IP_MULTICAST_IF setsockopt recognizes struct mreq (compatibility)

Kernel added compatibility only recently in

3a084ddb4bf299a6e898a9a07c89f3917f0713f7

See: <http://bugs.debian.org/607979>

standards.7

Michael Kerrisk

Add mention of SUSv4-TC1 (POSIX.1-2013)

==== Changes in man-pages-3.55 =====

Released: 2013-12-12, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Alfred Agrell <alfred@agrell.info>
Andreas Sandberg <andreas.sandberg@it.uu.se>
Christoph Hellwig <hch@infradead.org>
David Gibson <david@gibson.dropbear.id.au>
David Prévot <taffit@debian.org>
Fabrice Bauzac <libnoon@gmail.com>
Greg Price <price@mit.edu>
Jon Grant <jg@jguk.org>

Yuri Kozlov <yuray@komyakino.ru>
janh <a0vhv@t-online.de>

Apologies if I missed anyone!

Global changes

assert.3

assert_perror.3

rexec.3

rpc.3

Michael Kerrisk [Jon Grant]

Reword a sentence to use more gender-neutral language

Changes to individual pages

execve.2

Michael Kerrisk

'arg...' for interpreter scripts starts with argv[1]

fallocate.2

Christoph Hellwig

Clarify the zeroing behavior

fallocate() zeroes only space that did not previously contain data, but leaves existing data untouched.

futex.2

Rodrigo Campos

Fix link to Rusty's futex example library

When I asked to webmaster@kernel.org, Konstantin Ryabitsev answered that the ".nl." is "an obsolete scheme and really

should be changed to just ftp.kernel.org".

getgroups.2

Michael Kerrisk

Note that NGROUPS_MAX is defined in <limits.h>

Michael Kerrisk

Clarify that sysconf(_SC_NGROUPS_MAX) is a run-time technique

Michael Kerrisk

Document /proc/sys/kernel/ngroups_max

ioctl.2

Michael Kerrisk [KOSAKI Motohiro, David Gibson]

'request' argument is typed as 'unsigned long' in glibc

See https://bugzilla.kernel.org/show_bug.cgi?id=42705

perf_event_open.2

Vince Weaver

Linux 3.12 rdpmc/mmap

It turns out that the perf_event mmap page rdpmc/time setting was broken, dating back to the introduction of the feature. Due to a mistake with a bitfield, two different values mapped to the same feature bit.

A new somewhat backwards compatible interface was introduced in Linux 3.12. A much longer report on the issue can be found here:

<https://lwn.net/Articles/567894/>

Vince Weaver

Linux 3.12 adds PERF_SAMPLE_IDENTIFIER

A new PERF_SAMPLE_IDENTIFIER sample type was added in Linux 3.12.

Vince Weaver

E2BIG documentation

The following documents the E2BIG error return for perf_event_open().

I actually ran into this error the hard way and it took me half a day to figure out why my ->size value was changing.

Vince Weaver

Linux 3.12 adds PERF_EVENT_IOC_ID

A new perf_event related ioctl, PERF_EVENT_IOC_ID, was added in Linux 3.12.

Vince Weaver

PERF_COUNT_SW_DUMMY support

Support for the PERF_COUNT_SW_DUMMY event type was added in Linux 3.12.

Vince Weaver [Andreas Sandberg]

PERF_EVENT_IOC_PERIOD update

The PERF_EVENT_IOC_PERIOD ioctl was broken until 2.6.36, and it turns out that the ARM architecture has some differing behavior too.

pipe.2

Trevor Bramwell

Fix error in example program

poll.2

Michael Kerrisk [Paolo Bonzini]

Clarify meaning of events==0

events==0 does not mean that revents is always returned as zero. The "output only" events (POLLHUP, POLLERR, POLLNVAL) can still be returned.

See https://bugzilla.kernel.org/show_bug.cgi?id=61911

readlink.2

Michael Kerrisk [Yuanhang Zheng]

Fix typo in error message in example program

recv.2

Michael Kerrisk

Remove out-of-date statement that UNIX domain does not support MSG_TRUNC
Should have removed that sentence as part of
commit a25601b48b822eb1882ae336574b8d062a17e564

sched_get_priority_max.2

Michael Kerrisk

Add SCHED_IDLE to discussion

send.2

Michael Kerrisk

RETURN VALUE: these calls return number of bytes (not characters) sent

setreuid.2

Michael Kerrisk

Small clarification to description of when saved

set-user-ID is set

sigpending.2

Michael Kerrisk

Note treatment of signals that are blocked *and* ignored

stat.2

Michael Kerrisk

Note filesystem support for nanosecond timestamps

Add some detail on which native filesystems do and don't support nanosecond timestamps.

Michael Kerrisk

Cosmetic reworking of timestamp discussion in NOTES

Michael Kerrisk [Yang Yang]

Update discussion of nanosecond timestamps

The existing text describes the timestamp fields as 'time_t' and delegates discussion of nanosecond timestamps under NOTES. Nanosecond timestamps have been around for a while now, and are in POSIX.1-2008, so reverse the orientation of the discussion, putting the nanosecond fields into DESCRIPTION and detailing the historical situation under NOTES.

symlink.2

Michael Kerrisk

Further fine tuning of argument names

Follow-up

to f2ae6dde0c68448bec986d12fe32268a2c98bfd9

See https://sourceware.org/bugzilla/show_bug.cgi?id=16073

Michael Kerrisk [Fabrice Bauzac]

Give arguments of symlink() more meaningful names

adjtime.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function adjtime() is thread safe.

alloca.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function alloca() is thread safe.

asinh.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions asinh(), asinhf() and asinhl() are thread safe.

atan.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions atan(), atanf() and atanl() are thread safe.

atof.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function atof() is thread safe with exceptions.

atoi.3

Peng Haitao

ATTRIBUTES: Note functions that
are thread safe with exceptions
The functions atoi(), atol() and atoll() are thread safe with
exceptions.

bcmp.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function bcmp() is thread safe.

bcopy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function bcopy() is thread safe.

bsd_signal.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function bsd_signal() is thread safe.

bzero.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function bzero() is thread safe.

cbt.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions cbrt(), cbrtf() and cbrtl() are thread safe.

copysign.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions copysign(), copysignf() and copysignl() are thread
safe.

cos.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `cos()`, `cosf()` and `cosl()` are thread safe.

`cproj.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `cproj()`, `cprojf()` and `cprojl()` are thread safe.

`creal.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `creal()`, `crealf()` and `creall()` are thread safe.

`daemon.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function `daemon()` is thread safe.

`des_crypt.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `ecb_crypt()`, `cbc_crypt()` and `des_setparity()` are thread safe.

`difftime.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function `difftime()` is thread safe.

`dysize.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function `dysize()`
is thread safe.

`erf.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `erf()`, `erff()` and `erfl()` are thread safe.

`erfc.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `erfc()`, `erfcf()` and `erfcl()` are thread safe.

`euidaccess.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `uidaccess()` and `eaccess()` are thread safe.

expm1.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `expm1()`, `expm1f()` and `expm1l()` are thread safe.

fexecve.3

Michael Kerrisk

POSIX.1-2008 specifies `fexecve()`

Michael Kerrisk

Explain the use and rationale of `fexecve()`

ftime.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `ftime()` is thread safe.

ftok.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function

`ftok()` is thread safe.

ftw.3

Michael Kerrisk

`nftw()` visits directories with `FTW_D` if `FTW_DEPTH` was not specified

Michael Kerrisk

Explain probable cause of `FTW_NS`

futimes.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `futimes()` and `lutimes()` are thread safe.

getaddrinfo.3

Michael Kerrisk

Explain one use case for `AI_ADDRCONFIG`

Michael Kerrisk

Highlight difference in `ai_flags` when `hints==NULL`

NOTES already described how `glibc` differs from `POSIX`.

Add a pointer to that text from the point in `DESCRIPTION`

where `hints==NULL` is discussed.

kcmp.3

Shawn Landden

Reword slightly awkward section

malloc.3

Greg Price

Scale back promises of alignment

It's not true that the return value is suitably aligned for "any variable"; for example, it's unsuitable for a variable like

```
float *x __attribute__((__vector_size__(32)));
```

which requires 32-byte alignment. Types like this are defined in `<avxintrin.h>`, and with 16-byte alignment in `<emmintrin.h>` and `<xmmintrin.h>`, so the application programmer need not even know that a `vector_size` attribute has been applied.

On an x86 architecture, a program that loads from or stores to a pointer with this type derived from `malloc` can crash because GCC generates an aligned load/store, like `MOVDQA`.

The C99 standard (TC3, as of N1256) does say the return value is suitably aligned for "any type of object". The C11 standard (as of N1570) revises this to any type with "fundamental alignment", which means an alignment "supported by the implementation in all contexts", which I suppose tautologically includes aligning `malloc/realloc` return values.

The actual behavior of current glibc `malloc` is to align to the greater of $2 * \text{sizeof}(\text{size_t})$ and `__alignof__(long double)`, which may be one bit greater than this commit promises.

mq_receive.3

Michael Kerrisk [janh]

`msg_len` must be greater than *or equal to* `mq_msgsize`

See https://bugzilla.kernel.org/show_bug.cgi?id=64571

setenv.3

Michael Kerrisk

Clarify that `setenv()` returns success in the `overwrite==0` case

sigsetops.3

Michael Kerrisk [Robert P. J. Day]

Add 'const' to `sigisemtpyset()`, `sigorset()`, `sigandset()` declarations

Michael Kerrisk

Rework text describing `sigisemtpyset()`, `sigorset()`, and `sigandset()`

statvfs.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `statvfs()` and `fstatvfs()` are thread safe.

stdarg.3

Peng Haitao

ATTRIBUTES: Note macros that are thread-safe

The macros `va_start()`, `va_arg()`, `va_end()` and `va_copy()` are thread safe.

termios.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `tcgetattr()`, `tcsetattr()`, `tcsendbreak()`, `tcdrain()`, `tcf flush()`, `tcf low()`, `cfmakeraw()`, `cfgetispeed()`, `cfgetospeed()`, `cfsetispeed()`, `cfsetospeed()` and `cfsetspeed()` are thread safe.

ungetwc.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `ungetwc()` is thread safe.

unlockpt.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `unlockpt()` is thread safe.

usleep.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `usleep()` is thread safe.

wcpcpy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wcpcpy()` is thread safe.

wscasecmp.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `wscasecmp()` is thread safe with exceptions.

wscat.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wscat()` is thread safe.

wcschr.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wcschr()` is thread safe.

`wscmp.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wscmp()` is thread safe.

`wscpy.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wscpy()` is thread safe.

`wscspn.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wscspn()` is thread safe.

`wcslen.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wcslen()` is thread safe.

`wscnsecmp.3`

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `wscnsecmp()` is thread safe with exceptions.

`wscncat.3`

Peng Haitao

ATTRIBUTES:

Note function that is thread-safe

The function `wscncat()` is thread safe.

`wscncmp.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wscncmp()` is thread safe.

`wscncpy.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wscncpy()` is thread safe.

`wcsnlen.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wcsnlen()` is thread safe.

wcspbrk.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wcspbrk() is thread safe.

wcsrchr.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wcsrchr() is thread safe.

wcsspn.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wcsspn() is thread safe.

wcsstr.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wcsstr() is
thread safe.

wcstoimax.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions wcstoimax() and wctoumax() are thread safe with
exceptions.

wcstok.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wcstok() is thread safe.

wcswidth.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function wcswidth() is thread safe with exceptions.

wctrans.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function wctrans() is thread safe with exceptions.

wctype.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function wctype() is thread safe with exceptions.

wcwidth.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `wcwidth()` is thread safe with exceptions.

wmemchr.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wmemchr()` is thread safe.

wmemcmp.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wmemcmp()` is thread safe.

wmemcpy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wmemcpy()` is thread safe.

wmemmove.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wmemmove()` is thread safe.

wmemset.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wmemset()` is thread safe.

tty_ioctl.4

Michael Kerrisk [Liu Jiaming]

Note that 'arg' should be 0 in the usual case when using `TIOCSCTTY`

Michael Kerrisk

Rework text on root to discuss just in terms of capabilities

proc.5

Michael Kerrisk

Document `/proc/sys/kernel/ngroups_max`

capabilities.7

Michael Kerrisk

Fix 2 version

numbers under "Effect of user ID changes on capabilities"

feature_test_macros.7

Michael Kerrisk

Add `_ISOC11_SOURCE` to example program

tcp.7

Michael Kerrisk

Fix (nontrivial) wordo in discussion of MSG_TRUNC
s/MSG_PEEK/MSG_TRUNC/

ld.so.8

Michael Kerrisk [Alfred Agrell]

Fix crufty wording in one sentence

===== Changes in man-pages-3.56 =====

Released: 2014-01-11, Christchurch

In memory of Doris Church (1939-2013)

Apologies if I missed anyone!

New and rewritten pages

fgetc.3

gets.3

David Malcolm

Split gets(3) to isolate unsafe gets(3) to a page on its own

Currently man3/gets.3 documents various safe I/O functions, along with the toxic "gets" function.

At the risk of being melodramatic, this strikes me as akin to storing rat poison in a food cabinet, in the same style of packaging as the food, but with a post-it note on it saying "see warnings below".

I think such "never use this" functions should be quarantined into their own manpages, rather than listing them alongside sane functions.

The attached patch does this for "gets", moving the documentation of the good functions from man3/gets.3 into man3/fgetc.3, updating the SO links in the relevant functions to point at the latter.

It then rewrites man3/gets.3 to spell out that "gets" is toxic and should never be used (with a link to CWE-242 for good measure).

Michael Kerrisk [Andre Majorel]

Tweaks to David Malcolm's patch

vdso.7

Mike Frysingher

New page documenting the vDSO mapped into each process by the kernel

Newly documented interfaces in existing pages

reboot.2

Elie De Brauwer

Document LINUX_REBOOT_SW_SUSPEND

New and changed links

fgetc.3

getc.3

getchar.3

ungetc.3

Michael Kerrisk

Adjust links to gets(3) to point to fgetc(3)

Global changes

Various pages

Michael Kerrisk

Global fix of "NULL pointer"

Change "NULL pointer" to "NULL" or null pointer".

POSIX uses the term "null pointer", not "NULL pointer".

Various pages

Michael Kerrisk

Stylistic changes to code example

For ease of reading, don't embed assignments inside if().

Various pages

Michael Kerrisk

Replace uses of

"i.e.," in main text with "that is" or similar

Usual man-pages style is to use "i.e." only within
parenthetical expressions.

Various pages

Michael Kerrisk

Replace uses of "e.g." in main text with "for example" or similar

Usual man-pages style is to use "e.g." only within
parenthetical expressions.

Various pages

Michael Kerrisk

Add "Program source" subheading under EXAMPLE

Various pages

Michael Kerrisk

Add "static" to global variables and functions in example program

Changes to individual pages

clock_getres.2

Michael Kerrisk [Nadav Har'El]

Improve description of CLOCK_PROCESS_CPUTIME_ID

See https://bugzilla.kernel.org/show_bug.cgi?id=67291

close.2

Michael Kerrisk [P?draig Brady]

Note that errors from close() should be used only for diagnosis

In particular, retrying after EINTR is a bad idea.

See <http://austingroupbugs.net/view.php?id=529>

See <http://thread.gmane.org/gmane.comp.lib.glibc.alpha/37702>

Subject: [RFC][BZ #14627] Make linux close errno to EINPROGRESS
when interrupted in signal.

execve.2

Michael Kerrisk [Marco Dione]

Add further cases to EFAULT error

See https://sourceware.org/bugzilla/show_bug.cgi?id=16402

perf_event_open.2

Vince Weaver [Sudhanshu Goswami]

Clarify issues with the disabled bit

Clarify the perf_event_open behavior with respect to the disabled
bit and creating event groups.

Vince Weaver [Sudhanshu Goswami]

Clarify issues with the exclusive bit

Warn that using the perf_event_open "exclusive" bit, while
it might seem like a good idea, might lead to all 0 results
in some common usage cases.

reboot.2

Elie De Brauer

Mention RB_POWER_OFF

The manpage did not mention RB_POWER_OFF which

is the glibc

symbolic name for LINUX_REBOOT_CMD_POWER_OFF.

```
$ cd /usr/include
```

```
$ cat x86_64-linux-gnu/sys/reboot.h | grep POWER_OFF
```

```
define RB_POWER_OFF    0x4321fedc
```

Elie De Brauwier

Add "Linux" to kernel version numbers

Michael Kerrisk

Add RB_SW_SUSPEND synonym

Michael Kerrisk

Add RB_KEXEC synonym

setpgid.2

Michael Kerrisk [Joseph S. Myers]

BSD getpgrp() and setpgrp() go away in glibc 2.19

socket.2

Michael Kerrisk [Dongsheng Song]

Remove crufty statement that AF_INET does not support SOCK_SEQPACKET

Linux AF_INET supports SOCK_SEQPACKET via SCTP.

syscall.2

Mike Frysinger

Fix ia64 registers

The original list of registers was created by confusing strace source code--this is for parsing legacy 32-bit code (which is dead and no one cares). Update the list to reflect native ia64 syscall interface.

syscall.2

syscalls.2

getauxval.3

Mike Frysinger

Add references to new vdso(7) page

utimensat.2

Michael Kerrisk

Small wording improvement for times!=NULL case

dlopen.3

Michael Kerrisk [Mike Frysinger]

Update remarks on cast needed when assigning dlsym() return value

POSIX.1-2013 eases life when casting the dlsym() return value to a function pointer

Michael Kerrisk [Stephen Kell]

Fix description of dli_name

See https://sourceware.org/bugzilla/show_bug.cgi?id=16262

getline.3

Michael Kerrisk [Luke Hutchison]

Correct description of how '*n' is used when '*lineptr' == NULL

See https://sourceware.org/bugzilla/show_bug.cgi?id=5468

Michael Kerrisk

Remove SEE ALSO reference to unsafe gets(3)

mcheck.3

Simon Paillard [Raphael Geissert]

typo in compiler flag

See <http://bugs.debian.org/732464>

mkstemp.3

Michael Kerrisk [Janne Blomqvist]

Better

describe 'flags' that can be specified for mkostemp()

printf.3

Michael Kerrisk [Arif Zaman]

Fix memory leak in snprintf() example

See <http://stackoverflow.com/questions/19933479/snprintf-man-page-example-memory-leak>

pthread_kill.3

Michael Kerrisk [Mathieu Desnoyers]

POSIX.1-2008 removes ESRCH

POSIX.1-2001 mistakenly documented an ESRCH error, and

POSIX.1-2008 removes this error. Glibc does return

this error in cases where it can determine that a thread ID

is invalid, but equally, the use of an invalid thread ID

can cause a segmentation fault.

puts.3

Michael Kerrisk

SEE ALSO: replace reference to gets(3) with fgets(3)

scanf.3

Michael Kerrisk [Ondrej Bilka]

Improve discussion of obsolete 'a' dynamic allocation modifier

setjmp.3

Michael Kerrisk [Joseph S. Myers]

BSD setjmp() semantics go away in glibc 2.19

sigpause.3

Michael Kerrisk [Joseph
S. Myers]

BSD sigpause() goes away in glibc 2.19

Michael Kerrisk

Correct feature text macro requirements

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sigpause() is thread safe.

sigqueue.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sigqueue() is thread safe.

sigwait.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sigwait() is thread safe.

sin.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions sin(), sinf() and sinl() are thread safe.

sincos.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions sincos(), sincosf() and sincosl() are thread safe.

string.3

Moritz 'Morty' Strübe

Add short description of the functions

It is helpful to have a short description about what the different functions

in string.h do.

Michael Kerrisk

Fixes and enhancements to Moritz Strübe's patch

strptime.3

Michael Kerrisk [Mathieu Malaterre, Simon Paillard]

Add number ranges to comments in 'tm' structure

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=729570>

Michael Kerrisk

Point to ctime(3) for more details on 'tm' structure

Michael Kerrisk

Some rewording and reorganization

strsep.3

Michael Kerrisk

Clarify description

The use of "symbols" in the existing description is confusing;

it's "bytes". Other fixes as well.

strspn.3

Michael Kerrisk [Mathieu Malaterre]

Improve description in NAME

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=723659>

strstr.3

Michael Kerrisk

Clarify RETURN VALUE: s/substring/located substring/

sysv_signal.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sysv_signal() is thread safe.

tan.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions tan(), tanf() and tanl() are thread safe.

tanh.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions tanh(), tanhf() and tanhl() are thread safe.

toascii.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function toascii() is thread safe.

toupper.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions toupper() and tolower() are thread safe with exceptions.

towctrans.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function towctrans() is thread safe.

towlower.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function tolower() is thread safe with exceptions.

towupper.3

Peng Haitao

ATTRIBUTES: Note function that is
thread safe with exceptions

The function towupper() is thread safe with exceptions.

ualarm.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function ualarm() is thread safe.

wcpncpy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wcpncpy() is thread safe.

proc.5

Michael Kerrisk [Sworddragon2]

Fix formula for CommitLimit under /proc/meminfo

See https://bugzilla.kernel.org/show_bug.cgi?id=60991

credentials.7

Michael Kerrisk

List APIs that operate on process groups

Michael Kerrisk

Add details on controlling terminal and foreground/background jobs

feature_test_macros.7

Michael Kerrisk

Document _DEFAULT_SOURCE

Michael Kerrisk [Joseph S. Myers]

From glibc 2.19, _BSD_SOURCE no longer causes __FAVOR_BSD

Starting with glibc 2.19, _BSD_SOURCE no longer causes BSD

definitions to be favored in cases

where standards conflict.

libc.7

Mike Frysinger

SEE ALSO: add various entries

man-pages.7

Michael Kerrisk [Mike Frysinger]

Add STYLE GUIDE section

Incorporate some of the existing material in the page
into the STYLE GUIDE, and add a lot more material, mainly
drawn from the "Global changes" sections in the release
changelogs.

Michael Kerrisk

Add historical note on reason for use of American spelling

Michael Kerrisk [Mike Frysinger]

Various improvements to style guide

packet.7

Willem de Bruijn [Daniel Borkmann]

Document fanout, ring, and auxiliary options

This patch adds descriptions of the common packet socket options

PACKET_AUXDATA, PACKET_FANOUT, PACKET_RX_RING, PACKET_STATISTICS,
PACKET_TX_RING

and the ring-specific options

PACKET_LOSS, PACKET_RESERVE, PACKET_TIMESTAMP, PACKET_VERSION

Michael Kerrisk

Add kernel version numbers for PACKET_VERSION and PACKET_TIMESTAMP

ld.so.8

Michael Kerrisk [Matthias Klose]

Default output file for D_DEBUG is stderr not stdout

See https://sourceware.org/bugzilla/show_bug.cgi?id=6874

===== Changes in man-pages-3.57 =====

Released: 2014-01-24, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>

Andre Majorel <aym-xunil@teaser.fr>

Andrey Vagin <avagin@openvz.org>

Andy Lutomirski <luto@amacapital.net>

Axel Beckert <abe@debian.org>

Tilman Schmidt <tilman@imap.cc>
Vince Weaver <vincent.weaver@maine.edu>
Yuri Kozlov <yuray@komyakino.ru>
<socketpair@gmail.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

msgop.2

Michael Kerrisk
Document MSG_COPY

open.2

Michael Kerrisk, Andy Lutomirski
Document O_TMPFILE
O_TMPFILE is new in Linux 3.11

perf_event_open.2

Vince Weaver [Andi Kleen]
PERF_SAMPLE_TRANSACTION support in Linux 3.13
The following patch adds descriptions of the new perf_event_open.2
PERF_SAMPLE_TRANSACTION sample type as added in Linux 3.13.

The descriptions
are based on information provided by Andi Kleen,
both in the e-mail

[PATCH 1/6] perf, core: Add generic transaction flags v5

sent to the linux-kernel list as well as an e-mail

[PATCH] Document transaction flags in perf_event_open manpage

sent to the linux-man list.

The implementation is based heavily on the Intel Haswell
processor. Documentation can be found at this page:
<http://software.intel.com/en-us/blogs/2013/05/03/intelr-transactional-synchronization-extensions-intelr-tsx->

profiling-with-linux-0

as well as in section 18.11.5.1 of volume 3 of the
Intel 64 and IA-32 Architecture Software Developer's Manual.

ptrace.2

Andrey Vagin

Add description for PTRACE_PEEKSIGINFO

Retrieve signals without removing them from a queue.

Andrey Vagin

Add description for PTRACE_GETSIGMASK and PTRACE_SETSIGMASK

These two

commands allow to examine and change mask of blocked
signals.

socket.7

Eliezer Tamir

Add description for SO_BUSY_POLL

Add description for the SO_BUSY_POLL socket option.

tcp.7

Michael Kerrisk [Jerry Chu]

Document TCP_USER_TIMEOUT

Text slightly adapted from Jerry Chu's (excellent) commit
message (commit dca43c75e7e545694a9dd6288553f55c53e2a3a3).

Michael Kerrisk

Document TCP_CONGESTION

Global changes

Various pages

Michael Kerrisk

Reword to avoid use of "etc."

Various pages

Peng Haitao [Andre Majorel]

Make wording around thread-safety and setlocale() more precise

getdate.3

strptime.3

locale.5

Michael Kerrisk

Replace "weekday" with less ambiguous language

Notwithstanding POSIX's use of the term "weekday", in everyday
English, "weekday" is commonly understood to mean a day in the
set [Monday..Friday] (vs one of the

"weekend" days).

Changes to individual pages

epoll_wait.2

Michael Kerrisk [Jonas Jonsson]

Clarify wording of EINTR error

See https://bugzilla.kernel.org/show_bug.cgi?id=66571

faccessat.2

Michael Kerrisk

Note that the system call takes only three arguments

fallocate.2

Michael Kerrisk

Note filesystems that support FALLOC_FL_PUNCH_HOLE operation

fcntl.2

Michael Kerrisk

BUGS: The O_SYNC and O_DSYNC flags are not modifiable using F_SETFL

Michael Kerrisk

Add subsections under BUGS

There's several bugs listed. It's helpful to mark them separately.

Michael Kerrisk

POSIX.1 specifies F_SETOWN and F_GETOWN for sockets/SIGURG

getrlimit.2

Michael Kerrisk []

Note that rlim_cur can be set lower than current resource consumption

getsockopt.2

Michael Kerrisk

SEE ALSO: add ip(7) and udp(7)

keyctl.2

Michael Kerrisk

SEE ALSO: mention Documentation/security/keys.txt

linkat.2

Michael Kerrisk

Add ENOENT for O_TMPFILE created with O_EXCL

Michael Kerrisk

ERRORS: Add EINVAL

lseek.2

Michael Kerrisk

Note which filesystems support SEEK_HOLE/SEEK_DATA

msgop.2

Michael Kerrisk

Note that MSG_EXCEPT is Linux-specific

open.2

Michael Kerrisk

Update CONFORMING TO

Add POSIX.1-2008. Add mention of O_TMPFILE.

Update text on various flags that were added in POSIX.1-2008, and whose definitions can, since glibc 2.12, be obtained by suitably defining _POSIX_C_SOURCE or _XOPEN_SOURCE

Michael Kerrisk

Add pointer in description to BUGS, for O_ASYNC limitation

Michael Kerrisk

Remove crufty duplicate text on modifying file status flags

ptrace.2

Michael Kerrisk

Add details to descriptions of PTRACE_GETSIGMASK and PTRACE_SETSIGMASK

select.2

Michael Kerrisk [Marc Lehmann]

RETURN VALUE: Fix discussion of treatment of file descriptor sets

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=574370>

syscalls.2

Michael Kerrisk

Remove madvise1() from main list

madvise1() is one of the system calls that was never implemented, and listed toward the bottom of the page.

timer_create.2

Michael Kerrisk

Add pointer to proc(5) for info on /proc/[pid]/timers

unlinkat.2

Michael Kerrisk [Mike Fryssinger:]

ERRORS: Add EISDIR

See https://bugzilla.kernel.org/show_bug.cgi?id=29702

ferror.3

Michael Kerrisk

clearerr(), feof(), and ferror() are also POSIX-conformant

Michael Kerrisk [Reuben Thomas]

CONFORMING TO: add fileno()

gets.3

Ian Abbott

SEE ALSO: add fgets(3)

mq_receive.3

mq_send.3

Michael Kerrisk [Simone Piccardi]

SYNOPSIS: s/unsigned/unsigned int/

printf.3

Michael Kerrisk

Small reorganization of text in EXAMPLE

rand.3

Michael Kerrisk

s/unsigned/unsigned int/ in example

stpcpy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function stpcpy() is thread safe.

stpncpy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function stpncpy() is thread safe.

strcat.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions strcat() and strncat() are thread safe.

strchr.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions strchr(), strchr() and strchrnul() are thread safe.

strcmp.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions strcmp() and strncmp() are thread safe.

strftime.3

Brandon Edens

Change "week day" to "day of week"

See https://bugzilla.kernel.org/show_bug.cgi?id=68861

strstr.3

Peng Haitao

ATTRIBUTES: Note function that
is thread safe with exceptions

The function strstr() is thread safe.

The function strcasestr() is thread safe with exceptions.

strtod.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions strtod(), strtodf() and strtold() are thread safe
with exceptions.

strtoimax.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions strtoimax() and strtoumax() are thread safe with
exceptions.

strtol.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions strtol(), strtoll() and strtoul() are thread safe
with exceptions.

tcgetpgrp.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions tcgetpgrp() and tcsetpgrp() are thread safe.

tcgetsid.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function tcgetsid() is thread safe.

core.5

Bernhard Walle

Mention that %E exists since Linux 3.0

'%E' in the 'core_pattern' has been introduced in kernel commit
57cc083ad9e1bfeeb4a0ee831e7bb008c8865bf0 which was included in
version 3.0. Add that information to the manual page.

filesystems.5

Michael Kerrisk [Axel Beckert]

Add reference to proc(5) for more details on /proc/filesystems

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=735590>

locale.5

Michael Kerrisk

SEE ALSO: add locale(7)

proc.5

Michael Kerrisk

Document /proc/[pid]/timers

Michael Kerrisk

Update discussion of wchan

Remove crufty reference to /etc/psdatabase in /proc/PID/stat.

Add /proc/PID/wchan.

See <https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/737452>

environ.7

Michael Kerrisk [Gioele Barabucci]

Correct reference to locale(7) (not locale(5))

locale(7) is the right place for details of the LC_* environment variables.

See <http://bugs.debian.org/638186>

Michael Kerrisk

Improve references for discussion of locale environment variables

Michael Kerrisk

SEE ALSO: add catopen(3)

Michael Kerrisk

SEE ALSO: add locale(5)

man-pages.7

Michael Kerrisk

Prefer "usable" over "useable"

netdevice.7

Tilman Schmidt

Document SIOCGIFCONF case ifc_req==NULL

Add the missing description of the possibility to call SIOCGIFCONF with ifc_req==NULL to determine the needed buffer size, as described in

<http://lkml.indiana.edu/hypermail/linux/kernel/0110.1/0506.html>

and verified against source files net/core/dev_ioctl.c and

net/ipv4/devinet.c in the current kernel git tree.

This functionality has been present since the beginning of the 2.6 series. It's about time

it gets documented.

While I'm at it, also generally clarify the section on SIOCGIFCONF.

standards.7

Michael Kerrisk

Enhance description of V7

Michael Kerrisk

Add C11

tcp.7

Michael Kerrisk

Describe format of tcp_*_congestion_control /proc files

Describe format of tcp_allowed_congestion_control and

tcp_available_congestion_control.

Apologies if I missed anyone!

New and rewritten pages

A note from Christoph Hellwig prompted me to perform a task that has been queued for a while: merging the text of the man pages for the `*at(23)` ("directory file descriptor") APIs into their corresponding traditional pages. When the `*at(23)` pages were originally written (mostly in 2006), the APIs were not part of POSIX and (in most cases) were not available on other systems. So, it made some sense to wall

them off into their own separate pages. Eight years later, with the APIs now all in POSIX (except scandirat()), it is much more sensible to document the newer APIs alongside their traditional counterparts, so that the newer APIs are not "hidden", and the reader can more easily see the differences between the APIs.

Thus, the text of 14 pairs of pages has been merged, and the "merged from" pages have been converted to links to the "merged to" pages.

Along

the way, a few other fixes were made to the pages, as noted below.

One page that did not undergo such a change was utimensat(2), which is different enough from utime(2) that it warrants a separate page.

Unlike the other *at() pages, the utimensat(2) page was also already self-contained, rather than defining itself in terms of differences from utime(2) as the other *at() pages did.

access.2

Michael Kerrisk

Merge text from faccessat(2)

Michael Kerrisk

Remove faccessat() race warning

That point is already covered in existing text in this page.

Michael Kerrisk

access() also conforms to POSIX.1-2008

chmod.2

Michael Kerrisk

Merge text from fchmodat(2)

Michael Kerrisk

Use argument name 'pathname' throughout page

(Some APIs were using 'path' while others used 'pathname')

Michael Kerrisk

CONFORMING TO: chmod() and fchmod() are also in POSIX.1-2008

chown.2

Michael Kerrisk

Merge text

of fchownat(2)

Michael Kerrisk

AT_EMPTY_PATH is Linux-specific and requires _GNU_SOURCE

Michael Kerrisk

Use argument name 'pathname' throughout page

(Some APIs were using 'path' while others used 'pathname')

Michael Kerrisk

Remove sentence that fchownat() is present on Solaris

That point was only really relevant before fchownat() was

standardized in POSIX.1.2008.

Michael Kerrisk

CONFORMING TO: chown(), fchown(), lchown() are in POSIX.1-2008

link.2

Michael Kerrisk

Merge text of linkat(2)

Michael Kerrisk

CONFORMING TO: link() is in POSIX.1-2008

Michael Kerrisk

AT_EMPTY_PATH is Linux-specific and requires _GNU_SOURCE

mkdir.2

Michael Kerrisk

Merge text of mkdirat(2)

Michael Kerrisk

CONFORMING TO: mkdir() is in POSIX.1-2008

mknod.2

Michael Kerrisk

Merge text of mknodat(2)

Michael Kerrisk

CONFORMING TO: mknod(2) is in POSIX.1-2008

open.2

Michael Kerrisk

Merge text from openat(2)

Michael Kerrisk

Remove sentence that openat() is present on Solaris

That point was only really relevant before openat() was standardized in POSIX.1.2008.

readlink.2

Michael Kerrisk

Merge text of readlinkat(2)

Michael Kerrisk

CONFORMING TO: readlink() is in POSIX.1-2008.

Michael Kerrisk

Use argument name 'pathname' throughout page

(Some APIs were using 'path' while others used 'pathname')

rename.2

Michael Kerrisk

Merge text of renameat(2)

Michael Kerrisk

CONFORMING TO: rename(2) is in POSIX.1-2008

stat.2

Michael Kerrisk

Merge text from fstatat(2)

Michael Kerrisk

AT_EMPTY_PATH and AT_NO_AUTOMOUNT are Linux-specific
These flags require _GNU_SOURCE.

Michael Kerrisk

Use argument name 'pathname' throughout page
(Some APIs were using 'path' while others
used 'pathname')

Michael Kerrisk

Remove sentence that fstatat() is present on Solaris
That point was only really relevant before fstatat() was
standardized in POSIX.1.2008.

Michael Kerrisk

CONFORMING TO: stat(), fstat(), lstat() are specified in POSIX.1-2008

symlink.2

Michael Kerrisk

Merge text of symlinkat(2)

Michael Kerrisk

CONFORMING TO: symlink() is in POSIX.1-2008

unlink.2

Michael Kerrisk

Merge text of unlinkat(2)

Michael Kerrisk

Remove sentence that unlinkat() is present on Solaris
That point was only really relevant before unlinkat() was
standardized in POSIX.1.2008.

Michael Kerrisk

CONFORMING TO: unlink() is in POSIX.1-2008

mkfifo.3

Michael Kerrisk

Merge text of mkfifoat(3)

Michael Kerrisk

CONFORMING TO: mkfifo() is in POSIX.1-2008

scandir.3

Michael Kerrisk

Merge text of scandirat(3)

Michael Kerrisk

Update feature test macro requirements
The FTM requirements changed in glibc 2.10.

Michael Kerrisk

Remove libc4/libc5 note under CONFORMING TO
No-one much cares about Linux libc these days.

Michael Kerrisk

Put detail about alphasort under a NOTES heading

This text was under CONFORMING TO, which made no sense.

Michael Kerrisk

Rework CONFORMING TO text

Newly documented interfaces in existing pages

prctl.2

Kir Kolyshkin

Document PR_SET_MM options in Linux 3.5

Some of the PR_SET_MM options were merged to vanilla kernel later, and appeared in Linux 3.5. Those are:

- PR_SET_MM_ARG_START
- PR_SET_MM_ARG_END
- PR_SET_MM_ENV_START
- PR_SET_MM_ENV_END
- PR_SET_MM_AUXV
- PR_SET_MM_EXE_FILE

socket.7

Neil Horman

Document the SO_RXQ_OVFL

socket option

Michael Kerrisk

Add kernel version number for SO_RXQ_OVFL

New and changed links

faccessat.2

Michael Kerrisk

Convert to link to access.2

fchmodat.2

Michael Kerrisk

Convert to link to chmod.2

fchownat.2

Michael Kerrisk

Michael Kerrisk

Convert to link to mkfifo.3

scandirat.3

Michael Kerrisk

Convert to link to scandir.3

Changes to individual pages

alarm.2

Michael Kerrisk

Note semantics of alarm with respect to fork() and execve()

fcntl.2

Michael Kerrisk

Warn that F_GETLK info may already be out of date when the call returns

intro.2

Michael Kerrisk

Describe policy on documenting differences between syscall and glibc API

mmap2.2

Michael Kerrisk

Reword note on glibc mmap() wrapper invocation of mmap2()

Michael Kerrisk

This system call does not exist on x86-64

msgctl.2

Michael Kerrisk

ERRORS: add EPERM for unprivileged attempt to set msg_qbytes > MSGMNB

prctl.2

Michael Kerrisk [Xiawei Chen]

Clarify that PR_GET_TIMERSLACK is returned as the function result

Michael Kerrisk

Clarify that PR_GET_SECCOMP is returned as function result

Michael Kerrisk

Clarify that PR_GET_NO_NEW_PRIVS is returned as function result

ptrace.2

Michael Kerrisk [Andrew Hunter]

Make it clearer that glibc and syscall APIs differ for PTRACE_PEEK*

Thanks to Denys Vlasenko's additions in 78686915aed6bd12

this page does note that the glibc API for PTRACE_PEEK*

differs from the raw syscall interface. But, as the report

at https://bugzilla.kernel.org/show_bug.cgi?id=70801 shows,

this information could be more obvious. This patch makes its so.

sgetmask.2

Michael Kerrisk

Note that these system calls don't exist on x86-64

swapon.2

Michael Kerrisk

Split EINVAL cases into separate entries under ERRORS

Michael Kerrisk

Add EINVAL error for invalid flags to swapon()

syscalls.2

Michael Kerrisk

SEE ALSO: add intro(2)

umount.2

Michael Kerrisk

Split EINVAL cases into separate items

Michael Kerrisk

ERRORS: Add EINVAL case that was new in 2.6.34

utime.2

Michael Kerrisk

Add note that modern applications probably want utimensat(2) etc.

crypt.3

Michael Kerrisk [KOSAKI Motohiro]

ERRORS: Add EINVAL and EPERM errors

See https://bugzilla.kernel.org/show_bug.cgi?id=69771

getifaddrs.3

Michael Kerrisk

Enhance example program

Print statistics for AF_PACKET interfaces.

Add missing feature test macro definition.

Reformat output.

iswctype.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function iswctype() is thread safe.

sem_post.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sem_post() is thread safe.

sem_unlink.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sem_unlink() is thread safe.

sem_wait.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions sem_wait(), sem_trywait() and sem_timedwait() are thread safe.

setbuf.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions setbuf(), setbuffer(), setlinebuf() and setvbuf() are thread safe.

strlen.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function strlen() is thread safe.

strnlen.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function strnlen() is thread safe.

strpbrk.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function strpbrk() is thread safe.

strsep.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function strsep() is thread safe.

swab.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function swab() is thread safe.

resolv.conf.5

Carlos O'Donnell

DESCRIPTION: mention that the data is trusted

In a recent discussion about DNSSEC it was brought to my

attention that not all system administrators may understand that the information in /etc/resolv.conf is fully trusted.

The resolver implementation in glibc treats /etc/resolv.conf as a fully trusted source of DNS information and passes on the AD-bit for DNSSEC as trusted.

This patch adds a clarifying sentence to make it absolutely clear that indeed this source of information is trusted.

ascii.7

Michael Kerrisk [Sulaiman Mustafa]

Fix rendering of single quote (decimal character 39)

Michael Kerrisk

SEE ALSO: add utf-8(7)

Michael Kerrisk [Duncan de Wet]

Remove mention of ISO 8859-1 as being the default encoding on Linux

packet.7

Neil Horman

Document PACKET_FANOUT_QM fanout mode

Michael Kerrisk

Add kernel version for PACKET_FANOUT_QM

Daniel Borkmann

Improve PACKET_QDISC_BYPASS description

socket.7

Michael Kerrisk

Add kernel version number for SO_BUSY_POLL

===== Changes in man-pages-3.62 =====

Released: 2014-03-11, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Cyril Hrubis <chrubis@suse.cz>

Joseph S. Myers <joseph@codesourcery.com>

Marius Gaubas <marius@livejournalinc.com>

Michael Kerrisk <mtk.manpages@gmail.com>

Mike Frysinger <vapier@gentoo.org>

Peng Haitao <penght@cn.fujitsu.com>

Rick Stanley <rstanley@rsiny.com>

Simon Paillard <spillard@debian.org>

Apologies if I missed anyone!

New and rewritten pages

locale.1

Michael Kerrisk [review from Mike Frysinger]

New page describing locale(1)

Newly documented interfaces in existing pages

locale.5

Michael Kerrisk

Document LC_ADDRESS

Michael

Kerrisk

Document LC_IDENTIFICATION

Michael Kerrisk

Document LC_MEASUREMENT

Michael Kerrisk

Document LC_NAME

Michael Kerrisk

Document LC_PAPER

Michael Kerrisk

Document LC_TELEPHONE

Removed Pages

sync.8

Michael Kerrisk [Christoph Hellwig, Pádraig Brady]

Sometime in the 20th century (before my watch), a sync(8) page into man-pages. It documents the sync command from "fileutils", which long ago become coreutils, and the piece under NOTES note some behavior of sync(2) that ceased to be true many years ago. The man-pages project generally focuses on only Linux kernel and (g)libc interfaces, so this sync(8) page doesn't really belong. Furthermore, coreutils has a sync(1) page which covers the same command. After discussions on the coreutils list, I've decided to retire this page from man-pages.

Changes to individual pages

clone.2

Michael Kerrisk

Note that CLONE_THREAD also in effect requires CLONE_VM

stat.2

Michael Kerrisk [Marius Gaubas]

Warn the reader that the 'stat' structure definition is not precise

Padding fields aren't shown, and the order of fields varies somewhat across architectures.

gethostbyname.3

Michael Kerrisk

Remove redundant FTM requirements

`_GNU_SOURCE` implies `_SVID_SOURCE` and `_BSD_SOURCE`, so

```
_BSD_SOURCE || _SVID_SOURCE || _GNU_SOURCE
```

is the same as

```
_BSD_SOURCE || _SVID_SOURCE
```

getutmp.3

Michael Kerrisk

SEE ALSO: `add utmpdump(1)`

log1p.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `log1p()`, `log1pf()` and `log1pl()` are thread safe.

logb.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `logb()`, `logbf()` and `logbl()` are thread safe.

memccpy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `memccpy()` is thread safe.

memchr.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `memchr()`, `memrchr()` and `rawmemchr()` are thread safe.

mktemp.3

Michael Kerrisk

Make warning not to use this function more prominent

qecvt.3

Michael Kerrisk [Joseph S. Myers]

Recommend `snprintf(3)` not `sprintf(3)`

raise.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function raise() is thread safe.

remove.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function remove() is thread safe.

sem_destroy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sem_destroy() is thread safe.

sem_getvalue.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sem_getvalue()

is thread safe.

sem_init.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sem_init() is thread safe.

socketmark.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function socketmark() is thread safe.

strcpy.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions strcpy() and strncpy() are thread safe.

Michael Kerrisk [Rick Stanley]

Fix a bug, and improve discussion of forcing termination with strncpy()

strspn.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions strspn() and strcspn() are thread safe.

tempnam.3

Michael Kerrisk

Make warning not to use this function more prominent

tmpnam.3

Michael Kerrisk

Recommend use mkstemp(3) or tmpfile(3) instead

locale.5

Michael Kerrisk

Add intro section that lists all of the LC categories

Michael Kerrisk

'p_cs_precedes' is for *positive* values

Michael Kerrisk

Clarify 'p_sign_posn' and 'n_sign_posn'; simplify 'n_sign_posn'

Add initial sentence for 'p_sign_posn' and 'n_sign_posn'.

Remove repeated list for 'n_sign_posn'.

Michael Kerrisk

Document LC_MESSAGES 'yesstr' and 'nostr'

Michael Kerrisk

Clarify LC_MONETARY 'n_cs_precedes'

Michael Kerrisk

LC_MONETARY: Document 'int_p_sign_posn' and 'int_n_sign_posn'

Michael Kerrisk

Clarify/rework 'p_cs_precedes' and 'n_cs_precedes'

Michael Kerrisk

LC_MONETARY: document 'int_p_sep_by_space' and 'int_n_sep_by_space'

Michael Kerrisk

Remove crufty reference to POSIX.2

Michael Kerrisk

LC_MONETARY: document 'int_p_cs_precedes' and 'int_n_cs_precedes'

Michael Kerrisk

Clarify/simplify 'n_sep_by_space'

Michael Kerrisk

LC_TIME: document 'cal_direction' and 'date_fmt'

Michael Kerrisk

Clarify 'p_sep_by_space'

feature_test_macros.7

Michael Kerrisk

_BSD_SOURCE and _SVID_SOURCE are deprecated in glibc 2.20

Michael Kerrisk

_GNU_SOURCE implicitly defines other macros

Saying that _GNU_SOURCE has the "effects of" other macros is not quite precise.

Michael Kerrisk

Reword glibc version for _ISOC95_SOURCE

Michael Kerrisk

_ISOC99_SOURCE also exposes C95 definitions

Michael Kerrisk

_ISOC11_SOURCE implies the effects of _ISOC99_SOURCE

Michael Kerrisk

Note version number for _POSIX_C_SOURCE >= 200112L implies C99/C95

_POSIX_C_SOURCE >= 200112L causes C95 definitions to be

exposed only since glibc 2.12 and C99 definitions only
since 2.10.

Michael Kerrisk

_XOPEN_SOURCE may implicitly define _POSIX_SOURCE and _POSIX_C_SOURCE

Michael Kerrisk

Reword glibc version for _ISOC99_SOURCE

Michael Kerrisk

Rework discussion of _ISOC99_SOURCE

Michael

Kerrisk

Improve discussion of _DEFAULT_SOURCE

Michael Kerrisk

_POSIX_C_SOURCE >= 200112L implies C95 and C95 features

===== Changes in man-pages-3.63 =====

Released: 2014-03-18, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Carlos O'Donnell <carlos@redhat.com>

Christoph Hellwig <hch@infradead.org>

Corrado Zoccolo <czoccolo@gmail.com>

Gregory P. Smith <gps@google.com>

Joseph S. Myers <joseph@codesourcery.com>

Michael Kerrisk <mtk.manpages@gmail.com>

Mike Frysinger <vapier@gentoo.org>

Peng Haitao <penght@cn.fujitsu.com>

Phillip Susi <psusi@ubuntu.com>

Robert P. J. Day <rpjday@crashcourse.ca>

Stefan Puiu <stefan.puiu@gmail.com>

Zhu Yanhai <zhu.yanhai@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

duplocale.3

Michael Kerrisk

New page documenting duplocale(3)

newlocale.3

Michael Kerrisk [Mike Frysinger]

New page documenting newlocale(3) and freelocale(3)

towlower.3

Michael Kerrisk

Largely rewrite description of tolower() to be simpler and clearer

towupper.3

Michael Kerrisk

Largely rewrite description of toupper() to be simpler and clearer

uselocale.3

Michael Kerrisk

New page documenting uselocale(3)

Newly documented interfaces in existing pages

open.2

Michael Kerrisk

Document O_DSYNC and rewrite discussion of O_SYNC

isalpha.3

Michael Kerrisk

Document the "_l" locale APIs

The GNU C library v2.3 added some locale APIs, most of which were later specified in POSIX.1-2008, namely:

isalnum_l()

isalpha_l()

isblank_l()

iscntrl_l()

isdigit_l()

isgraph_l()

islower_l()

isprint_l()

ispunct_l()

isspace_l()

isupper_l()

isxdigit_l()

isascii_l()

Also update and correct various pieces in CONFORMING TO
(and remove a few crufty old pieces there).

strerror.3

Michael Kerrisk

Document strerror_l()

toupper.3

Michael Kerrisk

Document toupper_l() and tolower_l()

tolower.3

Michael Kerrisk

Document tolower_l()

toupper.3

Michael Kerrisk

Document toupper_l()

proc.5

Michael Kerrisk

Document /proc/sys/kernel/random/uuid

locale.7

Michael Kerrisk

Document LC_ADDRESS

Document LC_IDENTIFICATION

Document LC_MEASUREMENT

Document LC_NAME

Document LC_PAPER

Document LC_TELEPHONE

New and changed links

freelocale.3

Michael Kerrisk

New link

to new newlocale.3 page

isalnum_1.3

isascii_1.3

isblank_1.3

isctrl_1.3

isdigit_1.3

isgraph_1.3

islower_1.3

isprint_1.3

ispunct_1.3

isspace_1.3

isupper_1.3

isxdigit_1.3

Michael Kerrisk

New links to isalpha.3

tolower_1.3

toupper_1.3

Michael Kerrisk

New links to toupper.3

towlower_1.3

Michael Kerrisk

New link to tolower.3

toupper_1.3

Michael Kerrisk

New link to toupper.3

Global changes

Various pages

Michael Kerrisk

Global change: "upper case" ==> "uppercase", "lower case" ==> lowercase"

Changes to individual pages

mount.2

Michael Kerrisk

SEE ALSO: add blkid(1)

msgop.2

Michael Kerrisk

Document two MSG_COPY failure modes

Since Linux 3.14, the kernel now diagnoses two errors when using msgrcv() MSG_COPY:

* MSG_COPY must be specified with IPC_NOWAIT

* MSG_COPY can't be specified with MSG_EXCEPT

open.2

Michael Kerrisk

Organize some material under additional subheadings in NOTES

There's an amorphous mass of material under NOTES. Structure it with some subheadings, and do a little reorganizing.

Michael Kerrisk

Add other system calls and functions that are like `openat()`

`fanotify_mark(2)`, `name_to_handle_at(2)`, and `scandirat(3)` have a directory file descriptor argument for the same reason as `openat()`.

Also: reword the rationale for the `*at()` functions somewhat.

Michael Kerrisk

Clarify ELOOP error interaction with `O_PATH`

readahead.2

Phillip Susi [Corrado Zoccolo, Gregory P. Smith, Zhu Yanhai, Michael Kerrisk, Christoph Hellwig]

Don't claim the call blocks until all data has been read

The `readahead(2)` man page was claiming that the call blocks until all data has been read into the cache. This is incorrect.

See https://bugzilla.kernel.org/show_bug.cgi?id=54271

stat.2

Michael Kerrisk

SEE ALSO: add `ls(1)` and `stat(1)`

fts.3

Christoph Hellwig [Michael Kerrisk]

The `fts(3)` API does not work with LFS builds

As pointed out during a recent discussion on `libc-hacker` the `fts(3)` APIs can't be used with large file offsets:

https://sourceware.org/bugzilla/show_bug.cgi?id=15838

mbrtowc.3

mbsnrtowcs.3

mbsrtowcs.3

mbtowc.3

Michael Kerrisk

Add entries in SEE ALSO

Mainly inspired by the POSIX pages.

mbsinit.3

Michael Kerrisk

SEE ALSO: add `mbrlen(3)`, `mbrtowc(3)`, and `wcrtomb(3)`

mbsrtowcs.3

wcsrtombs.3

Michael Kerrisk

SEE ALSO: add `mbsinit(3)`

mbstowcs.3

Michael Kerrisk [Stefan Puiu]

Add example program

And add some SEE ALSO entries

memcmp.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function memcmp() is thread safe.

memcpy.3

Peng Haitao

ATTRIBUTES: Note

function that is thread-safe

The function memcpy() is thread safe.

memfrob.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function memfrob() is thread safe.

memmem.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function memmem() is thread safe.

memmove.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function memmove() is thread safe.

mempcpy.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions mempcpy() and wmemcpy() are thread safe.

memset.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function memset() is thread safe.

strerror.3

Michael Kerrisk

CONFORMING TO: strerror() and strerror_r() are in POSIX.1-2008

Michael Kerrisk

Add SS heading for strerror_r()

toupper.3

Michael Kerrisk

Rewrite to more explicitly bring locales into
the discussion

Michael Kerrisk

Retitle BUGS section to NOTES

These are not really bugs, just background info.

wcrtomb.3

wcsnrtoombs.3

wcsrtombs.3

wcstombs.3

wctomb.3

Michael Kerrisk

SEE ALSO: add various entries

Mainly inspired by POSIX

core.5

Mike Frysinger [Michael Kerrisk]

Document core_pattern %d specifier

Document %P core_pattern specifier

Michael Kerrisk

Rearrange core_pattern specifiers alphabetically

locale.5

Michael Kerrisk

SEE ALSO: add newlocale(3) + duplocale(3)

feature_test_macros.7

Michael Kerrisk [Joseph S. Myers]

Remove mention of bogus _ISOC95_SOURCE macro

The _ISOC95_SOURCE macro is defined in <features.h>, but it
does nothing. So remove discussion of it, and move some of
the discussion of C95 under the _ISOC99_SOURCE subhead.

Michael Kerrisk [Carlos O'Donnell]

Add packaging note for _BSD_SOURCE/_SVID_SOURCE/_DEFAULT_SOURCE

To compile warning-free across glibc < 2.20 and glibc >= 2.20
code may be to define both _DEFAULT_SOURCE and either
_BSD_SOURCE or _SVID_SOURCE.

Michael Kerrisk

Reword description of C90

locale.7

Michael Kerrisk

Add subsection on POSIX.1-2008 (originally GNU) extensions to locale API

Michael Kerrisk

Remove reference to LI18NUNIX2000

LI18NUNIX2000 is difficult to even find these days, and in any case

this page does not document gettext(), so notes about gettext()
in the CONFORMING TO section here make no sense.

Michael Kerrisk

SEE ALSO: add mbstowcs(3) and wctombs(3)

SEE ALSO: add newlocale(3) + duplocale(3)

man-pages.7

Michael Kerrisk

Add preferred term "superblock"

Michael Kerrisk

Add preferred terms "uppercase" and "lowercase"

===== Changes in man-pages-3.64 =====

Released: 2014-04-06,

Munich

Petr Gajdos <pgajdos@suse.cz>

Robert P. J. Day <rpjday@crashcourse.ca>

Vince Weaver <vincent.weaver@maine.edu>

Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages

open_by_handle_at.2

Michael Kerrisk [Mike Frysinger, Neil Brown, Aneesh Kumar K.V,
Christoph Hellwig]

New page describing name_to_handle_at(2) and open_by_handle_at(2)

inotify.7

Michael Kerrisk

Rewrite introductory section

Reorganize "Limitations and caveats" subsection

Michael Kerrisk

Further describe the race when adding a watch to a new subtree

Michael Kerrisk

Directory renames may invalidate multiple paths cached by application

Michael Kerrisk

Add paragraph on cache consistency checking

Michael Kerrisk

Mention cache rebuilding to handle overflow events

Michael Kerrisk

Moving an object to another filesystem generates IN_DELETE_SELF

Michael Kerrisk [Jan Kara]

Add text on dealing with rename() events

Michael Kerrisk

Note rationale and consequences of event coalescing

Michael Kerrisk [Eric W. Biederman]

Inotify doesn't work for remote and pseudo filesystems

Michael Kerrisk

Add some examples of events generated by various system calls

Michael Kerrisk

BUGS: IN_ONESHOT does now cause IN_IGNORED when the watch is dropped

A silent change as a result of the fanotify work in kernel 2.6.36.

Michael Kerrisk

Note that IN_DELETE_SELF will be followed by IN_IGNORED

Michael Kerrisk

Note that IN_UNMOUNT will be followed by an IN_IGNORED event

Michael Kerrisk

Inotify does not report events for mmap(2) and msync(2)

Michael Kerrisk

Add examples of syscalls that trigger IN_ATTRIB

Michael Kerrisk

Add some examples of syscalls that trigger IN_MODIFY

Michael Kerrisk

execve(2) also generates IN_ACCESS

Michael Kerrisk

Add examples of syscalls that trigger IN_CREATE

Newly documented interfaces in existing pages

perf_event_open.2

Vince Weaver [Michael Kerrisk]

Document the PERF_FLAG_FD_CLOEXEC flag

The Linux 3.14 release adds support for the PERF_FLAG_FD_CLOEXEC flag.

feature_test_macros.7

Michael Kerrisk

Document _LARGEFILE_SOURCE

tcp.7

Michael Kerrisk [Eric Dumazet]

Document /proc/sys/net/ipv4/tcp_autocorking

Text heavily based on Documentation/networking/ip-sysctl.txt

New and changed links

name_to_handle_at.2

Michael Kerrisk

New link to new open_by_handle_at(2) page

Global changes

fmemopen.3

getaddrinfo.3

mq_notify.3

offsetof.3

aio.7

Michael Kerrisk

Print size_t/ssize_t values using %z printf() modifier

There are fewer and fewer systems these days that don't support the %z specifier mandated in C99. So replace the use of %ld/%lu + (long) cast with %zd/%zu.

Changes to individual pages

bdflush.2

fsync.2

sync.2

Kir Kolyshkin

SEE ALSO: remove update(8) reference

Remove

reference to update(8) man page, since there is no such page. This is an ancient BSD leftover I believe.

chown.2

Michael Kerrisk

Note that 'dirfd' can be AT_FDCWD when AT_EMPTY_PATH is used

getxattr.2

Abhay Sachan

Fix RETURN VALUE description

A EA can have length zero.

inotify_add_watch.2

Michael Kerrisk

ERRORS: add ENAMETOOLONG

inotify_init.2

Michael Kerrisk

Add pointer to inotify(7)

link.2

Michael Kerrisk

When AT_EMPTY_PATH is specified, 'olddirfd' must not refer to a directory

mmap.2

Andrey Vagin

The file descriptor for a file mapping must be readable

There is no difference between MAP_SHARED and MAP_PRIVATE.

open.2

Michael Kerrisk

SEE ALSO: add open_by_name_at(2)

perf_event_open.2

Vince Weaver

Document PERF_EVENT_IOC_PERIOD behavior change

Linux 3.14 (in commit bad7192b842c83e580747ca57104dd51fe08c223)

changes

the perf_event PERF_EVENT_IOC_PERIOD ioctl() behavior

on all architectures to update immediately, to match the behavior

found on ARM.

stat.2

Michael Kerrisk

Note that 'dirfd' can be AT_FDCWD when AT_EMPTY_PATH is used

syscalls.2

Michael Kerrisk

Add sched_getattr() and sched_setattr()

And update kernel version to 3.14

abort.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function abort() is thread safe.

confstr.3

Michael Kerrisk

SEE ALSO: add getconf(1), fpathconf(3), sysconf(3), pathconf(3)

exit.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function exit() is not thread safe.

fenv.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions feclereexcept(), fegetexceptflag(), feraiseexcept(),
fesetexceptflag(), fetestexcept(), fegetround(), fesetround(),
fegetenv(),

fehldexcept(), fesetenv(), feupdateenv(),

feenableexcept(), fedisableexcept() and fegetexcept() are thread
safe.

fpathconf.3

Michael Kerrisk

SEE ALSO: add confstr(3)

fseek.3

Michael Kerrisk [Petr Gajdos]

Document EINVAL error for negative file offset

fseeko.3

Michael Kerrisk

Add feature test macro requirements

fts.3

Michael Kerrisk [Mike Frysinger]

Remove mention of "32-bit systems" in BUGS

fwide.3

wprintf.3

Michael Kerrisk [Robert P. J. Day]

Remove mention of bogus `_ISOC95_SOURCE` feature test macro

getline.3

Alexey Samsonov

Caller should free the allocated buffer even if `getline()` failed

Relevant discussion in glibc bugzilla:

https://sourceware.org/bugzilla/show_bug.cgi?id=5666

getloadavg.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `getloadavg()` is thread safe.

getpt.3

Peng Haitao

ATTRIBUTES:

Note function that is thread-safe

The function `getpt()` is thread safe.

if_nametoindex.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `if_nametoindex()` and `if_indextoname()` are thread safe.

index.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `index()` and `rindex()` are thread safe.

mkfifo.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `mkfifo()` and `mkfifoat()` are thread safe.

netlink.3

Michael Kerrisk

SEE ALSO: make the reference for `libnetlink` the `libnetlink(3)` man page

random.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `random()`, `srandom()`, `initstate()` and `setstate()`

are thread safe.

random_r.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `random_r()`, `srandom_r()`, `initstate_r()` and `setstate_r()` are thread safe.

sigvec.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `sigvec()`, `sigblock()`, `sigsetmask()` and `siggetmask()` are thread safe.

