infer generic type arguments of a function from the calls in the annotated function parameter of that function.\n *\n *
When this annotation is placed on a generic function parameter of a function,\n * it enables to infer the type
arguments of that generic function from the lambda body passed to that parameter.\n *\n * The calls that affect
inference are either members of the receiver type of an annotated function parameter or\n * extensions for that type.
The extensions must be themselves annotated with `@BuilderInference`. \n *\n * Example: we declare\n * ```\n * fun
<T> sequence(@BuilderInference block: suspend SequenceScope<T>().() -> Unit): Sequence<T>\n * ```\n * and use
it like\n * ```\n * val result = sequence { yield("result") }\n * ```\n * Here the type argument of the resulting
sequence is inferred to `String` from\n * the argument of the [SequenceScope.yield] function, that is called inside
the lambda passed to [sequence].\n *\n * Note: this annotation is experimental, see [ExperimentalTypeInference] on
how to opt-in for it.\n *\n @Target(VALUE_PARAMETER, FUNCTION,
PROPERTY)\n @Retention(AnnotationRetention.BINARY)\n @SinceKotlin("1.3")\n @ExperimentalTypeInferenc
e\n\n public annotation class BuilderInference\n\n\n /**\n * Enables overload selection based on the type of the value
returned from lambda argument.\n *\n * When two or more function overloads have otherwise the same parameter
lists that differ only in the return type\n * of a functional parameter, this annotation enables overload selection by the
type of the value returned from\n * the lambda function passed to this functional parameter.\n *\n * Example:\n *
```\n * @OverloadResolutionByLambdaReturnType\n * fun create(intProducer: () -> Int): Int\n * fun
create(doubleProducer: () -> Double): Double\n
*\n * val newValue = create { 3.14 }\n * ```\n *\n * The annotation being applied to one of overloads allows to
resolve this ambiguity by analyzing what value is returned\n * from the lambda function.\n *\n * This annotation is
also used to discriminate the annotated overloads in case if overload selection still cannot\n * choose one of them
even taking in account the result of lambda parameter analysis. In that case a warning is reported.\n *\n * Note: this
annotation is experimental, see [ExperimentalTypeInference] on how to opt-in for it.\n

@Retention(AnnotationRetention.BINARY)
public annotation class
ExperimentalMultiplatform

```

`*` Marks an expected annotation class that it isn't required to have actual counterparts in all platforms. `*` This annotation is only applicable to `expect` annotation classes in multiplatform projects

and marks that class as `"optional"`. `*` Optional expected class is allowed to have no corresponding actual class on the platform. Optional annotations can only be used `*` to annotate something, not as types in signatures. If an optional annotation has no corresponding actual class on a platform, `*` the annotation entries where it's used are simply erased when compiling code on that platform. `*` Note: this annotation is experimental, see `[ExperimentalMultiplatform]` on how to opt-in for it.

```

`*` Signals that the annotated annotation class is a marker of an API that requires an explicit opt-in. `*` Call sites of any declaration that is either annotated with such a marker or mentions in its signature any `*` other declaration that requires opt-in should opt in to the API either by using `[OptIn]`, `*` or by being annotated with that marker themselves, effectively causing further propagation of the opt-in requirement. `*` The intended uses of opt-in markers include, but are not limited to the following: `*`

- Experimental API for public preview that might change its semantics or affect binary compatibility.
- Internal declarations that should not be used outside the declaring library, but are `public` for technical reasons.
- Fragile or delicate API that needs a lot of expertise to use and thus require an explicit opt-in.

`### Contagiousness` `*` When a declaration is marked with an opt-in requirement, it is considered to be contagious, meaning that all its uses `*` or mentions in other declarations will require an explicit opt-in. `*` A rule of thumb for propagating is the following: if the marked declaration ceases to exist, only `*` the places with explicit opt-in (or the corresponding warning) will break. This rule does not imply transitivity, `*` e.g. the propagation does not propagate opt-in through inlining, making it the responsibility `inline` function author `*` to mark it properly. `###`

`Type scopes` `*` A type is considered requiring opt-in if it is marked with an opt-in marker, or the outer declaration (class or interface) requires opt-in. `*` Any use of any declaration that mentions such type in its signature will require an explicit opt-in, even if it is not used `*` directly on the call site, and even if such declarations do not require opt-in directly. `*` For example, consider the following declarations that are marked with non-propagating opt-in: `````

```

@UnstableApi
class
Unstable
@OptIn(UnstableApi::class)
fun foo(): Unstable = Unstable()
@OptIn(UnstableApi::class)
fun bar(arg: Unstable = Unstable()) {}
@OptIn(UnstableApi::class)
fun Unstable?.baz() {}
```

