgme\_ath\_write instead write.

(\_gpgme\_io\_waitpid): Use \_gpgme\_ath\_waitpid instead waitpid.

(\_gpgme\_io\_select): Use \_gpgme\_ath\_select instead select.

2002-06-02 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (ath\_components): New variable.

(ath\_components\_pthread): Likewise.

(ath\_components\_pth): Likewise.

(system\_components): Add ath\_componentes.

\* ath.h: New file.

\* ath.c: Likewise.

\* ath-pthread.c: Likewise.

\* ath-pth.c: Likewise.

\* posix-sema.c (\_gpgme\_sema\_cs\_enter): Rework to use the ATH interface.

\* mutex.h: Remove file.

2002-05-30 Werner Koch <wk@gnupg.org>

\* key.c (gpgme\_key\_get\_string\_attr): Return NULL when asking for an issuer with IDX > 0. We don't support altIssuerNames for now.

2002-05-22 Werner Koch <wk@gnupg.org>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_keylist\_ext): Aehmm, added missing variable definition. Oohh - Marcus was faster.

2002-05-22 Marcus Brinkmann <marcus@gnu.org>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_keylist\_ext): Fix last change.

2002-05-21 Werner Koch <wk@gnupg.org>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_keylist)  
(\_gpgme\_gpgsm\_op\_keylist\_ext):  
Pass the keylist mode to gpgsm.

2002-05-10 Werner Koch <wk@gnupg.org>

\* key.h (gpgme\_key\_s): Add OTRUST.  
\* keylist.c (set\_ownertrust): New.  
(keylist\_colon\_handler): Get the ownertrust value  
\* key.c (gpgme\_key\_get\_string\_attr, gpgme\_key\_get\_ulong\_attr):  
Return that value.

2002-05-08 Marcus Brinkmann <marcus@g10code.de>

\* w32-util.c: New static variable GET\_PATH\_LOCK.  
(\_gpgme\_get\_gpg\_path): Remove superfluous NULL initializer.  
Take lock while determining path.  
(\_gpgme\_get\_gpgsm\_path): Likewise.  
\* version.c (do\_subsystem\_inits): Set DONE to 1 after  
initialization.  
(gpgme\_get\_engine\_info): New variable ENGINE\_INFO\_LOCK. Take lock  
while determining engine info.  
\* runpg.c (\_gpgme\_gpg\_get\_version): New variable  
GPG\_VERSION\_LOCK. Take the lock while determining the program  
version.  
\* posix-io.c: Include "sema.h".  
(\_gpgme\_io\_spawn): New variable FIXED\_SIGNALS\_LOCK. Take the lock  
while fixing the signals.  
(\_gpgme\_io\_select): Make READFDS and WRITEFDS non-static.  
\*  
key.c: Include "sema.h". New globals KEY\_CACHE\_LOCK and  
KEY\_REF\_LOCK.  
(capabilities\_to\_string): Make STRINGS very const.  
(\_gpgme\_key\_cache\_add): Lock the key cache.  
(\_gpgme\_key\_cache\_get): Likewise.  
(gpgme\_key\_ref, gpgme\_key\_release): Lock the key\_ref\_lock.  
\* import.c (append\_xml\_impinfo): Make IMPORTED\_FIELDS and  
IMPORT\_RES\_FIELDS very const. Make FIELD and FIELD\_NAME a little  
const.  
\* engine.c (\_gpgme\_engine\_get\_info): New variable  
ENGINE\_INFO\_LOCK. Take lock while determining engine info.

\* engine-gpgsm.c: Include "sema.h".  
(\_gpgme\_gpgsm\_get\_version): New variable GPGSM\_VERSION\_LOCK. Take lock while getting program version.

2002-05-08 Marcus Brinkmann <marcus@g10code.de>

\* debug.h: New file.  
\* Makefile.am (libgpgme\_la\_SOURCES): Add debug.h.  
\* util.h: Removed all prototypes and declarations related to debugging. Include "debug.h".  
  
\* debug.c (debug\_level): Comment variable and remove superfluous zero initializer.  
(errfp): Likewise.  
(\_gpgme\_debug\_enabled):  
Function removed.  
(struct debug\_control\_s): Definition removed.  
(\_gpgme\_debug\_level): Function removed.  
(\_gpgme\_debug\_begin): Rewritten to use vasprintf. Accept a printf-style format specification and a variable number of arguments.  
(\_gpgme\_debug\_add): Rewritten using vasprintf. Expect that format starts out with "%s" for simplicity.  
(\_gpgme\_debug\_end): Rewritten using vasprintf. Do not accept a TEXT argument anymore.  
  
\* posix-io.c (\_gpgme\_io\_select): Use new level argument for DEBUG\_BEGIN instead explicit if construct.

\* debug.c (debug\_init): Remove superfluous zero initializer, remove volatile flag of INITIALIZED. Do not use the double-checked locking algorithm, it is fundamentally flawed and will empty your fridge (on a more serious note, despite the volatile flag it doesn't give you the guarantee you would expect, for example on a DEC Alpha or an SMP machine. The volatile only serializes accesses to the volatile variable, but not to the other variables).

2002-05-03

Werner Koch <wk@gnupg.org>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_new): Redirect any gpgsm error output to /dev/null.  
  
\* verify.c (gpgme\_get\_sig\_key): Set the protocol of the listctx.  
\* gpgme.c (gpgme\_get\_protocol): New.  
  
\* data.c (gpgme\_data\_write): Changed type of BUFFER to void\*.

(gpgme\_data\_read): Ditto.

\* verify.c (\_gpgme\_verify\_status\_handler): Handle TRUST\_\* status lines so that a claim can be made without looking up the key.

(gpgme\_get\_sig\_string\_attr): New.

(gpgme\_get\_sig\_ulong\_attr): New.

\* gpgme.h (GpgmeAttr): Added GPGME\_ATTR\_SIG\_STATUS.

\* runpgg.h: Add new status codes from gpg 1.0.7 and formatted the list to align with the status.h file from gnupg.

\* gpgme.h (GpgmeSigStat): Add \_GOOD\_EXP and \_GOOD\_EXPKEY.

\* verify.c (\_gpgme\_verify\_status\_handler, finish\_sig): Handle these new status codes. Store the expiration time

2002-04-27 Werner Koch <wk@gnupg.org>

\* gpgme.h (GpgmeData\_Encoding): New.

\* data.c (gpgme\_data\_get\_encoding, gpgme\_data\_set\_encoding): New.

\* engine-gpgsm.c (map\_input\_enc): New. Use it in all local functions where the INPUT command gets send.

2002-04-27 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_verify): Close the output descriptor only when we don't need it anymore. Close the message descriptor if we don't need it.

2002-04-26 Werner Koch <wk@gnupg.org>

\* Makefile.am (libgpgme\_la\_LIBADD): Use libtool libraries.

2002-04-25 Marcus Brinkmann <marcus@g10code.de>

\* runpgg.c (\_gpgme\_gpg\_release): Call gpgme\_data\_release on GPG->cmd.cb\_data, not xfree.

2002-04-25 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_new): Set the display, ttyname, ttytype, lc\_ctype and lc\_messages options in the server.

2002-04-24 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (map\_assuan\_error): Add new error codes.

2002-04-23 Werner Koch <wk@gnupg.org>

\* key.c (gpgme\_key\_get\_ulong\_attr): Swapped use of can\_encrypt and can\_certify to return the requested values.

2002-04-23 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.c (gpgme\_get\_progress\_cb): Allow either return parameter to be NULL.  
(gpgme\_get\_passphrase\_cb): Likewise.

2002-04-22 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.c (gpgme\_get\_passphrase\_cb): New function.  
(gpgme\_get\_progress\_cb): New function.  
\* gpgme.h: Add new prototypes for gpgme\_get\_passphrase\_cb and gpgme\_get\_progress\_cb.

2002-03-28 Werner Koch <wk@gnupg.org>

\* gpgme.h (GpgmeAttr): Add values for issuer and chaining.  
\* key.h (gpgme\_key\_s): Add issuer and chaining elements for X509.  
\* keylist.c (keylist\_colon\_handler): Store them.  
\* key.c (gpgme\_key\_release): Free them.  
(gpgme\_key\_get\_as\_xml, gpgme\_key\_get\_string\_attr): Print them.

2002-03-26 Werner Koch <wk@gnupg.org>

\* Makefile.am (libgpgme\_la\_SOURCES): Add mutex.h

2002-03-21 Werner Koch <wk@gnupg.org>

\* util.h [!HAVE\_FOPENCOOKIE]: Make sure off\_t and ssize\_t are defined.

2002-03-18 Marcus Brinkmann <marcus@g10code.de>

\*

Makefile.am (system\_components): New variable, set depending on HAVE\_DOSISH\_SYSTEM.  
(libgpgme\_la\_SOURCES): Use system\_components. Remove `syshdr.h'.  
\* syshdr.h: File removed.

\* posix-io.c: Remove !HAVE\_DOSISH\_SYSTEM safeguard. Clean up source.  
\* posix-sema.c: Likewise.  
\* posix-util.c: Likewise.

\* w32-io.c: Remove HAVE\_DOSISH\_SYSTEM safeguard.

\* w32-sema.c: Likewise.

\* w32-util.c: Likewise.

\* posix-io.c: Include `unistd.h', do not include `syshdr.h'.

\* posix-sema.c: Likewise.

\* w32-io.c: Include `io.h', do not include `syshdr.h'

\* w32-sema.c: Likewise.

\* w32-util.c: Likewise.

\* data.c: Do not include `syshdr.h'.

\* wait.c: Likewise.

\* wait.h: Code cleanup.

\* mutex.h: New file.

\* posix-sema.c: Implement.

2002-03-08 Werner Koch <wk@gnupg.org>

\* util.h [HAVE\_FOPENCOOKIE]: Fixed type. Thanks to Frank Heckenbach.

2002-03-07 Werner Koch <wk@gnupg.org>

\* gpgme.h (gpgme\_op\_keylist\_ext\_start): Add prototype.

2002-03-06 Marcus Brinkmann <marcus@g10code.de>

\*

encrypt.c (\_gpgme\_encrypt\_sym\_status\_handler): New function.

(gpgme\_op\_encrypt\_start): New variable SYMMETRIC, set it if RECP is null, and if it is set, use \_gpgme\_encrypt\_sym\_status\_handler as status handler and run \_gpgme\_passphrase\_start.

\* runpg.c (\_gpgme\_gpg\_op\_encrypt): If RECP is zero, do symmetric encryption.

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_encrypt): If RECP is zero, return error value.

\* runpg.c (\_gpgme\_gpg\_op\_verify): Add "--" argument.

2002-03-03 Marcus Brinkmann <marcus@g10code.de>

\* passphrase.c (\_gpgme\_passphrase\_status\_handler): Also set the error No\_Passphrase if only a bad passphrase was provided.

2002-03-03 Marcus Brinkmann <marcus@g10code.de>

\* runpg.c (\_gpgme\_gpg\_op\_verify): If TEXT is of mode GPGME\_DATA\_MODE\_IN, construct a command line that stores the plaintext in TEXT.

\* verify.c (gpgme\_op\_verify\_start): Accept TEXT being uninitialized, and in this case interpret SIG as a normal or cleartext signature and TEXT as a return data object.  
\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_verify): Likewise.

2002-03-03 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_keylist\_ext) [!ENABLE\_GPGSM]: Add stub function.

2002-02-28 Werner Koch <wk@gnupg.org>

\* key.h (subkey\_s): New member expires\_at.  
\* keylist.c (keylist\_colon\_handler): Set it here  
\* key.c (gpgme\_key\_get\_as\_xml, gpgme\_key\_get\_ulong\_attr): Return it.

2002-02-27 Marcus Brinkmann <marcus@g10code.de>

\* runpgg.h (\_gpgme\_gpg\_op\_keylist\_ext): New prototype.  
\* runpgg.c (\_gpgme\_gpg\_op\_keylist\_ext): New function.  
\* engine-gpgsm.h (\_gpgme\_gpgsm\_op\_keylist\_ext): New prototype.  
\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_keylist\_ext): New function.  
\* engine.h (\_gpgme\_engine\_op\_keylist\_ext): New prototype.  
\* engine.c (\_gpgme\_engine\_op\_keylist\_ext): New function.  
\* keylist.c (gpgme\_op\_keylist\_ext\_start): New function.

2002-02-27 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h: Add new error code GPGME\_Invalid\_Recipient.  
\* encrypt.c (struct encrypt\_result\_s): New member invalid\_recipients, rename no\_recipients to no\_valid\_recipients.  
(\_gpgme\_encrypt\_status\_handler): Include error for invalid recipients.  
\* engine-gpgsm.c (gpgsm\_set\_recipients): Change type of first argument to GpgsmObject. Use that to report back the status about the recipients.

2002-02-26 Marcus Brinkmann <marcus@g10code.de>

\* verify.c (\_gpgme\_verify\_status\_handler): Fix the last change.

2002-02-25 Marcus Brinkmann <marcus@g10code.de>

\* verify.c (\_gpgme\_verify\_status\_handler): Parse the args line to see if the problem is due to a missing key, and report that back to the user.

2002-02-25 Marcus Brinkmann <marcus@g10code.de>

- \* engine.c (\_gpgme\_engine\_op\_encrypt\_sign): New function.
- \* engine.h (\_gpgme\_engine\_op\_encrypt\_sign): New prototype.
- \* runpgg.c (\_gpgme\_append\_gpg\_args\_from\_signers): New function.
- (\_gpgme\_gpg\_op\_sign): Use that new function.
- (\_gpgme\_gpg\_op\_encrypt\_sign): New function.
- \* runpgg.h (\_gpgme\_gpg\_op\_encrypt\_sign):  
New prototype.
- \* gpgme.h (gpgme\_op\_encrypt\_sign\_start): New prototype.
- (gpgme\_op\_encrypt\_sign): Likewise.
- \* Makefile.am (libgpgme\_la\_SOURCES): Add encrypt-sign.c.
- \* ops.h (\_gpgme\_encrypt\_status\_handler): Add prototype.
- (\_gpgme\_sign\_status\_handler): Add prototype.
- \* sign.c (sign\_status\_handler): Rename to ...
- (\_gpgme\_sign\_status\_handler): ... this and make non-static.
- \* encrypt.c (encrypt\_status\_handler): Rename to ...
- (\_gpgme\_encrypt\_status\_handler): ... this and make non-static.
- \* encrypt.c (gpgme\_op\_encrypt\_start): Use new status handler name.
- \* sign.c (gpgme\_op\_sign\_start): Likewise.

2002-02-25 Marcus Brinkmann <marcus@g10code.de>

- \* context.h (struct gpgme\_context\_s): New member include\_certs.
- \* gpgme.h (gpgme\_set\_include\_certs): Add prototype.
- (gpgme\_get\_include\_certs): Likewise.
- \* gpgme.c (gpgme\_set\_include\_certs): New function.
- (gpgme\_get\_include\_certs): Likewise.
- (gpgme\_new): Set include\_certs to 1 (the default).
- \* engine.c (\_gpgme\_engine\_op\_sign): Accept  
new argument include\_certs,  
and pass it to \_gpgme\_gpgsm\_op\_sign.
- \* engine.h (\_gpgme\_engine\_op\_sign): Likewise for prototype.
- \* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_sign): Accept new argument  
include\_certs and handle it.
- \* engine-gpgsm.h (\_gpgme\_gpgsm\_start): Add new argument include\_certs.
- \* sign.c (gpgme\_op\_sign\_start): Add new argument to  
\_gpgme\_engine\_op\_sign call.

2002-02-14 Werner Koch <wk@gnupg.org>

- \* keylist.c (gpgme\_op\_keylist\_start): Do not use a verbose listing.

2002-02-13 Werner Koch <wk@gnupg.org>

- \* vasprintf.c, fopencookie.c: Add replacement functions.
- \* util.h: Add prototypes for them.

2002-02-09 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (gpgsm\_assuan\_simple\_command): Return 0 if we reach the end of the function.

2002-02-09 Marcus Brinkmann <marcus@g10code.de>

\* genkey.c (gpgme\_op\_genkey\_start): Fix logic in validity check.  
(gpgme\_op\_genkey\_start): Skip newlines after opening tag.

\* engine-gpgsm.c (\_gpgme\_gpgsm\_start): Remove cruft.

2002-02-08

Marcus Brinkmann <marcus@g10code.de>

\* genkey.c (gpgme\_op\_genkey\_start): Allow PUBKEY and SECKEY to be set, and pass them down to the crypto engine.

\* engine-gpgsm.h (\_gpgme\_gpgsm\_start): New arguments PUBKEY and SECKEY.

\* engine.h: Likewise.

\* runpgg.h (\_gpgme\_gpg\_spawn): Likewise.

\* engine.c (\_gpgme\_engine\_op\_genkey): Likewise. Use those arguments.

\* runpgg.c (\_gpgme\_gpg\_op\_genkey): Likewise. Complain if those arguments are set.

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_genkey): Likewise. Implement function.

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_keylist): Beautify comment.

2002-02-06 Marcus Brinkmann <marcus@g10code.de>

\* runpgg.c (\_gpgme\_gpg\_op\_keylist): Remove handling of keylist mode (for now).

2002-02-06 Marcus Brinkmann <marcus@g10code.de>

\* wait.c (gpgme\_wait): Add new argument STATUS, in which the status of the returned context is returned.

(\_gpgme\_wait\_on\_condition): Rework the function a bit, to make it aware of cancelled processes, and to allow to use gpgme\_wait with

CTX being NULL (as documented in the source).

(struct proc\_s): New member REPORTED.

\* gpgme.h: Fix prototype.

\* verify.c (gpgme\_op\_verify): Fix use of gpgme\_wait.

\* sign.c (gpgme\_op\_sign): Likewise.

\* import.c (gpgme\_op\_import): Likewise.

- \* genkey.c (gpgme\_op\_genkey): Likewise.
- \* export.c (gpgme\_op\_export): Likewise.
- \* encrypt.c (gpgme\_op\_encrypt): Likewise.
- \* delete.c (gpgme\_op\_delete): Likewise.
- \* decrypt-verify.c (gpgme\_op\_decrypt\_verify): Likewise.

2002-02-06 Marcus Brinkmann <marcus@g10code.de>

- \* gpgme.c (gpgme\_set\_keylist\_mode): Possibly return an error value.
- (gpgme\_get\_keylist\_mode): New function.
- (gpgme\_new): Set the default for keylist\_mode member of CTX.
- \* gpgme.h (gpgme\_set\_keylist\_mode): Fix prototype.
- (gpgme\_get\_keylist\_mode): New prototype.
- (GPGME\_KEYLIST\_MODE\_LOCAL): New macro.
- (GPGME\_KEYLIST\_MODE\_EXTERN): Likewise..

2002-02-02 Marcus Brinkmann <marcus@g10code.de>

This patch has gotten a bit large... mmh. The main thing that happens here is that error values are now not determined in the operation function after gpgme\_wait completed, but in the status handler when EOF is received. It should always be the case that either an error is flagged or EOF is received, so that after a gpgme\_wait you should never have the situation that no error is flagged and EOF is not received. One problem is that the engine status handlers don't have access to the context, a horrible kludge works around this for now. All errors that happen during a pending operation should be caught and reported in ctx->error, including out-of-core and cancellation. This rounds up neatly a couple of loose ends, and makes it possible to pass up any errors in the communication with the backend as well. As a bonus, there will be a function to access gpgme->wait, so that the operations can truly be implemented with their \_start function.

- \* engine-gpgsm.c (gpgsm\_status\_handler): Horrible kludge to report error back to the context.
- \* runpg.c (gpg\_status\_handler): Same horrible kludge applied here.
- \* engine-gpgsm.c (gpgsm\_assuan\_simple\_command): Add error checking.
- \* wait.c (\_gpgme\_wait\_on\_condition): If canceled, set CTX->error to a value indication that.
- \* verify.c (add\_notation): Set error, not out\_of\_core.

(finish\_sig): Likewise.  
(gpgme\_op\_verify\_start): Don't clear out\_of\_core.  
(\_gpgme\_verify\_status\_handler): At EOF, clean up the notation data.  
(gpgme\_op\_verify): And don't do it here.

\* trustlist.c (trustlist\_status\_handler): Check error, not out\_of\_core.  
(gpgme\_op\_trustlist\_start): Don't clear out\_of\_core.  
(gpgme\_op\_trustlist\_next): Check error, not out\_of\_core.  
(gpgme\_op\_trustlist\_end): Likewise.

\* ops.h (test\_and\_allocate\_result): New macro.  
(\_gpgme\_passphrase\_result): Remove prototype.

\* delete.c (gpgme\_op\_delete): Return error from context.  
(delete\_status\_handler): Use macro test\_and\_allocate\_result.  
Perform error checking at EOF.  
(gpgme\_op\_delete\_start): Release  
result.  
\* passphrase.c (\_gpgme\_passphrase\_status\_handler): Use macro  
test\_and\_allocate\_result, and perform error checking here.  
(\_gpgme\_passphrase\_result): Function removed.

\* sign.c (gpgme\_op\_sign\_start): Do not set out\_of\_core to zero.  
(gpgme\_op\_sign): Just return the error value from the context.  
(sign\_status\_handler): Only progress if no error is set yet. If  
we process an EOF, set the resulting error value (if any).

\* decrypt.c (\_gpgme\_decrypt\_result): Function removed.  
(create\_result\_struct): Function removed.  
(\_gpgme\_decrypt\_status\_handler): Use macro test\_and\_allocate\_result,  
calculate error on EOF, do not progress with errors.  
(\_gpgme\_decrypt\_start): Do not set out\_of\_core to zero.  
(gpgme\_op\_decrypt): Just return the error value from the context.

\* encrypt.c (encrypt\_status\_handler): Perform the error checking  
here.  
(gpgme\_op\_encrypt\_start): Do not clear out\_of\_core.

\* export.c (export\_status\_handler): Return if error is set in context.  
(gpgme\_op\_export\_start):  
Release result.  
(gpgme\_op\_export): Return error from context.

\* decrypt-verify.c (gpgme\_op\_decrypt\_verify): Return the error in  
the context.

\* genkey.c (genkey\_status\_handler): Use macro  
test\_and\_allocate\_result. Perform error checking at EOF.  
(gpgme\_op\_genkey): Just return the error from context.

\* import.c (gpgme\_op\_import): Return the error from context.  
(import\_status\_handler): Use macro test\_and\_allocate\_result.

\* keylist.c (gpgme\_op\_keylist\_start): Do not clear out\_of\_core.  
(gpgme\_op\_keylist\_next): Return error of context.  
(keylist\_colon\_handler): Set error instead out\_of\_code.  
(finish\_key): Likewise.

\* context.h: Remove member out\_of\_core, add member error.  
\* gpgme.c (\_gpgme\_release\_result): Clear error flag.

\* engine.h (\_gpgme\_engine\_get\_error): New prototype.  
\* engine.c (\_gpgme\_engine\_get\_error): New function.  
\* engine-gpgsm.c (\_gpgme\_gpgsm\_get\_error): New function.

\* engine-gpgsm.c (map\_assuan\_error): New function.  
(gpgsm\_assuan\_simple\_command): Change return type to GpgmeError, use the new function to map error values.  
(gpgsm\_set\_fd): Change return type to GpgmeError.  
(\_gpgme\_gpgsm\_op\_decrypt): Change type of ERR to GpgmeError.  
(gpgsm\_set\_recipients): Likewise. Change type of return value equivalently. Adjust error values.  
(\_gpgme\_gpgsm\_op\_import): Likewise.  
(\_gpgme\_gpgsm\_op\_sign): Likewise.  
(struct gpgsm\_object\_s): New member error.  
(gpgsm\_status\_handler): Set error if error occurs. Determine error number from ERR line received. If assuan\_read\_line fails, terminate the connection.

2002-02-01 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (MOSTLYCLEANFILES): New variable.

2002-02-01 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (gpgsm\_status\_handler): At error, terminate the connection to the server.

2002-01-31 Marcus Brinkmann <marcus@g10code.de>

\* runpgg.h: Add STATUS\_KEY\_CREATED.

\* progress.c: New file.

\* Makefile.am (libgpgme\_la\_SOURCES): Add progress.c.

\* genkey.c (genkey\_status\_handler):

Use

\_gpgme\_progress\_status\_handler. Add check for status.

(struct genkey\_result\_s): New structure.

(\_gpgme\_release\_genkey\_result): New function.

(gpgme\_op\_genkey): Check for error.

\* gpgme.c (\_gpgme\_release\_result): Call

\_gpgme\_release\_genkey\_result.

\* ops.h (\_gpgme\_release\_genkey\_result): Add prototype.

\* types.h (GenKeyResult): New type.  
\* context.h (gpgme\_context\_s): Add GenKeyResult to member result.

2002-01-30 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.c (\_gpgme\_release\_result): Call  
\_gpgme\_release\_delete\_result.  
\* ops.h (\_gpgme\_release\_delete\_result): Add prototype.  
\* types.h (DeleteResult): New type.  
\* context.h (gpgme\_context\_s): Add DeleteResult to member result.

\* delete.c (enum delete\_problem): New type.  
(struct delete\_result\_s): New structure.  
(\_gpgme\_release\_delete\_result): New function.  
(delete\_status\_handler): Implement more status codes.  
(gpgme\_op\_delete): Return error on failure.

\* import.c (MAX\_IMPORTED\_FIELDS): Bump up to 14.

2002-01-30

Marcus Brinkmann <marcus@g10code.de>

\* import.c (struct import\_result\_s): New structure.  
(\_gpgme\_release\_import\_result): New function.  
(append\_xml\_impinfo): Likewise.  
(import\_status\_handler): Implement.  
\* gpgme.c (\_gpgme\_release\_result): Add call to  
\_gpgme\_release\_import\_result.  
\* ops.h (\_gpgme\_release\_import\_result): Add prototype.  
\* types.h (ImportResult): New type.  
\* context.h (gpgme\_context\_s): Add ImportResult to member result.

\* encrypt.c (gpgme\_op\_encrypt): Code clean up.

2002-01-30 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h: Add lots of comment and fix the formatting. Add  
gpgme\_trustlist\_end prototype.

2002-01-29 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h: Add new type GpgmeIdleFunc. Change type of  
gpgme\_register\_idle to return and accept this type.  
\* wait.c (gpgme\_register\_idle): Fix type.  
Save and return old value of idle\_function.

2002-01-29 Werner Koch <wk@gnupg.org>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_keylist): Implement secret only mode.

\* keylist.c (keylist\_colon\_handler): Add support for the new "crs" record type.

2002-01-22 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_release): Call assuan\_disconnect, not assuan\_pipe\_disconnect.

\* Makefile.am (libgpgme\_la\_LIBADD): Change to link assuan and jnlib (needed by assuan) statically into libgpgme. Linking a static library into a shared library this way is not portable.

2002-01-22 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h (GpgmePassphraseCb): Change type of R\_HD from void\* to void\*\*.

2002-01-22 Marcus Brinkmann <marcus@g10code.de>

\* data.c (gpgme\_data\_new\_from\_filepart): Change type of LENGTH from off\_t to size\_t.

\* gpgme.h: Likewise.

2002-01-22 Marcus Brinkmann <marcus@g10code.de>

\* wait.c (\_gpgme\_wait\_on\_condition): If the process finished, reset the pending flag. Also if the operation was cancelled.

(struct proc\_s): Rename READY to DONE.

(wait\_item\_s): Likewise.

(set\_process\_ready): Rename to ...

(set\_process\_done): ... this.

(\_gpgme\_remove\_proc\_from\_wait\_queue): Call set\_process\_done instead set\_process\_ready.

(\_gpgme\_wait\_on\_condition): Likewise.

(do\_select): Rename READY to DONE.

\* verify.c (gpgme\_op\_verify): Do not set pending to zero here.

\* sign.c (gpgme\_op\_sign): Likewise.

\* import.c (gpgme\_op\_import): Likewise.

\* genkey.c (gpgme\_op\_genkey): Likewise.

\* export.c (gpgme\_op\_export): Likewise.

\* encrypt.c (gpgme\_op\_encrypt): Likewise.

\* delete.c (gpgme\_op\_delete): Likewise.

\* decrypt-verify.c (gpgme\_op\_decrypt\_verify): Likewise.

\* decrypt.c (gpgme\_op\_decrypt): Likewise.

2002-01-22 Marcus Brinkmann <marcus@g10code.de>

\* export.c: Cleanup.

2002-01-15 Marcus Brinkmann <marcus@g10code.de>

\* trustlist.c: Various source clean ups.

(my\_isdigit): Removed.

(gpgme\_op\_trustlist\_end): New function.

2002-01-13 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.c: Various source clean ups, like renaming C to CTX where appropriate.

(gpgme\_new): Clear

R\_CTX before starting the work.

(my\_isdigit): Removed.

(my\_isxdigit): Likewise.

\* data.c: Various source clean ups.

(gpgme\_data\_new\_from\_mem): Check BUFFER after clearing R\_DH.

(gpgme\_data\_new\_with\_read\_cb): Similar for READ\_CB.

(gpgme\_data\_new\_from\_file): Loop over fread while EINTR.

(gpgme\_data\_new\_from\_filepart): Rediddled a bit. Allow LENGTH to be zero. Loop over fread while EINTR.

(my\_isdigit): Removed.

(my\_isxdigit): Likewise.

2001-12-21 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_new): Replace General\_Error with Pipe\_Error where appropriate.

2001-12-19 Marcus Brinkmann <marcus@g10code.de>

\* engine.c: Include `string.h'. Reported by Stphane Corthisy.

\* version.c (get\_engine\_info): Remove prototype.

2001-12-19 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_new): New variable CHILD\_FDS.

Fill it with the servers fds, and pass it to assuan\_pipe\_connect.

2001-12-18 Marcus Brinkmann <marcus@g10code.de>

\*

keylist.c (gpgme\_op\_keylist\_end): New function.

\* gpgme.h (gpgme\_op\_keylist\_end): New prototype.

\* engine.h (gpgme\_engine\_check\_version): Move prototype to ...

\* gpgme.h (gpgme\_engine\_check\_version): ... here.

\* genkey.c (gpgme\_op\_genkey\_start): Remove unused variable.

2001-12-18 Marcus Brinkmann <marcus@g10code.de>

\* version.c (gpgme\_get\_engine\_info): Reimplemented.

(gpgme\_check\_engine): Reimplemented.

(\_gpgme\_compare\_versions): Return NULL if MY\_VERSION is NULL.

\* engine.c: Include `io.h'.

(gpgme\_engine\_get\_info): New function.

\* engine.h (gpgme\_engine\_check\_version, \_gpgme\_engine\_get\_info):

Add prototype.

2001-12-18 Marcus Brinkmann <marcus@g10code.de>

\* runpgg.c (struct reap\_s, reap\_list, reap\_list\_lock): Moved to ...

\* engine.c (struct reap\_s, reap\_list, reap\_list\_lock): ... here.

Include `time.h', `sys/types.h', `assert.h', and `sema.h'.

\* runpgg.c (\_gpgme\_engine\_add\_child\_to\_reap\_list): New function.

(do\_reaping, \_gpgme\_gpg\_housecleaning): Moved to

...

\* engine.c (do\_reaping, \_gpgme\_engine\_housecleaning): ... here.

\* runpgg.c (\_gpgme\_gpg\_release): Replace code that is now in its own function by call to \_gpgme\_engine\_add\_child\_to\_reap\_list().

\* wait.c: Include `engine.h'.

(run\_idle): Call \_gpgme\_engine\_housecleaning(), not

\_gpgme\_gpg\_housecleaning().

2001-12-18 Marcus Brinkmann <marcus@g10code.de>

\* key.c (\_gpgme\_key\_append\_name): Append, not prepend, the uid.

Initialize the next field of the uid structure.

(gpgme\_key\_get\_as\_xml): Do not list last uid first.

2001-12-17 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_set\_colon\_line\_handler): New

function [!ENABLE\_GPGSM].

2001-12-14 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_verify): Put TEXT into message\_data, not SIG.

(\_gpgme\_gpgsm\_op\_sign): Use '--detached', not '--detach'.

\* sign.c (sign\_status\_handler): Call \_gpgme\_passphrase\_status\_handler early.

2001-12-14 Marcus Brinkmann <marcus@g10code.de>

\*

engine-gpgsm.c: Revert last change.

2001-12-14 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (gpgsm\_status\_handler): Freeze the output file handler when ending this operation, otherwise the wait function will sit on it.

2001-12-14 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (struct gpgsm\_object\_s): New member colon.attic.  
(\_gpgme\_gpgsm\_new): Initialize some more members.  
(\_gpgme\_gpgsm\_release): Free the colon line handler's attic line.  
(gpgsm\_status\_handler): Rework the inline-data processing.