The macro `sigmask()` is thread safe.

sysconf.3

Michael Kerrisk

SEE ALSO: `add confstr(3)`

termios.3

Michael Kerrisk [Peter Hurley]

Fix error in discussion of `MIN > 0, TIME == 0` noncanonical mode

As reported by Peter Hurley, for the `MIN > 0, TIME == 0` case:

`read()` may unblock when `MIN` bytes are available but return up to the 'count' parameter if more input arrives in between waking and copying into the user buffer.

...

`read()` may also `_not_` return until `MIN` bytes have been received, even if 'count' bytes have been received.

Michael Kerrisk

Add a note on interaction of `O_NONBLOCK` with noncanonical `MIN/TIME`

POSIX leaves the behavior open.

Michael Kerrisk

Clarify termination conditions for `MIN > 0, TIME > 0`

Michael Kerrisk

Clarify behavior if data is available before noncanonical `read()`

Michael Kerrisk

Add descriptive titles to noncanonical `read()` cases

symlink.7

Michael Kerrisk

Add subsection on opening a symbolic link with `O_PATH`

Michael Kerrisk

`name_to_handle_at(2)` and `open_by_handle_at(2)` optionally follow symlinks

Michael Kerrisk

Mention use of `readlink(2)` to read contents of a symlink

Yuri Kozlov <yuray@komyakino.ru>

Apologies
if I missed anyone!

New and rewritten pages

fanotify_init.2

Heinrich Schuchardt, Michael Kerrisk
New page documenting fanotify_init(2)

fanotify_mark.2

Heinrich Schuchardt, Michael Kerrisk
New page documenting fanotify_mark(2)

sched_setscheduler.2

Michael Kerrisk
Page rewritten
Stripped out the general scheduling material, which
moved to sched(7), and rewrote much of the remainder.
Changed copyright and license since pretty much all
of the content was or is written by mtk.

fanotify.7

Heinrich Schuchardt, Michael Kerrisk
New page providing overview of the fanotify API

sched.7

Michael Kerrisk

New page providing an overview of the scheduling APIs

Most of this content derives from sched_setscheduler(2). In preparation for adding a sched_setattr(2) page, it makes sense to isolate out this general content to

a separate

page that is referred to by the other scheduling pages.

Newly documented interfaces in existing pages

fallocate.2

Lukas Czerner [Michael Kerrisk]

Document FALLOC_FL_ZERO_RANGE

FALLOC_FL_ZERO_RANGE was added in Linux 3.14, for zeroing ranges in the allocated space in a file.

rename.2

Miklos Szeredi [Michael Kerrisk]

Document renameat2() system call added in Linux 3.15

shmop.2

Michael Kerrisk

Document SHM_EXEC

Changes to individual pages

flock.2

Michael Kerrisk

Employ term "open file description" in DESCRIPTION

And include reference to open(2) for an explanation of the term.

getpriority.2

Michael Kerrisk

SEE ALSO: add sched(7)

getsockopt.2

Carsten Andrich

SEE ALSO: add packet(7)

link.2

Michael Kerrisk [Steven Stewart-Gallus]

Document ENOENT error for linkat()

See https://bugzilla.kernel.org/show_bug.cgi?id=73301

msgget.2

Michael Kerrisk

Reword EEXIST error

msgop.2

Michael Kerrisk

Note capability required to raise MQ size beyond MSGMNB

msync.2

Michael Kerrisk [Heinrich Schuchardt]

s/flushes... back to disk/flushes... back to filesystem/

nice.2

Michael Kerrisk

SEE ALSO: add sched(7)

open.2

Peter Schiffer

Update note on alignment of user buffer and file offset for O_DIRECT

The sentence in open(2) man page in notes for O_DIRECT flag:

"Under Linux 2.6, alignment to 512-byte boundaries suffices."

is not universally correct. The alignment is a property of the storage, for example, 4k-sector drives with no 512 byte sector emulation will be unable to perform 512-byte direct I/O.

Michael Kerrisk

Note some of the various synonyms for "open file description"

Michael Kerrisk

Remove repetitious

text on use of fcntl() to change file status flags

open_by_handle_at.2

Michael Kerrisk

Mention FreeBSD analogs

posix_fadvise.2

Michael Kerrisk [Eric Siegerman]

Fix wording error under "Architecture-specific variants"

See https://bugzilla.kernel.org/show_bug.cgi?id=75431

process_vm_readv.2

Michael Kerrisk [Stijn Hinterding]

Add feature test macro requirements

The `_GNU_SOURCE` FTM must be defined.

read.2

Michael Kerrisk

BUGS: detail nonatomicity bug with respect to file offset updates

This bug was fixed in Linux 3.14, with commit

9c225f2655e36a470c4f58dbbc99244c5fc7f2d4

See also <http://thread.gmane.org/gmane.linux.kernel/1649458>

sched_get_priority_max.2

Michael Kerrisk

Small changes consistent with migration of content to sched(7)

sched_rr_get_interval.2

Michael Kerrisk

Small changes consistent with migration of content to sched(7)

sched_setaffinity.2

Michael Kerrisk

Small changes consistent with migration of content to sched(7)

sched_setparam.2

Michael Kerrisk

Small changes consistent with migration of content to sched(7)

sched_yield.2

Michael Kerrisk

Small changes consistent with migration of content to sched(7)

semget.2

Michael Kerrisk

Consolidate discussion on noninitialization of semaphores

The fact that semget() does not initialize the semaphores in a new set was covered in two places (in DESCRIPTION and BUGS). Consolidate these into one place (in NOTES) and also point out that POSIX.1-2008 says that a future version of the standard may require an implementation to initialize the semaphores to 0.

Michael Kerrisk

Clarify SEMMNS versus SEMMSL*SEMMNI

Michael Kerrisk

Rework EINVAL text a little

Michael Kerrisk

Clarify wording for EEXIST error

shmget.2

Manfred Spraul

Clarify SHMALL

The default for SHMALL is a limit of 8 GB, regardless of PAGE_SIZE. The current documentation does not mention that

and is therefore more difficult to understand than necessary.

Manfred Spraul

Correct math error

2097152 is 2^{21} , not 2^{20} .

Michael Kerrisk

Reword EEXIST error

Michael Kerrisk

Clarify one of the EINVAL cases

Michael Kerrisk

Note that SHM_NORESERVE is a Linux extension

Michael Kerrisk [Simon Paillard]

Fix kernel version numbers in discussion of SHMALL

Michael Kerrisk

Rework EINVAL text

Michael Kerrisk

Move and rework discussion of mode bits

Michael Kerrisk

Reword description of O_EXCL

shmop.2

Michael Kerrisk

Move fork(2), execve(2), _exit(2) discussion to NOTES

Michael Kerrisk

Add subheads for shmat() and shmdt()

Michael Kerrisk

Rework discussion of SHM_RDONLY and SHM_REMAP

into list format

Michael Kerrisk

Structure the attach cases as a list

sigaction.2

Alan Curry

Fix bad cross reference (times(2) not time(2))

The system call that reports child CPU usage is times(2),
not time(2).

symlink.2

Michael Kerrisk [Steven Stewart-Gallus]

Document ENOENT error for symlinkat()

See https://bugzilla.kernel.org/show_bug.cgi?id=73301

syscalls.2

Michael Kerrisk

Add renameat2()

And bump kernel version.

write.2

Michael Kerrisk

BUGS: detail nonatomicity bug with respect to file offset updates

This bug was fixed in Linux 3.14, with commit

9c225f2655e36a470c4f58dbbc99244c5fc7f2d4

See also <http://thread.gmane.org/gmane.linux.kernel/1649458>

pthread_attr_setinheritsched.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setinheritsched() and

pthread_attr_getinheritsched()

are thread safe.

pthread_attr_setschedparam.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setschedparam() and

pthread_attr_getschedparam() are thread safe.

pthread_attr_setschedpolicy.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setschedpolicy() and

pthread_attr_getschedpolicy() are thread safe.

pthread_attr_setscope.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setscope() and pthread_attr_getscope()

are thread safe.

pthread_attr_setstack.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setstack() and pthread_attr_getstack()

are thread safe.

sched_getcpu.3

Michael Kerrisk

SEE ALSO: add sched(7)

termios.3

Michael Kerrisk [Yuri Kozlov]

Rework intro text for 'c_oflag'

Michael Kerrisk

OFDEL is in POSIX.1-2001, so remove "(Not in POSIX)" text

proc.5

Jan Moskyto Matejka [Randy Dunlap]

Improve description of /proc/stat 'intr' field
The sum at the beginning of line "intr" includes also
unnumbered interrupts.

packet.7

Carsten Andrich [Neil Horman]

Improve sockopt documentation for packet sockets

Carsten Andrich [Willem de Bruijn]

PACKET_LOSS has inverse meaning

Stefan Puiu [Daniel Borkmann, Carsten Andrich]

Status in PACKET_RX_RING is actually a bit mask

Michael Kerrisk [Carsten Andrich]

SEE ALSO: add /tools/testing/selftests/net/psock_tpacket.c

==== Changes in man-pages-3.67 =====

Released: 2014-05-21, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated
in changes in this release:

Andy Lutomirski <luto@amacapital.net>
Aurelien Jarno <aurelien@aurel32.net>
Bill Allombert <ballombe@debian.org>
Christoph Hellwig <hch@infradead.org>

Török Edwin <edwin@etorok.net>
William Morriss <wjmelements@gmail.com>

Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages

sched_setattr.2

Michael Kerrisk, Peter Zijlstra [Juri Lelli]

New page describing sched_setattr(2)
and sched_getattr(2)

system.3

Michael Kerrisk

Rewrote large parts of the page and added a number of details

Newly documented interfaces in existing pages

sched.7

Peter Zijlstra, Michael Kerrisk [Juri Lelli]

Document SCHED_DEADLINE

New and changed links

renameat2.2

Michael Kerrisk

New link to rename.2

sched_getattr.2

Michael Kerrisk

New link to new sched_setattr

Changes to individual pages

bind.2

Michael Kerrisk

ERRORS: Add EADDRINUSE for ephemeral port range exhaustion

chown.2

Michael Kerrisk

NOTES: Add some subheadings

connect.2

Michael Kerrisk [William Morriss]

ERRORS: Add EADDRNOTAVAIL for ephemeral port range exhaustion

Verified from testing and the kernel source.

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=745775>

Michael Kerrisk

Remove mention

of ip_local_port_range under EAGAIN error

create_module.2

delete_module.2

init_module.2

query_module.2

Michael Kerrisk [Lucas De Marchi]

Clarify glibc header file declaration/ABI wrapper details

create_module(), delete_module(), init_module(), and

query_module() are not declared in header files, but

through an accident of history glibc provides an ABI

for them that it continues to maintain, for

compatibility reasons.

execve.2

Michael Kerrisk [Steven Stewart-Gallus]

Note SIGKILL case when execve() fails beyond the point of no return

Michael Kerrisk

NOTES: Add a subheading and reorder paragraphs

fanotify_init.2

Heinrich Schuchardt [Michael Kerrisk]

Document range of permitted flags for event_f_flags

With a new patch included in the mm tree, event_f_flags is

checked for allowable values.

fcntl.2

Michael Kerrisk

Add "file locking" subheading

under NOTES

fork.2

Michael Kerrisk

ERRORS: SCHED_DEADLINE tasks can fail with EAGAIN

SCHED_DEADLINE tasks can fail with EAGAIN unless the

reset-on-fork flag is set.

futex.2

Michael Kerrisk

Note that there is no glibc wrapper

getpriority.2

Rasmus Villemoes

Fix prototypes for getpriority() and setpriority()

The who argument has type id_t (which happens to be u32 on linux).

get_robust_list.2

Rasmus Villemoes

Add <sys/types.h> to synopsis of get_robust_list()

If one were to implement wrappers for [gs]et_robust_list() using the given prototypes, one would also have to include sys/types.h to get a definition of size_t.

getrusage.2

Michael Kerrisk [Bill Allombert]

_GNU_SOURCE must be defined to obtain RUSAGE_THREAD definition

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=746569>

link.2

open.2

Andy Lutomirski [Michael Kerrisk]

Update AT_EMPTY_PATH and O_PATH documentation

listen.2

Michael Kerrisk

ERRORS: Add EADDRINUSE for ephemeral port range exhaustion

mbind.2

Rasmus Villemoes

Fix prototype for mbind(2)

The nmask argument is const. The return type in numaif.h is long. (Well, at least <numaif.h> says nmask is const. The current kernel does not define it as a const argument, but sys_mbind() only passes it to get_nodes(), which does treat it as const.)

msgop.2

Davidlohr Bueso [Michael Kerrisk]

Enhance description of "full queue" criteria

poll.2

Rasmus Villemoes

Add <signal.h> to synopsis for ppoll()

One needs to #include <signal.h> to get the definition of the type (sigset_t) of the mask argument to ppoll().

readlink.2

Rasmus Villemoes

Fix return type of readlinkat()

recv.2

Michael Kerrisk

Clarify details of msg_name and msg_namelen fields

recvmmsg.2

Michael Kerrisk

Describe timeout bug

See https://bugzilla.kernel.org/show_bug.cgi?id=75371

and <http://thread.gmane.org/gmane.linux.man/5677>

remap_file_pages.2

Andy Lutomirski [Christoph Hellwig, Andy Lutomirski]

remap_file_pages() has no benefit for real files

Linux commit 3ee6dafc677a68e461a7ddafc94a580ebab80735 caused

remap_file_pages to be emulated when used on real file.

sched_get_priority_max.2

Michael Kerrisk

'policy' can also be SCHED_DEADLINE

sched_setaffinity.2

Rasmus Villemoes

Fix prototype for sched_setaffinity()

The mask argument is const.

sched_setparam.2

Michael Kerrisk

ERRORS: mark errors that apply just for sched_setparam()

Michael Kerrisk

ERRORS: Add EINVAL for invalid arguments

Michael Kerrisk

SEE ALSO: add sched_setattr(2)

sched_setscheduler.2

Michael Kerrisk

ERRORS: mark errors that apply just to sched_setscheduler()

Michael Kerrisk

ERRORS: add EINVAL case for pid < 0

Michael Kerrisk

ERRORS: separate out EINVAL cases

semget.2

Michael Kerrisk

NOTES: Add subheadings and reorder paragraphs

semop.2

Rasmus Villemoes

Fix prototypes for semop() and semtimedop()

The nsops arguments have type size_t, not unsigned, and the timeout argument of semtimedop() is const.

Michael Kerrisk

NOTES: Add a subheading

send.2

Michael Kerrisk

Add details on various 'msghdr' fields

Michael Kerrisk

ERRORS: Add EAGAIN for ephemeral port range exhaustion

Michael Kerrisk

Add some subheadings under DESCRIPTION

shmget.2

Michael Kerrisk

NOTES: Add a subheading

stat.2

Michael Kerrisk [Aurelien Jarno]

Describe feature test macro requirements for file type test macros

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=728240>

Michael Kerrisk

Update FTM requirements

for lstat()

Michael Kerrisk

Split discussion of 'st_mode' fields into type and permissions

Michael Kerrisk

Move text on S_I*() macros to follow text on S_I* macros

That ordering is more logical

stime.2

Rasmus Villoeoes

Fix prototype for stime()

The argument is const, both according to the actual header files and according to <<http://www.sco.com/developers/devspecs/vol1a.pdf>>.

syscall.2

Rasmus Villoeoes

Fix prototype for syscall()

The first argument and the return value of syscall() has type long, not int.

getopt.3

Michael Kerrisk

EXAMPLE: Add subheadings to distinguish the two example programs

malloc.3

Michael Kerrisk

Reword text referring to mallopt(3)

Linux libc is no longer "recent"; drop mention of it.

pthread_attr_setinheritsched.3

pthread_attr_setschedparam.3

pthread_attr_setschedpolicy.3

pthread_setaffinity_np.3

pthread_setschedparam.3

pthread_setschedprio.3

pthread_yield.3

pthreads.7

Michael Kerrisk

Change references to "sched_setscheduler(2)" to "sched(7)"

Change consistent with the fact that the scheduling overview page is now sched(7) not sched_setscheduler(2).

pthread_attr_setstackaddr.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setstackaddr() and pthread_attr_getstackaddr() are thread safe.

pthread_attr_setstacksize.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setstacksize() and pthread_attr_getstacksize() are thread safe.

pthread_kill.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_kill() is thread safe.

pthread_kill_other_threads_np.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_kill_other_threads_np() is thread safe.

pthread_self.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_self() is thread safe.

pthread_setcancelstate.3

Michael Kerrisk

Add paragraph breaks to "Asynchronous cancelability" subsection

pthread_setcancelstate.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_setcancelstate() and pthread_setcanceltype() are thread safe.

Michael Kerrisk

NOTES: Add some subheadings

pthread_setschedparam.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_setschedparam() and pthread_getschedparam() are thread safe.

pthread_setschedprio.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_setschedprio() is thread safe.

pthread_sigmask.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_sigmask() is thread safe.

pthread_sigqueue.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_sigqueue() is thread safe.

pthread_testcancel.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_testcancel() is thread safe.

pthread_yield.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_yield() is thread safe.

remquo.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions remquo(), remquof() and remquol() are thread safe.

rtime.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `rtime()` is thread safe.

`sched_getcpu.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `sched_getcpu()` is thread safe.

`stpcpy.3`

Ingo Schwarze

Note some history of

`stpcpy()`

Quoting Ingo:

I just noticed that the `stpcpy(3)` manual contains a speculation that appears to be untrue on closer investigation: That function did not originate in MS DOS, but in Lattice C on AmigaDOS.

Here is a patch against the git master HEAD to fix that, and add some more historical information. To provide some background and allow you to more easily verify the correctness of the patch, i'm appending my mail to misc@openbsd.org, where i'm giving some more details about the history and pointing to some primary sources. That mail also contains the (similar, but shorter) patch i just committed to the OpenBSD manual page.

`strcasemp.3`

Michael Kerrisk [Aurelien Jarno, Török Edwin]

Explain why `strcasemp()+strncasemp()` are also declared in `<string.h>`

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=729436>

`strep.3`

Michael Kerrisk

NOTES: Add a subheading

`fd.4`

Michael Kerrisk [Sam Varshavchik]

Fix floppy disk device names

The naming convention shown in the page was ancient.

Now, the page is consistent with `Documentation/devices.txt`

(where it is noted that "The use of the capital letters

D, H and E for the 3.5" models have been deprecated, since

the drive type is insignificant for these devices"

`proc.5`

Michael Kerrisk

Document `/proc/timer_stats`

Michael Kerrisk

(Briefly) document `/proc/timer_list`

Michael Kerrisk

Add /proc/sys/kernel/{sched_rt_period_us,sched_rt_runtime_us}

Reference sched(7) for an explanation of these two files

capabilities.7

Michael Kerrisk

Mention sched_setattr(2) under CAP_SYS_NICE

cpuset.7

Michael Kerrisk

SEE ALSO: add sched(7)

credentials.7

Michael Kerrisk

Mention sched_getattr() as a place where credentials are checked

fanotify.7

Heinrich Schuchardt [Jan Kara]

BUGS: error events can be lost when reading from fanotify FD

Michael Kerrisk [Heinrich Schuchardt]

Fix description of FAN_EVENT_NEXT()

FAN_EVENT_NEXT() does not update 'meta'; rather, it returns a pointer to the next metadata structure. In addition, generally rework the description to be a bit clearer and more detailed.

Heinrich Schuchardt

Document FAN_EVENT_METADATA_LEN

ip.7

Michael Kerrisk

Note cases where an ephemeral port is used

Michael Kerrisk

Remove BUGS text on glibc failing to declare in_pktinfo

Michael Kerrisk

Clarify 'ip_local_port_range' and mention the term "ephemeral ports"

Michael Kerrisk

Note some more details about assignment of ephemeral ports

Michael Kerrisk

BUGS: ephemeral port range exhaustion is diagnosed inconsistently

Different system calls use different 'errno'

values to diagnose

exhaustion of the ephemeral port range.

sched.7

Michael Kerrisk

Document sched_rt_period_us and sched_rt_runtime_us /proc files

And rework and relocate the text on dealing with runaway real-time processes.

Michael Kerrisk

Mention sched_setattr(2) in list of APIs that can change policies

Michael Kerrisk

sched_setattr(2) can also be used to set 'nice' value

Michael Kerrisk

Remove mention of sched_setscheduler() when talking about sched_priority

There are nowadays multiple ways to set sched_priority (and in fact there always were, since we also had sched_setparam(2)).

Michael Kerrisk

SEE ALSO: Add Documentation/scheduler/sched-design-CFS.txt

Michael Kerrisk

Don't mention sched_setscheduler(2) in discussions of setting policies

In a couple of places, sched_setscheduler(2) is mentioned as the way of setting policies.

But now there is sched_setattr(2) as

well, rewrite the text in a more generic way.

Michael Kerrisk

Rework summary text describing sched_setattr(2) and sched_getattr(2)

Note that these APIs are a superset of sched_setscheduler(2) and sched_getscheduler(2).

Michael Kerrisk

Remove crufty text relating to sched_setscheduler()

All of the removed text is in sched_setscheduler(2) and should have been trimmed from this page.

Michael Kerrisk

SEE ALSO: Mention more files in Documentation/scheduler/ directory

===== Changes in man-pages-3.68 =====

Released: 2014-05-28, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Alastair McKinstry <mckinstry@computer.org>

Carsten Grohmann <carstengrohmann@gmx.de>

Colin

Williams <colinwilliams1968@gmail.com>

Heinrich Schuchardt <xypron.glpk@gmx.de>

Lars Wirzenius <liw@iki.fi>

Marko Myllynen <myllynen@redhat.com>

Michael Kerrisk <mtk.manpages@gmail.com>

Peng Haitao <penght@cn.fujitsu.com>

Rasmus Villemoes <rv@rasmusvillemoes.dk>
Richard Braakman <richard.braakman@jollamobile.com>
Simon Paillard <spillard@debian.org>

Apologies if I missed anyone!

New and rewritten pages

localedef.1

Marko Myllynen, Richard Braakman, Alastair McKinstry, Lars Wirzenius

New page for localedef(1)

Add new page based on Debian localedef(1) page.

New and changed links

procf.5

New link to proc.5

Since the term "procf" is widely used, it seems reasonable to have
a link from that name to proc(5).

Changes to individual pages

locale.1

Marko Myllynen

Provide a step-by-step example of how to use a custom locale

Marko Myllynen

Use

LC_TELEPHONE instead of LC_MESSAGES in the example

yesstr/nostr in LC_MESSAGES are planned to be changed at some
point [1], so it's better to provide an example which won't
be obsoleted by that change.

[1] https://sourceware.org/bugzilla/show_bug.cgi?id=16975

adjtimex.2

Michael Kerrisk

Add feature test macro requirements

clone.2

Michael Kerrisk

ERRORS: add cross-reference to fork(2) for explanation of EAGAIN

fork.2

Michael Kerrisk

ERRORS: add pid_max and threads-max to EAGAIN

And rewrite text to be the same as pthread_create(3).

getrlimit.2

Michael Kerrisk

RLIMIT_NPROC is not enforced if CAP_SYS_ADMIN or CAP_SYS_RESOURCE

remap_file_pages.2

Rasmus Villemoes

Fix prototype

The pgoff argument has type size_t, not ssize_t (and in the kernel it is unsigned long).

set_mempolicy.2

Rasmus Villemoes

Fix prototype for set_mempolicy(2)

The nodemask argument is const. The return type in numaif.h is long.

swapon.2

Rasmus Villemoes

Remove header from synopsis

The <asm/page.h> header is not readily available, and the comment seems to indicate that it is for getting PAGE_SIZE. But it is never mentioned why one would need to know that, and it is in any case better obtained using sysconf(), provided by <unistd.h>.

a64l.3

Rasmus Villemoes

Fix prototype for a64l()

The argument is const, both according to POSIX and the glibc headers.

adjtime.3

Rasmus Villemoes

Add required header

The prototype for adjtime(3) is declared in <sys/time.h>.

argz_add.3

Rasmus Villemoes

Fix prototypes

Update the prototypes of argz_{delete,extract,next} to agree with glibc headers and manual.

bstring.3

Rasmus Villemoes

Fix prototypes

The length parameter `n`
has type `size_t` in `bcmp()`, `bcopy()` and
`bzero()`.

`envz_add.3`

Rasmus Villemoes

Fix prototypes

The `envz_len` parameters for `envz_entry()` and `envz_get()` are not
passed by reference.

`fpathconf.3`

Rasmus Villemoes

Fix prototype

The path argument to `pathconf()` is `const`.

`fseek.3`

Rasmus Villemoes

Fix prototype

The `pos` argument to `fsetpos()` is `const`.

`gcvt.3`

Rasmus Villemoes

Fix prototype

The `ndigit` parameter to `gcvt()` has type `int`.

`getaddrinfo_a.3`

Rasmus Villemoes

Fix prototype

The pointer arguments to `gai_suspend()` are `const`.

`getauxval.3`

Rasmus Villemoes

Fix permissions

There doesn't seem to be any reason for `getauxval.3` to be
executable...

`getnameinfo.3`

Rasmus Villemoes

Fix prototype

The `hostlen` and `servlen` parameters have type `socklen_t`.
(The types changed in glibc 2.2)

Michael

Kerrisk

Note types of 'hostlen'; and 'servlen' in glibc < 2.2

`getrpcent.3`

Rasmus Villemoes

Fix prototype

The argument to `getrpcbyname()` is `const`.

`getrpcport.3`

Rasmus Villemoes

Add `#include` and fix prototype

The prototype for `getrpcport()` is obtained by `#include'ing` `<rpc/rpc.h>`. Also, update its prototype.

`getspnam.3`

Rasmus Villemoes

Fix prototype

The struct `spwd` argument to `putspent()` is `const`.

`getutent.3`

Rasmus Villemoes

Fix prototypes

The arguments to `getutid()`, `getutline()`, and `pututline()` are `const`.

`inet.3`

Rasmus Villemoes

Fix prototype

The parameters to `inet_makeaddr` have type `in_addr_t`.

`inet_net_pton.3`

Rasmus Villemoes

`srcfix`, `cfix`

Use a consistent style throughout the man-pages.

`key_setsecret.3`

Rasmus Villemoes

Fix prototypes

Remove `const` qualifiers from arguments to `key_decryptsession`, `key_encryptsession`, and `key_setsecret`.

`makecontext.3`

Rasmus Villemoes

Fix prototype

The second argument to `swapcontext()` is `const`.

`makedev.3`

Rasmus Villemoes

Fix prototype

`gnu_dev_makedev`, and hence its trivial macro wrapper `makedev`, takes two unsigned int parameters; this is consistent with it being the inverse of `(gnu_dev_)major/minor`, which return unsigned int.

`malloc_trim.3`

Rasmus Villemoes

Fix prototype

As mentioned further down, `malloc_trim` returns an integer.

`mq_getattr.3`

Rasmus Villemoes

Fix prototype

The `newattr` parameter to `mq_setattr` is `const`.

`newlocale.3`

Marko Myllynen

List all available category masks

Michael Kerrisk

Add `LC_ALL_MASK` description

`nl_langinfo.3`

Marko Myllynen

Expand the example code a bit

Better illustrate querying elements from different categories.

`perror.3`

Rasmus Villemoes

Fix declaration

The elements of the array `sys_errlist` are also `const`.

`pthread_attr_setaffinity_np.3`

`pthread_attr_setdetachstate.3`

`pthread_attr_setguardsize.3`

`pthread_attr_setinheritsched.3`

`pthread_attr_setschedparam.3`

`pthread_attr_setschedpolicy.3`

`pthread_attr_setscope.3`

`pthread_attr_setstack.3`

`pthread_attr_setstackaddr.3`

`pthread_attr_setstacksize.3`

Rasmus Villemoes

Constify parameters

Each of the `pthread_attr_get*` functions extract some piece of information from a `pthread_attr_t`, which is passed by `const` reference. Add the `const` keyword to the prototypes of these functions.

`pthread_cleanup_push_defer_np.3`

Michael Kerrisk [Rasmus Villemoes]

Add feature test macro requirements

`pthread_create.3`

Michael Kerrisk [Carsten Grohmann]

Add pid_max limit to EAGAIN error cases

pthread_equal.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_equal() is thread safe.

pthread_exit.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_exit() is thread safe.

pthread_getcpuclockid.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_getcpuclockid() is thread safe.

pthread_setaffinity_np.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_setaffinity_np() and pthread_getaffinity_np() are thread safe.

pthread_setconcurrency.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_setconcurrency() and pthread_getconcurrency() are thread safe.

pthread_setname_np.3

Rasmus Villemoes

Fix prototype

The name parameter of pthread_getname_np is an output parameter and hence not const.

pthread_setschedparam.3

Rasmus Villemoes

Fix

prototypes

Add return type for pthread_{s,g}etschedparam.

pthread_setschedprio.3

Rasmus Villemoes

Fix prototype

Add return type for pthread_setschedprio.

pthread_sigqueue.3

Rasmus Villemoes

Add missing `#include <signal.h>`

rcmd.3

Rasmus Villemoes

Fix prototypes

Unlike the BSDs, the second argument of `rcmd()` and `rcmd_af()` has type `unsigned short`.

The first argument of `iruserok_af()` has type `const void*`.

re_comp.3

Rasmus Villemoes

Fix prototypes

`re_comp` and `re_exec` take `const char*` arguments.

resolver.3

Rasmus Villemoes

Fix prototypes and extern-declaration

Fix `const`- and `signedness` of various `char*` parameters.

Also, there is no "struct state", but `_res` is a struct `__res_state`. (Actually, `_res` is `errno`-like in that it is really a macro expanding to `(*__res_state())`.)

rexec.3

Rasmus Villemoes

Fix prototypes

The `user`, `passwd` and `cmd` arguments to `rexec` and `rexec_af` are all `const`.

rtime.3

Rasmus Villemoes

Replace header

The header `<rpc/des_crypt.h>` does not provide `rtime()`; `<rpc/auth_des.h>` does, as is also implied in both the `NOTES` and `EXAMPLE` sections.

scandir.3

Rasmus Villemoes

Fix prototypes

The `alphasort` and `versionsort` functions take arguments of type `const struct dirent **`, not `const void *`.

setlocale.3

Michael Kerrisk [Marko Myllynen]

Simplify locale category listing and add GNU-specific locale categories

Some information that was here will move to `locale(7)`.

Marko Myllynen

Remove now obsolete NOTES section

setnetgrent.3

Rasmus Villemoes

Fix prototype

The buflen argument to getnetgrent_r has type size_t.

sigvec.3

Rasmus Villemoes

Fix prototype

The vec argument to sigvec is const.

tsearch.3

Rasmus Villemoes

Fix prototype

The rootp argument to tfind is "void * const *",
not "const void **".

core.5

Michael Kerrisk

Core dump files are nowadays core.pid by default

locale.5

Marko Myllynen

Document mon_grouping and grouping properly

Michael Kerrisk

Note default value for 'first_workday'

Michael Kerrisk [Marko Myllynen]

Add brief descriptions of collating-element and collating-symbol

Marko Myllynen

t_fmt_ampm is needed only for locales that employ AM/PM convention

Michael Kerrisk [Marko Myllynen]

Remove crufty reference to /usr/lib/nls/src

That file is nowhere to be found

Marko Myllynen

Clarify LC_TIME/am_pm and LC_NAME keywords usage

am_pm should be defined only if AM/PM convention is used to signal
applications they should not try to print them when using them in
unwanted.

Same

for all LC_NAME keywords expect for name_fmt which should be
always defined.

Marko Myllynen

Clarify lang_term / lang_lib

As noted by Keld Simonsen in the lib-locales@sourceware mailing
list:

<https://sourceware.org/ml/libc-locales/2014-q2/msg00008.html>

From: Keld Simonsen <keld at rap dot rap dot dk>

To: Marko Myllynen <myllynen at redhat dot com>

Date: Tue, 29 Apr 2014 17:02:09 +0200

lang_term reflects ISO 639-2/T (terminology) codes, while

lang_lib reflects ISO 639-2/B (bibliographic) codes.

lang_term is preferred over lang_lib codes for locale names.

There are 20 specific ISO 639-2/B codes.

Marko Myllynen

Correct the FILES section

proc.5

Michael Kerrisk

'pid_max' is a system-wide limit on number of threads and processes

Since PIDs > /proc/sys/kernel/pid_max are not allocated,

this

file thus also imposes a system-wide limit on the number of
threads and processes.

capabilities.7

Michael Kerrisk

CAP_SYS_ADMIN allows overriding RLIMIT_NPROC

Michael Kerrisk

CAP_SYS_PTRACE allows process_vm_readv(2) and process_vm_writev(2)

charsets.7

Michael Kerrisk [Marko Myllynen]

Remove crufty statement that Romanian may be switching to ISO 8859-16

Michael Kerrisk

Remove ancient paragraph on charsets supported in glibc 2.3.2

That test is rather ancient, and probably of little use.

fanotify.7

Heinrich Schuchardt

Fix to example program: fanotify read() should use aligned buffer

inotify.7

Heinrich Schuchardt

Add example program

This example of the usage of the inotify API shows the
usage of inotify_init1(2) and inotify_add_watch(2) as well
as polling and reading from the inotify file descriptor.

Heinrich Schuchardt

munmap()

does not generate inotify events

locale.7

Marko Myllynen [Michael Kerrisk]

Document the LOCPATH environment variable

Michael Kerrisk

Add further details on various categories

===== Changes in man-pages-3.69 =====

Released: 2014-06-14, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Cyril Hrubis <chrubis@suse.cz>

Jan Chaloupka <jchaloup@redhat.com>

Jeff Layton <jlayton@poochiereds.net>

Kirill A. Shutemov <kirill.shutemov@linux.intel.com>

KOSAKI Motohiro <kosaki.motohiro@jp.fujitsu.com>

Marko Myllynen <myllynen@redhat.com>

Michael Kerrisk <mtk.manpages@gmail.com>

NeilBrown <neilb@suse.de>

Peng Haitao <penght@cn.fujitsu.com>

Petr Gajdos <pgajdos@suse.cz>

Qian Lei <qianl.fnst@cn.fujitsu.com>

Rasmus Villemoes <rv@rasmusvillemoes.dk>

Vasiliy Kulikov <segoon@openwall.com>

Walter

Harms <wharms@bfs.de>

Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages

iconv.1

Marko Myllynen [Michael Kerrisk]

New page for the iconv(1) command

iconvconfig.8

Marko Myllynen

New page for iconvconfig(8)

Newly documented interfaces in existing pages

fcntl.2

Jeff Layton, Michael Kerrisk

Document open file description locks

As provided by the fcntl() operations F_OFD_SETLK,
F_OFD_SETLKW, and F_OFD_GETLK

Changes to individual pages

locale.1

Marko Myllynen

Add FILES section, add charmap(5) reference

Marko Myllynen

Align with recent charmap(5) / repertoiremap(5) changes

execve.2

Michael Kerrisk [NeilBrown]

Before kernel 2.6.0, RLIMIT_NPROC had no effect for set*uid()

Michael Kerrisk [Vasiliy Kulikov]

RLIMIT_NPROC is checked

only if preceded by set*uid()

Michael Kerrisk [Vasiliy Kulikov, NeilBrown, KOSAKI Motohiro]

Document EAGAIN error

See also https://bugzilla.kernel.org/show_bug.cgi?id=42704

fcntl.2

Michael Kerrisk

Detail the limitations of traditional (process-associated) locks

Michael Kerrisk [Jeff Layton]

Describe how to check whether the kernel supports a particular command

Michael Kerrisk

ERRORS: add EINVAL for invalid 'cmd'

Michael Kerrisk

Add para introducing advisory locks and noting existence of OFD locks

Michael Kerrisk [Jeff Layton]

Add notes on F_SETLKW deadlock detection and its limitations

Michael Kerrisk

Add an explicit note that mandatory locking is not in POSIX

Michael Kerrisk

Rewrite introductory paragraphs on mandatory locking

Make the structure more logical, and also explicitly mention

OFD locks.

Michael Kerrisk [Jeff Layton]

Reword discussion

of mandatory lock bug a little

Jeff Layton confirmed that the bug remains even in modern kernels.

Michael Kerrisk

Explain POSIX background to EACCES/EAGAIN error for F_GETLK

Michael Kerrisk

Add NOTES subhead for record locking and NFS

Michael Kerrisk [NeilBrown]

Note treatment of locks when an NFS client loses contact with the server

Michael Kerrisk [Jeff Layton]

nfsv4leasetime controls the "contact lost" interval for NFSv4

flock.2

Michael Kerrisk

In some modern BSDs, fcntl() and flock() locks do interact

So, reword and extend the discussion of this topic in NOTES.

Michael Kerrisk

Move NOTES text describing implementation of flock()

Michael Kerrisk [NeilBrown]

Add more details on NFS, including Linux 2.6.37 changes

Also: move NOTES text describing interaction of fcntl()
and flock() locks.

fork.2

Michael Kerrisk

Add notes on inheritance

of flock() and OFD locks across fork()

lseek.2

Michael Kerrisk

Add reference to open(2) for discussion of file descriptors and OFDs

open.2

Michael Kerrisk

Rework and extend the discussion of open file descriptions

open_by_handle_at.2

Rasmus Villemoes

Add reference to feature_test_macros(7)

recvmmsg.2

Rasmus Villemoes

Add reference to feature_test_macros(7)

remap_file_pages.2

Michael Kerrisk [Kirill A. Shutemov]

Note that `remap_file_pages()` is deprecated

sendmmsg.2

Rasmus Villemoes

Add reference to `feature_test_macros(7)`

seteuid.2

Michael Kerrisk

`seteuid()` and `setegid()` are implemented as library functions

Michael Kerrisk

Error checking should always be performed, even when caller is UID 0

setresuid.2

Michael Kerrisk

Document EAGAIN error that can occur after kernel `alloc_uid()` failure

Michael Kerrisk

Since Linux 3.1, the EAGAIN case for `RLIMIT_NPROC` no longer

occurs

Michael Kerrisk

Correct the description of the EAGAIN error

Michael Kerrisk

Error checking should always be performed, even when caller is UID 0

setreuid.2

Michael Kerrisk

Document EAGAIN error that can occur after kernel `alloc_uid()` failure

Michael Kerrisk

Error checking should always be performed, even when caller is UID 0

Michael Kerrisk

Add EAGAIN error for hitting `RLIMIT_NPROC` limit

Michael Kerrisk

Since Linux 3.1, the EAGAIN case for `RLIMIT_NPROC` no longer occurs

setuid.2

Michael Kerrisk

Document EAGAIN error that can occur after kernel `alloc_uid()` failure

Michael Kerrisk

Correct the description of the EAGAIN error

Michael Kerrisk

Error checking should always be performed, even when caller is UID 0

Michael Kerrisk

Since Linux 3.1, the EAGAIN case for `RLIMIT_NPROC` no longer occurs

statfs.2

Cyril Hrubis

Update MAGIC constants

Most of the updates are taken from /usr/include/linux/magic.h,
some were found by grepping the Linux source code.

Cyril Hrubis [Michael Kerrisk]

fstafs(2) was broken on file descriptors from pipe(2)

syscalls.2

Michael Kerrisk

Note that remap_file_pages() is deprecated

basename.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions basename() and dirname() are thread safe.

catgets.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function catgets() is thread safe.

getdate.3

Rasmus Villemoes

Use blank definition of _GNU_SOURCE in example program

getdirentries.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function getdirentries() is thread safe.

getdtablesize.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function getdtablesize() is thread safe.

iconv.3

Qian Lei

[Peng Haitao]

ATTRIBUTES: Note function that is thread-safe

The function iconv() is thread safe.

Michael Kerrisk

SEE ALSO: add iconvconfig(8)

lockf.3

Qian Lei [Peng Haitao]

ATTRIBUTES: Note function that is thread-safe

The function lockf() is thread safe.

malloc_get_state.3

Rasmus Villemoes

SYNOPSIS: use correct header

The nonstandard functions `malloc_set_state()` and `malloc_get_state()` are provided by `<malloc.h>` not `<stdlib.h>`.

`malloc_usable_size.3`

Qian Lei

ATTRIBUTES: Note function that is thread-safe

The function `malloc_usable_size()` is thread safe.

`matherr.3`

Qian Lei [Peng Haitao]

ATTRIBUTES: Note function that is thread-safe

The function `matherr()` is thread safe.

`mkdtemp.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `mkdtemp()` is thread safe.

`mkstemp.3`

Peng Haitao

ATTRIBUTES:

Note functions that are thread-safe

The functions `mkstemp()`, `mkostemp()`, `mkstemp()` and `mkostemp()` are thread safe.

`mq_close.3`

Qian Lei

ATTRIBUTES: Note function that is thread-safe

The function `mq_close()` is thread safe.

`mq_getattr.3`

Qian Lei

ATTRIBUTES: Note function that is thread-safe

The functions `mq_getattr()` and `mq_setattr()` are thread safe.

`mq_open.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `mq_open()` is thread safe.

`mq_receive.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `mq_receive()` and `mq_timedreceive()` are thread safe.

`mq_send.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `mq_send()` and `mq_timedsend()` are thread safe.

`mq_unlink.3`

Qian Lei

ATTRIBUTES: Note function that is thread-safe

The function `mq_unlink()` is thread safe.

`posix_fallocate.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `posix_fallocate()` is thread safe.

`posix_openpt.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `posix_openpt()` is thread safe.

`siginterrupt.3`

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function `siginterrupt()` is not thread safe.

`system.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `system()` is thread safe.

`charmap.5`

Marko Myllynen

Update to match current glibc

`charmap(5)` was outdated, bring it to closer to reality by fixing syntax descriptions to match current glibc code and practices, adding missing options, removing obsolete comments and references, and removing now incorrect examples.

`locale.5`

Marko Myllynen

Clarify AM/PM settings a bit

`localedef(1)` complains if really undefined, should be empty instead.

Also: add some SEE ALSO references.

Marko Myllynen

Document glibc conventions regarding days and week

Based on existing practice and glibc community wiki page at <https://sourceware.org/glibc/wiki/Locales>

proc.5

Michael Kerrisk [Jan Chaloupka, Walter Harms]

Add a brief description of /proc/fs

repertoiremap.5

Marko Myllynen

New page for repertoiremap(5)

Rather obsolete feature but localedef(1) refers to repertoiremaps.

bootparam.7

Petr Gajdos

Describe 'rootflags' and 'rootdelay' kernel parameters

Patch based on text from Documentation/kernel-parameters.txt

charsets.7

Marko Myllynen

Update to reflect past developments

Rewrite the introduction to make Unicode's prominence more obvious.

Reformulate parts of the text to reflect current Unicode world.

Minor clarification

for ASCII/ISO sections, some other minor fixes.

Marko Myllynen

List CJK encodings in the order of C, J, K

environ.7

Michael Kerrisk

SEE ALSO: add env(1), printenv(1), ld.so(8)

locale.7

Marko Myllynen

Add some SEE ALSO references

man-pages.7

Michael Kerrisk

Note that .TH 'date' field is nowadays automatically updated by scripts

signal.7

Michael Kerrisk

Describe EINTR semantics for recvmsg(2)

Michael Kerrisk

Clarify text describing EINTR semantics for socket interfaces

unicode.7

Marko Myllynen

Update to reflect past developments

The unicode(7) page will look more modern with few small changes:

- drop old BUGS section, editors cope with UTF-8 ok these days,

- and perhaps the state-of-the-art is better described elsewhere anyway than in a man page
- drop old suggestion about avoiding combined characters
- refer to LANANA

for Linux zone, add registry file reference

- drop a reference to an inactive/dead mailing list
- update some reference URLs

utf-8.7

Marko Myllynen

Drop an old comment about UTF-8 replacing ISO 8859

And add locale(1) under SEE ALSO.

===== Changes in man-pages-3.70 =====

Released: 2014-07-08, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Yuri Kozlov <yuray@komyakino.ru>
<kirillnow@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

sprof.1

Michael Kerrisk [Marko Myllynen]

New page for the glibc sprof(1) command

Newly documented interfaces in existing pages

epoll_ctl.2

NeilBrown

Document EPOLLWAKEUP

epoll.7

NeilBrown

Document EPOLLWAKEUP

Changes to individual pages

iconv.1

iconvconfig.8

Marko Myllynen

Clarify gconv file terminology a bit

ldd.1

Michael Kerrisk

SEE ALSO: add sprof(1)

connect.2

Michael Kerrisk

ERRORS: add EPROTOTYPE

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=708394>

dup.2

Michael Kerrisk [Rich Felker]

Fix erroneous discussion regarding closing 'newfd' before calling dup2()

And propose a workaround

if the caller cares about catching

close() time errors.

See http://stackoverflow.com/questions/23440216/race-condition-when-using-dup2#comment36888604_23444465

and <http://austingroupbugs.net/view.php?id=411>

Michael Kerrisk

Rework and enhance discussion of dup2()

In particular, note that dup2() performs the steps of closing

and reusing 'newfd' atomically.

Michael Kerrisk

Add subhead for dup3()

epoll_ctl.2

Michael Kerrisk

BUGS: EPOLLWAKEUP is silently ignored without CAP_BLOCK_SUSPEND

If the caller does not have CAP_BLOCK_SUSPEND, then EPOLLWAKEUP is silently ignored.

fcntl.2

Michael Kerrisk [Tomi Salminen]

The return value for F_SETPPIPE_SZ is the pipe capacity

Michael Kerrisk

ERRORS: Document ENOTDIR error for F_NOTIFY

Michael Kerrisk

Use proper page cross-references in F_NOTIFY discussion

Michael Kerrisk

Suggest the

use of real-time signals with F_NOTIFY

getitimer.2

Michael Kerrisk

Rewrite a few pieces to clarify some details

inotify_add_watch.2

Michael Kerrisk

Clarify that the target of a watch is an i-node

The target of a watch is an i-node, not a pathname. Clarify the text to prevent the reader possibly misunderstanding that establishing watches by two different links to the same file might create different watch descriptors.

open.2

Michael Kerrisk []

O_CLOEXEC is also one the flags not ignored when O_PATH is specified

pipe.2

Elie De Brauer

PIPE_BUF is defined in limits.h

To make use of PIPE_BUF in an application one should include <limits.h>. Adding a reference to this inclusion.

poll.2

Michael Kerrisk [Nadav Har'El]

The negate-fd-to-ignore technique does not work for file descriptor 0

See https://bugzilla.kernel.org/show_bug.cgi?id=79411

set_tid_address.2

Michael Kerrisk [Rich Felker]

Use "thread" rather than "process" in DESCRIPTION

Michael Kerrisk

SEE ALSO: add gettid(2)

shmop.2

Michael Kerrisk

Explain SHMLBA in much more detail

splice.2

Michael Kerrisk

Document EAGAIN error

See https://bugzilla.kernel.org/show_bug.cgi?id=48641

syscalls.2

Carlos O'Donnell

Add prlimit64(2)

While trying to reconcile the new features in glibc with the documented entries in the linux kernel man pages I noticed that glibc exports prlimit64 for use by 32-bit applications (as does the linux kernel), but that prlimit64 was not defined in the syscalls list or in the prlimit-related page.

This is not the complete fix for this, but I don't have the time to explain why and when prlimit64 should be used (or how it should be used safely). Therefore I'm just patching the syscalls.2

list

to show that prlimit64 exists and was added in 2.6.36 (verified with git by checking out the tags before and after).

syslog.2

Michael Kerrisk

Rework introductory paragraph

Michael Kerrisk [Robert P. J. Day]

Rework text describing loglevels

The kernel header file mentioned in the discussion of the KERN_* constants has morphed and is no longer exported inside glibc. And the definitions of the constants themselves changed subtly with kernel commit 04d2c8c83d0e3ac5f78aeede51babb3236200112. So, rewrite the description of the constants to be a bit more abstract.

Michael Kerrisk

Rewrite parts of the page, and import /proc/sys/kernel/printk

- * Move /proc/sys/kernel/printk from proc(5) to this page, and correct various details in the discussion of that file.
- * Rewrite and correct various other details on the page.

* Clean out some crufty text.

* Miscellaneous minor fixes.

Michael Kerrisk

Update SYSLOG_ACTION_CONSOLE_OFF + SYSLOG_ACTION_CONSOLE_ON description
Details changed in Linux 2.6.32

tee.2

Michael Kerrisk

Document EAGAIN error

See https://bugzilla.kernel.org/show_bug.cgi?id=48641

vmsplice.2

Michael Kerrisk

Document EAGAIN error

See https://bugzilla.kernel.org/show_bug.cgi?id=48641

ether_aton.3

Michael Kerrisk

Make description of ether_line() bug a little more informative

malloc.3

Michael Kerrisk [Florian Weimer]

MALLOC_MMAP_THRESHOLD_ and MALLOC_MMAP_MAX_ *do* work in setgid programs

My testing on this point was bogus, overlooking details of
strace(1)'s behavior with setuid programs.

See https://sourceware.org/bugzilla/show_bug.cgi?id=12155

printf.3

Michael Kerrisk [Rich Felker]

Remove libc4 and libc5 details

Rich Felker noted that "scare text" in the man page warned about
the use of snprintf() on libc, and that some people had cited
this as a reason not to use snprintf(). Linux libc is now
ancient history, so there is no real need to keep that text.
But, while we're at it, we may as well clear out all of the
other ancient libc4 and libc5 pieces in the page. They are
nowadays more clutter than help.

Michael Kerrisk

SUSv3 and later agree with C99 for the snprintf() return value

Determined by inspection of the SUSv3 and SUSv4 specifications.

Michael Kerrisk

Remove some old text about glibc 2.0 changes

We probably don't now need such ancient info.

Michael Kerrisk

Update references to standards for C and S conversion specifiers

profil.3

Michael Kerrisk

SEE ALSO: add sprof(1)

charmap.5

Marko Myllynen

Various minor updates and improvements

- more precise title
- extend description a bit
- document previously omitted WIDTH_DEFAULT

Marko Myllynen

Remove accidental ISO C compliance reference

glibc refers in locale/programs/charmap.c to ISO C 99 section 7.17.(2) and ISO C 99 section 5.2.1.(3) that if a character map is not ASCII compatible then the locale using it is not ISO C compliant. This does not state anything about the character set itself.

proc.5

Michael Kerrisk

Replace /proc/sys/kernel/printk discussion with reference to syslog(2)

It makes more sense to have the /proc/sys/kernel/printk with the related material in syslog(2).

Michael Kerrisk

Rewrite /proc/sys/kernel/printk description

inotify.7

Michael Kerrisk

Clarify which events are generated for watched directories

Really, with respect to watched directories, events fall into

three classes (not two, as was shown):

- * Events that can be generated only for the watched directory.
- * Events that can be generated only for objects that are inside the watched directory.
- * Events that can be generated both for the watched directory and for objects inside the directory.

So, mark these three classes more clearly in the list of inotify events.

Heinrich Schuchardt [Michael Kerrisk]

BUGS: Note possible bug triggered by watch descriptor reuse

Watch descriptor IDs are returned by inotify_add_watch().

When calling inotify_rm_watch() an IN_IGNORED is placed on the inotify queue pointing to the ID of the removed watch.

inotify_add_watch() should not return a watch descriptor ID for

which events are still on the queue but should return an unused ID.

Unfortunately, the existing Kernel code does not provide such a guarantee.

Actually, in rare cases watch descriptor IDs are returned by `inotify_add_watch()` for which events are still on the inotify queue.

See https://bugzilla.kernel.org/show_bug.cgi?id=77111

Michael Kerrisk

Add further detail to the watch descriptor reuse bug

As well as `inotify_rm_watch()`, file deletion and unmounting a filesystem can also cause a watch descriptor to be deleted.

Michael Kerrisk

The watch descriptor reuse bug may be hard to hit in practice

Explain the circumstances in detail, indicating that the bug may be very unlikely to occur in practice.

Michael Kerrisk

Clarify description of `IN_EXCL_UNLINK`

Clarify the text a little, in particular making it clearer that the target of a watch is an i-node (not a pathname).

Michael Kerrisk

Clarify `IN_ONESHOT` explanation

Make it clearer that the target of monitoring is an i-node, not a pathname.

Michael Kerrisk

Make comment on 'mask' field more accurate

libc.7

Michael Kerrisk

Clarify man-pages policy on documenting C libraries other than glibc

Michael Kerrisk

Use absolute dates in discussion of libc vs glibc

pipe.7

Elie De Brauwer

Add reference that the pipe capacity can be changed

In `fcntl(2)` `F_SETPIPE_SZ`, `F_GETPIPE_SZ` and `/proc/sys/fs/pipe-max-size` are defined, however `pipe(7)` still defines the pipe capacity as being a static entity. Adding a reference to `fcntl(2)`.

Michael Kerrisk [Walter Harms]

Clarify that since 2.6.35, 65535 bytes is the default pipe capacity

ld.so.8

Michael Kerrisk

Clarify that LD_PROFILE can specify just a single shared object

Michael Kerrisk

Clarify that LD_PROFILE output is appended to target file

The LD_PROFILE

output is appended to any existing

contents of the target file.

Michael Kerrisk

SEE ALSO: add sprof(1)

isfdtype.3

Michael Kerrisk

New page documenting isfdtype(3)

Newly documented interfaces in existing pages

perf_event_open.2

Vince Weaver

Document new comm_exec flag

Linux 3.16 (more specifically, commit 82b897782d10fcc4)
added support for differentiating between process renames
caused by exec versus those caused by other methods.

Vince Weaver

Document new mmap2 record type

Linux 3.16 (more specifically, commit a5a5ba72843dd05f9)
enabled the enhanced mmap2 record support.
The interface was added in Linux 3.12 but disabled until
Linux 3.16.

Vince Weaver

Document PERF_SAMPLE_BRANCH_COND

Linux 3.16 (more specifically, commit bac52139f0b7ab31330)
adds support for gathering PERF_SAMPLE_BRANCH_COND
conditional branch values when doing PERF_SAMPLE_BRANCH_STACK
sampling.

Changes to individual pages

access.2

Michael Kerrisk

Glibc falls back to using access() on kernels that lack faccessat()

bdflush.2

fsync.2

sync.2

proc.5

Adrian Bunk

Change "sync(1)" to "sync(8)"

bind.2

Michael Kerrisk [Ryan Hammonds]

Correct EINVAL

error description

As pointed out by Ryan:

My application is trying to bind an IPv4 UDP socket to an address. I've found that passing an invalid address length to bind() causes bind to return EINVAL. According to the bind(2) manpage, this should only occur when using unix domain sockets (which I am not).

chmod.2

Michael Kerrisk

Glibc falls back to chmod() on kernels that don't support fchmodat()

Michael Kerrisk

Glibc falls back to chown()/lchown() on kernels that lack fchownat()

epoll_wait.2

Michael Kerrisk

NOTES: describe raw epoll_pwait() system call differences

getgroups.2

Michael Kerrisk

SEE ALSO: add group_member(3)

getpriority.2

Michael Kerrisk

Enhance discussion of kernel nice range versus user-space nice range

Michael Kerrisk

Move text describing nice range on other systems

getrlimit.2

Michael Kerrisk

Add cross reference to core(5) in discussion of RLIMIT_CORE

Michael Kerrisk

Describe the "large" resource limit bug on 32-bit platforms

See https://bugzilla.kernel.org/show_bug.cgi?id=5042.

Michael Kerrisk

Glibc's setrlimit() and getrlimit() are implemented using prlimit()

kexec_load.2

Michael Kerrisk

Note limit of 16 for 'nr_segments'

Michael Kerrisk

Clarify the 'flags' bits that contain the architecture

Michael Kerrisk

Add KEXEC_ARCH_68K to list of architectures for 'flags'

Michael Kerrisk

Reword description of 'flags' a little

link.2

Michael Kerrisk

Glibc falls back to link() on kernels that lack linkat()

Unless 'flags' contains AT_SYMLINK_FOLLOW.

mkdir.2

Michael Kerrisk

Glibc falls back to mkdir() on kernels that don't support mkdirat()

perf_event_open.2

Vince Weaver

Clarify PERF_SAMPLE_STACK_USER usage

This clarifies the PERF_SAMPLE_STACK_USER

section.

I found these issue while implementing some code that uses the option. The important change is fixing the name of the sample_stack_user parameter, the rest is just some wording fixes and minor clarifications.

Vince Weaver

Clarify PERF_SAMPLE_DATA_SRC usage

When checking the fields in the PERF_SAMPLE_DATA_SRC type samples you need to shift the masks before doing the compare.

Although the value you are checking (perf_mem_data_src) is specified as a bitfield so this might all fall apart if trying to access the field in a cross-endian way. The Power people were working on this issue, not sure if they resolved it.

poll.2

Michael Kerrisk

Describe fifth argument (sigsetsize) of raw ppoll() system call

process_vm_readv.2

Michael Kerrisk [Ville Ylenius]

Fix typo in example program

readlink.2

Michael Kerrisk

Glibc falls back to readlink() on kernels that lack readlinkat()

recv.2

Michael Kerrisk

'addrlen' should be NULL (not 0) if we don't need sender address

rename.2

Michael Kerrisk

Glibc falls back to rename() when the kernel doesn't have renameat()

sigwaitinfo.2

Michael Kerrisk

The raw sigtimedwait() system call has a fifth argument

symlink.2

Michael Kerrisk

Glibc falls back to symlink() on kernels that lack symlinkat()

sysinfo.2

Michael Kerrisk

Add VERSIONS section

unlink.2

Michael Kerrisk

Glibc falls back to unlink() or rmdir() on kernels that lack unlinkat()

atoi.3

Michael Kerrisk

Downgrade discussion of atoq()

Remove most references to atoq() in this page, since this function was present only in Linux libc (not glibc).

cerf.3

cexp2.3

clog2.3

Michael Kerrisk

Update version number on "Not yet in glibc" sentence

fgetgrent.3

getgrent.3

getgrent_r.3

getgrnam.3

Michael Kerrisk [Rob Landley]

Clarify that 'gr_mem' is a NULL-terminated array of pointers

fseeko.3

Michael Kerrisk

Add VERSIONS section

ftw.3

Michael Kerrisk

Add VERSIONS section

getauxval.3

Michael Kerrisk

Document ENOENT error

And add an entry to BUGS explaining the ambiguity that was present before the addition of this error.

getgrouplist.3

Michael Kerrisk

SEE ALSO: add group_member(3)

getline.3

Rahul Bedarkar

Close opened file at end of example program

memmem.3

Michael Kerrisk

Rewrite text of glibc 2.0 bug

printf.3

Michael Kerrisk [Jakub Wilk]

Clarify details of the %n conversion specifier

See <http://bugs.debian.org/756602>

Michael Kerrisk [Jakub Wilk]

Note use of 'j', 'z', and 't' length modifiers for '%n'

See <http://bugs.debian.org/756602>

Michael Kerrisk

Update with some SUSv3 details

setbuf.3

Michael

Kerrisk

Remove ancient Linux libc and 4.x BSD details

strstr.3

Michael Kerrisk

Remove discussion of Linux libc bugs

Linux libc is old enough that we needn't care any longer.

strtod.3

Michael Kerrisk

Explain NAN(n-char-sequence)

strtod.3

Michael Kerrisk

SEE ALSO: add nan(3), nanf(3), NANL(3)

updwtmp.3

Michael Kerrisk

Replace AVAILABILITY section with note to link logwtmp() using -lutil

Linux libc details are no longer needed these days.

core.5

Rahul Bedarkar

Close opened file in example program

proc.5

Michael Kerrisk

Fix kernel version numbers for /proc/PID/stat fields

proc.5

Jan Chaloupka

Add missing proc stats fields

Adding missing proc stats fields from

<https://www.kernel.org/doc/Documentation/filesystems/proc.txt>

Michael Kerrisk [Simon Paillard]

Remove crufty text under 'timer_stats'

Michael Kerrisk

Update /proc/PID/stat

'state' field documentation

Michael Kerrisk

Improve description of /proc/PID/stat fields added in Linux 3.3 and 3.5

Michael Kerrisk

Refer to getauxval(3) in discussion of /proc/PID/auxv

Michael Kerrisk

Rework formatting of /proc/PID/stat list

Make the field numbers more prominent.