```

and their respective call sites: `````

```

fun outerFun() {
    val s = foo()
    bar()
    null.baz()
}
```

```

Even though call sites do not mention `Unstable` type directly, the corresponding opt-in warning or error will be triggered `*` in each call site due to propagation contagiousness. Note that the propagation is not transitive, i.e. calls to `outerFun` `*` itself would not trigger any further opt-in requirements. `*`

`### Lexical scopes` `*` If a type requires an opt-in, such requirement is propagated to its lexical scope and all its nested declarations. `*` For example, for the following scope: `````

```

@UnstableApi
class Unstable {
 fun memberFun() = ...
 class NestedClass {
 fun nestedFun()

```

= ...  
 Any use of `Unstable`, `NestedClass`, or their member functions will require an explicit opt-in.  
 Overridden declarations  
 Opt-in markers are also propagated through the inheritance and interface implementation.  
 If the base declaration requires an opt-in, overriding it requires either an explicit opt-in or propagating the opt-in requirement.  
 See also [Kotlin language documentation](https://kotlinlang.org/docs/opt-in-requirements.html) for more information.  
 @property message message to be reported on usages of API without an explicit opt-in, or empty string for the default message.  
 The default message is: `"This declaration is experimental and its usage should be marked with 'Marker' or '@OptIn(Marker::class)'"`, where `Marker` is the opt-in requirement marker.  
 @property level specifies how usages of API without an explicit opt-in are reported in code.  
 @Target(ANNOTATION\_CLASS) @Retention(BINARY) @SinceKotlin("1.3") public annotation class RequiresOptIn(val message: String = "", val level: Level = Level.ERROR) {  
 /\*\* Severity of the diagnostic that should be reported on usages which did not explicitly opt into the API either by using [OptIn] or by being annotated with the corresponding marker annotation.  
 public enum class Level {  
 /\*\* Specifies that a warning should be reported on incorrect usages of this API. WARNING,  
 /\*\* Specifies that a compilation error should be reported on incorrect usages of this API. ERROR,  
 }  
 }  
 Allows to use the API denoted by the given markers in the annotated file, declaration, or expression.  
 If a declaration is annotated with [OptIn], its usages are **not** required to opt in to that API.  
 [markerClass] specifies marker annotations that require explicit opt-in. The marker annotation is not required to be itself marked with [RequiresOptIn] to enable gradual migration of API from requiring opt-in to the regular one, yet declaring such `OptIn` yields a compilation warning.  
 See also [Kotlin language documentation](https://kotlinlang.org/docs/opt-in-requirements.html) for more information.  
 @property markerClass specifies marker annotations that require explicit opt-in.  
 @see RequiresOptIn for a detailed description of opt-in semantics and propagation rules.  
 @Target(CLASS, PROPERTY, LOCAL\_VARIABLE, VALUE\_PARAMETER, CONSTRUCTOR, FUNCTION, PROPERTY\_GETTER, PROPERTY\_SETTER, EXPRESSION, FILE, TYPEALIAS) @Retention(SOURCE) @SinceKotlin("1.3") public annotation class OptIn(vararg val markerClass: KClass<out Annotation>) {  
 /\*\* This annotation marks the experimental preview of the language feature [SubclassOptInRequired].  
 > Note that this API is in a preview state and has a chance of being changed in the future.  
 Do not use it if you develop a library since your library can become source incompatible with the future versions of Kotlin.  
 @Target(CLASS) @Retention(BINARY) @SinceKotlin("1.8") public annotation class ExperimentalSubclassOptIn {  
 /\*\* Annotation that marks open for subclassing classes and interfaces, and makes implementation and extension of such declarations as requiring an explicit opt-in.  
 When applied, any attempt to subclass the target declaration will trigger an opt-in with the corresponding level and message.  
 The intended uses of subclass opt-in markers include, but are not limited to the following API:  
 - Stable to use, but unstable to implement due to its further evolution.  
 - Stable to use, but closed for 3rd-part implementations due to internal or technical reasons.  
 - Stable to use, but delicate or fragile to implement.  
 - Stable to use, but with a contract that may be weakened in the future in a backwards-incompatible manner for external implementations.  
 Contrary to regular [RequiresOptIn], there are three ways to opt-in into the subclassing requirement:  
 - Annotate declaration with the marker annotation, making it propagating.  
 - Annotate declaration with [OptIn] in order to opt in into the provided guarantees in a non-propagating manner.  
 - Annotate declaration with [SubclassOptInRequired] with the same marker class, making it further propagating only for subclassing.  
 Uses of this annotation are limited to open and abstract classes, and non-`fun` interfaces.  
 Any other uses allowed by `CLASS` annotation target yield a compilation error.  
 @property markerClass specifies marker annotation that require explicit opt-in.  
 @see RequiresOptIn for a detailed description of opt-in semantics and propagation rules.

import kotlin.native.concurrent.SharedImmutable

/** Defines deep recursive function that keeps its stack on the heap,
 * which allows very deep recursive computations that do not use the actual call stack.
 * To initiate a call to this deep recursive function use its [invoke] function.
 * As a rule of thumb, it should be used if recursion goes deeper than a thousand calls.
 * The [DeepRecursiveFunction] takes one parameter of type [T] and returns a result of type [R].
 * The [block] of code defines the body of a recursive function. In this block
 * [callRecursive][DeepRecursiveScope.callRecursive] function can be used to make a recursive call
 * to the declared function. Other instances of [DeepRecursiveFunction] can be called
 * in this scope with `callRecursive` extension, too.
 * For example, take a look at the following recursive tree class and a deeply
 * recursive instance of this tree with 100K nodes:
 */
class Tree(val left: Tree? = null, val right: Tree? = null) {
 val deepTree = generateSequence(Tree()) { Tree(it) }.take(100_000).last()
}

/** A regular recursive function can be defined to compute a depth of a tree:
 */
fun depth(t: Tree?): Int = if (t == null) 0 else max(depth(t.left), depth(t.right)) + 1
println(depth(deepTree)) // StackOverflowError

/** If this `depth` function is called for a `deepTree` it produces `StackOverflowError` because of deep recursion.
 * However, the `depth` function can be rewritten using `DeepRecursiveFunction` in the following way, and then
 * it successfully computes [depth(deepTree)][DeepRecursiveFunction.invoke] expression:
 */
val depth = DeepRecursiveFunction<Tree?, Int> { t -> if (t == null) 0 else max(callRecursive(t.left),