2001-12-13 Marcus Brinkmann <marcus@g10code.de>

\* runpg.c (\_gpgme\_gpg\_spawn): Do not add the fds to the child list that are not dup'ed, for those the close-on-exec flag is set now.

\* version.c (\_gpgme\_get\_program\_version): Remove first entry in CFD, as the close-on-exec flag is now set for this fd.

2001-12-13 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_encrypt): Do not add 'armor' option to 'ENCRYPT'.

\* engine-gpgsm.c

(gpgsm\_set\_recipients): Free LINE when returning successfully.

2001-12-13 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (close\_notify\_handler): New function.

(\_gpgme\_gpgsm\_new): Manage the file descriptors a bit differently. Do not set close-on-exec flags.  
(\_gpgme\_gpgsm\_op\_decrypt): Do not set message\_fd to -1, this is done by the close handler.  
(\_gpgme\_gpgsm\_op\_encrypt): Likewise.  
(\_gpgme\_gpgsm\_op\_import): Likewise (also for output\_fd).  
(\_gpgme\_gpgsm\_op\_keylist): Likewise (also for input\_fd and output\_fd).  
(\_gpgme\_gpgsm\_op\_sign): Likewise.  
(\_gpgme\_gpgsm\_op\_verify): Likewise, but for output\_fd.

\* posix-io.c (\_gpgme\_io\_pipe): Set the close-on-exec flag for the non-inherited file descriptor index of the pipe.

2001-12-13 Werner Koch <wk@gnupg.org>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_set\_colon\_line\_handler): New.  
(gpgsm\_status\_handler): Pass datalines to a colon handler  
\* engine.c (\_gpgme\_engine\_set\_colon\_line\_handler): Set the colon handler for gpgsm.

\* engine-gpgsm.c  
(\_gpgme\_gpgsm\_op\_keylist): Allow NULL for pattern.  
(gpgsm\_assuan\_simple\_command): Removed underscore from assuan\_write\_line.  
(\_gpgme\_gpgsm\_start): Ditto.  
(gpgsm\_assuan\_simple\_command): Replaced internal Assuan read function by the new assuan\_read\_line. Removed the use of the internal header.  
(gpgsm\_status\_handler): Ditto. Use the new assuan\_pending\_line.  
(\_gpgme\_gpgsm\_start): Use the documented way to get an fd from assuan.

\* keylist.c (keylist\_colon\_handler): Handle "crt" records  
\* key.h (gpgme\_key\_s): Add an x509 flag.  
\* key.c (parse\_x509\_user\_id): New.  
(\_gpgme\_key\_append\_name): Handle x.509 names.

2001-12-05 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (gpgsm\_status\_handler): Make it work with current version of assuan.

2001-12-05 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (gpgsm\_set\_fd): Accept one more argument OPT.  
(\_gpgme\_gpgsm\_op\_encrypt): Pass armor argument to gpgsm\_set\_fd for output descriptor.

(\_gpgme\_gpgsm\_op\_sign):

Likewise.

2001-12-05 Marcus Brinkmann <marcus@g10code.de>

\* keylist.c (gpgme\_op\_keylist\_next): Set pending to 0 if EOF occurs.

2001-11-26 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_sign): Fix stupid typo.

2001-11-24 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (gpgsm\_status\_handler): Don't break if bsearch fails. Deal with assuan read line returning more than one line (for now).

2001-11-23 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_sign): Implement it according to the current protocol definition.

2001-11-23 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_new): Set CLOEXEC flag for parent ends of the pipe.

2001-11-22 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c: Include stdlib.h and string.h. Also include, for now, runpg.h and status-table.h. (gpgsm\_status\_handler): Implement more of the status handler.

2001-11-22 Marcus Brinkmann <marcus@g10code.de>

\*

engine.c (\_gpgme\_engine\_op\_decrypt): Implement CMS case.

(\_gpgme\_engine\_op\_delete): Likewise.

(\_gpgme\_engine\_op\_encrypt): Likewise.

(\_gpgme\_engine\_op\_export): Likewise.

(\_gpgme\_engine\_op\_genkey): Likewise.

(\_gpgme\_engine\_op\_keylist): Likewise.

(\_gpgme\_engine\_op\_sign): Likewise.

(\_gpgme\_engine\_op\_trustlist): Likewise.

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_encrypt): New function.

(gpgsm\_assuan\_simple\_command): Likewise.

(gpgsm\_set\_recipients): Likewise.

(gpgsm\_set\_fd): Reimplement using gpgsm\_assuan\_simple\_command.  
(\_gpgme\_gpgsm\_op\_delete): New function.  
(\_gpgme\_gpgsm\_op\_export): Likewise.  
(\_gpgme\_gpgsm\_op\_genkey): Likewise.  
(\_gpgme\_gpgsm\_op\_sign): Likewise.  
(\_gpgme\_gpgsm\_op\_keylist): Likewise.  
(\_gpgme\_gpgsm\_op\_trustlist): Likewise.  
(\_gpgme\_gpgsm\_release): Release command.  
(\_gpgme\_gpgsm\_op\_decrypt): Allocate command.  
(\_gpgme\_gpgsm\_op\_import): Likewise.  
(gpgsm\_status\_handler): Also treat `ERR` strings as EOF.

2001-11-22 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.h  
(gpgme\_set\_protocol): New prototype.

2001-11-22 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c (\_gpgme\_gpgsm\_op\_decrypt): New function.  
(\_gpgme\_gpgsm\_op\_import): Likewise.

2001-11-22 Marcus Brinkmann <marcus@g10code.de>

\* engine-gpgsm.c: Shuffle around header inclusion a bit, to still  
keep them separate.  
(\_gpgme\_set\_status\_handler) [ENABLE\_GPGSM]: New function.

2001-11-22 Werner Koch <wk@gnupg.org>

\* engine-gpgsm.c: Include more headers so that NULL and mk\_error  
is defined even with an undefined GPGSM\_PATH.

2001-11-22 Marcus Brinkmann <marcus@g10code.de>

\* runpg.c (gpg\_inbound\_handler, write\_mem\_data, write\_cb\_data,  
gpg\_outbound\_handler): Moved to ...  
\* data.c (\_gpgme\_data\_inbound\_handler, write\_mem\_data,  
write\_cb\_data, \_gpgme\_data\_outbound\_handler): ... here. Make the  
\_gpgme\_\* ones non-static.  
\* data.c: Include io.h.  
  
\* ops.h (\_gpgme\_data\_inbound\_handler): New prototype.  
(\_gpgme\_data\_outbound\_handler): Likewise.  
(\_gpgme\_gpg\_spawn): Use  
these new functions.  
  
\* engine-gpgsm.h (\_gpgme\_gpgsm\_op\_decrypt, \_gpgme\_gpgsm\_op\_delete,

`_gpgme_gpgsm_op_encrypt`, `_gpgme_gpgsm_op_export`,  
`_gpgme_gpgsm_op_genkey`, `_gpgme_gpgsm_op_import`,  
`_gpgme_gpgsm_op_keylist`, `_gpgme_gpgsm_op_sign`,  
`_gpgme_gpgsm_op_trustlist`, `_gpgme_gpgsm_op_verify`,  
`_gpgme_gpgsm_start`, `_gpgme_gpgsm_set_status_handler`): New prototype.  
Include `<runpg.h>` for status handler function.

\* `engine-gpgsm.c` (`struct gpgsm_object_s`): New members `input_fd`,  
`input_data`, `output_fd`, `output_data`, `message_fd`, `message_data`, `command`  
and `status`.

`(_gpgme_gpgsm_new)`: Open input, output and message pipes before  
connecting to the client. Close server's ends afterwards.

`(_gpgme_gpgsm_release)`: Close open file descriptors. Remove  
server process from wait queue.

`(_gpgme_gpgsm_op_verify`, `_gpgme_gpgsm_start`,  
`_gpgme_gpgsm_set_status_handler`, `gpgms_status_handler`): New function.

\* `engine.c` (`_gpgme_engine_start`): Implement for `GPGME_PROTOCOL_CMS`.

`(_gpgme_engine_set_status_handler)`:

Likewise.

`(_gpgme_engine_op_verify)`: Likewise.

2001-11-21 Marcus Brinkmann <marcus@g10code.de>

\* `context.h`: Do not include `runpg.h`, but `engine.h`.

`(struct gpgme_context_s)`: Replace member `gpg` with `engine`.

\* `gpgme.c` (`gpgme_release`): Release engine, not `gpg`.

\* `recipient.c` (`_gpgme_append_gpg_args_from_recipients`): Function  
moved ...

\* `runpg.c` (`_gpgme_append_gpg_args_from_recipients`): ... here.

Make static, change order of arguments, and return an error value.

\* `ops.h` (`_gpgme_append_gpg_args_from_recipients`): Removed prototype.

\* `runpg.h` (`_gpgme_gpg_op_verify`): Add prototype.

`(_gpgme_gpg_op_encrypt)`: Likewise.

`(_gpgme_gpg_op_decrypt)`: Likewise.

`(_gpgme_gpg_op_delete)`: Likewise.

`(_gpgme_gpg_op_export)`: Likewise.

`(_gpgme_gpg_op_genkey)`: Likewise.

`(_gpgme_gpg_op_import)`: Likewise.

`(_gpgme_gpg_op_keylist)`: Likewise.

`(_gpgme_gpg_op_sign)`: Likewise.

`(_gpgme_gpg_op_trustlist)`: Likewise.

\* `runpg.c` (`_gpgme_gpg_op_verify`): New function.

`(_gpgme_gpg_op_encrypt)`: Likewise.

`(_gpgme_gpg_op_decrypt)`:

Likewise.

(\_gpgme\_gpg\_op\_delete): Likewise.

(\_gpgme\_gpg\_op\_export): Likewise.

(\_gpgme\_gpg\_op\_genkey): Likewise.

(\_gpgme\_gpg\_op\_import): Likewise.

(\_gpgme\_gpg\_op\_keylist): Likewise.

(\_gpgme\_gpg\_op\_sign): Likewise.

(\_gpgme\_gpg\_op\_trustlist): Likewise.

\* engine.h (\_gpgme\_engine\_set\_status\_handler): Add prototype.

(\_gpgme\_engine\_set\_command\_handler): Likewise.

(\_gpgme\_engine\_set\_colon\_line\_handler): Likewise.

(\_gpgme\_engine\_op\_decrypt): Likewise.

(\_gpgme\_engine\_op\_delete): Likewise.

(\_gpgme\_engine\_op\_encrypt): Likewise.

(\_gpgme\_engine\_op\_export): Likewise.

(\_gpgme\_engine\_op\_genkey): Likewise.

(\_gpgme\_engine\_op\_import): Likewise.

(\_gpgme\_engine\_op\_keylist): Likewise.

(\_gpgme\_engine\_op\_sign): Likewise.

(\_gpgme\_engine\_op\_trustlist): Likewise.

(\_gpgme\_engine\_op\_verify): Likewise.

(\_gpgme\_engine\_start): Likewise.

\* engine.c (\_gpgme\_engine\_set\_status\_handler): New function.

(\_gpgme\_engine\_set\_command\_handler): Likewise.

(\_gpgme\_engine\_set\_colon\_line\_handler):

Likewise.

(\_gpgme\_engine\_op\_decrypt): Likewise.

(\_gpgme\_engine\_op\_delete): Likewise.

(\_gpgme\_engine\_op\_encrypt): Likewise.

(\_gpgme\_engine\_op\_export): Likewise.

(\_gpgme\_engine\_op\_genkey): Likewise.

(\_gpgme\_engine\_op\_import): Likewise.

(\_gpgme\_engine\_op\_keylist): Likewise.

(\_gpgme\_engine\_op\_sign): Likewise.

(\_gpgme\_engine\_op\_trustlist): Likewise.

(\_gpgme\_engine\_op\_verify): Likewise.

(\_gpgme\_engine\_start): Likewise.

\* verify.c (gpgme\_op\_verify\_start): Reimplement in terms of above functions.

\* encrypt.c (gpgme\_op\_encrypt\_start): Likewise.

\* decrypt.c (\_gpgme\_decrypt\_start): Likewise.

\* passphrase.c (\_gpgme\_passphrase\_start): Likewise.

\* keylist.c (gpgme\_op\_keylist\_start): Likewise.

2001-11-20 Marcus Brinkmann <marcus@g10code.de>

\* types.h: Add types EngineObject and GpgsmObject.

\* Makefile.am (libgpgme\_la\_SOURCES): Add engine-gpgsm.h, engine-gpgsm.c, engine.h and engine.c.

\* engine.h: New file.

\* engine.c: Likewise.

\* engine-gpgsm.h: Likewise.

\*

engine-gpgsm.c: Likewise.

\* runpg.c (\_gpgme\_gpg\_get\_version): New function.

(\_gpgme\_gpg\_check\_version): Likewise.

\* runpg.h: Add prototypes for \_gpgme\_gpg\_get\_version and \_gpgme\_gpg\_check\_version.

\* version.c (compare\_versions): Rename to ...

(\_gpgme\_compare\_versions): ... this. Make non-static.

(gpgme\_check\_version): Use \_gpgme\_compare\_versions rather than compare\_versions.

(gpgme\_check\_engine): Likewise.

\* ops.h (\_gpgme\_get\_program\_version): Add prototype.

2001-11-20 Marcus Brinkmann <marcus@g10code.de>

\* Makefile.am (libgpgme\_la\_INCLUDES): Remove obsolete directive.

(AM\_CPPFLAGS): New directive [BUILD\_ASSUAN].

(libgpgme\_la\_LIBADD): Likewise.

2001-11-20 Marcus Brinkmann <marcus@g10code.de>

\* version.c: Remove global variables lineno and tmp\_engine\_version.

(version\_handler): Removed.

(\_gpgme\_get\_program\_version): New function.

(get\_engine\_info): Don't use context and version\_handler, but \_gpgme\_get\_program\_version.

\* ops.h (\_gpgme\_get\_program\_version):

Add prototype for

\_gpgme\_get\_program\_version (we expect to use it elsewhere soon).

2001-11-18 Marcus Brinkmann <marcus@g10code.de>

\* version.c (get\_engine\_info): If GnuPG is not available, return an error message.

\* posix-util.c (\_gpgme\_get\_gpg\_path): Allow GPG\_PATH to be undefined.

(\_gpgme\_get\_gpgsm\_path): New function.

\* w32-util.c (find\_program\_in\_registry): New static function.

(\_gpgme\_get\_gpg\_path): Allow GPG\_PATH to be undefined. Rework to use find\_program\_in\_registry.  
(\_gpgme\_get\_gpgsm\_path): New function.  
(util.h): Prototype \_gpgme\_get\_gpgsm\_path).  
\* runpg.c (\_gpgme\_gpg\_spawn): Verify that \_gpgme\_get\_gpg\_path() returns non-null.

2001-11-16 Marcus Brinkmann <marcus@g10code.de>

\* decrypt-verify.c: New file.  
\* Makefile.am (libgpgme\_la\_SOURCES): Add decrypt-verify.c.  
\* types.h: Add decrypt-verify types.  
\* ops.h: Likewise.  
\* context.h: Add result type for decrypt-verify.  
\* gpgme.h: Add decrypt-verify prototypes.

\* decrypt.c (decrypt\_status\_handler):  
Renamed to ...  
(\_gpgme\_decrypt\_status\_handler): ... this. Make non-static.  
(\_gpgme\_decrypt\_start): New function, derived from  
gpgme\_op\_decrypt\_start.  
(gpgme\_op\_decrypt\_start): Reimplement in terms of  
\_gpgme\_decrypt\_start.  
(\_gpgme\_decrypt\_result): New function to retrieve error value.  
(gpgme\_op\_decrypt): Use \_gpgme\_decrypt\_result.  
\* ops.h: Add prototypes for new functions.

\* verify.c (verify\_status\_handler): Renamed to ...  
(\_gpgme\_verify\_status\_handler): ... this. Make non-static.  
(gpgme\_op\_verify\_start): Use new function name.  
(intersect\_stati): Renamed to ...  
(\_gpgme\_intersect\_stati): ... this. Make non-static.  
(gpgme\_op\_verify): Use new name.  
\* ops.h: Add prototypes for new functions.

2001-11-16 Marcus Brinkmann <marcus@g10code.de>

\* passphrase.c: New file.  
\* Makefile.am (libgpgme\_la\_SOURCES): Add passphrase.c.  
\* ops.h (\_gpgme\_passphrase\_result): Add prototypes from  
passphrase.c.  
\* types.h: Likewise.  
\* context.h: Add member passphrase to result.  
\*  
gpgme.c (\_gpgme\_release\_result): Release passphrase member.  
  
\* decrypt.c: Some formatting and variable name changes (like  
CTX instead C).

(struct decrypt\_result\_s): Remove members now found in passphrase result.  
(\_gpgme\_release\_decrypt\_result): Don't release removed members.  
(decrypt\_status\_handler): Call \_gpgme\_passphrase\_status\_handler, and don't handle the cases caught there.  
(command\_handler): Removed.  
(gpgme\_op\_decrypt\_start): Don't set command handler, but invoke \_gpgme\_passphrase\_start which does it.  
(gpgme\_op\_decrypt): Invoke \_gpgme\_passphrase\_result and drop the cases covered by it.

\* sign.c Some formatting and variable name changes (like CTX instead C).

(struct sign\_result\_s): Remove members now found in passphrase result.  
(\_gpgme\_release\_sign\_result): Don't release removed members.  
(sign\_status\_handler): Call \_gpgme\_passphrase\_status\_handler, and don't handle the cases caught there.  
(command\_handler): Removed.  
(gpgme\_op\_sign\_start): Don't set command handler, but invoke \_gpgme\_passphrase\_start which does it.  
(gpgme\_op\_sign): Invoke \_gpgme\_passphrase\_result and drop the cases covered by it.

2001-11-15 Marcus Brinkmann <marcus@g10code.de>

\* decrypt.c (command\_handler): Fix last change.

2001-11-15 Marcus Brinkmann <marcus@g10code.de>

\* verify.c (\_gpgme\_release\_verify\_result): Rename RES to RESULT. Rename R2 to NEXT\_RESULT.  
(intersect\_stati): Rename RES to RESULT.  
(gpgme\_get\_sig\_status): Likewise. Do not check return\_type, but the member verify of result.  
(gpgme\_get\_sig\_key): Likewise.

\* sign.c (\_gpgme\_release\_sign\_result): Rename RES to RESULT. If RESULT is zero, return.  
(sign\_status\_handler, command\_handler): Do not check return\_type, but the member sign of result.  
(gpgme\_op\_sign): Likewise. Drop assertion.

\* encrypt.c (\_gpgme\_release\_encrypt\_result): Rename RES to RESULT. If RESULT is zero, return.  
(encrypt\_status\_handler): Do not check return\_type, but the member encrypt of result.

(gpgme\_op\_encrypt):  
Likewise. Drop assertion.

\* decrypt.c (\_gpgme\_release\_decrypt\_result): Rename RES to RESULT.  
(create\_result\_struct): Do not set result\_type.  
(command\_handler, decrypt\_status\_handler): Do not check  
return\_type, but the member decrypt of result.  
(gpgme\_op\_decrypt): Likewise. Drop assertion.

\* context.h (enum ResultType): Removed.  
(struct gpgme\_context\_s): Remove member result\_type.  
(struct result): Replaces union result.  
\* gpgme.c: Include string.h.  
(\_gpgme\_release\_result): Release all members of c->result, which  
is now a struct. Zero out all members of the struct afterwards.

2001-11-11 Marcus Brinkmann <marcus@g10code.de>

\* runpgp.c (\_gpgme\_gpg\_release): Release GPG->cmd.cb\_data.  
Release all members of the list GPG->arglist.  
Reported by Michael Schmidt <mschmidt@cs.uni-sb.de>.

2001-11-02 Marcus Brinkmann <marcus@g10code.de>

\* runpgp.c (pipemode\_copy): Change type of NBYTES to size\_t.  
  
\* key.c: Include string.h.  
\* data.c: Likewise.  
\* recipient.c: Likewise.

2001-10-29

Marcus Brinkmann <marcus@g10code.de>

\* context.h: New member signers\_len.  
\* signers.c (gpgme\_signers\_clear): Require that signers are  
non-NULL with assertion. Use signers\_len to determine how much  
keys to release. Add documentation.  
(gpgme\_signers\_add): Use signers\_len to determine if the buffer is  
large enough. Use xtryrealloc rather than xtrymalloc and copying.  
Add documentation.  
(gpgme\_signers\_enum): Use signers\_len to determine if key is  
available. Add documentation.

2001-10-22 Marcus Brinkmann <marcus@g10code.de>

\* data.c (\_gpgme\_data\_append): Check if LENGTH is smaller than  
ALLOC\_CHUNK, not DH->length.

2001-10-17 Marcus Brinkmann <marcus@g10code.de>

\* gpgme.c (gpgme\_set\_protocol): Fix last change.

2001-10-15 Werner Koch <wk@gnupg.org>

\* gpgme.h (GpgmeProtocol): New.

\* gpgme.c (gpgme\_set\_protocol): New.

2001-09-26 Werner Koch <wk@gnupg.org>

\* gpgme.c (gpgme\_set\_passphrase\_cb): Ignore a NULL context.

(gpgme\_set\_progress\_cb): Ditto.

Suggested by Mark Mutz.

2001-09-17 Werner Koch <wk@gnupg.org>

\* keylist.c (finish\_key): Shortcut for no tmp\_key. Changed all callers to use this function without a check for tmp\_key.

\* keylist.c (gpgme\_op\_keylist\_next): Reset the key\_cond after emptying the queue. Bug reported by Stphane Corthsy.

2001-09-12 Werner Koch <wk@gnupg.org>

\* data.c (gpgme\_data\_rewind): Allow rewind for callbacks.

2001-09-07 Werner Koch <wk@gnupg.org>

\* runpg.h: Add NO\_RECP.

\* encrypt.c (encrypt\_status\_handler): Take on No\_RECP.

(gpgme\_op\_encrypt): Better error return.

\* verify.c (verify\_status\_handler): Take on NODATA.

2001-09-03 Werner Koch <wk@gnupg.org>

\* runpg.h: Added STATUS\_INV\_RECP.

\* gpgme.c (\_gpgme\_release\_result): Add support for new EncryptResult object.

\* encrypt.c (append\_xml\_encinfo): New.

(encrypt\_status\_handler): Add some status parsing.

(\_gpgme\_release\_encrypt\_result): New.

2001-08-29 Werner Koch <wk@gnupg.org>

\* recipient.c (gpgme\_recipients\_release):

Free the list. By Timo.

\* keylist.c (keylist\_colon\_handler): Do a finish key if we receive an EOF here. This is probably the reason for a lot of bugs related to keylisting. It is so obvious. Kudos to Enno Cramer for pointing that out.

2001-08-28 Werner Koch <wk@gnupg.org>

\* gpgme.c, gpgme.h (gpgme\_get\_op\_info): New.  
(\_gpgme\_set\_op\_info): New.  
(\_gpgme\_release\_result): Reset the op\_info here.  
\* sign.c (append\_xml\_siginfo): New.  
(sign\_status\_handler): Store the sig create information.

2001-07-31 Werner Koch <wk@gnupg.org>

\* encrypt.c (gpgme\_op\_encrypt): Hack to detect no valid recipients.

2001-07-30 Werner Koch <wk@gnupg.org>

\* gpgme.c (gpgme\_get\_armor, gpgme\_get\_textmode): New.  
\* runpg.c (build\_argv): Disable armor comments  
\* w32-io.c (build\_commandline): Need to add quotes here

2001-07-24 Werner Koch <wk@gnupg.org>

\* data.c (gpgme\_data\_read): Add a way to return the available bytes.

2001-07-23 Werner Koch <wk@gnupg.org>

\* util.c: Removed  
stpcpy() because we use the version from jnlib.

2001-07-19 Werner Koch <wk@gnupg.org>

\* mkstatus: Define the collating sequence for sort.

2001-06-26 Werner Koch <wk@gnupg.org>

\* runpg.h: Add STATUS\_UNEXPECTED as suggested by Timo.

2001-06-15 Werner Koch <wk@gnupg.org>

\* keylist.c (set\_userid\_flags): Fixed the assigned values. Kudos to Timo for pointing this out.

2001-06-01 Werner Koch <wk@gnupg.org>

\* debug.c (\_gpgme\_debug\_begin): Fixed a /tmp race. Noted by Johannes Poehlmann.

2001-05-28 Werner Koch <wk@gnupg.org>

\* version.c (gpgme\_check\_engine): Stop version number parsing at the opening angle and not the closing one. By Tommy Reynolds.

2001-05-01 Jos Carlos Garca Sogo <jose@jaimedelamo.eu.org>

\* encrypt.c (gpgme\_op\_encrypt\_start): Deleted the assert ( !c->gpg ) line, because it gave an error if another operation had been made before using the same context.

\* decrypt.c (gpgme\_op\_decrypt\_start): The same as above. Also added one line to release the gpg object in the context (if any).

2001-04-26 Werner Koch <wk@gnupg.org>

\* key.c, key.h (\_gpgme\_key\_cache\_init): New.  
(\_gpgme\_key\_cache\_add): New.  
(\_gpgme\_key\_cache\_get): New.  
\* version.c (do\_subsystem\_inits): Init the cache.  
\* keylist.c (finish\_key): Put key into the cache  
\* verify.c (gpgme\_get\_sig\_key): First look into the cache.

2001-04-19 Werner Koch <wk@gnupg.org>

\* keylist.c (parse\_timestamp): Adjusted for the changed --fixed-list-mode of gpg 1.0.4h.

2001-04-05 Werner Koch <wk@gnupg.org>

\* verify.c (gpgme\_op\_verify\_start): Enabled pipemode for detached sigs.

2001-04-04 Werner Koch <wk@gnupg.org>

\* w32-io.c (\_gpgme\_io\_select): Don't select on the writer if there are still bytes pending. Timo found this not easy to track down race condition.

2001-04-02 Werner Koch <wk@gnupg.org>

\* gpgme.h: Add GPGME\_ATTR\_KEY\_{EXPIRED,DISABLED}.  
\* key.c (gpgme\_key\_get\_ulong\_attr): And return those attribs.

\* verify.c (gpgme\_get\_sig\_key): Set keylisting mode depending on the mode set in the current context. Suggested by Timo.

\* key.c (gpgme\_key\_get\_ulong\_attr): Return can\_certify and not can\_encrypt. By Timo.

2001-03-30 Werner Koch <wk@gnupg.org>

\* debug.c (debug\_init): Allow to specify a debug file. (\_gpgme\_debug\_level): New.

\* posix-io.c (\_gpgme\_io\_read, \_gpgme\_io\_write): Print output. (\_gpgme\_io\_select): Debug only with level > 2.

2001-03-15 Werner Koch <wk@gnupg.org>

\* runpgg.c: Included time.h.

\* key.h: New keyflags for capabilities.

\* keylist.c (set\_mainkey\_capability, set\_subkey\_capability): New. (keylist\_colon\_handler): Parse them.

\* gpgme.h: New attribute values for capabilities.

\* key.c (gpgme\_key\_get\_string\_attr): Return them. (capabilities\_to\_string): New.

(gpgme\_key\_get\_ulong\_attr): Return the global caps.

2001-03-14 Werner Koch <wk@gnupg.org>

\* w32-io.c (destroy\_reader, destroy\_writer): Fixed syntax error. Thanks to Jan Oliver Wagner.

2001-03-13 Werner Koch <wk@gnupg.org>

\* context.h: Add

invalid and revoke flags to user\_id structure.

\* keylist.c (gpgme\_op\_keylist\_start): Use --fixed-list-mode.

(keylist\_colon\_handler): Adjust for that.

(set\_userid\_flags): New.

(set\_mainkey\_trust\_info): Handle new key invalid flag

(set\_subkey\_trust\_info): Ditto.

\* gpgme.h: Add new attributes for key and user ID flags.

\* key.c (\_gpgme\_key\_append\_name): Init these flags

(gpgme\_key\_get\_as\_xml): Print them.

(one\_uid\_as\_xml): New helper for above.

(gpgme\_key\_get\_string\_attr, gpgme\_key\_get\_ulong\_attr):

Return the new attributes. Enhanced, so that subkey information

can be returned now.

2001-02-28 Werner Koch <wk@gnupg.org>

- \* w32-io.c (destroy\_reader): Set stop\_me flag.
- (writer,create\_writer,destroy\_writer,find\_writer,kill\_writer): New.
- (\_gpgme\_io\_write): Use a writer thread to avoid blocking.
- (\_gpgme\_io\_close): Cleanup a writer thread
- (\_gpgme\_io\_select): Replace the faked wait on writing by a real waiting which is now possible due to the use of a writer thread.

2001-02-20

Werner Koch <wk@gnupg.org>

- \* w32-io.c (destroy\_reader,kill\_reader): New.
- (create\_reader, reader): Add a new event to stop the thread.
- (\_gpgme\_io\_close): Kill the reader thread.
  
- \* posix-io.c (\_gpgme\_io\_select): Handle frozen fds here.
- \* 32-io.c (\_gpgme\_io\_select): Ditto. Removed a bunch of unused code.
  
- \* wait.c: Reworked the whole thing.
- \* runpgg.c (\_gpgme\_gpg\_new): Init pid to -1.
- (\_gpgme\_gpg\_release): Remove the process from the wait queue.

2001-02-19 Werner Koch <wk@gnupg.org>

- \* w32-io.c (\_gpgme\_io\_set\_close\_notify): New.
- (\_gpgme\_io\_close): Do the notification.
  
- \* posix-io.c (\_gpgme\_io\_select): Use a 1 sec timeout and not 200 microseconds.
  
- \* wait.c (remove\_process): Don't close the fd here.
- (do\_select): Set the fd to -1 and remove the is\_closed flag everywhere.
- (\_gpgme\_wait\_on\_condition): Remove the assert on the queue and break out if we could not find the queue. The whole thing should be reworked.
  
- \* posix-io.c (\_gpgme\_io\_set\_close\_notify): New.
- (\_gpgme\_io\_close):  
Do the notification.
  
- \* runpgg.c (close\_notify\_handler): New.
- (\_gpgme\_gpg\_new): Register a callback for the fd.
- (\_gpgme\_gpg\_set\_colon\_line\_handler): Ditto.
- (build\_argv): Ditto

2001-02-13 Werner Koch <wk@gnupg.org>

- \* runpgg.c (struct reap\_s): Replaced pid\_t by int.
- \* types.h: Add ulong typedef.
- \* runpgg.c (do\_reaping, \_gpgme\_gpg\_housecleaning): New.  
(\_gpgme\_gpg\_release): Reap children.
- \* io.h, posix-io.c (\_gpgme\_io\_kill): New.
- \* w32-io.c (\_gpgme\_io\_kill): New (dummy).
- \* keylist.c (gpgme\_op\_keylist\_start): Cancel a pending request.
- \* posix-io.c (\_gpgme\_io\_read): Add some debug output.  
(\_gpgme\_io\_write): Ditto.  
(\_gpgme\_io\_select): Increased the timeout.

2001-02-12 Werner Koch <wk@gnupg.org>

Enhanced the signature verification, so that it can now handle more than one signature and is able to return more information on the signatures.

- \* verify.c (gpgme\_get\_sig\_key): New.  
(gpgme\_get\_sig\_status): New.
- \* gpgme.h: Add stdio.h.  
(GpgmeSigStat):  
New status DIFF.

2001-02-01 Werner Koch <wk@gnupg.org>

- \* w32-io.c (set\_synchronize): Add EVENT\_MODIFY\_STATE. Add Debug code to all Set/ResetEvent().
- \* runpgg.c (read\_status): Check for end of stream only if we have an r. By Timo.

2001-01-31 Werner Koch <wk@gnupg.org>

- \* wait.c (\_gpgme\_wait\_on\_condition): Removed all exit code processing.  
(propagate\_term\_results, clear\_active\_fds): Removed.  
(count\_active\_fds): Renamed to ..  
(count\_active\_and\_thawed\_fds): .. this and count only thawed fds.
- \* runpgg.c (gpg\_colon\_line\_handler): Return colon.eof and not status.eof ;-)

2001-01-30 Werner Koch <wk@gnupg.org>

- \* w32-io.c (`_gpgme_io_spawn`): Use the supplied path arg.
- \* version.c (`get_engine_info`): Return better error information.
- \* posix-util.c, w32-util.c: New.
- (`_gpgme_get_gpg_path`): New, suggested by Jan-Oliver.
- \* `rungpg.c` (`_gpgme_gpg_spawn`): Use new function to get GPG's path.
- \* `signers.c` (`gpgme_signers_add`): Oops, one should test code and not just write it;  
the newarr was not assigned. Thanks to Jos  
for pointing this out. Hmmm, still not tested, why should a coder  
test his fix :-)
- \* w32-io.c: Does now use reader threads, so that we can use  
`WaitForMultipleObjects`.
- \* `sema.h`, `posix-sema.c`, `w32-sema.c`: Support for Critical sections.  
Does currently only work for W32.
- \* `debug.c`, `util.h` : New. Changed all `fprintfs` to use this new  
set of debugging functions.