Michael Kerrisk

Note that /proc/PID/cmdline is read-only

Michael Kerrisk

Rework discussion of CommitLimit and /proc/sys/vm/overcommit_memory

Michael Kerrisk

Improve discussion of /proc/sys/vm/overcommit_ratio

charsets.7

David Prévot [Marko Myllynen]

Tidy up list

Remove German from main list, to be consistent with earlier removal of Dutch and French (in commit a8ed5f7430e0d1).

inotify.7

Michael Kerrisk

Note that IN_ONLY_DIR can be used to avoid races

Michael Kerrisk

Note that insertion of IN_MOVED_FROM+IN_MOVED_TO pair is not atomic

Michael Kerrisk

Mention use of timeout when reading IN_MOVED_TO after IN_MOVED_FROM

man-pages.7

Michael Kerrisk

Add description of "C library/kernel ABI differences" subsection

Michael Kerrisk

Rework text describing sections (stylistic improvements)

vdso.7

Mike Frysinger

Add new i386 vdso symbols in Linux 3.15

Michael Kerrisk

Note kernel version that exports new i386 symbols (Linux 3.15)

===== Changes in man-pages-3.72 =====

Released: 2014-09-07, Mountain View

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

New page for glibc memusagestat(1) command

mtrace.1

Peter Schiffer [Jan Chaloupka]

New page describing the glibc mtrace(1) command

Changes to individual pages

connect.2

Michael Haardt

Note that a new socket should be used if connect() fails

fcntl.2

Michael Kerrisk

One must define `_GNU_SOURCE` to get the `F_OFD_*` definitions

poll.2, select.2

Rusty Russell

Fix erroneous description of "available for write".

POSIX says: "POLLOUT Normal data may be written without blocking.". This "may" is misleading, see the POSIX

write page:

Write requests

to a pipe or FIFO shall be handled in the

same way as a regular file with the following exceptions:

...

If the `O_NONBLOCK` flag is clear, a write request may cause the thread to block, but on normal completion it shall return `nbyte`.

...

When attempting to write to a file descriptor (other than a

pipe or FIFO) that supports non-blocking writes and cannot accept the data immediately:

If the `O_NONBLOCK` flag is clear, `write()` shall block the calling thread until the data can be accepted.

If the `O_NONBLOCK` flag is set, `write()` shall not block the thread. If some data can be written without blocking the thread, `write()` shall write what it can and return the number of bytes written. Otherwise, it shall return `-1` and set `errno` to `[EAGAIN]`.

The net result is that `write()` of more than 1 byte on a socket, pipe or FIFO which is "ready" may block: `write()` (unlike `read!`) will attempt to write the entire buffer and only return a short write under exceptional circumstances.

Indeed, this is the behaviour we see in Linux:

<https://github.com/rustyrussell/ccan/commit/897626152d12d7fd13a8feb36989eb5c8c1f3485>

<https://plus.google.com/103188246877163594460/posts/BkTGMHDFgZ>

errno.3

Michael Kerrisk

SEE ALSO: `add_errno(1)`

rtnetlink.3

Holger Hans Peter Freyther

Fix parameters for the `send()` call in the example

inotify.7

Michael Kerrisk

`IN_OPEN` and `IN_CLOSE_NOWRITE` can also occur for directories

Michael Kerrisk

`IN_CLOSE_WRITE` occurs only for files (not monitored directory)

Michael Kerrisk

`IN_MODIFY` is generated for files only (not monitored directories)

Michael Kerrisk

`IN_ACCESS`

occurs only for files inside directories

`IN_ACCESS` does not occur for monitored directory.

packet.7

Sorin Dumitru

Fix include file

It looks like most of the socket options from this man pages are not defined in `<netpacket/packet.h>`. They are defined in `<linux/if_packet.h>` so we should include that one.

Serge Hallyn]
New page describing PID namespaces

user_namespaces.7

Michael Kerrisk [Eric W. Biederman, Andy Lutomirski, Serge Hallyn]
New page describing user namespaces.

Newly documented interfaces in existing pages

clone.2

Eric W. Biederman [Michael Kerrisk]

Document CLONE_NEWUSER for creating a new user namespace

setns.2

Eric W. Biederman, Michael Kerrisk

Document the PID, user, and mount namespace support

Document CLONE_NEWPID,
CLONE_NEWUSER, and CLONE_NEWNS flags.

unshare.2

Michael Kerrisk [Eric W. Biederman]

Document CLONE_NEWPID

Michael Kerrisk [Eric W. Biederman]

Document CLONE_NEWUSER

Michael Kerrisk

Document CLONE_THREAD, CLONE_SIGHAND, and CLONE_VM

Changes to individual pages

clone.2

Michael Kerrisk

Move some CLONE_NEWNET text to namespaces.7

Michael Kerrisk

Move some CLONE_NEWUTS text 2 to namespaces.7

Michael Kerrisk

Move some CLONE_NEWIPC text to namespaces.7

Michael Kerrisk

Reword discussion of CLONE_NEWNS, removing text also in namespaces(7)

Michael Kerrisk

Standardize text on CLONE_NEW* flags and CAP_SYS_ADMIN

Michael Kerrisk

EINVAL if (CLONE_NEWUSER|CLONE_NEWPID) && (CLONE_THREAD|CLONE_PARENT)

Michael Kerrisk

Add more detail on the meaning of CLONE_SYSVSEM

flock.2

Michael Kerrisk [J. Bruce Fields]

Don't mention "classical BSD"

in discussion of fcntl()/flock interaction

The noninteraction of flock(2) and fcntl(2) locks does
not seem to be classical BSD semantics (at least, checking

the 4.4BSD sources suggest that the lock types do interact, although there have been other systems also where `fcntl()` and `flock()` locks do not interact). So, fix the text discussing "classical BSD" lock semantics.

getunwind.2

Michael Kerrisk [Yuri Kozlov]

Fix description of return value

s/size of unwind table/size of the unwind data/

mount.2

Eric W. Biederman

Clarify use of 'mountflags' and 'data' for MS_REMOUNT

reboot.2

Michael Kerrisk [Justin Cormack, Eric W. Biederman]

Document effect of `reboot()` inside PID namespaces

semop.2

Michael Kerrisk

Refer to `clone(2)` for semantics of `CLONE_SYSVSEM` and `semadj` lists

seteuid.2

setgid.2

setresuid.2

setreuid.2

setuid.2

Michael Kerrisk

EINVAL

can occur if UID/GID is not valid in caller's user namespace

setns.2

Michael Kerrisk [Eric W. Biederman]

Clarify capabilities required for reassociating with a mount namespace

Michael Kerrisk

Specify kernel version on each `CLONE_NEW*` flag

And remove text on flags from `VERSIONS`.

unshare.2

Michael Kerrisk

Add an example program

Michael Kerrisk

Clarify semantics of `CLONE_SYSVSEM`

Michael Kerrisk

`CLONE_SYSVSEM` does not require `CAP_SYS_ADMIN`

Michael Kerrisk

Note flags implied by `CLONE_THREAD` and `CLONE_VM`

clock.3

Michael Kerrisk [Vincent Lefevre]

The implementation uses clock_gettime() was to improve *accuracy*
(The man page text mistakenly used the word "precision".)

drand48.3

Michael Kerrisk [Lorenzo Beretta]

Remove crufty text about SVID 3 marking drand48() obsolete
See <http://bugs.debian.org/758293>

proc.5

Michael Kerrisk

Move /proc/[pid]/mounts

text to namespaces.7

Michael Kerrisk

Move /proc/[pid]/mountstats text to namespaces.7

capabilities.7

Michael Kerrisk

Refer reader to user_namespaces(7) for a discussion of capabilities

Michael Kerrisk

Document CAP_SETUID and CAP_SETGID for user namespace mappings

Michael Kerrisk

setns() needs CAP_SYS_ADMIN in the *target* namespace

Michael Kerrisk

Since Linux 3.8, user namespaces no longer require CAP_SYS_ADMIN

mq_overview.7

Michael Kerrisk

Refer to namespaces(7) for info on POSIX MQs and IPC namespaces

svipc.7

Michael Kerrisk

Refer to namespaces(7) for info on System V IPC and IPC namespaces

==== Changes in man-pages-3.74 =====

Released: 2014-10-03, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Arto

Bendiken <arto@bendiken.net>
Ben Hutchings <ben@decadent.org.uk>
Benjamin Herr <ben@0x539.de>
C. Alex North-Keys <erlkonig@talisman.org>
Carlos O'Donnell <carlos@redhat.com>
Cyril Hrubis <chrubis@suse.cz>
Davidlohr Bueso <dave@stgolabs.net>
Doug Ledford <dledford@redhat.com>
Elie De Brauwere <eliedebrauwere@gmail.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Jonny Grant <jg@jguk.org>
Lanchon <lanchon@gmail.com>
Manfred Spraul <manfred@colorfullife.com>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Shriramana Sharma <samjnaa@gmail.com>
Thomas Mack <mack@ifis.cs.tu-bs.de>
Wieland Hoffmann <themineo@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

pldd.1

Michael Kerrisk

New page for pldd(1) command added to glibc in version 2.15

cp1252.7

Marko Myllynen

New page documenting CP 1252

CP 1252 is probably one of the most used Windows Code Pages so

let's add a page for it

alongside with the already provided

CP 1251 page.

Table generated from /usr/share/i18n/charmaps/CP1252.

Newly documented interfaces in existing pages

mq_overview.7

Michael Kerrisk

Document /proc/sys/fs/mqueue/msgsize_default

Michael Kerrisk

Changes to individual pages

ldd.1

Michael Kerrisk

SEE ALSO: add pldd(1)

execve.2

Michael Kerrisk [C. Alex North-Keys]

Remove unneeded ".sh" extension in interpreter script example

See https://bugzilla.kernel.org/show_bug.cgi?id=84701

fanotify_init.2

Heinrich Schuchardt

BUGS: O_CLOEXEC is ignored

Michael Kerrisk [Heinrich Schuchardt]

The 'event_f_flags' failure to check invalid flags was fixed in 3.15

fanotify_mark.2

Michael Kerrisk

Note that various bugs were fixed in Linux 3.16

getrlimit.2

Michael Kerrisk

[Doug Ledford]

Since Linux 3.5, the accounting formula for RLIMIT_MSGQUEUE has changed

open.2

Michael Kerrisk [Shriramana Sharma]

Fix number and formula in description of EOVERFLOW error

readlink.2

Michael Kerrisk [Ben Hutchings]

Fix description of readlinkat() with empty 'pathname'

Michael Kerrisk

SEE ALSO: add realpath(3)

sched_setattr.2

sched_setscheduler.2

Michael Kerrisk

SEE ALSO: add chrt(1)

shmget.2

Manfred Spraul [Michael Kerrisk, Davidlohr Bueso]

Update for increase of SHMALL and SHMMAX

The default values of SHMALL and SHMMAX have been increased.

syscalls.2

Michael Kerrisk

Add 3 new system calls added in Linux 3.17

vmsplice.2

Cyril Hrubis

vmsplice() does not fail when nr_segs==0

This nr_segs==0 case is no-op; the call succeeds and no EINVAL error is returned.

dlopen.3

Michael Kerrisk

SEE ALSO: add pldd(1)

fseeko.3

Michael

Kerrisk [Thomas Mack]

_FILE_OFFSET_BITS must be defined before including any header file

getgrent.3

Carlos O'Donell

Add ENOENT and EAGAIN to error list

mq_getattr.3

Michael Kerrisk

Add an example program

The example program can be used to discover the default 'mq_maxmsg' and 'mq_msgsize' values used to create a queue with a mq_open(3) call in which 'attr' is NULL.

mq_open.3

Michael Kerrisk

Two /proc files control the defaults for the attr==NULL case

Refer the reader to the discussion in mq_overview(7) for a discussion of these files, which exist since Linux 3.5.

realpath.3

Michael Kerrisk

SEE ALSO: add realpath(1)

proc.5

Elie De Brauwere

Document /proc/buddyinfo

This patch adds a short description about the contents of /proc/buddyinfo and how this file can be used to assist in checking for memory fragmentation issues.

Michael Kerrisk

Mention pmap(1) in discussion of /proc/PID/smmaps

armSCII-8.7

Marko Myllynen

Charset pages unification, minor cleanups

ascii.7

Marko Myllynen

Charset pages unification, minor cleanups

This and [the related *.7] patches will provide unification of charset pages, minor cleanups, and some unifying cosmetic changes. References are adjusted so that all pages include a reference to charsets(7), which contains a description of these sets, stray comments are removed, some obsolete statements (like ISO 8859-1 being the de-facto ASCII replacement) are removed, and some minor reformatting to minimize diff's between the pages are done.

The actual substance, the character tables, remain unchanged.

This series changes the following pages (under man7): ascii, armSCII, cp1251, koi8-r, koi8-u, and all of iso_8859-.*.

cp1251.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-10.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-11.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-13.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-14.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-15.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-16.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-1.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-2.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-3.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-4.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-5.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-6.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-7.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-8.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-9.7

Marko Myllynen

Charset pages unification, minor cleanups

koi8-r.7

Marko Myllynen

Charset pages unification, minor cleanups

- remove stray comments, streamline description (charsets(7) and Wikipedia provide more detailed and up-to-date description)
- list differences between koi8-r.7 vs koi8-u.7

koi8-u.7

Marko Myllynen

Charset pages unification, minor cleanups

- remove stray comments, streamline description (charsets(7) and Wikipedia provide more detailed and up-to-date description)
- list differences between koi8-r.7 vs koi8-u.7

mq_overview.7

Michael Kerrisk

Update queues_max

details for Linux 3.14

And in general rework the text a little.

Michael Kerrisk

Update discussion of HARD_MSGMAX

The limit has changed in 2.6.33 and then again in 3.5.

Michael Kerrisk [Arto Bendiken]

Update details for 'queues_max' limit

Things changed in Linux 3.5.

See <https://bugs.launchpad.net/bugs/1155695>

Michael Kerrisk

Update details on defaults and ceiling for 'msgsize_max' limit

Michael Kerrisk

Rework discussion of HARD_MSGMAX

Michael Kerrisk [Davidlohr Bueso]

Various fixes after review from Davidlohr Bueso

sched.7

Michael Kerrisk

SEE ALSO: add taskset(1)

ld.so.8

Michael Kerrisk

SEE ALSO: add pldd(1)

Michael Kerrisk

SEE ALSO: add dlopen(3)

Michael Kerrisk

SEE ALSO: add ld(1)

==== Changes in man-pages-3.75 =====

Released: 2014-10-15, Düsseldorf

Contributors

The following
people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Jonny Grant <jg@jguk.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Robert Schweikert <rjschwei@suse.com>
Tetsuo Handa <penguin-kernel@i-love.sakura.ne.jp>
Walter Harms <wharms@bfs.de>

Apologies if I missed anyone!

New and rewritten pages

pthread_rwlockattr_setkind_np.3

Robert Schweikert [Michael Kerrisk]

New page documenting pthread_rwlockattr_[sg]etkind_np(3)
Documents pthread_rwlockattr_setkind_np(3) and
pthread_rwlockattr_getkind_np(3).

New and changed links

pthread_rwlockattr_getkind_np.3

Robert Schweikert

New link to pthread_rwlockattr_setkind_np(3)

Changes to individual pages

readlink.2

Michael Kerrisk [Jonny Grant]

Add free() call to example program

readv.2

Michael Kerrisk

The raw readv() and pwritev() syscalls split 'offset' into 2 arguments

signal.7

Michael Kerrisk

pthread_mutex_lock() and pthread_cond_wait() are restartable
pthread_mutex_lock(), pthread_cond_wait(), and related APIs are

automatically restarted if interrupted by a signal handler.

unix.7

Michael Kerrisk [Carlos O'Donell, David Miller, Tetsuo Handa]

Various additions and rewordings

Notable changes:

- * Clarify some details for pathname sockets.
- * Add some advice on portably coding with pathname sockets.
- * Note the "buggy" behavior for pathname sockets when the supplied pathname is 108 bytes (after a report by Tetsuo Handa).

==== Changes in man-pages-3.76 =====

Released: 2014-12-31, Munich

Apologies if I missed anyone!

New and rewritten pages

adjtimex.2

Laurent Georget

Add fields in struct timex description

This patch updates the man page with the new fields added in struct timex since last edition of the man page.

Laurent Georget [Michael Kerrisk]

Document ADJ_TAI

Michael Kerrisk

Improve description of ADJ_OFFSET_SINGLESHOT

Michael Kerrisk

Add brief documentation of ADJ_MICRO and ADJ_NANO

Michael Kerrisk

Reformat return value list

And remove

numeric values, since they're not needed

Michael Kerrisk

Other 'modes' bits are ignored on ADJ_OFFSET_*

Other bits in 'modes' are ignored if modes contains

ADJ_OFFSET_SINGLESHOT or ADJ_OFFSET_SS_READ.

Michael Kerrisk

Add nanosecond details

Fixes https://bugzilla.kernel.org/show_bug.cgi?id=61171.

Michael Kerrisk

Document ADJ_OFFSET_SS_READ

Michael Kerrisk

Reformat 'times' flags as list

And remove numeric values, since they're not needed.

Michael Kerrisk

Note effect of ADJ_NANO for ADJ_SETOFFSET

Michael Kerrisk

Add comment noting that timex structure contains padding bytes

Michael Kerrisk

Add more details to description of 'tai' field

Michael Kerrisk

Note meaning of "PLL" abbreviation

Michael Kerrisk

Clarify which 'timex' field is used by each 'modes' bit

Michael Kerrisk

Document timex 'status' bits

Michael Kerrisk

Clarify treatment of other 'modes' bits for ADJ_OFFSET_*

Michael Kerrisk

Update RFC number: RFC 5905 obsoletes RFC 1305

Michael Kerrisk

Briefly document ADJ_SETOFFSET

Michael Kerrisk

Note PPS (pulse per second) fields in timex structure

sigreturn.2

Michael Kerrisk

Add (a lot) more detail on the signal trampoline

And rewrite much of the page.

Newly documented interfaces in existing pages

proc.5

Bernhard Walle

Document /proc/thread-self

/proc/thread-self has been introduced in Linux 3.17 with
commit 0097875bd41528922fb3bb5f348c53f17e00e2fd.

Sven Hoexter [Michael Kerrisk, Kamezawa Hiroyuki]

Document "VmSwap" field of /proc/[pid]/status

Florian Westphal

Document /proc/net/netfilter/nfnetlink_queue

Changes to individual pages

localedef.1

Marko Myllynen

Mention default path
for compiled files

clock_nanosleep.2

Michael Kerrisk

Note that 'clock_id' can also be a CPU clock ID

epoll_ctl.2

Michael Kerrisk

Regular files and directories can't be monitored with epoll_ctl()

ioctl.2

Heinrich Schuchardt

Rename 'd' argument to 'fd' in text

In most other manpages file descriptors are called 'fd'.

This patches renames attribute 'd' to 'fd'.

madvise.2

Michael Kerrisk

VERSIONS: Support for madvise() is now configurable

Support for this system call now depends on the

CONFIG_ADVICE_SYSCALLS configuration option.

open.2

Michael Kerrisk

Enhance rationale discussion for openat() and friends

posix_fadvise.2

Mel Gorman

Document the behavior of partial page discard requests

It is not obvious from the interface that "partial page discard"
requests are ignored. It should be spelled out.

Michael Kerrisk [Weijie Yang]

ERRORS:

Since 2.6.16, the kernel correctly deals with the ESPIPE case

Michael Kerrisk

Support for fadvise64() is now configurable

Support for this system call now depends on the

CONFIG_ADVICE_SYSCALLS configuration option.

prctl.2

Andreas Schwab

Correct description of null-termination in PR_GET_NAME and PR_SET_NAME

The size of the process name has always been at most 16 byte
including the null terminator. This also means that the
name returned by PR_GET_NAME is always null-terminated.

Michael Kerrisk

PR_SET_NAME silently truncates strings that exceed 16 bytes

restart_syscall.2

Michael Kerrisk

Add some text explaining why restart_syscall() exists

sched_setaffinity.2

Michael Kerrisk

NOTES: Add paragraph on how to discover set of CPUs available on system

Michael Kerrisk

SEE ALSO: add nproc(1) and lscpu(1)

select.2

Michael Kerrisk

SEE ALSO: add

restart_syscall(2)

semop.2

Michael Kerrisk

Add note that interrupted semtimedop() returns 'timeout' unchanged

Michael Kerrisk

Remove information about semtimedop() EAGAIN that is repeated elsewhere

Michael Kerrisk

Add subsection head for semtimedop()

setsid.2

Michael Kerrisk

Rewrite some pieces and add some details

Among other changes, add an explanation of why setsid() can't be called from a process group leader

sgetmask.2

Michael Kerrisk

Since 3.16, support for these system calls is configurable

Support for these calls is now dependent on the setting of the CONFIG_SGETMASK_SYSCALL option.

sigaction.2

Michael Kerrisk

Document SA_RESTORER

Michael Kerrisk

Add some detail on the sa_restorer field

Michael Kerrisk

SEE ALSO: add sigreturn(2)

splice.2

Michael Kerrisk

Reformat description of 'fd_in' and 'off_in' to improve readability

syscall.2

Michael Kerrisk

SEE ALSO: add errno(3)

syscalls.2

Michael Kerrisk

SEE ALSO: add errno(3)

Michael Kerrisk

3.19 adds execveat()

Michael Kerrisk

Add bpf(2) to list

tee.2

Michael Kerrisk

Add shell session demonstrating use of the example program

tkill.2

Michael Kerrisk [Rich Felker]

Remove bogus text saying tgid==1 makes tkill() equivalent to kill()

abort.3

Michael Kerrisk

Note that SIGABRT is raised as though raise(3) is called

Also note that abort() is POSIX.1-2008 compliant.

cmsg.3

David Wragg

Ensure buf is suitably aligned in sending example

Inspection of the definition of CMSG_FIRSTHDR (both in glibc and the suggested definition in RFC3542) shows that it yields the msg_control field. So when sending, the pointer placed in msg_control should be suitably aligned as a struct cmsghdr.

In the sending example,

buf was declared as a bare char array,

and so is not necessarily suitably aligned.

The solution here involves placing buf inside a union, and is based on the sockets/scm_rights_send.c sample from The Linux Programming Interface "dist" source code collection.

exp10.3

Michael Kerrisk

Before glibc 2.19, exp() did not give ERANGE error on underflow

http://sources.redhat.com/bugzilla/show_bug.cgi?id=6787

ftw.3

Michael Kerrisk

FTW_CHDIR has no effect on the 'fpath' argument passed to fn()

getopt.3

Michael Kerrisk [Jonny Grant]

Ensure that 'nsecs' is used

ilogb.3

Michael Kerrisk [Will Newton]

Since glibc 2.16, ilogb() does correctly diagnose domain errors

memcmp.3

Michael Haardt

Document return value for n==0 case

Michael Haardt

Warn against use of memcmp() for comparing security-critical data

mq_open.3

Michael Kerrisk

Document the O_CLOEXEC

flag

Michael Kerrisk

Place 'flags' constants in alphabetical order

pow.3

Manuel López-Ibáñez

Add note on performance characteristics of pow()

pthread_setschedparam.3

Simon Newton

Fix logic error in example program

The example program will crash if -A is used, since 'attr' is uninitialized.

```
$ ./a.out -A
```

```
*** Error in `./a.out': free(): invalid pointer: 0xb779c3c4 ***
```

```
Aborted (core dumped)
```

Small fixes to example program

sigvec.3

Michael Kerrisk

Starting with version 2.21, glibc no longer exports sigvec()

sysconf.3

Josh Triplett

Document _SC_NGROUPS_MAX

Already documented in getgroups(2), but not in sysconf(3).

termios.3

Michael Kerrisk

SEE ALSO: add tset(1)

tgamma.3

Michael Kerrisk

Since glibc 2.18, errno is correctly set to EDOM when (x == -infinity)

wordexp.3

Carlos O'Donell

Make

it clear that WRDE_NOCMD prevents command substitution

The use of WRDE_NOCMD prevents command substitution. If the flag WRDE_NOCMD is set then no command substitution shall occur and the error WRDE_CMDSUB will be returned if such substitution is requested when processing the words.

The manual page as-is makes it seem like the command substitution occurs, and an error is returned *after* the substitution.

This patch clarifies that.

locale.5

Marko Myllynen

Describe the formats of values

locale(5) describes what a locale should define but doesn't spell out how (in what format). The patch attempts to address this, it also has few trivial additional enhancements.

* Reference to locale(7) for category descriptions.

* Clarify first_workday in NOTES a bit.

* Add upstream BZ reference for two missing LC_ADDRESS fields.

Marko

Myllynen

Fix miscoded character

resolv.conf.5

Jan Chaloupka

Add missing no-tld-query option

Based on commit [1], the no-tld-query option exists for resolv.conf configuration file. Description of this option is provided in [2]. This patch just copies this option into resolv.conf.5 man page. Plus changes 'a' member into 'an' before 'unqualified name as if it ...' on the third line of [2]. Based on [3], this option was added in glibc 2.14 as solving [4] bug.

[1] <https://sourceware.org/git/?p=glibc.git;a=commitdiff;h=f87dfb1f11c01f2ccdc40d81e134cd06b32e28e8>

[2] <http://www.daemon-systems.org/man/resolv.conf.5.html> man page.

[3]

<https://sourceware.org/git/?p=glibc.git;a=blob;f=NEWS;h=952f32af17e7fb49c4c1a305de673a13075bfaf5;hb=f87dfb1f11c01f2ccdc40d81e134cd06b32e28e8>

[4] https://sourceware.org/bugzilla/show_bug.cgi?id=12734

credentials.7

Josh Triplett

Cross-reference getgroups(2)

Since credentials.7 discusses supplementary GIDs, it should reference getgroups(2).

fanotify.7

Heinrich Schuchardt

Allow relative paths in example

The current example code requires passing an absolute path to the mount to be watched.

By passing AT_FDCWD to fanotify_mark it can use both absolute and relative paths.

Heinrich Schuchardt

fallocate(2) creates no events

fallocate(2) should create FAN_MODIFY events but does not.

Heinrich Schuchardt [Michael Kerrisk]

fanotify notifies only events generated on the same mount

Unfortunately, fanotify does not inform listeners for all paths under which a touched filesystem object is visible, but only the listener using the same path as the process touching the filesystem object.

Heinrich Schuchardt

Update BUGS

to note bugs still not fixed in 3.17

I bumped the Linux version number in the BUGS section to 3.17.

inotify.7

Heinrich Schuchardt

fallocate(2) does not trigger inotify events

Calling fallocate(2) does not result in inotify events.

locale.7

Marko Myllynen

Improve LOCPATH description

LOCPATH is ignored by privileged programs.

Add locale archive references.

Add FILES section.

man-pages.7

Michael Kerrisk [Laurent Georget]

Clarify that SEE ALSO entries may refer to pages from other projects

signal.7

Michael Kerrisk

Mention other "slow devices"

Reads from eventfd(2), signalfd(2), timerfd(2), inotify(7), and fanotify(7) file descriptors are also slow operations that are restartable.

Michael Kerrisk

Fix SO_RECVTIMEO/ SO_SENDFDTIMEO confusion in text

Michael Kerrisk

Since Linux 3.8, reads on inotify(7) file descriptors are restartable

Michael Kerrisk

inotify(7) reads no longer show the odd EINTR error after SIGCONT

Since kernel 3.7, reads from inotify(7) file descriptors no longer show the (Linux oddity) behavior of failing with EINTR when the process resumes after a stop signal + SIGCONT.

Michael Kerrisk

SEE ALSO: add sigreturn(2)

unix.7

Michael Kerrisk [Scott Harvey]

Fix buglet in code snippet in BUGS section

ld.so.8

Carlos O'Donell

Add --inhibit-cache option

The dynamic loader has 6 options, only 5 are documented.

This patch documents the sixth option i.e. `--inhibit-cache`.

Jonathan Wakely [Siddhesh Poyarekar]

Correct documentation of \$ORIGIN

As noted by Siddhesh:

The ld.so man page says:

\$ORIGIN (or equivalently \${ORIGIN})

This expands to the directory containing the application executable.

Thus, an application located

in somedir/app could be compiled with

This is incorrect since it expands to the directory containing the DSO and not the application executable. This seems like deliberate behaviour in dl-object.c, so it needs to be fixed in the man page.

See <http://stackoverflow.com/questions/26280738/what-is-the-equivalent-of-loader-path-for-rpath->

===== Changes in man-pages-3.77 =====

Released: 2015-01-10, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>
Alexandre Bique <bique.alexandre@gmail.com>
Andre Majorel <aym-xunil@teaser.fr>
Andy Lutomirski <luto@amacapital.net>
Daniel Borkmann <dborkman@redhat.com>
Dave
Hansen <dave.hansen@intel.com>
Elie De Brauwer <eliedebrauwer@gmail.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Ignat Loskutov <ignat.loskutov@gmail.com>
Jeff Epler <jepler@unpythonic.net>
Jérôme Pouiller <jezz@sysmic.org>
Kees Cook <keescook@chromium.org>
Laurent Georget <laurent.georget@supelec.fr>
Masanari Iida <standby24x7@gmail.com>
Michael Haardt <michael@morja.de>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Richard Cochran <richardcochran@gmail.com>
Stephan Mueller <stephan.mueller@atsec.com>
Troy Davis <troy@yort.com>
Vince Weaver <vincent.weaver@maine.edu>
Will Drewry <wad@chromium.org>

Apologies if I missed anyone!

New and rewritten pages

seccomp.2

Kees Cook, Michael Kerrisk, Will Drewry [Andy Lutomirski]

New page documenting seccomp(2)

Combines documentation from prctl, in-kernel seccomp_filter.txt and dropper.c, along with details specific to the new system call.

Newly documented interfaces in existing pages

netlink.7

Stephan Mueller [Michael Kerrisk]

Add NETLINK_CRYPTO

Changes to individual pages

adjtimex.2

Laurent Georget [Richard Cochran, Jeff Epler]

Clarify the 'ppm scaling' used in struct timex

This patch makes explicit and clarifies the unit used for the fields "freq", "ppsfreq" and "stabil" in struct timex.

Michael Kerrisk [Masanari Iida]

Note that TIME_ERROR is the modern synonym for TIME_BAD

perf_event_open.2

Vince Weaver

Clarify the PERF_FLAG_FD_* flags

This change clarifies the behavior of the PERF_FLAG_FD_OUTPUT and PERF_FLAG_FD_NO_GROUP flags to perf_event_open(), and removes the related FIXME comments.

While writing tests to validate the behavior of these flags I discovered that PERF_FLAG_FD_OUTPUT has been broken

since the

2.6.35 kernel release.

prctl.2

Dave Hansen [Michael Kerrisk]

Add description of Intel MPX calls

The 3.19 kernel will have support for Intel MPX, including a pair of new prctl() calls (PR_MPX_ENABLE_MANAGEMENT and PR_MPX_DISABLE_MANAGEMENT) for enabling and disabling the kernel's management of the "bounds tables". Add a descriptions of the interface.

Michael Kerrisk

Add mention of seccomp(2) under PR_SET_SECCOMP

Michael Kerrisk

Suggest `/proc/PID/status "Seccomp"` as alternative to `PR_GET_SECCOMP`

Michael Kerrisk

`SIGKILL` can also occur `PR_GET_SECCOMP` in `SECCOMP_MODE_FILTER` mode

Kees Cook [Andy Lutomirski]

Document `SECCOMP_MODE_FILTER` vs `EFAULT`

This notes the distinction made between `EINVAL` and `EFAULT` when attempting to use `SECCOMP_MODE_FILTER` with `PR_SET_SECCOMP`.

setns.2

pid_namespaces.7

Mike Frysinger

Elaborate

discussion of the PID namespace descendant limitation

The `setns(2)` man page already mentions that `CLONE_NEWPID` may only be used with descendant namespaces, but this nuance could be listed in a few more places so it is not missed.

shmget.2

Michael Kerrisk [Akihiro Motoki]

Make wording of `SHMALL` description a little clearer

sigaction.2

Michael Kerrisk

Add `siginfo_t` fields for `SECCOMP_RET_TRAP`

memchr.3

strchr.3

Alexandre Bique

Reference `memmem(3)` in `SEE ALSO` section

memcmp.3

Michael Kerrisk [Michael Haardt]

NOTES: add some detail on avoiding `memcmp()` of cryptographic data
Wording largely based on comments from Michael Haardt.

pthread_tryjoin_np.3

Jérôme Pouiller [Michael Kerrisk]

Document `EINVAL` error for `pthread_timedjoin_np()`

mem.4

Elie De Brauer

`/dev/kmem` depends on `CONFIG_DEVMEM`

Elie De Brauer

Correct `/dev/port` group in example

`mem.4` mentions that group for `/dev/port` should be set to `'mem'`

However, all other files (`/dev/mem` and `/dev/kmem`) use the `kmem` group in their examples and on my system `/dev/port` belongs to

kmem. Hence the 'mem' group was probably a typo:

Elie De Brauwier

Add CONFIG_STRICT_DEVMEM

Since 2.6.26 the CONFIG_NONPROMISC_DEVMEM options limits the physical addresses which can be accessed through /dev/mem.

random.4

Heinrich Schuchardt

Describe handling of O_NONBLOCK

/dev/random and /dev/urandom treat O_NONBLOCK differently.

This should be described in the manpage.

Heinrich Schuchardt

Mention PRNG used by urandom

/dev/urandom uses a pseudo-random number generator to replace missing entropy.

proc.5

Michael Kerrisk

Document "Seccomp" field of /proc/PID/status

epoll.7

Michael Kerrisk [Ignat Loskutov]

Use epoll_create1() rather than

epoll_create() in the code example

epoll_create1() is more or less the preferred API for new applications, since it allows for some flags and avoids the misdesigned epoll_create() argument, and so it seems sensible to use that in the example, rather than epoll_create().

tcp.7

Troy Davis

Clarify tcp_tw_recycle on Internet-facing hosts

Clarify that tcp_tw_recycle will break communication with many general-purpose remote Internet hosts (namely, remote NAT devices) even when the Linux device itself is not behind NAT.

==== Changes in man-pages-3.78 =====

Released: 2015-01-22, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>
Alexey Ishchuk <aishchuk@linux.vnet.ibm.com>
Carlos
O'Donnell <carlos@redhat.com>
Christian Seiler <christian@iwakd.de>
Daniel J Blueman <daniel@quora.org>
David Drysdale <drysdale@google.com>
David Herrmann <dh.herrmann@gmail.com>
Elie De Brauwere <eliedebrauwere@gmail.com>
Elliot Hughes <enh@google.com>
Jessica McKellar <jessica.mckellar@gmail.com>
Kees Cook <keescook@chromium.org>
Michael Hayes <mike@aiinc.ca>
Michael Kerrisk <mtk.manpages@gmail.com>
Rich Felker <dalias@aerifal.cx>
Vince Weaver <vincent.weaver@maine.edu>

Apologies if I missed anyone!

New and rewritten pages

execveat.2

David Drysdale, Michael Kerrisk [Rich Felker]
New page for execveat(2)

memfd_create.2

Michael Kerrisk, David Herrmann
New page for memfd_create() system call
Including notes about file sealing

s390_pci_mmio_write.2

Alexey Ishchuk
New page for s390 s390_pci_mmio_write() and s390_pci_mmio_read()
New manual page for the new PCI MMIO memory access system

calls, s390_pci_mmio_write() and s390_pci_mmio_read(),
added for the s390 platform.

Newly documented interfaces in existing pages

fcntl.2

David Herrmann [Michael Kerrisk]
Document F_ADD_SEALS and F_GET_SEALS commands

proc.5

Elie De Brauwer

Document /proc/sys/vm/compact_memory

Michael Kerrisk

Document /proc/sys/fs/nr_open

New and changed links

s390_pci_mmio_read.2

Michael Kerrisk

New link to new s390_pci_mmio_write(2) page

Changes to individual pages

dup.2

Michael Kerrisk

Add reference to RLIMIT_NOFILE for EMFILE error

Michael Kerrisk

Add reference to RLIMIT_NOFILE for EBADF error on 'newfd'.

execve.2

fexecve.3

Michael Kerrisk

SEE ALSO: add execveat(2)

fallocate.2

mmap.2

open.2

truncate.2

write.2

Michael Kerrisk

ERRORS: add EPERM for operation denied by file seal

fcntl.2

Michael Kerrisk

ERRORS: add EBUSY case for F_SETPIPE_SZ

Michael Kerrisk

Add reference to RLIMIT_NOFILE for F_DUPFD EINVAL error on 'arg'.

Michael Kerrisk

ERRORS: add open file description lock error cases

getrlimit.2

Michael Kerrisk

Update text on RLIMIT_NOFILE ceiling to refer to /proc/sys/fs/file-max

mbind.2

Michael Kerrisk [Daniel J Blueman]

Clarify EFAULT text

mmap.2

shmget.2

shm_open.3

Michael Kerrisk

SEE ALSO: add memfd_create(2)

open.2

Michael Kerrisk

Refer to RLIMIT_NOFILE for explanation of EMFILE error

Michael Kerrisk

Add execveat(2) in system call list under "Rationale for openat()"

perf_event_open.2

Vince Weaver

Clarify description of overflow events

Update the perf_event_open manpage to be more consistent when discussing overflow events. It merges the discussion of poll-type notifications with those generated by SIGIO signal handlers.

This addresses the remaining FIXMEs in the document.

Vince Weaver

Remove inaccurate paragraph describing attr.config

Remove an inaccurate paragraph about values in the attr.config field. This information was never true in any released kernel; it somehow snuck into the manpage because it is still described this way in tools/perf/design.txt in the kernel source tree.

Michael Kerrisk

Correct the kernel version number for PERF_COUNT_HW_CACHE_NODE

Michael Kerrisk

Add some kernel version numbers to various fields and constants

ptrace.2

sigaction.2

seccomp.2

Kees Cook

Ptrace and siginfo details

While writing some additional seccomp tests, I realized PTRACE_EVENT_SECCOMP wasn't documented yet. Fixed this, and added additional notes related to ptrace events SIGTRAP details.

readv.2

Michael Kerrisk

Update details
on glibc readv()/writev() wrapper behavior
And add a historical detail about Linux 2.0.

select.2

Michael Kerrisk

Mention RLIMIT_NOFILE as a possible cause of EINVAL error

syscall.2

Kees Cook

Add arm64 and mips

Add mips and arm64 to tables, along with some further
details on these architectures,

syscalls.2

Michael Kerrisk

Add s390_pci_mmio_read(2) and s390_pci_mmio_write(2)

Michael Kerrisk

Note kernel() version that introduced get_kernel_syms()

Note kernel version that introduced ppc_rtas()

Note kernel version that introduced create_module()

Note kernel version that added setup()

Michael Kerrisk

Remove some details for sync_file_range2()

Make the table a bit simpler. The details can anyway be
found in the system call man page.

utimensat.2

Michael Kerrisk [Elliot Hughes]

If both tv_sec fields are UTIME_OMIT, the file need not
exist

As noted by Elliot, if both tv_sec fields are UTIME_OMIT,
utimensat() will return success even if the file does not exist.

errno.3

Michael Kerrisk

The RLIMIT_NOFILE resource limit is a common cause of EMFILE

exec.3

Michael Kerrisk

SEE ALSO: add execveat(2)

fclose.3

Carlos O'Donell

Consistency fix: use "stream" as name for "FILE *" argument

Harmonize all the manual pages to use "stream" for FILE*
instead of randomly using "fp" or "stream." Choosing something
and being consistent helps users scan the man pages quickly

and understand what they are looking at.

fexecve.3

Michael Kerrisk

Rewrite the script+close-on-exec problem as a BUG

Also, add one or two details about this scenario.

Michael Kerrisk

The natural idiom when using fexecve() is to use the close-on-exec flag

fmemopen.3

Michael Kerrisk

Consistency fix: use "stream"
as name for "FILE *" argument

fopencookie.3

Michael Kerrisk

Consistency fix: use "stream" as name for "FILE *" argument

getgrent_r.3

Carlos O'Donell

Consistency fix: use "stream" as name for "FILE *" argument

getline.3

Michael Kerrisk

Consistency fix: use "stream" as name for "FILE *" argument

getmntent.3

Carlos O'Donell

Consistency fix: use "stream" as name for "FILE *" argument

getpw.3

Michael Kerrisk [Carlos O'Donell]

Describe return value when 'uid' is not found

getpwent_r.3

Carlos O'Donell

Consistency fix: use "stream" as name for "FILE *" argument

getspnam.3

Carlos O'Donell

Consistency fix: use "stream" as name for "FILE *" argument

malloc_info.3

Carlos O'Donell

Consistency fix: use "stream" as name for "FILE *" argument

posix_fallocate.3

Michael Kerrisk

Note that posix_fallocate() is implemented using fallocate(2)

putgrent.3

Carlos O'Donnell

Consistency

fix: use "stream" as name for "FILE *" argument

Harmonize all the manual pages to use "stream" for FILE* instead of randomly using "fp" or "stream." Choosing something and being consistent helps users scan the man pages quickly and understand what they are looking at.

locale.5

Akihiro Motoki

Correct variable name

proc.5

Michael Kerrisk

Remove bogus statement about NR_OPEN being a ceiling for file-max

==== Changes in man-pages-3.79 =====

Released: 2015-02-01, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>

Heinrich Schuchardt <xypron.glpk@gmx.de>

J William Piggott <elseifthen@gmx.com>

Masanari Iida <standby24x7@gmail.com>

Michael Kerrisk <mtk.manpages@gmail.com>

Scot Doyle <lkml14@scotdoyle.com>

Sergey

V. Zubkov <cubbi@cubbi.com>

Stephan Mueller <stephan.mueller@atsec.com>

Vince Weaver <vincent.weaver@maine.edu>

Vivek Goyal <vgoyal@redhat.com>

Apologies if I missed anyone!

New and rewritten pages

getrandom.2

Heinrich Schuchardt, Theodore T'so, Michael Kerrisk

New page documenting getrandom(2)

Kernel 3.17 introduces a new system call getrandom(2).

kexec_load.2

Vivek Goyal, Michael Kerrisk

Add documentation of kexec_file_load(2)

Michael Kerrisk, Vivek Goyal

Rewrite and extend documentation of kexec_load().

New and changed links

kexec_file_load.2

Michael Kerrisk

New link to kexec_load.2

Changes to individual pages

personality.2

Michael Kerrisk

SEE ALSO: add setarch(8)

prctl.2

Michael Kerrisk

Unused arguments of PR_MPX_{EN,DIS}ABLE_MANAGEMENT must be zero

reboot.2

Michael Kerrisk

SEE ALSO:

add kexec_load(2)

socket.2

Stephan Mueller

document AF_ALG

Add a reference to the AF_ALG protocol accessible via socket(2).

fflush.3

Michael Kerrisk [Sergey V. Zubkov]

Clarify that flushing of input streams occurs only for seekable files

See https://bugzilla.kernel.org/show_bug.cgi?id=91931

Michael Kerrisk [Sergey V. Zubkov]

POSIX.1-2008 specifies the behavior when flushing input streams

POSIX.1-2001 did not have a specification for input streams,
but POSIX.1-2008 added one.

getopt.3

Michael Kerrisk

SEE ALSO: add getopt(1)

random.3

Heinrich Schuchardt

SEE ALSO: add getrandom(2)

termios.3

Michael Kerrisk

SEE ALSO: add reset(1), setterm(1), tput(1)

tzset.3

J William Piggott

Document behavior when TZ filespec omits the colon

If the TZ filespec omits the leading colon, glibc will parse
it for any valid format, i.e., it will

still work.

J William Piggott

Add description for posixrules file

J William Piggott

Correct system timezone file path

J William Piggott

There are only two TZ formats

tzset(3) currently states that there are three TZ formats. The
first two it lists are actually variations of the POSIX-style
TZ format, of which there are at least five variations.

This patch corrects this to match the POSIX specification of
TZ having only two formats.

J William Piggott

Filespec omitted incorrect

Paragraph three of the DESCRIPTION section says
that when TZ is set, but empty, then UTC is used.

Later it says if the TZ filespec is omitted then the file
/usr/share/zoneinfo/localtime is used. This is incorrect,
it will use UTC in that case as well.

J William Piggott

Fix incorrect TZ string representation

The TZ string

representation indicates that the start/end
rules are required; this is incorrect.

J William Piggott

Add ENVIRONMENT section + other rearrangements

FILES section was overly verbose and included environment variables. Added ENVIRONMENT section, removing ENV VARS from the FILES section.

random.4

Heinrich Schuchardt

SEE ALSO: add getrandom(2)

passwd.5

Michael Kerrisk

SEE ALSO: add chfn(1), chsh(1)

capabilities.7

Michael Kerrisk

SEE ALSO: add setpriv(1)

signal.7

Michael Kerrisk

Add getrandom(2) to list of restartable system calls

Michael Kerrisk

Add F_OFD_SETLKW to list of restartable operations

Vlastimil Babka <vbabka@suse.cz>
Zbigniew Brzezinski <zbigniew.brzezinski@student.put.poznan.pl>

Apologies if I missed anyone!

New and rewritten pages

ioctl_fat.2

Heinrich Schuchardt [Michael Kerrisk]

New man page for the ioctl(2) FAT API

The ioctl(2) system call may be used to retrieve information about the FAT file system and to set file attributes.

madvise.2

Michael Kerrisk

Summary: this page has been significantly reorganised and rewritten

Michael Kerrisk

Recast discussion of 'advice' into two groups of values

madvise() is one of those system calls that has congealed over time, as has the man page. It's helpful to split the discussion of 'advice' into those

flags into two groups:

* Those flags that are (1) widespread across implementations;

(2) have counterparts in `posix_madvise(3)`; and (3) were present in the initial Linux `madvise` implementation.

* The rest, which are values that (1) may not have counterparts in other implementations; (2) have no counterparts in `posix_madvise(3)`; and (3) were added to Linux in more recent times.

Michael Kerrisk

Explicitly list the five flags provided by `posix_fadvise()`

Over time, bit rot has afflicted this page. Since the original text was written many new Linux-specific flags have been added.

So, now it's better to explicitly list the flags that correspond to the POSIX analog of `madvise()`.

Jan Chaloupka [Hugh Dickins, Michael Kerrisk]

Starting with Linux 3.5, more file systems support `MADV_REMOVE`

Michael Kerrisk

Split `EINVAL`

error into separate cases

Michael Kerrisk

Explain `MADV_REMOVE` in terms of file hole punching

Michael Kerrisk

`MADV_REMOVE` can be applied only to shared writable mappings

Michael Kerrisk

`MADV_REMOVE` cannot be applied to locked or Huge TLB pages

Michael Kerrisk [Vlastimil Babka]

Clarify that `MADV_DONTNEED` has effect on pages only if it succeeds

Michael Kerrisk [Vlastimil Babka]

Clarifications for `MADV_DONTNEED`

Michael Kerrisk [Michal Hocko]

Improve `MADV_DONTNEED` description

Michael Kerrisk

`MADV_DONTNEED` cannot be applied to Huge TLB or locked pages

Michael Kerrisk [Vlastimil Babka]

Remove mention of "shared pages" as a cause of `EINVAL` for `MADV_DONTNEED`

Michael Kerrisk [Vlastimil Babka]

Note Huge TLB as a cause of `EINVAL` for `MADV_DONTNEED`

Michael Kerrisk [Minchan Kim]

Add mention of `VM_PFNMAP` in discussion of `MADV_DONTNEED` and `MADV_REMOVE`

Michael Kerrisk

Drop sentence saying that kernel may ignore 'advice'

The sentence creates misunderstandings, and does not really add information.

Michael Kerrisk

Note that some Linux-specific 'advice' change memory-access semantics

Michael Kerrisk

NOTES: Remove crufty text about "command" versus "advice"

The point made in this fairly ancient text is more or less evident from the `DESCRIPTION`, and it's not clear what "standard" is being

referred to.

Michael Kerrisk

Mention POSIX.1-2008 addition of POSIX_MADV_NOREUSE

Michael Kerrisk

Remove "POSIX.1b" from CONFORMING TO

Michael Kerrisk

Move mention of posix_fadvise() from CONFORMING TO to SEE ALSO

Michael Kerrisk

ERRORS: add EPERM error case for MADV_HWPOISON

Michael Kerrisk

Note that madvise() is nonstandard, but widespread

Newly documented interfaces in existing pages

proc.5

Michael Kerrisk

(Briefly) document /proc/PID/attr/socketcreate

Michael Kerrisk

(Briefly) document /proc/PID/attr/keycreate

Michael Kerrisk [Stephen Smalley]

Document /proc/PID/attr/{current,exec,fscreate,prev }

Heavily based on Stephen Smalley's text in

<https://lwn.net/Articles/28222/>

From: Stephen Smalley <sds@epoch.ncsc.mil>

To: LKML and others

Subject: [RFC][PATCH] Process Attribute API for Security Modules

Date: 08 Apr 2003 16:17:52 -0400

Michael Kerrisk

Document /proc/sys/kernel/auto_msgmni

socket.7

David Wilson [Michael Kerrisk]

Document SO_REUSEPORT socket option

New and changed links

get_thread_area.2

Andy Lutomirski

Make get_thread_area.2 a link to rewritten set_thread_area.2 page

Changes to individual pages

time.1

Michael Kerrisk

Make option argument formatting consistent with other pages

access.2

Denys Vlasenko

Explain how access() check treats capabilities

We have users who are terribly confused why their binaries with CAP_DAC_OVERRIDE capability see EACCESS from access() calls, but are able to read the file.

The reason is access() isn't the "can I read/write/execute this file?" question, it is the "(assuming that I'm a setuid binary,) can *the user who invoked me* read/write/execute this file?" question.

That's why it uses real UIDs as documented, and why it ignores capabilities when capability-endorsed binaries are run by non-root (this patch adds this information).

To make users more likely to notice this less-known detail, the patch expands the explanation with rationale for this logic into a separate paragraph.

arch_prctl.2

set_thread_area.2

get_thread_area.2

Andy Lutomirski

Improve TLS documentation

The documentation for set_thread_area was very vague. This improves it, accounts for recent kernel changes, and merges it with get_thread_area.2.

get_thread_area.2 now becomes a link.

While I'm at it, clarify the related arch_prctl.2 man page.

cacheflush.2

Ralf Baechle

Update some portability details and bugs

Michael Kerrisk

Refer reader to BUGS in discussion of EINVAL error

capget.2

Michael Kerrisk

Document V3 capabilities constants

Michael Kerrisk

Rewrite discussion of kernel versions that support file capabilities

File capabilities ceased to be optional in Linux 2.6.33.

clone.2

Peng Haitao

Fix description of CLONE_PARENT_SETTID

CLONE_PARENT_SETTID only stores child thread ID in parent memory.

clone.2

execve.2

Kevin Easton

Document interaction

of execve(2) with CLONE_FILES

This patch the fact that a successful execve(2) in a process that is sharing a file descriptor table results in unsharing the table.

I discovered this through testing and verified it by source inspection - there is a call to unshare_files() early in do_execve_common().

fcntl.2

Michael Kerrisk [Jeff Layton]

Clarify cases of conflict between traditional record and OFD locks

Verified by experiment on Linux 3.15 and 3.19rc4.

fork.2

Michal Hocko

EAGAIN is not reported when task allocation fails

I am not sure why we have:

"EAGAIN fork() cannot allocate sufficient memory to copy the parent's page tables and allocate a task structure or the child."

The text seems to be there from the time when man-pages were moved to git so there is no history for it.

And it doesn't

reflect reality: the kernel reports both

dup_task_struct and dup_mm failures as ENOMEM to the userspace. This seems to be the case from early 2.x times so let's simply remove this part.

Heinrich Schuchardt

Child and parent run in separate memory spaces

fork.2 should clearly point out that child and parent process run in separate memory spaces.

Michael Kerrisk

NOTES: add "C library/kernel ABI differences" subheading

getpid.2

Michael Kerrisk

NOTES: add "C library/kernel ABI differences" subheading

getxattr.2

Michael Kerrisk

Various rewordings plus one or two details clarified

Michael Kerrisk

Add pointer to example in listxattr(2)

killpg.2

Michael Kerrisk

NOTES: add "C library/kernel ABI differences" subheading

listxattr.2

Heinrich Schuchardt

Provide example program

Michael Kerrisk

Reword discussion of size==0 case

Michael

Kerrisk

Add note on handling increases in sizes of keys or values

Michael Kerrisk

Remove mention of which filesystems implement ACLs

Such a list will only become outdated (as it already was).

migrate_pages.2

Jan Stancek

Document EFAULT and EINVAL errors

I encountered these errors while writing testcase for migrate_pages syscall for LTP (Linux test project).

I checked stable kernel tree 3.5 to see which paths return these.

Both can be returned from get_nodes(), which is called from:

```
SYSCALL_DEFINE4(migrate_pages, pid_t, pid, unsigned long, maxnode,  
                const unsigned long __user *, old_nodes,  
                const unsigned long __user *, new_nodes)
```

The testcase does following:

EFAULT

a) old_nodes/new_nodes is area mmaped with PROT_NONE

b) old_nodes/new_nodes is area not mmaped in process address

space, -1 or area that has been just munmmaped

EINVAL

a) maxnodes overflows kernel limit

b) new_nodes contain node, which has no memory or does not exist

or is not returned for `get_mempolicy(MPOL_F_MEMS_ALLOWED)`.

modify_ldt.2

Andy Lutomirski

Overhaul the documentation

This clarifies the behavior and documents all four functions.

Andy Lutomirski

Clarify the `lm` bit's behavior

The `lm` bit should never have existed in the first place. Sigh.

mprotect.2

Mark Seaborn

Mention effect of `READ_IMPLIES_EXEC` personality flag

I puzzled over `mprotect()`'s effect on `/proc/*/maps` for a while yesterday -- it was setting "x" without `PROT_EXEC` being specified.

Here is a patch to add some explanation.

msgget.2

Michael Kerrisk

Add details of `MSGMNI` default value

msgop.2

Michael Kerrisk

Clarify wording of `MSGMAX` and `MSGMNB`

limits

perf_event_open.2

Vince Weaver

Clarify `PERF_EVENT_IOC_REFRESH` behavior

Currently the `PERF_EVENT_IOC_REFRESH` ioctl, when applied to a group leader, will refresh all children. Also if a refresh value of 0 is chosen then the refresh becomes infinite (never runs out).

Back in 2011 PAPI was relying on these behaviors but I was told that both were unsupported and subject to being removed at any time.

(See <https://lkml.org/lkml/2011/5/24/337>)

However the behavior has not been changed.

This patch updates the manpage to still list the behavior as unsupported, but removes the inaccurate description of it only being a problem with 2.6 kernels.

prctl.2

Michael Kerrisk [Bill McConnaughey]

Mention file capabilities in discussion of `PR_SET_DUMPABLE`

Michael Kerrisk

Greatly expand discussion of "dumpable" flag

In particular,

detail the interactions with

/proc/sys/fs/suid_dumpable.

Michael Kerrisk

Reorder paragraphs describing PR_SET_DUMPABLE

Michael Kerrisk

Mention SUID_DUMP_DISABLE and SUID_DUMP_USER under PR_SET_DUMPABLE

Michael Kerrisk

Executing a file with capabilities also resets the parent death signal

ptrace.2

James Hunt

Explain behaviour should ptrace tracer call execve(2)

This behaviour was verified by reading the kernel source and confirming the behaviour using a test program.

Denys Vlasenko

Add information on PTRACE_SEIZE versus PTRACE_ATTACH differences

Extend description of PTRACE_SEIZE with the short summary of its differences from PTRACE_ATTACH.

The following paragraph:

PTRACE_EVENT_STOP

Stop induced by PTRACE_INTERRUPT command, or group-stop, or initial ptrace-stop when a new child is attached (only if attached using PTRACE_SEIZE), or PTRACE_EVENT_STOP if PTRACE_SEIZE was used.

has an editing error (the part after last comma makes no sense).

Removing it.

Mention that legacy post-execve SIGTRAP is disabled by PTRACE_SEIZE.

sched_setattr.2

Michael Kerrisk [Christophe Blaess]

SYNOPSIS: remove 'const' from 'attr' sched_getattr() argument

semget.2

Michael Kerrisk

Note default value for SEMMNI and SEMMSL

semop.2

Michael Kerrisk

Note defaults for SEMOPM and warn against increasing > 1000

sendfile.2

Eric Wong

Caution against modifying sent pages

setxattr.2

Michael Kerrisk

ERRORS: add ENOTSUP for invalid namespace prefix

Michael Kerrisk

Remove redundant text under ENOTSUP error

Michael Kerrisk

Note that zero-length attribute values are permitted

Michael Kerrisk

Rework text describing 'flags' argument

stat.2

Michael Kerrisk

NOTES:

add "C library/kernel ABI differences" subheading

statfs.2

Michael Kerrisk [Jan Chaloupka]

Document the 'f_flags' field added in Linux 2.6.36

Michael Kerrisk

Clarify that 'statfs' structure has some padding bytes

The number of padding bytes has changed over time, as some bytes are used, so describe this aspect of the structure less explicitly.

Tao Ma

Add OCFS2_SUPER_MAGIC

Michael Kerrisk

Use __fsword_t in statfs structure definition

This more closely matches modern glibc reality.

Michael Kerrisk

Add a note on the __fsword_t type

Michael Kerrisk

Document 'f_spare' more vaguely

wait.2

Michael Kerrisk

Note that waitpid() is a wrapper for wait4()

Michael Kerrisk

Note that wait() is a library function implemented via wait4()

wait4.2

Michael Kerrisk

NOTES: add "C library/kernel ABI differences" subheading

encrypt.3

Rob Somers

Improve code example

I (and some others) found that the original example code did not seem to work as advertised. The new code (used by permission of the original author, Jens Thoms Toerring)

was found on comp.os.linux.development.

mktemp.3

Luke Faraone

DESCRIPTION reference to BUGS corrected

mktemp(3)'s DESCRIPTION referenced NOTES, but no such section exists. Corrected to refer to BUGS.

pthread_attr_setschedparam.3

Tobias Herzke

Describe EINVAL in ERRORS

resolver.3

host.conf.5

Simon Paillard

host.conf 'order' option deprecated, replaced by nsswitch.conf(5)

http://www.sourceware.org/bugzilla/show_bug.cgi?id=2389

<http://repo.or.cz/w/glibc.git/commit/b9c65d0902e5890c4f025b574725154032f8120a>

Reported at <http://bugs.debian.org/270368>,

<http://bugs.debian.org/396633>, and <http://bugs.debian.org/344233>.

statvfs.3

Michael

Kerrisk

Document missing 'f_flag' bit values

And reorganize information relating to which flags are in POSIX.1.

Michael Kerrisk [Jan Chaloupka]

statvfs() now populates 'f_flag' from statfs()'s f_flag field

These changes came with glibc 2.13, and the kernel's addition of a 'f_flags' field in Linux 2.6.36.

syslog.3

Michael Kerrisk [Doug Goldstein]

Remove unneeded <stdarg.h>

vsyslog() does not need this.

tzset.3

J William Piggott

Add offset format

tzset.3 does not illustrate the POSIX offset format.