```

```

callRecursive(t.right)) + 1\n * }\n * println(depth(deepTree)) // Ok\n * ``\n * }\n * Deep recursive functions can also
mutually call each other using a heap for the stack via\n * [callRecursive][DeepRecursiveScope.callRecursive]
extension. For example, the\n * following pair of mutually
recursive functions computes the number of tree nodes at even depth in the tree.\n *}\n * ``\n * val mutualRecursion
= object {\n * val even: DeepRecursiveFunction<Tree?, Int> = DeepRecursiveFunction { t ->\n * if (t ==
null) 0 else odd.callRecursive(t.left) + odd.callRecursive(t.right) + 1\n * }\n * val odd:
DeepRecursiveFunction<Tree?, Int> = DeepRecursiveFunction { t ->\n * if (t == null) 0 else
even.callRecursive(t.left) + even.callRecursive(t.right)\n * }\n * }\n * }\n * ``\n * }\n * @param [T] the function
parameter type.\n * @param [R] the function result type.\n * @param block the function body.\n

```

`< 0` or `x` is `NaN``  
`@SinceKotlin("1.2")\npublic expect fun sqrt(x: Double): Double`  
 Computes Euler's number `e`` raised to the power of the value `[x]`.  
 Special cases:  
`-`exp(NaN)` is `NaN``  
`-`exp(+Inf)` is `+Inf``  
`-`exp(-Inf)` is `0.0``  
`@SinceKotlin("1.2")\npublic expect fun exp(x: Double): Double`  
 Computes `exp(x) - 1``.  
 This function can be implemented to produce more precise result for `[x]` near zero.  
 Special cases:  
`-`expm1(NaN)` is `NaN``  
`-`expm1(+Inf)` is `+Inf``  
`-`expm1(-Inf)` is `-1.0``  
 @see `[exp]` function.  
`@SinceKotlin("1.2")\npublic expect fun expm1(x: Double): Double`  
 Computes the logarithm of the value `[x]` to the given `[base]`.  
 Special cases:  
`-`log(x, b)` is `NaN` if either `x` or `b` are `NaN``  
`-`log(x, b)` is `NaN` when `x < 0` or `b <= 0` or `b == 1.0``  
`-`log(+Inf, +Inf)` is `NaN``  
`-`log(+Inf, b)` is `+Inf` for `b > 1` and `-Inf` for `b < 1``  
`-`log(0.0, b)` is `-Inf` for `b > 1` and `+Inf` for `b > 1``  
 See also logarithm functions for common fixed bases: `[ln]`, `[log10]` and `[log2]`.  
`@SinceKotlin("1.2")\npublic expect fun log(x: Double, base: Double): Double`  
 Computes the natural logarithm (base `E``) of the value `[x]`.  
 Special cases:  
`-`ln(NaN)` is `NaN``  
`-`ln(x)` is `NaN` when `x < 0.0``  
`-`ln(+Inf)` is `+Inf``  
`-`ln(0.0)` is `-Inf``  
`@SinceKotlin("1.2")\npublic expect fun ln(x: Double): Double`  
 Computes the common logarithm (base 10) of the value `[x]`.  
 @see `[ln]` function for special cases.  
`@SinceKotlin("1.2")\npublic expect fun log10(x: Double): Double`  
 Computes the binary logarithm (base 2) of the value `[x]`.  
 @see `[ln]` function for special cases.  
`@SinceKotlin("1.2")\npublic expect fun log2(x: Double): Double`  
 Computes `ln(x + 1)``.  
 This function can be implemented to produce more precise result for `[x]` near zero.  
 Special cases:  
`-`ln1p(NaN)` is `NaN``  
`-`ln1p(x)` is `NaN` where `x < -1.0``  
`-`ln1p(-1.0)` is `-Inf``  
`-`ln1p(+Inf)` is `+Inf``  
 @see `[ln]` function  
 @see `[expm1]` function  
`@SinceKotlin("1.2")\npublic expect fun ln1p(x: Double): Double`  
 Rounds the given value `[x]` to an integer towards positive infinity.  
 @return the smallest double value that is greater than or equal to the given value `[x]` and is a mathematical integer.  
 Special cases:  
`-`ceil(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.`  
`@SinceKotlin("1.2")\npublic expect fun ceil(x: Double): Double`  