2001-01-23 Werner Koch <wk@gnupg.org>

- \* `data.c` (`_gpgme_data_release_and_return_string`): Fixed string  
termination.

2001-01-22 Werner Koch <wk@gnupg.org>

- \* `delete.c`: New.
- \* `signers.c`: New.
- \* `key.c` (`gpgme_key_ref`, `gpgme_key_unref`): New.
- \* `sign.c` (`gpgme_op_sign_start`): Allow the use of other keys.
- \* `version.c` (`gpgme_get_engine_info`, `gpgme_check_engine`): New.
- \* `rungpg.c` (`_gpgme_gpg_set_simple_line_handler`): New.

2001-01-05 Werner Koch <wk@gnupg.org>

- \* `data.c` (`gpgme_data_rewind`): Allow to rewind `data_type_none`.

## GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free

software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion

of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
  
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
  
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of

Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or

distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each

time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to

be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW.

EXCEPT WHEN

OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES,

INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN

IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License,  
or

(at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
```

under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

Using gpgme.js

-----

At first, make sure that the environment you want to use gpgme.js in has access and permissions for nativeMessaging, and gpgme-json installed. For details, see the README.

The library itself is started via the { @link init } method. This will test the nativeMessaging connection, and then resolve into an Object offering the top level API:

```
* [encrypt]{ @link GpgME#encrypt }
* [decrypt]{ @link GpgME#decrypt }
* [sign]{ @link GpgME#sign }
* [verify]{ @link GpgME#verify }
* [Keyring]{ @link GPGME_Keyring }
```

---

```
gpgmejs.init()
 .then(function(GPGME) {
 // using GPGME
 }, function(error){
 // error handling;
 })

```

All methods that require communication with nativeMessaging are asynchronous, using Promises. Rejections will be instances of { @link GPGME\_Error }.

An exception are Keys, which can be initialized in a 'sync' mode, allowing them to be cached and used synchronously until manually refreshed.

## Keyring and Keys

-----

The gnupg keys can be accessed via the [Keyring]{ @link GPGME\_Keyring }.

The Keyring offers the methods for accessing information on all Keys known to gnupg.

\*\*Due to security constraints, the javascript-binding currently only offers limited support for secret-Key interaction.\*\*

The existence of secret Keys is not secret, and those secret Keys can be used for signing, but Operations that may expose, modify or delete secret Keys are not supported.

```
* [getKeysArmored]{ @link GPGME_Keyring#getKeysArmored }
* [getKeys]{ @link GPGME_Keyring#getKeys }
* [getDefaultKey]{ @link GPGME_Keyring#getDefaultKey }
* [generateKey]{ @link GPGME_Keyring#generateKey }
* [deleteKey]{ @link GPGME_Keyring#deleteKey }

```

This document provides basic instruction in how to use the GPGME Python bindings to programmatically leverage the GPGME library.

```

\subsection{Python 2 versus Python 3}
\label{sec:org517cbf4}

```

Though the GPGME Python bindings themselves provide support for both Python 2 and 3, the focus is unequivocally on Python 3 and specifically from Python 3.4 and above. As a consequence all the examples and instructions in this guide use Python 3 code.

Much of it will work with Python 2, but much of it also deals with Python 3 byte literals, particularly when reading and writing data. Developers concentrating on Python 2.7, and possibly even 2.6, will need to make the appropriate modifications to support the older string and unicode types as opposed to bytes.

There are multiple reasons for concentrating on Python 3; some of which relate to the immediate integration of these bindings, some of which relate to longer term plans for both GPGME and the python bindings and some of which relate to the impending EOL period for Python 2.7. Essentially, though, there is little value in tying the bindings to a version of the language which is a dead end and the advantages offered by Python 3 over Python 2 make handling the data types with which GPGME deals considerably easier.

`\subsection{Examples}`

`\label{sec:org2c08d53}`

All of the examples found in this document can be found as Python 3 scripts in the `\texttt{lang/python/examples/howto}` directory.

`\subsection{Unofficial Drafts}`

`\label{sec:orgceb2216}`

In addition to shipping with each release of GPGME, there is a section on locations to read or download `\hyperref[sec:org080a94a]{draft editions}` of this document from at the end of it. These are unofficial versions produced in between major releases.

`\subsection{What's New}`

`\label{sec:orga79ddc2}`

Full

details of what is new are now available in the `\href{what-is-new.org}{What's New}` file and archives of the preceding `\emph{What's New}` sections are available in the `\href{what-was-new}{What Was New}` file.

`\subsubsection{New in GPGME 1130}`

`\label{sec:org746b75d}`

See the `\href{what-is-new/#new-stuff-1-13-0}{What's New}` document for what is new in version 1.13.0.

`\subsubsection{New in GPGME 1120}`

`\label{sec:org7adcade}`

See the `\href{what-was-new/#new-stuff-1-12-0}{What Was New}` document for what was new in version 1.12.0.

\section{GPGME Concepts}

\label{sec:orgb257fc1}

\subsection{A C API}

\label{sec:org4fe1dfa}

Unlike many modern APIs with which programmers will be more familiar with these days, the GPGME API is a C API. The API is intended for use by C coders who would be able to access its features by including the `gpgme.h` header file with their own C source code and then access its functions just as they would any other C headers.

This is a very effective method of gaining complete access to the API and in the most efficient manner possible. It does, however, have the drawback that it cannot be directly used by other languages without some means of providing an interface to those languages. This is where the need for bindings in various languages stems.

\subsection{Python bindings}

\label{sec:org0e49e52}

The Python bindings for GPGME provide a higher level means of accessing the complete feature set of GPGME itself. It also provides a more pythonic means of calling these API functions.

The bindings are generated dynamically with SWIG and the copy of `gpgme.h` generated when GPGME is compiled.

This means that a version of the Python bindings is fundamentally tied to the exact same version of GPGME used to generate that copy of `gpgme.h`.

\subsection{Difference between the Python bindings and other GnuPG Python packages}

\label{sec:org97acfd7}

There have been numerous attempts to add GnuPG support to Python over the years. Some of the most well known are listed here, along with what differentiates them.

\subsubsection{The python-gnupg package maintained by Vinay Sajip}

\label{sec:org0136847}

This is arguably the most popular means of integrating GPG with Python. The package utilises the `subprocess` module to implement wrappers for the `gpg` and `gpg2` executables normally invoked on the command line (`gpg.exe` and `gpg2.exe` on Windows).

The popularity of this package stemmed from its ease of use and capability in providing the most commonly required features.

Unfortunately it has been beset by a number of security issues in the past; most of which stemmed from using unsafe methods of accessing the command line via the `\texttt{subprocess}` calls. While some effort has been made over the last two to three years (as of 2018) to mitigate this, particularly by no longer providing shell access through those subprocess calls, the wrapper is still somewhat limited in the scope of its GnuPG features coverage.

The python-gnupg package is available under the MIT license.

`\subsubsection{The gnupg package created and maintained by Isis Lovecruft}`  
`\label{sec:orgdc03987}`

In 2015 Isis Lovecruft from the Tor Project forked and then re-implemented the python-gnupg package as just gnupg. This new package also relied on subprocess to call the `\texttt{gpg}` or `\texttt{gpg2}` binaries, but did so somewhat more securely.

The naming and version numbering selected for this package, however, resulted in conflicts with the original python-gnupg and since its functions were called in a different manner to python-gnupg, the release of this package also resulted in a great deal of consternation when people installed what they thought was an upgrade that subsequently broke the code relying on it.

The gnupg package is available under the GNU General Public License version 3.0 (or any later version).

`\subsubsection{The PyME package maintained by Martin Albrecht}`

`\label{sec:org715600b}`

This package is the origin of these bindings, though they are somewhat different now. For details of when and how the PyME package was folded back into GPGME itself see the `\href{short-history.org}{Short History}` document.`\footnote{\texttt{short-history}}` and/or `\texttt{short-history.html}`.

The PyME package was first released in 2002 and was also the first attempt to implement a low level binding to GPGME. In doing so it provided access to considerably more functionality than either the `\texttt{python-gnupg}` or `\texttt{gnupg}` packages.

The PyME package is only available for Python 2.6 and 2.7.

Porting the PyME package to Python 3.4 in 2015 is what resulted in it being folded into the GPGME project and the current bindings are the end result of that effort.

The PyME package is available under the same dual licensing as GPGME itself: the GNU General Public License version 2.0 (or any later version) and the GNU Lesser General Public License version 2.1 (or any later version).

\section{GPGME Python bindings installation}

\label{sec:org73d8d6f}

\subsection{No PyPI}

\label{sec:org9a038}

Most third-party Python packages and modules are available and distributed through the Python Package Installer, known as PyPI.

Due to the nature of what these bindings are and how they work, it is infeasible to install the GPGME Python bindings in the same way.

This is because the bindings use SWIG to dynamically generate C bindings against \texttt{gpgme.h} and \texttt{gpgme.h} is generated from \texttt{gpgme.h.in} at compile time when GPGME is built from source. Thus to include a package in PyPI which actually built correctly would require either statically built libraries for every architecture bundled with it or a full implementation of C for each architecture.

See the additional notes regarding \hyperref[sec:org645735a]{CFFI and SWIG} at the end of this section for further details.

\subsection{Requirements}

\label{sec:org2f7f06c}

The

GPGME Python bindings only have three requirements:

\begin{enumerate}

\item A suitable version of Python 2 or Python 3. With Python 2 that means CPython 2.7 and with Python 3 that means CPython 3.4 or higher.

\item \href{https://www.swig.org}{SWIG}.

\item GPGME itself. Which also means that all of GPGME's dependencies must be installed too.

\end{enumerate}

\subsubsection{Recommended Additions}

\label{sec:org25bd7d4}

Though none of the following are absolute requirements, they are all recommended for use with the Python bindings. In some cases these recommendations refer to which version(s) of CPython to use the bindings with, while others refer to third party modules which provide a significant advantage in some way.

\begin{enumerate}

\item If possible, use Python 3 instead of 2.

\item Favour a more recent version of Python since even 3.4 is due to reach EOL soon. In production systems and services, Python 3.6 should be robust enough to be relied on.

\item If possible add the

following Python modules which are not part of

the standard library: \href{http://docs.python-requests.org/en/latest/index.html}{Requests},

\href{https://cython.org/}{Cython}, \href{https://pendulum.eustace.io/}{Pendulum} and

\href{https://github.com/Selfnet/hkp4py}{hkp4py}.

\end{enumerate}

Chances are quite high that at least the first one and maybe two of those will already be installed.

Note that, as with Cython, some of advanced use case scenarios will bring with them additional requirements. Most of these will be fairly well known and commonly installed ones, however, which are in many cases likely to have already been installed on many systems or be familiar to Python programmers.

\subsection{Installation}

\label{sec:orgf1c7587}

Installing the Python bindings is effectively achieved by compiling and installing GPGME itself.

Once SWIG is installed with Python and all the dependencies for GPGME are installed you only need to confirm that the version(s) of Python you want the bindings installed for are in your \texttt{\\$PATH}.

By default GPGME will attempt to install the bindings for the most recent or highest version number of Python 2 and Python 3 it detects in \texttt{\\$PATH}. It specifically checks for the \texttt{python} and \texttt{python3} executables first and then checks for specific version numbers.

For Python 2 it checks for these executables in this order: \texttt{python}, \texttt{python2} and \texttt{python2.7}.

For Python 3 it checks for these executables in this order: `python3`, `python3.7`, `python3.6`, `python3.5` and `python3.4`.<sup>footnote</sup>{With no issues reported specific to Python 3.7, the release of Python 3.7.1 at around the same time as GPGME 1.12.0 and the testing with Python 3.7.1rc1, there is no reason to delay moving 3.7 ahead of 3.6 now. Production environments with more conservative requirements will always enforce their own policies anyway and installation to each supported minor release is quite possible too.}

On systems where `python` is actually `python3` and not `python2` it may be possible that `python2` may be overlooked, but there have been no reports of that actually occurring as yet.

In the three months or so since the release of Python 3.7.0 there has been extensive testing and work with these bindings with no issues specifically relating to the new version of Python or any of the new features of either the language or the bindings. This has also been the case with Python 3.7.1rc1. With that in mind and given the release of Python 3.7.1 is scheduled for around the same time as GPGME 1.12.0, the order of preferred Python versions has been changed to move Python 3.7 ahead of Python 3.6.

#### `Installing GPGME`

`sec:org903bd67`

See the GPGME `README` file for details of how to install GPGME from source.

#### `Known Issues`

`sec:org0d2a332`

There are a few known issues with the current build process and the Python bindings. For the most part these are easily addressed should they be encountered.

#### `Breaking Builds`

`sec:orgbac75f3`

Occasionally when installing GPGME with the Python bindings included it may be observed that the `make` portion of that process induces a large very number of warnings and, eventually errors which end that part of the build process. Yet following that with `make check` and `make install` appears to work seamlessly.

The cause of this is related to the way SWIG needs to be called to dynamically generate the C bindings for GPGME in the first place. So

the entire process will always produce `\texttt{lang/python/python2-gpg/}` and `\texttt{lang/python/python3-gpg/}` directories. These should contain the build output generated during compilation, including the complete bindings and module installed into `\texttt{site-packages}`.

Occasionally the errors in the early part or some other conflict (e.g. not installing as `\textbf{\emph{root}}` or `\textbf{\emph{su}}`) may result in nothing being installed to the relevant `\texttt{site-packages}` directory and the build directory missing a lot of expected files. Even when this occurs, the solution is actually quite simple and will always work.

That solution is simply to run the following commands as either the `\textbf{root}` user or prepended with `\texttt{sudo -H}`<sup>Yes, even if you use virtualenv with everything you do in Python. If you want to install this module as just your user account then you will need to manually configure, compile and install the `\emph{entire}` GnuPG stack as that user as well. This includes libraries which are not often installed that way. It can be done and there are circumstances under which it is worthwhile, but generally only on POSIX systems which utilise single user mode (some even require it).</sup> in the `\texttt{lang/python/}` directory:

```
\begin{verbatim}
/path/to/pythonX.Y setup.py build
/path/to/pythonX.Y setup.py
build
/path/to/pythonX.Y setup.py install
\end{verbatim}
```

Yes, the build command does need to be run twice. Yes, you still need to run the potentially failing or incomplete steps during the `\texttt{configure}`, `\texttt{make}` and `\texttt{make install}` steps with installing GPGME. This is because those steps generate a lot of essential files needed, both by and in order to create, the bindings (including both the `\texttt{setup.py}` and `\texttt{gpgme.h}` files).

```
\begin{enumerate}
\item IMPORTANT Note
\label{sec:org37f3d4a}
If specifying a selected number of languages to create bindings for, try to leave Python last. Currently the majority of the other language bindings are also preceding Python of either version when listed alphabetically (not counting the Qt bindings).
```

If Python is set to precede one of the other languages then it is possible that the errors described here may interrupt the build

process before generating bindings for those other languages. In these cases it may be preferable to configure all preferred language bindings separately with alternative `\texttt{configure}` steps for GPGME using the `\texttt{-{ }-enable-languages=\$LANGUAGE}` option.

Alternatively `\texttt{make}` (or `\texttt{gmake}`, depending on your platform) may be run with the `\texttt{-k}` option, which tells make to keep going even if errors are encountered. In that case the failure of one language's set of bindings to build should not hamper another language's bindings to build.

`\end{enumerate}`

### `\subsubsection{Reinstalling Responsibly}`

`\label{sec:org21e4dec}`

Regardless of whether you're installing for one version of Python or several, there will come a point where reinstallation is required. With most Python module installations, the installed files go into the relevant site-packages directory and are then forgotten about. Then the module is upgraded, the new files are copied over the old and that's the end of the matter.

While the same is true of these bindings, there have been intermittent issues

observed on some platforms which have benefited significantly from removing all the previous installations of the bindings before installing the updated versions.

Removing the previous version(s) is simply a matter of changing to the relevant `\texttt{site-packages}` directory for the version of Python in question and removing the `\texttt{gpg/}` directory and any accompanying egg-info files for that module.

In most cases this will require root or administration privileges on the system, but the same is true of installing the module in the first place.

### `\subsubsection{Multiple installations}`

`\label{sec:org30b18bd}`

For a variety of reasons it may be either necessary or just preferable to install the bindings to alternative installed Python versions which meet the requirements of these bindings.

On POSIX systems this will generally be most simply achieved by running the manual installation commands (`build`, `build`, `install`) as described in the previous section for each Python

installation the bindings need to be installed to.

As per the SWIG documentation: the compilers, libraries and runtime used to build GPGME and the Python Bindings `\textbf{must}` match those used to compile Python itself, including the version number(s) (at least going by major version numbers and probably minor numbers too).

On most POSIX systems, including OS X, this will very likely be the case in most, if not all, cases.

Note that from GPGME [\href{https://dev.gnupg.org/rMff6ff616aea6f59b7f2ce1176492850ecdf3851e}](https://dev.gnupg.org/rMff6ff616aea6f59b7f2ce1176492850ecdf3851e) {1.12.1} the default installation installs to each version of Python it can find first. That is that it will currently install for the first copies of Python versions 2.7, 3.4, 3.5, 3.6, 3.7 and 3.8 (dev branch) that it finds. Usually this will be in the same prefix as GPGME itself, but is dictated by the `\texttt{\$PATH}` when the installation is performed. The above instructions can still be performed on other python installations which the installer does not find, including alternative prefixes.

#### \subsubsection{Won't Work With Windows}

\label{sec:org0ebae3a}

There are semi-regular reports of Windows users having considerable difficulty in installing and using the Python bindings at all. Very often, possibly even always, these reports come from Cygwin users and/or MinGW users and/or Msys2 users. Though not all of them have been confirmed, it appears that these reports have also come from people who installed Python using the Windows installer files from the [\href{https://python.org}](https://python.org) {Python website} (i.e. mostly MSI installers, sometimes self-extracting `\texttt{.exe}` files).

The Windows versions of Python are not built using Cygwin, MinGW or Msys2; they're built using Microsoft Visual Studio. Furthermore the version used is `\emph{considerably}` more advanced than the version which MinGW obtained a small number of files from many years ago in order to be able to compile anything at all. Not only that, but there are changes to the version of

Visual Studio between some micro releases, though that is particularly the case with Python 2.7, since it has been kept around far longer than it should have been.

There are two theoretical solutions to this issue:

\begin{enumerate}

\item Compile and install the GnuPG stack, including GPGME and the Python bindings using the same version of Microsoft Visual Studio used by the Python Foundation to compile the version of Python installed.

If there are multiple versions of Python then this will need to be done with each different version of Visual Studio used for those versions of Python.

\item Compile and install Python using the same tools used by choice, such as MinGW or Msys2.

\end{enumerate}

Do **not** use the official Windows installer for Python unless following the first method.

In this type of situation it may even be for the best to accept that there are less limitations on permissive software than free software and simply opt to use a recent version of the Community Edition of Microsoft Visual Studio to compile and build all of it, no matter what.

Investigations into the extent or the limitations of this issue are ongoing.

The following table lists the version of Microsoft Visual Studio which needs to be used when compiling GPGME and the Python bindings with each version of the CPython binary released <https://www.python.org/downloads/windows/>{for Windows}:

CPython & Microsoft product name & runtime filename
2.7.6 & Visual Studio 2008 & MSVCR90.DLL
3.4.0 & Visual Studio 2010 & MSVCR100.DLL
3.5.0 & Visual Studio 2015 & <b>see below</b>
3.6.0 & Visual Studio 2015 & <b>see below</b>
3.7.0 & Visual Studio 2017* & <b>see below</b>

It is important to note that MingW and Msys2 ship with the Visual C runtime from Microsoft Visual Studio 2005 and are thus **incompatible** with all the versions of CPython which can be used with the GPGME Python bindings.

It is

also important to note that from CPython 3.5 onwards, the Python Foundation has adopted the reworking of the Visual C runtime which was performed for Visual Studio 2015 and aimed at resolving many of these kinds of issues. Much greater detail on these issues and the correct file(s) to link to are available from Matthew Brett's invaluable page, [\href{https://matthew-brett.github.io/pydagogue/python\\\_msvc.html}](https://matthew-brett.github.io/pydagogue/python\_msvc.html){Using Microsoft Visual C with Python}. It is also worth reading the Microsoft Developer Network blog post on [\href{http://blogs.msdn.com/b/vcblog/archive/2015/03/03/introducing-the-universal-crt.aspx}](http://blogs.msdn.com/b/vcblog/archive/2015/03/03/introducing-the-universal-crt.aspx){the universal CRT} and Steve Dower's blog posts on Python extensions ([\href{http://stevedower.id.au/blog/building-for-python-3-5}](http://stevedower.id.au/blog/building-for-python-3-5){part 1} and [\href{http://stevedower.id.au/blog/building-for-python-3-5-part-two}](http://stevedower.id.au/blog/building-for-python-3-5-part-two){part 2}).

The second of those two posts by Steve Dower contains the details of specific configuration options required for compiling anything to be used with official CPython releases. In addition to those configuration and compiler settings to use, the versions of Visual Studio prior to Visual Studio 2015 did not support 64-bit systems by default. So compiling a 64-bit version of these bindings for a 64-bit version of CPython 2.7 or 3.4 requires additional work.

In addition to the blog posts, the [\href{https://wiki.python.org/moin/WindowsCompilers}](https://wiki.python.org/moin/WindowsCompilers){Windows compilers} wiki page on the CPython wiki is another essential reference on the relevant versions of Visual Studio to use and the degree of compatibility with CPython releases.

Eventually someone will ask why there isn't an installable binary for Windows, which the GPGME of the licenses do not preclude as long as the source code is available in conjunction with such a release.

The sheer number of versions of Visual Studio in conjunction with differing configuration options depending on the target Windows version and whether the architecture is 64-bit or 32-bit makes it difficult to provide a correct binary installer for Windows users. At the bare minimum doing so would require the GnuPG project compile ten different versions of the bindings with each release; both 32-bit and 64-bit versions for CPython 2.7 and 3.4, with 64-bit versions for both x86-64 (i.e. Intel and AMD) and ARM architectures for CPython 3.5, 3.6, 3.7 and later releases. That's the bare `\textbf{minimum}`, it'd probably be higher.

Additionally, with only a binary installation used in conjunction with the CPython installer from `\texttt{python.org}` the advanced options available which utilise [\hyperref\[sec:org3b53926\]{Cython}](https://cython.org) will not be able to be used at all. Cython depends on being able to compile the C code it generates and that too would need to utilise a matching runtime to both the installed version

of CPython and these bindings in order to work with the bindings.

Considering all of that, what do we recommend?

`\begin{enumerate}`

`\item` Use a recent version of CPython; at least 3.5, but ideally 3.6 or later.

`\item`

Use Visual Studio 2015 or the standalone build tools for Visual Studio 2017 (or later).

`\item` Compile both CPython and GPGME with these bindings using the tools selected in step 2.

`\item` Ignore MingW, Msys2 and the official CPython binary installers.

`\item` Be thankful the answer to this question wasn't simply to say something like, install Linux or install FreeBSD (or even Apple's OS X).

`\end{enumerate}`

`\subsection{CFFI is the Best and GPGME should use it instead of SWIG}`

`\label{sec:org645735a}`

There are many reasons for favouring <https://cffi.readthedocs.io/en/latest/overview.html> {CFFI} and proponents of it are quite happy to repeat these things as if all it would take to switch from SWIG to CFFI is repeating that list as if it were a new concept.

The fact is that there are things which Python's CFFI implementation cannot handle in the GPGME C code. Beyond that there are features of SWIG which are simply not available with CFFI at all. SWIG generates the

bindings to Python using the `\texttt{gpgme.h}` file, but that file is not a single version shipped with each release, it too is generated when GPGME is compiled.

CFFI is currently unable to adapt to such a potentially mutable codebase. If there were some means of applying SWIG's dynamic code generation to produce the Python/CFFI API modes of accessing the GPGME libraries (or the source source code directly), but such a thing does not exist yet either and it currently appears that work is needed in at least one of CFFI's dependencies before any of this can be addressed.

So if you're a massive fan of CFFI; that's great, but if you want this project to switch to CFFI then rather than just insisting that it

should, I'd suggest you volunteer to bring CFFI up to the level this project needs.

If you're actually seriously considering doing so, then I'd suggest taking the `gpgme-tool.c` file in the `GPGME/src/` directory and getting that to work with any of the CFFI API methods (not the ABI methods, they'll work with pretty much anything). When you start running into trouble with "ifdefs" then you'll know what sort of things are lacking. That doesn't even take into account the amount of work saved via SWIG's code generation techniques either.

`\subsubsection{Virtualised Environments}`

`\label{sec:orgb0d56f5}`

It is fairly common practice amongst Python developers to, as much as possible, use packages like `virtualenv` to keep various things that are to be installed from interfering with each other. Given how much of the GPGME bindings is often at odds with the usual pythonic way of doing things, it stands to reason that this would be called into question too.

As it happens the answer as to whether or not the bindings can be used with `virtualenv`, the answer is both yes and no.

In general we recommend installing to the relevant path and matching prefix of GPGME itself. Which means that when GPGME, and ideally the rest of the GnuPG stack, is installed to a prefix

like `/usr/local` or `/opt/local` then the bindings would need to be installed to the main Python installation and not a virtualised abstraction. Attempts to separate the two in the past have been known to cause weird and intermittent errors ranging from minor annoyances to complete failures in the build process.

As a consequence we only recommend building with and installing to the main Python installations within the same prefix as GPGME is installed to or which are found by GPGME's configuration stage immediately prior to running the make commands. Which is exactly what the compiling and installing process of GPGME does by default.

Once that is done, however, it appears that a copy of the compiled module may be installed into a `virtualenv` of the same major and minor version matching the build. Alternatively it is possible to utilise a `sites.pth` file in the `site-packages/` directory of a `virtualenv` installation, which links back to the system installations corresponding directory in order to import anything installed system

wide. This may or may not be appropriate on a case by case basis.

Though extensive testing of either of these options is not yet complete, preliminary testing of them indicates that both are viable as long as the main installation is complete. Which means that certain other options normally restricted to virtual environments are also available, including integration with pythonic test suites (e.g. [\href{https://docs.pytest.org/en/latest/index.html}](https://docs.pytest.org/en/latest/index.html){pytest}) and other large projects.

That said, it is worth reiterating the warning regarding non-standard installations. If one were to attempt to install the bindings only to a virtual environment without somehow also including the full GnuPG stack (or enough of it as to include GPGME) then it is highly likely that errors would be encountered at some point and more than a little likely that the build process itself would break.

If a degree of separation from the main operating system is still required in spite of these warnings, then consider other forms of virtualisation. Either a virtual machine (e.g. [\href{https://www.virtualbox.org/}](https://www.virtualbox.org/){VirtualBox}), a hardware emulation layer (e.g. [\href{https://www.qemu.org/}](https://www.qemu.org/){QEMU}) or an application container (e.g. [\href{https://www.docker.com/why-docker}](https://www.docker.com/why-docker){Docker}).

Finally it should be noted that the limited tests conducted thus far have been using the `\texttt{virtualenv}` command in a new directory to create the virtual python environment. As opposed to the standard `\texttt{python3 -m venv}` and it is possible that this will make a difference depending on the system and version of Python in use. Another option is to run the command `\texttt{python3 -m virtualenv /path/to/install/virtual/thingy}` instead.

`\section{Fundamentals}`

`\label{sec:org832642e}`

Before we can get to the fun stuff, there are a few matters regarding GPGME's design which hold true whether you're dealing with the C code directly or these Python bindings.

`\subsection{No REST}`

`\label{sec:org3d694ba}`

The first part of which is or will be fairly blatantly obvious upon viewing the first example, but it's worth reiterating anyway. That being that this API is `\emph{\textbf{not}}` a REST API. Nor indeed could it ever be one.

Most, if not all, Python programmers (and not just Python programmers)

know how easy it is to work with a RESTful API. In fact they've become so popular that many other APIs attempt to emulate REST-like behaviour as much as they are able. Right down to the use of JSON formatted output to facilitate the use of their API without having to retrain developers.

This API does not do that. It would not be able to do that and also provide access to the entire C API on which it's built. It does, however, provide a very pythonic interface on top of the direct bindings and it's this pythonic layer that this HOWTO deals with.

```
\subsection{Context}
\label{sec:org10e4004}
```

One of the reasons which prevents this API from being RESTful is that most operations require more than one instruction to the API to perform the task. Sure, there are certain functions which can be performed simultaneously, particularly if the result known or strongly anticipated (e.g. selecting and encrypting to a key known to be in the public keybox).

There are many more, however, which cannot be manipulated so readily: they must be performed in a specific sequence and the result of one operation has a direct bearing on the outcome of subsequent operations. Not merely by generating an error either.

When dealing with this type of persistent state on the web, full of both the RESTful and REST-like, it's most commonly referred to as a session. In GPGME, however, it is called a context and every operation type has one.

```
\section{Working with keys}
\label{sec:orgff114ca}
\subsection{Key selection}
\label{sec:org6589217}
```

Selecting keys to encrypt to or to sign with will be a common occurrence when working with GPGMe and the means available for doing so are quite simple.

They do depend on utilising a Context; however once the data is recorded in another variable, that Context does not need to be the same one which subsequent operations are performed.

The easiest way to select a specific key is by searching for that key's key ID or fingerprint, preferably the full fingerprint without

any spaces in it. A long key ID will probably be okay, but is not advised and short key IDs are already a problem with some being generated to match specific patterns. It does not matter whether the pattern is upper or lower case.

So this is the best method:

```
\begin{verbatim}
import gpg

k = gpg.Context().keylist(pattern="258E88DCBD3CD44D8E7AB43F6ECB6AF0DEADBEEF")
keys = list(k)
\end{verbatim}
```

This is passable and very likely to be common:

```
\begin{verbatim}
import gpg

k = gpg.Context().keylist(pattern="0x6ECB6AF0DEADBEEF")
keys = list(k)
\end{verbatim}
```

And this is a really bad idea:

```
\begin{verbatim}
import
gpg

k = gpg.Context().keylist(pattern="0xDEADBEEF")
keys = list(k)
\end{verbatim}
```

Alternatively it may be that the intention is to create a list of keys which all match a particular search string. For instance all the addresses at a particular domain, like this:

```
\begin{verbatim}
import gpg

ncsc = gpg.Context().keylist(pattern="ncsc.mil")
nsa = list(ncsc)
\end{verbatim}
```

```
\subsubsection{Counting keys}
\label{sec:org63a3d62}
```

Counting the number of keys in your public keybox (`\texttt{pubring.kbx}`), the

format which has superseded the old keyring format (`\texttt{pubring.gpg}` and `\texttt{secring.gpg}`), or the number of secret keys is a very simple task.

```
\begin{verbatim}
import gpg

c = gpg.Context()
seckeys = c.keylist(pattern=None, secret=True)
pubkeys = c.keylist(pattern=None, secret=False)

seclist = list(seckeys)
secnum = len(seclist)

publist = list(pubkeys)
pubnum = len(publist)

print("""
Number of secret keys: {0}
Number of public keys: {1}
""".format(secnum, pubnum))
\end{verbatim}
```

NOTE:

The [\hyperref\[sec.org3b53926\]{Cython}](https://sec.org3b53926) introduction in the [\hyperref\[sec.org944cc00\]{Advanced and Experimental}](https://sec.org944cc00)

section uses this same key counting code with Cython to demonstrate some areas where Cython can improve performance even with the bindings. Users with large public keyrings or keyboxes, for instance, should consider these options if they are comfortable with using Cython.

```
\subsection{Get key}
\label{sec:org26adb2e}
```

An alternative method of getting a single key via its fingerprint is available directly within a Context with `\texttt{Context().get\_key}`. This is the preferred method of selecting a key in order to modify it, sign or certify it and for obtaining relevant data about a single key as a part of other functions; when verifying a signature made by that key, for instance.

By default this method will select public keys, but it can select secret keys as well.

This first example demonstrates selecting the current key of Werner Koch, which is due to expire at the end of 2018:

```

\begin{verbatim}
import gpg

fingerprint = "80615870F5BAD690333686D0F2AD85AC1E42B367"
key = gpg.Context().get_key(fingerprint)
\end{verbatim}

```

Whereas this example demonstrates selecting the author's current key with the `\texttt{secret}` key word argument set to `\texttt{True}`:

```

\begin{verbatim}
import gpg

fingerprint = "DB4724E6FA4286C92B4E55C4321E4E2373590E5D"
key = gpg.Context().get_key(fingerprint, secret=True)
\end{verbatim}

```

It is, of course, quite possible to select expired, disabled and revoked keys with this function, but only to effectively display information about those keys.

It is also possible to use both unicode or string literals and byte literals with the fingerprint when getting a key in this way.