Specifically, there is no indication in the manual

what the optional components of it are.

random.4

Michael Kerrisk

Note maximum number of bytes returned by read(2) on /dev/random

Michael Kerrisk [Mathieu Malaterre]

Since Linux 3.16, reads from /dev/urandom return at most 32 MB

See <https://bugs.debian.org/775328>

and

https://bugzilla.kernel.org/show_bug.cgi?id=80981#c9

core.5

Michael Kerrisk [Bill McConnaughey]

Executing a file that has capabilities also prevents core dumps

Michael Kerrisk

Document "%i" and "%I" core_pattern specifiers

intro.5

Michael Kerrisk

Remove words "and protocols"

There are no protocol descriptions in Section 5. Protocols are in Section 7.

proc.5

Michael Kerrisk

Add reference to prctl(2) in discussion of /proc/sys/fs/suid_dumpable

And note that /proc/sys/fs/suid_dumpable defines the value assigned to the process "dumpable" flag in certain circumstances.

Michael Kerrisk

Note that CAP_SYS_ADMIN is required to list /proc/PID/map_files

This might however change in the future; see the Jan 2015 LKML thread:

Re: [RFC][PATCH v2] procfs: Always expose /proc/<pid>/map_files/

and make it readable

resolv.conf.5

Michael Kerrisk

SEE ALSO: add nsswitch.conf(5)

capabilities.7

Michael Kerrisk

Mention SECBIT_KEEP_CAPS as an alternative to prctl() PR_SET_KEEPCAPS

Chris Mayo

NOTES: add last kernel versions for obsolete options

The CONFIG_SECURITY_CAPABILITIES option was removed by commit 5915eb53861c5776cfec33ca4fcc1fd20d66dd27

The CONFIG_SECURITY_FILE_CAPABILITIES option removed in Linux 2.6.33 as already mentioned in DESCRIPTION.

pthreads.7

Michael Kerrisk

SEE ALSO: add fork(2)

unix.7

Jan Chaloupka

Mention SOCK_STREAM socket for ioctl_type of ioctl()
from https://bugzilla.redhat.com/show_bug.cgi?id=1110401.

unix.7 is not clear about socket type of ioctl_type argument of
ioctl() function. The description of SIOCINQ is applicable only
for SOCK_STREAM socket. For SOCK_DGRAM, udp(7) man page gives

correct description of SIOCINQ

ldconfig.8

Michael Kerrisk

Place options in alphabetical order

Michael Kerrisk

Note glibc version number for '-l' option

Michael Kerrisk

Document -c/--format option

Michael Kerrisk

Add long form of some options

Michael Kerrisk [Patrick Horgan]

ld.so.conf uses only newlines as delimiters
mtk: confirmed by reading source of parse_conf() in
elf/ldconfig.c.

Michael Kerrisk

Document -V/--version option

Michael Kerrisk

Document -i/--ignore-aux-cache option

ld.so.8

Michael Kerrisk

Relocate "Hardware capabilities" to be a subsection under notes
This is more consistent with standard man-pages headings
and layout.

Michael Kerrisk

(Briefly) document LD_TRACE_PRELINKING

Michael Kerrisk

Remove duplicate description of LD_BIND_NOT

==== Changes in man-pages-3.81 =====

Released:

2015-03-02, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Alexandre Oliva <aoliva@redhat.com>
Carlos O'Donnell <carlos@redhat.com>
Ma Shimiao <mashimiao.fnst@cn.fujitsu.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Peng Haitao <penght@cn.fujitsu.com>

Apologies if I missed anyone!

New and rewritten pages

attributes.7

Alexandre Oliva, Michael Kerrisk [Carlos O'Donnell]
New page describing POSIX safety concepts

Global changes

Many pages

Peng Haitao, Michael Kerrisk
Reformat existing thread-safety information to use a tabular format, rather than plain text.

Changes to individual pages

mmap.2

Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function mmap() and munmap() are thread safe.

a64l.3

Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

acos.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function acos(), acosf() and acosl() are thread safe.

acosh.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function acosh(), acoshf() and acoshl() are thread safe.

addseverity.3

Ma Shimiao

ATTRIBUTES: Note function is thread-safe

The function addseverity() is thread safe.

aio_cancel.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function aio_cancel() is thread safe.

aio_fsync.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function aio_fsync() is thread safe.

aio_read.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function aio_read() is thread safe.

aio_suspend.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function aio_suspend() is thread safe.

aio_write.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function aio_write() is thread safe.

argz_add.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

asin.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `asin()`, `asinf()` and `asinl()` are thread safe.

`assert.3`

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

Its marking matches glibc marking.

`assert_perror.3`

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

Its marking matches glibc marking.

`atan2.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `atan2()`, `atan2f()` and `atan2l()` are thread safe.

`atanh.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `atanh()`, `atanhf()` and `atanhl()` are thread safe.

`backtrace.3`

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The markings match glibc markings.

`btowc.3`

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function `btowc()` in glibc is thread safe.

Its marking matches glibc marking.

`cabs.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `cabs()`, `cabsf()` and `cabsl()` are thread safe.

`cacos.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `cacos()`, `cacosf()` and `cacosl()` are thread safe.

`cacosh.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions `cacosh()`, `cacoshf()` and `cacoshl()` in glibc are

thread safe. Its markings match glibc markings.

canonicalize_file_name.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The functions canonicalize_file_name() in glibc is thread safe.

Its marking matches glibc marking.

carg.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function carg(), cargf() and cargl() are thread safe.

casin.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions casin(), casinl() and casinl() are thread safe.

Their markings match glibc markings.

casinh.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions casinh(), casinhl() and casinhl() in glibc are

thread safe. Its markings match glibc markings.

catan.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions catan(), catanf() and catanl() are thread safe.

Their markings match glibc markings.

catanh.3

Ma Shimiao

ATTRIBUTES: Note functions

that are thread-safe

The functions catanh(), catanhf() and catanhl() in glibc are

thread safe. Its markings match glibc markings.

catopen.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions catopen() and catclose() are thread safe.

cfree.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function cfree() in glibc is thread safe.

Its marking matches glibc marking.

clog10.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions `clog10()`, `clog10f()` and `clog10l()` in glibc are thread safe. Its markings match glibc markings.

clog.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `clog()`, `clogf()` and `clogl()` are thread safe.

closedir.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function `closedir()` in glibc is thread safe.

Its marking matches glibc marking.

confstr.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function `confstr()` is thread safe.

cosh.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions `cosh()`, `coshf()` and `coshl()` in glibc are thread safe.

Its markings match glibc markings.

cpow.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions `cpow()`, `cpowf()` and `cpowl()` in glibc are thread safe.

Its markings match glibc markings.

crypt.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the

thread-safety information to be the same as glibc manual.

ctermid.3

Ma Shimiao

Modify thread-safety information

According to the change of source code, `ctermid`'s level has been

changed from MT-Unsafe to MT-Safe. After modifying,

the marking

matches the glibc marking.

drand48.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

drand48_r.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

ecvt.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be same as glibc manual.

ecvt_r.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The markings match glibc markings.

encrypt.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

envz_add.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The markings match glibc markings.

exec.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions execl(), execlp(), execl(), execv(), execvp() and execvpe() are thread safe.

exit.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

exp10.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

exp2.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function exp2(), exp2f() and exp2l() are thread safe.

exp.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function exp(), expf() and expl() are thread safe.

fclose.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function fclose() is thread safe.

Its marking matches glibc marking.

fcloseall.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

fgetc.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The markings match glibc markings.

fgetwc.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The markings match glibc markings.

fgetws.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The marking matches glibc marking.

fmod.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function fmod(), fmodf() and fmodl() are thread safe.

fnmatch.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function fnmatch() is thread safe with exceptions.

fopen.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The markings match glibc markings.

fopencookie.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The marking matches glibc marking.

fread.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions fread() and fwrite() are thread safe.

gamma.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions gamma(), gammaf() and gammal() are not thread safe.

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getcontext.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getcwd.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions getcwd(), getwd() and get_current_dir_name() are thread safe.

getdate.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getenv.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `getenv()` and `secure_getenv()` are thread safe.

`getfsent.3`

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions `setfsent()`, `getfsent()`, `endfsent()`, `getfsspec()` and `getfsfile()` are not thread safe.

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

`getgrent.3`

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

Its marking matches glibc marking.

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

`getgrnam.3`

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

`getgrouplist.3`

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `getgrouplist()` is thread safe with exceptions.

`getlogin.3`

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

`getopt.3`

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions `getopt()`, `getopt_long()` and `getopt_long_only()` are not thread safe.

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getpass.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getpwent.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getpwnam.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

gets.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

Its marking matches glibc marking.

getw.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions getw() and putw() are thread safe.

gnu_get_libc_version.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions gnu_get_libc_version() and gnu_get_libc_release() are thread safe.

hsearch.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

iconv.3

Peng Haitao

Modify thread-safety information

inet.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions `inet_aton()` and `inet_addr()` are thread safe with exceptions.

The functions `inet_network()`, `inet_ntoa()`, `inet_makeaddr()`, `inet_lnaof()` and `inet_netof()` are thread safe.

Modify thread-safety information

After researching and talking,

we think `inet_network()` and

`inet_ntoa()` should be marked with locale.

After changing, the markings match glbc markings.

`inet_pton.3`

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `inet_pton()` is thread safe with exceptions.

`iswdigit.3`

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `iswdigit()` is thread safe with exceptions.

`iswgraph.3`

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `iswgraph()` is thread safe with exceptions.

`iswlower.3`

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `iswlower()` is thread safe with exceptions.

`iswprint.3`

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `iswprint()` is thread safe with exceptions.

`iswpunct.3`

Peng

Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `iswpunct()` is thread safe with exceptions.

`iswspace.3`

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `iswspace()` is thread safe with exceptions.

`iswupper.3`

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `iswupper()` is thread safe with exceptions.

`iswxdigit.3`

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `iswxdigit()` is thread safe with exceptions.

`j0.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `j0()`, `j1f()` `jnl()` and so on are thread safe.

`lio_listio.3`

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

Its marking matches glibc marking.

`log10.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `log10()`, `log10f()` and `log10l()` are thread safe.

`log2.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `log2()`, `log2f()` and `log2l()` are thread safe.

`log.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `log()`, `logf()` and `logl()` are thread safe.

`makecontext.3`

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

`makedev.3`

Peng Haitao

ATTRIBUTES: Note macros that are thread-safe

The macros `makedev()`, `major()` and `minor()` are thread safe.

`malloc.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `malloc()`, `free()`, `calloc()` and `realloc()` are

thread safe.

mblen.3

Ma Shimiao

Modify thread-safety information

As annotation in

glibc manual is more detailed, change the

thread-safety information to be the same as glibc manual.

mbstowcs.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The marking matches glibc marking.

mbtowc.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function mbtowc() is not thread safe.

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the

thread-safety information to be the same as glibc manual.

mktemp.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function mktemp() is thread safe.

mtrace.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions mtrace() and muntrace() are not thread safe.

nan.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The markings match glibc markings.

nl_langinfo.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function nl_langinfo() is thread safe with exceptions.

opendir.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The markings match glibc markings.

pow10.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function pow10(), pow10f() and pow10l() are thread safe.

pow.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function pow(), powf() and powl() are thread safe.

pthread_setcancelstate.3

Michael Kerrisk

Add async-signal-safety information

ptsname.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

putenv.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-unsafe

The function putenv() is thread unsafe.

puts.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions fputs(), fputc(), putc(), putchar() and puts() are thread safe.

putwchar.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The marking matches glibc marking.

qecvt.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be same as glibc manual.

rand.3

Peng Haitao

ATTRIBUTES: Note macros that are thread-safe

The functions rand(), rand_r() and srand() are thread safe.

random_r.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

readdir.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be same as glibc manual.

realpath.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The marking matches glibc marking.

regex.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions regcomp() and regexec() are thread safe with exceptions.

The functions regerror() and regfree() are thread safe.

remainder.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The markings match glibc markings.

scalb.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function scalb(), scalbf() and scalbl() are thread safe.

setenv.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-unsafe

The function setenv() and unsetenv() are thread unsafe.

siginterrupt.3

Ma Shimiao

Modify thread-safety information

As annotation

in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

sigset.3

Peng Haitao

ATTRIBUTES: Note macros that are thread-safe

The functions sigset(), sighold(), sigrelse() and sigignore() are thread safe.

sinh.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function sinh(), sinhf() and sinhl() are thread safe.

sqrt.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function sqrt(), sqrtf() and sqrtl() are thread safe.

stdarg.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

stdio_ext.3

Ma Shimiao

Modify thread-safety information

Change the thread safety information to be the same as glibc.

strcasemp.3

Peng Haitao

ATTRIBUTES:

Note functions that are thread safe with exceptions

The functions strcasemp() and strncasemp() are thread safe with exceptions.

strerror.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

strfmon.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

Its marking matches glibc marking.

strfry.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function strfry() is thread safe.

strftime.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function strftime() is thread safe with exceptions.

strptime.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function strptime() is thread safe with exceptions.

strtok.3

Ma Shimiao

Modify thread-safety

information

As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

strverscmp.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function strverscmp() is thread safe.

strxfrm.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

syslog.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions
The functions openlog() and closelog() are thread safe.
The functions syslog() and vsyslog() are thread safe with
exceptions.

tempnam.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function tempnam() is thread safe.

termios.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the
thread-safety information to
be the same as glibc manual.

Ma Shimiao

Modify thread-safety information

As this is man page for Linux, we don't need thread safety information for bsd

tgamma.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions `tgamma()`, `tgammaf()` and `tgammal()` in glibc are thread safe. Its markings match glibc markings.

timegm.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions `timelocal()` and `timegm()` are thread safe with exceptions.

tmpfile.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

Its markings match glibc markings.

tmpnam.3

Peng Haitao

Modify thread-safety information

When the argument `s` is `NULL`, `tmpnam()` should be `MT-Unsafe`.

toupper.3

Ma Shimiao

Modify thread-safety information

After researching and talking, we think `toupper()` and `tolower()` should not be marked with `locale`.

After changing, the markings match glibc markings.

tsearch.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions' markings match glibc markings.

ttyname.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be same as glibc manual.

tzset.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `tzset()` is thread safe with exceptions.

wcsdup.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

wctomb.3

Ma Shimiao

Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

y0.3

Ma Shimiao

ATTRIBUTES: Note functions
that are thread-safe
The function y0(), y1f() ynl() and so on are thread safe.

Apologies if I missed anyone!

New
and rewritten pages

nptl.7

Michael Kerrisk

New page with details of the NPTL POSIX threads implementation

Newly documented interfaces in existing pages

user_namespaces.7

Changes to individual pages

intro.1

Stéphane Aulery

Prompt is not % but \$

Stéphane Aulery

Various improvements

- Add reference to other common shells dash(1), ksh(1)
- Add a reference to stdout(3)
- Separate cp and mv descriptions
- Add examples of special cases of cd
- Add su(1) and shutdown(8) references for section Logout and poweroff
- Move Control-D to section Logout and poweroff
- Fix some little formatting errors

Stéphane Aulery

Add cross references cited

Stéphane Aulery

Order SEE ALSO section

clone.2

Josh Triplett

Document that clone() silently ignores CLONE_PID and CLONE_STOPPED

Normally, system calls return EINVAL for flags they don't support.

Explicitly document that clone does **not** produce an error for these two obsolete flags.

Michael Kerrisk

Small rewording of explanation of clone() wrt threads

Clone has so many effects that it's an oversimplification to say that the **main** use of clone is to create a thread. (In fact, the use of clone() to create new processes may well be more common, since glibc's fork() is a wrapper that calls clone().)

getgroups.2

Michael Kerrisk [Shawn Landden]

Add discussion of NPTL credential-changing mechanism

At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread changes its

credentials, all other threads change

credentials to the same values. By this means, the NPTL

implementation conforms to the POSIX requirement that the threads

in a process share credentials.

Michael Kerrisk

ERRORS: add EPERM for the case where /proc/PID/setgroups is "deny"

Michael Kerrisk

Note capability associated with EPERM error for setgroups(2)

Michael Kerrisk

Refer reader to user_namespaces(7) for discussion of /proc/PID/setgroups

The discussion of /proc/PID/setgroups has moved from
proc(5) to user_namespaces(7).

getpid.2

Michael Kerrisk

Note that getpid() returns 0 if parent is in different PID namespace

getsockopt.2

Konstantin Shemyak

Note RETURN VALUE details when netfilter is involved

ioctl_list.2

Heinrich Schuchardt

SEE ALSO ioctl_fat.2

Add FAT_IOCTL_GET_VOLUME_ID

SEE ALSO ioctl_fat.2

Heinrich Schuchardt

include/linux/ext2_fs.h

Include linux/ext2_fs.h does not contain any ioctl definitions
anymore.

Request codes EXT2_IOC* have been replaced by FS_IOC* in
linux/fs.h.

Some definitions of FS_IOC_* use long* but the actual code expects
int* (see fs/ext2/ioctl.c).

msgop.2

Bill Pemberton

Remove EAGAIN as msgrcv() errno

The list of errnos for msgrcv() lists both EAGAIN and ENOMSG as
the errno for no message available with the IPC_NOWAIT flag.

ENOMSG is the errno that will be set.

Bill Pemberton

Add an example program

open.2

Michael Kerrisk [Jason Vas Dias]

Mention blocking semantics for FIFO opens

See https://bugzilla.kernel.org/show_bug.cgi?id=95191

seccomp.2

Jann Horn [Kees Cook, Mikael Pettersson, Andy Lutomirski]

Add note about alarm(2) not being sufficient to limit runtime

Jann Horn

Explain blacklisting

problems, expand example

Michael Kerrisk [Kees Cook]

Add mention of libseccomp

setgid.2

Michael Kerrisk

Clarify that setgid() changes all GIDs when caller has CAP_SETGID

Michael Kerrisk [Shawn Landden]

Add discussion of NPTL credential-changing mechanism

At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread changes its credentials, all other threads change credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.

setresuid.2

Michael Kerrisk [Shawn Landden]

Add discussion of NPTL credential-changing mechanism

At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread

changes its credentials, all other threads change

credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.

setreuid.2

Michael Kerrisk [Shawn Landden]

Add discussion of NPTL credential-changing mechanism

At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread changes its credentials, all other threads change credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.

Michael Kerrisk

SEE ALSO: add credentials(7)

setuid.2

Michael Kerrisk

Clarify that setuid() changes all UIDs when caller has CAP_SETUID

Michael Kerrisk [Shawn Landden]

Add discussion of NPTL

credential-changing mechanism

At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread changes its credentials, all other threads change credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.

sigaction.2

Michael Kerrisk

Add discussion of `rt_sigaction(2)`

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc wrapper gives an `EINVAL` error on attempts to change the disposition of either of the two real-time signals used by NPTL.

sigpending.2

Michael Kerrisk

Add discussion of `rt_sigpending(2)`

sigprocmask.2

Michael Kerrisk

Add discussion of `rt_sigprocmask(2)`

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc wrapper silently ignores attempts to block the two real-time signals used by NPTL.

sigreturn.2

Michael Kerrisk

Add discussion of `rt_sigreturn(2)`

sigsuspend.2

Michael Kerrisk

Add discussion of `rt_sigsuspend(2)`

sigwaitinfo.2

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc wrappers silently ignore attempts to wait for signals used by NPTL.

Michael Kerrisk

Add discussion of `rt_sigtimedwait(2)`

socket.2

Heinrich Schuchardt

SEE ALSO close(2)

The description mentions close(2). Hence it should also be referenced in the SEE ALSO section.

syscall.2

Jann Horn

Add x32 ABI

umount.2

Eric W. Biederman

Document the effect of shared subtrees on umount(2)

Eric W. Biederman

Correct the description of MNT_DETACH

I recently realized that I had been reasoning improperly about what umount(MNT_DETACH)

did based on an insufficient description

in the umount.2 man page, that matched my intuition but not the implementation.

When there are no submounts, MNT_DETACH is essentially harmless to applications. Where there are submounts, MNT_DETACH changes what is visible to applications using the detach directories.

Michael Kerrisk

Move "shared mount + umount" text to a subsection in NOTES

aio_return.3

Stéphane Aulery

Document the return value on error

Reported by Alexander Holler <holler@ahsoftware.de>

clock.3

Stéphane Aulery

CLOCKS_PER_SEC = 1000000 is required by XSI, not POSIX

Debian Bug #728213 reported by Tanaka Akira <akr@fsij.org>

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=728213>

dlopen.3

Michael Kerrisk

Amend error in description of dlclose() behavior

The current text says that unloading depends on

whether

the reference count falls to zero *and no other libraries are using symbols in this library*. That latter text has been there since man-pages-1.29, but it seems rather dubious.

How could the implementation know whether other libraries are still using symbols in this library? Furthermore, no

other implementation's man page mentions this point.

Seems best to drop this point.

Michael Kerrisk

Add some details for `RTLD_DEFAULT`

Michael Kerrisk

Add some details on `RTLD_NEXT` and preloading

Michael Kerrisk

`RTLD_NEXT` works for symbols generally, not just functions

The common use case is for functions, but `RTLD_NEXT` also applies to variable symbols.

Michael Kerrisk

`dlclose()` recursively closes dependent libraries

Note that `dlclose()` recursively closes dependent libraries that were loaded by `dlopen()`

Michael

Kerrisk

Rename second `dlopen()` argument from "flag" to "flags"

This is more consistent with other such arguments

Michael Kerrisk

Reformat text on `RTLD_DEFAULT` and `RTLD_NEXT`

fmemopen.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The markings match glibc markings.

fpathconf.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The marking matches glibc marking.

fputwc.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The marking matches glibc marking.

fputws.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The marking matches glibc marking.

fseek.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The markings match glibc markings.

fseeko.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

gcvt.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

getline.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The marking matches glibc marking.

getwchar.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

hypot.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

iconv_open.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

if_nameindex.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

initgroups.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

mq_open.3

Torvald Riegel

Add EINVAL error case for invalid name

This behavior is implementation-defined

by POSIX. If the name

doesn't start with a '/', glibc returns EINVAL without attempting
the syscall.

popen.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The marking matches glibc marking.

pthread_kill.3

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc pthread_kill() function gives an error on attempts to send either of the real-time signals used by NPTL.

pthread_sigmask.3

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc implementation silently ignores attempts to block the two real-time signals used by NPTL.

pthread_sigqueue.3

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc pthread_sigqueue() function gives an error on attempts to send either of the real-time signals used by NPTL.

resolver.3

Stéphane Aulery [Jakub Wilk]

Document missing options used by _res structure indicate defaults

Missing options: RES_INSECURE1, RES_INSECURE2, RES_NOALIASES, USE_INET6, ROTATE, NOCHECKNAME, RES_KEEPTSIG, BLAST, USEBSTRING, NOIP6DOTINT, USE_EDNS0, SNGLKUP, SNGLKUPREOP, RES_USE_DNSSEC, NOTLDQUERY, DEFAULT

Written from the glibc source and resolv.conf.5.

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=527136>

Stéphane Aulery

RES_IGNTC is implemented

rint.3

Matt Turner

Document that halfway cases are rounded to even

Per IEEE-754 rounding rules.

The round(3) page describes the behavior of rint and nearbyint in the halfway cases by saying:

These functions round x to the nearest integer, but round halfway cases away from zero [...], instead of to the nearest even integer like rint(3)

sigqueue.3

Michael Kerrisk

NOTES:

add "C library/kernel ABI differences" subheading

Michael Kerrisk

Clarify version info (mention `rt_sigqueueinfo()`)

`sigsetops.3`

Michael Kerrisk

Note treatment of signals used internally by NPTL

The `glibc sigfillset()` function excludes the two real-time signals used by NPTL.

`sigwait.3`

Michael Kerrisk

Note treatment of signals used internally by NPTL

The `glibc sigwait()` silently ignore attempts to wait for signals used by NPTL.

`strcoll.3`

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The markings match `glibc` markings.

`strdup.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The marking matches `glibc` marking.

`tzset.3`

J William Piggott

Add 'std' quoting information

`ulimit.3`

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The marking matches `glibc` marking.

`wcstombs.3`

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The marking matches `glibc` marking.

`wctob.3`

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The marking matches `glibc` marking.

xdr.3

Taisuke Yamada

Clarified incompatibility and correct usage of XDR API

See <http://bugs.debian.org/628099>

console_codes.4

Scot Doyle

Add Console Private CSI sequence 15

An undocumented escape sequence in drivers/tty/vt/vt.c brings the previously accessed virtual terminal to the foreground.

mtk: Patch misattributed to Taisuke Yamada in Git commit

because of a muck up on my part.

Michael Kerrisk

Add kernel version number for CSI sequence 15

random.4

Michael Kerrisk

Fix permissions shown for the devices

These days, the devices are RW for everyone.

filesystems.5

Michael Kerrisk

Remove dubious claim about comparative performance of ext2

Perhaps it was the best filesystem performance-wise in the 20th century, when that text was written. That probably ceased to be true quite a long time ago, though.

Stéphane Aulery

Add cross references for ext filesystems

Stéphane Aulery

Specifies the scope of this list and its limits.

host.conf.5

hosts.5

resolv.conf.5

Stéphane Aulery [Paul E Condon]

Cross references of these pages.

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=298259>

host.conf.5

Stéphane Aulery

Rework discussion of nospooof, spooofalert, spooof and RESOLV_SPOOF_CHECK

The keywords and environment variables "nospooof", "spooofalert", "spooof" and RESOLV_SPOOF_CHECK were added to glibc 2.0.7 but never implemented

Move descriptions to historical section and reorder it for clarity

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=773443>

hosts.5

Stéphane

Aulery [Vincent Lefevre]

Mention 127.0.1.1 for FQDN and IPv6 examples

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=562890>

proc.5

Taisuke Yamada

Document `/proc/PID/status` VmPin field

See <https://bugs.launchpad.net/bugs/1071746>

Michael Kerrisk

Document (the obsolete) `/proc/PID/seccomp`

Michael Kerrisk

Replace description of 'uid_map' with a reference to `user_namespaces(7)`

All of the information in `proc(5)` was also present in `user_namespaces(7)`, but the latter was more detailed and up to date.

Taisuke Yamada

Fix SELinux `/proc/pid/attr/current` example

Since the `/proc/pid/attr` API was added to the kernel, there have been a couple of changes to the SELinux handling of `/proc/pid/attr/current`. Fix the SELinux `/proc/pid/attr/current` example text to reflect these changes and note which kernel versions first included

the changes.

securetty.5

Stéphane Aulery [Nicolas FRANCOIS]

Note that the `pam_securetty` module also uses this file

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=528015>

This patch is a modified version of the one proposed without parts specific to Debian.

boot.7

Michael Witten

Copy edit

While a lot of the changes are issues of presentation, there are also issues of grammar and punctuation.

Michael Witten

Mention ``systemd(1)'` and its related ``bootup(7)'`

It's important that the reader receive contemporary information.

credentials.7

Michael Kerrisk

SEE ALSO: add `pthread(7)`

Michael Kerrisk

Add reference to nptl(7)

feature_test_macros.7

Michael Kerrisk

Update discussion of `_FORTIFY_SOURCE`

Since the initial implementation a lot more checks were added.

Describe all the checks would be too verbose (and would

soon

fall out of date as more checks are added). So instead, describe the kinds of checks that are done more generally.

Also a few other minor edits to the text.

hier.7

Stéphane Aulery

First patch of a series to achieve compliance with FHS 2.3

Stéphane Aulery

SGML and XML directories are separated in FHS 2.3

Stéphane Aulery

Add missing directories defined by FHS 2.3

Stéphane Aulery

Identify which directories are optional

Stéphane Aulery

Document `/initrd`, `/lost+found` and `/sys`

Ubuntu Bug #70094 reported by Brian Beck

<https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/70094>

Stéphane Aulery

Explain YP, which is not obvious

ipv6.7

Stéphane Aulery [David Madore]

`SOL_IPV6` and other `SOL_*` options socket are not portable

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=472447>

man-pages.7

Michael Kerrisk [Bill Pemberton]

Add `indent(1)` command that produces desired formatting for example code

Stéphane Aulery

Improve description of sections in accordance with intro pages

packet.7

Michael Kerrisk

Rework description of fanout algorithms as list

Michael Kerrisk

Remove mention of needing UID 0 to create packet socket

The existing text makes no sense. The check is based

purely on a capability check. (Kernel function

`net/packet/af_packet.c::packet_create()`)

Michael Kerrisk

Remove text about ancient glibc not defining SOL_PACKET

This was fixed in glibc 2.1.1, which is a long while ago.

And in any case, there is nothing special about this case;
it's just one of those times when glibc lags.

Michael Kerrisk

Rework description of 'sockaddr_ll' fields as a list

Michael Kerrisk

Various minor edits

pthread.7

Michael Kerrisk

Add references to nptl(7)

raw.7

Michael Kerrisk

Rephrase "Linux 2.2" language to "Linux 2.2 or later"

The man page was written in the Linux 2.2 timeframe, and
some phrasing was not future-proof.

signal.7

Michael Kerrisk

Note when Linux added realtime signals

Michael Kerrisk

Correct the range of realtime signals

Michael Kerrisk

Summarize 2.2 system call changes that resulted from larger signal sets

Michael Kerrisk

SEE ALSO: add nptl(7)

tcp.7

Peter Adkins

Document removal of TCP_SYNQ_HSIZE

Looking over the man page for 'tcp' I came across a reference to
tuning the 'TCP_SYNQ_HSIZE' parameter when increasing
'tcp_max_syn_backlog' above 1024. However, this static sizing was
removed back in Linux 2.6.20 in favor of dynamic scaling - as
part of commit 72a3effaf633bcae9034b7e176bdb78d64a71db.

user_namespaces.7

Eric W. Biederman

Update the documentation to
reflect the fixes for negative groups

Files with access permissions such as rwx---rwx give fewer
permissions to their group than they do to everyone else. Which
means dropping groups with setgroups(0, NULL) actually grants a
process privileges.

The unprivileged setting of `gid_map` turned out not to be safe after this change. Privileged setting of `gid_map` can be interpreted as meaning yes it is ok to drop groups. [Eric additionally noted: Setting of `gid_map` with privilege has been clarified to mean that dropping groups is ok. This allows existing programs that set `gid_map` with privilege to work without changes. That is, `newgidmap(1)` continues to work unchanged.]

To prevent this problem and future problems, user namespaces were changed in such a way as to guarantee a user can not obtain credentials without privilege that they could not obtain without the help of user namespaces.

This meant testing the effective user ID and not the filesystem user ID, as `setresuid(2)` and `setregid(2)` allow setting any process UID or GID (except the supplementary groups) to the effective ID.

Furthermore, to preserve in some form the useful applications that have been setting `gid_map` without privilege, the file `/proc/[pid]/setgroups` was added to allow disabling `setgroups(2)`. With `setgroups(2)` permanently disabled in a user namespace, it again becomes safe to allow writes to `gid_map` without privilege.

Michael Kerrisk

Rework some text describing permission rules for updating map files
No (intentional) change to the facts, but this restructuring should make the meaning easier to grasp.

Michael Kerrisk

Update kernel version associated with 5-line limit for map files

As at Linux 3.18, the limit is still five lines, so mention the more recent kernel version in the text.

Michael Kerrisk [Alban Crequy]

Handle `/proc/PID/setgroups` in the example program

Michael Kerrisk

Rework text describing restrictions on updating `/proc/PID/setgroups`
No (intentional) changes to factual description, but the restructured text is hopefully easier to grasp.

Michael Kerrisk

Explain why the `/proc/PID/setgroups` file was added

ldconfig.8

Michael Kerrisk

Note use of `/lib64` and `/usr/lib64` on some 64-bit architectures

ld.so.8

Michael Kerrisk

Note the use of /lib64 and /usr/lib64 on some 64-bit architectures

===== Changes in man-pages-3.83 =====

Released: 2015-04-19, Munich

Apologies if I missed anyone!

New and rewritten pages

posix_madvise.3

Michael Kerrisk

New page documenting posix_madvise(3)

ftw.3

Michael Kerrisk

Reorganize the page to give primacy to nftw()

nftw() is the better API, and POSIX.1-2008 marks ftw() obsolete.

Newly documented interfaces in existing pages

getdents.2

Michael Kerrisk [Dima Tisnek]

Document getdents64()

See https://bugzilla.kernel.org/show_bug.cgi?id=14795

mount.2

Michael Kerrisk, Theodore Ts'o [Eric Sandeen, Andreas Dilger,
Omar Sandoval, Darrick J. Wong]

Document MS_LAZYTIME

proc.5

Michael Kerrisk

Document /proc/sys/kernel/randomize_va_space

Michael Kerrisk

Document /proc/PID/fdinfo epoll format

Michael

Kerrisk

Describe /proc/PID/fdinfo eventfd format

Michael Kerrisk

Document /proc/PID/fdinfo signalfd format

New and changed links

newfstatat.2

Michael Kerrisk

New link to fstatat64.2

prlimit64.2

Michael Kerrisk

New link to getrlimit.2

Global changes

Various section 3 math pages

Michael Kerrisk

Note that these functions are also in POSIX.1-2001 and POSIX.1-2008

Changes to individual pages

getent.1

Robin H. Johnson

Document options

The options to getent are now documented, after being around for nearly a decade without changes.

Michael Kerrisk

Document help and version options

fallocate.2

Michael Kerrisk

Fix kernel version number for FALLOC_FL_ZERO_RANGE

FALLOC_FL_ZERO_RANGE was added in 3.15, not 3.14.

Michael Kerrisk

Note that SMB3 added FALLOC_FL_ZERO_RANGE support in Linux 3.17

getrlimit.2

Michael Kerrisk

Note that the underlying system call for prlimit() is prlimit64()

Michael Kerrisk

Remove "_FILE_OFFSET_BITS == 64" from prlimit() FTM requirements

"_FILE_OFFSET_BITS == 64" is not needed to get the prlimit() declaration.

ioctl_list.2

Nikos Mavrogiannopoulos

SIOCADDRT accepts in6_rtmsg in INET6 protocol

Heinrich Schuchardt

TFD_IOC_SET_TICKS

timerfd_create.2 mentions TFD_IOC_SET_TICKS. We should add it to ioctl_list.2, too.

lseek.2

Michael Kerrisk

Advise reader to use `lseek(2)` instead

Michael Kerrisk

`llseek()` exists on 32-bit platforms to support seeking to large offsets

madvise.2

David Rientjes

Specify `MADV_REMOVE` returns `EINVAL` for `hugetlbfs`

`madvise(2)` actually returns with error `EINVAL` for `MADV_REMOVE`

when used for `hugetlb` VMAs, not `EOPNOTSUPP`, and this has been

the case since `MADV_REMOVE`

was introduced in commit `f6b3ec238d12`

("madvise(`MADV_REMOVE`): remove pages from tmpfs shm backing store"). Specify the exact behavior.

Michael Kerrisk

SEE ALSO: add `posix_madvise(2)`

poll.2

Michael Kerrisk [Andreas Baak]

SEE ALSO: add `epoll(7)`

posix_fadvise.2

Michael Kerrisk

Add "C library/kernel ABI differences" subsection

pread.2

Michael Kerrisk

Add "C library/kernel ABI differences" subsection

seccomp.2

Michael Kerrisk [Pierre Chifflier, Kees Cook]

Note that `seccomp_data` is read-only

stat.2

Michael Kerrisk

Add some details on various "stat" versions

Three versions of "stat" appeared on 32-bit systems, dealing with structures of different (increasing) sizes.

Explain some of the details, and also note that the situation is simpler on modern 64-bit architectures.

Michael Kerrisk

Add mention of `newfstatat()`

The underlying system call for `fstatat()` is `newfstatat()` on some architectures.

symlink.2

Michael Kerrisk [Jonny Grant]

ERRORS: add linkpath="" case for ENOENT

syscalls.2

Michael Kerrisk

Remove prlimit()

There really is only the prlimit64() system call.

Michael Kerrisk

Add some details about the "multiple versions of system calls"

The multiple-system-call-version phenomenon is particularly a feature of older 32-bit platforms. Hint at that fact in the text.

timerfd_create.2

Cyrill Gorcunov [Michael Kerrisk]

Document TFD_IOC_SET_TICKS ioctl() operation

Michael Kerrisk

Add some details to C library/kernel ABI differences

unshare.2

Michael Kerrisk [Fabien Pichot]

Remove mention of "System V" from discussion of CLONE_NEWIPC

These days, CLONE_NEWIPC also affects POSIX message queues.

asprintf.3

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

carg.3

Michael Kerrisk

Add introductory sentence explaining what these functions calculate

ctime.3

Zeng Linggang

ATTRIBUTES: Note functions that aren't thread-safe

exec.3

Michael Kerrisk

SYNOPSIS: Clarify calling signature for execl() and execlp()

Michael Kerrisk [Andreas Baak]

Correct prototype for execlp()

Make the prototype shown into correct C.

ftw.3

Michael Kerrisk [Felix Sedlmeier]

ftw() and nftw() differ for the non-stat-able symlink case

The POSIX specification of ftw() says

that an un-stat-able

symlink may yield either FTW_NS or FTW_SL. The specification

of nftw() does not carry this statement.

Michael Kerrisk

CONFORMING TO: add POSIX.1-2008

Michael Kerrisk

Update POSIX version references in NOTES

getcwd.3

Jann Horn [Michael Kerrisk]

Note behavior for unreachable current working directory

Michael Kerrisk

Add ENOMEM error

gethostbyname.3

Michael Kerrisk [Jonny Grant]

Clarify that NO_ADDRESS and NO_DATA are synonyms

Michael Kerrisk

Add some detail for NO_DATA

Text consistent with POSIX and FreeBSD's gethostbyname() man page.

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

posix_memalign.3

Zeng Linggang

ATTRIBUTES: Note functions that aren't thread-safe

printf.3

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

Walter Harms [Michael Kerrisk]

Simplify the example code

qsort.3

Michael Kerrisk [Rob Landley]

alphasort() and versionsort() are not suitable for 'compar'

In glibc 2.10, the prototypes of alphasort() and versionsort() were changed so that the arguments switched from 'const void *' to 'const struct dirent **', to match the POSIX.1-2008 specification of alphasort(). As such, compiler warnings will result if these functions are used as the arguments of qsort().

```
warning: passing argument 4 of 'qsort' from incompatible
pointer type
expected '__compar_fn_t' but argument is of type
'int (*)(const struct dirent
**, const struct dirent **)'
```

Therefore, remove the ancient NOTES text suggesting that alphasort() and versionsort() can be used as suitable 'compar' arguments for qsort().

realpath.3

Michael Kerrisk [Jon Grant]

Add ENOMEM error

scandir.3

Michael Kerrisk

glibc 2.10 changed the argument types for alphasort() and versionsort()

Zeng Linggang

New and rewritten pages

get_phys_pages.3

William Woodruff

Document get_phys_pages() and get_avphys_pages()

loop.4

Urs Thuermann, Michael Kerrisk

New page documenting the loop device

xattr.7

Andreas Gruenbacher

Import attr(5) man page from the 'attr' project

After discussions with Andreas Gruenbacher, it makes sense to
move this page into man-pages, since it mostly relates to

kernel details. Since this is an overview page,
we'll move it to Section 7.

Michael Kerrisk

Rename page

"xattr" is a more meaningful name than "attr" (it resonates
with the names of the system calls), so as long as we are
moving the page to a new section, we'll change the name as well,
and retain an `acl(5)` link so that old references remain valid.

Newly documented interfaces in existing pages

mmap.2

Michael Kerrisk [Andi Kleen]

Document `MAP_HUGE_2MB`, `MAP_HUGE_1GB`, and `MAP_HUGE_SHIFT`

shmget.2

Michael Kerrisk [Andi Kleen]

Document `SHM_HUGE_2MB`, `SHM_HUGE_1GB`, and `SHM_HUGE_SHIFT`

resolver.3

Michael Kerrisk [Jonathan

Nieder]

Add descriptions of some other resolver functions
Add `res_ninit()`, `res_nquery()`, `res_nsearch()`,
and `res_nquerydomain()`, `res_nmkquery()`, `res_nsend()`.

tty_ioctl.4

Frédéric Maria [Stephane Fillod, Andreas Heiduk]

Document `TIOCMIWAIT` and `TIOCGICOUNT`

Michael Kerrisk

Document `TIOCGEXCL`

Michael Kerrisk

Document `TIOGCPKT`

Michael Kerrisk

Document `TIOCSPTLCK`

Michael Kerrisk

After EPOLLHUP, EOF will be seen only after all data has been consumed

epoll_wait.2

Michael Kerrisk

Clarify that signal mask treatment in epoll_pwait() is per-thread
s/sigprocmask()/pthread_sigmask()/

fcntl.2

Michael Kerrisk [Vegard Nossum]

Note an F_SETSIG corner case

get_mempolicy.2, set_mempolicy

Brice Goglin

Policy is per thread, not
per process

getxattr.2

listxattr.2

removexattr.2

setxattr.2

capabilities.7

Michael Kerrisk

Adjust "attr(5)" references to "xattr(7)"

ioctl.2

Michael Kerrisk

SEE ALSO: add console_ioctl(2) and tty_ioctl(2)

listxattr.2

xattr.7

Michael Kerrisk

Describe listxattr(2) E2BIG error and document it as a BUG

mkdir.2

Michael Kerrisk

Wording fixes + point reader at stat(2) for explanation of file mode

Michael Kerrisk [Andreas Grünbacher]

Further tweaks to text on S_ISVTX and 'mode' argument

mknod.2

Michael Kerrisk

Rewordings + point reader at stat(2) for details of mode bits

mmap.2

Michael Kerrisk

Remove text that implies that munmap() syncs MAP_SHARED mapping to file

The existing text in this page:

MAP_SHARED Share this mapping. Updates to the mapping are visible to other processes that map this file, and are carried through to the underlying file. The file may not actually be updated until msync(2) or munmap() is called.

implies that munmap() will sync the mapping to the underlying file. POSIX doesn't require this, and some light reading of the code and some light testing (fsync() after munmap() of a large file) also indicates that Linux doesn't do this.

msync.2

Michael Kerrisk

Rework text of DESCRIPTION

Rewrite the text somewhat, for easier comprehension.

No (intentional) changes to factual content

nfsservctl.2

Michael Kerrisk [J. Bruce Fields]

Note that nfsservctl() was replaced by files in nfsd filesystem

open.2

Michael Kerrisk [Andreas Gruenbacher]

open() honors the S_ISVTX, S_ISUID, and S_ISGID bits in 'mode'

Michael Kerrisk

Tighten wording: use 'mode bit' rather than 'permission bit'

Michael

Kerrisk [NeilBrown]

BUGS: O_CREAT | O_DIRECTORY succeeds if pathname does not exist

poll.2

Michael Kerrisk [Ian Pilcher]

Clarify that signal mask treatment in ppoll() is per-thread

s/sigprocmask()/pthread_sigmask()/

Michael Kerrisk [Sam Varshavchik]

After POLLHUP, EOF will be seen only after all data has been consumed

Michael Kerrisk

Make it clearer which bits are ignored in 'events'

prctl.2

Michael Kerrisk [David Wilcox, Filipe Brandenburger]

Note that "parent" for purposes of PR_SET_DEATHSIG is a *thread*

See https://bugzilla.kernel.org/show_bug.cgi?id=43300

sendfile.2

Michael Kerrisk [Jason Newton]

Note that sendfile does not support O_APPEND for 'out_fd'

See https://bugzilla.kernel.org/show_bug.cgi?id=82841

Michael Kerrisk [Gregor Jasny]

RETURN VALUE: note the possibility of "short sends"

See https://bugzilla.kernel.org/show_bug.cgi?id=97491

Michael Kerrisk [Askar Safin]

Clarify text on 'out_fd' and regular files in Linux 2.4

See https://bugzilla.kernel.org/show_bug.cgi?id=86001

shutdown.2

Michael Kerrisk [Stéphane Aulery]

BUGS: UNIX domain sockets now detect invalid 'how' values

Bug fixed in Linux 3.7.

See https://bugzilla.kernel.org/show_bug.cgi?id=47111

sigaction.2

Michael Kerrisk

Refer the reader to fcntl(2) F_SETSIG for further details on si_fd

stat.2

Jann Horn

Add note about stat() being racy

Andreas Gruenbacher

Improve description of some mode constants

Michael Kerrisk [Andreas Grünbacher]

Remove excessive leading zeros on some constants

Michael Kerrisk

Add text on POSIX terms "file mode bits" and "file permission bits"

Recent changes to various pages employ this distinction.

Michael Kerrisk

Tighten wording: use 'mode bit' rather than 'permission bit'

According

to POSIX, the 9 UGO*RWX bits are permissions, and

'mode' is used to refer to collectively to those bits plus sticky,

set-UID, and set_GID bits.

syslog.2

Michael Kerrisk

SEE ALSO: add dmesg(1)

umask.2

open.2

mknod.2

mkdir.2

Andreas Gruenbacher

Explain what default ACLs do

Explain the effect that default ACLs have (instead of the umask) in umask.2. Mention that default ACLs can have an affect in open.2, mknod.2, and mkdir.2.

unshare.2

Michael Kerrisk [Florian Weimer]

Give the reader a hint that unshare() works on processes or threads

See https://bugzilla.kernel.org/show_bug.cgi?id=59281

atexit.3

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

bsearch.3

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

cmmsg.3

Michael Kerrisk [Christopher Head]

Fix error in SCM_RIGHTS code sample

Remove erroneous second

initialization of msg.msg_controllen

in the example code for SCM_RIGHTS.

See https://bugzilla.kernel.org/show_bug.cgi?id=15952

CPU_SET.3

Chris Metcalf

Clarify language about "available" cpus

The CPU_SET.3 man page uses the adjective "available" when explaining what the argument to CPU_SET() means. This is confusing, since "available" isn't well-defined. The kernel has a set of adjectives (possible, present, online, and active) that qualify cpus, but normally none of these are what the cpu_set_t bit index means: it's just "which cpu", using the kernel's internal numbering system, even if that cpu isn't possible or present.

This change removes the word "available" and adds a sentence

warning that cpu sets may not be contiguous due to dynamic
cpu hotplug, etc.

Update discussion of 'debug' option

See https://bugzilla.kernel.org/show_bug.cgi?id=97161

Michael Kerrisk

Summary of multiple changes: remove cruft from this page.

Much of the detail on hardware specifics in this page dates from the 20th century. (The last major update to this page was in man-pages-1.14!) It's hugely out of date now (many of these devices disappeared from the kernel years ago.) So, I've taken a large scythe to the page to remove anything that looks seriously dated. In the process, the page has shrunk to less than 50% of its previous size.

Michael Kerrisk

Remove "buff=" details

This seems to have gone away in Linux 2.2.

Michael Kerrisk

Remove crufty "Mouse drivers" options

Michael Kerrisk

Remove crufty "General non-device-specific boot arguments" options

Michael Kerrisk

Remove crufty "Hard disks" options

Michael Kerrisk

Remove crufty "mem=" details

Michael Kerrisk

Remove crufty details on IBM MCA bus devices

Michael Kerrisk

Remove 'swap=" details

This seems to have gone away in Linux 2.2,

Michael Kerrisk

Remove crufty floppy disk driver options

In the specific case of floppy drives: the drivers still exist, but it's been a while since most of saw these devices in the wild. So, just refer the reader to the kernel source file for details. (The detail in this man page was after all originally drawn from that file.)

Remove crufty "ISDN drivers" options

Michael Kerrisk

Remove crufty "line printer driver" options

Michael Kerrisk

Remove crufty "Serial port drivers" options

Michael Kerrisk

Remove crufty reference to CONFIG_BUGi386

That option disappeared in Linux 2.4.

Michael Kerrisk

Remove crufty text

"bootsetups array" dates from Linux 2.0.

Michael Kerrisk

Remove crufty "Video hardware" options

Michael Kerrisk

Remove crufty SCSI device driver options

fanotify.7

Michael Kerrisk [Heinrich Schuchardt]

Since Linux 3.19, fallocate(2) generates FAN_MODIFY events

inotify.7

Michael Kerrisk [Heinrich Schuchardt]

Since Linux 3.19, fallocate(2) generates IN_MODIFY events

ip.7

Michael Kerrisk

Explain how IP_ADD_MEMBERSHIP determines its argument type

Michael Kerrisk [Jiri Pirko, Magnus REFTEL]

Clarify details of the IP_MULTICAST_IF socket option

Michael Kerrisk [Advait Dixi]

Remove dubious text that says that SO_PRIORITY sets IP TOS

See https://bugzilla.kernel.org/show_bug.cgi?id=35852

Michael Kerrisk

Relocate misplaced text describing ENOPROTOOPT error

packet.7

Graham Shaw

Add sll_protocol to list of required fields for outbound packets

pthread.7

Michael Kerrisk [KOSAKI Motohiro]

Using thread IDs whose lifetime has expired gives undefined behavior

See https://bugzilla.kernel.org/show_bug.cgi?id=53061

raw.7

Michael Kerrisk

[Tetsuo Handa]

For incoming datagrams, sin_port is set to zero

Michael Kerrisk

Mention `sendto()`, `recvfrom()`, and so on when discussing address format

This gives the reader a little context for the following discussion of `'sin_port'`.

Michael Kerrisk

Remove crufty reference to `<netinet/in.h>`

Michael Kerrisk

Replace reference to RFC 1700 with pointer to IANA protocol number list

signal.7

Michael Kerrisk [Steinar H. Gunderson]

Clarify that I/O operations on disks are not interrupted by signals

See https://bugzilla.kernel.org/show_bug.cgi?id=97721

unix.7

Michael Kerrisk [Christophe Lohr]

Remove mention of `UNIX_PATH_MAX`

This kernel constant is not exposed to user space.

Michael Kerrisk

Note the 108 bytes for `sun_path` is how things are done on Linux

And refer the reader to NOTES for discussion of portability.

xattr.7

Michael Kerrisk

Document EA limits for Btrfs

Michael Kerrisk

Document VFS-imposed limits on EAs

VFS imposes a 255-byte limit on EA names, and a 64kB limit on EA values.

Michael Kerrisk

The `ext[234]` block limitation applies to sum of all EAs

It is not a per-EA limit.

Michael Kerrisk

Clarify permissions required to work with `'user'` EAs

Michael Kerrisk

`ext2` and `ext3` no longer need mounting with `'user_xattr'` for user EAs

Michael Kerrisk

Add various relevant pages to `SEE ALSO`

Michael Kerrisk

Add `CONFORMING TO` section

Michael Kerrisk

Modify headings to man-pages norms

Michael Kerrisk

Btrfs also supports extended attributes

Michael Kerrisk

File capabilities are implemented using `*security*` attributes

Not `*system*` attributes

Michael Kerrisk

Describe limit on EA values for JFS, XFS, and Reiserfs

Michael Kerrisk

Explicitly mention some
of the xattr system calls in DESCRIPTION

Naming the system calls helps to orient the reader

nscd.8

Michael Kerrisk

Add mention of 'services' and 'netgroup' databases

This makes the page consistent with nscd.conf(5).

==== Changes in man-pages-4.01 =====

Released: 2015-07-23, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alexei Starovoitov <ast@plumgrid.com>

Andries E. Brouwer <Andries.Brouwer@cw.nl>

Arjun Shankar <arjun@redhat.com>

Ashish Sangwan <a.sangwan@samsung.com>

Apologies if I missed anyone!

New and rewritten pages

bpf.2

Alexei Starovoitov, Michael Kerrisk [Daniel Borkmann]

New page documenting bpf(2)

__ppc_get_timebase.3

Tulio Magno Quites Machado Filho

New page documenting __ppc_get_timebase() and __ppc_get_timebase_freq()

Glibc 2.16 was released with a new function for the Power architecture that can read its Time Base Register.

Glibc 2.17 adds a function to read the frequency at which the Time Base Register of Power processors is updated.

queue.3

Michael Kerrisk [David Leppik, Doug Klima]

Reimport from latest FreeBSD page

Long ago,
Doug Klima noted that many macros were not
documented in the queue(3) page. Fix by reimporting from
latest [1] FreeBSD man page.

[1] Revision 263142, Modified Fri Mar 14 03:07:51 2014 UTC

This also fixes https://sourceware.org/bugzilla/show_bug.cgi?id=1506

This time, I'll learn from past mistakes and not convert
from 'mdoc' to 'man' macros.

Michael Kerrisk

Use subsections in DESCRIPTION

Michael Kerrisk

Remove SEE ALSO reference to nonexistent tree(3)

Michael Kerrisk

Use real hyphens in code samples

Michael Kerrisk

Comment out text for functions not in glibc

Michael Kerrisk

Replace HISTORY with CONFORMING TO

Newly documented interfaces in existing pages

rename.2

Michael Kerrisk [Miklos Szeredi]

Document RENAME_WHITEOUT

Heavily based on text by Miklos Szeredi.

New and changed links

__ppc_get_timebase_freq.3

Tulio Magno Quites Machado Filho

New link to new __ppc_get_timebase(3) page

Michael Kerrisk

New links to queue.3

Global changes

Various pages

Michael Kerrisk [Andries E. Brouwer]

Remove "ABI" from "C library/kernel ABI differences" subheadings

The "ABI" doesn't really convey anything significant in the title. These subsections are about describing differences between the kernel and (g)libc interfaces.

Changes to individual pages

intro.1

Michael Kerrisk [Andries E. Brouwer]

Drop intro paragraph on '\$?' shell variable

As Andries notes, this piece of text is rather out of place in a page that was intended to provide a tutorial introduction for beginners logging in on a Linux system.

locale.1

Marko Myllynen

A minor output format clarification

A minor clarification for the locale output format which was brought up at

https://sourceware.org/bugzilla/show_bug.cgi?id=18516.

For reference, see

https://sourceware.org/bugzilla/show_bug.cgi?id=18516

<http://pubs.opengroup.org/onlinepubs/9699919799/utilities/locale.html>

Add CONFORMING TO section

capget.2

Julian Orth

Clarify that `hdrp->pid==0` is equivalent `gettid()` not `getpid()`

chroot.2

Jann Horn

`chroot()` is not intended for security; document attack

It is unfortunate that this discourages this use of `chroot(2)` without pointing out alternative solutions - for example, OpenSSH and `vsftpd` both still rely on `chroot(2)` for security.

Bind mounts should theoretically be usable as a replacement, but currently, they have a similar problem (CVE-2015-2925) that hasn't been fixed in ~6 months, so I'd rather not add it to the manpage as a solution before a fix lands.

clock_getres.2

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

eventfd.2

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

execve.2

Michael Kerrisk

Elaborate on envp/argv
as NULL behavior

_exit.2

Michael Kerrisk

Open stdio frames are not flushed, temporary files are deleted
Many years ago, text was added to the page saying that it is
implementation-dependent whether stdio streams are flushed and
whether temporary are removed. In part, this change appears to
be because POSIX.1-2001 added text related to this point.
However, that seems to have been an error in POSIX, and the
text was subsequently removed for POSIX.1-2008. See
<https://collaboration.opengroup.org/austin/interps/documents/9984/AI-085.txt>
Austin Group Interpretation reference 1003.1-2001 #085

fallocate.2

Namjae Jeon [Michael Kerrisk]

Document FALLOC_FL_INSERT_RANGE

Michael Kerrisk

Since Linux 4.2, ext4 supports FALLOC_FL_INSERT_RANGE

fcntl.2

Michael Kerrisk

OFD locks are proposed for inclusion in the next POSIX revision

getrlimit.2

Zeng

Linggang

ATTRIBUTES: Note functions that are thread-safe

getrusage.2

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

gettid.2

Michael Kerrisk

Note that for a thread group leader, `gettid() == getpid()`

iopl.2

Michael Kerrisk

Remove some historical libc5 and glibc 1 details
These details are ancient, and long ago ceased to be relevant.

ioprio_set.2

Michael Kerrisk [Jens Axboe]

Document meaning of `ioprio==0`

mlock.2

Michael Kerrisk [Mehdi Aqadjani Memar]

Document another ENOMEM error case

ENOMEM can occur if locking/unlocking in the middle of a region would increase the number of VMAs beyond the system limit (64k).

mmap.2

Michal Hocko [Eric B Munson]

Clarify MAP_POPULATE

David Rientjes has noticed that MAP_POPULATE wording might promise much more than the kernel actually provides and intends to provide.

The primary usage

of the flag is to pre-fault the range. There is

no guarantee that no major faults will happen later on. The pages might have been reclaimed by the time the process tries to access them.

Michal Hocko [Eric B Munson]

Clarify MAP_LOCKED semantics

MAP_LOCKED had a subtly different semantic from mmap(2)+mlock(2) since it has been introduced.

mlock(2) fails if the memory range cannot get populated to

guarantee that no future major faults will happen on the range.

mmap(MAP_LOCKED) on the other hand silently succeeds even if the range was populated only partially.

Fixing this subtle difference in the kernel is rather awkward

because the memory population happens after mm locks have been

dropped and so the cleanup before returning failure (munlock)

could operate on something else than the originally mapped area.

E.g. speculative userspace page fault handler catching SEGV and doing mmap(fault_addr, MAP_FIXED|MAP_LOCKED) might discard portion of a racing mmap and lead to lost data. Although it is not clear whether such a usage would be valid, mmap page doesn't explicitly describe requirements for threaded applications so we cannot exclude this possibility.

This patch makes the semantic of MAP_LOCKED explicit and suggests

using mmap + mlock as the only way to guarantee no later major

page faults.

Michael Kerrisk

ERRORS: point out that ENOMEM can occur even for munmap()

mprotect.2

Michael Kerrisk

Note ENOMEM error that can occur when we reach limit on maximum VMAs

open.2

read.2

write.2

Michael Kerrisk [Mike Hayward]

Clarify that O_NONBLOCK is a no-op for regular files and block devices

perf_event_open.2

Vince Weaver [Joerg Roedel]

Exclude_host/exclude_guest

clarification

This patch relates to the exclude_host and exclude_guest bits added by the following commit:

exclude_host, exclude_guest; Linux 3.2

commit a240f76165e6255384d4bdb8139895fac7988799

Author: Joerg Roedel <joerg.roedel@amd.com>

Date: Wed Oct 5 14:01:16 2011 +0200

perf, core: Introduce attrs to count in either host or guest mode

The updated manpage text clarifies that the "exclude_host" and "exclude_guest" perf_event_open() attr bits only apply in the context of a KVM environment and are currently x86 only.

Vince Weaver

Document PERF_SAMPLE_REGS_INTR

This patch relates to the addition of PERF_SAMPLE_REGS_INTR support added in the following commit:

perf_sample_regs_intr; Linux 3.19

commit 60e2364e60e86e81bc6377f49779779e6120977f

Author: Stephane Eranian <eranian@google.com>

perf: Add ability to sample machine state on interrupt

The primary difference between PERF_SAMPLE_REGS_INTR and the existing PERF_SAMPLE_REGS_USER is that the new support will return kernel register values. Also if precise_ip is set higher than 0 then the PEBS register state will be returned rather than the saved interrupt state.

This patch incorporates feedback from Stephane Eranian and Andi Kleen.

prctl.2

seccomp.2

Michael Kerrisk

Clarify that SECCOMP_SET_MODE_STRICT disallows exit_group(2)

These days, glibc implements _exit() as a wrapper around exit_group(2). (When seccomp was originally introduced, this was not the case.) Give the reader a clue that, despite what glibc is doing, what SECCOMP_SET_MODE_STRICT permits is the true _exit(2) system call, and not exit_group(2).

pread.2

read.2

readv.2

sendfile.2

write.2

Michael Kerrisk

Clarify that Linux limits transfers to a maximum of 0x7ffff000 bytes

See <https://bugs.debian.org/629994> and

<https://bugs.debian.org/630029>.

pread.2

Michael Kerrisk

Rewrite RETURN VALUE section

(Also drop the text on pwrite() returning zero; that seems bogus.)

ptrace.2

Michael Kerrisk [Vegard Nossum]

PTRACE_O_TRACEEXIT clarification

readv.2

Michael Kerrisk

Remove BUGS heading

The text on mixing I/O syscalls and stdio is a general point of behavior. It's not a bug as such.

recv.2

send.2

Michael Kerrisk

Explain some subtleties of MSG_DONTWAIT versus O_NONBLOCK

rename.2

Michael Kerrisk

Michael Kerrisk

Note that RENAME_NO_REPLACE can't be employed with RENAME_EXCHANGE

sched_setaffinity.2

Michael Kerrisk

Add an example program

Michael Kerrisk [Florian Weimer]

Explain how to deal with 1024-CPU limitation of glibc's `cpu_set_t` type

Michael Kerrisk

Mention the use of the 'isolcpus' kernel boot option

`sched_setattr.2`

Julian Orth

Remove a const attribute

The `attr` argument of `sched_setattr` was documented as const but the kernel will modify the `size` field of this struct if it contains an invalid value. See the documentation of the `size` field for details.