 Rounds the given value `[x]` to an integer towards negative infinity.  
 @return the largest double value that is smaller than or equal to the given value `[x]` and is a mathematical integer.  
 Special cases:  
`-`floor(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.`  
`@SinceKotlin("1.2")\npublic expect fun floor(x: Double): Double`  
 Rounds the given value `[x]` to an integer towards zero.  
 @return the value `[x]` having its fractional part truncated.  
 Special cases:  
`-`truncate(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.`  
`@SinceKotlin("1.2")\npublic expect fun truncate(x: Double): Double`  
 Rounds the given value `[x]` towards the closest integer with ties rounded towards even integer.  
 Special cases:  
`-`round(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.`  
`@SinceKotlin("1.2")\npublic expect fun round(x: Double): Double`  
 Returns the absolute value of the given value `[x]`.  
 Special cases:  
`-`abs(NaN)` is `NaN``  
 @see `absoluteValue` extension property for `[Double]`  
`@SinceKotlin("1.2")\npublic expect fun abs(x: Double): Double`  
 Returns the sign of the given value `[x]`:  
`-`-1.0` if the value is negative,`  
`- zero if the value is zero,`  
`-`1.0` if the value is positive`  
 Special case:  
`-`sign(NaN)` is `NaN``  
`@SinceKotlin("1.2")\npublic expect fun sign(x: Double): Double`  
 Returns the smaller of two values.  
 If either value is `NaN``, then the result is `NaN``.  
`@SinceKotlin("1.2")\npublic expect fun min(a: Double, b: Double): Double`  
 Returns the greater of two values.  
 If either value is `NaN``, then the result is `NaN``.  
`@SinceKotlin("1.2")\npublic expect fun max(a: Double, b: Double): Double`  
 Returns the cube root of `[x]`. For any `x``, `cbrt(-x) == -cbrt(x)``; that is, the cube root of a negative value is the negative of the cube root of that value's magnitude. Special cases:  
 If the argument is `NaN``, then the result is `NaN``.  
 If the argument is infinite, then the result is an infinity with the same sign as the argument.  
 If the argument is zero, then the result is a zero with the same sign as the argument.  
`@SinceKotlin("1.8")\n@WasExperimental(ExperimentalStdlibApi::class)\npublic expect fun cbrt(x: Double): Double`  
 Raises this value to the power `[x]`.  
 Special

cases:  $b^{0.0}$  is  $1.0$   $b^{1.0} == b$   $b^{NaN}$  is  $NaN$   $NaN^{x}$  is  $NaN$  for  $x \neq 0.0$   $b^{Inf}$  is  $NaN$  for  $abs(b) == 1.0$   $b^x$  is  $NaN$  for  $b < 0$  and  $x$  is finite and not an integer

`SinceKotlin("1.2")\npublic expect fun Double.pow(x: Double): Double`  $b^n$  Raises this value to the integer power  $n$ . See the other overload of `[pow]` for details.

`SinceKotlin("1.2")\npublic expect fun Double.pow(n: Int): Double` Returns the absolute value of this value. Special cases:  $NaN.absoluteValue$  is  $NaN$  @see `abs`

`SinceKotlin("1.2")\npublic expect val Double.absoluteValue: Double` Returns the sign of this value:  $-1.0$  if the value is negative,  $0$  if the value is zero,  $1.0$  if the value is positive. Special case:  $NaN.sign$  is  $NaN$

`SinceKotlin("1.2")\npublic expect val Double.sign: Double` Returns this value with the sign bit same as of the `[sign]` value. If `[sign]` is  $NaN$  the sign of the result is undefined.

`SinceKotlin("1.2")\npublic expect fun Double.withSign(sign: Double): Double` Returns this value with the sign bit same as of the `[sign]` value.