```

\subsection{Importing keys}
\label{sec:org1ad598a}

```

Importing keys is possible with the `\texttt{key\_import()}` method and takes one argument which is a bytes literal object containing either the binary or ASCII armoured key data for one or more keys.

The following example retrieves one or more keys from the SKS key servers via the web using the requests module. Since requests returns the content as a bytes literal object, we can then use that directly to import the resulting data into our keybox.

```

\begin{verbatim}
import gpg
import os.path
import requests

c = gpg.Context()
url = "https://sks-key servers.net/pks/lookup"
pattern = input("Enter the pattern to search for key or user IDs: ")
payload = {"op": "get", "search": pattern}

r = requests.get(url, verify=True, params=payload)

```

```
result = c.key_import(r.content)
```

```
if result is not None and hasattr(result, "considered") is False:
```

```
 print(result)
```

```
elif result is not None and hasattr(result, "considered") is True:
```

```
 num_keys = len(result.imports)
```

```
 new_revs = result.new_revocations
```

```
 new_sigs = result.new_signatures
```

```
 new_subs = result.new_sub_keys
```

```
 new_uids = result.new_user_ids
```

```
 new_scr = result.secret_imported
```

```
 nochange = result.unchanged
```

```
 print("""
```

```
The total number of keys considered for import was: {0}
```

```
 Number of keys revoked: {1}
```

```
 Number of new signatures: {2}
```

```
 Number of new subkeys: {3}
```

```
 Number of new user IDs: {4}
```

```
 Number of new secret keys: {5}
```

```
 Number of unchanged keys: {6}
```

```
The key IDs for all considered keys were:
```

```
"".format(num_keys, new_revs, new_sigs, new_subs, new_uids, new_scr,
 nochange))
```

```
for i in range(num_keys):
```

```
 print("{0}\n".format(result.imports[i].fpr))
```

```
else:
```

```
 pass
```

```
\end{verbatim}
```

NOTE: When searching for a key ID of any length or a fingerprint (without spaces), the SKS servers require the the leading `\texttt{0x}` indicative of hexadecimal be included. Also note that the old short key IDs (e.g. `\texttt{0xDEADBEEF}`) should no longer be used due to the relative ease by which such key IDs can be reproduced, as demonstrated by the Evil32 Project in 2014 (which was subsequently exploited in 2016).

Testing for whether a string in any given search is or may be a hexadecimal

value which may be missing the leading `\texttt{0x}` is a simple matter of using a try/except statement which attempts to convert the string as hex to an integer and then back to hex; then using that to search with. Raising a `ValueError` simply results in treating the string as a string. This is the method and logic utilised in the `\texttt{import-keys-hkp.py}` script (see below).

```
\subsection{Working with ProtonMail}
```

```
\label{sec:org27b0d6f}
```

Here is a variation on the example above which checks the constrained ProtonMail keyserver for ProtonMail public keys.

```
\begin{verbatim}
```

```
import gpg
```

```
import requests
```

```
import sys
```

```
print("""
```

```
This script searches the ProtonMail key server for the specified key and imports it.
```

```
""")
```

```
c = gpg.Context(armor=True)
```

```
url = "https://api.protonmail.ch/pks/lookup"
```

```
ksearch = []
```

```
if len(sys.argv) >= 2:
```

```
 keyterm = sys.argv[1]
```

```
else:
```

```
 keyterm = input("Enter the key ID, UID or search string: ")
```

```
if keyterm.count("@") == 2 and keyterm.startswith("@") is
```

```
True:
```

```
 ksearch.append(keyterm[1:])
```

```
 ksearch.append(keyterm[1:])
```

```
 ksearch.append(keyterm[1:])
```

```
elif keyterm.count("@") == 1 and keyterm.startswith("@") is True:
```

```
 ksearch.append("{}@protonmail.com".format(keyterm[1:]))
```

```
 ksearch.append("{}@protonmail.ch".format(keyterm[1:]))
```

```
 ksearch.append("{}@pm.me".format(keyterm[1:]))
```

```
elif keyterm.count("@") == 0:
```

```
 ksearch.append("{}@protonmail.com".format(keyterm))
```

```
 ksearch.append("{}@protonmail.ch".format(keyterm))
```

```
 ksearch.append("{}@pm.me".format(keyterm))
```

```
elif keyterm.count("@") == 2 and keyterm.startswith("@") is False:
```

```
 uidlist = keyterm.split("@")
```

```
 for uid in uidlist:
```

```
 ksearch.append("{}@protonmail.com".format(uid))
```

```
 ksearch.append("{}@protonmail.ch".format(uid))
```

```
 ksearch.append("{}@pm.me".format(uid))
```

```
elif keyterm.count("@") > 2:
```

```
 uidlist = keyterm.split("@")
```

```
 for uid in uidlist:
```

```
 ksearch.append("{}@protonmail.com".format(uid))
```

```

ksearch.append("{0}@protonmail.ch".format(uid))
ksearch.append("{0}@pm.me".format(uid))
else:
 ksearch.append(keyterm)

for k in ksearch:
 payload = {"op": "get", "search": k}
 try:
 r = requests.get(url, verify=True, params=payload)
 if r.ok is True:
 result = c.key_import(r.content)
 elif r.ok is False:
 result = r.content
 except Exception as e:
 result = None

 if result is not None and hasattr(result, "considered") is False:
 print("{0} for {1}".format(result.decode(), k))
 elif result is not None and hasattr(result, "considered") is True:
 num_keys = len(result.imports)
 new_revs = result.new_revocations
 new_sigs = result.new_signatures
 new_subs = result.new_sub_keys
 new_uids = result.new_user_ids
 new_s crt = result.secret_imported
 nochange = result.unchanged
 print("""
The total number of keys considered for import was: {0}

```

With UIDs wholly or partially matching the following string:

```
{1}
```

```

Number of keys revoked: {2}
Number of new signatures: {3}
Number of new subkeys: {4}
Number of new user IDs: {5}
Number of new secret keys: {6}
Number of unchanged keys: {7}

```

The key IDs for all considered keys were:

```

"".format(num_keys, k, new_revs, new_sigs, new_subs, new_uids, new_s crt,
nochange))
for i in range(num_keys):
 print(result.imports[i].fpr)
 print("")
elif result is None:

```

```
print(e)
\end{verbatim}
```

Both the above example, , and a version which prompts for an alternative GnuPG home directory, , are available with the other examples and are executable scripts.

Note that while the ProtonMail servers are based on the SKS servers, their server is related more to their API and is not feature complete by comparison to the servers in the SKS pool. One notable difference being that the ProtonMail server does not permit non ProtonMail users to update their own keys, which could be a vector for attacking ProtonMail users who may not receive a key's revocation if it had been compromised.

#### \subsection{Importing with HKP for Python}

\label{sec:org592d7ab}

Performing the same tasks with the  (available via PyPI) is not too much different, but does provide a number of options of benefit to end users. Not least of which being the ability to perform some checks on a key before importing it or not. For instance it may be the policy of a site or project to only import keys which have not been revoked. The hkp4py module permits such checks prior to the importing of the keys found.

```
\begin{verbatim}
```

```
import gpg
```

```
import hkp4py
```

```
import sys
```

```
c = gpg.Context()
```

```
server = hkp4py.KeyServer("hkps://hkps.pool.sks-keyservers.net")
```

```
results = []
```

```
keys = []
```

```
if len(sys.argv) > 2:
```

```
 pattern = " ".join(sys.argv[1:])
```

```
elif
```

```
 len(sys.argv) == 2:
```

```
 pattern = sys.argv[1]
```

```
else:
```

```
 pattern = input("Enter the pattern to search for keys or user IDs: ")
```

```
if pattern is not None:
```

```

try:
 key = server.search(hex(int(pattern, 16)))
 keyed = True
except ValueError as ve:
 key = server.search(pattern)
 keyed = False

if key is not None:
 keys.append(key[0])
 if keyed is True:
 try:
 fob = server.search(pattern)
 except:
 fob = None
 if fob is not None:
 keys.append(fob[0])
 else:
 pass
else:
 pass

for logrus in pattern.split():
 try:
 key = server.search(hex(int(logrus, 16)))
 hexed = True
 except ValueError as ve:
 key = server.search(logrus)
 hexed = False

 if key is not None:
 keys.append(key[0])
 if hexed is True:
 try:
 fob = server.search(logrus)
 except:
 fob = None
 if fob is not None:
 keys.append(fob[0])
 else:
 pass
 else:
 pass

if len(keys) > 0:
 for key in keys:
 import_result = c.key_import(key.key_blob)

```

```
results.append(import_result)
```

for result in results:

```
if result is not None and hasattr(result, "considered") is False:
```

```
 print(result)
```

```
elif result is not None and hasattr(result, "considered") is True:
```

```
 num_keys = len(result.imports)
```

```
 new_revs = result.new_revocations
```

```
 new_sigs = result.new_signatures
```

```
 new_subs = result.new_sub_keys
```

```
 new_uids = result.new_user_ids
```

```
 new_scert = result.secret_imported
```

```
 nochange = result.unchanged
```

```
 print("""
```

```
The total number of keys considered for import was: {0}
```

```
 Number of keys revoked: {1}
```

```
 Number of new signatures: {2}
```

```
 Number of new subkeys: {3}
```

```
 Number
```

```
of new user IDs: {4}
```

```
 Number of new secret keys: {5}
```

```
 Number of unchanged keys: {6}
```

The key IDs for all considered keys were:

```
"".format(num_keys, new_revs, new_sigs, new_subs, new_uids, new_scert,
 nochange))
```

```
for i in range(num_keys):
```

```
 print(result.imports[i].fpr)
```

```
 print("")
```

```
else:
```

```
 pass
```

```
\end{verbatim}
```

Since the hkp4py module handles multiple keys just as effectively as one (the list of responses per matching key), the example above is able to do a little bit more with the returned data before anything is actually imported.

**Importing from ProtonMail with HKP for Python**

**sec:org3966a76**

Though this can provide certain benefits even when working with ProtonMail, the scope is somewhat constrained there due to the limitations of the ProtonMail keyserver.

For instance, searching the SKS keyserver pool for the term "gnupg" produces hundreds of results from any time the word appears in any

part of  
a user ID. Performing the same search on the ProtonMail  
keyserver returns zero results, even though there are at least two  
test accounts which include it as part of the username.

The cause of this discrepancy is the deliberate configuration of that  
server by ProtonMail to require an exact match of the full email  
address of the ProtonMail user whose key is being requested.  
Presumably this is intended to reduce breaches of privacy of their  
users as an email address must already be known before a key for that  
address can be obtained.

```
\begin{enumerate}
```

```
\item Import from ProtonMail via HKP for Python Example no. 1
```

```
\label{sec:org6cd15c3}
```

The following script is available with the rest of the examples under  
the somewhat less than original name, `\texttt{pmkey-import-hkp.py}`.

```
\begin{verbatim}
```

```
import gpg
```

```
import hkp4py
```

```
import os.path
```

```
import sys
```

```
print("""
```

```
This script searches the ProtonMail key server for the specified key and
imports it.
```

```
Usage: pmkey-import-hkp.py [search strings]
```

```
""")
```

```
c
```

```
= gpg.Context(armor=True)
```

```
server = hkp4py.KeyServer("hkps://api.protonmail.ch")
```

```
keyterms = []
```

\item Import from ProtonMail via HKP for Python Example no. 2

\label{sec:org3b674e5}

Like its counterpart above, this script can also be found with the rest of the examples, by the name pmkey-import-hkp-alt.py.

With this script a modicum of effort has been made to treat anything passed as a \texttt{homedir} which either does not exist or which is not a directory, as also being a possible user ID to check for. It's not guaranteed to pick up on all such cases, but it should cover most of

them.

```
\begin{verbatim}
import gpg
import hkp4py
import os.path
import sys

print("""
This script searches the ProtonMail key server
for the specified key and
imports it. Optionally enables specifying a different GnuPG home directory.

Usage: pmkey-import-hkp.py [homedir] [search string]
or: pmkey-import-hkp.py [search string]
""")
```

```
c = gpg.Context(armor=True)
server = hkp4py.KeyServer("hkps://api.protonmail.ch")

\subsection{Exporting keys}

\label{sec:org4596a77}

Exporting keys remains a reasonably simple task, but has been separated into three different functions for the OpenPGP cryptographic engine. Two of those functions are for exporting public keys and the third is for exporting secret keys.

\subsubsection{Exporting  
public keys}

\label{sec:org873704f}

There are two methods of exporting public keys, both of which are very similar to the other. The default method, \code{key\\_export()}, will export a public key or keys matching a specified pattern as normal. The alternative, the \code{key\\_export\\_minimal()} method, will do the same thing except producing a minimised output with extra signatures and third party signatures or certifications removed.

\begin{verbatim}

```
import gpg
```

```
import os.path
```

```
import sys
```

```
print("""
```

```
This script exports one or more public keys.
```

```
""")
```

```
c = gpg.Context(armor=True)
```

```
if len(sys.argv) >= 4:
```

```
 keyfile = sys.argv[1]
```

```
 logrus = sys.argv[2]
```

```
 homedir = sys.argv[3]
```

```
elif len(sys.argv) == 3:
```

```
 keyfile = sys.argv[1]
```

```
 logrus = sys.argv[2]
```

```

 homedir = input("Enter the GPG configuration directory path (optional): ")
elif len(sys.argv) == 2:
 keyfile = sys.argv[1]
 logrus = input("Enter the UID matching the key(s) to export: ")
 homedir = input("Enter the
GPG configuration directory path (optional): ")
else:
 keyfile = input("Enter the path and filename to save the secret key to: ")
 logrus = input("Enter the UID matching the key(s) to export: ")
 homedir = input("Enter the GPG configuration directory path (optional): ")

if homedir.startswith("~"):
 if os.path.exists(os.path.expanduser(homedir)) is True:
 c.home_dir = os.path.expanduser(homedir)
 else:
 pass
elif os.path.exists(homedir) is True:
 c.home_dir = homedir
else:
 pass

try:
 result = c.key_export(pattern=logrus)
except:
 result = c.key_export(pattern=None)

if result is not None:
 with open(keyfile, "wb") as f:
 f.write(result)
else:
 pass
\end{verbatim}

```

It should be noted that the result will only return `None` when a search pattern has been entered, but has not matched any keys. When the search pattern itself is set to `None` this triggers the exporting of the entire public keybox.

```

\begin{verbatim}
import
 gpg
import os.path
import sys

print("""
This script exports one or more public keys in minimised form.
""")

```

```

c = gpg.Context(armor=True)

if len(sys.argv) >= 4:
 keyfile = sys.argv[1]
 logrus = sys.argv[2]
 homedir = sys.argv[3]
elif len(sys.argv) == 3:
 keyfile = sys.argv[1]
 logrus = sys.argv[2]
 homedir = input("Enter the GPG configuration directory path (optional): ")
elif len(sys.argv) == 2:
 keyfile = sys.argv[1]
 logrus = input("Enter the UID matching the key(s) to export: ")
 homedir = input("Enter the GPG configuration directory path (optional): ")
else:
 keyfile = input("Enter the path and filename to save the secret key to: ")
 logrus = input("Enter the UID matching the key(s) to export: ")
 homedir = input("Enter the GPG configuration directory path (optional): ")

if homedir.startswith("~"):
 if os.path.exists(os.path.expanduser(homedir)) is True:
 c.home_dir = os.path.expanduser(homedir)
 else:
 pass
elif os.path.exists(homedir)
is True:
 c.home_dir = homedir
else:
 pass

try:
 result = c.key_export_minimal(pattern=logrus)
except:
 result = c.key_export_minimal(pattern=None)

if result is not None:
 with open(keyfile, "wb") as f:
 f.write(result)
else:
 pass
\end{verbatim}

```

\subsubsection{Exporting secret keys }

\label{sec:org6c28d3d }

Exporting secret keys is, functionally, very similar to exporting public keys; save for the invocation of `\texttt{pinentry}` via `\texttt{gpg-agent}` in order to securely enter the key's passphrase and authorise the export.

The following example exports the secret key to a file which is then set with the same permissions as the output files created by the command line secret key export options.

```
\begin{verbatim}
import gpg
import os
import os.path
import sys

print("""
This script exports one or more secret keys.

The gpg-agent and pinentry are invoked to authorise the export.
""")

c = gpg.Context(armor=True)

if len(sys.argv) >= 4:
 keyfile
 = sys.argv[1]
 logrus = sys.argv[2]
 homedir = sys.argv[3]
elif len(sys.argv) == 3:
 keyfile = sys.argv[1]
 logrus = sys.argv[2]
 homedir = input("Enter the GPG configuration directory path (optional): ")
elif len(sys.argv) == 2:
 keyfile = sys.argv[1]
 logrus = input("Enter the UID matching the secret key(s) to export: ")
 homedir = input("Enter the GPG configuration directory path (optional): ")
else:
 keyfile = input("Enter the path and filename to save the secret key to: ")
 logrus = input("Enter the UID matching the secret key(s) to export: ")
 homedir = input("Enter the GPG configuration directory path (optional): ")

if len(homedir) == 0:
 homedir = None
elif homedir.startswith("~"):
 userdir = os.path.expanduser(homedir)
 if os.path.exists(userdir) is True:
 homedir = os.path.realpath(userdir)
 else:
 homedir = None
else:
 homedir = os.path.realpath(homedir)

```

```

if os.path.exists(homedir) is False:
 homedir =
 None
else:
 if os.path.isdir(homedir) is False:
 homedir = None
 else:
 pass

if homedir is not None:
 c.home_dir = homedir
else:
 pass

try:
 result = c.key_export_secret(pattern=logrus)
except:
 result = c.key_export_secret(pattern=None)

if result is not None:
 with open(keyfile, "wb") as f:
 f.write(result)
 os.chmod(keyfile, 0o600)
else:
 pass
\end{verbatim}

```

Alternatively the approach of the following script can be used. This longer example saves the exported secret key(s) in files in the GnuPG home directory, in addition to setting the file permissions as only readable and writable by the user. It also exports the secret key(s) twice in order to output both GPG binary (`\texttt{.gpg}`) and ASCII armoured (`\texttt{.asc}`) files.

```

\begin{verbatim}
import gpg
import os
import os.path
import subprocess
import sys

print("""
This script exports one or more secret keys as both ASCII armored and binary
file formats, saved in files within the
user's GPG home directory.

The gpg-agent and pinentry are invoked to authorise the export.
""")

```

```

if sys.platform == "win32":
 gpgconfcmd = "gpgconf.exe --list-dirs homedir"
else:
 gpgconfcmd = "gpgconf --list-dirs homedir"

a = gpg.Context(armor=True)
b = gpg.Context()
c = gpg.Context()

if len(sys.argv) >= 4:
 keyfile = sys.argv[1]
 logrus = sys.argv[2]
 homedir = sys.argv[3]
elif len(sys.argv) == 3:
 keyfile = sys.argv[1]
 logrus = sys.argv[2]
 homedir = input("Enter the GPG configuration directory path (optional): ")
elif len(sys.argv) == 2:
 keyfile = sys.argv[1]
 logrus = input("Enter the UID matching the secret key(s) to export: ")
 homedir = input("Enter the GPG configuration directory path (optional): ")
else:
 keyfile = input("Enter the filename to save the secret key to: ")
 logrus = input("Enter the UID matching the secret key(s) to export: ")
 homedir = input("Enter the GPG configuration directory path (optional): ")

if len(homedir)
== 0:
 homedir = None
elif homedir.startswith("~"):
 userdir = os.path.expanduser(homedir)
 if os.path.exists(userdir) is True:
 homedir = os.path.realpath(userdir)
 else:
 homedir = None
else:
 homedir = os.path.realpath(homedir)

if os.path.exists(homedir) is False:
 homedir = None
else:
 if os.path.isdir(homedir) is False:
 homedir = None
 else:
 pass

if homedir is not None:

```

```

 c.home_dir = homedir
else:
 pass

if c.home_dir is not None:
 if c.home_dir.endswith("/"):
 gpgfile = "{0}/{1}.gpg".format(c.home_dir, keyfile)
 ascfile = "{0}/{1}.asc".format(c.home_dir, keyfile)
 else:
 gpgfile = "{0}/{1}.gpg".format(c.home_dir, keyfile)
 ascfile = "{0}/{1}.asc".format(c.home_dir, keyfile)
else:
 if os.path.exists(os.environ["GNUPGHOME"]) is True:
 hd = os.environ["GNUPGHOME"]
 else:
 try:
 hd = subprocess.getoutput(gpgconfcmd)
 except:
 process = subprocess.Popen(gpgconfcmd.split(),
 stdout=subprocess.PIPE)
 procom = process.communicate()
 if sys.version_info[0] == 2:
 hd = procom[0].strip()
 else:
 hd = procom[0].decode().strip()
 gpgfile = "{0}/{1}.gpg".format(hd, keyfile)
 ascfile = "{0}/{1}.asc".format(hd, keyfile)

try:
 a_result = a.key_export_secret(pattern=logrus)
 b_result = b.key_export_secret(pattern=logrus)
except:
 a_result = a.key_export_secret(pattern=None)
 b_result = b.key_export_secret(pattern=None)

if a_result is not None:
 with open(ascfile, "wb") as f:
 f.write(a_result)
 os.chmod(ascfile, 0o600)
else:
 pass

if b_result is not None:
 with open(gpgfile, "wb") as f:
 f.write(b_result)
 os.chmod(gpgfile, 0o600)
else:
 pass

```

```
\end{verbatim}
```

```
\subsubsection{Sending public keys to the SKS Keyserver}
```

```
\label{sec:org82d4958}
```

As with the previous section on importing keys, the `hkp4py` module adds another option with exporting keys in order to send them to the public keyserver.

The following example demonstrates how this may be done.

```
\begin{verbatim}
```

```
import gpg
```

```
import hkp4py
```

```
import os.path
```

```
import sys
```

```
print("""
```

```
This script sends one or more public keys to the SKS keyserver and is essentially a slight variation on the export-key.py script.
```

```
""")
```

```
c = gpg.Context(armor=True)
```

```
server = hkp4py.KeyServer("hkps://hkps.pool.sks-keyserver.net")
```

```
if len(sys.argv) > 2:
```

```
 logrus = " ".join(sys.argv[1:])
```

```
elif len(sys.argv) == 2:
```

```
 logrus = sys.argv[1]
```

```
else:
```

```
 logrus = input("Enter the UID matching the key(s) to send: ")
```

```
if len(logrus) > 0:
```

```
 try:
```

```
 export_result = c.key_export(pattern=logrus)
```

```
 except Exception as e:
```

```
 print(e)
```

```
 export_result = None
```

```
else:
```

```
 export_result = c.key_export(pattern=None)
```

```
if export_result is not None:
```

```
 try:
```

```
 try:
```

```
 send_result = server.add(export_result)
```

```
 except:
```

```

 send_result = server.add(export_result.decode())
 if send_result is not None:
 print(send_result)
 else:
 pass
except Exception as e:
 print(e)
else:
 pass
\end{verbatim}

```

An expanded version of this script with additional functions for specifying an alternative homedir location is in the examples directory as `\texttt{send-key-to-keyserver.py}`.

The `\texttt{hkp4py}` module appears to handle both string and byte literal text data equally well, but the GPGME bindings deal primarily with byte literal data only and so this script sends in that format first, then tries the string literal form.

`\section{Basic Functions}`

`\label{sec:orgb40b488}`

The most frequently called features of any cryptographic library will be the most fundamental tasks for encryption software. In this section we will look at how to programmatically encrypt data, decrypt it, sign it and verify signatures.

`\subsection{Encryption}`

`\label{sec:org3170365}`

Encrypting

is very straight forward. In the first example below the message, `\texttt{text}`, is encrypted to a single recipient's key. In the second example the message will be encrypted to multiple recipients.

`\subsubsection{Encrypting to one key}`

`\label{sec:org8098c64}`

Once the the Context is set the main issues with encrypting data is essentially reduced to key selection and the keyword arguments specified in the `\texttt{gpg.Context().encrypt()}` method.

Those keyword arguments are: `\texttt{recipients}`, a list of keys encrypted to (covered in greater detail in the following section); `\texttt{sign}`, whether or not to sign the plaintext data, see subsequent sections on signing and verifying signatures below (defaults to `\texttt{True}`); `\texttt{sink}`, to write results or partial results to a secure sink instead of returning it

(defaults to `\texttt{None}`); `\texttt{passphrase}`, only used when utilising symmetric encryption (defaults to `\texttt{None}`); `\texttt{always\_trust}`, used to override the trust model settings for recipient keys (defaults to `\texttt{False}`); `\texttt{add\_encrypt\_to}`, utilises any preconfigured `\texttt{encrypt-to}` or `\texttt{default-key}` settings in the user's `\texttt{gpg.conf}` file (defaults to `\texttt{False}`); `\texttt{prepare}`, prepare for encryption (defaults to `\texttt{False}`); `\texttt{expect\_sign}`, prepare for signing (defaults to `\texttt{False}`); `\texttt{compress}`, compresses the plaintext prior to encryption (defaults to `\texttt{True}`).

```
\begin{verbatim}
import gpg

a_key = "0x12345678DEADBEEF"
text = b""Some text to test with.
```

Since the text in this case must be bytes, it is most likely that the input form will be a separate file which is opened with "rb" as this is the simplest method of obtaining the correct data format.

```
""""

c = gpg.Context(armor=True)
rkey = list(c.keylist(pattern=a_key, secret=False))
ciphertext, result, sign_result = c.encrypt(text, recipients=rkey, sign=False)

with open("secret_plans.txt.asc", "wb") as afile:
 afile.write(ciphertext)
\end{verbatim}
```

Though this is even more likely to be used like this; with the plaintext input read from a file, the recipient keys used for encryption regardless of key trust status and the encrypted output also encrypted to any preconfigured keys set in the `\texttt{gpg.conf}` file:

```
\begin{verbatim}
import gpg

a_key = "0x12345678DEADBEEF"

with open("secret_plans.txt", "rb") as afile:
 text = afile.read()

c = gpg.Context(armor=True)
rkey = list(c.keylist(pattern=a_key, secret=False))
ciphertext, result, sign_result = c.encrypt(text, recipients=rkey, sign=True,
 always_trust=True,
 add_encrypt_to=True)
```

```
with open("secret_plans.txt.asc", "wb") as afile:
```

```
 afile.write(ciphertext)
```

```
\end{verbatim}
```

If the `\texttt{recipients}` parameter is empty then the plaintext is encrypted symmetrically. If no `\texttt{passphrase}` is supplied as a parameter or via a callback registered with

the `\texttt{Context()}` then an out-of-band prompt

for the passphrase via `pinentry` will be invoked.

```
\subsection{Encrypting to multiple keys}
```

```
\label{sec:orgdcf6e47}
```

Encrypting to multiple keys essentially just expands upon the key selection process and the recipients from the previous examples.

The following example encrypts a message (`\texttt{text}`) to everyone with an email address on the `\texttt{gnupg.org}` domain,\footnote{You probably don't really want to do this. Searching the key servers for "gnupg.org" produces over 400 results, the majority of which aren't actually at the gnupg.org domain, but just included a comment regarding the project in their key somewhere.} but does `\emph{not}` encrypt to a default key or other key which is configured to normally encrypt to.

```
\begin{verbatim}
```

```
import gpg
```

```
text = b""Oh look, another test message.
```

The same rules apply as with the previous example and more likely than not, the message will actually be drawn from reading the contents

of a file or, maybe, from entering data at an `input()`

prompt.

Since the text in this case must be bytes, it is most likely that the input form will be a separate file which is opened with `"rb"` as this is the simplest method of obtaining the correct data format.

```
"""
```

```
c = gpg.Context(armor=True)
```

```
rpattern = list(c.keylist(pattern="@gnupg.org", secret=False))
```

```
logrus = []
```

```
for i in range(len(rpattern)):
```

```
 if rpattern[i].can_encrypt == 1:
```

```
 logrus.append(rpattern[i])
```

```
ciphertext, result, sign_result = c.encrypt(text, recipients=logrus,
 sign=False, always_trust=True)
```

```
with open("secret_plans.txt.asc", "wb") as afile:
 afile.write(ciphertext)
\end{verbatim}
```

All it would take to change the above example to sign the message and also encrypt the message to any configured default keys would be to change the `c.encrypt` line to this:

```
\begin{verbatim}
ciphertext, result, sign_result = c.encrypt(text, recipients=logrus,

 always_trust=True,
 add_encrypt_to=True)
\end{verbatim}
```

The only keyword arguments requiring modification are those for which the default values are changing. The default value of `sign` is `True`, the default of `always_trust` is `False`, the default of `add_encrypt_to` is `False`.

If `always_trust` is not set to `True` and any of the recipient keys are not trusted (e.g. not signed or locally signed) then the encryption will raise an error. It is possible to mitigate this somewhat with something more like this:

```
\begin{verbatim}
import gpg

with open("secret_plans.txt.asc", "rb") as afile:
 text = afile.read()

c = gpg.Context(armor=True)
rpattern = list(c.keylist(pattern="@gnupg.org", secret=False))
logrus = []

for i in range(len(rpattern)):
 if rpattern[i].can_encrypt == 1:
 logrus.append(rpattern[i])

 try:
 ciphertext, result,
sign_result = c.encrypt(text, recipients=logrus,
 add_encrypt_to=True)
 except gpg.errors.InvalidRecipients as e:
```

```

for i in range(len(e.recipients)):
 for n in range(len(logrus)):
 if logrus[n].fpr == e.recipients[i].fpr:
 logrus.remove(logrus[n])
 else:
 pass
try:
 ciphertext, result, sign_result = c.encrypt(text,
 recipients=logrus,
 add_encrypt_to=True)
 with open("secret_plans.txt.asc", "wb") as afile:
 afile.write(ciphertext)
except:
 pass
\end{verbatim}

```

This will attempt to encrypt to all the keys searched for, then remove invalid recipients if it fails and try again.

```

\subsection{Decryption}
\label{sec:org1282b3d}

```

Decrypting something encrypted to a key in one's secret keyring is fairly straight forward.

In this example code, however, preconfiguring either `gpg.Context()` or `gpg.core.Context()` as `c` is unnecessary because there is no need to modify the Context prior to conducting the decryption and since the Context is only used once, setting it to `c` simply adds lines for no gain.

```

\begin{verbatim}
import gpg

ciphertext = input("Enter path and filename of encrypted file: ")
newfile = input("Enter path and filename of file to save decrypted data to: ")

with open(ciphertext, "rb") as cfile:
 try:
 plaintext, result, verify_result = gpg.Context().decrypt(cfile)
 except gpg.errors.GPGMEError as e:
 plaintext = None
 print(e)

if plaintext is not None:
 with open(newfile, "wb") as nfile:
 nfile.write(plaintext)

```

```
else:
 pass
\end{verbatim}
```

The data available in `\texttt{plaintext}` in this example is the decrypted content as a byte object, the recipient key IDs and algorithms in `\texttt{result}` and the results of verifying any signatures of the data in `\texttt{verify\_result}`.

If `\texttt{gpg.Context().decrypt(cfile, verify=False)}` is called instead, then `\texttt{verify\_result}` will be returned as `\texttt{None}` and the rest remains as described here.

```
\subsection{Signing text and files}
\label{sec:org59f1262}
```

The following sections demonstrate how to specify keys to sign with.

```
\subsubsection{Signing key selection}
\label{sec:org909cb3c}
```

By default GPGME and the Python bindings will use the default key configured for the user invoking the GPGME API. If there is no default key specified and there is more than one secret key available it may be necessary to specify the key or keys with which to sign messages and files.

```
\begin{verbatim}
import gpg

logrus = input("Enter the email address or string to match signing keys to: ")
hancock = gpg.Context().keylist(pattern=logrus, secret=True)
sig_src = list(hancock)
\end{verbatim}
```

The signing examples in the following sections include the explicitly designated `\texttt{signers}` parameter in two of the five examples; once where the resulting signature would be ASCII armoured and once where it would not be armoured.

While it would be possible to enter a key ID or fingerprint here to match a specific key, it is not possible to enter two fingerprints and match two keys since the patten expects a string, bytes or None and not a list. A string with two fingerprints won't match any single key.

```
\subsubsection{Normal or default signing messages or files}
```

```
\label{sec:org6ee259d}
```

The normal or default signing process is essentially the same as is most often invoked when also encrypting a message or file. So when the encryption component is not utilised, the result is to produce an encoded and signed output which may or may not be ASCII armoured and which may or may not also be compressed.