`seccomp.2`

Michael Kerrisk

SEE ALSO: `add_bpf(2)`

`send.2`

Michael Kerrisk

Expand on subtleties of `MSG_NOSIGNAL` versus ignoring `SIGPIPE`

`sigaltstack.2`

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

`socket.2`

Stephan Mueller

Update documentation reference for `AF_ALG`

`truncate.2`

Michael Kerrisk

ERRORS: `ftruncate()` can fail if the file descriptor is not writable

`utimensat.2`

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

After research, We think `utimensat()` and `futimens()` are thread-safe.

But, there are not markings of `utimensat()` and `futimens()` in glibc document.

`clearenv.3`

Zeng Linggang

ATTRIBUTES: Note function that is not thread-safe

`dl_iterate_phdr.3`

Zeng Linggang

Marko Myllynen

Document strfmon_l(3)

Describe strfmon_l(3).

<http://pubs.opengroup.org/onlinepubs/9699919799/functions/strfmon.html>

Marko Myllynen

Fix CONFORMING TO

AFAICS strfmon(3) is now defined in POSIX and the glibc implementation is as specified there.

<http://pubs.opengroup.org/onlinepubs/9699919799/functions/strfmon.html>

Marko Myllynen

Rewrite the example

I think the example is more accurate when we use the exact locale names and also the Euro sign where appropriate.

xcrypt.3

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

xdr.3

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

console_codes.4

Scot Doyle [Pavel
Machek, Michael Kerrisk]

Add CSI sequence for cursor blink interval

Add a Console Private CSI sequence to specify the current console's cursor blink interval. The interval is specified as a number of milliseconds until the next cursor display state toggle, from 50 to 65535.

null.4

Michael Kerrisk

Note that reads from /dev/zero are interruptible since Linux 2.6.31

core.5

Michael Kerrisk

Mention 'coredump_filter' boot option

host.conf.5

Michael Kerrisk

Wording fix: s/resolv+/the resolver library/

The term "resolv+" seems to be historical cruft.

hosts.equiv.5

Carlos O'Donnell

Fix format, clarify IdM needs, and provide examples.

In some recent work with a Red Hat customer I had the opportunity to discuss the fine nuances of the ruserok() function and related API which are used to implement rlogin and rsh.

It came to my attention after working with QE on some automated internal testing that there were no good examples in the hosts.equiv manual page showing how the format was supposed to work for this file and for ~/.rhosts, worse the "format" line showed that there should be spaces between arguments when that would clearly lead to incorrect behaviour. In addition some things that the format allows you to write are just wrong like "-host -user" which makes no sense since the host is already rejected, and should be written as "host -user" instead. I added notes in the example to make it clear that "-host -user" is invalid.

I fixed three things:

(a) The format line.

- Either +, or [-]hostname, or +@netgrp or -@netgrp.
- Either +, or [-]username, or +@netgrp or -@netgrp.
- You must specify something in the hostname portion so remove

optional brackets.

(b) Clarify language around credentials

- If the host is not trusted you must provide credentials to the login system and that could be anything really and it depends on your configuration e.g. PAM or whatever IdM you have.

(c) Provide real-world examples

- Provide several real world examples and some corner case examples for how you would write something. Hopefully others can add examples as they see fit.

Michael Kerrisk [Carlos O'Donnell, Arjun Shankar]

Improve explanation in EXAMPLE

locale.5

Marko Myllynen

Document map to_inpunct, map to_outpunct

See e.g. fa_IR for reference.

Marko Myllynen

Document class in LC_CTYPE

See e.g. the locale zh_CN and

<http://en.cppreference.com/w/cpp/string/wide/towctrans>

<http://en.cppreference.com/w/cpp/string/wide/wctrans>

Marko Myllynen

Add iconv(1) reference

Marko Myllynen

Document character transliteration

See e.g. da_DK for reference.

(Not sure should we actually provide an example here?)

Marko Myllynen

Document era keywords

This patch completes the LC_TIME section - since these era keywords are so tightly coupled, I'm providing them as a single patch.

Based on

http://pubs.opengroup.org/onlinepubs/009695399/basedefs/xbd_chap07.html

<http://www.open-std.org/jtc1/SC22/WG20/docs/n972-14652ft.pdf>

Marko Myllynen

Document default_missing

Marko Myllynen

Document outdigit and alt_digits

See e.g. fa_IR for reference.

Marko Myllynen

Refer to locale(7) more prominently

It's probably a good idea to refer to locale(7) so that a reader can check what a category is about before describing them in detail.

Marko Myllynen

Document charclass and charconv

See e.g. the locales ja_JP and ko_KR and

<http://en.cppreference.com/w/cpp/string/wide/towctrans>

<http://en.cppreference.com/w/cpp/string/wide/wctrans>

Marko Myllynen

Copy is not exclusive in LC_CTYPE and LC_COLLATE

See e.g. da_DK for reference.

Marko Myllynen

Remove the FIXME for timezone

The timezone of LC_TIME is not in POSIX, only 6 (out of ~300)

glibc locales define it, the glibc code comment below from

[glibc.git/programs/ld-time.c](https://github.com/glibc/glibc/blob/master/programs/ld-time.c) seems to suggest it's not a good

idea, and there's been a proposal in upstream [1] to remove the

existing timezone definitions from glibc locales so I think

it's actually better to leave this one undocumented:

```
/* XXX We don't perform any tests on the timezone value since this is  
   simply useless, stupid $$!@... */
```

1) <https://sourceware.org/ml/libc-alpha/2015-06/msg00098.html>

Move the remaining LC_COLLATE FIXMEs together while at it.

Marko Myllynen

Fix country_isbn format

Both plain numbers and Unicode code points are used in

glibc locales but checking the code reveals that country_isbn

is handled like the rest of its category expect for country_num

which was clarified earlier.

Marko Myllynen

Sort according to the standard

Sort the options so that those defined in POSIX are listed first,

then followed by those defined in ISO/IEC TR 14652 in the order

of common convention in many widely used glibc locales.

Actual descriptions are unchanged.

http://pubs.opengroup.org/onlinepubs/9699919799/basedefs/V1_chap07.html

Marko Myllynen

Refer to strftime(3) where appropriate

The relationship between the locale time format syntax

and strftime()

cannot be considered as obvious.

Marko Myllynen

Document map "totitle"

See e.g. locales/i18n for reference.

Michael Kerrisk [Marko Myllynen]

Remove BUGS section saying man page is not complete

To some degree, this is true of many pages. And anyway, this page is much better after recent work by Marko.

proc.5

Michael Kerrisk

List /proc/vmstat fields

Michael Kerrisk

Tweak /proc/vmstat text

Michael Kerrisk

Add /proc/crypto entry with a pointer to further information

Michael Kerrisk [Kees Cook]

Document /proc/sys/kernel/sysctl_writes_strict

Based on text in Documentation/sysctl/kernel.txt.

Michael Kerrisk

Move misordered /proc/[pid]/timers entry

Michael Kerrisk

Refer to bpf(2) for explanation of /proc/sys/net/core/bpf_jit_enable

repertoiremap.5

Marko Myllynen

Symbolic names AKA mnemonics

A long time ago in glibc, repertoire

maps were used (but they

were removed already in 2000), those mapping files were named as mnemonics, so "mnemonic" is a term that would almost certainly come up if somebody studies glibc side (perhaps even the related standards like ISO 9945 [which I don't have access to]) so I thought it's worth to mention to term in the man page to make sure we're talking about the same thing, otherwise someone might wonder is that something different or not.

IOW, symbolic names and mnemonics are often used interchangeably, let's mention the other often used term in the page, too.

capabilities.7

Michael Kerrisk

CAP_SYS_ADMIN allows calling bpf(2)

locale.7

Marko Myllynen

LC_CTYPE determines transliteration rules on glibc systems

packet.7

[Cortland Setlow]

Fix description of binding a packet socket to an interface

pty.7

NeilBrown [Peter Hurley]

Clarify asynchronous nature of PTY I/O

A PTY is not like a pipe - there may be delayed between data being written at one end and it being available at the other.

This became particularly apparent after

commit f95499c3030f

("n_tty: Don't wait for buffer work in read() loop")

in Linux 3.12

See also the mail thread at <https://lkml.org/lkml/2015/5/1/35>

Date Mon, 04 May 2015 12:32:04 -0400

From Peter Hurley <>

Subject Re: [PATCH bisected regression] input_available_p()
sometimes says 'no' when it should say 'yes'

rtld-audit.7

Ben Woodard

Use correct printf() specifier for pointer types

In the example code you used %x rather than %p in the example code for an audit library. The problem is that it truncates the pointers on 64b platforms. So you get something

like:

```
la_symbind64(): symname = strchr sym->st_value = 0x7f4b8a3f8960  
ndx = 222 flags = 0x0 refcook = 8b53e5c8 defcook = 8b537e30
```

rather than:

```
la_symbind64(): symname = fclose sym->st_value = 0x7fa452dd49b0  
ndx = 1135 flags = 0x0 refcook = 0x7fa453f395c8 defcook = 0x7fa453f32e30
```

This has bitten me a handful of times when playing around with audit test libraries to investigate its behavior.

sched.7

Michael Kerrisk

Remove ancient, wildly optimistic prediction about future of RT patches

It seems the patches were not merged by 2.6.30...

socket.7

Michael Kerrisk

SEE ALSO: add bpf(2)

vdso.7

Nathan Lynch [Mike Frysinger]

Update for ARM

The 32-bit ARM architecture in Linux has gained a vDSO as of the 4.1 release. (I was the primary author.)

Document the symbols exported by the ARM VDSO.

Accepted kernel submission:

<http://lists.infradead.org/pipermail/linux-arm-kernel/2015-March/332573.html>

===== Changes in man-pages-4.02 =====

Released: 2015-08-08, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Carlos O'Donell <carlos@redhat.com>
Daniel Borkmann <daniel@iogearbox.net>
David Rientjes <rientjes@google.com>
Dilyan Palauzov <dilyan.palauzov@aegee.org>
Gabriel F. T. Gomes <gftg@linux.vnet.ibm.com>
Gleb Fotengauer-Malinovskiy <glebfm@altlinux.org>
Goswin von Brederlow <goswin-v-b@web.de>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Jonathan David Amery <jdamery@ysolde.ucam.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Mike Kravetz <mike.kravetz@oracle.com>
Nicholas Miell <nmiell@gmail.com>
Nikola Forró <nforro@redhat.com>
Sam Varshavchik <mrsam@courier-mta.com>
Yaarit
<yaarit@gmail.com>
Zeng Linggang <zenglg.jy@cn.fujitsu.com>

Apologies if I missed anyone!

New and rewritten pages

dladdr.3

Michael Kerrisk

New page documenting dladdr() and dladdr1()

Relocate/rewrite dladdr() text formerly contained in dlopen(3).

Add documentation of dladdr1().

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

dlerror.3

Michael Kerrisk

Migrate dlerror(3) to new separate man page

Michael Kerrisk

Note that the returned message may be in a statically allocated buffer

Michael Kerrisk

Note that the returned string does not include a trailing newline

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

dlinfo.3

Michael Kerrisk

New page describing dlinfo(3)

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

dlopen.3

Michael Kerrisk

This page was substantially rewritten and enhanced. Notably:

- * the dladdr(), dlsym, dlvsym(), and dlerror() content were moved to separate new pages;
- * documentation for dlmopen was added;
- * and other changes as noted below.

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

Michael Kerrisk

Move atexit() discussion under "Initialization and Finalization"

Michael Kerrisk

Move discussion of _init() and _fini() to NOTES

Michael Kerrisk

Rework the discussion of initialization and finalization functions
Deemphasize the obsolete _init/_fini and give more prominence to gcc constructors/destructors.

Michael Kerrisk

dlclose() will unload the object when all references have been released

Michael Kerrisk

EXAMPLE: Remove mention of "-rdynamic"

That option isn't needed for compiling and running this program.

Michael Kerrisk

Remove reference to ld.so info page

The command

"info ld.so" simply shows the man page...

Michael Kerrisk

Add VERSIONS section

Michael Kerrisk

Reorganize conformance information for 'flags'

dlsym.3

Michael Kerrisk

Move dlsym() and dlvsym() content to new separate page

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

Newly documented interfaces in existing pages

dlopen.3

Michael Kerrisk, Carlos O'Donnell

Document dlmopen(3)

nl_langinfo.3

Sam Varshavchik, Michael Kerrisk

Add documentation for nl_langinfo_l(3)

__ppc_set_ppr_med.3

Gabriel F. T. Gomes

Document PPC functions providing access to PPR

GNU C Library 2.18 adds functions (__ppc_set_ppr_low(3),
__ppc_set_ppr_med(3), __ppc_set_ppr_med_low(3)) that provide
access to the Program Priority Register (PPR).

__ppc_yield.3

Gabriel F. T. Gomes

Document PPC performance-hint functions

GNU C Library 2.18 adds functions __ppc_yield(3), __ppc_mdoio(3),
and __ppc_mdooio(3) that can be used provide a hint that
performance could be improved if shared resources are released
for use by other processors.

New and changed links

dladdr1.3

Michael Kerrisk

New link to (new) dladdr(3) page

dlopen.3

Michael Kerrisk

New link to dlopen.3

dlvsym.3

Michael Kerrisk

Adjust link to point to new self-contained dlvsym(3) page

nl_langinfo.1.3

Michael Kerrisk

New link to nl_langinfo.3

__ppc_mdoio.3

Gabriel F. T. Gomes

New link to __ppc_yield.3

__ppc_mdoom.3

Gabriel F. T. Gomes

New link to __ppc_yield.3

__ppc_set_ppr_low.3

Gabriel F. T. Gomes

New link to __ppc_set_ppr_med.3

__ppc_set_ppr_med_low.3

Gabriel F. T. Gomes

New link to __ppc_set_ppr_med.3

Global changes

Very many pages

Michael Kerrisk

Update

CONFORMING TO section to reflect POSIX.1-2001 and POSIX.1-2008

details. (By now, I believe all pages should be up to date with

respect to appropriately mentioning POSIX.1-2001 and POSIX.1-2008.)

ldd.1

sprof.1

execve.2

dlopen.3

ld.so.8

Michael Kerrisk

Prefer "shared object" over "shared library"

The man pages variously use "shared library" or "shared object".

Try to more consistently use one term ("shared object"), while also pointing out on a few pages that the terms are synonymous.

Changes to individual pages

accept.2

Michael Kerrisk

Add mention of POSIX.1-2008 regarding EAGAIN vs EWOULDBLOCK

bpf.2

Daniel Borkmann

Various updates/follow-ups to address some fixmes

A couple of follow-ups to the bpf(2) man-page, besides others:

- * Description of map data types
- * Explanation on eBPF tail calls and program arrays
- *

Paragraph on tc holding ref of the eBPF program in the kernel

- * Updated ASCII image with tc ingress and egress invocations
- * `__sync_fetch_and_add()` and example usage mentioned on arrays
- * minor reword on the licensing and other minor fixups

execve.2

Michael Kerrisk

Reword text on POSIX and #!

io_getevents.2

Michael Kerrisk

Note return value on interruption by a signal handler

Michael Kerrisk

Clarify details of return value for timeout-expired case

Michael Kerrisk

Clarify and extend discussion of 'timeout' argument

mmap.2

Michael Kerrisk

Note that 'length' need not be a page-size multiple for munmap()

Michael Kerrisk [David Rientjes, David Rientjes, Mike Kravetz]

Describe mmap()/munmap() argument requirements for huge-page mappings

Michael Kerrisk

Move discussion of timestamps to NOTES

A straight move; no changes to the content.

This content

is better placed in NOTES.

seccomp.2

Michael Kerrisk

SEE ALSO: mention libseccomp pages

SEE ALSO: add scmp_sys_resolver(1)

sigaction.2

Michael Kerrisk

Correct the list of flags that were added in POSIX.1-2001

socketpair.2

Michael Kerrisk [Goswin von Brederlow]

Clarify use of SOCK_* flags in 'type' argument

See <http://bugs.debian.org/794217>

atexit.3

Michael Kerrisk

SEE ALSO: add dlopen(3)

clock_getcpuclockid.3

Michael Kerrisk

Improve wording of EPERM error

It's imprecise to say that this is an "optional" error
in POSIX.1.

dl_iterate_phdr.3

Michael Kerrisk

Note that 'size' allows callback() to discover structure extensions

Michael Kerrisk

SEE ALSO: add dladdr(3)

Michael Kerrisk

CONFORMING TO: note that this function appears on some other systems

fseeko.3

Michael Kerrisk

Remove crufty NOTES section

This ancient System

V detail is unneeded.

getutent.3

Michael Kerrisk

Mention POSIX.1-2008 for the "utmpx" functions

iconv_close.3

iconv_open.3

Michael Kerrisk

CONFORMING TO: change "UNIX98" to "SUSv2"

malloc.3

Michael Kerrisk

Change "UNIX 98" to "SUSv2"

mktemp.3

Gleb Fotengauer-Malinovskiy

Reference mkdtemp(3) in addition to mkstemp(3)

Mention mkdtemp(3) as another secure alternative to mktemp(3).

See also https://sourceware.org/bugzilla/show_bug.cgi?id=2898.

mq_receive.3

mq_send.3

Michael Kerrisk

Clarify discussion of 'timeout'

In particular, remove the word 'ceiling', which falsely suggests that the call might return prematurely.

nl_langinfo.3

Michael Kerrisk

Explicitly describe the return value on success

Michael Kerrisk

POSIX specifies that the caller may not modify the returned string

Michael Kerrisk

Enhance RETURN VALUE description

Note

some further cases where returned string may be invalidated or overwritten.

perror.3

Michael Kerrisk

Reformat CONFORMING to information

Michael Kerrisk

Note that 'sys_errlist' and 'sys_nerr' are not in POSIX.1

posix_openpt.3

Michael Kerrisk

Reword text regarding systems that don't have posix_openpt()

printf.3

Michael Kerrisk

CONFORMING TO: update details for dprintf() and vdprintf()

setlogmask.3

Michael Kerrisk

Remove useless statement in CONFORMING TO

Saying that the description in PSOX.1-2001 is flawed,

without saying what the fla is, is not helpful.
(And no, I don't know what the flaw is.)

shm_open.3

Michael Kerrisk

Add POSIX.1-2008 details regarding group ID of new shared memory object

strfmon.3

Michael Kerrisk

Fix erroneous CONFORMING to
strfmon() is in POSIX.1.

fanotify.7

Heinrich Schuchardt

Clarify effects of file moves

If files or directories are moved to other mounts, the inode is
deleted. Fanotify marks are lost.

mq_overview.7

Michael Kerrisk

Remove unneeded CONFORMING TO section

nptl.7

Michael Kerrisk [Nicholas Miell]

Note that i386 and x86-64 binaries can't share mutexes

sched.7

Nikola Forró

Fix descriptions of sched_get_priority_max() / sched_get_priority_min()

sem_overview.7

Michael Kerrisk

Remove unneeded CONFORMING TO section

shm_overview.7

Michael Kerrisk

Remove unneeded CONFORMING TO section

sigevent.7

Michael Kerrisk

Remove unneeded CONFORMING TO section

symlink.7

Michael Kerrisk

Update with POSIX.1-2008 details for link(2)

ld.so.8

Michael Kerrisk [Jonathan David Amery]

Items in LD_LIBRARY_PATH can also be delimited by semicolons

See <http://bugs.debian.org/794559>.

Vince Weaver <vincent.weaver@maine.edu>
Zeng Linggang <zenglg.jy@cn.fujitsu.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

perf_event_open.2

Vince Weaver

4.1 adds AUX sample support

Vince Weaver

4.1 data_offset and data_size fields

Vince Weaver

[Alexander Shishkin]

Document aux_{head,tail,offset,size} support

Vince Weaver

4.0 update rdpmc documentation

Vince Weaver

4.1 adds PERF_RECORD_ITRACE_START

Vince Weaver

Document 4.1 clockid support

Vince Weaver [Steven Rostedt, Masami Hiramatsu]

4.1 PERF_EVENT_IOC_SET_BPF support

Vince Weaver

4.1 adds AUX_FLAG_OVERWRITE support

Vince Weaver

4.1 PERF_SAMPLE_BRANCH_CALL_STACK

Vince Weaver

4.1 adds aux_watermark

Vince Weaver

Add possibility of EBUSY error

prctl.2

Andy Lutomirski [Kees Cook, Serge Hallyn]

Document operations for ambient capabilities

Michael Kerrisk

Rework PR_CAP_AMBIENT text

Note that arg4 and arg5 must be zero for CAP_AMBIENT

RETURN VALUE: Add PR_CAP_AMBIENT + PR_CAP_AMBIENT_IS_SET case

ERRORS: document PR_CAP_AMBIENT error cases

[__ppc_set_ppr_med.3](#)

Gabriel F. T. Gomes

Document PPC functions providing access to PPR

GNU C Library commit 1747fcda4902a3b46183d93fb16ed9b436b2608b extends the priorities that can be set to the Program Priority Register (PPR), with the functions: `__ppc_set_ppr_very_low(3)` and `__ppc_set_ppr_med_high(3)`.

[capabilities.7](#)

Andy Lutomirski [Kees Cook, Serge Hallyn]

Document ambient capabilities

Michael Kerrisk

Various additions and reworkings for ambient capability text

New and changed links

[__ppc_set_ppr_med_high.3](#)

Gabriel F. T. Gomes

New link to [__ppc_set_ppr_med.3](#)

[__ppc_set_ppr_very_low.3](#)

Gabriel F. T. Gomes

New link to [__ppc_set_ppr_med.3](#)

Changes to individual pages

[mremap.2](#)

Eric B Munson [Michal Hocko]

Add note about `mremap()` with locked areas

When `mremap()` is used to move or expand a mapping that is locked with `mlock()` or equivalent it will attempt to populate the new area. However, like `mmap(MAP_LOCKED)`, `mremap()` will not fail if the area cannot be populated. Also like `mmap(MAP_LOCKED)` this might come as a surprise to users and should be noted.

[open.2](#)

Michael Kerrisk [David Drysdale]

Remove accidental mention of `O_TTY_INIT`

An earlier edit mentioned `O_TTY_INIT` as a file creation flag. That's true, according POSIX, but Linux does not implement this flag, so remove mention of it.

pipe.2

Michael Kerrisk

SEE ALSO: add splice(2)

prctl.2

Michael Kerrisk

Reorder options alphabetically

Employ a pseudo-alphabetical order, ordering options after removal of any "PR_", "PR_SET_", or "PR_GET" prefix.

Michael Kerrisk

Fix alphabetical misplacements in ERRORS

ptrace.2

Tycho Andersen

Document PTRACE_O_SUSPEND_SECCOMP flag

Michael Kerrisk

Document /proc/sys/kernel/yama/ptrace_scope

Michael Kerrisk

Note that PTRACE_ATTACH cannot be applied to nondumpable processes

Michael Kerrisk

SEE ALSO: add prctl(2)

reboot.2

Casper Ti. Vector

1-argument reboot() is also provided by alternative libc

seccomp.2

Michael Kerrisk

Describe use of 'instruction_pointer' data field

Michael Kerrisk [Kees Cook]

Note why all filters in a set are executed even after SECCOMP_RET_KILL

signalfd.2

Michael Kerrisk

Describe semantics with respect to SCM_RIGHTS

syscalls.2

Michael Kerrisk

Add mlock(2)

Michael Kerrisk

Add userfaultfd()

daemon.3

Michael Kerrisk [Johannes Stüttgen]

Note that daemon() is buggy with respect to controlling tty acquisition

dirfd.3

Jonathan Wakely

Remove outdated NOTES

As stated in the SYNOPSIS, since glibc 2.10 this function is also declared by the relevant X/Open and POSIX macros.

dlopen.3

Michael Kerrisk

Make it more explicit

that LD_BIND_NOW overrides RTLD_LAZY

Michael Kerrisk [Florian Weimer]

Correct the pathname used in EXAMPLE

Quoting Florian:

This does not work because libm.so can be a linker script:

```
handle = dlopen("libm.so", RTLD_LAZY);
```

The proper way to do this is to include <gnu/lib-names.h> and use LIBM_SO.

See https://bugzilla.kernel.org/show_bug.cgi?id=108821

Michael Kerrisk

Include a shell session showing build/run in EXAMPLE

Michael Kerrisk

Change arguments to main() to "void" in EXAMPLE

fgetgrent.3

Zeng Linggang

ATTRIBUTES: Note function that is not thread-safe

fgetpwent.3

Zeng Linggang

ATTRIBUTES: Note function that is not thread-safe

getauxval.3

Michael Kerrisk

Add some details for AT_SECURE

getspnam.3

Zeng Linggang

ATTRIBUTES: Note functions that are/aren't thread-safe

mallinfo.3

Zeng Linggang

ATTRIBUTES: Note function that is not thread-safe

mallopt.3

Carlos O'Donell

Document M_ARENA_TEST and M_ARENA_MAX

posix_fallocate.3

Michael Kerrisk

Clarify text relating to MT-safety

Carlos O'Donnell

Mention glibc emulation caveats

termios.3

Olivier TARTROU

Add missing details on behaviour of PARMRK

For a serial terminal, with a specific configuration, input bytes with value 0377 are passed to the program as two bytes, 0377 0377.

tty_ioctl.4

Michael Kerrisk [Peter Hurley]

Note that TIOCTTYGSTRUCT went away in Linux 2.5.67

core.5

Ross Zwisler

Add info about DAX coredump filtering flags

Kernel 4.4 added two new core dump filtering flags, MMF_DUMP_DAX_PRIVATE and MMF_DUMP_DAX_SHARED.

These flags allow us to explicitly filter DAX mappings.

This is desirable because DAX mappings, like hugetlb mappings, have the potential to

be very large.

nsswitch.conf.5

Nikola Forró

Add list of files being read when "files" service is used

This is not mentioned anywhere. Users can assume that the file being read is something like /etc/\$DATABASE, but that's not always the case. It's better to explicitly specify which file is read for each respective database. The list of files was acquired from glibc source code.

proc.5

Heinrich Schuchardt [Michael Kerrisk]

Add details for threads-max

Add detail information for threads-max.

The checks for minimum and maximum values exist since kernel 4.1.

<https://lkml.org/lkml/2015/3/15/96>

Heinrich Schuchardt

/proc/sys: Describe whitespace characters

Michael Kerrisk

Document 'CapAmb' in /proc/PID/status

Michael Kerrisk

Add reference to ptrace(2) for /proc/sys/kernel/yama/ptrace_scope

aio.7

Michael Kerrisk [Meikun Wang]

Add missing include file, <fcntl.h>, to example program

mq_overview.7

Michael Kerrisk [Arto Bendiken]

Document QSIZE bug that appeared in 3.5 and was fixed in 4.2

path_resolution.7

Michael Kerrisk

Clarify recursive resolution of symlinks and note limits

pipe.7

Michael Kerrisk

SEE ALSO: add splice(2)

rtld-audit.7

Namhyung Kim

Fix (typo) error in la_pltenter() description

s/la_pltenter()/la_pltexit(/

la_pltenter() is called regardless of the value of framesizep but la_pltexit() is called only if la_pltenter() returns with non-zero framesizep set. I spent long time to figure out why la_pltexit() is not called at all.

signal.7

Michael Kerrisk [Michael Hocko]

Note async-signal-safe functions added by POSIX.1-2008 TC1

tcp.7

Daniel Borkmann [Michael Kerrisk]

Improve paragraphs on tcp_ecn and add tcp_ecn_fallback bullet

Improve description

of tcp_ecn, fix the RFC number and it's

not a boolean anymore since long time, and add a description

for tcp_ecn_fallback.

See also kernel doc under Documentation/networking/ip-sysctl.txt

on tcp_ecn and tcp_ecn_fallback.

ld.so.8

Michael Kerrisk

LD_POINTER_GUARD has been removed in glibc 2.23

Michael Kerrisk

Describe secure-execution mode

Michael Kerrisk [Maria Guseva]

Replace mentions of set-UID/set-GID programs with secure-execution mode

Inspired by a patch from Maria Guseva.

Maria Guseva [Silvan Jegen]

LD_DEBUG is effective in secure-execution mode if /etc/suid-debug exists

===== Changes in man-pages-4.04 =====

Released: 2015-12-29, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Zefram <zefram@fysh.org>

Apologies if I missed anyone!

New and rewritten pages

copy_file_range.2

Anna Schumaker [Darrick J. Wong, Christoph Hellwig, Michael Kerrisk]

New page documenting copy_file_range()

copy_file_range() is a new system call for copying ranges of data completely in the kernel. This gives filesystems an opportunity to implement some kind of "copy acceleration", such as reflinks or server-side-copy (in the case of NFS).

personality.2

Michael Kerrisk

This page has been greatly expanded, to add descriptions of personality domains.

fmemopen.3

Michael Kerrisk [Adhemerval Zanella]

Significant reworking of this page:

- * Rework discussion of the (obsolete) binary mode
- * Split open_memstream(3) description into a separate page.
- * Note various fmemopen() bugs that were fixed in glibc 2.22
- * Greatly expand description of 'mode' argument
- * Rework description of 'buf' and 'len' arguments
- * Expand discussion

of "current position" for fmemopen() stream

ntp_gettime.3

Michael Kerrisk

New page describing ntp_gettime(3) and ntp_gettimex(3)

open_memstream.3

Michael Kerrisk

New page created by split of fmemopen(3).

At the same time, add and rework a few details in the text.

posix_spawn.3

Bill O. Gallmeister, Michael Kerrisk

New man page documenting posix_spawn(3) and posix_spawnp(3)

readdir.3

Michael Kerrisk [Florian Weimer]

Split readdir_r() content into separate page

As suggested by Florian Weimer:

It may make sense to move this documentation to a separate manual page, specific to readdir_r. This will keep the readdir() documentation nice and crisp. Most programmers will never have to consult all these details.

Michael Kerrisk

Near complete restructuring of the page and add some further details

Michael Kerrisk [Florian Weimer, Rich Felker,

Paul Eggert]

Add a lot more detail on portable use of the 'd_name' field

readdir_r.3

Michael Kerrisk [Florian Weimer]

New page created after split of readdir(3).

Michael Kerrisk [Florian Weimer]

Explain why readdir_r() is deprecated and readdir() is preferred

Michael Kerrisk [Florian Weimer]

Remove misleading code example using pathconf()

lirc.4

Alec Leamas

New page documenting lirc device driver

Newly documented interfaces in existing pages

adjtimex.2

Michael Kerrisk

Document ntp_adjtime(3)

epoll_ctl.2

Michael Kerrisk [Jason Baron]

Document EPOLLEXCLUSIVE

madvise.2

Minchan Kim [Michael Kerrisk]

Document MADV_FREE

Document the MADV_FREE flag added to madvise() in Linux 4.5.

proc.5

Michael Kerrisk

Document CmaTotal and CmaFree fields of /proc/meminfo

Michael Kerrisk

Document additional /proc/meminfo fields

Document DirectMap4k, DirectMap4M, DirectMap2M, DirectMap1G

Michael Kerrisk

Document MemAvailable /proc/meminfo field

Michael Kerrisk

Document inotify /proc/PID/fdinfo entries

Michael Kerrisk

Document fanotify /proc/PID/fdinfo entries

Michael Kerrisk

Add some kernel version numbers for /proc/PID/fdinfo entries

Michael Kerrisk [Patrick Donnelly]

/proc/PID/fdinfo displays the setting of the close-on-exec flag

Note also the pre-3.1 bug in the display of this info.

socket.7

Craig Gallek [Michael Kerrisk, Vincent Bernat]

Document some BPF-related socket options

Document the behavior and the first kernel version for each of the following socket options:

SO_ATTACH_FILTER
SO_ATTACH_BPF
SO_ATTACH_REUSEPORT_CBPF
SO_ATTACH_REUSEPORT_EBPF
SO_DETACH_FILTER
SO_DETACH_BPF

SO_LOCK_FILTER

New and changed links

isalpha.1.3

Michael Kerrisk

New link to isalpha.3

longjmp.3

Michael Kerrisk

Replace page with link to setjmp(3), which now incorporates longjmp()

ntp_adjtime.3

Michael Kerrisk

New link to adjtimex(2)

ntp_gettimex.3

Michael Kerrisk

New link to ntp_gettime.3

open_wmemstream.3

Michael Kerrisk

Update link to point to new open_memstream(2) page

posix_spawn.3

Michael Kerrisk

New link to new posix_spawn.3 page

siglongjmp.3

Michael Kerrisk

Rewire link to point to setjmp(3)

strerror_1.3

Michael Kerrisk

New link to strerror.3

Fix missing link

Global changes

Various pages

Michael Kerrisk

Update FTM requirements (`_DEFAULT_SOURCE`)

Michael Kerrisk

Update feature test macro requirements

Update to use `_DEFAULT_SOURCE`, and also changes brought by glibc

commit 266865c0e7b79d4196e2cc393693463f03c90bd8.

Various pages

Michael Kerrisk

Simplify FTM requirements

Looking at `<features.h>` (or `feature_test_macros(7)`), one can see that when `_XOPEN_SOURCE` is defined with the value 700 (or greater), then `_POSIX_C_SOURCE` is defined with the value 200809L (or greater). Therefore, terms in the man pages such as

```
_XOPEN_SOURCE\ >=\ 700 || _POSIX_C_SOURCE\ >=\ 200809L
```

can be simplified to:

```
_POSIX_C_SOURCE\ >=\ 200809L
```

Various pages

Michael Kerrisk

Simplify FTM requirements

Looking at <features.h> (or feature_test_macros(7)), one can see that when `_XOPEN_SOURCE` is defined with the value 600 (or greater), then `_POSIX_C_SOURCE` is defined with the value 200112L (or greater). Therefore, terms in the man pages such as

```
_XOPEN_SOURCE\ >=\ 600 || _POSIX_C_SOURCE\ >=\ 200112L
```

can be simplified to:

```
_POSIX_C_SOURCE\ >=\ 200112L
```

Various pages

Michael Kerrisk

Simplify FTM requirements

`_XOPEN_SOURCE` implies `_POSIX_C_SOURCE >=2`, so simplify FTM requirements in various pages.

Various pages

Michael Kerrisk

Remove "or 'cc -std=c99'" from SYNOPSIS

Under the FTM requirements all of these pages document the requirement for `_ISOC99_SOURCE`. And feature_test_macros(7) now documents that "cc -std=c99" produces the same effect as defining `_ISOC99_SOURCE`. So, all of these pages don't additionally need to specify "or 'cc -std=c99'" under the FTM requirements in the SYNOPSIS. Removing that redundant text also simplifies the SYNOPSIS a little.

Various pages

Michael Kerrisk

Simplify FTM requirements

Looking at <features.h> (or feature_test_macros(7)), one can see that when `_XOPEN_SOURCE` is defined with the value 600 (or greater), then `_POSIX_C_SOURCE` is defined with the value 200112L (or greater). Therefore, terms in the man pages such as

```
_XOPEN_SOURCE\ >=\ 600 || _POSIX_C_SOURCE\ >=\ 200112L
```

can be simplified to:

```
_POSIX_C_SOURCE\ >=\ 200112L
```

Various pages

Michael Kerrisk

Remove references to `_XOPEN_SOURCE_EXTENDED` in SYNOPSIS

`_XOPEN_SOURCE_EXTENDED` is obsolete (it existed in SUSv1, but not subsequent standards). `_XOPEN_SOURCE >= 500` produces the same effects as `(_XOPEN_SOURCE && _XOPEN_SOURCE_EXTENDED)`. Modifying the SYNOPSIS of various ages that contain:

```
_XOPEN_SOURCE\ >=\ 500 ||  
  _XOPEN_SOURCE\ &&\ _XOPEN_SOURCE_EXTENDED
```

to just:

```
_XOPEN_SOURCE\ >=\ 500
```

This has the following benefits:

- a) Simplifying the SYNOPSIS by removing ancient historical information.
- b) Preventing users from being misled into using `_XOPEN_SOURCE_EXTENDED` in new source code.

Various pages

Michael Kerrisk

Remove mention of the obsolete `_POSIX_SOURCE` macro from SYNOPSIS
`_POSIX_SOURCE` was a POSIX.1-1990 creation that was soon made obsolete by `_POSIX_C_SOURCE`. Retaining mention of it in the feature test macro requirements section of the SYNOPSIS doesn't contain important information, and may mislead readers into actually trying to use this macro. A few mentions of it are maintained in a some pages where defining `_POSIX_SOURCE` inhibits some behavior.

Various sockets-related pages

Michael Kerrisk [Carlos O'Donnell]

Use consistent argument/variable names for socket addresses and lengths
As noted by Carlos, there's quite a bit of inconsistency across pages. Use 'addr' and 'addrlen' consistently in variables and function arguments.

Various pages

Michael Kerrisk

Wording fix: "current file offset" ==> "file offset"
"File offset" is the preferred POSIX terminology.

Various pages

Michael Kerrisk

Word "descriptor" more precisely

Use either "file descriptor" or "message queue descriptor".

Various pages

Michael Kerrisk

ERRORS: add reference to `signal(7)` in description of `EINTR`

Changes to individual pages

locale.1

Marko Myllynen

Add "locale -c charmap" as an example

Addresses https://bugzilla.kernel.org/show_bug.cgi?id=104511.

localedef.1

Marko Myllynen

Add hint on purpose of `--no-archive`

Indicate why using `--no-archive` might be a good idea. The issue is that if you create a custom locale with `localedef(1)` and put it to the locale archive then during the next `glibc` upgrade the locale archive

is updated as well and your custom locale is gone.)

accept.2

Michael Kerrisk

ERRORS: improve description for `EBADF`

adjtimex.2

Michael Kerrisk [John Stultz]

Various improvements after feedback from John Stultz

Michael Kerrisk

Remove `FTM` requirements

It seems that `adjtimex()` never needed `_BSD_SOURCE` (and my earlier commit `5918743bc8b02b` was simply a blunder).

Michael Kerrisk

Split `EINVAL` error cases

Michael Kerrisk

Note treatment of out-of-range `buf.offset`

Michael Kerrisk

Don't refer reader to `adjtime(3)`

Probably, it's not wise to suggest `adjtime(3)` as the more portable API. Rather, `ntp_adjtime(3)` should be used.

Michael Kerrisk [Naresh Kamboju]

Update details of `buf.offset` `EINVAL` error

Michael Kerrisk

SEE ALSO: add `ntp_gettime(3)`

Michael Kerrisk

Improve description of some PPS timex fields

Michael Kerrisk

Add ATTRIBUTES

section

William Preston [Petr Gajdos]

Update a detail in adjtimex return value description

Michael Kerrisk

Note range constraints and clamping for ADJ_FREQUENCY

bdflush.2

Michael Kerrisk

Note that glibc support for this system call went away in version 2.23

bind.2

Michael Kerrisk

Improve description of ENOENT error

bpf.2

Michael Kerrisk

Document close-on-exec semantics

The close-on-exec file descriptor flag is automatically enabled for FDs returned by bpf().

chmod.2

Michael Kerrisk

Clarify terminology (file mode versus file permission bits)

chown.2

Michael Kerrisk

ERRORS: improve EBADF description

clone.2

unshare.2

Michael Kerrisk

Remove mention of `_BSD_SOURCE` and `_SVID_SOURCE`

The right way to expose declarations for these Linux-specific system calls was always `_GNU_SOURCE`. Mentioning the historical use of `_BSD_SOURCE`

and `_SVID_SOURCE` just clouds the issue.

connect.2

Michael Kerrisk

ERRORS: improve EBADF description

create_module.2

Michael Kerrisk

Glibc 2.23 removed last vestiges of support for this system call

delete_module.2

Michael Kerrisk

Glibc 2.23 removed last vestiges of support for this system call

epoll_ctl.2

Michael Kerrisk

Document ELOOP error for circular monitoring loops

eventfd.2

Michael Kerrisk

Note that eventfd info is available in /proc/PID/fdinfo

execve.2

Michael Kerrisk [Krzysztof Adamski]

Add EPERM error for capabilities check of capability-dumb binaries

Michael Kerrisk

Add reference to ld-linux.so(8)

Michael Kerrisk

SEE ALSO: add system(3)

fanotify_init.2

Michael Kerrisk

Note kernel version that allowed O_CLOEXEC for event_f_flags

fcntl.2

flock.2

Michael Kerrisk

SEE ALSO: add lslocks(8)

fcntl.2

Michael Kerrisk [Jason Vas Dias]

Rework description

of F_SETOWN

As suggested by Jason, make it clearer that I/O signalling requires the use of both F_SETOWN and O_ASYNC. While we're at, make a few other cleanups to the text.

Michael Kerrisk

Remove mention of _BSD_SOURCE to get definition of F_SETOWN/F_GETOWN

This usage went away in glibc 2.20, and the simplest remedy is just to omit mention of it.

futex.2

Michael Kerrisk

FUTEX_CLOCK_REALTIME can now be used with FUTEX_WAIT

get_kernel_syms.2

Michael Kerrisk

Note that glibc does not support this system call

init_module.2

Michael Kerrisk

Glibc 2.23 removed last vestiges of support for this system call

ioctl_list.2

Heinrich Schuchardt

Include uapi/linux/wireless.h

Add the list of wireless IOCTLS.

Heinrich Schuchardt

Path to sockios.h

sockios.h is now in include/uapi

Heinrich Schuchardt

Add reference to netdevice.7

netdevice.7 describes most of the IOCTLS of sockios.h

Heinrich Schuchardt

Transfer structure (wireless.h IOCTLS)

The sole parameter to be passed to the wireless.h IOCTLS is of type struct iwreq*.

ioperm.2

Michael Kerrisk [Alex Henrie]

ioperm.2: Permissions are inherited across fork(2)

See https://bugzilla.kernel.org/show_bug.cgi?id=99911

iopl.2

Michael Kerrisk [Alex Henrie]

Permissions are not inherited across fork(2) or preserved on execve(2)

See https://bugzilla.kernel.org/show_bug.cgi?id=99901

lseek.2

Michael Kerrisk

FUSE now supports SEEK_HOLE and SEEK_DATA

Michael Kerrisk

NFS supports SEEK_HOLE and SEEK_DATA

Michael Kerrisk

SEE ALSO: add open(2)

madvise.2

Michael Kerrisk

Clarify MADV_HWPOISON wording to say that it applies to a page range

mknod.2

Michael Kerrisk

SEE ALSO: add mknod(1)

mount.2

Michael Kerrisk

SEE ALSO: add findmnt(8)

open.2

Michael Kerrisk

NOTES: mention existence of proc/PID/fd and /proc/PID/fdinfo

Mark Post [Petr Gajdos]

O_TMPFILE support is now provided by Btrfs

pipe.2

Michael Kerrisk [Eric Blake]

Note treatment of 'pipefd' on error

poll.2

Michael Kerrisk [Josh Triplett]

Document spurious EAGAIN error that can occur on other systems

Light reworking of text proposed by Josh Triplett.

readlink.2

Michael Kerrisk

Clarify EINVAL error description

recv.2

Heinrich Schuchardt

Equivalence to read()

Describe the recv(2)-read(2) and the recvfrom(2)-recv(2)

equivalences for zero-valued arguments.

Michael Kerrisk

MSG_WAITALL has no effect for datagram sockets

recv.2

cmsg.3

Nikola Forró

Fix type of cmsg_len member of cmsghdr structure

The type shown for cmsg_len member of cmsghdr structure is socklen_t,

but the actual

type used by glibc and the kernel is size_t.

The information was obtained from glibc source code:

<http://bit.ly/21m1RMp>

Michael Kerrisk

Note that cmsg_len is typed as socklen_t in POSIX.1

sched_setaffinity.2

Michael Kerrisk [Florian Weimer, Florian Weimer]

Warn that CPU_ALLOC() may allocate a slightly CPU set than requested

Michael Kerrisk [Florian Weimer]

Add reference to CPU_ALLOC(3)

sched_setattr.2

Michael Kerrisk [Akihiro Suda]

EPERM depends on affinity mask of target thread, not calling thread

select.2

Michael Kerrisk [Josh Triplett]

Document spurious EAGAIN error that can occur on other systems

Light reworking of text proposed by Josh Triplett.

Nikos Mavrogiannopoulos

Mention the 'fd_set' size limitation early and refer to poll(2)

Change this because of the serious limitation of select()

imposing a limit on the range of file descriptors that

can

be monitored. This is currently mentioned too late in the documentation (in the NOTES section). The man page should warn early and refer to poll(2) as soon as possible.

Michael Kerrisk

Add details on the glibc fixed-size fd_set limitation

No modern application should use select() on Linux.

select_tut.2

Michael Kerrisk

Some readability fixes to example program

Michael Kerrisk

Better variable names in example program

Michael Kerrisk

Simplify 'if' logic in example program

Michael Kerrisk

Use correct type (socklen_t) for addrlen

semctl.2

Michael Kerrisk [Davidlohr Bueso, Manfred Spraul, Philip Semanchuk]

NOTES: note when 'sempid' is set on various implementations

See https://bugzilla.kernel.org/show_bug.cgi?id=112271 and

<http://thread.gmane.org/gmane.linux.kernel/2162754/>

Subject: [PATCH] Don't set sempid in semctl syscall.

Date: 2016-02-26 12:21:38 GMT

semop.2

Michael Kerrisk

Tweak comment describing 'sempid'

sendfile.2

Askar Safin

Fix incorrect description in text referring to splice(2)

Michael Kerrisk

SEE ALSO: add copy_file_range(2)

setpgid.2

Michael Kerrisk

Correct/simplify FTM requirements for BSD setpgrp() and getpgrp()

signalfd.2

Michael Kerrisk

Note that signalfd info is available in /proc/PID/fdinfo

sigprocmask.2

Michael Kerrisk [Mike Frysinger]

Explicitly refer the reader to sigsetops(3)

This man page did not make it obvious which functions should be used for manipulating signals sets, nor where those functions were documented.

socketpair.2

Michael Kerrisk [Eric Blake]

Note treatment of 'sv' on error

splice.2

Askar Safin

Improve description of 0 return value.

See https://bugzilla.kernel.org/show_bug.cgi?id=90911

statfs.2

Michael Kerrisk [Jakub Wilk]

Use consistent case for hex constants

sync.2

Christoph Hellwig

Clarify description and document the Linux data integrity guarantees

syscall.2

Mike Frysinger

Add more architectures and improve error documentation

Move the error register documentation into the main table rather than listing them in sentences after the fact.

Add sparc error return details.

Add details for alpha/arc/m68k/microblaze/nios2/powerpc/superh/tile/xtensa.

syscalls.2

Michael Kerrisk

Add copy_file_range(2)

times.2

Kondo, Naoya

Fix an incorrect description in NOTES

The text has an incorrect description in NOTES, it says that $(2^{32}/\text{HZ}) - 300$ is about 429 million. It is correct only if $\text{HZ}=10$ which does not look common today. So just removing "(i.e., about 429 million)" is good enough.

truncate.2

Michael Kerrisk

SEE ALSO: add truncate(1)

uselib.2

Michael Kerrisk

Mention CONFIG_USELIB

Michael Kerrisk

Note that glibc does not support this (obsolete) system call

wait.2

wait4.2

Michael Kerrisk

Rename the "status" argument to "wstatus"

The fact that `exit(3)/_exit(2)` has an argument called "status" and the same name is used in the arguments to the `wait*()` calls can a little too easily lead the user into thinking that the two arguments hold the same information, when of course they don't. So, use a different name for the argument of the `wait*()` functions, to reduce the chances of such confusion.

backtrace.3

Michael Kerrisk [Martin Gebert]

Small fixes to example program

clearenv.3

Michael Kerrisk [Matt Zimmerman]

Clarify the use and effect of `clearenv()`

See <http://bugs.debian.org/679323>

Michael Kerrisk

Variables can be added to the environment after calling `clearenv()`

clog10.3

Michael Kerrisk

Show an alternative equivalence for `clog10()`

Michael Kerrisk

Update CONFORMING TO

Fix grammar error and add C11.

dl_iterate_phdr.3

Michael Kerrisk [Paul Pluzhnikov]

Describe 'struct dl_phdr_info' fields added in glibc 2.4

See https://bugzilla.kernel.org/show_bug.cgi?id=103011

Michael Kerrisk [Simon Que]

Note that first object visited by 'callback' is the main program

See https://bugzilla.kernel.org/show_bug.cgi?id=94141

errno.3

Michael Kerrisk

Add some explanation of ENOENT error

exec.3

Michael Kerrisk

SEE ALSO: add system(3)

exp.3

Michael Kerrisk [Joachim Wuttke]

SEE ALSO: add expm1(3)

fopen.3

Michael Kerrisk

SEE ALSO: add open_memstream(3)

fts.3

Michael Kerrisk

BUGS: glibc-2.23 now has LFS support for the fts functions

gamma.3

Michael Kerrisk [Alan Cox]

gamma() was documented in SVID 2

getaddrinfo.3

Michael Kerrisk [Andreas Schwab, Orion Poplawski]

Update FTM requirements for glibc 2.22

Since glibc 2.22 getaddrinfo() etc. are only declared for
POSIX.1-2001 or later.

getcwd.3

Michael Kerrisk

SEE ALSO: add pwd(1)

opendir.3

Michael Kerrisk

Help the reader by explicitly mentioning the use of `readdir(3)`

`perror.3`

Michael Kerrisk

Suggest use of `strerror(3)` in place of deprecated `'sys_errlist'`

`posix_fallocate.3`

J r mie Galarneau

ERRORS: add `EINTR`

The glibc implementation of `posix_fallocate()`, which calls `fallocate()`, may be interrupted. The `fallocate()` emulation also makes use of `pread()/pwrite()`, which may also be interrupted.

`posix_memalign.3`

Michael Kerrisk [Eric Blake]

Note `posix_memalign()`'s treatment of `'memptr'` on error

`pthread_setaffinity_np.3`

Michael Kerrisk

SEE ALSO: add

`CPU_SET(3)`

`queue.3`

Dr. Tobias Quathamer

Remove double `CONFORMING TO` section

`rcmd.3`

Nikola Forr 

Add missing condition concerning `.rhosts` file

The list of conditions determining if `iruserok()` and `ruserok()` functions automatically fail is incomplete. According to glibc source code, the functions also fail if the `.rhosts` file is hard linked anywhere.

`setbuf.3`

Michael Kerrisk

SEE ALSO: add `stdbuf(1)`

`setjmp.3`

Michael Kerrisk

Rewrite and merge `longjmp()/siglongjmp()` discussion into this page

The discussion of nonlocal gotos is much easier to read if `setjmp()` and `longjmp()` are discussed in the same page. While we're at it, rework almost the entire text and add several more details.

Michael Kerrisk

Note the interactions of `longjmp()` and non-async-signal-safe functions
POSIX.1-2008 TC2 adds explicit text on this point.

See <http://austingroupbugs.net/view.php?id=516#c1195>

Michael Kerrisk

Explain why nonlocal gotos make code harder to maintain

Michael Kerrisk

Reword warning on `longjmp()` to function that has already returned

Michael Kerrisk

Remove reference to obsolete `_XOPEN_SOURCE_EXTENDED`

`sleep.3`

Michael Kerrisk

SEE ALSO: add `sleep(1)`

`strftime.3`

Michael Kerrisk [Jeremy Harris]

Note which 'tm' fields are used to calculate each output string

See https://bugzilla.redhat.com/show_bug.cgi?id=1162218

`strlen.3`

Michael Kerrisk [Alan Aversa]

CONFORMING TO: add C11

`system.3`

Michael Kerrisk

SEE ALSO: add `execve(2)`

`termios.3`

Dr. Tobias Quathamer

Document line length in canonical mode

See https://git.kernel.org/cgit/linux/kernel/git/torvalds/linux.git/tree/drivers/tty/n_tty.c#n1673

See <https://bugs.debian.org/797479>

Michael Kerrisk

SEE ALSO: add `tty(1)`

Michael Kerrisk [Peter Hurley]

Further improvements to recent tweaks of canonical mode 4096 char limit

`timegm.3`

Michael Kerrisk [Stephen Hurd, Mats Wichmann]

Remove sample implementation of `timegm()`

Stephen and Mats both question the wisdom of showing a portable

non-thread-safe implementation of `timegm()`, and I find it

hard to disagree. So, remove this code.

See https://bugzilla.kernel.org/show_bug.cgi?id=103701

Michael Kerrisk

Expand DESCRIPTION a little

st4.4

Dr. Tobias Quathamer

Remove spurious copyright section

tty_ioctl.4

Michael Kerrisk

SEE ALSO: add ldattach(1)

elf.5

Michael Kerrisk [Gabriel Corona, Mike Frysinger]

Fix description of STV_PROTECTED

Michael Kerrisk

Improve description of STV_DEFAULT

Michael Kerrisk

Improve description of STV_HIDDEN

Chris Pick

Remove erroneous, duplicate SHN_* section

Michael Kerrisk

[Chris Pick]

Reword discussion of range values a little

gai.conf.5

Michael Kerrisk

Add VERSIONS section

group.5

Michael Kerrisk

SEE ALSO: add groups(2)

SEE ALSO: add gpasswd(1)

SEE ALSO: add sg(1)

SE ALSO: add gshadow(5)

SEE ALSO: add chgrp(1)

locale.5

Marko Myllynen [Mike Frysinger]

tel + fax are deprecated

nsswitch.conf.5

Nikola Forró

Update NSS compatibility mode description

utmp.5

Michael Kerrisk

SEE ALSO: add lslogins(1)

aio.7

Andreas Gruenbacher

Improve example

When `aio_sigevent.sigev_notify` is set to `SIGEV_SIGNAL`, signal handlers called for asynchronous I/O operations will have `si->si_code` set to `SI_ASYNCIO`. Check to make sure that `si->si_value.sival_ptr` is defined.

capabilities.7

Michael Kerrisk

Explain safety check for capability-dumb binaries

Michael Kerrisk

SEE ALSO: add `sg(1)`, `su(1)`

SEE ALSO: add `id(1)`, `group(5)`, `passwd(5)`

credentials.7

Michael Kerrisk

SEE ALSO: add `groups(2)`

environ.7

Michael Kerrisk

Describe the Bourne "NAME=value command" syntax

Michael Kerrisk

Add some details describing how shell's environment is initialized

Michael Kerrisk

Note that child of `fork(2)` inherits copy of parent's environment

Michael Kerrisk

SEE ALSO: add `pam_env(3)`

epoll.7

Michael Kerrisk

Mention that epoll info is available via `/proc/PID/fdinfo`

fanotify.7

Michael Kerrisk

Refer reader to `proc(5)` for info on `/proc/PID/fdinfo` fanotify entries

feature_test_macros.7

Michael Kerrisk

Add a summary of some FTM key points

Michael Kerrisk

Give an early hint about some macros being defined by default

Michael Kerrisk

Clarify relation between `_XOPEN_SOURCE >=500` and `_XOPEN_SOURCE_EXTENDED`

Emphasize that defining `_XOPEN_SOURCE >=500` produces same

effects as defining `_XOPEN_SOURCE_EXTENDED`.

Michael Kerrisk

Note that man pages don't mention `_XOPEN_SOURCE_EXTENDED`
As per previous commit, mention of `_XOPEN_SOURCE_EXTENDED`
has generally been removed from the man pages.

Michael Kerrisk

Note effects of "cc -std=c99" and "cc -std=c11"

Michael Kerrisk

Clarify some `_ISOC99_SOURCE` / `_DEFAULT_SOURCE` details

Michael Kerrisk

Clarify that `_XOPEN_SOURCE_EXTENDED` is obsolete
Since SUSv2, `_XOPEN_SOURCE_EXTENDED` is no longer specified
in the standard.

inotify.7

Michael Kerrisk

Refer reader to `proc(5)` for info on `/proc/PID/fdinfo` inotify entries

ip.7

Eric Dumazet

Document `IP_BIND_ADDRESS_NO_PORT` socket option

mq_overview.7

Michael Kerrisk

Note that the close-on-exec flag is automatically set on MQ descriptors

namespaces.7

Michael Kerrisk

SEE ALSO: add `lsns(1)`

`lsns(1)` was recently

added in `util-linux`, probably to appear

in next release (2.28?).

pipe.7

Michael Kerrisk [Jason Vas Dias]

Clarify that I/O signalling requires use of both `F_SETOWN` and `O_ASYNC`

Michael Kerrisk

SEE ALSO: add `mkfifo(1)`

signal.7

Michael Kerrisk

Note the interactions of `longjmp()` and non-async-signal-safe functions

See <http://austingroupbugs.net/view.php?id=516#c1195>.

socket.7

Michael Kerrisk

SEE ALSO: add `pcap(3)`

SEE ALSO: add `wireshark(1)` and `tcpdump(8)`

standards.7

Michael Kerrisk
Add POSIX.1-2008 TC2 (POSIX.1-2016)

svipc.7

Michael Kerrisk
Tweak description of 'sempid'
Michael Kerrisk
SEE ALSO: add lsipc(1)

symlink.7

Michael Kerrisk [Zefram]
Some "magic" symlinks have permissions other than 0777
See <https://bugs.debian.org/743525>

time.7

Michael Kerrisk
SEE ALSO: add timeout(1)
SEE ALSO: add ntp_adjtime(3) and ntp_gettime(3)

unicode.7

Dr. Tobias Quathamer
Document private use areas
See <https://bugs.debian.org/285444>

unix.7

Heinrich Schuchardt
Add example
A complete example demonstrating the usage of sockets for local interprocess communication is added.
Michael Kerrisk
Introduce term "sequenced-packet" for SOCK_SEQPACKET
Michael Kerrisk
Some wording improvements

==== Changes in man-pages-4.06 =====

Released: 2016-05-09, Oslo

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Alexander Miller <alex.miller@gmx.de>

Alon Bar-Lev <alon.barlev@gmail.com>
Benjamin Poirier <bpoirier@suse.com>
Christoph Hellwig <hch@lst.de>
Colin Ian King <colin.king@canonical.com>
Dr. Tobias Quathamer <toddy@debian.org>
Ed Avis <eda@waniasset.com>
Georg Sauthoff
<gsauthof@techfak.uni-bielefeld.de>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Jakub Wilk <jwilk@jwilk.net>
Jordan Birks <birkSES@hotmail.com>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Nikola Forró <nforro@redhat.com>
Rasmus Villemoes <linux@rasmusvillemoes.dk>
Serge E. Hallyn <serge@hallyn.com>
Serge Hallyn <serge.hallyn@ubuntu.com>
Valery Reznic <valery_reznic@yahoo.com>
Zubair Lutfullah Kakakhel <Zubair.Kakakhel@imgtec.com>

Apologies if I missed anyone!

New and rewritten pages

cgroups.7

Serge Hallyn, Michael Kerrisk
New page documenting cgroups

cgroup_namespaces.7

Michael Kerrisk [Serge Hallyn]
New page describing cgroup namespaces

Newly documented interfaces in existing pages

clone.2

Michael Kerrisk
Document CLONE_NEWCGROUP

readv.2

Christoph Hellwig
Document preadv2() and pwritev2()

setns.2

Michael Kerrisk
Document CLONE_NEWCGROUP

unshare.2

Michael Kerrisk
Document CLONE_NEWCGROUP

Changes to individual pages

clock_getres.2

Michael Kerrisk [Rasmus Villemoes]
Note that coarse clocks need architecture and VDSO support

clone.2

fork.2

Nikola Forró
Document ERESTARTNOINTR error code

clone.2

Michael Kerrisk [Colin Ian King]
ERRORS: add EINVAL for improperly aligned 'child_stack' value

execve.2

Michael Kerrisk [Valery Reznic]
Since Linux 2.6.28, recursive script interpretation is supported

fcntl.2

Michael Kerrisk
Note that mandatory locking is now governed by a configuration option

fsync.2

Michael Kerrisk [Georg Sauthoff]
Give some examples of files where sync can fail with EINVAL

getrlimit.2

Michael Kerrisk
SEE ALSO: add cgroups(7)

ioctl_fat.2

Heinrich Schuchardt
Use %04x to print volume ID
Leading zeroes
should be used when display a FAT volume ID.

ioprio_set.2

Michael Kerrisk

SEE ALSO: add cgroups(7)

lseek.2

Michael Kerrisk

Note that 'off_t' is an integer data type defined by POSIX

memfd_create.2

Michael Kerrisk

Note that memfd_create() does not have a glibc wrapper

mount.2

Michael Kerrisk

MS_MANDLOCK requires CAP_SYS_ADMIN (since Linux 4.5)

quotactl.2

Michael Kerrisk

Document Q_GETNEXTQUOTA and Q_XGETNEXTQUOTA

Michael Kerrisk

Rework/reorder ERRORS list

Make into a single alphabetically ordered list

Michael Kerrisk

Note kernel version that removed Q_GETSTATS

Michael Kerrisk

Add kernel version for G_GETINFO, Q_SETINFO, and Q_GETFMT

readv.2

Michael Kerrisk

Clarify that 'size_t' and 'ssize_t' are integer types specified in POSIX

semctl.2

Michael Kerrisk

From kernel 4.6, Linux now updates 'sempid' on SETALL operations

sigaction.2

Michael Kerrisk

Document SEGV_BNDERR

Michael Kerrisk

Document SEGV_PKUERR

syscalls.2

Michael Kerrisk

Add preadv2() and pwritev2()

write.2

Michael Kerrisk

Clarify that 'size_t' and 'ssize_t' are integer types specified in POSIX

makedev.3

Mike Frysinger

Use `<sys/sysmacros.h>` in SYNOPSIS

Defining these functions via `<sys/types.h>` causes problems for some folk. As noted by Zack Wein:

libstdc++ force-enables `_GNU_SOURCE`, which means people writing in C++ `_can't_` avoid these nonstandard macros by using a strict conformance mode.