`SinceKotlin("1.2")\npublic expect fun Double.withSign(sign: Int): Double` Returns the ulp (unit in the last place) of this value. An ulp is a positive distance between this value and the next nearest `[Double]` value larger in magnitude. Special Cases:  $NaN.ulp$  is  $NaN$   $x.ulp$  is  $+Inf$  when  $x$  is  $+Inf$  or  $-Inf$   $0.0.ulp$  is `Double.MIN_VALUE`

`SinceKotlin("1.2")\npublic expect val Double.ulp: Double` Returns the `[Double]` value nearest to this value in direction of positive infinity.

`SinceKotlin("1.2")\npublic expect fun Double.nextUp(): Double` Returns the `[Double]` value nearest to this value in direction of negative infinity.

`SinceKotlin("1.2")\npublic expect fun Double.nextDown(): Double` Returns the `[Double]` value nearest to this value towards the value `[to]`. Special cases:  $x.nextTowards(y)$  is  $NaN$  if either  $x$  or  $y$  are  $NaN$   $x.nextTowards(x) == x$

`SinceKotlin("1.2")\npublic expect fun Double.nextTowards(to: Double): Double` Rounds this `[Double]` value to the nearest integer and converts the result to `[Int]`. Ties are rounded towards positive infinity. Special cases:  $x.roundToInt() == Int.MAX_VALUE$  when  $x > Int.MAX_VALUE$   $x.roundToInt() == Int.MIN_VALUE$  when  $x < Int.MIN_VALUE$  @throws `IllegalArgumentException` when this value is  $NaN$

`SinceKotlin("1.2")\npublic expect fun Double.roundToInt(): Int` Rounds this `[Double]` value to the nearest integer and converts the result to `[Long]`. Ties are rounded towards positive infinity. Special cases:  $x.roundToLong() == Long.MAX_VALUE$  when  $x > Long.MAX_VALUE$   $x.roundToLong() == Long.MIN_VALUE$  when  $x < Long.MIN_VALUE$  @throws `IllegalArgumentException` when this value is  $NaN$

`SinceKotlin("1.2")\npublic expect fun Double.roundToLong(): Long` `endregion`

==== Float Math =====  
 Computes the sine of the angle `[x]` given in radians. Special cases:  $\sin(NaN|+Inf|-Inf)$  is  $NaN$

`SinceKotlin("1.2")\npublic expect fun sin(x: Float): Float` Computes the cosine of the angle `[x]` given in radians. Special cases:  $\cos(NaN|+Inf|-Inf)$  is  $NaN$

`SinceKotlin("1.2")\npublic expect fun cos(x: Float): Float` Computes the tangent of the angle `[x]` given in radians. Special cases:  $\tan(NaN|+Inf|-Inf)$  is  $NaN$

`SinceKotlin("1.2")\npublic expect fun tan(x: Float): Float` Computes the arc sine of the value `[x]`; the returned value is an angle in the range from  $-\pi/2$  to  $\pi/2$  radians. Special cases:  $\asin(x)$  is  $NaN$ , when  $abs(x) > 1$  or  $x$  is  $NaN$

`SinceKotlin("1.2")\npublic expect fun asin(x: Float): Float` Computes the arc cosine of the value `[x]`; the returned value is an angle in the range from  $0.0$  to  $\pi$  radians. Special cases:  $\acos(x)$  is  $NaN$ , when  $abs(x) > 1$  or  $x$  is  $NaN$

`SinceKotlin("1.2")\npublic expect fun acos(x: Float): Float` Computes the arc tangent of the value `[x]`; the returned value is an angle in the range from  $-\pi/2$  to  $\pi/2$  radians. Special cases:  $\atan(NaN)$  is  $NaN$

`SinceKotlin("1.2")\npublic expect fun atan(x: Float): Float` Returns the angle `theta` of the polar coordinates `(r, theta)` that correspond to the rectangular coordinates `(x, y)` by computing the arc tangent of the value `[y] / [x]`; the returned value is an angle in the range from  $-\pi$  to  $\pi$  radians. Special cases:  $\atan2(0.0, 0.0)$  is  $0.0$   $\atan2(0.0, x)$  is  $0.0$  for  $x > 0$  and  $\pi$  for  $x < 0$   $\atan2(-0.0, x)$  is  $-0.0$

for  $x > 0$  and  $-\pi$  for  $x < 0$ .  
 $\text{atan2}(y, +\infty)$  is  $0.0$  for  $0 < y < +\infty$  and  $-0.0$  for  $-\infty < y < 0$ .  
 $\text{atan2}(y, -\infty)$  is  $\pi$  for  $0 < y < +\infty$  and  $-\pi$  for  $-\infty < y < 0$ .  
 $\text{atan2}(y, 0.0)$  is  $\pi/2$  for  $y > 0$  and  $-\pi/2$  for  $y < 0$ .  
 $\text{atan2}(+\infty, x)$  is  $\pi/2$  for finite  $x$ .  
 $\text{atan2}(-\infty, x)$  is  $-\pi/2$  for finite  $x$ .  
 $\text{atan2}(\text{NaN}, x)$  and  $\text{atan2}(y, \text{NaN})$  is  $\text{NaN}$ .