By default compression will be used unless GnuPG detects that the plaintext is already compressed. ASCII armouring will be determined according to the value of `\texttt{gpg.Context().armor}`.

The compression algorithm is selected in much the same way as the symmetric encryption algorithm or the hash digest algorithm is when multiple keys are involved; from the preferences saved into the key itself or by comparison with the preferences with all other keys involved.

```
\begin{verbatim}
```

```
import gpg
```

```
text0 = ""Declaration of ... something.
```

```
""
```

```
text = text0.encode()
```

```
c = gpg.Context(armor=True, signers=sig_src)
```

```
signed_data, result = c.sign(text, mode=gpg.constants.sig.mode.NORMAL)
```

```
with open("/path/to/statement.txt.asc", "w") as afile:
```

```
 afile.write(signed_data.decode())
```

```
\end{verbatim}
```

Though everything in this example is accurate, it is more likely that reading the input data from another file and writing the result to a new file will be performed more like the way it is done in the next example. Even if the output format is ASCII armoured.

```
\begin{verbatim}
```

```
import gpg
```

```
with open("/path/to/statement.txt",
```

```
 "rb") as tfile:
```

```
 text = tfile.read()
```

```
c = gpg.Context()
```

```
signed_data, result = c.sign(text, mode=gpg.constants.sig.mode.NORMAL)
```

```
with open("/path/to/statement.txt.sig", "wb") as afile:
 afile.write(signed_data)
\end{verbatim}
```

```
\subsection{Detached signing messages and files}
```

```
\label{sec:org51049d4}
```

Detached signatures will often be needed in programmatic uses of GPGME, either for signing files (e.g. tarballs of code releases) or as a component of message signing (e.g. PGP/MIME encoded email).

```
\begin{verbatim}
```

```
import gpg
```

```
text0 = """Declaration of ... something.
```

```
"""
```

```
text = text0.encode()
```

```
c = gpg.Context(armor=True)
```

```
signed_data, result = c.sign(text, mode=gpg.constants.sig.mode.DETACH)
```

```
with open("/path/to/statement.txt.asc", "w") as afile:
```

```
 afile.write(signed_data.decode())
```

```
\end{verbatim}
```

As with normal signatures, detached signatures are best handled as byte literals, even when the output is ASCII armoured.

```
\begin{verbatim}
```

```
import gpg
```

```
with open("/path/to/statement.txt",
```

```
 "rb") as tfile:
```

```
 text = tfile.read()
```

```
c = gpg.Context(signers=sig_src)
```

```
signed_data, result = c.sign(text, mode=gpg.constants.sig.mode.DETACH)
```

```
with open("/path/to/statement.txt.sig", "wb") as afile:
```

```
 afile.write(signed_data)
```

```
\end{verbatim}
```

```
\subsection{Clearsigning messages or text}
```

```
\label{sec:orgf528a20}
```

Though PGP/in-line messages are no longer encouraged in favour of PGP/MIME, there is still sometimes value in utilising in-line signatures. This is where clear-signed messages or text is of value.

```
\begin{verbatim}
import gpg

text0 = ""Declaration of ... something.

""
text = text0.encode()

c = gpg.Context()
signed_data, result = c.sign(text, mode=gpg.constants.sig.mode.CLEAR)

with open("/path/to/statement.txt.asc", "w") as afile:
 afile.write(signed_data.decode())
\end{verbatim}
```

In spite of the appearance of a clear-signed message, the data handled by GPGME in signing it must still be byte literals.

```
\begin{verbatim}
import gpg

with open("/path/to/statement.txt",
"rb") as tfile:
 text = tfile.read()

c = gpg.Context()
signed_data, result = c.sign(text, mode=gpg.constants.sig.mode.CLEAR)

with open("/path/to/statement.txt.asc", "wb") as afile:
 afile.write(signed_data)
\end{verbatim}
```

`\subsection{Signature verification}`

`\label{sec:org6cd81af}`

Essentially there are two principal methods of verification of a signature. The first of these is for use with the normal or default signing method and for clear-signed messages. The second is for use with files and data with detached signatures.

The following example is intended for use with the default signing method where the file was not ASCII armoured:

```
\begin{verbatim}
```

```

import gpg
import time

filename = "statement.txt"
gpg_file = "statement.txt.gpg"

c = gpg.Context()

try:
 data, result = c.verify(open(gpg_file))
 verified = True
except gpg.errors.BadSignatures as e:
 verified = False
 print(e)

if verified is True:
 for i in range(len(result.signatures)):

 sign = result.signatures[i]
 print("""Good signature from:
{0}
with key {1}
made at {2}
""".format(c.get_key(sign.fpr).uids[0].uid, sign.fpr,
 time.ctime(sign.timestamp)))
 else:
 pass
\end{verbatim}

```

Whereas this next example, which is almost identical would work with normal ASCII armoured files and with clear-signed files:

```

\begin{verbatim}
import gpg
import time

filename = "statement.txt"
asc_file = "statement.txt.asc"

c = gpg.Context()

try:
 data, result = c.verify(open(asc_file))
 verified = True
except gpg.errors.BadSignatures as e:
 verified = False
 print(e)

```

```

if verified is True:
 for i in range(len(result.signatures)):
 sign = result.signatures[i]
 print("""Good signature from:
{0}
with key {1}
made at {2}
""".format(c.get_key(sign.fpr).uids[0].uid, sign.fpr,
 time.ctime(sign.timestamp)))
else:
 pass
\end{verbatim}

```

In both of the previous examples it is also possible to compare the original data that was signed against the signed data in `\texttt{data}` to see if it matches with something like this:

```

\begin{verbatim}
with open(filename, "rb") as afile:
 text = afile.read()

if text == data:
 print("Good signature.")
else:
 pass
\end{verbatim}

```

The following two examples, however, deal with detached signatures. With his method of verification the data that was signed does not get returned since it is already being explicitly referenced in the first argument of `\texttt{c.verify}`. So `\texttt{data}` is `\texttt{None}` and only the information in `\texttt{result}` is available.

```

\begin{verbatim}
import gpg
import time

filename = "statement.txt"
sig_file = "statement.txt.sig"

c = gpg.Context()

try:
 data, result = c.verify(open(filename), open(sig_file))
 verified = True
except gpg.errors.BadSignatures as e:
 verified = False

```

```

print(e)

if verified is True:
 for i in range(len(result.signatures)):
 sign = result.signatures[i]
 print("""Good signature from:
{0}
with
key {1}
made at {2}
""".format(c.get_key(sign.fpr).uids[0].uid, sign.fpr,
 time.ctime(sign.timestamp)))
 else:
 pass
\end{verbatim}

\begin{verbatim}
import gpg
import time

filename = "statement.txt"
asc_file = "statement.txt.asc"

c = gpg.Context()

try:
 data, result = c.verify(open(filename), open(asc_file))
 verified = True
except gpg.errors.BadSignatures as e:
 verified = False
 print(e)

if verified is True:
 for i in range(len(result.signatures)):
 sign = result.signatures[i]
 print("""Good signature from:
{0}
with key {1}
made at {2}
""".format(c.get_key(sign.fpr).uids[0].uid, sign.fpr,
 time.ctime(sign.timestamp)))
 else:
 pass
\end{verbatim}

\section{Creating keys and subkeys}
\label{sec:org754c6df}

```

The one thing, aside from GnuPG itself, that GPGME depends on, of course, is the keys themselves. So it is necessary to be able to generate them and modify them by adding subkeys, revoking or disabling them, sometimes deleting them and doing the same for user IDs.

In the following examples a key will be created for the world's greatest secret agent, Danger Mouse. Since Danger Mouse is a secret agent he needs to be able to protect information to `\texttt{SECRET}` level clearance, so his keys will be 3072-bit keys.

The pre-configured `\texttt{gpg.conf}` file which sets cipher, digest and other preferences contains the following configuration parameters:

```
\begin{verbatim}
expert
allow-freeform-uid
allow-secret-key-import
trust-model tofu+pgp
tofu-default-policy unknown
enable-large-rsa
enable-dsa2
cert-digest-algo SHA512
default-preference-list TWOFISH CAMELLIA256 AES256 CAMELLIA192 AES192 CAMELLIA128 AES
BLOWFISH IDEA CAST5 3DES SHA512 SHA384 SHA256 SHA224 RIPEMD160 SHA1 ZLIB BZIP2 ZIP
Uncompressed
personal-cipher-preferences TWOFISH CAMELLIA256 AES256 CAMELLIA192 AES192 CAMELLIA128 AES
BLOWFISH IDEA CAST5 3DES
personal-digest-preferences SHA512 SHA384 SHA256 SHA224 RIPEMD160 SHA1
personal-compress-preferences
ZLIB BZIP2 ZIP Uncompressed
\end{verbatim}
```

`\subsection{Primary key}`

`\label{sec:org0185c23}`

Generating a primary key uses the `\texttt{create\_key}` method in a Context.

It contains multiple arguments and keyword arguments, including:

`\texttt{userid}`, `\texttt{algorithm}`, `\texttt{expires\_in}`, `\texttt{expires}`, `\texttt{sign}`, `\texttt{encrypt}`, `\texttt{certify}`, `\texttt{authenticate}`, `\texttt{passphrase}` and `\texttt{force}`. The defaults for all of those except `\texttt{userid}`, `\texttt{algorithm}`, `\texttt{expires\_in}`, `\texttt{expires}` and `\texttt{passphrase}` is `\texttt{False}`. The defaults for `\texttt{algorithm}` and `\texttt{passphrase}` is `\texttt{None}`. The default for `\texttt{expires\_in}` is `\texttt{0}`. The default for `\texttt{expires}` is `\texttt{True}`. There is no default for `\texttt{userid}`.

If `\texttt{passphrase}` is left as `\texttt{None}` then the key will not be generated with a passphrase, if `\texttt{passphrase}` is set to a string then that will be the passphrase and if

`\texttt{passphrase}` is set to `\texttt{True}` then `gpg-agent` will launch `pinentry` to prompt for a passphrase. For the sake of convenience, these examples will keep `\texttt{passphrase}` set to `\texttt{None}`.

```
\begin{verbatim}
import gpg

c = gpg.Context()

c.home_dir = "~/gnupg-dm"
userid = "Danger Mouse <dm@secret.example.net>"

dmkey = c.create_key(userid, algorithm="rsa3072", expires_in=31536000,
 sign=True, certify=True)
\end{verbatim}
```

One thing to note here is the use of setting the `\texttt{c.home_dir}` parameter. This enables generating the key or keys in a different location. In this case to keep the new key data created for this example in a separate location rather than adding it to existing and active key store data. As with the default directory, `\texttt{\textasciitilde}/.gnupg`, any temporary or separate directory needs the permissions set to only permit access by the directory owner. On posix systems this means setting the directory permissions to 700.

The `\texttt{temp-homedir-config.py}` script in the HOWTO examples directory will create an alternative homedir with these configuration options already set and the correct directory and file permissions.

The successful generation of the key can be confirmed via the returned `\texttt{GenkeyResult}` object, which includes the following data:

```
\begin{verbatim}
print("""
Fingerprint: {0}
Primary Key: {1}
Public Key: {2}
Secret Key: {3}
Sub Key: {4}
User IDs: {5}
""").format(dmkey.fpr, dmkey.primary, dmkey.pubkey, dmkey.seckey, dmkey.sub,
 dmkey.uid)
\end{verbatim}
```

Alternatively the information can be confirmed using the command line program:

```

\begin{verbatim}
bash-4.4$ gpg --homedir ~/.gnupg-dm -K
~/.gnupg-dm/pubring.kbx

sec rsa3072 2018-03-15 [SC] [expires: 2019-03-15]
 177B7C25DB99745EE2EE13ED026D2F19E99E63AA
uid [ultimate] Danger Mouse <dm@secret.example.net>

bash-4.4$
\end{verbatim}

```

As with generating keys manually, to preconfigure expanded preferences for the cipher, digest and compression algorithms, the `gpg.conf` file must contain those details in the home directory in which the new key is being generated. I used a cut down version of my own `gpg.conf` file in order to be able to generate this:

```

\begin{verbatim}
bash-4.4$ gpg --homedir ~/.gnupg-dm --edit-key 177B7C25DB99745EE2EE13ED026D2F19E99E63AA showpref
quit
Secret key is available.

```

```

sec rsa3072/026D2F19E99E63AA
 created: 2018-03-15 expires: 2019-03-15 usage: SC
 trust: ultimate validity: ultimate
[ultimate] (1). Danger Mouse <dm@secret.example.net>

```

```

[ultimate] (1). Danger Mouse <dm@secret.example.net>
 Cipher: TWOFISH, CAMELLIA256, AES256, CAMELLIA192, AES192, CAMELLIA128, AES, BLOWFISH,
 IDEA, CAST5, 3DES
 Digest: SHA512, SHA384, SHA256, SHA224, RIPEMD160, SHA1
 Compression: ZLIB, BZIP2, ZIP, Uncompressed
 Features: MDC, Keyserver no-modify

```

```

bash-4.4$
\end{verbatim}

```

```

\subsection{Subkeys}
\label{sec:org5e2acbc}
Adding

```

subkeys to a primary key is fairly similar to creating the primary key with the `create_subkey` method. Most of the arguments are the same, but not quite all. Instead of the `userid` argument there is now a `key` argument for selecting which primary key to add the subkey to.

In the following example an encryption subkey will be added to the primary key. Since Danger Mouse is a security conscious secret agent, this subkey will only be valid for about six months, half the length of the primary key.

```
\begin{verbatim}
import gpg

c = gpg.Context()
c.home_dir = "~/gnupg-dm"

key = c.get_key(dmkey.fpr, secret=True)
dmsub = c.create_subkey(key, algorithm="rsa3072", expires_in=15768000,
 encrypt=True)
\end{verbatim}
```

As with the primary key, the results here can be checked with:

```
\begin{verbatim}
print("""
Fingerprint: {0}
Primary Key: {1}
Public Key: {2}
Secret Key: {3}
Sub Key: {4}
User IDs: {5}
""").format(dmsub.fpr,
 dmsub.primary, dmsub.pubkey, dmsub.seckey, dmsub.sub,
 dmsub.uid)
\end{verbatim}
```

As well as on the command line with:

```
\begin{verbatim}
bash-4.4$ gpg --homedir ~/.gnupg-dm -K
~/gnupg-dm/pubring.kbx

sec rsa3072 2018-03-15 [SC] [expires: 2019-03-15]
 177B7C25DB99745EE2EE13ED026D2F19E99E63AA
uid [ultimate] Danger Mouse <dm@secret.example.net>
ssb rsa3072 2018-03-15 [E] [expires: 2018-09-13]

bash-4.4$
\end{verbatim}
```

```
\subsection{User IDs}
\label{sec:org4869c58}
```

```
\subsubsection{Adding User IDs}
```

```
\label{sec:orgebb13ca}
```

By comparison to creating primary keys and subkeys, adding a new user ID to an existing key is much simpler. The method used to do this is `\texttt{key\_add\_uid}` and the only arguments it takes are for the `\texttt{key}` and the new `\texttt{uid}`.

```
\begin{verbatim}
```

```
import gpg
```

```
c = gpg.Context()
```

```
c.home_dir = "~/gnupg-dm"
```

```
dmfpr = "177B7C25DB99745EE2EE13ED026D2F19E99E63AA"
```

```
key = c.get_key(dmfpr, secret=True)
```

```
uid
```

```
= "Danger Mouse <danger.mouse@secret.example.net>"
```

```
c.key_add_uid(key, uid)
```

```
\end{verbatim}
```

Unsurprisingly the result of this is:

```
\begin{verbatim}
```

```
bash-4.4$ gpg --homedir ~/.gnupg-dm -K
```

```
~/gnupg-dm/pubring.kbx
```

```

sec rsa3072 2018-03-15 [SC] [expires: 2019-03-15]
```

```
 177B7C25DB99745EE2EE13ED026D2F19E99E63AA
```

```
uid [ultimate] Danger Mouse <danger.mouse@secret.example.net>
```

```
uid [ultimate] Danger Mouse <dm@secret.example.net>
```

```
ssb rsa3072 2018-03-15 [E] [expires: 2018-09-13]
```

```
bash-4.4$
```

```
\end{verbatim}
```

```
\subsubsection{Revoking User IDs}
```

```
\label{sec:org1683695}
```

Revoking a user ID is a fairly similar process, except that it uses the `\texttt{key\_revoke\_uid}` method.

```
\begin{verbatim}
```

```
import gpg
```

```
c = gpg.Context()
```

```
c.home_dir = "~/gnupg-dm"
```

```
dmfpr = "177B7C25DB99745EE2EE13ED026D2F19E99E63AA"
key = c.get_key(dmfpr, secret=True)
uid = "Danger Mouse <danger.mouse@secret.example.net>"
```

```
c.key_revoke_uid(key, uid)
\end{verbatim}
```

```
\subsection{Key certification}
\label{sec:orgf431bf8}
```

Since

key certification is more frequently referred to as key signing, the method used to perform this function is `\texttt{key\_sign}`.

The `\texttt{key\_sign}` method takes four arguments: `\texttt{key}`, `\texttt{uids}`, `\texttt{expires\_in}` and `\texttt{local}`. The default value of `\texttt{uids}` is `\texttt{None}` and which results in all user IDs being selected. The default value of both `\texttt{expires\_in}` and `\texttt{local}` is `\texttt{False}`; which results in the signature never expiring and being able to be exported.

The `\texttt{key}` is the key being signed rather than the key doing the signing. To change the key doing the signing refer to the signing key selection above for signing messages and files.

If the `\texttt{uids}` value is not `\texttt{None}` then it must either be a string to match a single user ID or a list of strings to match multiple user IDs. In this case the matching of those strings must be precise and it is case sensitive.

To sign Danger

Mouse's key for just the initial user ID with a signature which will last a little over a month, do this:

```
\begin{verbatim}
import gpg

c = gpg.Context()
uid = "Danger Mouse <dm@secret.example.net>"

dmfpr = "177B7C25DB99745EE2EE13ED026D2F19E99E63AA"
key = c.get_key(dmfpr, secret=True)
c.key_sign(key, uids=uid, expires_in=2764800)
\end{verbatim}
```

```
\subsubsection{Verifying key certifications}
\label{sec:org87abdd3}
```

```
\begin{verbatim}
```

```

import gpg
import time

c = gpg.Context()
dmfpr = "177B7C25DB99745EE2EE13ED026D2F19E99E63AA"
keys = list(c.keylist(pattern=dmuid, mode=gpg.constants.keylist.mode.SIGS))
key = keys[0]

for user in key.uids:
 for sig in user.signatures:
 print("0x{0}".format(sig.keyid), "", time.ctime(sig.timestamp), "",
 sig.uid)
\end{verbatim}

```

Which for Danger Mouse displays the following:

```

\begin{verbatim}
0x92E3F6115435C65A Thu Mar 15 13:17:44 2018 Danger Mouse <dm@secret.example.net>
0x321E4E2373590E5D Mon Nov 26 12:46:05 2018 Ben McGinnes <ben@adversary.org>
\end{verbatim}

```

The two key signatures listed are for the self-certification of Danger Mouse's key made when the key was created in March, 2018; and the second is a signature made by the author and set to expire at the end of the year. Note that the second signature was made with the following code (including the preceding code to display the output of the certifications or key signatures):

```

\begin{verbatim}
import gpg
import math
import pendulum
import time

hd = "/home/dm/.gnupg"
c = gpg.Context()
d = gpg.Context(home_dir=hd)
dmfpr = "177B7C25DB99745EE2EE13ED026D2F19E99E63AA"
dmuid = "Danger Mouse <dm@secret.example.net>"
dkeys = list(c.keylist(pattern=dmuid))
dmkey = dkeys[0]

c.key_import(d.key_export(pattern=None))

tp = pendulum.period(pendulum.now(tz="local"), pendulum.datetime(2019, 1, 1))
ts = tp.total_seconds()
total_secs = math.ceil(ts)

```

```

c.key_sign(dmkey, uids=dmuid, expires_in=total_secs)

d.key_import(c.key_export(pattern=dmuid))
keys = list(c.keylist(pattern=dmuid,
mode=gpg.constants.keylist.mode.SIGS))
key = keys[0]

for user in key.uids:
 for sig in user.signatures:
 print("0x{0}".format(sig.keyid), "", time.ctime(sig.timestamp), "",
 sig.uid)
\end{verbatim}

```

Note that this final code block includes the use of a module which is **not** part of Python's standard library, the [\href{https://pendulum.eustace.io/}](https://pendulum.eustace.io/) {pendulum module}. Unlike the standard datetime module, pendulum makes working with dates and times significantly easier in Python; just as the requests module makes working with HTTP and HTTPS easier than the builtin modules do.

Though neither requests nor pendulum are required modules for using the GPGME Python bindings, they are both highly recommended more generally.

## \section{Advanced or Experimental Use Cases}

\label{sec:org944cc00}

### \subsection{C plus Python plus SWIG plus Cython}

\label{sec:org3b53926}

In spite of the apparent incongruence of using Python bindings to a C interface only to generate more C from the Python; it is in fact quite possible to use the GPGME bindings with [\href{http://docs.cython.org/en/latest/index.html}](http://docs.cython.org/en/latest/index.html) {Cython}. Though in many cases the benefits may not be obvious since the most computationally intensive work never leaves the level of the C code with which GPGME itself is interacting with.

Nevertheless, there are some situations where the benefits are demonstrable. One of the better and easier examples being the one of the early examples in this HOWTO, the [\hyperref\[sec:org63a3d62\]{key counting}](sec:org63a3d62) code. Running that example as an executable Python script, `\texttt{keycount.py}` (available in the `\texttt{examples/howto/}` directory), will take a noticeable amount of time to run on most systems where the public keybox or keyring contains a few thousand public keys.

Earlier in the evening, prior to starting this section, I ran that script on my laptop; as I tend to do periodically and timed it using `\texttt{time}` utility, with the following results:

```
\begin{verbatim}
bash-4.4$
time keycount.py
```

```
Number of secret keys: 23
Number of public keys: 12112
```

```
real 11m52.945s
user 0m0.913s
sys 0m0.752s
```

```
bash-4.4$
\end{verbatim}
```

Sometime after that I imported another key and followed it with a little test of Cython. This test was kept fairly basic, essentially lifting the material from the [\href{http://docs.cython.org/en/latest/src/tutorial/cython\\_tutorial.html}](http://docs.cython.org/en/latest/src/tutorial/cython_tutorial.html) {Cython Basic Tutorial} to demonstrate compiling Python code to C. The first step was to take the example key counting code quoted previously, essentially from the importing of the `gpg` module to the end of the script:

```
\begin{verbatim}
import gpg

c = gpg.Context()
seckeys = c.keylist(pattern=None, secret=True)
pubkeys = c.keylist(pattern=None, secret=False)

seclist = list(seckeys)
secnum = len(seclist)

publist = list(pubkeys)
pubnum = len(publist)

print("""
 Number of secret keys: {0}
 Number of public keys: {1}

""".format(secnum, pubnum))
\end{verbatim}
```

Save that into a file called `keycount.pyx` and then create a `setup.py` file which contains this:

```
\begin{verbatim}
from distutils.core import setup
from Cython.Build import cythonize

setup(
 ext_modules = cythonize("keycount.pyx")
)
\end{verbatim}
```

Compile it:

```
\begin{verbatim}
bash-4.4$ python setup.py build_ext --inplace
bash-4.4$
\end{verbatim}
```

Then run it in a similar manner to `\texttt{keycount.py}`:

```
\begin{verbatim}
bash-4.4$ time python3.7 -c "import keycount"
```

```
Number of secret keys: 23
Number of public keys: 12113
```

```
real 6m47.905s
user 0m0.785s
sys 0m0.331s
```

```
bash-4.4$
\end{verbatim}
```

Cython turned `\texttt{keycount.pyx}` into an 81KB `\texttt{keycount.o}` file in the `\texttt{build/}` directory, a 24KB `\texttt{keycount.cpython-37m-darwin.so}` file to be imported into Python 3.7 and a 113KB `\texttt{keycount.c}` generated C source code file of nearly three thousand lines. Quite a bit bigger than the 314 bytes of the `\texttt{keycount.pyx}` file or the full 1,452 bytes of the full executable `\texttt{keycount.py}` example script.

On the other hand it ran in nearly half the time; taking 6 minutes and 47.905 seconds to run. As opposed to the 11 minutes and 52.945 seconds which the CPython script alone took.

The `\texttt{keycount.pyx}` and `\texttt{setup.py}` files used to generate this example have been added to the `\texttt{examples/howto/advanced/cython/}` directory. The example versions include some additional options to annotate the existing code and to detect Cython's use. The latter comes from the

[\href{http://docs.cython.org/en/latest/src/tutorial/pure.html#magic-attributes-within-the-pxd}](http://docs.cython.org/en/latest/src/tutorial/pure.html#magic-attributes-within-the-pxd) {Magic Attributes} section of the Cython documentation.

\section{Miscellaneous extras and work-arounds}

\label{sec:orgd72f7de}

Most of the things in the following sections are here simply because there was no better place to put them, even though some are only peripherally related to the GPGME Python bindings. Some are also workarounds for functions not integrated with GPGME as yet. This is especially true of the first of these, dealing with [\hyperref\[sec:org83f4d00\]{group lines}](#).

\subsection{Group lines}

\label{sec:org83f4d00}

There is not yet an easy way to access groups configured in the `gpg.conf` file from within GPGME. As a consequence these central groupings of keys cannot be shared amongst multiple programs, such as MUAs readily.

The following code, however, provides a work-around for obtaining this information in Python.

```
\begin{verbatim}
```

```
import subprocess
```

```
import sys
```

```
if sys.platform == "win32":
```

```
 gpgconfcmd = "gpgconf.exe --list-options gpg"
```

```
else:
```

```
 gpgconfcmd = "gpgconf --list-options gpg"
```

```
process = subprocess.Popen(gpgconfcmd.split(), stdout=subprocess.PIPE)
```

```
procom = process.communicate()
```

```
if sys.version_info[0] == 2:
```

```
 lines = procom[0].splitlines()
```

```
else:
```

```
 lines = procom[0].decode().splitlines()
```

```
for line in lines:
```

```
 if line.startswith("group") is True:
```

```
 break
```

```
groups = line.split(":-")[-1].replace("'", "").split(',')
```

```
group_lines
```

```

= []
group_lists = []

for i in range(len(groups)):
 group_lines.append(groups[i].split("="))
 group_lists.append(groups[i].split("="))

for i in range(len(group_lists)):
 group_lists[i][1] = group_lists[i][1].split()
\end{verbatim}

```

The result of that code is that `group\_lines` is a list of lists where `group\_lines[i][0]` is the name of the group and `group\_lines[i][1]` is the key IDs of the group as a string.

The `group\_lists` result is very similar in that it is a list of lists. The first part, `group\_lists[i][0]` matches `group\_lines[i][0]` as the name of the group, but `group\_lists[i][1]` is the key IDs of the group as a list.

A demonstration of using the `groups.py` module is also available in the form of the executable `mutt-groups.py` script. This second script reads all the group entries in a user's `gpg.conf` file and converts them into crypt-hooks suitable for use with the Mutt and Neomutt mail clients.

#### Keyserver access for Python

`sec:org5ad99aa`

The `hkp4py` module by Marcel Fest was originally a port of the old `python-hkp` module from Python 2 to Python 3 and updated to use the `requests` module instead. It has since been modified to provide support for Python 2.7 as well and is available via PyPI.

Since it rewrites the `hkp` protocol prefix as `http` and `hkps` as `https`, the module is able to be used even with servers which do not support the full scope of keyserver functions. <sup>Such as with ProtonMail servers.</sup> This also means that restricted servers which only advertise either HTTP or HTTPS end points and not HKP or HKPS end points must still be identified as HKP or HKPS within the Python Code. The `hkp4py` module will rewrite these appropriately when the connection is made to the server. It also works quite readily when incorporated into a `Cython` generated and compiled version of any code.

\subsubsection{Key import format}

\label{sec:org1e47c97}

The `hkp4py` module returns key data via requests as string literals (`\texttt{r.text}`) instead of byte literals (`\texttt{r.content}`). This means that the returned key data must be encoded to UTF-8 when importing that key material using a `\texttt{gpg.Context().key_import()}` method.

For this reason an alternative method has been added to the `\texttt{search}` function of `\texttt{hkp4py.KeyServer()}` which returns the key in the correct format as expected by `\texttt{key_import}`. When importing using this module, it is now possible to import with this:

```
\begin{verbatim}
for key in keys:
 if key.revoked is False:
 gpg.Context().key_import(key.key_blob)
 else:
 pass
\end{verbatim}
```

Without that recent addition it would have been necessary to encode the contents of each `\texttt{hkp4py.KeyServer().search()[i].key}` in `\texttt{hkp4py.KeyServer().search()}` before trying to import it.

An example of this is included in the [\hyperref\[sec:org1ad598a\]{Importing Keys}](#) section of this HOWTO and the corresponding executable version of that example is available in the `\texttt{lang/python/examples/howto}` directory as normal; the executable version is the `\texttt{import-keys-hkp.py}` file.

\subsection{GPGME version checking}

\label{sec:org18b8ef8}

For various reasons it may be necessary to check which version of GPGME the bindings have been built against; including whether a minimum required version of GPGME is in use.

For the most part the `\texttt{gpg.version.versionstr}` and `\texttt{gpg.version.versionlist}` methods have been quite sufficient. The former returns the same string as `\texttt{gpgme-config -{ }-version}`, while the latter returns the major, minor and patch values in a list.

To check if the installed bindings have actually been built against the current installed `libgpgme` version, this check can be performed:

```
\begin{verbatim}
```

```

import gpg
import subprocess
import sys

gpgme_version_call = subprocess.Popen(["gpgme-config", "--version"],
 stdout=subprocess.PIPE,
 stderr=subprocess.PIPE)
gpgme_version_str = gpgme_version_call.communicate()

if sys.version_info[0] == 2:
 gpgme_version = gpgme_version_str[0].strip()
elif sys.version_info[0] >= 3:
 gpgme_version = gpgme_version_str[0].decode().strip()
else:
 gpgme_version = None

if gpgme_version is not None:
 if gpgme_version == gpg.version.versionstr:
 print("The GPGME Python bindings match libgpgme.")
 else:
 print("The GPGME Python bindings do NOT match libgpgme.")
else:
 print("Upgrade Python and reinstall the GPGME Python bindings.")
\end{verbatim}

```

For many developers, however, the preferred checking means checking for a minimum version or point release. This is now readily available via the `gpg.version.versionintlist` method (added in version `1.12.1-beta79`). It is also now possible to easily check whether the installed GPGME Python bindings were built from a development or beta branch of the GPGME source code.

The following code demonstrates how both of those methods may be used:

```

\begin{verbatim}
import gpg

try:
 if gpg.version.is_beta is True:
 print("The installed GPGME Python bindings were built from beta code.")
 else:
 print("The installed GPGME Python bindings are a released version.")
except Exception as e:
 print(e)

try:
 if gpg.version.versionintlist[0] == 1:

```

```

if gpg.version.versionintlist[1] == 12:
 if gpg.version.versionintlist[2] == 1:
 print("This is the minimum version for using versionintlist.")
 elif gpg.version.versionintlist[2] > 1:
 print("The versionintlist method is available.")

 else:
 pass
elif gpg.version.versionintlist[1] > 12:
 print("The versionintlist method is available.")
else:
 pass
elif gpg.version.versionintlist[0] > 1:
 print("The versionintlist method is available.")
else:
 pass
except Exception as e:
 print(e)
\end{verbatim}

```

The points where `\texttt{pass}` is used in the above example will most likely also produce an `\texttt{Exception}` error since those results should only occur in versions which do not have the `\texttt{gpgme.version.is_beta}` and `\texttt{gpgme.version.versionintlist}` methods available.

`\subsection{Copyright}`

`\label{sec:org26ed04d}`

Copyright The GnuPG Project, 2018.

Copyright (C) The GnuPG Project, 2018.