Since glibc has basically always used `<sys/sysmacros.h>`, update the docs to have people include that instead.

Michael Kerrisk

NOTES: mention that `<sys/types.h>` may also define these macros

popen.3

Nikola Forró

RETURN VALUE: describe successful case

Reference:

<http://pubs.opengroup.org/onlinepubs/9699919799/functions/popen.html>

<http://pubs.opengroup.org/onlinepubs/9699919799/functions/pclose.html>

strtod.3

Michael Kerrisk [Ed Avis]

Improve a detail in RETURN VALUE

core.5

Michael Kerrisk

Document `/proc/sys/kernel/core_pipe_limit`

locale.5

Marko Myllynen

Adjust `LC_IDENTIFICATION` / abbreviation

Tiny tweak to locale.5 based on ISO/IEC TR 14652:

<http://www.open-std.org/jtc1/SC22/WG20/docs/n972-14652ft.pdf>

Marko Myllynen

Update `LC_ADDRESS` after glibc change

This patch updates locale.5 to match the recent glibc change in commit `a837257199ffab76237385b830cc7b6179fc2f18`

Marko Myllynen

Complete `LC_COLLATE`

Here's the first attempt to (almost) complete the locale.5 manual page by documenting all (but perhaps one) of the missing `LC_COLLATE` keywords.

Mike Frysinger

`country_car`: Add a better description

nsswitch.conf.5

Marko Myllynen

Document group merging

Document the recently merged glibc group merge support.

Glibc commit [ced8f8933673f4efda1d666d26a1a949602035ed](https://sourceware.org/glibc/wiki/Proposals/GroupMerging)

<https://sourceware.org/glibc/wiki/Proposals/GroupMerging>

proc.5

Michael Kerrisk

Move /proc/PID/cgroup discussion to cgroups(7) page

Michael Kerrisk

Add some background on why /proc/PID/mountinfo was added

Michael Kerrisk

Improve description of /proc/PID/mountinfo 'root' field

Michael Kerrisk

Add pointer to cgroups(7) for documentation of /proc/cgroups

Michael Kerrisk

Add reference to core(5) for info on /proc/sys/kernel/core_pipe_limit

cpuset.7

Michael Kerrisk

SEE ALSO: add cgroups(7)

ip.7

Benjamin Poirier

Fix incorrect sockopt name

"IP_LEAVE_GROUP" does not exist. It was perhaps a confusion with

MCAST_LEAVE_GROUP. Change the text to IP_DROP_MEMBERSHIP which has

the same function as MCAST_LEAVE_GROUP and is documented in the
ip.7 man page.

Reference:

Linux kernel net/ipv4/ip_sockglue.c do_ip_setsockopt()

namespaces.7

Michael Kerrisk

SEE ALSO: add cgroups(7), cgroup_namespaces(7)

vdso.7

Zubair Lutfullah Kakakhel [Mike Frysinger]

Update for MIPS

Document the symbols exported by the MIPS VDSO.

VDSO support was added from kernel 4.4 onwards.

See <https://git.kernel.org/cgit/linux/kernel/git/torvalds/linux.git/log/arch/mips/vdso>

Michael Kerrisk [Rasmus Villemoes]

The `__kernel_clock_*` interfaces don't support `*_COARSE` clocks on PowerPC

ld.so.8

Michael Kerrisk [Alon Bar-Lev]

Document use of \$ORIGIN, \$LIB, and \$PLATFORM in environment variables

These strings are meaningful in LD_LIBRARY_PATH and LD_PRELOAD.

==== Changes in man-pages-4.07 =====

Released: 2016-07-17, Ulm

"Yuming Ma()" <mayuming@le.com>

Apologies if I missed anyone!

New and rewritten
pages

ioctl_fideduperange.2

Darrick J. Wong [Christoph Hellwig, Michael Kerrisk]
New page documenting the FIDEDUPERANGE ioctl
Document the FIDEDUPERANGE ioctl, formerly known as
BTRFS_IOC_EXTENT_SAME.

ioctl_ficlonerange.2

Darrick J. Wong [Christoph Hellwig, Michael Kerrisk]
New page documenting FICLONE and FICLONERANGE ioctls
Document the FICLONE and FICLONERANGE ioctls, formerly known as
the BTRFS_IOC_CLONE and BTRFS_IOC_CLONE_RANGE ioctls.

nextup.3

Michael Kerrisk
New page documenting nextup(), nextdown(), and related functions

mount_namespaces.7

Michael Kerrisk [Michael Kerrisk]

New page describing mount namespaces

Newly documented interfaces in existing pages

mount.2

Michael Kerrisk

Document flags used to set propagation type

Document MS_SHARED, MS_PRIVATE, MS_SLAVE, and MS_UNBINDABLE.

Michael Kerrisk

Document the MS_REC flag

ptrace.2

Michael Kerrisk [Kees Cook, Jann Horn, Eric W. Biederman, Stephen Smalley]

Document ptrace access modes

proc.5

Michael Kerrisk

Document /proc/[pid]/timerslack_ns

Michael Kerrisk

Document /proc/PID/status 'Ngid' field

Michael Kerrisk

Document /proc/PID/status fields: 'NStgid', 'NSpid', 'NSpgid', 'NSsid'

Michael Kerrisk

Document /proc/PID/status 'Umask' field

New and changed links

preadv2.2

pwritev2.2

Michael Kerrisk

New links to readv(2)

nextdown.3

nextdownf.3

nextdownl.3

nextupf.3

nextupl.3

Michael Kerrisk

New links to nextup(3)

Changes to individual pages

ldd.1

Michael Kerrisk

Add a little more detail on why ldd is unsafe with untrusted executables

Michael Kerrisk

Add more detail on the output of ldd

localedef.1

Marko Myllynen

Drop --old-style

description

The glibc upstream decided to drop localedef(1) --old-style option [1] altogether, I think we can do the same with localedef(1), the option hasn't done anything in over 16 years and I doubt anyone uses it.

add_key.2

Mitch Walker

Empty payloads are not allowed in user-defined keys

chroot.2

Michael Kerrisk

SEE ALSO: add pivot_root(2)

clone.2

Michael Kerrisk

Add reference to mount_namespaces(7) under CLONE_NEWNS description

fork.2

Michael Kerrisk

Add ENOMEM error for PID namespace where "init" has died

futex.2

Michael Kerrisk

Correct an ENOSYS error description

Since Linux 4.5, FUTEX_CLOCK_REALTIME is allowed with FUTEX_WAIT.

Michael Kerrisk [Darren Hart]

Remove crufty text about FUTEX_WAIT_BITSET interpretation of timeout

Since Linux 4.5, FUTEX_WAIT also understands

FUTEX_CLOCK_REALTIME.

Michael Kerrisk [Thomas

Gleixner]

Explain how to get equivalent of FUTEX_WAIT with an absolute timeout

Michael Kerrisk

Describe FUTEX_BITSET_MATCH_ANY

Describe FUTEX_BITSET_MATCH_ANY and FUTEX_WAIT and FUTEX_WAKE equivalences.

Michael Kerrisk

Note that at least one bit must be set in mask for BITSET operations

At least one bit must be set in the 'val3' mask supplied for the
FUTEX_WAIT_BITSET and FUTEX_WAKE_BITSET operations.

Michael Kerrisk [Thomas Gleixner, Darren Hart]

Fix descriptions of various timeouts

Michael Kerrisk

Clarify clock default and choices for FUTEX_WAIT

getitimer.2

Michael Kerrisk

Substantial rewrites to various parts of the page

Michael Kerrisk [Tom Callaway]

Change license to note that page may be modified

The page as originally written carried text that said the page may
be freely distributed but made no statement about modification.

In the 20+ years since it was first written, the page has in fact
seen repeated, sometimes substantial, modifications, and only a
small portion of the original text remains. One could I suppose
rewrite the last few pieces that remain from the original,
but as the largest contributor to the pages existing text,
I'm just going to relicense it to explicitly note that
modification is permitted. (I presume the failure by the
original author to grant permission to modify was simply an
oversight; certainly, the large number of people who have
changed the page have taken that to be the case.)

See also https://bugzilla.kernel.org/show_bug.cgi?id=118311

get_mempolicy.2

Michael Kerrisk [Jörn Engel]

Correct rounding to 'maxnodes' (bits, not bytes)

Michael Kerrisk [Jörn Engel]

Fix prototype for get_mempolicy()

In numaif.h, 'addr'

is typed as 'void *'

getpriority.2

Michael Kerrisk

Make discussion of RLIMIT_NICE more prominent

The discussion of RLIMIT_NICE was hidden under the EPERM error,
where it was difficult to find. Place some relevant text in
DESCRIPTION.

Michael Kerrisk

Note that getpriority()/setpriority deal with same attribute as nice(2)

Michael Kerrisk [Robin Kuzmin]

Clarify equivalence between lower nice value and higher priority

get_robust_list.2

Michael Kerrisk

get_robust_list() is governed by PTRACE_MODE_READ_REALCREDS

ioctl.2

Michael Kerrisk

SEE ALSO: add ioctl_fideduperange(2) and ioctl_ficlonerange(2)

kcmp.2

Michael Kerrisk

kcmp() is governed by PTRACE_MODE_READ_REALCREDS

Shawn Landden

Note about SECURITY_YAMA

kill.2

Michael Kerrisk [John Wiersba]

Clarify the meaning if sig==0

lookup_dcookie.2

Michael Kerrisk

SEE ALSO: add oprofile(1)

mmap.2

Michael Kerrisk [Rahul Bedarkar]

EXAMPLE: for completeness, add munmap() and close() calls

mount.2

Michael Kerrisk

Restructure discussion of 'mountflags' into functional groups

The existing text makes no differentiation between different "classes" of mount flags. However, certain flags such as MS_REMOUNT, MS_BIND, MS_MOVE, etc. determine the general type of operation that mount() performs. Furthermore, the choice of which class of operation to perform is performed in a certain order, and that order is significant if multiple flags are specified. Restructure and extend the text to reflect these details.

Michael Kerrisk

Relocate text on multimounting and mount stacking to NOTES

The text was somewhat out of place in its previous location; NOTES is a better location.

Michael Kerrisk

Remove version numbers attached to flags

that are modifiable on remount

This information was simply bogus. Mea culpa.

Michael Kerrisk

Refer reader to mount_namespaces(7) for details on propagation types

Michael Kerrisk

SEE ALSO: s/namespaces(7)/mount_namespaces(7)/

Omar Sandoval

MS_BIND still ignores mountflags

This is clear from the `do_mount()` function in the kernel as of v4.6.

Michael Kerrisk

Note the default treatment of `ATIME` flags during `MS_REMOUNT`

The behavior changed in Linux 3.17.

Michael Kerrisk

Clarify that `MS_MOVE` ignores remaining bits in 'mountflags'

Michael Kerrisk

Note kernel version that added `MS_MOVE`

Michael Kerrisk

`MS_NOSUID` also disables file capabilities

Michael Kerrisk

Relocate/demote/rework text on `MS_MGC_VAL`

The use of this constant has not been needed for 15 years now.

Michael Kerrisk

Clarify that 'source' and 'target' are pathnames, and can refer to files

Michael Kerrisk

Update example list of filesystem types

Put more modern examples in; remove many older examples.

Michael Kerrisk

`MS_LAZYTIME` and `MS_RELATIME` can be changed on remount

Michael Kerrisk

Explicitly note that `MS_DIRSYNC` setting cannot be changed on remount

Michael Kerrisk

Move text describing 'data' argument higher up in page

In preparation for other reworking.

Michael Kerrisk

Since Linux 2.6.26, bind mounts can be made read-only

open.2

Eric Biggers

Refer to correct functions in description of `O_TMPFILE`

pciconfig_read.2

Michael Kerrisk [Tom Callaway]

Change license to note that page may be modified

Niki Rahimi, the author of this page, has agreed that it's okay to change the license to note that the page can be modified.

See https://bugzilla.kernel.org/show_bug.cgi?id=118311

perf_event_open.2

Michael Kerrisk

If `pid > 0`, the operation is governed by `PTRACE_MODE_READ_REALCREDS`

Jann Horn

Document new `perf_event_paranoid` default

Keno Fischer [Vince Weaver]

Add a note that `dyn_size` is omitted if `size == 0`

The `perf_output_sample_ustack` in `kernel/events/core.c` only writes a single 64 bit word if it can't dump the user registers. From the current version of the man page, I would have expected two 64 bit words (one for `size`, one for `dyn_size`). Change the man page to make this behavior explicit.

prctl.2

Michael Kerrisk

Some wording improvements in timer slack description

Michael Kerrisk

Refer reader to discussion of `/proc/[pid]/timerslack_ns`

Under discussion of `PR_SET_TIMERSLACK`, refer the reader to the `/proc/[pid]/timerslack_ns` file, documented in `proc(5)`.

process_vm_readv.2

Michael Kerrisk

Rephrase permission rules in terms of a `ptrace` access mode check

ptrace.2

Michael Kerrisk [Jann Horn]

Update Yama `ptrace_scope` documentation

Reframe the discussion in terms of `PTRACE_MODE_ATTACH` checks, and make a few other minor tweaks and additions.

Michael Kerrisk, Jann Horn

Note that user namespaces can be used to bypass Yama protections

Michael Kerrisk

Note that `PTRACE_SEIZE` is subject to a `ptrace` access mode check

Michael Kerrisk

Rephrase `PTRACE_ATTACH` permissions in terms of `ptrace` access mode check

quotactl.2

Michael Kerrisk [Jacob Willoughby]

'`dqb_curspace`' is in bytes, not blocks

This error appears to have been injected into `glibc` when copying some headers from BSD.

See <https://bugs.debian.org/825548>

recv.2

Michael Kerrisk [Tom Gundersen]

With pending 0-length datagram `read()` and `recv()` with `flags == 0` differ

setfsuid.2

setfsuid.2

Jann Horn [Michael Kerrisk]

Fix note about errors from

the syscall wrapper

See sysdeps/unix/sysv/linux/i386/setfsuid.c in glibc-2.2.1.

(This code is not present in modern glibc anymore.)

Michael Kerrisk

Move glibc wrapper notes to "C library/kernel differences" subsection

sysinfo.2

Michael Kerrisk

Rewrite and update various pieces

umask.2

Michael Kerrisk

NOTES: Mention /proc/PID/status 'Umask' field

umount.2

Michael Kerrisk

SEE ALSO: add mount_namespaces(7)

unshare.2

Michael Kerrisk

Add reference to mount_namespaces(7) under CLONE_NEWNS description

utimensat.2

Michael Kerrisk [Rob Landley]

Note that the glibc wrapper disallows pathname==NULL

wait.2

Michael Kerrisk

Since Linux 4.7, __WALL is implied if child being ptraced

Michael Kerrisk

waitid() now (since Linux 4.7) also supports __WNOTHREAD/__WCLONE/__WALL

assert.3

Nikos Mavrogiannopoulos

Improved description

Removed text referring to text

not being helpful to users. Provide

the error text instead to allow the reader to determine whether it is helpful. Recommend against using NDEBUB for programs to exhibit deterministic behavior. Moved description ahead of recommendations.

Michael Kerrisk

Clarify details of message printed by assert()

fmax.3

fmin.3

Michael Kerrisk

SEE ALSO: add fdim(3)

getauxval.3

Cownie, James H

Correct AT_HWCAP result description

inet_pton.3

Stefan Puiu

Mention byte order

malloc_hook.3

Michael Kerrisk

glibc 2.24 removes __malloc_initialize_hook

memmem.3

Michael Kerrisk [Shawn Landden]

Note that memmem() is present on some other systems

mkdtemp.3

mktemp.3

Michael Kerrisk

SEE ALSO: add mktemp(1)

printf.3

Michael Kerrisk [Shawn Landden]

Note support in other C libraries for %m and %n

strcasecmp.3

Michael Kerrisk [Ori Avtalion]

Make details

of strncasecmp() comparison clearer

streat.3

Michael Kerrisk

Add a program that shows the performance characteristics of streat()

In honor of Joel Spolsky's visit to Munich, let's start educating
Schlemiel The Painter.

strtoul.3

Michael Kerrisk

SEE ALSO: add a64l(3)

strxfrm.3

Michael Kerrisk [Florian Weimer]

Remove NOTES section

strxfrm() and strncpy() are not precisely equivalent in the
POSIX locale, so this NOTES section was not really correct.

See https://bugzilla.kernel.org/show_bug.cgi?id=104221

console_codes.4

console_ioctl.4

tty.4

vcs.4

charsets.7

Marko Myllynen

Remove console(4) references

0f9e647 removed the obsolete console(4) page but we still have few references to it. The patch below removes them or converts to refs to console_ioctl(4) where appropriate.

console_ioctl.4

Michael Kerrisk [Chris Gassib]

The argument

to KDGETMODE is an 'int'

lirc.4

Alec Leamas

Update after upstreamed lirc.h, bugfixes.

st.4

Kai Mäkisara

Fix description of read() when block is larger than request

Kai Mäkisara

Update MTMKPART for kernels >= 4.6

Update the description of the MTMKPART operation of MTIOCTOP to match the changes in kernel version 4.6.

charmap.5

Marko Myllynen

Clarify keyword syntax

Updates charmap(5) to match the syntax all the glibc charmap files are using currently.

elf.5

Michael Kerrisk

SEE ALSO: add readelf(1)

locale.5

Marko Myllynen

Document missing keywords, minor updates

Marko Myllynen

Clarify keyword syntax

Marko Myllynen

Adjust conformance

proc.5

namespaces.7

Michael Kerrisk

Move /proc/PID/mounts information to proc(5)

There was partial duplication, and some extra information
in namespaces(7). Move everything

to proc(5).

proc.5

Michael Kerrisk

/proc/PID/fd/* are governed by PTRACE_MODE_READ_FSCREDS

Permission to dereference/readlink /proc/PID/fd/* symlinks is
governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.

Michael Kerrisk

/proc/PID/timerslack_ns is governed by PTRACE_MODE_ATTACH_FSCREDS

Permission to access /proc/PID/timerslack_ns is governed by
a PTRACE_MODE_ATTACH_FSCREDS ptrace access mode check.

Michael Kerrisk

Document /proc/PID/{maps,mem,pagemap} access mode checks

Permission to access /proc/PID/{maps,pagemap} is governed by a
PTRACE_MODE_READ_FSCREDS ptrace access mode check.

Permission to access /proc/PID/mem is governed by a
PTRACE_MODE_ATTACH_FSCREDS ptrace access mode check.

Michael Kerrisk

Note /proc/PID/stat fields that are governed by PTRACE_MODE_READ_FSCREDS

Michael Kerrisk

/proc/PID/{cwd,exe,root} are

governed by PTRACE_MODE_READ_FSCREDS

Permission to dereference/readlink /proc/PID/{cwd,exe,root} is
governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.

Michael Kerrisk

/proc/PID/io is governed by PTRACE_MODE_READ_FSCREDS

Permission to access /proc/PID/io is governed by
a PTRACE_MODE_READ_FSCREDS ptrace access mode check.

Michael Kerrisk

/proc/PID/{personality,stack,syscall} are governed by PTRACE_MODE_ATTACH_FSCREDS

Permission to access /proc/PID/{personality,stack,syscall} is
governed by a PTRACE_MODE_ATTACH_FSCREDS ptrace access mode check.

Michael Kerrisk

/proc/PID/{auxv,environ,wchan} are governed by PTRACE_MODE_READ_FSCREDS

Permission to access /proc/PID/{auxv,environ,wchan} is governed by
a PTRACE_MODE_READ_FSCREDS ptrace access mode check.

Michael Kerrisk

Move shared subtree /proc/PID/mountinfo fields to mount_namespaces(7)

Move information on shared subtree fields in /proc/PID/mountinfo
to mount_namespaces(7).

Michael Kerrisk ["Yuming Ma()"]

Note that /proc/net is now virtualized per network namespace

Michael Kerrisk

Add references to mount_namespaces(7)

repertoiremap.5

Marko Myllynen

Clarify keyword syntax

utmp.5

Michael Kerrisk

SEE ALSO: add logname(1)

capabilities.7

Michael Kerrisk [Andy Lutomirski]

Note on SECURE_NO_CAP_AMBIENT_RAISE for capabilities-only environment

Michael Kerrisk

Add a detail on use of securebits

cgroup_namespaces.7

Michael Kerrisk

SEE ALSO: add namespaces(7)

cgroups.7

Michael Kerrisk

ERRORS: add mount(2) EBUSY error

cp1251.7

cp1252.7

iso_8859-1.7

iso_8859-15.7

iso_8859-5.7

koi8-r.7

koi8-u.7

Marko Myllynen

Add some charset references

Add some references to related charsets here and there.

credentials.7

Michael Kerrisk

SEE ALSO: add runuser(1)

SEE ALSO: add newgrp(1)

SEE ALSO: add sudo(8)

feature_test_macros.7

Michael Kerrisk

Emphasize that applications should not directly include <features.h>

man-pages.7

Michael Kerrisk

Clarify which sections man-pages provides man pages for

Michael Kerrisk [Josh Triplett]

Add a few more details on formatting conventions

Add some more details for Section 1 and 8 formatting.

Separate out formatting discussion into commands, functions,
and "general".

namespaces.7

Michael Kerrisk

/proc/PID/ns/* are governed by PTRACE_MODE_READ_FSCREDS

Permission to dereference/readlink /proc/PID/ns/* symlinks is
governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.

Michael Kerrisk

Nowadays, file changes in /proc/PID/mounts are notified differently

Exceptional condition for select(), (E)POLLPRI for (e)poll

Michael Kerrisk

Remove /proc/PID/mountstats description

This is a duplicate of information in proc(5).

Michael Kerrisk

Refer to new mount_namespaces(7) for information on mount namespaces

netlink.7

Andrey Vagin

Describe netlink socket options

Michael Kerrisk

Rework version information

(No changes in technical details.)

pid_namespaces.7

Michael Kerrisk

SEE ALSO: add namespaces(7)

unix.7

Michael Kerrisk

Move discussion on pathname socket permissions to DESCRIPTION

Michael Kerrisk

Expand discussion of socket permissions

Michael Kerrisk

Fix statement about permissions needed to connect to a UNIX domain socket

Read permission is not required (verified by experiment).

Michael Kerrisk

Clarify ownership and permissions assigned during socket creation

Michael Kerrisk [Carsten Grohmann]

Update text on socket permissions on other systems

At least

some of the modern BSDs seem to check for write

permission on a socket. (I tested OpenBSD 5.9.) On Solaris 10,

some light testing suggested that write permission is still not checked on that system.

Michael Kerrisk

Note that `umask` / permissions have no effect for abstract sockets

W. Trevor King

Fix example code: 'ret' check after accept populates 'data_socket'

Michael Kerrisk

Move some abstract socket details to a separate subsection

Michael Kerrisk

Note that abstract sockets automatically disappear when FDs are closed

user_namespaces.7

Michael Kerrisk [Micha Zegan]

Clarify meaning of privilege in a user namespace

Having privilege in a user NS only allows privileged operations on resources governed by that user NS. Many privileged operations relate to resources that have no association with any namespace type, and only processes

with privilege in the initial user NS can perform those operations.

See https://bugzilla.kernel.org/show_bug.cgi?id=120671

Michael Kerrisk [Micha Zegan]

List the mount operations permitted by `CAP_SYS_ADMIN`

List the mount operations permitted by `CAP_SYS_ADMIN` in a noninitial users.

See https://bugzilla.kernel.org/show_bug.cgi?id=120671

Michael Kerrisk [Micha Zegan]

`CAP_SYS_ADMIN` allows mounting cgroup filesystems

See https://bugzilla.kernel.org/show_bug.cgi?id=120671

Michael Kerrisk

Clarify details of `CAP_SYS_ADMIN` and cgroup v1 mounts

With respect to cgroups version 1, `CAP_SYS_ADMIN` in the user namespace allows only `*named*` hierarchies to be mounted (and not hierarchies that have a controller).

Michael Kerrisk

Clarify `CAP_SYS_ADMIN` details for mounting `FS_USERNS_MOUNT` filesystems

Michael Kerrisk

Correct user namespace

rules for mounting `/proc`

Michael Kerrisk

Describe a concrete example of capability checking

Add a concrete example of how the kernel checks capabilities in an associated user namespace when a process attempts a privileged operation.

Michael Kerrisk

Correct kernel version where XFS added support for user namespaces

Linux 3.12, not 3.11.

Michael Kerrisk

SEE ALSO: add ptrace(2)

SEE ALSO: add cgroup_namespaces(7)

utf-8.7:

Shawn Landden

Include RFC 3629 and clarify endianness which is left ambiguous

The endianness is suggested by the order the bytes are displayed,
but the text is ambiguous.

==== Changes in man-pages-4.08 =====

Released: 2016-10-08, Munich

Apologies if I missed anyone!

New and rewritten pages

quotactl.2

Eugene Syromyatnikov [Michael Kerrisk]

Updated information regarding disk quota flags

Added information regarding DQF_SYS_FILE flag; updated definition of V1_DQF_RSQUASH, which has been defined privately and defined publicly as DQF_ROOT_SQUASH.

Eugene Syromyatnikov

Updated information regarding XFS-specific quotactl subcommands

Added information regarding

structure definitions used for

XFS-specific subcommands, updated flag constants, added information regarding ignored syscall arguments, added notes on usage of kernel UAPI header.

Eugene Syromyatnikov

Additions regarding project quotas

Added information regarding presence of project quotas.

bswap.3

Michael Kerrisk

New page documenting bswap_16(), bswap_32(), and bswap_64()

cgroups.7

Michael Kerrisk

Substantial rewrites, additions, and corrections.

Newly documented interfaces in existing pages

readv.2

Michael Kerrisk

Document the pwritev2() RWF_SYNC and RWF_DSYNC flags

proc.5

Michael Kerrisk

Document /proc/PID/seccomp

Jann Horn

Document /proc/[pid]/task/[tid]/children

Document the /proc/[pid]/task/[tid]/children interface from

CRIU, and more importantly, document why it's usually not

a good interface.

New and changed links

bswap_16.3

bswap_32.3

bswap_64.3

New link to new bswap.3

Global changes

Various pages

Michael Kerrisk

Fix section ordering

Various pages had sections in an order different from
that prescribed in man-pages(7).

Various pages

Michael Kerrisk [Mike Fryssinger]

Consistently use /proc/[pid] (not /proc/PID)

Various pages

Michael Kerrisk

Fix order of SEE ALSO entries

Entries should be ordered first by section, and then alphabetically

within the section.

Various pages

Michael Kerrisk

Order ERRORS alphabetically

Various pages

Michael Kerrisk

Remove section number from page self reference

Fix places where pages refer to the function that they describe and include a section number in that reference. Such references cause some HTML-rendering tools to create self-references

in the

page.

A few pages

Michael Kerrisk

Eliminate groff "cannot adjust line" warnings

Changes to individual pages

pldd.1

Michael Kerrisk [Carlos O'Donnell]

Note gdb(1) command that can be used as a replacement for pldd

Taken from Carlos O'Donnell's suggestion in

https://sourceware.org/bugzilla/show_bug.cgi?id=18035#c2

Michael Kerrisk

BUGS: pldd has not worked since glibc 2.19

accept.2

Michael Kerrisk

Mention epoll(7) alongside poll()/select()

Michael Kerrisk

Demote discussion of DECNet to NOTES

DECNet ceased to be important long ago...

adjtimex.2

Nikola Forró

Fix kernel version references

chroot.2

Michael Kerrisk

Note user namespace requirements for CAP_SYS_CHROOT

clone.2

Keno Fischer [Josh Triplett]

Adjust syscall prototype and expand CLONE_SETTLS description

Michael Kerrisk [Josh Triplett,

Josh Triplett]

Document raw syscall interfaces on various other architectures

Michael Kerrisk

Change types for 'ptid' and 'ctid' in syscall prototypes

These types changed from 'void *' to 'int *' back in Linux 3.8.

Michael Kerrisk

EINVAL is generated by glibc wrapper for NULL 'fn' or 'child_stack'

Clarify that this error is produced by the wrapper function, not

the underlying system call. In particular, the point is that the

raw system call can accommodate a NULL pointer for 'child_stack'.

Michael Kerrisk [Elliott Hughes]

Make the implications of CLONE_FILES more explicit

If CLONE_FILES is not set, the duplicated FDs nevertheless share

file offset and status flags via the open file description.

Michael Kerrisk

Mention kcmp() under notes

close.2

Michael Kerrisk

Add mention of the close-on-exec flag

Michael Kerrisk

Clarify discussion

noting that close() does not flush buffer cache

epoll_wait.2

Mike Crowe

Clarify that the timeout is measured against CLOCK_MONOTONIC

execve.2

Michael Kerrisk

Mention use of 'environ' to access environment list

Michael Kerrisk

Note that real UID, real GID, and supplementary GIDs are unchanged

fanotify_init.2

Heinrich Schuchardt

Update BUGS information

fcntl.2

Michael Kerrisk

Note an important detail of F_SETOWN permission rules for signals

F_SETOWN records the caller's credentials at the time of

the fcntl() call, and it is these saved credentials that

are used for subsequent permission checks.

Michael Kerrisk

Make the description of the effect of close-on-exec a little clearer

Michael Kerrisk

Clarify that F_GETFD and F_GETFL return flags via the function result

fork.2

Michael Kerrisk

PID of new process also does not match any existing session ID

fsync.2

Michael Kerrisk

SEE ALSO: add pwritev(2)

Since Linux 4.7, pwritev() has flags related to I/O integrity completion.

getdomainname.2

Michael Kerrisk

Note user namespace requirements for CAP_SYS_ADMIN

getgroups.2

Michael Kerrisk

Note user namespace requirements for CAP_SETGID

gethostname.2

Michael Kerrisk

Note user namespace requirements for CAP_SYS_ADMIN

getrlimit.2

Michael Kerrisk

Note user namespace semantics for CAP_SYS_RESOURCE

getsid.2

Michael Kerrisk

Rework description to be somewhat clearer

Michael Kerrisk

Correct the definition of "session ID"

getunwind.2

Michael Kerrisk

Simplify text referring to vdso(7)

The detail given here is redundant, since this info is also in vdso(7).

kcmp.2

Michael Kerrisk

Add an example program

kill.2

Michael Kerrisk

Note the user namespace requirement for CAP_KILL

killpg.2

Michael Kerrisk

Refer reader to kill(2) for signal permission rules

mlock.2

Sebastian Andrzej Siewior

Document that fork() after mlock() may be a bad idea in a RT process

mmap.2

Jann Horn

Describe treatment of 'offset' for MAP_ANONYMOUS

Michael Kerrisk [Seward de Groot]

Small improvement to description of MAP_SHARED

See https://sourceware.org/bugzilla/show_bug.cgi?id=6887

msgctl.2

msgget.2

msgop.2

semctl.2

semget.2

semop.2

shmctl.2

shmget.2

shmop.2

Michael Kerrisk

Note the user namespace requirements for CAP_IPC_OWNER

open.2

Michael Kerrisk

Clarify user namespace capability requirements for O_NOATIME

Michael Kerrisk

NOTES: kcmp() can be used to test if two FDs refer to the same OFD

Michael Kerrisk

F2FS support for O_TMPFILE was added in Linux 3.16

Michael Kerrisk

Clarify the rules about how the group ID of a new file is determined

prctl.2

Michael Kerrisk

Refer to proc(5) for effects of dumpability on ownership of /proc/PID/*

Michael Kerrisk

ERRORS: Add EACCES error for PR_SET_SECCOMP-SECCOMP_MODE_FILTER

Michael Kerrisk

Simplify list of cases where "dumpable" attribute is reset

Michael Kerrisk

Note user namespace requirements for PR_CAPBSET_DROP CAP_SETPCAP

readlink.2

Michael Kerrisk [Ursache Vladimir]

Make example program handle links that report a size of zero
Some "magic" symlinks created by the kernel (e.g., those under
/proc and /sys) report 'st_size' as zero. Modify the example
program to handle that possibility.

Michael Kerrisk

Emphasize that truncation of returned buffer generates no error

readv.2

Michael Kerrisk [Christoph Hellwig]

Clarify that RWF_DSYNC and RWF_SYNC apply only to data being written

Michael Kerrisk

Add preadv2() and pwritev2() to NAME line

reboot.2

Michael Kerrisk

Note user

namespace requirements around CAP_SYS_BOOT

rename.2

Michael Kerrisk [Tim Savannah]

Clarify that ERRORS may cause rename to fail (not to be nonatomic)

sched_setaffinity.2

Michael Kerrisk

Note user namespace requirements for CAP_SYS_NICE

seccomp.2

Michael Kerrisk

CAP_SYS_ADMIN is required only in caller's user namespace

select_tut.2

Peter Wu

Fix various issues in example program

seteuid.2

Michael Kerrisk

Note user namespace requirements for CAP_SETUID and CAP_SETGID

setgid.2

Michael Kerrisk

Note user namespace requirements for CAP_SETGID

setpgid.2

Michael Kerrisk

Add a reference to credentials(7)

setpgid.2

setsid.2

Michael Kerrisk

Relocate some text on sessions and sessions leaders

Some text that was in setpgid(2) is better placed in setsid(2).

setresuid.2

Michael Kerrisk

Note user namespace requirements for CAP_SETUID

setreuid.2

Michael Kerrisk

Note user namespace requirements for CAP_SETUID and CAP_SETGID

setsid.2

Michael Kerrisk

Refer to credentials(7) for details for details on controlling terminal

Refer to credentials(7) for details of how a session obtains
a controlling terminal.

set_thread_area.2

Michael Kerrisk

Add get_thread_area() to NAME

setuid.2

Michael Kerrisk

Note user namespace requirements for CAP_SETUID

sigprocmask.2

Keno Fischer

Expand/clarify libc/kernel sigset_t difference

stat.2

Michael Kerrisk [Ursache Vladimir, Mats Wichmann]

Improve discussion of 'st_size' for /proc and /sys files

Michael Kerrisk

_BSD_SOURCE and _SVID_SOURCE no longer expose nanosecond timestamps

umask.2

Michael Kerrisk

Provide a rationale for the existence of /proc/PID/status 'Umask' field

wait.2

Michael Kerrisk

Remove erroneous statement that waitpid() is implemented via wait4()

There is a fallback

to wait4(), but only if the kernel does
not provide a waitpid() system call.

bindresvport.3

rcmd.3

ip.7

Michael Kerrisk

Note user namespace requirements for CAP_NET_BIND_SERVICE

byteorder.3

Michael Kerrisk

SEE ALSO: add bswap(3)

dlopen.3

Michael Kerrisk

dlmopen() is still broken in glibc 2.24

endian.3

Michael Kerrisk

SEE ALSO: add bswap(3)

ffs.3

Michael Kerrisk [Stefan Tauner]

Correct feature test macro requirements

fmemopen.3

Michael Kerrisk [Rich Felker]

Remove bogus suggestion to use setbuffer()

getlogin.3

Michael Kerrisk

Update feature test macro requirements for cuserid()

getumask.3

Michael Kerrisk

Note that getumask() is still unavailable in glibc 2.24

Michael Kerrisk

Point to umask(2) for a thread-safe way to discover process's umask

mkstemp.3

Quentin Rameau

Fix _POSIX_C_SOURCE value for mkstemp()

The correct _POSIX_C_SOURCE

value has always been 200809L,

not 200112L.

pthread_join.3

Michael Kerrisk [Mats Wichmann]

Note that the caller might do clean up after joining with a thread

Michael Kerrisk []

Clarify use of 'retval' pointer

resolver.3

Ray Bellis

Correct arguments to `res_ninit(res_state statep)`

strverscmp.3

Michael Kerrisk

Add an example program

wcstombs.3

Michael Kerrisk [Igor Liferenko]

`wcstombs()` does not provide thread-safe interface to same functionality

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=741360>

core.5

Mike Frysinger [Michael Kerrisk]

Add more details for output paths and the crash handler

People sometimes assume that the crash handler runs in the same context as the crashing process. They would be incorrect :).

proc.5

Mike Frysinger

Clarify the root symlink and mount namespaces

If the target process is in a different

mount namespace, the root

symlink actually shows that view of the filesystem.

Michael Kerrisk [Mike Frysinger]

Expand discussion of `/proc/[pid]/root`

Add a shell example showing that `/proc/[pid]/root` is more than a symlink. Based on an example provided by Mike Frysinger in an earlier commit message.

Michael Kerrisk

Explain rules determining ownership of `/proc/PID/*` files

Describe the effect of the "dumpable" attribute on ownership of `/proc/PID` files.

Michael Kerrisk

Note effect of 'suid_dumpable' on ownership of `/proc/PID` files

Michael Kerrisk

Refer to `ptrace(2)` for info on effect of `suid_dumpable` on ptraceability

Michael Kerrisk

Add reference to `core(5)` in discussion of 'suid_dumpable'

Michael Kerrisk

Note that 'suid_dumpable' mode 1 is insecure

Michael Kerrisk

Document `/proc/meminfo` '+ShmemHugePages' and 'ShmemPmdMapped' fields

Michael Kerrisk

Document `/proc/PID/status` 'RssAnon', 'RssFile', and 'RssShmem' fields

Michael Kerrisk

Document `/proc/PID/status` 'HugetlbPages' field

Michael Kerrisk [Zefram]

Clarify that `/proc/PID/statm` 'shared' field counts `*resident*` pages

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=741360>

Michael Kerrisk

Add reference to `umask(2)` in discussion of `/proc/PID/status` 'Umask'

Michael Kerrisk

Clarify user namespace requirements for `/proc/sys/fs/protected_hardlinks`

Michael Kerrisk

Note changes to config option governing `/proc/[pid]/task/[tid]/children`

Michael Kerrisk

Clarify description of `/proc/PID/statm` 'lib' and 'dt' fields

These fields are always zero since Linux 2.6.

Namhyung Kim [Petr Cermak]

Add description of `CLEAR_REFS_MM_HIWATER_RSS`

Michael Kerrisk

Update example VM values in `/proc/PID/status`

capabilities.7

Michael Kerrisk

Add

note about `nosuid` to file capabilities section

Michael Kerrisk

SEE ALSO: add `proc(5)`

Michael Kerrisk

SEE ALSO: add `setsid(2)` and `setpgid(2)`

glob.7

Michael Kerrisk [Arnaud Gaillard]

Clarify that syntactically incorrect patterns are left unchanged

packet.7

Michael Kerrisk

Clarify user namespace requirements for `CAP_NET_RAW`

pipe.7

Michael Kerrisk [Patrick McLean]

Document `FIONREAD`

raw.7

Michael Kerrisk

Clarify user namespace requirements for `CAP_NET_RAW`

Also remove mention of `UID 0` as a method of creating

a raw socket. As far as I can tell from reading the

kernel source (net/ipv4/af_inet.c), this is not true.

socket.7

Michael Kerrisk

SIOCSPGRP: refer to fcntl(2) F_SETOWN for correct permission rules

The permission rules described for SIOCCPGRP are wrong. Rather than repeat the rules here, just refer the reader to fcntl(2), where

the rules are described for F_SETOWN.

unix.7

Michael Kerrisk [Laurent Georget, Ivan Kharpalev]

Remove mention of recvmsg() from discussion of EPIPE error

See https://bugzilla.kernel.org/show_bug.cgi?id=137351

ld.so.8

Michael Kerrisk

Expand description of LD_DEBUG

Provide a list of the categories, and note that multiple categories can be specified.

Michael Kerrisk

Add glibc version for LD_USE_LOAD_BIAS

Michael Kerrisk

Clarify text describing whether secure-mode programs preload libraries

Michael Kerrisk

Remove discussion of environment variables understood by libc5

libc5 disappeared long ago, so cease cluttering up this page with those ancient details. Thus, remove discussion of the following environment variables: LD_AOUT_LIBRARY_PATH, LD_AOUT_PRELOAD, LD_KEEPPDIR, LD_NOWARN, and LDD_ARGV0.

Michael Kerrisk

Remove text with ancient

libc4 and Linux libc details

Michael Kerrisk

Remove mention of "ELF only"

Drawing a distinction between ELF-only features versus a,out ceased to be relevant long ago, so cluttering the page with "ELF-only" serves no purpose.

==== Changes in man-pages-4.09 =====

Released: 2016-12-12, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Afzal Mohammed <afzal.mohd.ma@gmail.com>

Willy Tarreau <w@1wt.eu>

Zack Weinberg <zackw@panix.com>

Apologies if I missed anyone!

New and rewritten pages

pkey_alloc.2

Dave Hansen [Michael Kerrisk]

New page documenting pkey_alloc(2) and pkey_free(2)

pthread_getattr_default_np.3

Michael Kerrisk

New page documenting pthread_getattr_default_np(3) and pthread_setattr_default_np(3)

strfromd.3

Wainer dos Santos Moschetta

New page documenting strfromd(3), strfromf(3), and strfroml(3)

The ISO/IEC TS 18661-1 specifies the strfrom() class of functions that convert a float-point value to string.

fuse.4

Keno Fischer [Michael Kerrisk]

New page describing /dev/fuse

This is my writeup of a basic description of /dev/fuse after playing with it for a few hours today. It is of course

woefully

incomplete, and since I neither have a use case nor am working on this code, I will not be in a position to expand it in the near future. However, I'm hoping this could still serve as a handy reference for others looking at this interface.

[mtk: Notwithstanding the incompleteness of this page, it's a good base for future extension.]

tmpfs.5

Michael Kerrisk

New page documenting the tmpfs filesystem

pkeys.7

Dave Hansen [Michael Kerrisk]

New page with overview of Memory Protection Keys

random.7

Michael Kerrisk [Theodore Ts'o, Nikos Mavrogiannopoulos, Laurent Georget]

New page providing an overview of interfaces for obtaining randomness

Contains material extracted from getrandom(2) and random(4),
as well as new material.

sock_diag.7

Pavel Emelyanov, Dmitry V. Levin

New page documenting NETLINK_SOCK_DIAG interface

close.2

getpriority.2

nice.2

timer_create.2

timerfd_create.2

random.4

elf.5

proc.5

sched.7

Various authors

These pages also saw substantial updates, as described under
"Changes to individual pages".

Newly documented interfaces in existing pages

mmap.2

Michael Kerrisk

Add (much) more detail on MAP_GROWSDOWN

mprotect.2

Dave Hansen

Document the new pkey_mprotect() system call

Eugene Syromyatnikov

Document PROT_SEM, PROT_SAO, PROT_GROWSUP, and PROT_GROWSDOWN

prctl.2

Eugene Syromyatnikov

Document PR_SET_FP_MODE and PR_GET_FP_MODE

perf_event_open.2

Vince Weaver

PERF_RECORD_SWITCH support

Linux 4.3 introduced two new record types for recording context

switches: PERF_RECORD_SWITCH and PERF_RECORD_SWITCH_CPU_WIDE.

Vince Weaver

Add PERF_SAMPLE_BRANCH_CALL branch sample type

Vince Weaver

PERF_SAMPLE_BRANCH_IND_JUMP branch_sample_type

Linux 4.2 added a new branch_sample_type: PERF_SAMPLE_BRANCH_IND_JUMP

Vince Weaver

Document PERF_RECORD_MISC_PROC_MAP_PARSE_TIMEOUT

Vince Weaver

Document sample_max_stack and /proc/sys/kernel/perf_event_max_stack

Linux 4.8 added a new sample_max_stack parameter, as well as /proc/sys/kernel/perf_event_max_stack which limits it and a new EOVERFLOW error return.

Dave Hansen

PERF_RECORD_LOST_SAMPLES record type

Linux 4.2 added a new record type: PERF_RECORD_LOST_SAMPLES

It is generated when hardware samples (currently only Intel PEBS) are lost.

ptrace.2

Michael Kerrisk

Document PTRACE_SECCOMP_GET_FILTER

Michael Kerrisk

Document PTRACE_GET_THREAD_AREA and PTRACE_SET_THREAD_AREA

namespaces.7

Michael Kerrisk [Eric W. Biederman]

Document the NS_GET_USERNS and NS_GET_PARENT ioctl() operations

sched.7

Michael Kerrisk [Mike Galbraith]

Document the autogroup feature

Includes documenting autogroup nice value

Michael Kerrisk

Autogrouping breaks traditional semantics of nice in many cases

When autogrouping is enabled (the default in many distros) there are many traditional use cases where the nice value ceases to have any effect.

Michael Kerrisk

Add a subsection on nice value and group scheduling

New and changed links

killpg.2

Michael Kerrisk

New link to relocated killpg(3) page

pkey_free.2

Michael Kerrisk

New link to new pkey_alloc(2) page

pkey_mprotect.2

Michael Kerrisk

New link to mprotect(2)

pthread_setattr_default_np.3

Michael Kerrisk

New link to new pthread_getattr_default_np.3

strfromf.3

Wainer dos Santos Moschetta

New link to strfromd(3)

strfroml.3

Wainer dos Santos Moschetta

New link to strfromd(3)

Global changes

Various

pages

Michael Kerrisk

Remove ancient libc4 and libc5 details

It's nearly 20 years now since Linux libc went away.

Remove some ancient details from the pages.

Various pages

Michael Kerrisk

Add cross references to new tmpfs(5) page

Various pages

Michael Kerrisk

Change section number from 2 to 3 in killpg() references

Changes to individual pages

accept.2

Michael Kerrisk

Remove editorializing comments about 'socklen_t'

Michael Kerrisk

Simplify the discussion of 'socklen_t'

We don't really need to list the old OSes in this discussion.

adjtimex.2

clock_getres.2

gettimeofday.2

Michael Kerrisk

SEE ALSO: add hwclock(8)

bind.2

connect.2

getpeername.2

getsockname.2

getsockopt.2

Michael Kerrisk

Replace discussion of 'socklen_t' with reference to accept(2)

The discussion of 'socklen_t' editorializes and is repeated

across several pages. Replace it with a reference to accept(2),
where some details about this type are provided.

chmod.2

Michael Kerrisk

SEE ALSO: add chmod(1)

chown.2

Michael Kerrisk

SEE ALSO: add chgrp(1) and chown(1)

chroot.2

Michael Kerrisk

SEE ALSO: add chroot(1)

clone.2

Michael Kerrisk

The CLONE_*_SETTID operations store TID before return to user space

CLONE_PARENT_SETTID and CLONE_CHILD_SETTID store the new

TID before clone() returns to user space

close.2

Michael Kerrisk [Daniel Wagner]

Rework and greatly extend discussion of error handling

Further clarify that an error return should be used only

for diagnostic or remedial purposes.

Michael Kerrisk

Other UNIX implementations also close the FD, even if reporting an error

Looking at some historical source code suggests

that the "close() always closes regardless of error

return"

behavior has a long history, predating even POSIX.1-1990.

Michael Kerrisk

Note that future POSIX plans to require that the FD is closed on error

See <http://austingroupbugs.net/view.php?id=529#c1200>.

Michael Kerrisk

Clarify the variation in EINTR behavior per POSIX and other systems

fallocate.2

Darrick J. Wong

Document behavior with shared blocks

Note that FALLOC_FL_UNSHARE may use CoW to unshare blocks to guarantee that a disk write won't fail with ENOSPC.

fanotify_mark.2

Heinrich Schuchardt

Mention FAN_Q_OVERFLOW

To receive overflow events it is necessary to set this bit in fanotify_mark().

fcntl.2

Michael Kerrisk

F_GETPIPE_SZ allocates next power-of-2 multiple of requested size

Add some detail about current implementation, since this helps the user understand the effect of the user pipe limits added in Linux

4.5 (described in pipe(7)).

Michael Kerrisk

Add EPERM that occurs for F_SETPIPE_SZ when user pipe limit is reached

fideduperange.2

Darrick J. Wong [Omar Sandoval]

Fix the discussion of maximum sizes

Fix the discussion of the limitations on the dest_count and src_length parameters to the fideduperange ioctl() to reflect what's actually in the kernel.

fsync.2

Michael Kerrisk

SEE ALSO: add fileno(3)

fileno(3) is useful if one is combining fflush(3)/fclose(3) and fsync(2).

Michael Kerrisk

SEE ALSO: add fflush(3)

getgroups.2

Andrew Clayton

FTM requirements fix for setgroups(2)

gethostname.2

Michael Kerrisk

SEE ALSO: add hostname(1)

get_mempolicy.2

Michael Kerrisk

Note that 'addr' must be NULL when 'flags' is 0

getpriority.2

Michael Kerrisk

Warn that autogrouping voids the effect of 'nice' in many cases

Refer the reader

to sched(7) for the details.

Michael Kerrisk

Expand discussion of getpriority() return value

Michael Kerrisk

The nice value supplied to setpriority() is clamped

Note that the nice value supplied to setpriority() is clamped to the permitted range.

Michael Kerrisk

Improve description of setpriority() return value

getpriority.2

sched.7

Michael Kerrisk

Move nice value details from getpriority(2) to sched(7)

Centralizing these details in sched(7) is more logical.

getrandom.2

random.4

Michael Kerrisk

Consolidate and improve discussion on usage of randomness

Currently, recommendations on how to consume randomness are spread across both getrandom(2) and random(4) and the general opinion seems to be that the text in getrandom(2) does a somewhat better job. Consolidate the discussion to a single page (getrandom(2)) and address some of the

concerns

expressed about the existing text in random(4).

[Some of this text ultimately made its way into the new random(7) page.]

getrandom.2

Michael Kerrisk

Remove material incorporated into random(7)

Michael Kerrisk

Note advantages of fact that getrandom() doesn't use file descriptors

Michael Kerrisk

Clarify that getrandom() is not "reading" from /dev/{random,urandom}

getrlimit.2

Michael Kerrisk

Refer to sched(7) in discussion of RLIMIT_RTPRIO and RLIMIT_RTTIME

Michael Kerrisk

Describe the range of the RLIMIT_NICE limit

Michael Kerrisk

Refer to sched(7) in the discussion of RLIMIT_NICE

Michael Kerrisk

SEE ALSO: add credentials(7)

ioctl_ficlone.2

ioctl_fideduperange.2

Darrick J. Wong

Clarify the behavior of the FIDEDUPERANGE ioctl

kill.2

Michael Kerrisk

SEE ALSO: add kill(1)

mbind.2

Michael Kerrisk [Christoph Lameter]

Memory policy is a per-thread attribute, not a per-process attribute

mbind.2

set_mempolicy.2

Piotr Kwapulinski [Christoph Lameter, Michael Kerrisk]

Add MPOL_LOCAL NUMA memory policy documentation

mount.2

Michael Kerrisk

SEE ALSO: add mountpoint(1)

mprotect.2

Michael Kerrisk

CONFORMING TO: note that pkey_mprotect() is Linux-specific

nice.2

Michael Kerrisk

Warn that autogrouping voids the effect of 'nice' in many cases

Michael Kerrisk

CONFORMING TO: Remove an ancient SVr4 detail on errno values

Michael Kerrisk

Rework discussion of nice() return value and standards conformance

Make the text a little clearer. In particular, clarify that the raw system call (still) returns 0 on success.

Michael Kerrisk

Clarify the range of the nice value, and note that it is clamped

Michael Kerrisk

Add mention of RLIMIT_NICE

Michael Kerrisk

Move discussion of handling the

-1 success return to RETURN VALUE

This detail was rather hidden in NOTES. Also, rework the text a little.

Michael Kerrisk

Clarify that nice() changes the nice value of the calling *thread*

Michael Kerrisk

Add "C library/kernel differences" subsection heading

Michael Kerrisk

Add reference to sched(7) for further details on the nice value

open.2

Michael Kerrisk

ubifs supports O_TMPFILE starting with Linux 4.9

Michael Kerrisk

Document ENOMEM that occurs when opening FIFO because of pipe hard limit

perf_event_open.2

Vince Weaver

Add cycles field in LBR records

Linux 4.3 added a cycles field to the PERF_SAMPLE_BRANCH_STACK last branch records.

Vince Weaver

Update time_shift sample code

Linux 4.3 improved the accuracy of the clock/ns conversion routines.

Michael Kerrisk

Clarify the use of signals for capturing overflow events

pipe.2

Michael Kerrisk

Add ENFILE error for user pipe hard limit reached

prctl.2

Eugene Syromyatnikov

Some additional details regarding the PR_GET_UNALIGNED operation

Eugene Syromyatnikov

Note the output buffer size for PR_GET_TID_ADDRESS operation on x32/n32

Michael Kerrisk

Remove numeric definitions of PR_FP_MODE_FR and PR_FP_MODE_FRE bits

ptrace.2

Keno Fischer

Document the behavior of PTRACE_SYSEMU stops

Keno Fischer

Expand documentation PTRACE_EVENT_SECCOMP traps

In Linux 4.8, the order of PTRACE_EVENT_SECCOMP and syscall-entry-stops was reversed. Document both behaviors and

their interaction with the various forms of restart.

quotactl.2

Eugene Syromyatnikov

Describe `Q_XQUOTASYNC`, which is present but no-op in recent kernels

reboot.2

Wang Long

Note errors for invalid commands inside a PID namespace

sched_setattr.2

Michael Kerrisk

Fix cross reference

for further info on the nice value

The information moved from `getpriority(2)` to `sched(7)`.

sched_setscheduler.2

Michael Kerrisk [Daniel Berrange]

Mention `SCHED_DEADLINE`

Give the reader a clue that there is another policy available that can't be set via `sched_setscheduler(2)`.

seccomp.2

Jann Horn

Document changed interaction with `ptrace`

Before kernel 4.8, the `seccomp` check will not be run again after the tracer is notified. Fixed in kernel 4.9.

Michael Kerrisk

NOTES: mention `ptrace(PTRACE_SECCOMP_GET_FILTER)` to dump `seccomp` filters

set_mempolicy.2

Michael Kerrisk

Reformat list of modes

setsid.2

Michael Kerrisk

Improve wording of text on calling `setsid()` after `fork()+_exit()`

Michael Kerrisk

SEE ALSO: add `sched(7)`

List `sched(7)`, because `setsid(2)` is part of the machinery of autogrouping.

sigaction.2

Dave Hansen

Further documentation of `SEGV_PKUERR`

signalfd.2

Michael Kerrisk

Document ssi_addr_lsb field of signalfd_siginfo

symlink.2

Michael Kerrisk

SEE ALSO: add namei(1)

sync_file_range.2

Michael Kerrisk

Fix description for ESPIPE error

A file descriptor can't refer to a symbolic link.

syscalls.2

Michael Kerrisk

Add pkey_alloc(), pkey_free(), and pkey_mprotect()

New system calls in Linux 4.9.

Michael Kerrisk

Add ppc_swapcontext(2)

timer_create.2

Michael Kerrisk

Document CLOCK_BOOTTIME

Michael Kerrisk

Document CLOCK_REALTIME_ALARM and CLOCK_BOOTTIME_ALARM

timerfd_create.2

Michael Kerrisk

Document CLOCK_BOOTTIME, CLOCK_REALTIME_ALARM, and CLOCK_BOOTTIME_ALARM

Michael Kerrisk

Document TFD_TIMER_CANCEL_ON_SET

Michael Kerrisk

Rework discussion on relative and absolute timers

unlink.2

Michael Kerrisk

SEE ALSO: add unlink(2)

utime.2

utimensat.2

Michael Kerrisk

SEE ALSO: add touch(1)

wait.2

Michael Kerrisk

On some architectures, waitpid() is a wrapper that calls wait4().

atof.3

Wainer dos Santos Moschetta

SEE ALSO: add strfromd(3)

ctime.3

Michael Kerrisk

Add ERRORS section

Michael Kerrisk

RETURN VALUE: describe return values more explicitly

errno.3

Michael Kerrisk [Igor Liferenko]

Add glibc error text for EILSEQ

fclose.3

fflush.3

Michael Kerrisk

SEE ALSO: add fileno(2)

getlogin.3

Michael Kerrisk

Remove deprecated `_REENTRANT` from FTM requirements for `getlogin_r()`

Michael Kerrisk

SEE ALSO: add `logname(1)`

isalpha.3

Michael Kerrisk

Note circumstances where 'c' must be cast to 'unsigned char'

killpg.3

Michael Kerrisk

Move `killpg.2` from section to section 3

mallopt.3

Michael Kerrisk [Siddhesh Poyarekar]

Document 0 as default value of `M_ARENA_MAX` and explain its meaning

Michael

Kerrisk

Improve description of `M_ARENA_TEST`

Michael Kerrisk

Document default value for `M_ARENA_TEST`

Michael Kerrisk

Note default value of `M_PERTURB`

mbsnrtowcs.3

Michael Kerrisk [Igor Liferenko]

Note behavior of `mbsnrtowcs()` for an incomplete character

Note the behavior of `mbsnrtowcs()` when an incomplete character is found at end of the input buffer.

mbstowcs.3

wcstombs.3

Michael Kerrisk [Igor Liferenko]

Improve language relating to "initial state"

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=839705>

mbstowcs.3

Michael Kerrisk [Igor Liferenko]

Add missing include to example program

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=845172>

mq_close.3

Michael Kerrisk

DESCRIPTION: add reference to mq_notify(3)

mq_open.3

Eugene Syromyatnikov

Clarification regarding usage of mq_flags attribute in mq_open()

mq_receive.3

mq_send.3

Eugene Syromyatnikov

Clarification regarding reasons behind EBADF

printf.3

Wainer dos Santos Moschetta

SEE ALSO: add strfromd(3)

pthread_attr_init.3

Michael Kerrisk

SEE ALSO: add pthread_setattr_default_np(3)

pthread_create.3

Michael Kerrisk

SEE ALSO: add pthread_setattr_default_np(3)

ptsname.3

Michael Kerrisk

Note that ptsname_r() is proposed for future inclusion in POSIX.1

Michael Kerrisk

CONFORMING TO:: clarify that only ptsname() is standardized (so far)

remainder.3

Michael Kerrisk

Note fix to remainder(nan(""), 0) handling

The bug https://www.sourceware.org/bugzilla/show_bug.cgi?id=6779

has been fixed in glibc 2.15.

Michael Kerrisk

Document fixes for EDOM handling for range errors

The bug http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783

was fixed in glibc 2.15.

setjmp.3

Michael Kerrisk

_BSD_SOURCE must be **explicitly**

defined to get BSD setjmp() semantics

strtod.3

Wainer dos Santos Moschetta

SEE ALSO: add strfromd(3)

tgamma.3

Michael Kerrisk

Document fixes to give ERANGE for underflow range error

The bug https://www.sourceware.org/bugzilla/show_bug.cgi?id=6810

was fixed in glibc 2.19.

timegm.3

Michael Kerrisk

Add ERRORS section

Michael Kerrisk [Vincent Lefevre]

Add RETURN VALUE section

tmpnam.3

Michael Kerrisk

Properly document tmpnam_r(3)

toupper.3

Michael Kerrisk

Note circumstances where 'c' must be cast to 'unsigned char'

ttyname.3

Michael Kerrisk

SEE ALSO: add tty(1)

console_ioctl.4

Michael Kerrisk

Add brief descriptive text for KDGKBMODE modes

Miroslav Koskar

Add K_OFF keyboard mode

random.4

Michael Kerrisk

Add reference to new random(7) page

Michael Kerrisk

Rework formatting of /proc interfaces

Make the information
easier to parse by formatting the file
descriptions as hanging lists. No significant content changes.
Nikos Mavrogiannopoulos [Laurent Georget]

Provide a more accurate description of /dev/urandom

This documents the "property" of /dev/urandom of being able to
serve numbers prior to pool being initialized, and removes any
suggested usages of /dev/random which are disputable
(i.e., one-time pad). Document the fact /dev/random is only
suitable for applications which can afford indeterminate delays
since very few applications can do so. Smooth the alarming
language about a theoretical attack, and mention that its
security depends on the cryptographic primitives used by the
kernel, as well as the total entropy gathered.