Relicensed

code

\*\*\*\*\*

The following code snippets have been taken from other projects. Even though they were not originally licensed under the terms above, the original authors have agreed to relicense their work so that this project can be distributed under a single license. This section is put here just to clarify this fact.

\* `configure.ac`, `Makefile.am`: The original versions were derived from the ones in the XML Catalog Manager project, version 2.2.

Author: Julio Merino <jmmv@users.sourceforge.net>

\* `atf-c/ui.c`: The `format_paragraph` and `format_text` functions were derived from the ones in the Monotone project, revision 3a0982da308228d796df35f98d787c5cff2bb5b6.

Author: Julio Merino <jmmv@NetBSD.org>

\* `atf-c++/detail/io.hpp`, `atf-c++/detail/io.cpp`, `atf-c++/detail/io_test.cpp`: These files were derived from the `file_handle`, `systembuf`, `pipe` and `pistream` classes and tests found in the Boost.Process library.

Author: Julio Merino <jmmv84@gmail.com>

\* `admin/check-style.sh`,  
`admin/check-style-common.awk`,  
`admin/check-style-cpp.awk`, `admin/check-style-shell.awk`: These files, except the first one, were first implemented in the Buildtool project. They were later adapted to be part of Boost.Process and, during that process, the shell script was created.

Author: Julio Merino <jmmv84@gmail.com>

Mozilla Public License, version 2.0

## 1. Definitions

### 1.1. "Contributor"

means each individual or legal entity that creates, contributes to the creation of, or owns Covered Software.

### 1.2. "Contributor Version"

means the combination of the Contributions of others (if any) used by a Contributor and that particular Contributor's Contribution.

### 1.3. "Contribution"

means Covered Software of a particular Contributor.

### 1.4. "Covered Software"

means Source Code Form to which the initial Contributor has attached the notice in Exhibit A, the Executable Form of such Source Code Form, and Modifications of such Source Code Form, in each case including portions thereof.

### 1.5. "Incompatible With Secondary Licenses"

means

a. that the initial Contributor has attached the notice described in Exhibit B to the Covered Software; or

b. that the Covered Software was made available under the terms of version 1.1 or earlier of the License, but not also under the terms of a Secondary License.

### 1.6. "Executable Form"

means any form of the work other than Source Code Form.

### 1.7. "Larger Work"

means a work that combines Covered Software with other material, in a separate file or files, that is not Covered Software.

1.8. "License"

means this document.

1.9. "Licensable"

means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently, any and all of the rights conveyed by this License.

1.10. "Modifications"

means any of the following:

- a. any file in Source Code Form that results from an addition to, deletion from, or modification of the contents of Covered Software; or
- b. any new file in Source Code Form that contains any Covered Software.

1.11. "Patent Claims" of a Contributor

means any patent claim(s), including without limitation, method, process, and apparatus claims, in any patent Licensable by such Contributor that would be infringed, but for the grant of the License, by the making, using, selling, offering for sale, having made, import, or transfer of either its Contributions or its Contributor Version.

1.12. "Secondary License"

means either the GNU General Public License, Version 2.0, the GNU Lesser General Public License, Version 2.1, the GNU Affero General Public License, Version 3.0, or any later versions of those licenses.

1.13. "Source Code Form"

means the form of the work preferred for making modifications.

1.14. "You" (or "Your")

means an individual or a legal entity exercising rights under this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

## 2. License Grants and Conditions

### 2.1. Grants

Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

- a. under intellectual property rights (other than patent or trademark) Licensable by such Contributor to use, reproduce, make available, modify, display, perform, distribute, and otherwise exploit its Contributions, either on an unmodified basis, with Modifications, or as part of a Larger Work; and
- b. under Patent Claims of such Contributor to make, use, sell, offer for sale, have made, import, and otherwise transfer either its Contributions or its Contributor Version.

### 2.2. Effective Date

The licenses granted in Section 2.1 with respect to any Contribution become effective for each Contribution on the date the Contributor first distributes such Contribution.

### 2.3. Limitations on Grant Scope

The licenses granted in this Section 2 are the only rights granted under this License. No additional rights or licenses will be implied from the distribution or licensing of Covered Software under this License. Notwithstanding Section 2.1(b) above, no patent license is granted by a Contributor:

- a. for any code that a Contributor has removed from Covered Software; or
- b. for infringements caused by: (i) Your and any other third party's modifications of Covered Software, or (ii) the combination of its Contributions with other software (except as part of its Contributor Version); or
- c. under Patent Claims infringed by Covered Software in the absence of its Contributions.

This License does not grant any rights in the trademarks, service marks, or logos of any Contributor (except as may be necessary to comply with the notice requirements

in Section 3.4).

## 2.4. Subsequent Licenses

No Contributor makes additional grants as a result of Your choice to distribute the Covered Software under a subsequent version of this License (see Section 10.2) or under the terms of a Secondary License (if permitted under the terms of Section 3.3).