`\subsection{Draft Editions of this HOWTO}`

`\label{sec:org080a94a}`

Draft editions of this HOWTO may be periodically available directly from the author at any of the following URLs:

`\begin{itemize}`

`\item`

`\href{https://files.au.adversary.org/crypto/gpgme-python-howto.html}{GPGME Python Bindings HOWTO draft (XHTML single file, AWS S3 SSL)}`

`\item \href{http://files.au.adversary.org/crypto/gpgme-python-howto.html}{GPGME Python Bindings HOWTO draft (XHTML single file, AWS S3 no SSL)}`

`\item \href{https://files.au.adversary.org/crypto/gpgme-python-howto-split/index.html}{GPGME Python Bindings HOWTO draft (XHTML multiple files, AWS S3 SSL)}`

\item \href{http://files.au.adversary.org/crypto/gpgme-python-howto/index.html}{GPGME Python Bindings HOWTO draft (XHTML multiple files, AWS S3 no SSL)}

\end{itemize}

All of these draft versions except for one have been generated from this document via GNU Emacs \href{https://orgmode.org/}{Org mode} and \href{https://www.gnu.org/software/texinfo/}{GNU Texinfo}. Though it is likely that the specific \href{https://files.au.adversary.org/crypto/gpgme-python-howto}{file} \href{http://files.au.adversary.org/crypto/gpgme-python-howto.org}{version} used will be on the same server with the generated output formats.

The GNU Texinfo and reStructured Text versions ship with the software, while the GNU Emacs Info version is generated from the Texinfo version using GNU Texinfo or GNU Makeinfo. The Texinfo format is generated from the original Org mode source file in Org mode itself either within GNU Emacs or via the command line by invoking Emacs in batch mode:

```
\begin{verbatim}
emacs gpgme-python-howto.org --batch -f org-texinfo-export-to-texinfo --kill
emacs gpgme-python-howto --batch -f org-texinfo-export-to-texinfo --kill
\end{verbatim}
```

The reStructuredText format is also generated from the Org-mode source file, except it is generated using \href{https://pandoc.org/}{Pandoc} with either of the following commands:

```
\begin{verbatim}
pandoc -f org -t rst+smart -o gpgme-python-howto.rst gpgme-python-howto.org
pandoc -f org -t rst+smart -o gpgme-python-howto.rst gpgme-python-howto
\end{verbatim}
```

In addition to these there is a significantly less frequently updated version as a HTML \href{https://files.au.adversary.org/crypto/gpgme-python/dita/webhelp/index.html}{WebHelp site} (AWS S3 SSL); generated from DITA XML source files, which can be found in \href{https://dev.gnupg.org/source/gpgme/browse/ben%252Fhowto-dita/}{an alternative branch} of the GPGME git repository.

Various generated output formats may occasionally be found in subdirectories of the \href{https://s3.amazonaws.com/files.au.adversary.org/crypto/gpgme-python}{gpgme-python} directory. In particular within the \href{https://s3.amazonaws.com/files.au.adversary.org/crypto/gpgme-python/dita}{DITA}, \href{https://s3.amazonaws.com/files.au.adversary.org/crypto/gpgme-python/rst}{reStructuredText} and \href{https://s3.amazonaws.com/files.au.adversary.org/crypto/gpgme-python/texinfo}{Texinfo} subdirectories. The \texttt{rst}

directory contains output files generated with Sphinx and may include a considerable number of its possible output formats.

These

draft editions are not official documents and the version of documentation in the master branch or which ships with released versions is the only official documentation. Nevertheless, these draft editions may occasionally be of use by providing more accessible web versions which are updated between releases. They are provided on the understanding that they may contain errors or may contain content subject to change prior to an official release.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price.

Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the

Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source

code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE,

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute
it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this

is what you want to do, use the GNU Lesser General Public License instead of this License.

The licensing conditions for each module in this package are detailed in the module source files.

GNU GENERAL PUBLIC LICENSE  
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and

modification follow.

GNU GENERAL PUBLIC LICENSE  
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole

or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further

restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will

be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW.

EXCEPT WHEN

OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN

IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>
Copyright (C) 19yy <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License,  
or  
(at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) 19yy name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program  
'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989  
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into  
proprietary programs. If your program is a subroutine library, you may  
consider it more useful to permit linking proprietary applications with the  
library. If this is what you want to do, use the GNU Library General  
Public License instead of this License.

## 1.298 pythonurllib 1.26.5-5.el9

### 1.298.1 Notifications :

This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit  
(<http://www.openssl.org/>)

This product includes cryptographic software written by Eric Young (eay@cryptsoft.com).

This product includes software written by Tim Hudson (tjh@cryptsoft.com).

- \* John Krauss <<https://github.com/talos>>
  - \* Clues to debugging problems with `cryptography` dependency in docs
  
- \* Disassem <<https://github.com/Disassem>>
  - \* Fix pool-default headers not applying for url-encoded requests like GET.
  
- \* James Atherfold <jlatherfold@hotmail.com>
  - \* Bugfixes relating to cleanup of connections during errors.
  
- \* Christian Pedersen <<https://github.com/chripede>>

- \* IPv6 HTTPS proxy bugfix
  
- \* Jordan Moldow <<https://github.com/jmoldow>>
  - \* Fix low-level exceptions leaking from ``HTTPResponse.stream()``.
  - \* Bugfix for ``ConnectionPool.urlopen(release\_conn=False)``.
  - \* Creation of ``HTTPConnectionPool.ResponseCls``.
  
- \* Predrag Gruevski <<https://github.com/obi1kenobi>>
  - \* Made cert digest comparison use a constant-time algorithm.
  
- \* Adam Talsma <<https://github.com/a-tal>>
  - \* Bugfix to ca\_cert file paths.
  
- \* Evan Meagher <<https://evanmeagher.net>>
  - \* Bugfix related to `memoryview` usage in PyOpenSSL adapter
  
- \* John Vandenberg <[jayvdb@gmail.com](mailto:jayvdb@gmail.com)>
  - \* Python 2.6 fixes; pyflakes and pep8 compliance
  
- \* Andy Caldwell <[andy.m.caldwell@gmail.com](mailto:andy.m.caldwell@gmail.com)>
  - \* Bugfix related to reusing connections in indeterminate states.
  
- \* Ville Skytt <[ville.skytta@iki.fi](mailto:ville.skytta@iki.fi)>
  - \* Logging efficiency improvements, spelling fixes, Travis config.
  
- \* Shige Takeda <[smtakeda@gmail.com](mailto:smtakeda@gmail.com)>
  - \* Started Recipes documentation and added a recipe about handling concatenated gzip data in HTTP response
  
- \* Jess Shapiro <[jesse@jesseshapiro.net](mailto:jesse@jesseshapiro.net)>
  - \* Various character-encoding fixes/tweaks
  - \* Disabling IPv6 DNS when IPv6 connections not supported
  
- \* David Foster <<http://dafoster.net/>>
  - \* Ensure order of request and response headers are preserved.
  
- \* Jeremy Cline <[jeremy@jcline.org](mailto:jeremy@jcline.org)>
  - \* Added connection pool keys by scheme
  
- \* Aviv Palivoda <[palaviv@gmail.com](mailto:palaviv@gmail.com)>
  - \* History list to Retry object.
  - \* HTTPResponse contains the last Retry object.
  
- \* Nate Prewitt <[nate.prewitt@gmail.com](mailto:nate.prewitt@gmail.com)>
  - \* Ensure timeouts are not booleans and greater than zero.
  - \* Fixed infinite loop in ``stream`` when amt=None.
  - \* Added length\_remaining to determine remaining data to be read.
  - \* Added enforce\_content\_length to raise exception when incorrect content-length received.

- \* Seth Michael Larson <sethmichaellarson@protonmail.com>
  - \* Created selectors backport that supports PEP 475.
  
- \* Alexandre Dias <alex.dias@smarkets.com>
  - \* Don't retry on timeout if method not in whitelist
  
- \* Moinuddin Quadri <moin18@gmail.com>
  - \* Lazily load idna package
  
- \* Tom White <s6yg1ez3@mail2tor.com>
  - \* Made SOCKS handler differentiate socks5h from socks5 and socks4a from socks4.
  
- \* Tim Burke <tim.burke@gmail.com>
  - \* Stop buffering entire deflate-encoded responses.
  
- \* Tuukka Mustonen <tuukka.mustonen@gmail.com>
  - \* Add counter for status\_forcelist retries.
  
- \* Erik Rose <erik@mozilla.com>
  - \* Bugfix to pyopenssl vendoring
  
- \* Wolfgang Richter <wolfgang.richter@gmail.com>
  - \* Bugfix related to loading full certificate chains with PyOpenSSL backend.
  
- \* Mike Miller <github@mikeage.net>
  - \* Logging improvements to include the HTTP(S) port when opening a new connection
  
- \* Ioannis Tziakos <mail@itziakos.gr>
  - \* Fix ``util.selectors.\_fileobj\_to\_fd`` to accept ``long``.
  - \* Update appveyor tox setup to use the 64bit python.
  
- \* Akamai  
(through Jess Shapiro) <jshapiro@akamai.com>
  - \* Ongoing maintenance; 2017-2018
  
- \* Dominique Leuenberger <dimstar@opensuse.org>
  - \* Minor fixes in the test suite
  
- \* Will Bond <will@wbond.net>
  - \* Add Python 2.6 support to ``contrib.securetransport``
  
- \* Aleksei Alekseev <alekseev.yeskela@gmail.com>
  - \* using auth info for socks proxy
  
- \* Chris Wilcox <git@crwilcox.com>
  - \* Improve contribution guide
  - \* Add ``HTTPResponse.geturl`` method to provide ``urllib2.urlopen().geturl()`` behavior

- \* Bruce Merry <<https://www.brucemerry.org.za>>
- \* Fix leaking exceptions when system calls are interrupted with zero timeout
  
- \* Hugo van Kemenade <<https://github.com/hugovk>>
- \* Drop support for EOL Python 2.6
  
- \* Tim Bell <<https://github.com/timb07>>
- \* Bugfix for responses with Content-Type: message/\* logging warnings
  
- \* Justin Bramley <<https://github.com/jbramleycl>>
- \* Add ability to handle multiple Content-Encodings
  
- \* Katsuhiko YOSHIDA <<https://github.com/kyoshidajp>>
- \* Remove Authorization header  
regardless of case when redirecting to cross-site
  
- \* James Meickle <<https://permadeath.com/>>
- \* Improve handling of Retry-After header
  
- \* Chris Jerdonek <[chris.jerdonek@gmail.com](mailto:chris.jerdonek@gmail.com)>
- \* Remove a spurious TypeError from the exception chain inside  
HTTPConnectionPool.\_make\_request(), also for BaseExceptions.
  
- \* Jorge Lopez Silva <<https://github.com/jalopezsilva>>
- \* Added support for forwarding requests through HTTPS proxies.
  
- \* Benno Rice <[benno@jeamland.net](mailto:benno@jeamland.net)>
- \* Allow cadata parameter to be passed to underlying `SSLContext.load_verify_locations()`.
  
- \* Keiichi Kobayashi <[abok.1k@gmail.com](mailto:abok.1k@gmail.com)>
- \* Rename VerifiedHTTPSConnection to HTTPSConnection
  
- \* Himanshu Garg <[garg\\_himanshu@outlook.com](mailto:garg_himanshu@outlook.com)>
- \* DOC & LICENSE Update
  
- \* Hod Bin Noon <[bin.noon.hod@gmail.com](mailto:bin.noon.hod@gmail.com)>
- \* Test improvements
  
- \* Chris Olufson <[tycarac@gmail.com](mailto:tycarac@gmail.com)>
- \* Fix for connection not being released on HTTP redirect and response not preloaded
  
- \* [Bastiaan Bakker] <<https://github.com/bastiaanb>>
- \* Support for logging session keys  
via environment variable `SSLKEYLOGFILE` (Python 3.8+)
  
- \* [Ezzeri Esa] <<https://github.com/savarin>>
- \* Ports and extends on types from typedshed

## 1.299 rpm 4.16.1.3-29.el9

### 1.299.1 Available under license :

RPM is covered under two separate licenses.

The entire code base may be distributed under the terms of the GNU General Public License (GPL), which appears immediately below. Alternatively, all of the source code in the lib and rpmio subdirectories of the RPM source code distribution as well as any code derived from that code may instead be distributed under the GNU Library General Public License (LGPL), at the choice of the distributor. The complete text of the LGPL appears at the bottom of this file.

This alternative is provided to enable applications to be linked against the RPM library (commonly called librpm) without forcing such applications to be distributed under the GPL.

Any questions regarding the licensing of RPM should be addressed to rpm-maint@lists.rpm.org

-----

## GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

675 Mass Ave, Cambridge, MA 02139, USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that

there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third

parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of

Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not

signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to

be

a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR

REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>
Copyright (C) 19yy <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 675 Mass Ave, Cambridge, MA 02139, USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) 19yy name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
```

under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989  
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

-----  
GNU LIBRARY GENERAL PUBLIC LICENSE  
Version 2, June 1991

Copyright (C) 1991  
Free Software Foundation, Inc.  
675 Mass Ave, Cambridge, MA 02139, USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

[This is the first released version of the library GPL. It is  
numbered 2 because it goes with version 2 of the ordinary GPL.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Library General Public License, applies to some specially designated Free Software Foundation software, and to any other libraries whose authors decide to use it. You can use it for

your libraries, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the

freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library, or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link a program with the library, you must provide complete object files to the recipients so that they can relink them with the library, after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

Our method of protecting your rights has two steps: (1) copyright the library, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the library.

Also, for each distributor's protection, we want to make certain that everyone understands that there is no warranty for this free library. If the library is modified by someone else and passed on, we want its recipients to know that what they have is not the original version, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that companies distributing free software will individually obtain patent licenses, thus in effect transforming the program into proprietary software. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License, which was designed for utility programs. This license, the GNU Library General Public License, applies to certain designated libraries. This license is quite different from the ordinary one; be sure to read it in full, and don't assume that anything in it is

the same as in the ordinary license.

The reason we have a separate public license for some libraries is that they blur the distinction we usually make between modifying or adding to a program and simply using it. Linking a program with a library, without changing the library, is in some sense simply using the library, and is analogous to running a utility program or application program. However, in a textual and legal sense, the linked executable is a combined work, a derivative of the original library, and the ordinary General Public License treats it as such.

Because of this blurred distinction, using the ordinary General Public License for libraries did not effectively promote software sharing, because most developers did not use the libraries. We concluded that weaker conditions might promote sharing better.

However, unrestricted linking of non-free programs would deprive the users of those programs of all benefit from the free status of the libraries themselves. This Library General Public License is intended to permit developers of non-free programs to use free libraries, while preserving your freedom as a user of such programs to change the free libraries that are incorporated in them. (We have not seen how to achieve this as regards changes in header files, but we have achieved it as regards changes in the actual functions of the Library.) The hope is that this will lead to faster development of free libraries.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, while the latter only works together with the library.

Note that it is possible for a library to be covered by the ordinary General Public License rather than by this special one.

## GNU LIBRARY GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Library General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs

(which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify

that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative

work.

(Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also compile or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

c) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

d) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying

the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries,

so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Library General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER

SOFTWARE), EVEN IF  
SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH  
DAMAGES.

## END OF TERMS AND CONDITIONS

### Appendix: How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Library General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Library General Public License for more details.

You should have received a copy of the GNU Library General Public License along with this library; if not, write to the Free Software Foundation, Inc., 675 Mass Ave, Cambridge, MA 02139, USA.

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the  
library  
'Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990

Ty Coon, President of Vice

That's all there is to it!

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct

or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding

those notices that do not

pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.  
Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## 1.302 dnf 4.14.0-9.el9

### 1.302.1 Available under license :

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price.

Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights.

These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE

### TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program).

Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the

entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as

distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE,  
THERE IS NO WARRANTY  
FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN  
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES  
PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED  
OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF  
MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS  
TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE  
PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING,  
REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING  
WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR  
REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES,  
INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING  
OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED  
TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY  
YOU OR  
THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER  
PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE  
POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest  
possible use to the public, the best way to achieve this is to make it  
free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest  
to attach them to the start of each source file to most effectively  
convey the exclusion of warranty; and each file should have at least  
the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify  
it under the terms of the GNU

General Public License as published by

the Free Software Foundation; either version 2 of the License, or  
(at your option) any later version.

This program is distributed in the hope that it will be useful,  
but WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the  
GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute
it
under certain conditions; type `show c' for details.
```

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than ``show w'` and ``show c'`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

## 1.303 libsemanage-common 3.6-1.el9

### 1.303.1 Available under license :

GNU LESSER GENERAL PUBLIC LICENSE  
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.  
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies

of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that

there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free

programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

## GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from

such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If

identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves,

then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the

source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License.

Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the

copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute

so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that

everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990  
Ty Coon, President of Vice

That's all there is to it!

Additional Conditions for this Windows binary build  
-----

This program is linked with and uses Microsoft Distributable Code,  
copyrighted by Microsoft Corporation. The Microsoft Distributable Code  
is embedded in each .exe, .dll and .pyd file as a result of running  
the code through a linker.

If you further distribute programs that include the Microsoft  
Distributable Code, you must comply with the restrictions on  
distribution specified by Microsoft. In particular, you must require  
distributors and external end users to agree to terms that protect the

Microsoft Distributable Code at least as much as Microsoft's own requirements for the Distributable Code. See Microsoft's documentation (included in its developer tools and on its website at microsoft.com) for specific details.

Redistribution of the Windows binary build of the Python interpreter complies with this agreement, provided that you do not:

- alter any copyright, trademark or patent notice in Microsoft's Distributable Code;
- use Microsoft's trademarks in your programs' names or in a way that suggests your programs come from or are endorsed by Microsoft;
- distribute Microsoft's Distributable Code to run on a platform other than Microsoft operating systems, run-time technologies or application platforms; or
- include Microsoft Distributable Code in malicious, deceptive or unlawful programs.

These restrictions apply only to the Microsoft Distributable Code as defined above, not to Python itself or any programs running on the Python interpreter. The redistribution of the Python interpreter and libraries is governed by the Python Software License included with this file, or by other licenses as marked.

A. HISTORY OF THE SOFTWARE

=====

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see <http://www.cwi.nl>) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see <http://www.cnri.reston.va.us>) in Reston, Virginia where he released several versions of the software.

In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations, which became Zope Corporation. In 2001, the Python Software Foundation (PSF, see <https://www.python.org/psf/>) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation was a sponsoring member of the PSF.

All

Python releases are Open Source (see <http://www.opensource.org> for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

Release	Derived from	Year	Owner	GPL-compatible? (1)
0.9.0 thru 1.2		1991-1995	CWI	yes
1.3 thru 1.5.2	1.2	1995-1999	CNRI	yes
1.6	1.5.2	2000	CNRI	no
2.0	1.6	2000	BeOpen.com	no
1.6.1	1.6	2001	CNRI	yes (2)
2.1	2.0+1.6.1	2001	PSF	no
2.0.1	2.0+1.6.1	2001	PSF	yes
2.1.1	2.1+2.0.1	2001	PSF	yes
2.1.2	2.1.1	2002	PSF	yes
2.1.3	2.1.2	2002	PSF	yes
2.2 and above	2.1.1	2001-now	PSF	yes

Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute

a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

## B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON

=====

Python software and documentation are licensed under the Python Software Foundation License Version 2.

Starting with Python 3.8.6, examples, recipes, and other code in the documentation are dual licensed under the PSF License Version 2 and the Zero-Clause BSD license.

Some software incorporated into Python is under different licenses. The licenses are listed with code falling under that license.

### PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2

-----

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using this software ("Python") in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "Copyright

(c) 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023 Python Software Foundation; All Rights Reserved" are retained in Python alone or in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on

or incorporates Python or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python, Licensee agrees to be bound by the terms and conditions of this License Agreement.

BEOPEN.COM LICENSE AGREEMENT FOR PYTHON 2.0

-----

BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

1. This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"), having an office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the Individual or Organization ("Licensee") accessing and otherwise using this software in source or binary form and its associated documentation ("the Software").

2. Subject to the terms and conditions of this BeOpen Python License Agreement, BeOpen hereby grants Licensee a non-exclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and

otherwise use the Software alone or in any derivative version, provided, however, that the BeOpen Python License is retained in the Software, alone or in any derivative version prepared by Licensee.

3. BeOpen is making the Software available to Licensee on an "AS IS" basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

5. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

6. This License Agreement shall be governed by and interpreted in all respects by the law of the State of California, excluding conflict of law provisions. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between BeOpen and Licensee. This License Agreement does not grant permission to use BeOpen trademarks or trade names in a trademark sense to endorse or promote products or services of Licensee, or any third party. As an exception, the "BeOpen Python" logos available at <http://www.pythonlabs.com/logos.html> may be used according to the permissions granted on that web page.

7. By copying, installing or otherwise using the software, Licensee agrees to be bound by the terms and conditions of this License Agreement.

#### CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1

-----

1. This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, CNRI hereby grants Licensee a nonexclusive, royalty-free, world-wide

license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights Reserved" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This Agreement may also be obtained from a proxy server on the Internet using the following URL: <http://hdl.handle.net/1895.22/1013>".

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS" basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S. federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions. Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License

Agreement only as to issues arising under or with respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission to use CNRI trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By clicking on the "ACCEPT" button where indicated, or by copying, installing or otherwise using Python 1.6.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

ACCEPT

CWI LICENSE AGREEMENT FOR PYTHON 0.9.0 THROUGH 1.2  
-----

Copyright (c) 1991 - 1995, Stichting Mathematisch Centrum Amsterdam, The Netherlands. All rights reserved.

Permission to use, copy, modify, and distribute this software and its documentation for any purpose and without fee is hereby granted, provided that the above copyright notice appear in all copies and that both that copyright notice and this permission notice appear in supporting documentation, and that the name of Stichting Mathematisch Centrum or CWI not be used in advertising or publicity pertaining to distribution of the software without specific, written prior permission.

STICHTING MATHEMATISCH CENTRUM DISCLAIMS ALL WARRANTIES WITH REGARD TO THIS SOFTWARE, INCLUDING ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS, IN NO EVENT SHALL STICHTING MATHEMATISCH CENTRUM BE LIABLE FOR ANY SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES OR ANY DAMAGES WHATSOEVER

RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

ZERO-CLAUSE BSD LICENSE FOR CODE IN THE PYTHON DOCUMENTATION  
-----

Permission to use, copy, modify, and/or distribute this software for any purpose with or without fee is hereby granted.

THE SOFTWARE IS PROVIDED "AS IS" AND THE AUTHOR DISCLAIMS ALL WARRANTIES WITH REGARD TO THIS SOFTWARE INCLUDING ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS. IN NO EVENT SHALL THE AUTHOR BE LIABLE FOR ANY SPECIAL, DIRECT,

INDIRECT, OR CONSEQUENTIAL DAMAGES OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

This license applies to the bootstrapper application that is embedded within the installer. It has no impact on the licensing for the rest of the installer or Python itself, as no code covered by this license exists in any other part of the product.

---

#### Microsoft Reciprocal License (MS-RL)

This license governs use of the accompanying software. If you use the software, you accept this license. If you do not accept the license, do not use the software.

#### 1. Definitions

The terms "reproduce," "reproduction," "derivative works," and "distribution" have the same meaning here as under U.S. copyright law.

A "contribution" is the original software, or any additions or changes to the software.

A "contributor" is any person that distributes its contribution under this license.

"Licensed patents" are a contributor's patent claims that read directly on its contribution.

#### 2. Grant of Rights

(A) Copyright Grant- Subject to the terms of this license, including the license conditions and limitations in section 3, each contributor grants you a non-exclusive, worldwide, royalty-free copyright license to reproduce its contribution, prepare derivative works of its contribution, and distribute its contribution or any derivative works that you create.

(B) Patent Grant- Subject to the terms of this license, including the license conditions and limitations in section 3, each contributor grants you a non-exclusive, worldwide, royalty-free license under its licensed patents to make, have made, use, sell, offer for sale, import, and/or otherwise dispose of its contribution in the software or derivative works of the contribution in the software.

#### 3. Conditions and Limitations

(A) Reciprocal Grants- For any file you distribute that contains code from the software (in source code or binary format), you must provide recipients the source code to that file along with a copy of this license, which license will govern that file. You may license other files that are entirely your own work and do not contain code from the software under any terms you choose.

(B) No Trademark License- This license does not grant you rights to use any contributors' name, logo, or trademarks.

(C) If you bring a patent claim against any contributor over patents that you claim are infringed by the software, your patent license from such contributor to the software ends automatically.

(D) If you distribute any portion of the software, you must retain all copyright, patent, trademark, and attribution notices that are present in the software.

(E) If you distribute any portion of the software in source code form, you may do so only under this license by including a complete copy of this license with your distribution. If you distribute any portion of the software in compiled or object code form, you may only do so under a license that complies with this license.

(F) The software is licensed "as-is." You bear the risk of using it. The contributors give no express warranties, guarantees or conditions.

You may have additional consumer rights under your local laws which this license cannot change. To the extent permitted under your local laws, the contributors exclude the implied warranties of merchantability, fitness for a particular purpose and non-infringement.

# 1.305 libdnf 0.69.0-8.el9

## 1.305.1 Available under license :

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts  
as the successor of the GNU Library Public License, version 2, hence  
the version number 2.1.]

### Preamble

The licenses for most software are designed to take away your  
freedom to share and change it. By contrast, the GNU General Public  
Licenses are intended to guarantee your freedom to share and change  
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some  
specially designated software packages--typically libraries--of the  
Free Software Foundation and other authors who  
decide to use it. You  
can use it too, but we suggest you first think carefully about whether  
this license or the ordinary General Public License is the better  
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,  
not price. Our General Public Licenses are designed to make sure that  
you have the freedom to distribute copies of free software (and charge  
for this service if you wish); that you receive source code or can get  
it if you want it; that you can change the software and use pieces of  
it in new free programs; and that you are informed that you can do  
these things.

To protect your rights, we need to make restrictions that forbid  
distributors to deny you these rights or to ask you to surrender these  
rights. These restrictions translate to certain responsibilities for  
you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages

are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

#### GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under

copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a

table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary

GNU General Public

License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all

subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the

object code for the work under the terms of Section 6.

Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany

the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above

specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or

distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE,

BE LIABLE TO YOU  
FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR  
CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE  
LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING  
RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A  
FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF  
SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH  
DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey

the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990  
Ty Coon, President of Vice

That's all there is to it!

## 1.306 libdnf-plugin-subscription-manager

### 1.29.40-1.el9

#### 1.306.1 Available under license :

GNU LESSER GENERAL PUBLIC LICENSE  
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts  
as the successor of the GNU Library Public License, version 2, hence  
the version number 2.1.]

#### Preamble

The licenses for most software are designed to take away your  
freedom to share and change it. By contrast, the GNU General Public  
Licenses are intended to guarantee your freedom to share and change  
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some  
specially designated software packages--typically libraries--of the  
Free Software Foundation and other authors who  
decide to use it. You  
can use it too, but we suggest you first think carefully about whether  
this license or the ordinary General Public License is the better  
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,  
not price. Our General Public Licenses are designed to make sure that  
you have the freedom to distribute copies of free software (and charge  
for this service if you wish); that you receive source code or can get  
it if you want it; that you can change the software and use pieces of  
it in new free programs; and that you are informed that you can do

these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General

Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

## GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices

stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public

License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2,

instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline

functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the

object code for the work under the terms of Section 6.

Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany

the work with the complete corresponding

machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the

Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate

properly with a modified version of the library, if

the user installs one, as long as the modified version is

interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally

distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or

distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed

through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR

PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301

USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990  
Ty Coon, President of Vice

That's all there is to it!

## 1.307 acl 2.3.1-4.e19

### 1.307.1 Available under license :

Most components of the "acl" package are licensed under Version 2.1 of the GNU Lesser General Public License (see COPYING.LGPL).

Some components (as annotated in the source) are licensed under Version 2 of the GNU General Public License (see below),

-----  
GNU GENERAL PUBLIC LICENSE  
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program"

means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if

the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for

making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License,

they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free

Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one  
line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify  
it under the terms of the GNU General Public License as published by  
the Free Software Foundation; either version 2 of the License, or  
(at your option) any later version.

This program is distributed in the hope that it will be useful,  
but WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the  
GNU General Public License for more details.

You should have received a copy of the GNU General Public License along  
with this program; if not, write to the Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this  
when it starts  
in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate  
parts of the General Public License. Of course, the commands you use may  
be called something other than `show w' and `show c'; they could even be  
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your  
school, if any, to sign a "copyright disclaimer" for the program, if  
necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
'Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License  
does not permit incorporating your program into  
proprietary programs. If your program is a subroutine library, you may

consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

Most components of the "acl" package are licensed under Version 2.1 of the GNU Lesser General Public License (see below).  
below.

Some components (as annotated in the source) are licensed under Version 2 of the GNU General Public License (see COPYING).

---

## GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions

that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

## GNU LESSER GENERAL PUBLIC LICENSE

### TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in

these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file

is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials

specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies,

or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing

to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME

THE COST  
OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

##### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990  
Ty Coon, President of Vice

That's all there is to it!

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates the terms and conditions of version 3 of the GNU General Public License, supplemented by the additional permissions listed below.

### 0. Additional Definitions.

As used herein, "this License" refers to version 3 of the GNU Lesser General Public License, and the "GNU GPL" refers to version 3 of the GNU General Public License.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library.

Defining a subclass of a class defined by the Library is deemed a mode of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

### 1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

## 2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

- a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or
- b) under the GNU GPL, with none of the additional permissions of this License applicable to that copy.

## 3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

- a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.
- b) Accompany the object code with a copy of the GNU GPL and this license document.

## 4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

- a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the Combined Work with a copy of the GNU GPL and this license document.

c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.

1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this License, and convey such a combined library under terms of your choice, if you do both of the following:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities, conveyed under the terms of this License.

b) Give prominent notice with the combined library that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

## 6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version of the GNU Lesser General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that published version or of any later version published by the Free Software Foundation. If the Library as you received it does not specify a version number of the GNU Lesser General Public License, you may choose any version of the GNU Lesser General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide whether future versions of the GNU Lesser General Public License shall apply, that proxy's public statement of acceptance of any version is permanent authorization for you to choose that version for the Library.

### GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by

the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price.

Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed

under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this

License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for

making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot

distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of

this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

##### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify  
it under the terms of the GNU

General Public License as published by

the Free Software Foundation; either version 2 of the License, or  
(at your option) any later version.

This program is distributed in the hope that it will be useful,  
but WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the  
GNU General Public License for more details.

You should have received a copy of the GNU General Public License along  
with this program; if not, write to the Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this  
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author

Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.

This is free software, and you are welcome to redistribute

it

under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate  
parts of the General Public License. Of course, the commands you use may  
be called something other than `show w' and `show c'; they could even be  
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your  
school, if any, to sign a "copyright disclaimer" for the program, if  
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program

`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into  
proprietary programs. If your program is a subroutine library, you may  
consider it more useful to permit linking proprietary applications with the  
library. If this

is what you want to do, use the GNU Lesser General Public License instead of this License.

This license applies to the eu-readelf.1 man page which was forked from the binutils readelf version of the man page. The rest of the documentation is provided under the license found in the top level directory.

GNU Free Documentation License  
Version 1.3, 3 November 2008

Copyright (C) 2000, 2001, 2002, 2007, 2008 Free Software Foundation, Inc.  
<<https://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

## 0. PREAMBLE

The purpose of this License is to make a manual, textbook, or other functional and useful document "free" in the sense of freedom: to assure everyone the effective freedom to copy and redistribute it, with or without modifying it, either commercially or noncommercially. Secondly, this License preserves for the author and publisher a way to get credit for their work, while not being considered responsible for modifications made by others.

This License is a kind of "copyleft", which means that derivative works of the document must themselves be free in the same sense. It complements the GNU General Public License, which is a copyleft license designed for free software.

We have designed this License in order to use it for manuals for free software, because free software needs free documentation: a free program should come with manuals providing the same freedoms that the software does. But this License is not limited to software manuals; it can be used for any textual work, regardless of subject matter or whether it is published as a printed book. We recommend this License principally for works whose purpose is instruction or reference.

## 1. APPLICABILITY AND DEFINITIONS

This License applies to any manual or other work, in any medium, that contains a notice placed by the copyright holder saying it can be distributed under the terms of this License. Such a notice grants a world-wide, royalty-free license, unlimited in duration, to

use that work under the conditions stated herein. The "Document", below, refers to any such manual or work. Any member of the public is a licensee, and is addressed as "you". You accept the license if you copy, modify or distribute the work in a way requiring permission under copyright law.

A "Modified Version" of the Document means any work containing the Document or a portion of it, either copied verbatim, or with modifications and/or translated into another language.

A "Secondary Section" is a named appendix or a front-matter section of the Document that deals exclusively with the relationship of the publishers or authors of the Document to the Document's overall subject (or to related matters) and contains nothing that could fall directly within that overall subject. (Thus, if the Document is in part a textbook of mathematics, a Secondary Section may not explain any mathematics.) The relationship could be a matter of historical connection with the subject or with related matters, or of legal, commercial, philosophical, ethical or political position regarding them.