Michael Kerrisk [Laurent Georget, Theodore Ts'o]

Improve discussion of /dev/urandom, blocking reads, and signals
The

text currently states that O_NONBLOCK has no effect for
/dev/urandom, which is true. It also says that reads from
/dev/urandom are nonblocking. This is at the least confusing.
If one attempts large reads (say 10MB) from /dev/urandom
there is an appreciable delay, and interruption by a signal
handler will result in a short read. Amend the text to
reflect this.

elf.5

Mike Frysinger

Add subsection headers at major points

The current pages dumps all the content into one big DESCRIPTION
with no real visual break up between logically independent
sections. Add some subsection headers to make it easier to
read and scan.

Mike Frysinger

Document notes

Document the Elf{32,64}_Nhdr structure, the sections/segments that
contain notes, and how to interpret them. I've been lazy and only
included the GNU extensions here,
especially as others are not
defined in the elf.h header file as shipped by glibc.

filesystems.5

Michael Kerrisk

SEE ALSO: add fuse(4)

proc.5

Dave Hansen

Describe new ProtectionKey 'smaps' field

Michael Kerrisk

Add example ProtectionKey output for 'smaps' file

Michael Kerrisk

Add pointers to sched(7) for autogroup files

sched(7) describes /proc/sys/kernel/sched_autogroup_enabled
and /proc/PID/autogroup.

Michael Kerrisk

Add /proc/sys/fs/pipe-user-pages-`{hard,soft}` entries

Michael Kerrisk

Improve description of the KernelPageSize and MMUPageSize 'smaps' fields

Michael Kerrisk

Rework 'smaps' ProtectionKey text and add some details

Michael Kerrisk

Mention lslocks(8) in discussion of /proc/locks

Michael Kerrisk

Describe Shmem field of /proc/meminfo

Michael Kerrisk

Rework 'smaps' VmFlags text, and add kernel version and example output

proc.5

pipe.7

Michael Kerrisk

Move /proc/sys/fs/pipe-max-size content from proc(5) to pipe(7)

resolv.conf.5

Carlos O'Donnell [Florian Weimer]

Timeout does not map to resolver API calls

utmp.5

Michael Kerrisk

SEE ALSO: add users(1)

capabilities.7

Michael Kerrisk

CAP_SYS_ADMIN governs ptrace(2) PTRACE_SECCOMP_GET_FILTER

Michael Kerrisk

CAP_SYS_ADMIN allows privileged ioctl() operations on /dev/random

cgroups.7

Michael Kerrisk

Add details on 'cpu' CFS bandwidth control

credentials.7

Michael Kerrisk

SEE ALSO: add setpriv(1)

Michael Kerrisk

SEE ALSO: add shadow(5)

feature_test_macros.7

Michael Kerrisk [Zack Weinberg]

Note that `_REENTRANT` and `_THREAD_SAFE` are now deprecated

Michael Kerrisk

Note that "cc -pthread" defines `_REENTRANT`

inotify.7

Michael Kerrisk

Note a subtlety of event generation when monitoring a directory

libc.7

Michael Kerrisk

Add a note on why glibc 2.x uses the soname `libc.so.6`

Michael Kerrisk

Add a few historical details on Linux `libc4` and `libc5`

Just for historical interest. Details taken from

<http://www.linux-m68k.org/faq/glibcinfo.html>.

mdoc.7

Michael Kerrisk

Add a cross-reference to `groff_mdoc(7)`

mount_namespaces.7

Michael Kerrisk

SEE ALSO: add `user_namespaces(7)`

mount_namespaces.7

user_namespaces.7

Michael Kerrisk

Migrate subsection on mount restrictions to `mount_namespaces(7)`

This section material in the `user_namespaces(7)` page was written before the creation of the `mount_namespaces(7)` manual page.

Nowadays, this material properly belongs in the newer page.

netlink.7

Dmitry V. Levin

Document `NETLINK_INET_DIAG` rename to `NETLINK_SOCKET_DIAG`

Dmitry V. Levin

Add references to `sock_diag(7)`

pid_namespaces.7

Michael Kerrisk

Refer to `namespaces(7)` for information about `NS_GET_PARENT`

pipe.7

Michael Kerrisk, Vegard Nossum [Vegard Nossum]

Document `/proc` files controlling memory usage by pipes

Document /proc/sys/fs/pipe-max-size and
/proc/sys/fs/pipe-user-pages-`{soft,hard}`.

Michael Kerrisk

Document pre-Linux 4.9 bugs in pipe limit checking

sched.7

Michael Kerrisk

Add a new introductory paragraph describing the nice value

Michael Kerrisk

Add more precise details on CFS's treatment of the nice value

Michael Kerrisk

Mention RLIMIT_NICE in the discussion of the nice value

Michael Kerrisk

NOTES: mention cgroups CPU controller

Michael Kerrisk

Add introductory sentence mentioning CFS scheduler

Michael Kerrisk

Add nice(2), getpriority(2), and setpriority(2) to API list

Michael Kerrisk

Make it clearer that SCHED_OTHER is always scheduled below real-time

Michael Kerrisk

Give the page a more generic NAME

The page isn't just about APIs.

standards.7

Michael Kerrisk

POSIX.1-2016 (POSIX.1-2008 TC2) has now been released

symlink.7

Michael Kerrisk

SEE ALSO: add namei(1)

uri.7

Jakub Wilk

Use "example.com" as example domain

user_namespaces.7

Michael Kerrisk

Add reference to namespaces(7) for NS_GET_USERNS operation

Michael Kerrisk

Add reference to namespaces(7) for NS_GET_PARENT operation

==== Changes in man-pages-4.10 =====

Released: 2017-03-13, Paris

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Adam Martindale <adam.john.martindale@gmail.com>
Alex <psybin@riseup.net>
Anders Thulin <anders@thulin.name>
Andreas Gruenbacher <agruenba@redhat.com>
Brian Masney <masneyb@onstation.org>
Casey Schaufler <casey@schaufler-ca.com>
David Howells
<dhowells@redhat.com>
Erik Kline <ekline@gmail.com>
Erik Roland van der Meer <ervdmeer@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

add_key.2

Michael Kerrisk [Eugene Syromyatnikov, David Howells]

Major improvements and additions

The page has doubled in length.

ioctl_iflags.2

Michael Kerrisk

New page describing inode flags and ioctl() operations

ioctl_ns.2

Michael Kerrisk

New page created by splitting ioctl(2) operations out of namespaces(7)

keyctl.2

Michael Kerrisk, Eugene Syromyatnikov [David Howells, Mat Martineau]

A vast number of additions and improvements

The

page has gone from somewhat over 100 lines to well over

1000 lines and now more or less documents the complete interface
provided by this system call.

getentropy.3

Michael Kerrisk

New page documenting getentropy(3)

getentropy(3) is added to glibc in version 2.25.

keyrings.7

David Howells

New page (written by David Howells) adopted from keyutils

Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.

Michael Kerrisk [Eugene Syromyatnikov, David Howells]

Very many additions and improvements

Michael Kerrisk

Document /proc/keys

Michael Kerrisk

Document /proc/sys/kernel/keys/persistent_keyring_expiry

Michael Kerrisk

Document /proc/key-users

Michael Kerrisk

Document /proc/sys/kernel/keys/gc_delay

Michael Kerrisk

Document /proc files that define
key quotas

persistent-keyring.7

Michael Kerrisk

New page (written by David Howells) adopted from keyutils

Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.

Michael Kerrisk

Various clean-ups and additions

process-keyring.7

Michael Kerrisk

New page (written by David Howells) adopted from keyutils

Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.

Michael Kerrisk

Various additions and improvements

request_key.2

Michael Kerrisk, Eugene Syromyatnikov [David Howells]

Very many additions and improvements

The page is now three times its former length.

session-keyring.7

Michael Kerrisk

New page (written by David Howells) adopted from keyutils

Since

this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.

Michael Kerrisk

Various reworking and additions

signal-safety.7

Michael Kerrisk

New page created by migrating the signal-safety discussion from
signal(7). Along the way some more details got added.

Michael Kerrisk [KASAKI Motohiro]

Note async-signal-safety problems caused by pthread_atfork()

See https://bugzilla.kernel.org/show_bug.cgi?id=25292

Michael Kerrisk [KASAKI Motohiro]

Note glibc deviations from POSIX requirements

See https://bugzilla.kernel.org/show_bug.cgi?id=25292

thread-keyring.7

Michael Kerrisk

New page (written by David Howells) adopted from keyutils

Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.

Michael Kerrisk

Various rewordings and additions

user-keyring.7

Michael Kerrisk

New page (written by David Howells) adopted from keyutils

Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.

Michael Kerrisk

Various reworking and improvements

user-session-keyring.7

Michael Kerrisk

New page (written by David Howells) adopted from keyutils

Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.

Michael Kerrisk

Various rewordings and additions

Newly documented interfaces in existing pages

bzero.3

Michael Kerrisk

Document explicit_bzero() (new in glibc 2.25)

Also, reword the description of bzero somewhat.

proc.5

Michael

Kerrisk

Document /proc/sys/vm/user_reserve_kbytes

Michael Kerrisk

Document /proc/sys/vm/admin_reserve_kbytes

Michael Kerrisk

Document /proc/sys/fs/mount-max

Michael Kerrisk

Document /proc/PID/status 'NoNewPrivs' field

New and changed links

explicit_bzero.3

Michael Kerrisk

New link to bzero.3

Changes to individual pages

chmod.2

Michael Kerrisk

ERRORS: add EPERM error for immutable/append-only file

chown.2

Michael Kerrisk

ERRORS: add EPERM error for immutable/append-only file

chroot.2

Michael Kerrisk

SEE ALSO: add switch_root(8)

clock_getres.2

Michael Kerrisk

Note POSIX.1 requirements re relative time services and CLOCK_REALTIME

clone.2

Michael Kerrisk

clone() does not execute fork handlers

execve.2

Michael Kerrisk

Rework text describing when effective IDs aren't transformed by execve()

Michael

Kerrisk

File capabilities can be ignored for the same reasons as set-UID/set-GID

Michael Kerrisk

The 'no_new_privs' bit inhibits transformations of the effective IDs

fork.2

Michael Kerrisk

cgroup PIDs controller may also be trigger for EAGAIN error

fsync.2

Michael Kerrisk

SEE ALSO: add posix_fadvise(2)

getrandom.2

Michael Kerrisk

Remove getentropy(3) details and defer to new getentropy(3) page

Michael Kerrisk

Starting with glibc 2.25, getrandom() is now declared in <sys/random.h>

Michael Kerrisk

glibc support was added in version 2.25

getrlimit.2

Michael Kerrisk

Document role of RLIMIT_NOFILE for FD passing over UNIX sockets

getxattr.2

listxattr.2

Andreas Gruenbacher

Document E2BIG errors

inotify_add_watch.2

Michael Kerrisk

Note "inode" as a synonym for "filesystem object"

Consistent with clarifications just made in inotify(7).

ioctl.2

Michael Kerrisk

SEE ALSO: add ioctl_ns(2), ioctl_iflags(2)

ioctl_fat.2

Brian Masney

Correctly reference volume ID instead of volume label

kcmp.2

Michael Kerrisk

Mention the clone(2) flags relating to various kcmp() 'type' values

Michael Kerrisk

KCMP_FILE: note reasons why FDs may refer to same open file description

link.2

Michael Kerrisk

When using linkat() AT_EMPTY_PATH, 'olddirfd' must not be a directory

Michael Kerrisk

ERRORS: add EPERM for immutable/append-only files

Michael Kerrisk

Note limits where EMLINK is encountered on ext4 and Btrfs

listxattr.2

Michael Kerrisk

Eliminate extra E2BIG error text

Andreas' patch added a second description of E2BIG that was (mostly) more detailed than the existing text. Combine the two texts.

lseek.2

Michael Kerrisk

O_APPEND overrides the effect of lseek() when doing file writes

Michael Kerrisk

Remove ancient

info about whence values and return values on old systems

Michael Kerrisk

Remove slightly bogus advice about race conditions

The page already (by now) contains a reference to open(2) for a discussion of open file descriptions. Leave it at that, since the reader can then deduce how things work.

madvise.2

Michael Kerrisk

Note that madvise() is generally about improving performance

mbind.2

Krzysztof Kulakowski [Michael Kerrisk]

Update MPOL_BIND description

The behavior of MPOL_BIND changed in Linux 2.6.26.

mincore.2

Michael Kerrisk

SEE ALSO: add madvise(2), posix_fadvise(2), posix_madvise(3)

mlock.2

Michael Kerrisk

Note pre-4.9 bug in RLIMIT_MEMLOCK accounting for overlapping locks

Michael Kerrisk

SEE ALSO: add mincore(2)

mmap.2

Michael Kerrisk

mincore(2) can be used to discover which pages of a mapping are resident

mount.2

Michael Kerrisk [Rob

Landley]

Refer to mount_namespaces(7) for details of default propagation type

nanosleep.2

Michael Kerrisk

Describe "creeping sleep" problem

nanosleep() has a problem if used in a program that catches signals and those signals are delivered at a very high rate.

Describe the problem, and note that clock_nanosleep(2) provides a solution.

Michael Kerrisk

BUGS: explicitly note that the Linux 2.4 bug was fixed in Linux 2.6

open.2

Michael Kerrisk

Make it clear that O_APPEND implies atomicity

Michael Kerrisk

Clarify distinction between file creation flags and file status flags

Michael Kerrisk

Note ambiguity of ELOOP error when using O_NOFOLLOW

Michael Kerrisk

Restructure O_NOFOLLOW text for easier parsing

Michael Kerrisk

Clarify that O_NOFOLLOW is now in POSIX

poll.2

select.2

Nicolas Biscos

Add a reference to the sigset discussion in sigprocmask(2)

A little while back, I added a note to sigprocmask.2 that discussed the difference between the libc's and the kernel's sigset_t structures. I added that note, because I saw this being done wrong in a tool tracing system calls (causing subtle bugs). As it turns out, the same bugs existed for ppoll and pselect, for the same reason. I'm hoping by adding the reference here, future writers of similar tools will find that discussion and not make the same mistake.

posix_fadvise.2

Michael Kerrisk

Mention /proc/sys/vm/drop_caches

It may be helpful for the reader of this page to know about /proc/sys/vm/drop_caches.

Michael Kerrisk

Reorganize some text

Details for various flags were hidden under NOTES.

Move them to DESCRIPTION, to make the details more obvious.

Michael Kerrisk

One can use open(2)

+ mmap(2) + mincore(2) as a 'fincore'

Note that open(2) + mmap(2) + mincore(2) can be used to get a view of which pages of a file are currently cached.

Michael Kerrisk [Maik Zumstrull]

Note that POSIX_FADV_DONTNEED *may* try to write back dirty pages

Michael Kerrisk

SEE ALSO: mincore(2)

prctl.2

Michael Kerrisk

Clarify that the ambient capability set is per-thread

Keno Fischer

Be more precise in what causes dumpable to reset

Michael Kerrisk

The no_new_privs setting is per-thread (not per-process)

Michael Kerrisk

Mention /proc/PID/status 'NoNewPrivs' field

Michael Kerrisk

Add reference to seccomp(2) in discussion of PR_SET_NO_NEW_PRIVS

ptrace.2

Omar Sandoval

Clarify description of PTRACE_O_EXITKILL

read.2

Michael Kerrisk [Kai NODA]

Rework text in DESCRIPTION that talks about limits for 'count'

See https://bugzilla.kernel.org/show_bug.cgi?id=86061

Michael Kerrisk [Steven Luo]

Remove crufty text about EINTR and partial read

Remove bogus text saying that POSIX permits partial read to return -1/EINTR on interrupt by a signal handler.

That statement already ceased to be true in SUSv1 (1995)!

See https://bugzilla.kernel.org/show_bug.cgi?id=193111

readv.2

Michael Kerrisk

Remove generic advice about mixing stdio and syscalls on same file

There is nothing specific to readv()/writev() about this advice.

recv.2

Michael Kerrisk [Vincent Bernat]

Remove duplicate paragraph

man-pages-1.34 included changes that duplicated an existing paragraph. Remove that duplicate.

Michael Kerrisk

SEE ALSO: add ip(7), ipv6(7), tcp(7), udp(7), unix(7)

remap_file_pages.2

Michael Kerrisk

remap_file_pages() has been replaced by a slower in-kernel emulation

send.2

Michael Kerrisk

SEE ALSO: add ipv6(7),
socket(7), unix(7)

setxattr.2

Michael Kerrisk

ERRORS: add EPERM for immutable/append-only files

signalfd.2

Michael Kerrisk

signalfd() doesn't play well with helper programs spawned by libraries
See <https://lwn.net/Articles/415684/>.

Michael Kerrisk

signalfd can't be used to receive synchronously generated signals
Signals such as the SIGSEGV that results from an invalid
memory access can be caught only with a handler.

stat.2

Michael Kerrisk

EXAMPLE: extend program to also show ID of the containing device

Michael Kerrisk

NOTES: mention fstatat() AT_NO_AUTOMOUNT in discussion of automounting

statfs.2

Namhyung Kim

Add more filesystem types
Add missing magic numbers from /usr/include/linux/magic.h

syscall.2

Mike Frysinger

Add endian details with 64-bit splitting
Architectures that split 64-bit values across register pairs
usually

do so according to their C ABI calling convention (which
means endianness). Add some notes to that effect, and change the
readahead example to show a little endian example (since that is
way more common than big endian).

Also start a new list of syscalls that this issue does not apply
to.

Mike Frysinger

Note parisc handling of aligned register pairs

While parisc would normally have the same behavior as ARM/PowerPC, they decide to write shim syscall stubs to unpack/realign rather than expose the padding to userspace.

tkill.2

Jann Horn

Document EAGAIN error for real-time signals

truncate.2

Michael Kerrisk

Note use of ftruncate() for POSIX shared memory objects

unlink.2

Michael Kerrisk

ERRORS: add EPERM error for immutable/read-only files

vfork.2

Michael Kerrisk

Explain why the child should not call exit(3)

Michael Kerrisk

Another reason to use vfork() is to avoid overcommitting memory

Michael Kerrisk

Note some caveats re the use of vfork()

Inspired by Rich Felker's post at <http://ewontfix.com/7/>.

See also https://sourceware.org/bugzilla/show_bug.cgi?id=14749 and

See also https://sourceware.org/bugzilla/show_bug.cgi?id=14750.

Michael Kerrisk

SEE ALSO: add _exit(2)

write.2

Michael Kerrisk [Kai NODA]

Alert the reader that there is a limit on 'count'

See https://bugzilla.kernel.org/show_bug.cgi?id=86061

aio_suspend.3

Michael Kerrisk

Note that the glibc implementation is not async-signal-safe

See https://sourceware.org/bugzilla/show_bug.cgi?id=13172

backtrace.3

Michael Kerrisk

SEE ALSO: add addr2line(1) and gdb(1)

bcmp.3

bcopy.3

bzero.3

memccpy.3

memchr.3

memcmp.3

memcpy.3

memfrob.3

memmem.3

memmove.3

memset.3

Michael Kerrisk

SEE ALSO: add bstring(3)

exec.3

Michael

Kerrisk

execl() and execl_e() were not async-signal-safe before glibc 2.24

fopen.3

Michael Kerrisk [Helmut Eller]

Describe freopen() behavior for NULL pathname argument

See https://bugzilla.kernel.org/show_bug.cgi?id=191261

Michael Kerrisk

Note the open(2) flags that correspond to the 'mode' argument

Michael Kerrisk

Change argument name: 'path' to 'pathname'

For consistency with open(2).

Michael Kerrisk

Add subsection headings for each function

fts.3

Michael Kerrisk

Use better argument name for fts_children() and fts_set()

Michael Kerrisk

Fix minor error in FTSENT structure definition

Michael Kerrisk

Improve explanation of 'fts_errno'

Michael Kerrisk

Give a hint that there are further fields in the FTSENT structure

Michael Kerrisk

Clarify meaning of zero as 'instr' value for fts_set()

ftw.3

Michael Kerrisk

Correctly handle use

of stat info for FTW_NS in example program

Michael Kerrisk

Clarify that stat buffer is undefined for FTW_NS

getline.3

Michael Kerrisk

EXAMPLE: better error handling

Michael Kerrisk [Kent Fredic]

EXAMPLE: handle null bytes in input

Jann Horn

Document ENOMEM error case

see the error handling in libio/iogetdelim.c

Michael Kerrisk

EXAMPLE: specify file to be opened as command-line argument

Michael Kerrisk

Use better variable name in example program

getmntent.3

Michael Kerrisk [Anders Thulin]

Prefer '\\\\' as the escape to get a backslash

See https://bugzilla.kernel.org/show_bug.cgi?id=191611

getopt.3

Michael Kerrisk

Reword discussion of error handling and reporting

The existing description was hard to understand. Break it into a bullet list that separates out the details in a manner that is easier to parse.

Michael Kerrisk

Correct details of use of <stdio.h> to get getopt() declaration

Michael Kerrisk [John Wiersba]

Remove some redundant text

mq_open.3

Michael Kerrisk [Adam Martindale]

Include definition of the 'mq_attr' structure in this man page

Make the reader's life a little easier by saving them from having to refer to mq_getattr(3).

mq_send.3

Michael Kerrisk [Adam Martindale]

Refer to mq_overview(7) for details on range of message priority

__ppc_set_ppr_med.3

Wainer dos Santos Moschetta

Note need for _ARCH_PWR8 macro

The _ARCH_PWR8 macro must be defined to get the __ppc_set_ppr_very_low() and __ppc_set_ppr_med_high() definitions.

printf.3

Michael Kerrisk

Document nonstandard 'Z' modifier

Michael Kerrisk

Document 'q' length modifier

Michael Kerrisk [Erik Roland van der Meer]

Fix a small bug in example code

Move the second call to `va_end(ap)`

to above the if-block that

precedes it, so that the `va_list 'ap'` will be cleaned up in all cases.

Michael Kerrisk [Nadav Har'El]

As a nonstandard extension, GNU treats 'l' and 'L' as synonyms

See https://bugzilla.kernel.org/show_bug.cgi?id=190341.

Michael Kerrisk

Add references to `setlocale(3)` in discussions of locales

Michael Kerrisk

SEE ALSO: remove bogus self reference (`dprintf(3)`)

random.3

Michael Kerrisk

Relocate information of "optimal" value of `initstate()` 'n' argument

The information was a bit hidden in NOTES.

random_r.3

Michael Kerrisk [Jan Ziak]

'buf.state' must be initialized to NULL before calling `initstate_r()`

See https://bugzilla.kernel.org/show_bug.cgi?id=192801.

Michael Kerrisk

Add some usage notes for `setstate_r()`

Michael Kerrisk

Note that 'buf' records a pointer to 'statebuf'

See https://sourceware.org/bugzilla/show_bug.cgi?id=3662.

Michael Kerrisk

Add BUGS section pointing out the weirdness of the `initstate_r()` API

resolver.3

Michael Kerrisk

`RES_AAONLY`, `RES_PRIMARY`, `RES_NOCHECKNAME`, `RES_KEEPTSIG` are deprecated

These options were never implemented; since glibc 2.25, they are deprecated.

Michael Kerrisk

The `RES_NOIP6DOTINT` is removed in glibc 2.25

Michael Kerrisk

Note that `RES_BLAST` was unimplemented and is now deprecated

Michael Kerrisk

`RES_USE_INET6` is deprecated since glibc 2.25

Michael Kerrisk

`RES_USEBSTRING` was removed in glibc 2.25

resolver.3

resolv.conf.5

Michael Kerrisk

Note that RES_USEBSTRING defaults to off

scandir.3

Michael Kerrisk [Ian Jackson]

Fix errors in example program

See <http://bugs.debian.org/848231>.

Michael Kerrisk

Improve logic of the example program

scanf.3

Michael Kerrisk

Document the quote (') modifier

for decimal conversions

sem_post.3

setjmp.3

Michael Kerrisk

SEE ALSO: add signal-safety(7)

sem_wait.3

Michael Kerrisk [Fabjan Sukalia]

Remove statement that SA_RESTART does not cause restarting

This has not been true since Linux 2.6.22. The description of EINTR maintains a reference to signal(7), which explains the historical details.

See https://bugzilla.kernel.org/show_bug.cgi?id=192071

sleep.3

Michael Kerrisk [Mike Frysiner]

Note that sleep() is implemented via nanosleep(2)

See https://bugzilla.kernel.org/show_bug.cgi?id=73371.

Michael Kerrisk [Mike Frysinger]

Note that sleep() sleeps for a real-time number of seconds

See https://bugzilla.kernel.org/show_bug.cgi?id=73371.

Michael Kerrisk

Convert BUGS text to "Portability notes" subsection

The existing text is not a bug, as such.

Michael Kerrisk

DESCRIPTION: minor reworking

strerror.3

Heinrich Schuchardt

Indicate reasonable buffer size for strerror_r() and strerror_l()

Add a hint which buffer size is needed for strerror_r() and strerror_l().

strverscmp.3

Michael Kerrisk [Vivenzio Pagliari]

Fix comparison error in example program

system.3

Michael Kerrisk

In the glibc implementation, fork handlers are not executed by system()

random.4

Michael Kerrisk [Jon Jensen]

Note that entropy_avail will be a number in the range 0..4096

core.5

Michael Kerrisk

Clarify that dumping program's initial CWD is root directory

Michael Kerrisk

The target of core dump piping can also be a script

filesystems.5

Michael Kerrisk

SEE ALSO: add btrfs(5), nfs(5), tmpfs(5)

intro.5

Michael Kerrisk

Document the reality that by now Section 5 also covers filesystems

There are by now, from various filesystem projects, various pages in Section

5 that document different filesystems.

Change intro(5) to reflect that.

Documented after following: <http://bugs.debian.org/847998>

proc.5

Mike Frysinger [Michael Kerrisk]

Clarify /proc/pid/environ behavior

/proc/pid/environ reflects process environment at

start of program execution; it is set at time of execve(2)

Michael Kerrisk

Add reference to slabinfo(5) in discussion of /proc/meminfo 'Slab' field

Michael Kerrisk

Add entries for "keys" files that refer reader to keyrings(7)

Michael Kerrisk

Remove duplicate /proc/[pid]/seccomp entry

Michael Kerrisk

Mention other system calls that create 'anon_inode' file descriptors

Mention a few other system calls that create file descriptors

that display an 'anon_inode' symlink in /proc/PID/fd

Michael Kerrisk

Add some detail on overcommit_memory value 1

Michael Kerrisk

Add reference to vdso(7)
in discussion of /proc/PID/maps

resolv.conf.5

Michael Kerrisk

ip6-bytestring was removed in glibc 2.25

Michael Kerrisk

The ipc-dotint and no-ip6-dotint options were removed in glibc 2.25

Michael Kerrisk

The 'inet6' option is deprecated since glibc 2.25

slabinfo.5

Michael Kerrisk

SEE ALSO: add slabtop(1)

capabilities.7

Michael Kerrisk [Casey Schaufler]

Add subsection with notes to kernel developers

Provide some notes to kernel developers considering how to choose
which capability should govern a new kernel feature.

Michael Kerrisk

Further enhance the recommendation against new uses of CAP_SYS_ADMIN

Michael Kerrisk

Explicitly point from CAP_SYS_ADMIN to "Notes for kernel developers"

Michael Kerrisk

Add another case for CAP_DAC_READ_SEARCH

Michael Kerrisk

Refer to execve(2) for the reasons that file capabilities may be ignored

Michael Kerrisk

Document a new use of CAP_SYS_RESOURCE

Michael Kerrisk

Add some more operations governed by CAP_SYS_ADMIN

Michael Kerrisk

Adjust references to chattr(1) to point to ioctl_iflags(2)

environ.7

Michael Kerrisk

Mention prctl(2) PR_SET_MM_ENV_START and PR_SET_MM_ENV_END operations

inotify.7

Michael Kerrisk

Point out that inotify monitoring is inode based

ip.7

Michael Kerrisk

SEE ALSO: add ip(8)

man.7

uri.7

Jakub Wilk

Use "www.kernel.org" in example URLs

Apparently www.kernelnotes.org is now a spam site.

mount_namespaces.7

Michael Kerrisk [Rob Landley]

Rework the discussion of defaults for mount propagation types

Add rather more detail. In particular, note the cases where the

default propagation type is MS_PRIVATE vs MS_SHARED.

namespaces.7

Michael Kerrisk

EXAMPLE: fix an error in shell session

Michael Kerrisk

EXAMPLE: rename the example

program

Use a more generic name, since this program may be expanded
in various ways in the future.

Michael Kerrisk

SEE ALSO: add ip-netns(8)

Michael Kerrisk

Remove content split out into ioctl_ns(2)

netlink.7

Michael Kerrisk

NETLINK_IP6_FW went away in Linux 3.5

Michael Kerrisk

NETLINK_W1 went away in Linux 2.6.18

Michael Kerrisk

Add NETLINK_SCSITRANSPORT to list

Michael Kerrisk

Add NETLINK_RDMA to list

Michael Kerrisk

NETLINK_FIREWALL was removed in Linux 3.5

Michael Kerrisk

NETLINK_NFLOG was removed in Linux 3.17

Jakub Wilk

Update libnl homepage URL

The original URL is 404.

pid_namespaces.7

user_namespaces.7

Michael Kerrisk

Adjust references to namespaces(7) to ioctl_ns(2)

pid_namespaces.7

Keno Fischer

CLONE_SIGHAND|CLONE_VM|CLONE_NEWPID is no longer disallowed

pipe.7

Michael Kerrisk

Since Linux 4.9,

pipe-max-size is ceiling for the default pipe capacity

Michael Kerrisk

Clarify that default pipe capacity is 16 pages

The statement that the default pipe capacity is 65536 bytes is accurate only on systems where the page size is 4096B.

See the use of PIPE_DEF_BUFFERS in the kernel source.

random.7

Michael Kerrisk

Mention getentropy(3)

Michael Kerrisk

SEE ALSO: add getentropy(3)

Michael Kerrisk

SEE ALSO: add getauxval(3)

A small hint to the reader that some random bytes arrive in the auxiliary vector.

signal.7

Michael Kerrisk

SIGSYS: add reference to seccomp(2)

Michael Kerrisk

Change description of SIGSYS to "Bad system call"

This is the more typical definition.

Michael Kerrisk

SIGPIPE: add reference to pipe(7)

Michael Kerrisk

SIGXFSZ: add reference to setrlimit(2)

Michael Kerrisk

Add a name for SIGEMT

Michael

Kerrisk

SIGXCPU: add reference to setrlimit(2)

Michael Kerrisk

Migrated signal-safety discussion to new signal-safety(7) page

unix.7

Michael Kerrisk [Sergey Polovko]

Since Linux 3.4, UNIX domain sockets support MSG_TRUNC

This was correctly noted in recv(2), but the unix(7) page

was not correspondingly updated for the Linux 3.4 change.

Michael Kerrisk [Willy Tarreau]

Document ETOOMANYREFS for SCM_RIGHTS send exceeding RLIMIT_NOFILE limit

user_namespaces.7

Michael Kerrisk

Change page cross reference: keyctl(2) ==> keyrings(7)

ld.so.8

Michael Kerrisk

LD_BIND_NOT has effect only for function symbols

Michael Kerrisk

Describe use of LD_DEBUG with LD_BIND_NOT

Michael Kerrisk

In secure mode, LD_AUDIT restricts the libraries that it will load

Michael Kerrisk

LD_AUDIT understands \$ORIGIN, \$LIB, and \$PLATFORM

==== Changes in man-pages-4.11

====

Released: 2017-05-03, Baden, Switzerland

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Alexander Alemayhu <alexander@alemayhu.com>

Alexander Miller <alex.miller@gmx.de>

Zack Weinberg <zackw@panix.com>
<dingguiqiang@foxmail.com>

Apologies if I missed anyone!

New and rewritten pages

ioctl_userfaultfd.2

Michael Kerrisk, Mike Rapoport

New page describing ioctl(2) operations for userfaultfd

statx.2

David Howells, Michael Kerrisk [Andreas Dilger]

New page describing statx(2) system call added in Linux 4.11

userfaultfd.2

Mike Rapoport, Michael Kerrisk [Andrea Arcangeli]

New page describing userfaultfd(2) system call.

pthread_atfork.3

Michael Kerrisk

New page describing pthread_atfork(3)

slabinfo.5

Michael Kerrisk

Rewrite to try to bring the content close to current reality

There's still gaps to fill in, but the existing page
was in any case hugely out of date.

inode.7

Michael Kerrisk

New page with information about inodes

David Howells provided a statx(2) page that duplicated much of the information from stat(2). Avoid such duplication by moving the common information in stat(2) and statx(2) to a new page.

Renamed pages

ioctl_console.2

Michael Kerrisk

Renamed from console_ioctl.4

Most ioctl() man pages are in section 2, so move this one there for consistency.

Michael Kerrisk

Note type of 'argp' for a various operations

For some commands, there was no clear statement about the type of the 'argp' argument.

ioctl_tty.2

Michael Kerrisk

Renamed from tty_ioctl(4)

All other ioctl(2) pages are in section 2. Make this page consistent.

Michael Kerrisk

Packet mode state change events give POLLPRI events for poll(2)

Newly documented interfaces in existing pages

ioctl_ns.2

Michael Kerrisk

Document the NS_GET_NSTYPE operation added in Linux 4.11

Michael Kerrisk

Document the NS_GET_OWNER_UID operation added in Linux 4.11

proc.5

Michael Kerrisk

Document /proc/sys/kernel/sched_child_runs_first

namespaces.7

Michael Kerrisk

Document the /proc/sys/user/* files added in Linux 4.9

socket.7

Francois Saint-Jacques, Michael Kerrisk

Document SO_INCOMING_CPU

New and changed links

console_ioctl.4

Michael Kerrisk

Link for old name of ioctl_console(2) page

tty_ioctl.4

Michael Kerrisk

Link for old name of ioctl_tty(2)

page

Global changes

Various pages

Michael Kerrisk

Change page cross-references from tty_ioctl(4) to ioctl_tty(2)

Michael Kerrisk

Change page cross-references for console_ioctl(4) to ioctl_console(2)

Changes to individual pages

alarm.2

Michael Kerrisk

SEE ALSO: add timer_create(2) and timerfd_create(2)

chmod.2

fsync.2

mkdir.2

mknod.2

open.2

truncate.2

umask.2

utime.2

utimensat.2

Michael Kerrisk

Add/replace references to inode(7)

clone.2

Michael Kerrisk

CLONE_NEWCGROUP by an unprivileged process also causes an EPERM error

clone.2

unshare.2

Michael Kerrisk

Exceeding one of the limits in /proc/sys/user/* can cause ENOSPC

Michael Kerrisk

CLONE_NEWPID yields ENOSPC if nesting limit of PID namespaces is reached

Michael Kerrisk

Exceeding the maximum nested user namespace limit now gives ENOSPC

Formerly, if the limit of 32 nested

user namespaces was exceeded,

the error EUSERS resulted. Starting with Linux 4.9, the error

is ENOSPC.

epoll_ctl.2

Michael Kerrisk

Defer to poll(2) for an explanation of EPOLLIN

Michael Kerrisk [Nicolas Biscos]

EPOLLERR is also set on write end of a pipe when the read end is closed

Michael Kerrisk [Nicolas Biscos]

Give the reader a clue that the 'events' field can be zero

'events' specified as zero still allows EPOLLHUP and

EPOLLERR to be reported.

_exit.2

Michael Kerrisk

On exit, child processes may be inherited by a "subreaper"

It is no longer necessarily true that orphaned processes

are inherited by PID 1.

Michael Kerrisk

Only the least significant byte of exit status is passed to the parent

fcntl.2

Michael Kerrisk

Mention memfd_create() in the discussion of file seals

Give the reader a clue about what kinds of objects can

be employed with file seals.

Michael Kerrisk

File seals are not generally applicable to tmpfs(5) files

As far as I can see, file seals can be applied only to

memfd_create(2) file descriptors. This was checked by experiment

and by reading mm/shmem.c::shmem_get_inode(), where one finds

the following line that applies to all new shmem files:

```
info->seals = F_SEAL_SEAL;
```

Only in the code of the memfd_create() system call is this setting reversed (in mm/shmem.c::memfd_create):

```
if (flags & MFD_ALLOW_SEALING)
    info->seals &= ~F_SEAL_SEAL;
```

fork.2

Michael Kerrisk

SEE ALSO: add pthread_atfork(3)

getdents.2

open.2

stat.2

statx.2

Michael Kerrisk

SEE ALSO: add inode(7)

getdtablesize.2

attr.5

Alexander Miller

Move .so directive to first line

Improves compatibility with the man
and other dumb tools
that process man page files.

getpid.2

Michael Kerrisk

Mention init(1) and "subreapers" in discussion of parent PID

ioctl_list.2

Cyril Hrubis [Arnd Bergmann]

BLKRASET/BLKRASET take unsigned long

ioctl_ns.2

Michael Kerrisk

ERRORS: document ENOTTY

kexec_load.2

sched_setaffinity.2

bootparam.7

Michael Kerrisk

Documentation/kernel-parameters.txt is now in Documentation/admin-guide/

lseek.2

Michael Kerrisk

SEE ALSO: add fallocation(2)

Both of these pages discuss file holes.

mincore.2

Michael Kerrisk

SEE ALSO: add fincore(1)

mmap.2

Michael Kerrisk

Remove ancient reference to flags that appear on some other systems

MAP_AUTOGROW, MAP_AUTORESrv, MAP_COPY, and MAP_LOCAL may have appeared on some systems many years ago, but the discussion here mentions no details and the systems and flags probably ceased to be relevant

long ago. So, remove this text.

Michael Kerrisk

SEE ALSO: add userfaultfd(2)

open.2

Michael Kerrisk

Add statx() to list of "at" calls in rationale discussion

poll.2

Michael Kerrisk

Expand discussion of POLLPRI

Michael Kerrisk [Nicolas Biscos]

POLLERR is also set on write end of a pipe when the read end is closed

posix_fadvise.2

Michael Kerrisk

SEE ALSO: add fincore(1)

prctl.2

Mike Frysinger

PR_SET_MM: Refine CONFIG_CHECKPOINT_RESTORE requirement

The Linux 3.10 release dropped the c/r requirement and opened it up to all users.

Mike Frysinger

PR_SET_MM: Document new PR_SET_MM_MAP{,_SIZE} helpers

Mike Frysinger

PR_SET_MM: Document arg4/arg5 zero behavior

The kernel will immediately reject calls where arg4/arg5 are not zero. See kernel/sys.c:prctl_set_mm().

Michael Kerrisk

Explain rationale for use of subreaper processes

Michael

Kerrisk

Note semantics of child_subreaper setting on fork() and exec()

Michael Kerrisk

Improve description of PR_SET_CHILD_SUBREAPER

rename.2

Michael Kerrisk [Georg Sauthoff]

Note that there is no glibc wrapper for renameat2()

sched_setaffinity.2

Michael Kerrisk

SEE ALSO: add get_nprocs(3)

select.2

Michael Kerrisk [Matthew Wilcox, Carlos O'Donnell]

Linux select() is buggy wrt POSIX in its check for EBADF errors

Michael Kerrisk

Show correspondence between select() and poll() readiness notifications

Michael Kerrisk

Give a hint that sets must be reinitialized if using select() in a loop

Michael Kerrisk

Refer to POLLPRI in poll(2) for info on exceptional conditions

Michael Kerrisk

Move mislocated text describing the self-pipe text from BUGS to NOTES

sigaction.2

Michael Kerrisk

Show the prototype of an SA_SIGINFO signal handler

signalfd.2

Michael Kerrisk

SIGKILL and SIGSTOP are silently ignored in 'mask'

sigprocmask.2

Dmitry V. Levin

Do not specify an exact value of rt_sigprocmask's 4th argument

As sizeof(kernel_sigset_t) is not the same for all architectures,

it would be better not to mention any numbers as its value.

Michael Kerrisk

'set' and 'oldset' can both be NULL

sigwaitinfo.2

Michael Kerrisk

sigwaitinfo() can't be used to accept synchronous signals

socketcall.2

Mike Frysinger

Document call argument

stat.2

Michael Kerrisk

Remove information migrated to inode(7) page

Michael Kerrisk

Restructure field descriptions as a hanging list

Michael Kerrisk

Remove "Other systems" subsection

These details about other systems were added in 1999,
and were probably of limited use then, and even less today.

However, they do clutter the page, so remove them.

Michael Kerrisk

DESCRIPTION: add

list entries for 'st_uid' and 'st_gid'

Michael Kerrisk

Add some subsection headings to ease readability

David Howells

ERRORS: correct description of ENOENT

Michael Kerrisk

Give 'struct stat' argument a more meaningful name ('statbuf')

Marcin Iusarz

Tweak description of AT_EMPTY_PATH

Currently it says when dirfd is AT_FDCWD it can be something
other than directory, which doesn't make much sense. Just swap
the order of sentences.

Michael Kerrisk

Add slightly expanded description of 'st_ino' field

Michael Kerrisk

DESCRIPTION: add a list entry for 'st_ino'

Michael Kerrisk

DESCRIPTION: add a list entry for 'st_nlinks' field

syscalls.2

Michael Kerrisk

Add membarrier(2)

Michael Kerrisk

Fix kernel version for userfaultfd(2)

Michael Kerrisk

Linux 4.11 added statx()

Michael Kerrisk

Include deprecated getunwind(2) in list

wait.2

Michael Kerrisk

Orphaned children may be adopted by a "subreaper", rather than by PD 1

bzero.3

Michael Kerrisk [Zack Weinberg]

Add correct header file for explicit_bzero()

cfree.3

Michael Kerrisk

cfree() is removed from glibc in version 2.26

exit.3

Michael Kerrisk

Improve discussion of zombie processes

getentropy.3

Nikos Mavrogiannopoulos [Michael Kerrisk, Florian Weimer]

Correct header file

Michael Kerrisk [Frank Theile]

SYNOPSIS: add missing return type for getentropy() declaration

grantpt.3

Michael Kerrisk

Tell a more nuanced story about what grantpt() does or does not do

insque.3

Michael Kerrisk

SEE ALSO: add queue(3)

queue.3

Michael Kerrisk

SEE ALSO: add insque(3)

shm_open.3

Michael Kerrisk

Clarify that POSIX shared memory uses tmpfs(5)

syslog.3

Michael Kerrisk [Ian Abbott, Walter Harms]

Reorganize page text for easier parsing and better readability

Michael Kerrisk

Various rewordings and improvements

Michael Kerrisk

Note default value for 'facility' when calling openlog()

Michael Kerrisk

SEE ALSO: add journalctl(1)

ttyname.3

Dmitry V. Levin

Document ENODEV error code

Christian Brauner

NOTES: warn about a confusing case that may occur with mount namespaces

wcsdup.3

Jan Heberer

RETURN VALUE: fix error in return value description

Return value for failure was accidentally changed from NULL to
-1 in man-pages commit 572acb41c48b6b8e690d50edff367d8b8b01702a.

elf.5

Michael Kerrisk

SEE ALSO: add elfedit(1), nm(1), size(1), strings(1), and strip(1)

nsswitch.conf.5

Florian Weimer

Mention sudoers

It turns out that sudo drops things into nsswitch.conf, too.

proc.5

Michael Kerrisk

Refer to namespaces(7) for discussion of /proc/sys/user/* files

Michael Kerrisk

Simplify /proc/slabinfo

entry

Don't repeat (out-of-date) info from slabinfo(5); just defer to
that page.

tmpfs.5

Michael Kerrisk

tmpfs supports extended attributes, but not 'user' extended attributes

environ.7

Jakub Wilk

Fix name of function that honors TMPDIR

tempnam() takes the TMPDIR environment variable into account, unlike
tmpnam(), which always creates pathnames within /tmp.

hostname.7

Marko Myllynen

Use lower case for hostname example

Marko Myllynen

Use generic names in examples

Marko Myllynen

Describe accepted characters for hostname

inotify.7

Michael Kerrisk [Nicolas Iooss]

Mounting a filesystem on top of a monitored directory causes no event

man-pages.7

Michael Kerrisk

Note preferred approach for 'duplicate' errors

pid_namespaces.7

Michael Kerrisk

The maximum nesting depth for PID namespaces is 32

user_namespaces.7

Stephan Bergmann

Fixes to example

While toying around with the `usersns_child_exec` example program on the `user_namespaces(7)` man page, I noticed two things:

* In the EXAMPLE section, we need to mount the new `/proc` before looking at `/proc/$$/status`, otherwise the latter will print information about the outer namespace's PID 1 (i.e., the real `init`). So the two paragraphs need to be swapped.

* In the program source, make sure to close `pipe_fd[0]` in the child before `exec'ing`.

pthread.7

Michael Kerrisk

SEE ALSO: add `pthread_rwlockattr_setkind_np(3)`

pty.7

Michael Kerrisk

Mention a couple of other applications of pseudoterminals

sem_overview.7

Michael Kerrisk

SEE ALSO: add `shm_overview(7)`

signal.7

Michael Kerrisk

SEE ALSO: add `sigreturn(2)`

tcp.7

Michael Kerrisk

Note indications for OOB data given by `select(2)` and `poll(2)`

Chema Gonzalez

`tcp_abc` was removed in 3.9

xattr.7

Michael Kerrisk

SEE ALSO: add `ioctl_iflags(2)`

People sometimes confuse `xattrs` and inode flags. Provide a link to the page that describes inode flags to give them a tip.

ld.so.8

Michael Kerrisk

Mention quoting when using "Rpath tokens" in `LD_AUDIT` and `LD_PRELOAD`

Michael Kerrisk
Expand description of /etc/ld.so.preload
Michael Kerrisk
Mention ldconfig(8) in discussion of /etc/ld.so.cache

zdump.8
Jakub Wilk
Add OPTIONS section heading

===== Changes in man-pages-4.12 =====

Released: 2017-07-13, London

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

<hiroki.ishii@miraclelinux.com>

Apologies if I missed anyone!

New and rewritten pages

ioctl_getfsmap.2

Darrick J. Wong

Document the GETFSMAP ioctl

Document the new GETFSMAP ioctl that returns the physical layout of a
(disk-based) filesystem.

Newly documented interfaces in existing pages

namespaces.7

Kirill Tkhai [Michael Kerrisk]

Document the /proc/[pid]/ns/pid_for_children file

Changes to individual pages

ldd.1

Michael Kerrisk

'objdump -p prog | grep NEEDED' doesn't give quite same info as 'ldd'

chmod.2

Michael Kerrisk

Put fchmod() feature test macro requirements in a more readable format

Michael Kerrisk

Note glibc 2.24 feature test macro requirements changes for fchmod()

chown.2

Michael Kerrisk

When file owner or group is changed, file capabilities are cleared

Michael Kerrisk

Changes to file owner by root also clear set-UID and set-GID bits

clone.2

Michael Kerrisk

Update BUGS to reflect fact that PID caching was removed in glibc 2.25

epoll_wait.2

Michael Kerrisk

Clarify semantics of returned 'data' field

The returned 'data' is the 'data' most recently set via
epoll_ctl().

get_mempolicy.2

Michael Kerrisk [Nadav Har'El, Andi Kleen]

SYNOPSIS: fix return type of get_mempolicy()

See https://bugzilla.kernel.org/show_bug.cgi?id=97051

getpid.2

Carlos O'Donell, Michael Kerrisk

Note that PID caching is removed as of glibc 2.25

Since glibc 2.25 the PID cache is removed.

Rationale given in the release notes:

https://sourceware.org/glibc/wiki/Release/2.25#pid_cache_removal

ioctl.2

Michael Kerrisk

SEE ALSO: add ioctl_getfsmap(2)

ioctl_getfsmap.2

Michael Kerrisk

Fix ordering of sections

Michael Kerrisk

Add VERSIONS section

Michael Kerrisk

ERRORS: order alphabetically

madvise.2

Michael Kerrisk

Remove bogus text re POSIX_MADV_NOREUSE

There is a POSIX_FADV_NOREUSE for posix_fadvise(),
but no POSIX_MADV_NOREUSE for any API in POSIX.

membarrier.2

Michael Kerrisk

Add ENOSYS error for 'nohz_full' CPU setting

mount.2

NeilBrown

Revise description of MS_REMOUNT | MS_BIND

MS_REMOUNT|MS_BIND affects all per-mount-point flag. MS_RDONLY is only special because it, uniquely, is both a per-mount-point flag *and* a per-filesystem flag.

So the sections of per-mount-point flags and MS_REMOUNT can usefully be clarified.

open.2

Michael Kerrisk

Note some further advantages of the *at() APIs

pipe.2

Michael Kerrisk

SEE ALSO: add tee(2) and vmsplice(2)

readv.2

Michael Kerrisk

glibc 2.26 adds library support for preadv2() and pwritev2()

sched_setaffinity.2

Michael Kerrisk

Mention cpuset cgroups as a cause of EINVAL error

seccomp.2

Mike Frysinger

Expand SECCOMP_RET_KILL documentation

sigaction.2

Michael Kerrisk

Note feature test macro requirements for 'si_code' constants

Michael Kerrisk

Add a subheading for the description of 'si_code'

Michael Kerrisk

TRAP_BRANCH and TRAP_HWBKPT are present only on IA64

sigaltstack.2

Michael Kerrisk

Note that specifying SS_ONSTACK in ss.ss_flags decreases portability

In the Illumos source (which presumably mirrors its Solaris ancestry), there is this check in the sigaltstack() implementation:

```
if (ss.ss_flags & ~SS_DISABLE)
```

```
return (set_errno(EINVAL));
```

And in the FreeBSD source we find similar:

```
if ((ss->ss_flags & ~SS_DISABLE) != 0)
```

```
return (EINVAL);
```

Michael Kerrisk

Note buggy addition of `ss.ss_flags==SS_ONSTACK`

Note buggy addition of `ss.ss_flags==SS_ONSTACK` as a synonym for `ss_flags==0`. No other implementation does this, AFAIK.

And it was not needed :-).

Michael Kerrisk

Specifying 'ss' returns the current settings without changing them

Michael Kerrisk

Give 'oss' argument a more meaningful name: 'old_ss'

Michael Kerrisk

Some minor reworking of the text

Michael Kerrisk

ERRORS: update description of EINVAL error

splice.2

tee.2

vmsplice.2

Michael Kerrisk

SEE ALSO: add pipe(7)

splice.2

Michael Kerrisk

ERRORS: split EINVAL error cases

Michael Kerrisk

ERRORS: add EINVAL for case where both descriptors refer to same pipe

timer_create.2

Michael Kerrisk

Document the CONFIG_POSIX_TIMERS option added in Linux 4.10

wait.2

Michael Kerrisk

Note glibc 2.26 changes

to feature test macro requirements for waitid()

acosh.3

asinh.3

atanh.3

Alex Henrie

Remove C89 designation.

See https://bugzilla.kernel.org/show_bug.cgi?id=196319

bsd_signal.3

Michael Kerrisk

Note feature test macro requirements changes for glibc 2.26

dl_iterate_phdr.3

Michael Kerrisk

dl_iterate_phdr() shows the order in which objects were loaded

dl_iterate_phdr() tells us not just which objects are

loaded, but also the order in which they are loaded

(the "link-map order"). Since the order is relevant for

understanding symbol resolution, give the reader this clue.

Michael Kerrisk

Expand the code example, and show sample output

Michael Kerrisk

List values for the 'p_type' field

dlsym.3

Michael Kerrisk

_GNU_SOURCE is needed to get RTLD_DEFAULT and RTLD_NEXT definitions

flockfile.3

Michael Kerrisk

Note glibc 2.24 feature test macro requirement changes

fpathconf.3

Michael Kerrisk

Rework RETURN VALUE description to add more detail

Michael Kerrisk

Add an errors section

Michael Kerrisk

Largely rewrite the description of _PC_CHOWN_RESTRICTED

Michael Kerrisk

Rewrite description of _PC_PIPE_BUF

The existing description was not accurate, and lacked details.

ftw.3

Michael Kerrisk

BUGS: document a probable glibc regression in FTW_SLN case

See https://bugzilla.redhat.com/show_bug.cgi?id=1422736

and <http://austingroupbugs.net/view.php?id=1121>.

getaddrinfo.3

Quentin Rameau

Fix _POSIX_C_SOURCE value for getaddrinfo()

The correct _POSIX_C_SOURCE value is 200112L, not 201112L in features.h.

getcontext.3

Carlos O'Donell

Exemplar structure should use 'ucontext_t'.

getgrent.3

Michael Kerrisk

Note glibc 2.22 changes for feature test macro requirements

grantpt.3

ptsname.3

unlockpt.3

Ferdinand

Thiessen [Michael Kerrisk]

Update feature test macro-requirements for glibc 2.24

if_nametoindex.3

Douglas Caetano dos Santos

Add ENODEV error for if_nametoindex()

malloc.3

Michael Kerrisk

Document the reallocarray() added in glibc 2.26

nl_langinfo.3

Michael Kerrisk

Note feature test macro requirements for nl_langinfo_l()

posix_madvise.3

Dr. Tobias Quathamer

Remove paragraph about POSIX_FADV_NOREUSE

POSIX_FADV_NOREUSE is documented for posix_fadvise, and a

corresponding POSIX_MADV_NOREUSE flag is not specified by POSIX.

See <https://bugs.debian.org/865699>

ptsname.3

Michael Kerrisk [Arjun Shankar]

Since glibc 2.26, ptsname_r() no longer gives EINVAL for buf==NULL

rand.3

Michael Kerrisk

Note glibc 2.24 feature test macro requirement changes for rand_r()

resolver.3

Michael Kerrisk

Add basic notes on 'op' argument of res_nmkquery() and res_mkquery()

sigpause.3

Michael Kerrisk

Note glibc 2.26 changes to feature test macro requirements

sigwait.3

Michael Kerrisk

Note glibc 2.26 feature test macro changes

strtol.3

Heinrich Schuchardt

Mention 0X prefix

The prefix 0x may be capitalized as 0X.

See ISO/IEC 9899:1999.

sysconf.3

Michael Kerrisk [Pavel Tikhomirov]

Rework RETURN VALUE description to add more detail

Make the discussion clearer, and add a few details.

Also, fix the problem report from Pavel Tikhomirov who noted that the man page falsely said that errno is not changed on a successful return.

Addresses https://bugzilla.kernel.org/show_bug.cgi?id=195955

Michael Kerrisk

Add ERRORS section

ttyslot.3

Michael Kerrisk

Fix error in feature test macro requirements

Michael Kerrisk

Note feature test macro requirements changes in glibc 2.24

Michael Kerrisk

Clarify

details of use of <stdlib.h> file

unlocked_stdio.3

Michael Kerrisk

Note glibc 2.24 feature test macro requirement changes

elf.5

Michael Kerrisk

SEE ALSO: add dl_iterate_phdr(3)

nsswitch.conf.5

DJ Delorie

Clarify group merge rules

This minor patch clarifies when merging is not done, and how duplicate entries are merged.

proc.5

Michael Kerrisk

Document that 'iowait' field of /proc/stat is unreliable

Text taken from Chao Fan's kernel commit 9c240d757658a3ae996.

slabinfo.5

Michael Kerrisk [Jorge Nerin]

SEE ALSO: add some references to relevant kernel source files

tmpfs.5

Michael Kerrisk

SEE ALSO: add memfd_create(2), mmap(2), shm_open(3)

capabilities.7

Michael Kerrisk

Clarify the effect on process capabilities when UID 0 does execve(2)

Michael Kerrisk

Note effect on capabilities when a process with UID != 0 does execve(2)

Michael Kerrisk [David

Lewis]

Fix reversed descriptions of CAP_MAC_OVERRIDE and CAP_MAC_ADMIN

Michael Kerrisk

SEE ALSO: add filecap(8), netcap(8), pscap(8)

cgroup_namespaces.7

Michael Kerrisk

Add some further explanation of the example shell session

Michael Kerrisk

Fix a bug in shell session example

inode.7

Michael Kerrisk

Note glibc 2.24 feature test macro changes for S_IFSOCK and S_ISSOCK()

man.7

G. Branden Robinson

Undocument "URL" macro in man(7) in favor .UR+.UE

pid_namespaces.7

Michael Kerrisk

Mention /proc/[pid]/ns/pid_for_children

pipe.7

Michael Kerrisk

SEE ALSO: add tee(2) and vmsplice(2)

sigevent.7

Michael Kerrisk

Mention signal.h header file

signal.7

Michael Kerrisk [lilydjwg]

Since Linux 3.8, read(2) on an inotify FD is restartable with SA_RESTART

See https://bugzilla.kernel.org/show_bug.cgi?id=195711

Michael Kerrisk

read() from an inotify FD is no

longer interrupted by a stop signal

(Change was in Linux 3.8.)

tcp.7

Michael Kerrisk

Document value '2' for tcp_timestamps

Since Linux 4.10, the value '2' is meaningful for tcp_timestamps

Ruben Kerkhof

Change default value of tcp_frto

The default changed in c96fd3d461fa495400df24be3b3b66f0e0b152f9

(Linux 2.6.24).

ld.so.8

Michael Kerrisk

Greatly expand the explanation of LD_DYNAMIC_WEAK

Carlos O'Donell

Expand DT_RUNPATH details.

ld.so.8: Expand DT_RUNPATH details.

Every 3 years we get asked why DT_RUNPATH doesn't work like DT_RPATH.

The most recent question was here:

<https://www.sourceware.org/ml/libc-help/2017-06/msg00013.html>

We need to expand the description of DT_RUNPATH to cover this situation and explain that the DT_RUNPATH entries apply only to the immediate DT_NEEDED, not that of another, say dlopen'd

child object.

Michael Kerrisk

Since glibc 2.2.5, LD_PROFILE is ignored in secure-execution mode

Michael Kerrisk

Make notes on secure-execute mode more prominent

Place each note on secure-execution mode in a separate paragraph, to make it more obvious.

Michael Kerrisk

Note that libraries in standard directories are not normally set-UID

In secure mode, LD_PRELOAD loads only libraries from standard directories that are marked set-UID. Note that it is unusual for a library to be marked in this way.

Michael Kerrisk

SEE ALSO: add elf(5)

Michael Kerrisk

Note version where secure-execution started ignoring LD_USE_LOAD_BIAS

Michael Kerrisk

Correct glibc version that ignores LD_SHOW_AUXV in secure-execution mode

Ignored since 2.3.4 (not 2.3.5).

Michael Kerrisk

Rewrite LD_DEBUG_OUTPUT description and note that .PID is appended

=====
Changes in man-pages-4.13 =====

Released: 2017-09-15, Munich

<niya3@mail.ru>

Apologies if I missed anyone!

New and rewritten pages

pthread_mutex_consistent.3

Yubin Ruan, Michael Kerrisk

New page documenting pthread_mutex_consistent(3)

pthread_mutexattr_getpshared.3

Michael Kerrisk

New page for pthread_mutexattr_getpshared(3) and pthread_mutexattr_setpshared(3)

pthread_mutexattr_init.3

Michael Kerrisk

New page for pthread_mutexattr_init(3) and pthread_mutexattr_destroy(3)

pthread_mutexattr_setrobust.3

Yubin Ruan, Michael Kerrisk

New page for pthread_mutexattr_setrobust(3) and pthread_mutexattr_getrobust(3)

sysfs.5

Michael Kerrisk [Mark Wiegaard]

New page documenting the sysfs filesystem

Just a skeleton page so far, but perhaps it will be filled out
over time.