## 2.5. Representation

Each Contributor represents that the Contributor believes its Contributions are its original creation(s) or it has sufficient rights to grant the rights to its Contributions conveyed by this License.

## 2.6. Fair Use

This License is not intended to limit any rights You have under applicable copyright doctrines of fair use, fair dealing, or other equivalents.

## 2.7. Conditions

Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted in Section 2.1.

## 3. Responsibilities

### 3.1. Distribution of Source Form

All distribution of Covered Software in Source Code Form, including any Modifications that You create or to which You contribute, must be under the terms of this License. You must inform recipients that the Source Code Form of the Covered Software is governed by the terms of this License, and how they can obtain a copy of this License. You may not attempt to alter or restrict the recipients' rights in the Source Code Form.

### 3.2. Distribution of Executable Form

If You distribute Covered Software in Executable Form then:

- a. such Covered Software must also be made available in Source Code Form, as described in Section 3.1, and You must inform recipients of the Executable Form how they can obtain a copy of such Source Code Form by reasonable means in a timely manner, at a charge no more than the cost

of distribution to the recipient; and

b. You may distribute such Executable Form under the terms of this License, or sublicense it under different terms, provided that the license for the Executable Form does not attempt to limit or alter the recipients' rights in the Source Code Form under this License.

### 3.3. Distribution of a Larger Work

You may create and distribute a Larger Work under terms of Your choice, provided that You also comply with the requirements of this License for the Covered Software. If the Larger Work is a combination of Covered Software with a work governed by one or more Secondary Licenses, and the Covered Software is not Incompatible With Secondary Licenses, this License permits You to additionally distribute such Covered Software under the terms of such Secondary License(s), so that the recipient of the Larger Work may, at their option, further distribute the Covered Software under the terms of either this License or such Secondary License(s).

### 3.4. Notices

You may not remove or alter the substance of any license notices (including copyright notices, patent notices, disclaimers of warranty, or limitations of liability) contained within the Source Code Form of the Covered Software, except that You may alter any license notices to the extent required to remedy known factual inaccuracies.

### 3.5. Application of Additional Terms

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, You may do so only on Your own behalf, and not on behalf of any Contributor. You must make it absolutely clear that any such warranty, support, indemnity, or liability obligation is offered by You alone, and You hereby agree to indemnify every Contributor for any liability incurred by such Contributor as a result of warranty, support, indemnity or liability terms You offer. You may include additional disclaimers of warranty and limitations of liability specific to any jurisdiction.

## 4. Inability to Comply Due to Statute or Regulation

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Software due to statute,

judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be placed in a text file included with all distributions of the Covered Software under this License. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

## 5. Termination

5.1. The rights granted under this License will terminate automatically if You fail to comply with any of its terms. However, if You become compliant, then the rights granted under this License from a particular Contributor are reinstated (a) provisionally, unless and until such Contributor explicitly and finally terminates Your grants, and (b) on an ongoing basis, if such Contributor fails to notify You of the non-compliance by some reasonable means prior to 60 days after You have come back into compliance. Moreover, Your grants from a particular Contributor are reinstated on an ongoing basis if such Contributor notifies You of the non-compliance by some reasonable means, this is the first time You have received notice of non-compliance with this License from such Contributor, and You become compliant prior to 30 days after Your receipt of the notice.

5.2. If You initiate litigation against any entity by asserting a patent infringement claim (excluding declaratory judgment actions, counter-claims, and cross-claims) alleging that a Contributor Version directly or indirectly infringes any patent, then the rights granted to You by any and all Contributors for the Covered Software under Section 2.1 of this License shall terminate.

5.3. In the event of termination under Sections 5.1 or 5.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or Your distributors under this License prior to termination shall survive termination.

## 6. Disclaimer of Warranty

Covered Software is provided under this License on an "as is" basis, without warranty of any kind, either expressed, implied, or statutory, including, without limitation, warranties that the Covered Software is free of defects, merchantable, fit for a particular purpose or non-infringing. The entire risk as to the quality and performance of the Covered Software is with You. Should any Covered Software prove defective in any respect, You (not any Contributor) assume the cost of any necessary servicing, repair, or correction. This disclaimer of warranty constitutes an essential

part of this License. No use of any Covered Software is authorized under this License except under this disclaimer.

## 7. Limitation of Liability

Under no circumstances and under no legal theory, whether tort (including negligence), contract, or otherwise, shall any Contributor, or anyone who distributes Covered Software as permitted above, be liable to You for any direct, indirect, special, incidental, or consequential damages of any character including, without limitation, damages for lost profits, loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses, even if such party shall have been informed of the possibility of such damages. This limitation of liability shall not apply to liability for death or personal injury resulting from such party's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to You.