The "Invariant Sections" are certain Secondary Sections whose titles are designated, as being those of Invariant Sections, in the notice that says that the Document is released under this License. If a section does not fit the above definition of Secondary then it is not allowed to be designated as Invariant. The Document may contain zero Invariant Sections. If the Document does not identify any Invariant Sections then there are none.

The "Cover Texts" are certain short passages of text that are listed, as Front-Cover Texts or Back-Cover Texts, in the notice that says that the Document is released under this License. A Front-Cover Text may be at most 5 words, and a Back-Cover Text may be at most 25 words.

A "Transparent" copy of the Document means a machine-readable copy, represented in a format whose specification is available to the general public, that is suitable for revising the document straightforwardly with generic text editors or (for images composed of pixels) generic paint programs or (for drawings) some widely available drawing editor, and that is suitable for input to text formatters or for automatic translation to a variety of formats suitable for input to text formatters. A copy made in an otherwise Transparent file format whose markup, or absence of markup, has been arranged to thwart or discourage subsequent modification by readers is not Transparent. An image format is not Transparent if used for any substantial amount

of text. A copy that is not "Transparent" is called "Opaque".

Examples of suitable formats for Transparent copies include plain ASCII without markup, Texinfo input format, LaTeX input format, SGML or XML using a publicly available DTD, and standard-conforming simple HTML, PostScript or PDF designed for human modification. Examples of transparent image formats include PNG, XCF and JPG. Opaque formats include proprietary formats that can be read and edited only by proprietary word processors, SGML or XML for which the DTD and/or processing tools are not generally available, and the machine-generated HTML, PostScript or PDF produced by some word processors for output purposes only.

The "Title Page" means, for a printed book, the title page itself, plus such following pages as are needed to hold, legibly, the material this License requires to appear in the title page. For works in formats which do not have any title page as such, "Title Page" means the text near the most prominent appearance of the work's title, preceding the beginning of the body of the text.

The "publisher" means any person or entity that distributes copies of the Document to the public.

A section "Entitled XYZ" means a named subunit of the Document whose title either is precisely XYZ or contains XYZ in parentheses following text that translates XYZ in another language. (Here XYZ stands for a specific section name mentioned below, such as "Acknowledgements", "Dedications", "Endorsements", or "History".) To "Preserve the Title" of such a section when you modify the Document means that it remains a section "Entitled XYZ" according to this definition.

The Document may include Warranty Disclaimers next to the notice which states that this License applies to the Document. These Warranty Disclaimers are considered to be included by reference in this License, but only as regards disclaiming warranties: any other implication that these Warranty Disclaimers may have is void and has no effect on the meaning of this License.

## 2. VERBATIM COPYING

You may copy and distribute the Document in any medium, either commercially or noncommercially, provided that this License, the copyright notices, and the license notice saying this License applies to the Document are reproduced in all copies, and that you add no other conditions whatsoever to those of this License. You may not use technical measures to obstruct or control the reading

or further copying of the copies you make or distribute. However, you may accept compensation in exchange for copies. If you distribute a large enough number of copies you must also follow the conditions in section 3.

You may also lend copies, under the same conditions stated above, and you may publicly display copies.

### 3. COPYING IN QUANTITY

If you publish printed copies (or copies in media that commonly have printed covers) of the Document, numbering more than 100, and the Document's license notice requires Cover Texts, you must enclose the copies in covers that carry, clearly and legibly, all these Cover Texts: Front-Cover Texts on the front cover, and Back-Cover Texts on the back cover. Both covers must also clearly and legibly identify you as the publisher of these copies. The front cover must present the full title with all words of the title equally prominent and visible. You may add other material on the covers in addition.

Copying with changes limited to the covers, as long as they preserve the title of the Document and satisfy these conditions, can be treated as verbatim copying in other respects.

If the required texts for either cover are too voluminous to fit legibly, you should put the first ones listed (as many as fit reasonably) on the actual cover, and continue the rest onto adjacent pages.

If you publish or distribute Opaque copies of the Document numbering more than 100, you must either include a machine-readable Transparent copy along with each Opaque copy, or state in or with each Opaque copy a computer-network location from which the general network-using public has access to download using public-standard network protocols a complete Transparent copy of the Document, free of added material.

If you use the latter option, you must take reasonably prudent steps, when you begin distribution of Opaque copies in quantity, to ensure that this Transparent copy will remain thus accessible at the stated location until at least one year after the

last time you distribute an Opaque copy (directly or through your agents or retailers) of that edition to the public.

It is requested, but not required, that you contact the authors of the Document well before redistributing any large number of copies, to give them a chance to provide you with an updated version of the Document.

#### 4. MODIFICATIONS

You may copy and distribute a Modified Version of the Document under the conditions of sections 2 and 3 above, provided that you release the Modified Version under precisely this License, with the Modified Version filling the role of the Document, thus licensing distribution and modification of the Modified Version to whoever possesses a copy of it. In addition, you must do these things in the Modified Version:

- A. Use in the Title Page (and on the covers, if any) a title distinct from that of the Document, and from those of previous versions (which should, if there were any, be listed in the History section of the Document). You may use the same title as a previous version if the original publisher of that version gives permission.
- B. List on the Title Page, as authors, one or more persons or entities responsible for authorship of the modifications in the Modified Version, together with at least five of the principal authors of the Document (all of its principal authors, if it has fewer than five), unless they release you from this requirement.
- C. State on the Title page the name of the publisher of the Modified Version, as the publisher.
- D. Preserve all the copyright notices of the Document.
- E. Add an appropriate copyright notice for your modifications adjacent to the other copyright notices.
- F. Include, immediately after the copyright notices, a license notice giving the public permission to use the Modified Version under the terms of this License, in the form shown in the Addendum below.
- G. Preserve in that license notice the full lists of Invariant Sections and required Cover Texts given in the Document's license notice.
- H. Include an unaltered copy of this License.
- I. Preserve the section Entitled "History", Preserve its Title, and add to it an item stating at least the title, year, new authors, and publisher of the Modified Version as given on the Title Page. If there is no section Entitled "History" in the Document, create one stating the title, year, authors, and publisher of the Document as given on its Title Page, then add an item describing the Modified Version as stated in the previous sentence.
- J. Preserve the network location, if any, given in the Document for public access to a Transparent copy of the Document, and likewise the network locations given in the Document for previous versions it was based on. These may be placed in the "History" section. You may omit a network location for a work that was published at least four years before the Document itself, or if the original publisher of the version it refers

to gives permission.

- K. For any section Entitled "Acknowledgements" or "Dedications", Preserve the Title of the section, and preserve in the section all the substance and tone of each of the contributor acknowledgements and/or dedications given therein.
- L. Preserve all the Invariant Sections of the Document, unaltered in their text and in their titles. Section numbers or the equivalent are not considered part of the section titles.
- M. Delete any section Entitled "Endorsements". Such a section may not be included in the Modified Version.
- N. Do not retitle any existing section to be Entitled "Endorsements" or to conflict in title with any Invariant Section.
- O. Preserve any Warranty Disclaimers.

If the Modified Version includes new front-matter sections or appendices that qualify as Secondary Sections and contain no material copied from the Document, you may at your option designate some or all of these sections as invariant. To do this, add their titles to the list of Invariant Sections in the Modified Version's license notice. These titles must be distinct from any other section titles.

You may add a section Entitled "Endorsements", provided it contains nothing but endorsements of your Modified Version by various parties--for example, statements of peer review or that the text has been approved by an organization as the authoritative definition of a standard.

You may add a passage of up to five words as a Front-Cover Text, and a passage of up to 25 words as a Back-Cover Text, to the end of the list of Cover Texts in the Modified Version. Only one passage of Front-Cover Text and one of Back-Cover Text may be added by (or through arrangements made by) any one entity. If the Document already includes a cover text for the same cover, previously added by you or by arrangement made by the same entity you are acting on behalf of, you may not add another; but you may replace the old one, on explicit permission from the previous publisher that added the old one.

The author(s) and publisher(s) of the Document do not by this License give permission to use their names for publicity for or to assert or imply endorsement of any Modified Version.

## 5. COMBINING DOCUMENTS

You may combine the Document with other documents released under this License, under the terms defined in section 4 above for modified

versions, provided that you include in the combination all of the Invariant Sections of all of the original documents, unmodified, and list them all as Invariant Sections of your combined work in its license notice, and that you preserve all their Warranty Disclaimers.

The combined work need only contain one copy of this License, and multiple identical Invariant Sections may be replaced with a single copy. If there are multiple Invariant Sections with the same name but different contents, make the title of each such section unique by adding at the end of it, in parentheses, the name of the original author or publisher of that

section if known, or else a unique number.

Make the same adjustment to the section titles in the list of Invariant Sections in the license notice of the combined work.

In the combination, you must combine any sections Entitled "History" in the various original documents, forming one section Entitled "History"; likewise combine any sections Entitled "Acknowledgements", and any sections Entitled "Dedications". You must delete all sections Entitled "Endorsements".

## 6. COLLECTIONS OF DOCUMENTS

You may make a collection consisting of the Document and other documents released under this License, and replace the individual copies of this License in the various documents with a single copy that is included in the collection, provided that you follow the rules of this License for verbatim copying of each of the documents in all other respects.

You may extract a single document from such a collection, and distribute it individually under this License, provided you insert a copy of this License into the extracted document, and follow this License in all other respects regarding verbatim copying of that document.

## 7. AGGREGATION WITH INDEPENDENT WORKS

A compilation of the Document or its derivatives with other separate and independent documents or works, in or on a volume of a storage or distribution medium, is called an "aggregate" if the copyright resulting from the compilation is not used to limit the legal rights of the compilation's users beyond what the individual works permit. When the Document is included in an aggregate, this License does not apply to the other works in the aggregate which are not themselves

derivative works of the Document.

If the Cover Text requirement of section 3 is applicable to these copies of the Document, then if the Document is less than one half of the entire aggregate, the Document's Cover Texts may be placed on covers that bracket the Document within the aggregate, or the electronic equivalent of covers if the Document is in electronic form.

Otherwise they must appear on printed covers that bracket the whole aggregate.

## 8. TRANSLATION

Translation is considered a kind of modification, so you may distribute translations of the Document under the terms of section 4. Replacing Invariant Sections with translations requires special permission from their copyright holders, but you may include translations of some or all Invariant Sections in addition to the original versions of these Invariant Sections. You may include a translation of this License, and all the license notices in the Document, and any Warranty Disclaimers, provided that you also include the original English version of this License and the original versions of those notices and disclaimers. In case of a disagreement between the translation and the original version of this License or a notice or disclaimer, the original version will prevail.

If a section in the Document is Entitled "Acknowledgements", "Dedications", or "History", the requirement (section 4) to Preserve its Title (section 1) will typically require changing the actual title.

## 9. TERMINATION

You may not copy, modify, sublicense, or distribute the Document except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, or distribute it is void, and will automatically terminate your rights under this License.

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, receipt of a copy of some or all of the same material does not give you any rights to use it.

## 10. FUTURE REVISIONS OF THIS LICENSE

The Free Software Foundation may publish new, revised versions of the GNU Free Documentation License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. See <https://www.gnu.org/licenses/>.

Each version of the License is given a distinguishing version number. If the Document specifies that a particular numbered version of this License "or any later version" applies to it, you have the option of following the terms and conditions either of that specified version or of any later version that has been published (not as a draft) by the Free Software Foundation. If the Document does not specify a version number of this License, you may choose any version ever published (not as a draft) by the Free Software Foundation. If the Document specifies that a proxy can decide which future versions of this License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Document.

## 11. RELICENSING

"Massive Multiauthor Collaboration Site" (or "MMC Site") means any World Wide Web server that publishes copyrightable works and also provides prominent facilities for anybody to edit those works. A public wiki that anybody can edit is an example of such a server. A "Massive Multiauthor Collaboration" (or "MMC") contained in the site means any set of copyrightable works thus published on the MMC site.

"CC-BY-SA" means the Creative Commons Attribution-Share Alike 3.0

license published by Creative Commons Corporation, a not-for-profit corporation with a principal place of business in San Francisco, California, as well as future copyleft versions of that license published by that same organization.

"Incorporate" means to publish or republish a Document, in whole or in part, as part of another Document.

An MMC is "eligible for relicensing" if it is licensed under this License, and if all works that were first published under this License somewhere other than this MMC, and subsequently incorporated in whole or in part into the MMC, (1) had no cover texts or invariant sections, and (2) were thus incorporated prior to November 1, 2008.

The operator of an MMC Site may republish an MMC contained in the site under CC-BY-SA on the same site at any time before August 1, 2009, provided the MMC is eligible for relicensing.

ADDENDUM: How to use this License for your documents

To use this License in a document you have written, include a copy of the

License in the document and put the following copyright and license notices just after the title page:

Copyright (c) YEAR YOUR NAME.

Permission is granted to copy, distribute and/or modify this document under the terms of the GNU Free Documentation License, Version 1.3 or any later version published by the Free Software Foundation; with no Invariant Sections, no Front-Cover Texts, and no Back-Cover Texts. A copy of the license is included in the section entitled "GNU Free Documentation License".

If you have Invariant Sections, Front-Cover Texts and Back-Cover Texts, replace the "with...Texts." line with this:

with the Invariant Sections being LIST THEIR TITLES, with the Front-Cover Texts being LIST, and with the Back-Cover Texts being LIST.

If you have Invariant Sections without Cover Texts, or some other combination of the three, merge those two alternatives to suit the situation.

If your document contains nontrivial examples of program code, we recommend releasing these examples in parallel under your choice of

free software license, such as the GNU General Public License,  
to permit their use in free software.

GNU GENERAL PUBLIC LICENSE  
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for  
software and other kinds of works.

The licenses for most software and other practical works are designed  
to take away your freedom to share and change the works. By contrast,  
the GNU General Public License is intended to guarantee your freedom to  
share and change all versions of a program--to make sure it remains free  
software for all its users. We, the Free Software Foundation, use the  
GNU General Public License for most of our software; it applies also to  
any other work released this way by its authors. You can apply it to  
your programs, too.

When we speak of free software, we are referring to  
freedom, not  
price. Our General Public Licenses are designed to make sure that you  
have the freedom to distribute copies of free software (and charge for  
them if you wish), that you receive source code or can get it if you  
want it, that you can change the software or use pieces of it in new  
free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you  
these rights or asking you to surrender the rights. Therefore, you have  
certain responsibilities if you distribute copies of the software, or if  
you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether  
gratis or for a fee, you must pass on to the recipients the same  
freedoms that you received. You must make sure that they, too, receive  
or can get the source code. And you must show them these terms so they  
know their rights.

Developers that use the GNU GPL protect your rights with two steps:  
(1)  
assert copyright on the software, and (2) offer you this License  
giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains

that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

## TERMS AND CONDITIONS

### 0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

#### 1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The

"System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to

control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

## 2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

## 3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological

measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

#### 4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

#### 5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not

invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

#### 6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or

specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

## 7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

## 8. Termination.

You may not propagate or modify a covered work except as expressly

provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

#### 9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

#### 10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered

work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

## 11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this

License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

## 12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may

not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

#### 13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

#### 14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

#### 15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS"

WITHOUT WARRANTY

OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17.

Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>
```

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by

the Free Software Foundation, either version 3 of the License, or  
(at your option) any later version.

This program is distributed in the hope that it will be useful,  
but WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the  
GNU General Public License for more details.

You should have received a copy of the GNU General Public License  
along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short  
notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate  
parts of the General Public License. Of course, your program's commands  
might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school,  
if any, to sign a "copyright disclaimer" for the program, if necessary.  
For more information on this, and how to apply and follow the GNU GPL, see  
<http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program  
into proprietary programs. If your program is a subroutine library, you  
may consider it more useful to permit linking proprietary applications with  
the library. If this is what you want to  
do, use the GNU Lesser General  
Public License instead of this License. But first, please read  
<http://www.gnu.org/philosophy/why-not-lgpl.html>.

## 1.310 python3-subscription-manager-rhsm

### 1.29.40-1.el9

#### 1.310.1 Available under license :

GNU GENERAL PUBLIC LICENSE  
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

## Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices

stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying

the Program or works based on it.

6. Each

time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License

may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW.

EXCEPT WHEN

OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN

IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or  
(at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be

mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program  
'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989  
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.

51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

**GNU LESSER GENERAL PUBLIC LICENSE  
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION**

0. This License Agreement applies to any software library or other

program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1

above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves,

then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License.

Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be

linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6.

Any executables

containing that work also fall under Section 6,

whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable

source code for the Library including whatever

changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2)

will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining

where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any

such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO

WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL

DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU

Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990  
Ty Coon, President of Vice

That's all there is to it!

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,

including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of

this  
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside

or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

#### END OF TERMS AND CONDITIONS

This software is made available under the terms of \*either\* of the licenses found in LICENSE.APACHE or LICENSE.BSD. Contributions to this software is made under the terms of \*both\* these licenses.

Pylons Project Contributor Agreement

=====

The submitter agrees by adding his or her name within the section below named "Contributors" and submitting the resulting modified document to the canonical shared repository location for this software project (whether directly, as a user with "direct commit access", or via a "pull request"), he or she is signing a contract electronically. The submitter becomes a Contributor after a) he or she signs this document by adding their name beneath the "Contributors" section below, and b) the resulting document is accepted into the canonical version control repository.

Treatment of Account

-----

Contributor will not allow anyone other than the Contributor to use his or her username or source repository login to submit code to a Pylons Project source repository. Should Contributor become aware of any such use, Contributor will immediately by notifying Agendaless Consulting.

Notification must be performed

by sending an email to

webmaster@agendaless.com. Until such notice is received, Contributor will be presumed to have taken all actions made through Contributor's account. If the Contributor has direct commit access, Agendaless Consulting will have complete control and discretion over capabilities assigned to Contributor's account, and may disable Contributor's account for any reason at any time.

Legal Effect of Contribution

-----

Upon submitting a change or new work to a Pylons Project source Repository (a "Contribution"), you agree to assign, and hereby do assign, a one-half interest of all right, title and interest in and to copyright and other

intellectual property rights with respect to your new and original portions of the Contribution to Agendaless Consulting. You and Agendaless Consulting each agree that the other shall be free to exercise any and all exclusive rights in and to the Contribution, without accounting to one another, including without limitation, the right to license the Contribution to others under the Repoze Public License. This agreement shall run with title to the Contribution. Agendaless Consulting does not convey to you any right, title or interest in or to the Program or such portions of the Contribution that were taken from the Program. Your transmission of a submission to the Pylons Project source Repository and marks of identification concerning the Contribution itself constitute your intent to contribute and your assignment of the work in accordance with the provisions of this Agreement.

#### License Terms

-----

Code committed to the Pylons Project source repository (Committed Code) must be governed by the Repoze Public License (<http://repoze.org/LICENSE.txt>, aka "the RPL") or another license acceptable to Agendaless Consulting. Until Agendaless Consulting declares in writing an acceptable license other than the RPL, only the RPL shall be used. A list of exceptions is detailed within the "Licensing Exceptions" section of this document, if one exists.

#### Representations, Warranty, and Indemnification

-----

Contributor represents and warrants that the Committed Code does not violate the rights of any person or entity, and that the Contributor has legal authority to enter into this Agreement and legal authority over Contributed Code. Further, Contributor indemnifies Agendaless Consulting against violations.

#### Cryptography

-----

Contributor understands that cryptographic code may be subject to government regulations with which Agendaless Consulting and/or entities using Committed Code must comply. Any code which contains any of the items listed below must not be checked-in until Agendaless Consulting staff has been notified and has approved such contribution in writing.

- Cryptographic capabilities or features
- Calls to cryptographic features
- User interface elements which provide context relating to cryptography

- Code which may, under casual inspection, appear to be cryptographic.

#### Notices

-----

Contributor confirms that any notices required will be included in any Committed Code.

#### Licensing Exceptions

=====

None.

#### List of Contributors

=====

The below-signed are contributors to a code repository that is part of the project named "Translationstring". Each below-signed contributor has read, understands and agrees to the terms above in the section within this document entitled "Pylons Project Contributor Agreement" as of the date beside his or her name.

#### Contributors

-----

- Chris McDonough, 2011/02/16

- Wichert Akkerman, 2012/02/02

This package contains a modified version of ca-bundle.crt:

ca-bundle.crt -- Bundle of CA Root Certificates

Certificate data from Mozilla as of: Thu Nov 3 19:04:19 2011#

This is a bundle of X.509 certificates of public Certificate Authorities

(CA). These were automatically extracted from Mozilla's root certificates file (certdata.txt). This file can be found in the mozilla source tree:  
<http://mxr.mozilla.org/mozilla/source/security/nss/lib/ckfw/builtins/certdata.txt?raw=1#>  
It contains the certificates in PEM format and therefore can be directly used with curl / libcurl / php\_curl, or with an Apache+mod\_ssl webserver for SSL client authentication. Just configure this file as the SSLCACertificateFile.#

#### A. HISTORY OF THE SOFTWARE

=====

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see <http://www.cwi.nl>) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see <http://www.cnri.reston.va.us>) in Reston, Virginia where he released several versions of the software.

In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation, see <http://www.zope.com>). In 2001, the Python Software Foundation (PSF, see <http://www.python.org/psf/>) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of the PSF.

All Python releases are Open Source (see <http://www.opensource.org> for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

Release	Derived from	Year	Owner	GPL-compatible? (1)
0.9.0 thru 1.2		1991-1995	CWI	yes

1.3 thru 1.5.2	1.2	1995-1999	CNRI	yes
1.6	1.5.2	2000	CNRI	no
2.0	1.6	2000	BeOpen.com	no
1.6.1	1.6	2001	CNRI	yes (2)
2.1	2.0+1.6.1	2001	PSF	no
2.0.1	2.0+1.6.1	2001	PSF	yes
2.1.1	2.1+2.0.1	2001	PSF	yes
2.2	2.1.1	2001	PSF	yes
2.1.2	2.1.1	2002	PSF	yes
2.1.3				
2.1.2	2002	PSF	yes	
2.2.1	2.2	2002	PSF	yes
2.2.2	2.2.1	2002	PSF	yes
2.2.3	2.2.2	2003	PSF	yes
2.3	2.2.2	2002-2003	PSF	yes
2.3.1	2.3	2002-2003	PSF	yes
2.3.2	2.3.1	2002-2003	PSF	yes
2.3.3	2.3.2	2002-2003	PSF	yes
2.3.4	2.3.3	2004	PSF	yes
2.3.5	2.3.4	2005	PSF	yes
2.4	2.3	2004	PSF	yes
2.4.1	2.4	2005	PSF	yes
2.4.2	2.4.1	2005	PSF	yes
2.4.3	2.4.2	2006	PSF	yes
2.4.4	2.4.3	2006	PSF	yes
2.5	2.4	2006	PSF	yes
2.5.1	2.5	2007	PSF	yes
2.5.2	2.5.1	2008	PSF	yes
2.5.3	2.5.2	2008	PSF	yes
2.6	2.5	2008	PSF	yes
2.6.1	2.6	2008	PSF	yes
2.6.2	2.6.1	2009	PSF	yes
2.6.3	2.6.2	2009	PSF	yes
2.6.4	2.6.3	2009	PSF	yes
2.6.5	2.6.4	2010	PSF	yes
2.7	2.6	2010	PSF	yes

Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice

of law clause. According to

CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

## B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON

### PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using this software ("Python") in source or binary form and its associated documentation.
2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010 Python Software Foundation; All Rights Reserved" are retained in Python alone or in any derivative version prepared by Licensee.
3. In the event Licensee prepares a derivative work that is based on or incorporates Python or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python.
4. PSF is making Python available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.
5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python, Licensee agrees to be bound by the terms and conditions of this License Agreement.

#### BEOPEN.COM LICENSE AGREEMENT FOR PYTHON 2.0

-----

#### BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

1. This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"), having an office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the Individual or Organization ("Licensee") accessing and otherwise using this software in source or binary form and its associated documentation ("the Software").

2. Subject to the terms and conditions of this BeOpen Python License Agreement, BeOpen hereby grants Licensee a non-exclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use the Software alone or in any derivative version, provided, however, that the BeOpen Python License is retained in the Software, alone or in any derivative version prepared by Licensee.

3. BeOpen is making the Software available to Licensee on an "AS IS" basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

5. This License Agreement will automatically terminate upon a material

breach of its terms and conditions.

6. This License Agreement shall be governed by and interpreted in all respects by the law of the State of California, excluding conflict of law provisions. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between BeOpen and Licensee. This License Agreement does not grant permission to use BeOpen trademarks or trade names in a trademark sense to endorse or promote products or services of Licensee, or any third party. As an exception, the "BeOpen Python" logos available at <http://www.pythonlabs.com/logos.html> may be used according to the permissions granted on that web page.

7. By copying, installing or otherwise using the software, Licensee agrees to be bound by the terms and conditions of this License Agreement.

#### CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1

-----

1. This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, CNRI hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights Reserved" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This Agreement may also be obtained from a proxy server on the Internet using the following URL: <http://hdl.handle.net/1895.22/1013>".

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make

the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS" basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S.

federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions.

Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License Agreement only as to issues arising under or with respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission to use CNRI trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By clicking on the "ACCEPT" button where indicated, or by copying, installing or otherwise using Python 1.6.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

ACCEPT

CWI LICENSE AGREEMENT FOR PYTHON 0.9.0 THROUGH 1.2

-----

Copyright (c) 1991 - 1995, Stichting Mathematisch Centrum Amsterdam,  
The Netherlands. All rights reserved.

Permission to use, copy, modify, and distribute this software and its documentation for any purpose and without fee is hereby granted, provided that the above copyright notice appear in all copies and that both that copyright notice and this permission notice appear in supporting documentation, and that the name of Stichting Mathematisch Centrum or CWI not be used in advertising or publicity pertaining to distribution of the software without specific, written prior permission.

STICHTING MATHEMATISCH CENTRUM DISCLAIMS ALL WARRANTIES WITH REGARD TO THIS SOFTWARE, INCLUDING ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS, IN NO EVENT SHALL STICHTING MATHEMATISCH CENTRUM BE LIABLE FOR ANY SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You"  
(or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,

including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution

notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental,

or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor

has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

#### END OF TERMS AND CONDITIONS

#### APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "{}" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright {yyyy} {name of copyright owner}

Licensed under the Apache License, Version 2.0 (the "License");  
you may not use this file except in compliance with the License.  
You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

#### A. HISTORY OF THE SOFTWARE

=====

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see <http://www.cwi.nl>) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see <http://www.cnri.reston.va.us>) in Reston, Virginia where he released several versions of the software.

In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation, see <http://www.zope.com>). In 2001, the Python Software Foundation (PSF, see <http://www.python.org/psf/>) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of the PSF.

All Python releases are Open Source (see <http://www.opensource.org> for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

Release	Derived from	Year	Owner	GPL-compatible? (1)
0.9.0 thru 1.2		1991-1995	CWI	yes
1.3 thru 1.5.2	1.2	1995-1999	CNRI	yes
1.6	1.5.2	2000	CNRI	no
2.0	1.6	2000	BeOpen.com	no
1.6.1	1.6	2001	CNRI	yes (2)
2.1	2.0+1.6.1	2001	PSF	no
2.0.1	2.0+1.6.1	2001	PSF	yes
2.1.1	2.1+2.0.1	2001	PSF	yes
2.2	2.1.1	2001	PSF	yes
2.1.2	2.1.1	2002	PSF	yes
2.1.3

2.2.1	2.2	2002	PSF	yes
2.2.2	2.2.1	2002	PSF	yes
2.2.3	2.2.2	2003	PSF	yes
2.3	2.2.2	2002-2003	PSF	yes
2.3.1	2.3	2002-2003	PSF	yes
2.3.2	2.3.1	2002-2003	PSF	yes
2.3.3	2.3.2	2002-2003	PSF	yes
2.3.4	2.3.3	2004	PSF	yes
2.3.5	2.3.4	2005	PSF	yes
2.4	2.3	2004	PSF	yes
2.4.1	2.4	2005	PSF	yes
2.4.2	2.4.1	2005	PSF	yes
2.4.3	2.4.2	2006	PSF	yes

2.4.4	2.4.3	2006	PSF	yes
2.5	2.4	2006	PSF	yes
2.5.1	2.5	2007	PSF	yes
2.5.2	2.5.1	2008	PSF	yes
2.5.3	2.5.2	2008	PSF	yes
2.6	2.5	2008	PSF	yes
2.6.1	2.6	2008	PSF	yes
2.6.2	2.6.1	2009	PSF	yes
2.6.3	2.6.2	2009	PSF	yes
2.6.4	2.6.3	2009	PSF	yes
2.6.5	2.6.4	2010	PSF	yes
3.0	2.6	2008	PSF	yes
3.0.1	3.0	2009	PSF	yes
3.1	3.0.1	2009	PSF	yes
3.1.1	3.1	2009	PSF	yes
3.1.2	3.1	2010	PSF	yes
3.2	3.1	2010	PSF	yes

Footnotes:

- (1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.
- (2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

**B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON**

=====

**PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2**

-----

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using this software ("Python") in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010 Python Software Foundation; All Rights Reserved" are retained in Python alone or in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python, Licensee agrees to be bound by the terms and conditions of this License Agreement.

BEOPEN.COM LICENSE AGREEMENT FOR PYTHON 2.0

-----

BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

1. This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"), having an office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the Individual or Organization ("Licensee") accessing and otherwise using this software in source or binary form and its associated documentation ("the Software").

2. Subject to the terms and conditions of this BeOpen Python License Agreement, BeOpen hereby grants Licensee a non-exclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use the Software alone or in any derivative version, provided, however, that the BeOpen Python License is retained in the Software, alone or in any derivative version prepared by Licensee.

3.

BeOpen is making the Software available to Licensee on an "AS IS" basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

5. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

6. This License Agreement shall be governed by and interpreted in all respects by the law of the State of California, excluding conflict of law provisions. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between BeOpen and Licensee. This License Agreement does not grant permission to use BeOpen trademarks or trade names in a trademark sense to endorse or promote products or services of Licensee, or any third party. As an exception, the "BeOpen Python" logos available at <http://www.pythonlabs.com/logos.html> may be used according to the permissions granted on that web page.

7. By copying, installing or otherwise using the software, Licensee agrees to be bound by the terms and conditions of this License Agreement.

CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1

-----

1. This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, CNRI hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights Reserved" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This Agreement may also be obtained from a proxy server on the Internet using the following URL: <http://hdl.handle.net/1895.22/1013>".

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS" basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S. federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions. Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License Agreement only as to issues arising under or with respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission to use CNRI trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By clicking on the "ACCEPT" button where indicated, or by copying, installing or otherwise using Python 1.6.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

ACCEPT

CWI LICENSE AGREEMENT FOR PYTHON 0.9.0 THROUGH 1.2  
-----

Copyright (c) 1991 - 1995, Stichting Mathematisch Centrum Amsterdam, The Netherlands. All rights reserved.

Permission to use, copy, modify, and distribute this software and its documentation for any purpose and without fee is hereby granted, provided that the above copyright notice appear in all copies and that both that copyright notice and this permission notice appear in supporting documentation, and that the name of Stichting Mathematisch Centrum or CWI not be used in advertising or publicity pertaining to distribution of the software without specific, written prior permission.

STICHTING MATHEMATISCH CENTRUM DISCLAIMS ALL WARRANTIES WITH REGARD TO THIS SOFTWARE, INCLUDING ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS, IN NO EVENT SHALL STICHTING MATHEMATISCH CENTRUM BE LIABLE FOR ANY SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT

OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

argparse is (c) 2006-2009 Steven J. Bethard <steven.bethard@gmail.com>.

The argparse module was contributed to Python as of Python 2.7 and thus was licensed under the Python license. Same license applies to all files in the argparse package project.

For details about the Python License, please see doc/Python-License.txt.

## History

-----

Before (and including) argparse 1.1, the argparse package was licensed under Apache License v2.0.

After argparse 1.1, all project files from the argparse project were deleted due to license compatibility issues between Apache License 2.0 and GNU GPL v2.

The project repository then had a clean start with some files taken from Python 2.7.1, so definitely all files are under Python License now.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this

License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided

that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of,

the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You

meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding

those notices that do not

pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

### 1.314.1 Available under license :

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<https://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

## Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps:

(1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run

modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

## TERMS AND CONDITIONS

### 0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the

public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

#### 1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The

"System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for

the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

## 2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is

covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

## 3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid

circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

#### 4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

#### 5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

#### 6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

- a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.
- b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.
- c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.
- d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the

Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply

if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

#### 7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal

Notices displayed by works containing it; or

- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

## 8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your

license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

#### 9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

#### 10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

#### 11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have

actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

#### 12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

#### 13. Use with the GNU Affero General Public

License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

#### 14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

#### 15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF

ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17.

Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of

MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <https://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <https://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <https://www.gnu.org/licenses/why-not-lgpl.html>.

## 1.315 systemd-rpm-macros 252-32.el9\_4

### 1.315.1 Available under license :