## 8. Litigation

Any litigation relating to this License may be brought only in the courts of a jurisdiction where the defendant maintains its principal place of business and such litigation shall be governed by laws of that jurisdiction, without reference to its conflict-of-law provisions. Nothing in this Section shall prevent a party's ability to bring cross-claims or counter-claims.

## 9. Miscellaneous

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not be used to construe this License against a Contributor.

## 10. Versions of the License

### 10.1. New Versions

Mozilla Foundation is the license steward. Except as provided in Section

10.3, no one other than the license steward has the right to modify or publish new versions of this License. Each version will be given a

distinguishing version number.

## 10.2. Effect of New Versions

You may distribute the Covered Software under the terms of the version of the License under which You originally received the Covered Software, or under the terms of any subsequent version published by the license steward.

## 10.3. Modified Versions

If you create software not governed by this License, and you want to create a new license for such software, you may create and use a modified version of this License if you rename the license and remove any references to the name of the license steward (except to note that such modified license differs from this License).

## 10.4. Distributing Source Code Form that is Incompatible With Secondary Licenses If You choose to distribute Source Code Form that is Incompatible

With Secondary Licenses under the terms of this version of the License, the notice described in Exhibit B of this License must be attached.

### Exhibit A - Source Code Form License Notice

This Source Code Form is subject to the terms of the Mozilla Public License, v. 2.0. If a copy of the MPL was not distributed with this file, You can obtain one at <http://mozilla.org/MPL/2.0/>.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

### Exhibit B - "Incompatible With Secondary Licenses" Notice

This Source Code Form is "Incompatible With Secondary Licenses", as defined by the Mozilla Public License, v. 2.0.

Copyright (C) 1996-2018 Internet Systems Consortium, Inc. ("ISC")

This Source Code Form is subject to the terms of the Mozilla Public

License, v. 2.0. If a copy of the MPL was not distributed with this file, You can obtain one at <http://mozilla.org/MPL/2.0/>.

## 1.354 jetty 9.4.50.v20221201

## 1.354.1 Available under license :

This program and the accompanying materials are made available under the terms of the Eclipse Public License 2.0 which is available at <http://www.eclipse.org/legal/epl-2.0>, or the Apache Software License 2.0 which is available at <https://www.apache.org/licenses/LICENSE-2.0>.

Eclipse Public License - v 1.0

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS ECLIPSE PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

### 1. DEFINITIONS

"Contribution" means:

- a) in the case of the initial Contributor, the initial code and documentation distributed under this Agreement, and
- b) in the case of each subsequent Contributor:
  - i) changes to the Program, and
  - ii) additions to the Program;

where such changes and/or additions to the Program originate from and are distributed by that particular Contributor. A Contribution 'originates' from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include additions to the Program which: (i) are separate modules of software distributed in conjunction with the Program under their own license agreement, and (ii) are not derivative works of the Program.

"Contributor" means any person or entity that distributes the Program.

"Licensed Patents" mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement, including all Contributors.

### 2. GRANT OF RIGHTS

- a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free copyright license to

- reproduce, prepare derivative works of, publicly display, publicly perform,  
distribute and sublicense the Contribution of such Contributor,  
if any, and such derivative works, in source code and object code form.
- b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in source code and object code form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.
- c) Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein,  
no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.
- d) Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

### 3. REQUIREMENTS

A Contributor may choose to distribute the Program in object code form under its own license agreement, provided that:

- a) it complies with the terms and conditions of this Agreement; and  
b) its license agreement:  
i) effectively disclaims on behalf of all Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;  
ii) effectively excludes on behalf of all Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;  
iii) states that any provisions which differ from this Agreement are offered by that Contributor alone and not by any other party; and

iv) states that source code for the Program is available from such Contributor, and informs licensees how to obtain it in a reasonable manner on or through a medium customarily used for software exchange.

When the Program is made available in source code form:

- a) it must be made available under this Agreement; and
- b) a copy of this Agreement must be included with each copy of the Program. Contributors may not remove or alter any copyright notices contained within the Program.

Each Contributor must identify itself as the originator of its Contribution, if any, in a manner that reasonably allows subsequent Recipients to identify the originator of the Contribution.

#### 4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a commercial product offering, such

Contributor ("Commercial Contributor") hereby agrees to defend and indemnify every other Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must:

- a) promptly notify the Commercial Contributor in writing of such claim, and
- b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example,

a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other

Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

## 5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

## 6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## 7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate,

Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. The Eclipse Foundation is the initial Agreement Steward. The Eclipse Foundation may assign the responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to distribute the Program (including its Contributions) under the new version. Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved.

This Agreement is governed by the laws of the State of New York and the intellectual property laws of the United States of America. No party to this Agreement will bring a legal action under this Agreement more than one year after the cause of action arose. Each party waives its rights to a jury trial in any resulting litigation.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must

include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative

Works; within the Source form or

documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions)

on an "AS IS" BASIS,

WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