```
systemd Project Licensing
```

```
Main License
```

The systemd project uses single-line references to Unique License Identifiers as defined by the Linux Foundation's SPDX project (<https://spdx.org/>). The line in each individual source file identifies the license applicable to that file.

The current set of valid, predefined SPDX identifiers can be found on the SPDX License List at <https://spdx.org/licenses/>.

The 'LICENSES/' directory contains all the licenses used by the sources included in the systemd project source tree.

Unless otherwise noted, the systemd project sources are licensed under the terms and conditions of the **GNU Lesser General Public License v2.1 or later**.

New sources that cannot be distributed under LGPL-2.1-or-later will no longer be accepted for inclusion in the systemd project to maintain license uniformity.

### ## Other Licenses

The following exceptions apply:

- \* some udev sources under src/udev/ are licensed under **GPL-2.0-or-later**, so the udev binaries as a whole are also distributed under **GPL-2.0-or-later**.
- \* the header files contained in src/basic/linux/ and src/shared/linux/ are copied verbatim from the Linux kernel source tree and are licensed under **GPL-2.0 WITH Linux-syscall-note** and are used within the scope of the Linux-syscall-note exception provisions
- \* the src/shared/initreq.h header is licensed under original license, **LGPL-2.0-or-later**.
- \* the src/shared/linux/bpf\_insn.h header is copied from the Linux kernel source tree and is licensed under either **BSD-2-Clause** or **GPL-2.0-only**, and thus is included in the systemd build under the BSD-2-Clause license.
- \* The src/basic/linux/wireguard.h header is copied from the Linux kernel source tree and is licensed under either **MIT** or **GPL-2.0 WITH Linux-syscall-note**, and thus is included in the systemd build under the MIT license.
- \* the following sources are licensed under the **MIT** license (in case of our scripts, to facilitate copying and reuse of those helpers to other projects):
  - hwdb.d/parse\_hwdb.py
  - src/basic/linux/batman\_adv.h
  - src/basic/sparse-endian.h
  - tools/catalog-report.py
- \* the following sources are licensed under the **CC0-1.0** license:
  - src/basic/siphash24.c
  - src/basic/siphash24.h
  - tools/check-includes.pl
- \* the following sources are licensed under the **MIT-0** license:
  - all examples under man/
  - src/systemctl/systemd-sysv-install.SKELETON
  - config files and examples under /network
- \* the following sources are under **Public Domain** (LicenseRef-murmurhash2-public-domain):
  - src/basic/MurmurHash2.c
  - src/basic/MurmurHash2.h
- \* the following sources are under **Public Domain** (LicenseRef-lookup3-public-domain):
  - src/libsystemd/sd-journal/lookup3.c

- src/libsystemd/sd-journal/lookup3.h  
\* the tools/chromiumos/gen\_autosuspend\_rules.py script is licensed under the  
\*\*BSD-3-Clause\*\* license.  
\* Heebo fonts under docs/fonts/ are licensed under the  
\*\*SIL Open Font License 1.1\*\*,  
\* any files under test/ without an explicit license we assume non-copyrightable  
(eg: computer-generated fuzzer data)

## ## OpenSSL Notes

Note that building the systemd project with OpenSSL does not affect the libsystemd.so shared library, which is not linked with the OpenSSL library.

MurmurHash2 was written by Austin Appleby, and is placed in the public domain. The author hereby disclaims copyright to this source code.

## GNU LIBRARY GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1991 Free Software Foundation, Inc.  
51 Franklin St, Fifth Floor, Boston, MA 02110-1301, USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the library GPL. It is numbered 2 because it goes with version 2 of the ordinary GPL.]

## Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Library General Public License, applies to some specially designated Free Software Foundation software, and to any other libraries whose authors decide to use it. You can use it for your libraries, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library, or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link a program with the library, you must provide complete object files to the recipients so that they can relink them with the

library, after making changes to the library and recompiling it.

And you must show them these terms so they know their rights.

Our method of protecting your rights has two steps: (1) copyright the library, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the library.

Also, for each distributor's protection, we want to make certain that everyone understands that there is no warranty for this free library. If the library is modified by someone else and passed on, we want its recipients to know that what they have is not the original version, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that companies distributing free software will individually obtain patent licenses, thus in effect transforming the program into proprietary software. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

Most

GNU software, including some libraries, is covered by the ordinary GNU General Public License, which was designed for utility programs. This license, the GNU Library General Public License, applies to certain designated libraries. This license is quite different from the ordinary one; be sure to read it in full, and don't assume that anything in it is the same as in the ordinary license.

The reason we have a separate public license for some libraries is that they blur the distinction we usually make between modifying or adding to a program and simply using it. Linking a program with a library, without changing the library, is in some sense simply using the library, and is analogous to running a utility program or application program. However, in a textual and legal sense, the linked executable is a combined work, a derivative of the original library, and the ordinary General Public License treats it as such.

Because of this blurred distinction, using the ordinary General Public

License for libraries did not effectively promote software sharing, because most developers did not use the libraries. We concluded that weaker conditions might promote sharing better.

However, unrestricted linking of non-free programs would deprive the users of those programs of all benefit from the free status of the libraries themselves. This Library General Public License is intended to permit developers of non-free programs to use free libraries, while preserving your freedom as a user of such programs to change the free libraries that are incorporated in them. (We have not seen how to achieve this as regards changes in header files, but we have achieved it as regards changes in the actual functions of the Library.) The hope is that this will lead to faster development of free libraries.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library".

The former contains code derived from the library, while the latter only works together with the library.

Note that it is possible for a library to be covered by the ordinary General Public License rather than by this special one.

**TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION**

0. This License Agreement applies to any software library which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Library General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole.

If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections

1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because

it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also compile or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

c) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

d) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may

place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of

this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest

validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Library General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

one line to give the library's name and an idea of what it does.

Copyright (C) year name of author

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Library General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied

warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Library General Public License for more details.

You should have received a copy of the GNU Library General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301, USA.

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in  
the library `Frob' (a library for tweaking knobs) written  
by James Random Hacker.

signature of Ty Coon, 1 April 1990

Ty Coon, President of Vice

That's all there is to it!

This Font Software is licensed under the SIL Open Font License, Version 1.1.

This license is copied below, and is also available with a FAQ at:

<http://scripts.sil.org/OFL>

-----  
SIL OPEN FONT LICENSE Version 1.1 - 26 February 2007  
-----

#### PREAMBLE

The goals of the Open Font License (OFL) are to stimulate worldwide development of collaborative font projects, to support the font creation efforts of academic and linguistic communities, and to provide a free and open framework in which fonts may be shared and improved in partnership with others.

The OFL allows the licensed fonts to be used, studied, modified and redistributed freely as long as they are not sold by themselves. The

fonts, including any derivative works, can be bundled, embedded, redistributed and/or sold with any software provided that any reserved names are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

#### DEFINITIONS

"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting -- in part or in whole -- any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical writer or other person who contributed to the Font Software.

#### PERMISSION & CONDITIONS

Permission is hereby granted, free of charge, to any person obtaining a copy of the Font Software, to use, study, copy, merge, embed, modify, redistribute, and sell modified and unmodified copies of the Font Software, subject to the following conditions:

- 1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.
- 2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy contains the above copyright notice and this license. These can be included either as stand-alone text files, human-readable headers or in the appropriate machine-readable metadata fields within text or binary files as long as those fields can be easily viewed by the user.
- 3) No Modified Version of the Font Software may use the Reserved Font Name(s) unless explicit written permission is granted by the corresponding Copyright Holder. This restriction only applies to the primary font name as presented to the users.

4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font Software shall not be used to promote, endorse or advertise any Modified Version, except to acknowledge the contribution(s) of the Copyright Holder(s) and the Author(s) or with their explicit written permission.

5) The Font Software, modified or unmodified, in part or in whole, must be distributed entirely under this license, and must not be distributed under any other license. The requirement for fonts to remain under this license does not apply to any document created using the Font Software.

#### TERMINATION

This license becomes null and void if any of the above conditions are not met.

#### DISCLAIMER

##### THE

FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT. IN NO EVENT SHALL THE COPYRIGHT HOLDER BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

NOTE! This copyright does *\*not\** cover user programs that use kernel services by normal system calls - this is merely considered normal use of the kernel, and does *\*not\** fall under the heading of "derived work". Also note that the GPL below is copyrighted by the Free Software Foundation, but the instance of code that it refers to (the Linux kernel) is copyrighted by me and others who actually wrote it.

Also note that the only valid version of the GPL as far as the kernel is concerned is `_this_` particular version of the license (ie v2, not v2.2 or v3.x or whatever), unless explicitly otherwise stated.

Linus Torvalds

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

## Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE  
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole

or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete

machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each

time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates

the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW.

EXCEPT WHEN

OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN

IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License,  
or  
(at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your

school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program  
'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989  
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.  
MIT License

Copyright (c) <year> <copyright holders>

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions:

The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. Creative Commons Legal Code

CC0 1.0 Universal

CREATIVE COMMONS CORPORATION IS NOT A LAW FIRM AND DOES NOT PROVIDE LEGAL SERVICES. DISTRIBUTION OF THIS DOCUMENT DOES NOT CREATE AN ATTORNEY-CLIENT RELATIONSHIP. CREATIVE COMMONS PROVIDES THIS INFORMATION ON AN "AS-IS" BASIS. CREATIVE COMMONS MAKES NO WARRANTIES REGARDING THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS PROVIDED HEREUNDER, AND DISCLAIMS LIABILITY FOR DAMAGES RESULTING FROM THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS PROVIDED HEREUNDER.

Statement of Purpose

The laws of most jurisdictions throughout the world automatically confer exclusive Copyright and Related Rights (defined below) upon the creator and subsequent owner(s) (each and all, an "owner") of an original work of authorship and/or a database (each, a "Work").

Certain owners wish to permanently relinquish those rights to a Work for the purpose of contributing to a commons of creative, cultural and scientific works ("Commons")

that the public can reliably and without fear of later claims of infringement build upon, modify, incorporate in other works, reuse and redistribute as freely as possible in any form whatsoever and for any purposes, including without limitation commercial purposes. These owners may contribute to the Commons to promote the ideal of a free

culture and the further production of creative, cultural and scientific works, or to gain reputation or greater distribution for their Work in part through the use and efforts of others.

For these and/or other purposes and motivations, and without any expectation of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the extent that he or she is an owner of Copyright and Related Rights in the Work, voluntarily elects to apply CC0 to the Work and publicly distribute the Work under its terms, with knowledge of his or her Copyright and Related Rights in the Work and the meaning and intended legal effect of CC0 on those rights.

1. Copyright and Related Rights. A Work made available under CC0 may be protected by copyright and related or neighboring rights ("Copyright and Related Rights"). Copyright and Related Rights include, but are not limited to, the following:

- i. the right to reproduce, adapt, distribute, perform, display, communicate, and translate a Work;
- ii. moral rights retained by the original author(s) and/or performer(s);
- iii. publicity and privacy rights pertaining to a person's image or likeness depicted in a Work;
- iv. rights protecting against unfair competition in regards to a Work, subject to the limitations in paragraph 4(a), below;
- v. rights protecting the extraction, dissemination, use and reuse of data in a Work;
- vi. database rights (such as those arising under Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, and under any national implementation thereof, including any amended or successor version of such directive); and
- vii. other similar, equivalent or corresponding rights throughout the world based on applicable law or treaty, and any national implementations thereof.

2. Waiver. To the greatest extent permitted by, but not in contravention of, applicable law, Affirmer hereby overtly, fully, permanently, irrevocably and unconditionally waives, abandons, and surrenders all of Affirmer's Copyright and Related Rights and associated claims and causes of action, whether now known or unknown (including existing as well as future claims and causes of action), in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "Waiver"). Affirmer makes the

Waiver for the benefit of each member of the public at large and to the detriment of Affirmer's heirs and successors, fully intending that such Waiver shall not be subject to revocation, rescission, cancellation, termination, or any other legal or equitable action to disrupt the quiet enjoyment of the Work by the public as contemplated by Affirmer's express Statement of Purpose.

3. Public License Fallback. Should any part of the Waiver for any reason be judged legally invalid or ineffective under applicable law, then the Waiver shall be preserved to the maximum extent permitted taking into account Affirmer's express Statement of Purpose. In addition, to the extent the Waiver is so judged Affirmer hereby grants to each affected person a royalty-free, non transferable, non sublicensable, non exclusive, irrevocable and unconditional license to exercise Affirmer's Copyright and Related Rights in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "License"). The License shall be deemed effective as of the date CC0 was applied by Affirmer to the Work. Should any part of the License for any reason be judged legally invalid or ineffective under applicable law, such partial invalidity or ineffectiveness shall not invalidate the remainder of the License, and in such case Affirmer hereby affirms that he or she will not (i) exercise any of his or her remaining Copyright and Related Rights in the Work or (ii) assert any associated claims and causes of action with respect to the Work, in either case contrary to Affirmer's express Statement of Purpose.

#### 4. Limitations and Disclaimers.

- a. No trademark or patent rights held by Affirmer are waived, abandoned, surrendered, licensed or otherwise affected by this document.
- b. Affirmer offers the Work as-is and makes no representations or warranties of any kind concerning the Work, express, implied, statutory or otherwise, including without limitation warranties of title, merchantability, fitness for a particular purpose, non infringement, or the absence of latent or other defects, accuracy, or the present or absence of errors, whether or not discoverable, all to the greatest extent permissible under applicable law.
- c. Affirmer disclaims responsibility for clearing rights of other persons that may apply to the Work or any use thereof, including without limitation any person's Copyright and Related Rights in the Work. Further, Affirmer disclaims responsibility for obtaining any necessary consents, permissions or other rights required for any use of the Work.

d. Affirmer understands and acknowledges that Creative Commons is not a party to this document and has no duty or obligation with respect to this CC0 or use of the Work.

# 1.316 systemd-pam 252-32.el9\_4

## 1.316.1 Available under license :

# systemd Project Licensing

## Main License

The systemd project uses single-line references to Unique License Identifiers as defined by the Linux Foundation's SPDX project (<https://spdx.org/>). The line in each individual source file identifies the license applicable to that file.

The current set of valid, predefined SPDX identifiers can be found on the SPDX License List at <https://spdx.org/licenses/>.

The 'LICENSES/' directory contains all the licenses used by the sources included in the systemd project source tree.

Unless otherwise noted, the systemd project sources are licensed under the terms and conditions of the **GNU Lesser General Public License v2.1 or later**.

New sources that cannot be distributed under LGPL-2.1-or-later will no longer be accepted for inclusion in the systemd project to maintain license uniformity.

## Other Licenses

The following exceptions apply:

\* some udev sources under src/udev/ are licensed under **GPL-2.0-or-later**, so the udev binaries as a

whole are also distributed under **GPL-2.0-or-later**.

\* the header files contained in src/basic/linux/ and src/shared/linux/ are copied verbatim from the Linux kernel source tree and are licensed under **GPL-2.0 WITH Linux-syscall-note** and are used within the scope of the Linux-syscall-note exception provisions

\* the src/shared/initreq.h header is licensed under original license, **LGPL-2.0-or-later**.

\* the src/shared/linux/bpf\_insn.h header is copied from the Linux kernel source tree and is licensed under either **BSD-2-Clause** or **GPL-2.0-only**, and thus is included in the systemd build under the BSD-2-Clause license.

\* The src/basic/linux/wireguard.h header is copied from the Linux kernel source tree and is licensed under either **MIT** or **GPL-2.0 WITH Linux-syscall-note**, and thus is included in the systemd build under the MIT license.

- \* the following sources are licensed under the **MIT** license (in case of our scripts, to facilitate copying and reuse of those helpers to other projects):
  - hwdb.d/parse\_hwdb.py
  - src/basic/linux/batman\_adv.h
  - src/basic/sparse-endian.h
  - tools/catalog-report.py
- \* the following sources are licensed under the **CC0-1.0** license:
  - src/basic/siphash24.c
  - src/basic/siphash24.h
  - tools/check-includes.pl
- \* the following sources are licensed under the **MIT-0** license:
  - all examples under man/
  - src/systemctl/systemd-sysv-install.SKELETON
  - config files and examples under /network
- \* the following sources are under **Public Domain** (LicenseRef-murmurhash2-public-domain):
  - src/basic/MurmurHash2.c
  - src/basic/MurmurHash2.h
- \* the following sources are under **Public Domain** (LicenseRef-lookup3-public-domain):
  - src/libsystemd/sd-journal/lookup3.c
  - src/libsystemd/sd-journal/lookup3.h
- \* the tools/chromiumos/gen\_autosuspend\_rules.py script is licensed under the **BSD-3-Clause** license.
- \* Heebo fonts under docs/fonts/ are licensed under the **SIL Open Font License 1.1**,
- \* any files under test/ without an explicit license we assume non-copyrightable (eg: computer-generated fuzzer data)

## ## OpenSSL Notes

Note that building the systemd project with OpenSSL does not affect the libsystemd.so shared library, which is not linked with the OpenSSL library.

MurmurHash2 was written by Austin Appleby, and is placed in the public domain. The author hereby disclaims copyright to this source code.

GNU LIBRARY GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1991 Free Software Foundation, Inc.  
51 Franklin St, Fifth Floor, Boston, MA 02110-1301, USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the library GPL. It is numbered 2 because it goes with version 2 of the ordinary GPL.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Library General Public License, applies to some specially designated Free Software Foundation software, and to any other libraries whose authors decide to use it. You can use it for your libraries, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library, or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link a program with the library, you must provide complete object files to the recipients so that they can relink them with the library, after making changes to the library and recompiling it.

And you must show them these terms so they know their rights.

Our method of protecting your rights has two steps: (1) copyright the library, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the library.

Also, for each distributor's protection, we want to make certain that everyone understands that there is no warranty for this free library. If the library is modified by someone else and passed on, we want its recipients to know that what they have is not the original version, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that companies distributing free software will individually obtain patent licenses, thus in effect transforming the program into proprietary software. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

Most

GNU software, including some libraries, is covered by the ordinary GNU General Public License, which was designed for utility programs. This license, the GNU Library General Public License, applies to certain designated libraries. This license is quite different from the ordinary one; be sure to read it in full, and don't assume that anything in it is the same as in the ordinary license.

The reason we have a separate public license for some libraries is that they blur the distinction we usually make between modifying or adding to a program and simply using it. Linking a program with a library, without changing the library, is in some sense simply using the library, and is analogous to running a utility program or application program. However, in a textual and legal sense, the linked executable is a combined work, a derivative of the original library, and the ordinary General Public License treats it as such.

Because of this blurred distinction, using the ordinary General Public

License for libraries did not effectively promote software sharing, because most developers did not use the libraries. We concluded that weaker conditions might promote sharing better.

However, unrestricted linking of non-free programs would deprive the users of those programs of all benefit from the free status of the libraries themselves. This Library General Public License is intended to permit developers of non-free programs to use free libraries, while preserving your freedom as a user of such programs to change the free libraries that are incorporated in them. (We have not seen how to achieve this as regards changes in header files, but we have achieved it as regards changes in the actual functions of the Library.) The hope is that this will lead to faster development of free libraries.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library".

The former contains code derived from the library, while the latter only works together with the library.

Note that it is possible for a library to be covered by the ordinary General Public License rather than by this special one.

## TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Library General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole.

If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections

1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also compile or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including

whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

c) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

d) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

#### 7. You may

place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Library General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

## NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

one line to give the library's name and an idea of what it does.

Copyright (C) year name of author

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Library General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied

warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Library General Public License for more details.

You should have received a copy of the GNU Library General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301, USA.

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in  
the library `Frob' (a library for tweaking knobs) written  
by James Random Hacker.

signature of Ty Coon, 1 April 1990

SIL OPEN FONT LICENSE Version 1.1 - 26 February 2007  
-----

#### PREAMBLE

The goals of the Open Font License (OFL) are to stimulate worldwide development of collaborative font projects, to support the font creation efforts of academic and linguistic communities, and to provide a free and open framework in which fonts may be shared and improved in partnership with others.

The OFL allows the licensed fonts to be used, studied, modified and redistributed freely as long as they are not sold by themselves. The fonts, including any derivative works, can be bundled, embedded, redistributed and/or sold with any software provided that any reserved names are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

#### DEFINITIONS

"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting -- in part or in whole -- any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical writer or other person who contributed to the Font Software.

#### PERMISSION & CONDITIONS

Permission is hereby granted, free of charge, to any person obtaining a copy of the Font Software, to use, study, copy, merge, embed, modify, redistribute, and sell modified and unmodified copies of the Font Software, subject to the following conditions:

- 1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.
- 2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy contains the above copyright notice and this license. These can be included either as stand-alone text files, human-readable headers or in the appropriate machine-readable metadata fields within text or binary files as long as those fields can be easily viewed by the user.
- 3) No Modified Version of the Font Software may use the Reserved Font Name(s) unless explicit written permission is granted by the corresponding Copyright Holder. This restriction only applies to the primary font name as presented to the users.
- 4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font Software shall not be used to promote, endorse or advertise any Modified Version, except to acknowledge the contribution(s) of the Copyright Holder(s) and the Author(s) or with their explicit written permission.
- 5) The Font Software, modified or unmodified, in part or in whole, must be distributed entirely under this license, and must not be distributed under any other license. The requirement for fonts to remain under this license does not apply to any document created using the Font Software.

#### TERMINATION

This license becomes null and void if any of the above conditions are not met.

#### DISCLAIMER

##### THE

FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT. IN NO EVENT SHALL THE COPYRIGHT HOLDER BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

NOTE! This copyright does *\*not\** cover user programs that use kernel services by normal system calls - this is merely considered normal use of the kernel, and does *\*not\** fall under the heading of "derived work". Also note that the GPL below is copyrighted by the Free Software Foundation, but the instance of code that it refers to (the Linux kernel) is copyrighted by me and others who actually wrote it.

Also note that the only valid version of the GPL as far as the kernel is concerned is this particular version of the license (ie v2, not v2.2 or v3.x or whatever), unless explicitly otherwise stated.

Linus Torvalds

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the

source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

#### GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you

conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or

collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the

integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW.

EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES

PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License,  
or  
(at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.  
MIT License

Creative Commons Legal Code

CC0 1.0 Universal

CREATIVE COMMONS CORPORATION IS NOT A LAW FIRM AND DOES NOT PROVIDE LEGAL SERVICES. DISTRIBUTION OF THIS DOCUMENT DOES NOT CREATE AN ATTORNEY-CLIENT RELATIONSHIP. CREATIVE COMMONS PROVIDES THIS INFORMATION ON AN "AS-IS" BASIS. CREATIVE COMMONS MAKES NO WARRANTIES REGARDING THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS PROVIDED HEREUNDER, AND DISCLAIMS LIABILITY FOR DAMAGES RESULTING FROM

THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS PROVIDED  
HEREUNDER.

Statement of Purpose

The laws of most jurisdictions throughout the world automatically confer exclusive Copyright and Related Rights (defined below) upon the creator and subsequent owner(s) (each and all, an "owner") of an original work of authorship and/or a database (each, a "Work").

Certain owners wish to permanently relinquish those rights to a Work for the purpose of contributing to a commons of creative, cultural and scientific works ("Commons")

that the public can reliably and without fear of later claims of infringement build upon, modify, incorporate in other works, reuse and redistribute as freely as possible in any form whatsoever and for any purposes, including without limitation commercial purposes. These owners may contribute to the Commons to promote the ideal of a free culture and the further production of creative, cultural and scientific works, or to gain reputation or greater distribution for their Work in part through the use and efforts of others.

For these and/or other purposes and motivations, and without any expectation of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the extent that he or she is an owner of Copyright and Related Rights in the Work, voluntarily elects to apply CC0 to the Work and publicly distribute the Work under its terms, with knowledge of his or her Copyright and Related Rights in the Work and the meaning and intended legal effect of CC0 on those rights.

1. Copyright and Related Rights. A Work made available under CC0 may be protected by copyright and related or neighboring rights ("Copyright and Related Rights"). Copyright and Related Rights include, but are not limited to, the following:

- i. the right to reproduce, adapt, distribute, perform, display, communicate, and translate a Work;
- ii. moral rights retained by the original author(s) and/or performer(s);
- iii. publicity and privacy rights pertaining to a person's image or likeness depicted in a Work;
- iv. rights protecting against unfair competition in regards to a Work, subject to the limitations in paragraph 4(a), below;
- v. rights protecting the extraction, dissemination, use and reuse of data in a Work;
- vi. database rights (such as those arising under Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, and under any national implementation

thereof, including any amended or successor version of such directive); and

vii. other similar, equivalent or corresponding rights throughout the world based on applicable law or treaty, and any national implementations thereof.

2. Waiver. To the greatest extent permitted by, but not in contravention of, applicable law, Affirmer hereby overtly, fully, permanently, irrevocably and unconditionally waives, abandons, and surrenders all of Affirmer's Copyright and Related Rights and associated claims and causes of action, whether now known or unknown (including existing as well as future claims and causes of action), in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "Waiver"). Affirmer makes the Waiver for the benefit of each member of the public at large and to the detriment of Affirmer's heirs and successors, fully intending that such Waiver shall not be subject to revocation, rescission, cancellation, termination, or any other legal or equitable action to disrupt the quiet enjoyment of the Work by the public as contemplated by Affirmer's express Statement of Purpose.

3. Public License Fallback. Should any part of the Waiver for any reason be judged legally invalid or ineffective under applicable law, then the Waiver shall be preserved to the maximum extent permitted taking into account Affirmer's express Statement of Purpose. In addition, to the extent the Waiver is so judged Affirmer hereby grants to each affected person a royalty-free, non transferable, non sublicensable, non exclusive, irrevocable and unconditional license to exercise Affirmer's Copyright and Related Rights in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "License"). The License shall be deemed effective as of the date CC0 was applied by Affirmer to the Work. Should any part of the License for any reason be judged legally invalid or ineffective under applicable law, such partial invalidity or ineffectiveness shall not invalidate the remainder of the License, and in such case Affirmer hereby affirms that he or she will not (i) exercise any of his or her remaining Copyright and Related Rights in the Work or (ii) assert any associated claims and causes of action with respect to the Work, in either case contrary to Affirmer's express Statement of Purpose.

#### 4. Limitations and Disclaimers.

- a. No trademark or patent rights held by Affirmer are waived, abandoned, surrendered, licensed or otherwise affected by this document.
- b. Affirmer offers the Work as-is and makes no representations or warranties of any kind concerning the Work, express, implied, statutory or otherwise, including without limitation warranties of title, merchantability, fitness for a particular purpose, non infringement, or the absence of latent or other defects, accuracy, or the present or absence of errors, whether or not discoverable, all to the greatest extent permissible under applicable law.
- c. Affirmer disclaims responsibility for clearing rights of other persons that may apply to the Work or any use thereof, including without limitation any person's Copyright and Related Rights in the Work. Further, Affirmer disclaims responsibility for obtaining any necessary consents, permissions or other rights required for any use of the Work.
- d. Affirmer understands and acknowledges that Creative Commons is not a party to this document and has no duty or obligation with respect to this CC0 or use of the Work.

## 1.317 cpp 11.4.1-3.e19

### 1.317.1 Available under license :

#### GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.  
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some

specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a

"work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

## GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the

Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest

your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public

License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it

contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified

executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

- b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
- c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then

the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is

copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

##### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.

51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

## Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know

that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in

non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

## GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for

writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in

themselves,

then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not

compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License.

Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one

of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally

accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent

infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute

so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and

"any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL

DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the

ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990  
Ty Coon, President of Vice

That's all there is to it!

Apache License

<http://www.apache.org/licenses/>

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,

and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to

communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and

attribution notices from the Source form of the Work,  
excluding those notices that do not pertain to any part of  
the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its  
distribution, then any Derivative Works that You distribute must  
include a readable copy of the attribution notices contained  
within such NOTICE file, excluding  
those notices that do not  
pertain to any part of the Derivative Works, in at least one  
of the following places: within a NOTICE text file distributed  
as part of the Derivative Works; within the Source form or  
documentation, if provided along with the Derivative Works; or,  
within a display generated by the Derivative Works, if and  
wherever such third-party notices normally appear. The contents  
of the NOTICE file are for informational purposes only and  
do not modify the License. You may add Your own attribution  
notices within Derivative Works that You distribute, alongside  
or as an addendum to the NOTICE text from the Work, provided  
that such additional attribution notices cannot be construed  
as modifying the License.

You may add Your own copyright statement to Your modifications and  
may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or  
for any such Derivative Works as a whole, provided Your use,  
reproduction, and distribution of the Work otherwise complies with  
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,  
any Contribution intentionally submitted for inclusion in the Work  
by You to the Licensor shall be under the terms and conditions of  
this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify  
the terms of any separate license agreement you may have executed  
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade  
names, trademarks, service marks, or product names of the Licensor,  
except as required for reasonable and customary use in describing the  
origin of the Work and reproducing the  
content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or  
agreed to in writing, Licensor provides the Work (and each  
Contributor provides its Contributions) on an "AS IS" BASIS,  
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or

implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");  
you may not use this file except in compliance with the License.  
You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

@appendixsubsec Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software---to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software---typically libraries---of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,

not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a

combined work, a derivative of the original library.

The ordinary

General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the @dfn{Lesser} General Public License because it does @emph{Less} to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a ``work based on the library" and a ``work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

@iftex

@appendixsubsec TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

@end iftex

@ifinfo

@center GNU LESSER GENERAL PUBLIC LICENSE

@center TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

@end ifinfo

@enumerate 0

@item

This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means

either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether

that is true depends on what the Library does and what the program that uses the Library does.

@item

You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

@item

You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

@enumerate a

@item

The modified work must itself be a software library.

@item

You must cause

the files modified to carry prominent notices stating that you changed the files and the date of any change.

@item

You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

@item

If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

@end enumerate

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of

this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

@item

You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

@item

You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

@item

A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a ``work that uses the Library''. Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However,

linking a ``work that uses the Library'' with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a ``work that uses the library''. The executable is therefore covered by this License.

Section 6 states terms for distribution of such executables.

When a ``work that uses the Library'' uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work.

(Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

@item

As an exception to the Sections above, you may also combine or link a ``work that uses the Library'' with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices,

you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one

of these things:

@enumerate a

@item

Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable ``work that uses the Library'', as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

@item

Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

@item

Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

@item

If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

@item

Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

@end enumerate

For an executable, the required form of the ``work that uses the Library'' must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major

components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

@item

You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

@enumerate a

@item

Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

@item

Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

@end enumerate

@item

You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

@item

You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the

Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

@item

Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

@item

If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

@item

If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded.

In such case, this License incorporates the limitation as if written in the body of this License.

@item

The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and ``any later version'', you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

@item

If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

@center NO WARRANTY

@item

BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY ``AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

@item

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

@appendixsubsec How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the ``copyright" line and a pointer to where the full notice is found.

@smallexample

@var{one line to give the library's name and an idea of what it does.}

Copyright (C) @var{year} @var{name of author}

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should  
have received a copy of the GNU Lesser General Public  
License along with this library; if not, write to the Free Software  
Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301,  
USA.  
@end smallexample

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your  
school, if any, to sign a ``copyright disclaimer" for the library, if  
necessary. Here is a sample; alter the names:

@smallexample  
Yoyodyne, Inc., hereby disclaims all copyright interest in the library  
`Frob' (a library for tweaking knobs) written by James Random Hacker.

@var{signature of Ty Coon}, 1 April 1990  
Ty Coon, President of Vice  
@end smallexample

That's all there is to it!  
GNU GENERAL PUBLIC LICENSE  
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

#### Preamble

The licenses for most software are designed to take away your  
freedom to share and change it. By contrast, the GNU General Public  
License is intended to guarantee your freedom to share and change free  
software--to make sure the software is free for all its users. This  
General Public License applies to most of the Free Software  
Foundation's software and to any other program whose authors commit to  
using it. (Some other Free Software Foundation software is covered by  
the GNU Library General Public License instead.) You can apply it to  
your programs, too.

When we speak of free software, we are referring to freedom, not  
price. Our General Public Licenses are designed  
to make sure that you  
have the freedom to distribute copies of free software (and charge for  
this service if you wish), that you receive source code or can get it

if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