Newly documented interfaces in existing pages

fcntl.2

Jens Axboe, Michael Kerrisk

Describe the set/get write hints commands that are added in Linux 4.13

Document F_GET_RW_HINT, F_SET_RW_HINT, F_GET_FILE_RW_HINT, and F_SET_FILE_RW_HINT.

ioctl_tty.2

Aleksa Sarai, Michael Kerrisk

Add TIOCGPTPEER documentation

kcmp.2

Cyrill Gorcunov

Add KCMP_EPOLL_TFD description

keyctl.2

Eugene Syromyatnikov

Document the KEYCTL_RESTRICT_KEYRING operation

Eugene Syromyatnikov [Stephan Müller]

Document the ability to provide KDF parameters in KEYCTL_DH_COMPUTE

New and changed links

pthread_mutexattr_destroy.3

Michael Kerrisk

New link to new pthread_mutexattr_init.3 page

pthread_mutexattr_getrobust.3

pthread_mutexattr_getrobust_np.3

pthread_mutexattr_setrobust_np.3

Michael Kerrisk

New links to new pthread_mutexattr_setrobust.3 page

pthread_mutexattr_setpshared.3

Michael Kerrisk

New link to new pthread_mutexattr_getpshared.3 page

Global changes

Various pages

Michael Kerrisk

Use .EX/.EE for EXAMPLE programs

Various pages

Michael Kerrisk

Use consistent markup for code snippets

Change `.nf/.fi` to `.EX/.EE`

Various pages

Michael Kerrisk

Use

consistent markup for code snippets

The preferred form is

`.PP/.IP`

`.in +4n`

`.EX`

`<code>`

`.EE`

`.in`

`.PP/.IP`

Various pages

Michael Kerrisk

Formatting fix: replace blank lines with `.PP/.IP`

Blank lines shouldn't generally appear in `*roff` source (other than in code examples), since they create large vertical spaces between text blocks.

Various pages

Michael Kerrisk [Bjarni Ingi Gislason]

Add a non-breaking space between a number and a unit (prefix)

Based on a patch by Bjarni Ingi Gislason.

Various pages

Michael Kerrisk [Bjarni Ingi Gislason]

Use en-dash for ranges

Based on a patch by Bjarni Ingi Gislason.

A few pages

Michael Kerrisk

Fix misordering of sections

Michael Kerrisk

Fix order of SEE ALSO entries

Changes to individual pages

ldd.1

Michael Kerrisk

Add more detail on ldd security implications, noting glibc 2.27 changes

add_key.2

backtrace.3

syslog.3

Michael Kerrisk

Fix misordered SEE ALSO entries

add_key.2

request_key.2

keyrings.7

Eugene Syromyatnikov

Update Linux documentation pointers

chown.2

Michael Kerrisk

Update kernel version in note on support for grp/nogrp mount options

There has been no change since Linux 2.6.25, so update the kernel version to 4.12.

execve.2

Michael Kerrisk

SEE ALSO: add get_robust_list(2)

getrandom.2

Michael Kerrisk [Fabio Scotoni]

SYNOPSIS: make return type of getrandom() 'ssize_t'

This accords with glibc headers and the Linux kernel source.

getrlimit.2

Thiago Jung Bauermann

Mention unit used by RLIMIT_CORE and RLIMIT_FSIZE

Michael Kerrisk

Note that RLIMIT_AS and RLIMIT_DATA are rounded down to system page size

Michael Kerrisk

Mention unit for RLIMIT_DATA

getrlimit.2

mmap.2

malloc.3

Jonas Grabber

RLIMIT_DATA affects mmap(2) since Linux 4.7

get_robust_list.2

Michael Kerrisk

Detail the operation of robust futex lists

Michael Kerrisk

Since Linux 2.6.28, robust futex lists also have an effect for `execve(2)`

Michael Kerrisk

Clarify that "thread ID" means "kernel thread ID"

Michael Kerrisk

SEE ALSO: add `pthread_mutexattr_setrobust(3)`

`ioctl_getfsmap.2`

Darrick J. Wong

Correct semantics of `FMR_OF_LAST` flag

`ioctl_userfaultfd.2`

Mike Rapoport

Document replacement of `ENOSPC` with `ESRCH`

Mike Rapoport

Update `uffdio_api.features` description

There is no requirement that `uffdio_api.features` must be zero for newer kernels. This field actually defines what features space would like to enable.

`io_submit.2`

Sage Weil

Acknowledge possibility of short return

Note

that the return value may be a value less than 'nr' if not all `iocbs` were queued at once.

`ipc.2`

Michael Kerrisk

SEE ALSO: add `svipc(7)`

`keyctl.2`

Eugene Syromyatnikov

mention `keyctl_dh_compute(3)` and `keyctl_dh_compute_alloc(3)`

These functions have been added in `keyutils 1.5.10`

Eugene Syromyatnikov

Mention `ENOMEM` in `ERRORS`

Eugene Syromyatnikov

Update kernel documentation path reference

`move_pages.2`

Otto Ebeling [Michael Kerrisk]

Note permission changes that occurred in Linux 4.13

`mprotect.2`

Michael Kerrisk [Shrikant Giridhar]

Add warning about the use of `printf()` in the example code

`open.2`

NeilBrown

Improve O_PATH documentation

- fstatfs is now permitted.
- ioctl isn't, and is worth listing explicitly
- O_PATH allows an automount point to be opened with triggering the mount.

prctl.2

seccomp.2

Eugene Syromyatnikov

Update pointer to in-kernel seccomp documentation

prctl.2

ptrace.2

Eugene Syromyatnikov

Update pointer to in-kernel Yama documentation

prctl.2

Eugene Syromyatnikov

Update pointer to in-kernel no_new_privs flag documentation

readlink.2

Michael Kerrisk [Jason Noakes]

Fix an off-by-one error in example code

seccomp.2

Kees Cook

Clarify SECCOMP_RET_KILL kills tasks not processes

select_tut.2

Michael Kerrisk [Sergey Z.]

Clarify an ambiguity with respect to select() and EAGAIN

See https://bugzilla.kernel.org/show_bug.cgi?id=196345

set_tid_address.2

Elliott Hughes

Note that there's no glibc wrapper for set_tid_address()

socket.2

Michael Kerrisk [Yubin Ruan]

socket() uses the lowest available file descriptor

_syscall.2

Michael Kerrisk

Remove redundant comment from EXAMPLE

A discussion of the nroff source of the manual page isn't very useful...

sysfs.2

Michael Kerrisk

Add a pointer to sysfs(5) to help possibly confused readers

Michael Kerrisk

Make it clearer near the start of the page that sysfs(2) is obsolete

timer_create.2

Michael Kerrisk

Strengthen the warning about use of printf() in the example program

Michael Kerrisk

Update cross reference: signal(7) should be signal-safety(7)

umount.2

NeilBrown

Revise MNT_FORCE description

MNT_FORCE does not allow a busy filesystem to be unmounted. Only MNT_DETACH allows that. MNT_FORCE only tries to abort pending transactions, in the hope that might help umount not to block,

Also, other filesystems than NFS support MNT_FORCE.

unshare.2

Eugene Syromyatnikov

Update pointer to in-kernel unshare documentation

wait.2

Michael Kerrisk []

POSIX.1-2008 TC1 clarifies treatment of 'si_pid' for waitid() WNOHANG

cmsg.3

Sukadev Bhattiprolu

Add

a scatter/gather buffer to sample code

Michael Kerrisk

Reorganize the text somewhat (no content changes)

crypt.3

Konstantin Shemyak [Michael Kerrisk]

Add description of previously undocumented 'rounds' parameter

Konstantin Shemyak

Encryption isn't done with SHA-xxx, but with a function based on SHA-xxx

Konstantin Shemyak

Clarify that ending of the salt string with '\$' is optional

exit.3

Michael Kerrisk

Mention the prctl(2) PR_SET_PDEATHSIG operation

Michael Kerrisk

SEE ALSO: add get_robust_list(2)

Michael Kerrisk

Add a heading to delimit discussion of signals sent to other processes

exp2.3

Alex Henrie

Remove C89 designation

log1p.3

Alex Henrie

Document fixes to give EDOM or ERANGE on error

matherr.3

Michael Kerrisk

Note that glibc 2.27 removes the 'matherr' mechanism

Michael Kerrisk

Remove crufty feature test macro requirements

pow10.3

Michael

Kerrisk

Note that pow10() is now obsolete in favor of exp10()

Also, the pow10() functions are no longer supported by glibc, starting with version 2.27.

sincos.3

Michael Kerrisk

Note that sincos() is intended to be more efficient than sin() + cos()

cciss.4

hpsa.4

Eugene Syromyatnikov [Don Brace, Meelis Roos]

Mention cciss removal in Linux 4.14

During the Linux 4.13 development cycle, the cciss driver has been removed in favor of the hpsa driver, which has been amended with some legacy board support.

initrd.4

proc.5

bootparam.7

Eugene Syromyatnikov

Update pointer to in-kernel initrd documentation

initrd.4

Eugene Syromyatnikov

Update pointer to in-kernel root over NFS documentation

intro.4

Michael Kerrisk

SEE ALSO: add mknod(1) and mknod(2)

host.conf.5

Michael Kerrisk

Add cross-reference to hosts(5)

locale.5

Marko Myllynen

Refer

to existing locales for encoding details

Since I don't think it would make sense to try to have different explanation for each glibc version on the locale(5) man page, I'm proposing that we apply the below patch so that we refer to existing locale definition files in general and not spell out the exact format or any certain locale as a definitive guideline.

nologin.5

Michael Kerrisk

Add a sentence explaining why nologin is useful

proc.5

Eugene Syromyatnikov

Document removal of htab-reclaim sysctl file

This PPC-specific sysctl option has been removed in Linux 2.4.9.2, according to historic Linux repository commit log.

Eugene Syromyatnikov

Add description for cpuN lines in /proc/stat

Eugene Syromyatnikov

Add description for softirq line in /proc/stat

Eugene Syromyatnikov

Document removal of timer_stats file

Michael Kerrisk

Note Linux

4.9 changes to privileges for /proc/[pid]/timerslack_ns

Michael Kerrisk

Show command used to mount /proc

Michael Kerrisk

Explicitly note in intro that some /proc files are writable

Eugene Syromyatnikov

Update pointer to in-kernel SysRq documentation

Michael Kerrisk

SEE ALSO: add sysfs(5)

Eugene Syromyatnikov

Update pointer to in-kernel security keys documentation

Benjamin Peterson

Fix path to binfmt_misc docs

Eugene Syromyatnikov

Update pointer to in-kernel MTRR documentation

Eugene Syromyatnikov

Update reference to kernel's crypto API documentation

tzfile.5

Paul Eggert

Sync from tzdb upstream

This makes tzfile.5 a copy of the tzdb version, except that the tzdb version's first line is replaced by man-pages boilerplate.

The new version documents version 3 format, among other things.

Also, it removes the "Summary of the timezone information

file

format" section, which should no longer be needed due to improvements in the part of the man page.

capabilities.7

Michael Kerrisk

Note semantics for a program that is set-UID-root and has capabilities

Note semantics for a program that is both set-user-ID-root and has file capabilities.

Michael Kerrisk [Dennis Knorr]

Note that a set-UID-root program may have an empty file capability set

cgroups.7

Michael Kerrisk

SEE ALSO: systemd-cgls(1)

cpuset.7

Eugene Syromyatnikov

Update pointer to in-kernel cpusets documentation

keyrings.7

Eugene Syromyatnikov

Document description restriction for logon keys

"logon" type has additional check that enforces colon-separated prefix in key descriptions.

Eugene Syromyatnikov

Add pointers to kernel's documentation

Mostly because of asymmetric-keys.txt, which is outside security/keys

for some reason.

man-pages.7

Michael Kerrisk

Expand the guidance on formatting code snippets

netlink.7

David Wilder

Change buffer size in example code about reading netlink message

Michael Kerrisk [Rick Jones]

Add a comment on 8192 buffer size in example code

pthread.7

Michael Kerrisk

SEE ALSO: add pthread_mutexattr_destroy(3) and pthread_mutexattr_init(3)

signal.7

Michael Kerrisk

Since glibc 2.26, SIGUNUSED is no longer defined

tcp.7

Vincent Bernat

tcp_tw_recycle is removed from Linux 4.12

And it is completely broken.

unicode.7

Eugene Syromyatnikov

Update pointer to in-kernel Unicode terminal support documentation

===== Changes in man-pages-4.14 =====

<dilyan.palauzov@aegee.org>

Apologies if I missed anyone!

New and rewritten pages

pthread_spin_init.3

Michael Kerrisk [Peter Zijlstra, Thomas Gleixner, Zack Weinberg,
Florian Weimer]

New page describing pthread_spin_init(3) and pthread_spin_destroy(3)

pthread_spin_lock.3

Michael Kerrisk [Carlos O'Donell]

New page describing functions that lock and unlock spin locks

Add a page describing pthread_spin_lock(3), pthread_spin_unlock(3),
and pthread_spin_trylock(3).

smartpqi.4

Don Brace [Michael Kerrisk, G. Branden Robinson]

Document the smartpqi SCSI driver

veth.4

Tomáš Pospíšek, Eric Biederman, Michael Kerrisk

New page documenting veth virtual ethernet devices

Based on a page from Tomáš Pospíšek, with some clean-ups by mtk.

Removed pages

infnan.3:

Michael Kerrisk

This function was in libc4 and libc5, but never part

of glibc. It ceased to be relevant nearly 20 years ago. Time to remove the man page.

Newly documented interfaces in existing pages

ioctl_userfaultfd.2

userfaultfd.2

Prakash Sangappa [Andrea Arcangeli, Mike Rapoport]

Add description for UFFD_FEATURE_SIGBUS

madvise.2

Rik van Riel [Colm MacCárthaigh, Michael Kerrisk]

Document MADV_WIPEONFORK and MADV_KEEPPONFORK

Michael Kerrisk

Note fork() and execve() semantics for wipe-on-fork setting

membarrier.2

Mathieu Desnoyers

Update membarrier manpage for 4.14

Add documentation for these new membarrier() commands:

MEMBARRIER_CMD_PRIVATE_EXPEDITED

MEMBARRIER_CMD_REGISTER_PRIVATE_EXPEDITED

memfd_create.2

Mike Kravetz

Add description of MFD_HUGETLB (hugetlbfs) support

hugetlbfs support for memfd_create() was recently merged by Linus

and should be in the Linux 4.14 release. To request hugetlbfs

support a new memfd_create() flag (MFD_HUGETLB) was added.

readv.2

Christoph Hellwig

Document RWF_NOWAIT added in Linux 4.14

seccomp.2

Tyler Hicks

Document the SECCOMP_GET_ACTION_AVAIL operation added in Linux 4.14

Tyler Hicks

Document the SECCOMP_FILTER_FLAG_LOG

flag added in Linux 4.14

Tyler Hicks

Document the SECCOMP_RET_LOG action added In Linux 4.14

Michael Kerrisk [Kees Cook]

Add description of SECCOMP_RET_KILL_PROCESS

Michael Kerrisk

Add SECCOMP_RET_KILL_THREAD description and rework SECCOMP_RET_KILL text

Michael Kerrisk

Document the seccomp audit logging feature added in Linux 4.14

seccomp.2

proc.5

Tyler Hicks

Document the seccomp /proc interfaces added in Linux 4.14

Document the seccomp /proc interfaces in Linux 4.14:

/proc/sys/kernel/seccomp/actions_avail and

/proc/sys/kernel/seccomp/actions_logged.

sigaltstack.2

Michael Kerrisk [Stas Sergeev]

Document the SS_AUTODISARM flag added in Linux 4.7

proc.5

Michael Kerrisk

Document /proc/locks

Oliver Ebert

Document /proc/kpagecgroup

Oliver Ebert

Add KPF_BALLOON, KPF_ZERO_PAGE, and KPF_IDLE for /proc/kpageflags

pid_namespaces.7

Michael Kerrisk

Document /proc/sys/kernel/ns_last_pid

New and changed links

pthread_spin_destroy.3

Michael Kerrisk

New link to new pthread_spin_init.3 page

pthread_spin_trylock.3

pthread_spin_unlock.3

Michael Kerrisk

New links to new pthread_spin_lock.3 page

Global changes

Various pages

Michael Kerrisk

Consistently use "x86-64", not "x86_64"

When referring to the architecture, consistently use "x86-64",

not "x86_64". Hitherto, there was a mixture of usages, with "x86-64" predominant.

Various pages

G. Branden Robinson

Replace incorrect uses of Latin abbreviation "cf.".

People seem to be using "cf." ("conferre"), which means "compare", to mean "see" instead, for which the Latin abbreviation would be "q.v." ("quod vide" -> "which see").

In some cases "cf." might actually be the correct term but it's still not clear what specific aspects of a function/system call one is supposed to be comparing.

Changes to individual pages

capget.2

Michael Kerrisk

Clarify discussion of kernels that have no VFS capability support

clock_getres.2

Michael Kerrisk

clock_gettime() may be implemented in the vDSO

clone.2

Michael Kerrisk

Warn that the clone() wrapper modifies child_stack in the parent

Michael Kerrisk

Rework the discussion of the historical CLONE_PID for clarity

Michael Kerrisk

Add NOTES heading

Michael Kerrisk

Add a reference to new veth(4) page

Michael Kerrisk

Eliminate some redundant phrasing in discussion of "fn()"

Michael Kerrisk

Combine redundant paragraphs describing child_stack==NULL

Michael Kerrisk

Note that child_stack can be NULL when using the raw system call

Michael Kerrisk

Remove a redundant paragraph

connect.2

Michael Kerrisk

Clarify that ECONNREFUSED is for stream sockets

fcntl.2

Michael Kerrisk [Jens Axboe]

Inode read-write hints persist only until the filesystem is unmounted

flock.2

Michael Kerrisk

Move NFS details to a headed subsection

Michael Kerrisk [Petr Uzel]

Placing an exclusive lock over NFS requires the file is open for writing

fork.2

Rik van Riel [Colm MacCárthaigh, Michael Kerrisk]

Document effect of MADV_WIPEONFORK

fork.2

getsid.2

setpgid.2

setsid.2

Ahmad Fatoum

Include `<sys/types.h>` in SYNOPSIS to obtain declaration of `pid_t`

fsync.2

Craig Ringer

ERRORS: add ENOSPC

getcpu.2

Michael Kerrisk

`getcpu()` may have an implementation in the vDSO

getpid.2

Michael Kerrisk

Mention that `PID == TGID`, and note contrast with `TID`

Michael Kerrisk

SEE ALSO: add `gettid(2)`

getrandom.2

Michael Kerrisk [Fabio Scotoni]

ERRORS: add ENOSYS

getrlimit.2

Michael Kerrisk [Scott Vokes]

Make it clear `RLIMIT_NPROC` is a limit on current number of processes

<https://twitter.com/silentbicycle/status/893849097903505409>

gettid.2

Michael Kerrisk

SEE ALSO: add `getpid(2)`

gettimeofday.2

Michael Kerrisk

Note that gettimeofday() may be implemented in the vDSO

ioctl_userfaultfd.2

Michael Kerrisk

Rework version information for feature bits

io_submit.2

Goldwyn Rodrigues

Add iocb details to io_submit

Add more information about the iocb structure. Explains the fields of the I/O control block structure which is passed to the io_submit() call.

Michael Kerrisk

Add cross-reference to io_getevents(2)

Michael Kerrisk

Cross reference pwritev(2) in discussion of RWF_SYNC and RWF_DSYNC

membarrier.2

Mathieu Desnoyers

Update example to take TSO into account

The existing example given specifically states that

it focus on

x86 (TSO memory model), but gives a read-read vs write-write ordering example, even though this scenario does not require explicit barriers on TSO.

So either we change the example architecture to a weakly-ordered architecture, or we change the example to a scenario requiring barriers on x86.

Let's stay on x86, but provide a Dekker as example instead.

Mathieu Desnoyers

Adapt the MEMBARRIER_CMD_SHARED return value documentation to reflect that it now returns -EINVAL when issued on a system configured for nohz_full.

memfd_create.2

Michael Kerrisk

Note the limit for size of 'name'

mkdir.2

Michael Kerrisk [Raghavendra D Prabhu]

ERRORS: document EINVAL error for invalid filename

mmap.2

Michael Kerrisk

Add explicit text noting that 'length' must be greater than 0

Currently, this detail is hidden in ERRORS.

Make it clear in

the main text.

Michael Kerrisk

SEE ALSO: add ftruncate(2)

mremap.2

Mike Kravetz [Florian Weimer, Jann Horn]

Add description of old_size == 0 functionality

Since at least the 2.6 time frame, mremap() would create a new mapping of the same pages if 'old_size == 0'. It would also leave the original mapping. This was used to create a 'duplicate mapping'.

A recent change was made to mremap() so that an attempt to create a duplicate a private mapping will fail.

Michael Kerrisk [Michal Hocko, Mike Kravetz]

BUGS: describe older behavior for old_size==0 on private mappings

Explain the older behavior, and why it changed. This is a follow-up to Mike Kravetz's patch documenting the behavior for old_size==0 with shared mappings.

Michael Kerrisk

Reformat EINVAL errors as a list

open.2

Michael Kerrisk

By contrast with O_RDONLY, no file permissions are required for O_PATH

Note one of the significant advantages of O_PATH: many of the operations applied to O_PATH file descriptors don't require read permission, so there's no reason why the open() itself should require read permission.

Michael Kerrisk

Note use of O_PATH to provide O_EXEC functionality

Michael Kerrisk

Mention O_PATH file descriptor use with fexecve(3)

Michael Kerrisk

ERRORS: document EINVAL error for invalid filename

Michael Kerrisk

Clarify that O_TMPFILE creates a *regular* file

Michael Kerrisk

Make it explicit that O_CREAT creates a regular file

Michael Kerrisk

Since glibc 2.26, the open() wrapper always uses the openat() syscall

Michael Kerrisk

Change pathname used in discussion of rationale for openat()

/path/to/file is a little confusing as a pathname

Michael Kerrisk

Make the purpose of open() a little clearer at the start of the page

open_by_handle_at.2

NeilBrown

Clarifications needed due to NFS reexport

NeilBrown [Lennart Poettering]

Clarify MAX_HANDLE_SZ

As hinted in the kernel source, MAX_HANDLE_SZ is a hint rather than a promise.

pipe.2

Michael Kerrisk [Marin H.]

Since Linux 4.5, fcntl() can be used to set O_DIRECT for a pipe

See https://bugzilla.kernel.org/show_bug.cgi?id=197917

pivot_root.2

Michael Kerrisk

SEE ALSO: add switch_root(8)

pkey_alloc.2

Breno Leitao

Fix argument order

Currently pkey_alloc() syscall has two arguments, and the very first argument is still not supported and should be set to zero.

The second argument is the one that should specify the page access rights.

ptrace.2

Michael Kerrisk

SEE ALSO: add ltrace(1)

reboot.2

Michael Kerrisk [Micha Zegan]

Fix bogus description of reboot() from non-initial PID namespace

The current text was confused (mea culpa). No signal is sent to the init() process. Rather, depending on the 'cmd' given to reboot(), the 'group_exit_code' value will set to either SIGHUP or SIGINT, with the effect that one of those signals is reported to wait() in the parent process.

See https://bugzilla.kernel.org/show_bug.cgi?id=195899

Michael Kerrisk

SEE ALSO: remove reboot(8) (synonym for halt(8)); add shutdown(8)

Michael Kerrisk

SEE ALSO: add systemctl(1), systemd(1)

recvmmsg.2

sendmmsg.2

Elliot Hughes

Type fixes in SYNOPSIS

[mtk: The raw system calls use "unsigned int", but the glibc wrappers have "int" for the 'flags' argument.]

sched_setaffinity.2

Michael Kerrisk

SEE ALSO: add numactl(8)

sched_yield.2

Michael Kerrisk [Peter Zijlstra]

sched_yield()

is intended for use with real-time scheduling policies

seccomp.2

Michael Kerrisk [Adhemerval Zanella, Florian Weimer, Kees Cook]

Add some Caveats regarding the use of seccomp filters

Michael Kerrisk

Document the "default" filter return action

The kernel defaults to either SECCOMP_RET_KILL_PROCESS or SECCOMP_RET_KILL_THREAD for unrecognized filter return action values.

Michael Kerrisk [Kees Cook]

Change SECCOMP_RET_ACTION to SECCOMP_RET_ACTION_FULL

In Linux 4.14, the action component of the return value switched from being 15 bits to being 16 bits. A new macro, SECCOMP_RET_ACTION_FULL, that masks the 16 bits was added, to replace the older SECCOMP_RET_ACTION.

Michael Kerrisk

Explicitly note that other threads survive SECCOMP_RET_KILL_THREAD

Michael Kerrisk

SEE ALSO: add strace(1)

send.2

Grégory Vander Schueren

Add EALREADY to ERRORS

setns.2

Michael Kerrisk

SEE ALSO: add nsenter(1)

shmop.2

Yubin Ruan

Note that return value of shmat() is page-aligned

sigaction.2

Michael Kerrisk

Rework discussion of SA_SIGINFO handler arguments
Expand and rework the text a little, in particular adding
a reference to sigreturn(2) as a source of further
information about the ucontext argument.

Michael Kerrisk

Mention that libc sets the act.sa_restorer field

sigaltstack.2

Michael Kerrisk [Walter Harms]

Reword BUGS text to be a little clearer

Michael Kerrisk

Add explicit error handling to example code

Michael Kerrisk

Add use of sigaction() to example code

sigreturn.2

Michael Kerrisk

Make it a little clearer that a stack frame is created by the kernel

Michael Kerrisk

glibc has a simple wrapper for sigreturn() that returns ENOSYS

splice.2

Michael Kerrisk

Since Linux 2.6.31, 'fd_in'
and 'fd_out' may both refer to pipes

stat.2

Michael Kerrisk [Richard Knutsson]

Use lstat() instead of stat()

It's more logical to use lstat() in the example code,
since one can then experiment with symbolic links, and
also the S_IFLNK case can also occur.

NeilBrown

Correct AT_NO_AUTOMOUNT text and general revisions
Expand on the relationship between fstatat() and the other three
functions, and improve the description of AT_NO_AUTOMOUNT.
Specifically, both stat() and lstat() act the same way with
respect to automounts, and that behavior matches fstatat() with
the AT_NO_AUTOMOUNT flag.

statfs.2

Michael Kerrisk

Add some comments noting filesystems that are no longer current

Michael Kerrisk

Add comments describing a few filesystem types

time.2

Michael Kerrisk

Note that time() may be implemented in the vDSO

Michael Kerrisk

[Victor Porton]

Language fix-up: clarify that "tasks" means "work"

See https://bugzilla.kernel.org/show_bug.cgi?id=197183

userfaultfd.2

Mike Rapoport

BUGS: document spurious UFFD_EVENT_FORK

write.2

fsync.2

close.2

NeilBrown [Jeff Layton]

Update description of error codes

Since 4.13, errors from writeback are more reliably reported to all file descriptors that might be relevant.

Add notes to this effect, and also add detail about ENOSPC and EDQUOT which can be delayed in a similar many to EIO - for NFS in particular.

abort.3

Michael Kerrisk

Starting with glibc 2.27, abort() does not attempt to flush streams

Michael Kerrisk

SEE ALSO: add assert(3)

backtrace_symbols_fd(3)

Stefan Puiu [Walter Harms]

backtrace_symbols_fd() can trigger a call to malloc()

daemon.3

Michael Kerrisk

SEE ALSO: add daemon(7), logrotate(8)

errno.3

Michael

Kerrisk

Note use of errno(1) to look up error names and numbers

Michael Kerrisk

Update error list for POSIX.1-2008

POSIX.1-2008 specified a couple of new errors not present in POSIX.1-2001.

Michael Kerrisk [Walter Harms]

Note the use of perror(3) and strerror(3)

Michael Kerrisk

Recast the advice against manually declaring 'errno'

Recast the advice against manually declaring 'errno' to a more modern perspective. It's 13 years since the original text was added, and even then it was describing old behavior.

Cast the description to be about behavior further away in time, and note more clearly that manual declaration will cause problems with modern C libraries.

Michael Kerrisk

Add some missing errors

Michael Kerrisk

Error numbers are positive values (rather than nonzero values)

POSIX.1-2008 noted the explicitly

the change (to align with

the C standards) that error numbers are positive, rather than nonzero.

Michael Kerrisk

Reorganize the text and add some subheadings

Restructure the text and add some subheadings for better readability. No (intentional) content changes.

Michael Kerrisk [Wesley Apteekar-Cassels]

Note that error numbers vary somewhat across architectures

Added after a patch from Wesley Apteekar-Cassels that proposed to add error numbers to the text.

Michael Kerrisk

Note the <errno.h> also provides the symbolic error names

Michael Kerrisk [Walter Harms]

Explicitly note that error numbers vary also across UNIX systems

exec.3

Michael Kerrisk

glibc 2.24 dropped CWD from the default path

Document the glibc 2.24 change that dropped CWD from the default search path employed by execlp(), execvp() and execvpe() when PATH

is not defined.

fexecve.3

Michael Kerrisk

O_PATH file descriptors are also usable with fexecve()

Cristian Rodríguez

fexecve() is now implemented with execveat(2), where available

Michael Kerrisk

Add some detail on the glibc implementation of fexecve() via execveat(2)

ffs.3

Michael Kerrisk

glibc 2.27 relaxes the FTM requirements for ffs1() and ffsll()

get_nprocs_conf.3

Michael Kerrisk

SEE ALSO: add nproc(1)

lround.3

Michael Kerrisk [David Eckardt]

Clarify that lround() rounds "halfway cases" away from zero

See https://bugzilla.kernel.org/show_bug.cgi?id=194601

makedev.3

Adrian Bunk

glibc has deprecated exposing the definitions via <sys/types.h>

mallinfo.3

Jakub Wilk

Fix the example

Remove reference to non-standard "tspi_hdr.h" and replace calls to functions that were declared in this header.

malloc.3

Michael Kerrisk

SEE ALSO: add valgrind(1)

popen.3

Michael Kerrisk

Add a cross reference to Caveats in system(3)

All of the same risks regarding system() also apply to popen().

pthread_detach.3

Michael Kerrisk [Rahul Bedarkar]

Improve sentence describing freeing of resources on process termination

As reported by Rahul, the existing sentence could be read as meaning that resources of joined and terminated detached threads are freed only at process termination. Eliminate that possible misreading.

pthread_yield.3

Michael Kerrisk [Peter Zijlstra]

pthread_yield() is intended for use with real-time scheduling policies

setlocale.3

Michael Kerrisk [Kištof Želechovski]

The standards do not specify all of the locale categories

socketmark.3

Seonghun Lim

Fix cruft in code example

stdio.3

Michael Kerrisk

Use proper section cross references in function list

Michael Kerrisk

Remove crufty

reference to pc(1)

sysconf.3

Michael Kerrisk

Mention `get_nprocs_conf(3)`

Mention `get_nprocs_conf(3)` in discussion of `_SC_NPROCESSORS_CONF` and `_SC_NPROCESSORS_ONLN`.

system.3

Michael Kerrisk [Bastien Roucaries]

Create a "Caveats" subsection to hold warnings about the use of `system()`

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=882222>

Michael Kerrisk [Bastien Roucaries]

Mention `PATH` explicitly in discussion of `system()` and set-UID programs

Michael Kerrisk [Bastien Roucaries]

Note that user input for `system()` should be carefully sanitized

Michael Kerrisk

Mention file capabilities in discussion of privileged programs

Michael Kerrisk

Correctly note which shell Debian uses as (noninteractive) `/bin/sh`

core.5

Michael Kerrisk

Add some notes on `systemd` and core dumps

Michael Kerrisk

Dumps are not produced if `core_pattern` is empty and `core_uses_pid` is 0

Michael Kerrisk [Per Böhlin]

`RLIMIT_CORE` is not enforced when piping core dump to a program

Michael Kerrisk

SEE ALSO: add `systemd-coredump(8)`

Michael Kerrisk

SEE ALSO: add `coredumpctl(1)`

filesystems.5

Michael Kerrisk [Jonny Grant]

Replace crufty URL reference for 'smb' with up-to-date URL

Michael Kerrisk [Jonny Grant]

Refer to VFAT as an extended FAT (not DOS) filesystem

proc.5

Michael Kerrisk [Miklos Szered, Ram Pai]

Correct the description of the parent mount ID for `/proc/PID/mountinfo`

Oliver Ebert

Add mmap-exclusive bit for /proc/[pid]/pagemap

Marcus Folkesson

Update description of /proc/<pid>/oom_score

Lucas Werkmeister

Clarify permissions in /proc/[pid]/fd/

Michael Kerrisk

Add reference to pid_namespaces(7) for /proc/sys/kernel/ns_last_pid

shells.5

Michael Kerrisk

SEE ALSO: add pam_shells(8)

sysfs.5

Michael Kerrisk

Add a brief explanation

of /sys/kernel

Michael Kerrisk

Add a brief description of /sys/class/net

Michael Kerrisk

Add a brief description of /sys/kernel/mm

Michael Kerrisk

Add brief description of /sys/kernel/debug/tracing

Michael Kerrisk

Add a description of /sys/kernel/mm/hugepages

arp.7

Michael Kerrisk

SEE ALSO: add arpd(8)

capabilities.7

Michael Kerrisk

Add a reference to xattr(7) in the discussion of extended attributes

Michael Kerrisk

SEE ALSO: add captest(8)

epoll.7

Michael Kerrisk

Note existence of kcmp() KCMP_EPOLL_TFD operation

fifo.7

Michael Kerrisk

Refer reader to pipe(7) for details of I/O semantics of FIFOs

hier.7

Michael Kerrisk

SEE ALSO: add file-hierarchy(7)

icmp.7

Michael Kerrisk

SEE ALSO: add rdisc(8)

man-pages.7

Michael Kerrisk

Note that "x86-64" is generally preferred over "x86_64"

G. Branden Robinson

Add a use case for real

minus character

namespaces.7

Michael Kerrisk

Add a reference to new veth(4) page

Michael Kerrisk

EXAMPLE: refer also to example in clone(2)

pid_namespaces.7

Michael Kerrisk

SEE ALSO: add reboot(2)

Add because reboot(2) has special semantics for non-initial

PID namespaces.

pthread.7

Michael Kerrisk

SEE ALSO: add pthread_spin_init(3) and pthread_spin_lock(3)

socket.7

Michael Kerrisk [Petr Malat, Tobias Klausmann]

Correct the description of SO_RXQ_OVFL

standards.7

Michael Kerrisk

SEE ALSO: add getconf(1), confstr(3), pathconf(3), sysconf(3)

user_namespaces.7

Christian Brauner [Michael Kerrisk]

Document new 340 line idmap limit

ld.so.8

Michael Kerrisk [Yubin Ruan]

Simplify language around conferring capabilities

The statement "conferring permitted or effective capabilities" to the process is somewhat redundant. Binaries with capabilities confer capabilities only to those process capability sets, so it's simpler to just say "confers capabilities to the process".

Released: 2018-02-02, Palo Alto

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Roman Gushchin <guro@fb.com>
Shawn Landden <slandden@gmail.com>
Stefan Hajnoczi <stefanha@redhat.com>
Stefan Raspl <raspl@linux.vnet.ibm.com>
Tejun Heo <tj@kernel.org>

Apologies if I missed anyone!

New and rewritten pages

s390_sthyi.2

QingFeng Hao [Michael Kerrisk]

New page for s390-specific s390_sthyi(2)

network_namespaces.7

Michael Kerrisk

New page describing network namespaces

Based on content moved from namespaces(7)

vsock.7

Stefan Hajnoczi [Jorgen Hansen, Michael Kerrisk]

Document the VSOCK socket address family

Newly documented interfaces in existing pages

cgroups.7

Michael Kerrisk [Tejun Heo]

Document cgroups v2 "thread mode"

Michael Kerrisk [Tejun Heo]

Document cgroup v2 delegation via the 'nsdelegate' mount option

Michael Kerrisk

Document the cgroup.max.depth and cgroup.max.descendants files

Michael Kerrisk

Document 'release_agent' mount option

Michael Kerrisk [Roman Gushchin]

Document /sys/kernel/cgroup/delegate

Michael Kerrisk [Roman Gushchin]

Document /sys/kernel/cgroup/features

Michael Kerrisk [Roman Gushchin]

Document cgroups v2 cgroup.stat file

Global changes

Various pages

G. Branden Robinson

Standardize on "nonzero"

Also add this term to the style guide in man-pages(7).

Changes to individual pages

bpf.2

Nikolay Borisov

Sync list of supported map types with 4.14 kernel

copy_file_range.2

Michael Kerrisk

Library support was added in glibc 2.27

Shawn Landden

glibc provides a

user-space emulation where the system call is absent

Florian Weimer

EFBIG errors are possible, similar to write(2)

Michael Kerrisk

ERRORS: add EISDIR

Michael Kerrisk

Order ERRORS alphabetically

Michael Kerrisk

Add comment to code example explaining use of syscall(2)

fcntl.2

read.2

write.2

NeilBrown

Document "Lost locks" as cause for EIO.

If an advisory lock is lost, then read/write requests on any affected file descriptor can return EIO - for NFSv4 at least.

memfd_create.2

Michael Kerrisk

glibc support for memfd_create() was added in version 2.27

mlock.2

Michael Kerrisk

Make details for MLOCK_ONFAULT a little more explicit

Michael Kerrisk

glibc support for mlock2() is added in version 2.27

mmap.2

John Hubbard [Michael Hocko]

MAP_FIXED is no longer discouraged

MAP_FIXED has been widely used for a very long time, yet the man page

still claims that "the use of this option is discouraged".

John Hubbard

MAP_FIXED updated documentation

-- Expand the documentation to discuss the hazards in enough detail to allow avoiding them.

-- Mention the upcoming MAP_FIXED_SAFE flag.

-- Enhance the alignment requirement slightly.

mount.2

Keno Fischer [Michael Kerrisk]

Add EINVAL error condition when MS_BINDING MNT_LOCKED submounts

mprotect.2

pkey_alloc.2

Michael Kerrisk

Glibc support for memory protection keys was added in version 2.27

perf_event_open.2

Michael Kerrisk

SEE ALSO: add perf(1)

pkey_alloc.2

Michael Kerrisk

Clarify description of pkey_alloc() 'flags' argument

prctl.2

Michael Kerrisk

Defer to capabilities(7) for discussion of the "keep capabilities" flag

recvmsg.2

sendmsg.2

Nikola Forró

Point out that error handling is unreliable

seccomp.2

Michael Kerrisk

Clarify that SECCOMP_RET_TRAP SIGSYS signal is thread-directed

syscalls.2

Michael Kerrisk

Add s390-specific s390_sthyi(2) to syscall list

unshare.2

Michael Kerrisk

Clarify that EUSERS occurred only until kernel 4.8

errno.3

Michael Kerrisk

'errno -s' can be used to search for errors by string in description

Michael Kerrisk

Add Linux error text corresponding to ENOMEM

fgetpwent.3

Michael Kerrisk

Add missing ATTRIBUTES preamble

fts.3

Michael Kerrisk [Pradeep Kumar]

fts_pathlen = strlen(fts_path) + strlen(fts_name)

fuse.4

Michael Kerrisk

Places errors in alphabetical order (no content changes)

veth.4

Michael Kerrisk

Add network_namespaces(7)

sysfs.5

Michael Kerrisk

Refer to cgroups(7) for information about files in /sys/kernel/cgroup

capabilities.7

Michael Kerrisk

Note which capability sets are affected by SECBIT_NO_SETUID_FIXUP

Note explicitly

that SECBIT_NO_SETUID_FIXUP is relevant for

the permitted, effective, and ambient capability sets.

Michael Kerrisk

Deemphasize the ancient prctl(2) PR_SET_KEEPCAPS command

The modern approach is SECBITS_KEEP_CAPS.

Michael Kerrisk

Clarify effect of CAP_SETFCAP

Make it clear that CAP_SETFCAP allows setting arbitrary capabilities on a file.

Michael Kerrisk

Clarify which capability sets are effected by SECBIT_KEEP_CAPS

This flag has relevance only for the process permitted and effective sets.

Michael Kerrisk

Rephrase CAP_SETPCAP description

* Mention kernel versions.

* Place current kernel behavior first

Michael Kerrisk

SECBIT_KEEP_CAPS is ignored if SECBIT_NO_SETUID_FIXUP is set

Michael Kerrisk

Ambient set is also cleared when UIDs are set to nonzero value

cgroups.7

Michael Kerrisk

Add a more complete description

of cgroup v1 named hierarchies

Michael Kerrisk

Add a section on unmounting cgroup v1 filesystems

Michael Kerrisk

Add subsection describing cgroups v2 subtree delegation

Michael Kerrisk

Mention ENOENT error that can occur when writing to subtree_control file

Michael Kerrisk

Add list of currently available version 2 controllers

Nikolay Borisov

Add information about RDMA controller

Michael Kerrisk

Rewrite the description of cgroup v2 subtree control

Michael Kerrisk [Tejun Heo]

Note Linux 4.11 changes to cgroup v2 delegation containment rules

Michael Kerrisk

systemd(1) nowadays automatically mounts the cgroup2 filesystem

Michael Kerrisk

Clarify that cgroup.controllers is read-only

Michael Kerrisk

Elaborate a little on problems of splitting threads across cgroups in v1

Michael Kerrisk [Tejun Heo]

Tweak the description of delegation of cgroup.subtree_control

ip.7

Ricardo Biehl Pasquali

INADDR_* values cannot be assigned directly to 's_addr'

Michael Kerrisk

s/INADDR_ANY/INADDR_LOOPBACK/ in discussion of htonl()

INADDR_LOOPBACK is a better example, since it is not
byte-order neutral.

namespaces.7

network_namespaces.7

Michael Kerrisk

Move content from namespaces(7) to network_namespaces(7)

pid_namespaces.7

Michael Kerrisk

SEE ALSO: add mount_namespaces(7)

sched.7

Michael Kerrisk [Andrea Parri]

Correctly describe effect of priority changes for RT threads

The placement of a thread in the run queue for its new
priority depends on the direction of movement in priority.
(This appears to contradict POSIX, except in the case of
pthread_setschedprio().)

user_namespaces.7

Michael Kerrisk

Mention NS_GET_OWNER_UID ioctl() operation

==== Changes in man-pages-4.16 =====

Released:
2018-04-30, Munich

Tomi Salminen <tsalminen@forcepoint.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

membarrier.2

Mathieu Desnoyers [Michael Kerrisk]

Document new membarrier commands introduced in Linux 4.16

Document the following membarrier commands introduced in Linux 4.16:

`MEMBARRIER_CMD_GLOBAL_EXPEDITED`

(the old enum label `MEMBARRIER_CMD_SHARED` is now an alias to preserve header backward compatibility)

`MEMBARRIER_CMD_REGISTER_GLOBAL_EXPEDITED`

`MEMBARRIER_CMD_PRIVATE_EXPEDITED_SYNC_CORE`

`MEMBARRIER_CMD_REGISTER_PRIVATE_EXPEDITED_SYNC_CORE`

mmap.2

Jan Kara [Ross Zwisler, Michael Kerrisk]

Add description of `MAP_SHARED_VALIDATE` and `MAP_SYNC`

Michal Hocko [John Hubbard, Michael Kerrisk, Jann Horn]

Document new `MAP_FIXED_NO_REPLACE` flag

4.17+ kernels offer a new `MAP_FIXED_NO_REPLACE` flag which allows the caller to atomically probe for a given address range.

readv.2

io_submit.2

Jürg Billeter

Document `RWF_APPEND` added in Linux 4.16

capabilities.7

Michael Kerrisk

Describe file capability versioning

Michael Kerrisk [Serge E. Hallyn]

Document namespaced-file capabilities

[There's still more work to be done on this new text]

Changes to individual pages

bpf.2

Michael Kerrisk

Update list of architectures that support JITed eBPF

And note kernel version numbers where support is added.

Michael Kerrisk

Kernel 4.15 added `CONFIG_BPF_JIT_ALWAYS_ON`

This causes the JIT compiler to be always on and forces `bpf_jit_enable` to 1.

`execve.2`

Michael Kerrisk

Note that describing `execve` as "executing a new process" is misleading

This misdescription is so common that it's worth calling it out explicitly.

Michael Kerrisk

More explicitly describe effect of `execve()` in the opening paragraph

`fallocate.2`

Michael Kerrisk

Since Linux 4.16, Btrfs supports `FALLOC_FL_ZERO_RANGE`

`getrlimit.2`

Michael Kerrisk

`CAP_SYS_RESOURCE` capability is required in *initial user namespace*

`io_submit.2`

Michael Kerrisk

Add kernel version numbers for various 'aio_rw_flags' flags

Michael Kerrisk

Place 'aio_rw_flags' in alphabetical order

`mmap.2`

Jann Horn

`MAP_FIXED` is okay if the address range has been reserved

Clarify that `MAP_FIXED` is appropriate if the specified address range has been reserved using an existing mapping,

but shouldn't

be used otherwise.

Michael Kerrisk

Move the text on `MAP_FIXED` to NOTES

This text has become rather long, making it somewhat unwieldy in the discussion of the `mmap()` flags. Therefore, move it to NOTES, with a pointer in DESCRIPTION referring the reader to NOTES.

Michael Kerrisk [Heinrich Schuchardt]

Clarify that when `addr==NULL`, address chosen by kernel is page-aligned

Michael Kerrisk

Add a little historical detail on the obsolete `MAP_DENYWRITE`

`mount.2`

Michael Kerrisk

ERRORS: add `EBUSY` for the case of trying to stack same mount twice

Michael Kerrisk

Remove a couple of obsolete EBUSY errors

As far as I can tell, these EBUSY errors disappeared with the addition of stackable mounts in Linux 2.4.

msgget.2

semget.2

shmget.2

Michael Kerrisk

The purpose of "flags" == 0 is to obtain ID of an existing IPC object

This was implied in these pages, but the meaning of "flags" == 0 could be more explicit, as indicated by questions such as <https://stackoverflow.com/questions/49833569/flag-value-of-semget-function>

open.2

Jann Horn

Document more -ETXTBSY conditions

Jakub Wilk

Add missing argument for snprintf() in example code

perf_event_open.2

Song Liu

Add type kprobe and uprobe

Two new types kprobe and uprobe are being added to perf_event_open(), which allow creating kprobe or uprobe with perf_event_open. This patch adds information about these types.

ptrace.2

Jann Horn

Copy retval info for SECCOMP_GET_FILTER to right section

The "RETURN VALUE" section made a claim that was incorrect for PTRACE_SECCOMP_GET_FILTER. Explicitly describe the behavior of PTRACE_SECCOMP_GET_FILTER in the "RETURN VALUE" section (as usual), but leave the

now duplicate description in the section

describing PTRACE_SECCOMP_GET_FILTER, since the PTRACE_SECCOMP_GET_FILTER section would otherwise probably become harder to understand.

readv.2

Michael Kerrisk

Remove redundant sentence

seccomp.2

Michael Kerrisk

Note that execve() may change syscall numbers during life of process

On a multiarch/multi-ABI platform such as modern x86, each

architecture/ABI (x86-64, x32, i386) has its own syscall numbers, which means a seccomp() filter may see different syscall numbers over the life of the process if that process uses execve() to execute programs that has a different architectures/ABIs.

Michael Kerrisk

Note which architectures support seccomp BPF

Michael Kerrisk

In EXAMPLE, clearly note that x32 syscalls are \geq X32_SYSCALL_BIT

shutdown.2

Carsten Grohmann

SEE ALSO: add close(2)

syscall.2

Adam

Borowski

Add riscv

wait.2

Michael Kerrisk [Robin Kuzmin]

wait() and waitpid() block the calling thread (not process)

wait4.2

Michael Kerrisk [Martin Mares]

Soften the warning against the use of wait3()/wait4()

These functions are nonstandard, but there is no replacement.

See https://bugzilla.kernel.org/show_bug.cgi?id=199215

crypt.3

encrypt.3

Carlos O'Donell [Michael Kerrisk]

Add notes about _XOPEN_CRYPT

The distribution may choose not to support _XOPEN_CRYPT in the case that the distribution has transitioned from glibc crypt to libxcrypt.

fseek.3

Michael Kerrisk [Andy Owen]

ERRORS: EBADF should be ESPIPE

Michael Kerrisk

Improve EPIPE error text

getcwd.3

Carlos O'Donell

Mention that "(unreachable)" is no longer returned for glibc \geq 2.27.

makedev.3

Michael Kerrisk

Since glibc 2.28, <sys/types.h> no longer defines these macros

pthread_create.3

Frederic Brault

Note default thread stack size for several architectures

tsearch.3

Jann Horn

Clarify items vs nodes

The manpage claimed that tsearch() returns a pointer to a data item. This is incorrect; tsearch() returns a pointer to the corresponding tree node, which can also be interpreted as a pointer to a pointer to the data item.

Since this API is quite unintuitive, also add a clarifying sentence.

Jann Horn

tdelete() can return dangling pointers

POSIX says that deleting the root node must cause tdelete() to return some unspecified non-NULL pointer. Glibc implements it by returning a dangling pointer to the (freed) root node.

Therefore, explicitly note that tdelete() may return bad pointers that must not be accessed.

elf.5

Michael Kerrisk

SEE ALSO: add patchelf(1)

filesystems.5

Michael Kerrisk

Add an entry for tmpfs(5)

group.5

Michael Kerrisk

SEE ALSO: add vigr(8)

passwd.5

Michael Kerrisk

SEE ALSO: add vipw(8)

sysfs.5

Michael Kerrisk

Add brief note on /sys/fs/smackfs

tmpfs.5

Mike Frysinger

Document current mount options

Some of this content is moved from the mount(8) man page.

Style was based on proc(5) sections.

Michael Kerrisk

Remove reference to mount(8) for discussion of mount options

The mount options are now described in this page.

Michael Kerrisk

SEE ALSO: add Documentation/vm/transhuge.txt

Michael Kerrisk

Reformat 'huge' and 'mpol' mount option values as lists

Michael Kerrisk

Describe 'mpol' mount options

Based on text from Documentation/filesystems/tmpfs.txt.

Michael Kerrisk

Document 'huge' mount options

Based on text from Documentation/vm/transhuge.txt.

Michael Kerrisk

SEE ALSO: add set_mempolicy(2)

Michael Kerrisk

Document mpol=local mount option

capabilities.7

Michael Kerrisk

Remove redundant mention of PTRACE_SECCOMP_GET_FILTER

cgroups.7

Michael Kerrisk

cgroup.events transitions generate POLLERR as well as POLLPRI

mount_namespaces.7

Michael Kerrisk

Note another case where shared "peer groups" are formed

namespaces.7

Michael Kerrisk [Konstantin Khlebnikov]

Mention that device ID should also be checked when comparing NS symlinks

When comparing two namespaces symlinks to see if they refer to the same namespace, both the inode number and the device ID should be compared. This point was already made clear in ioctl_ns(2), but was missing from this page.

Michael Kerrisk

Note an idiosyncrasy of /proc/[pid]/ns/pid_for_children

/proc/[pid]/ns/pid_for_children has a value only after first child is

created in PID namespace. Verified by experiment.

network_namespaces.7

Michael Kerrisk

Network namespaces isolate the UNIX domain abstract socket namespace

Michael Kerrisk

Add cross reference to `unix(7)`

For further information on UNIX domain abstract sockets.

`posixoptions.7`

Carlos O'Donell

Expand XSI Options groups

We define in detail the X/Open System Interfaces i.e. `_XOPEN_UNIX` and all of the X/Open System Interfaces (XSI) Options Groups.

The XSI options groups include encryption, realtime, advanced realtime, realtime threads, advanced realtime threads, tracing, streams, and legacy interfaces.

Michael Kerrisk

Use a more consistent, less cluttered layout for option lists

Michael Kerrisk

Make function lists more consistent and less cluttered

Use more consistent layout for lists of functions, and remove punctuation from the lists

to make them less cluttered.

`socket.7`

Michael Kerrisk [Tomi Salminen]

Fix error in `SO_INCOMING_CPU` code snippet

The last argument is passed by value, not reference.

`time.7`

Michael Kerrisk [Enrique Garcia]

Mention `clock_gettime()/clock_settime()` rather than `[gs]gettimeofday()` `gettimeofday()` is declared obsolete by POSIX. Mention instead the modern APIs for working with the realtime clock.

See https://bugzilla.kernel.org/show_bug.cgi?id=199049

`unix.7`

Michael Kerrisk [Rusty Russell]

ERRORS: add `EBADF` for sending closed file descriptor with `SCM_RIGHTS`

`vdso.7`

Michael Kerrisk

VDSO symbols (system calls) are not visible to `seccomp(2)` filters

`xattr.7`

Michael Kerrisk

SEE ALSO: add `selinux(8)`

`ld.so.8`

Mike Frysinger

Make lack of separator escaping explicit
Make it clear that the delimiters in LD_PRELOAD, LD_LIBRARY_PATH,
and LD_AUDIT cannot be escaped
so people don't try various methods
(such as \;) to workaround it.
Michael Kerrisk
Remove unneeded mention of PATH in discussion of LD_LIBRARY_PATH
This brief sentence doesn't add value to the text.

===== Changes in man-pages-5.00 =====

Released: 2019-03-06, Munich

Contributors

Apologies if I missed anyone!

New and rewritten pages

s390_guarded_storage.2

Eugene Syromyatnikov

New page documenting s390_guarded_storage(2) s390-specific system call

address_families.7

Michael Kerrisk [Eugene Syromyatnikov]

New page that contains details of socket address families

There is too much detail in socket(2). Move most of it into
a new page instead.

bpf-helpers.7

Michael

Kerrisk [Daniel Borkmann, Quentin Monnet]

Add new man page for eBPF helper functions
(autogenerated from kernel source files)

Removed Pages

mdoc.7

mdoc.samples.7

Michael Kerrisk [Ingo Schwarze]

Remove mdoc(7) and mdoc.samples(7)

groff_mdoc(7) from the groff project provides a better
equivalent of mdoc.samples(7) and the 'mandoc' project
provides a better mdoc(7). And nowadays, there are virtually

no pages in "man-pages" that use mdoc markup.

Newly documented interfaces in existing pages

fanotify_init.2

fanotify.7

nixiaoming [Amir Goldstein, Michael Kerrisk]

Document FAN_REPORT_TID

fanotify_init.2: add new flag FAN_REPORT_TID

fanotify.7: update description of member pid in
struct fanotify_event_metadata

Amir Goldstein

Document FAN_MARK_FILESYSTEM

Monitor fanotify

events on the entire filesystem.

Matthew Bobrowski [Amir Goldstein]

Document FAN_OPEN_EXEC and FAN_OPEN_EXEC_PERM

io_submit.2

Adam Manzanares

Document IOCB_FLAG_IOPRIO

msgctl.2

semctl.2

shmctl.2

Davidlohr Bueso [Joe Lawrence, Michael Kerrisk]

Document STAT_ANY commands

prctl.2

Konrad Rzeszutek Wilk [Michael Kerrisk]

Document PR_SET_SPECULATION_CTRL and PR_GET_SPECULATION_CTRL

sched_setattr.2

Claudio Scordino [Michael Kerrisk]

Document SCHED_FLAG_DL_OVERRUN and SCHED_FLAG_RECLAIM

socket.2

Tobias Klauser

Document AF_XDP

Document AF_XDP added in Linux 4.18.

inotify.7

Henry Wilson

Document IN_MASK_CREATE

unix.7

Michael Kerrisk
Document SO_PASSESEC
Michael Kerrisk
Document SCM_SECURITY ancillary data

New and changed links

reallocarray.3

Michael Kerrisk
New link to malloc(3)

precedence.7

Josh Triplett
Add as a redirect
to operator.7

Global changes

Various pages

Michael Kerrisk [G. Branden Robinson]
Use '\e' rather than '\\\ to get a backslash

Various pages

Michael Kerrisk [Bjarni Ingi Gislason, G. Branden Robinson]
Use zerowidth space in appropriate locations

Various pages

Michael Kerrisk
Clarify the distinction between "file descriptor" and "file description"

Various pages

Mike Rapoport
Update paths for in-kernel memory management documentation files

A few pages

Michael Kerrisk
Change references to '2.6.0-test*' series kernels to just '2.6.0'

Changes to individual pages

iconv.1

Marko Myllynen

SEE ALSO: add uconv(1)

localedef.1

Howard Johnson

Note that -f and -c, are reversed from what you might expect

time.1

Michael Kerrisk [Johannes Altmanninger]

Document the -q/--quiet option

Jakub Wilk

Update bug reporting address

bpf.2

Tobias

Klauser

Update JIT support list for Linux 4.18

JIT support for x86-32 was during the Linux 4.18 release cycle.

Also correct the entry for MIPS (only MIPS64 is supported).

Oded Elisha

Fix bug in example

Quentin Monnet

SEE ALSO: add bpf-helpers(7)

capget.2

Michael Kerrisk

Remove crufty sentence suggesting use of deprecated functions

Remove crufty sentence suggesting use of deprecated capsetp(3) and capgetp(3); the manual page for those functions has long (at least as far back as 2007) noted that they are deprecated.

Michael Kerrisk

Remove first paragraph, which repeats details from capabilities(7)

chroot.2

Michael Kerrisk

Mention /proc/[pid]/root

clock_getres.2

Michael Kerrisk [Jens Thoms Toerring]

CLOCK_MONOTONIC_RAW does not count while the system is suspended

Michael Kerrisk [Jens Thoms Toerring]

On Linux CLOCK_MONOTONIC counts

time that the system has run since boot

Michael Kerrisk [Jens Thoms Toerring]

CLOCK_MONOTONIC does not count while the system is suspended

Michael Kerrisk

ERRORS: add EINVAL error for noncanonical clock_settime() value

clone.2

Michael Kerrisk

Rework discussion of threads and signals

The discussion is phrased in terms of signals sent using `kill(2)`,
but applies equally to a signal sent by the kernel.

Jann Horn

Pending `CLONE_NEWPID` prevents thread creation

Michael Kerrisk

Clarify the discussion of threads and signals

And explicitly introduce the terms "process-directed" and
"thread-directed" signals.

Eugene Syromyatnikov

Add information about `clone` and `clone2` on IA-64

Michael Kerrisk

ERRORS: `EINVAL` occurs with `CLONE_NEWUSER` if `!CONFIG_USER_NS`

connect.2

Benjamin Peterson

Document error semantics of nonblocking UNIX domain sockets

epoll_ctl.2

Michael Kerrisk

Use the term "interest list" consistently

epoll_wait.2

Michael Kerrisk

Clarify the behavior when `epoll_wait()`-ing on an empty interest list

Michael Kerrisk

Note that `epoll_wait()` round robins through the set of ready descriptors

eventfd.2

Michael Kerrisk

Move text noting that `eventfd()` creates a FD earlier in the page

fcntl.2

Michael Kerrisk

Actual pipe capacity may in practice be less than nominal capacity

The number of bytes that can be written to the pipe may be less
(sometimes substantially less) than the nominal capacity.

Eugene Syromyatnikov

Mention that `l_sysid` is not used even if present

Michael Kerrisk

Briefly explain the meaning of the '`l_sysid`' field in '`struct flock`'

futex.2

Benjamin Peterson

Make the example use C11 atomics rather than GCC builtins

getcpu.2

Tobias Klauser [Michael Kerrisk]
getcpu() now has a glibc wrapper;
remove mention of syscall(2)

The glibc wrapper was added in glibc 2.29, release on 1 Feb 2019.

getgid.2
getpid.2
getuid.2
pipe.2
syscall.2

Eugene Syromiatnikov [Michael Kerrisk]

Describe 2nd return value peculiarity

Some architectures (ab)use second return value register for
additional return value in some system calls. Let's describe this.

getgroups.2

Michael Kerrisk

Note that a process can drop all groups with: setgroups(0, NULL)

getrlimit.2

Eugene Syromyatnikov

Note that setrlimit(RLIMIT_CPU) doesn't fail

Michael Kerrisk

Resource limits are process-wide attributes shared by all threads

This was already noted in pthreads(7), but bears repeating here.

Eugene Syromyatnikov

Correct information about large limits on 32-bit architectures

gettid.2

Michael Kerrisk

Glibc provides a wrapper since version 2.30

gettimeofday.2

Michael Kerrisk

ERRORS: add EINVAL

for noncanonical 'tv' argument to gettimeofday()

gettimeofday.2

clock_getres.2

Michael Kerrisk [Jens Thoms Toerring]

ERRORS: EINVAL can occur if new real time is less than monotonic clock

getxattr.2

removexattr.2

setxattr.2

Michael Kerrisk [Andreas Gruenbacher, Enrico Scholz]

ERRORS: replace ENOATTR with ENODATA

See also https://bugzilla.kernel.org/show_bug.cgi?id=201995

inotify_add_watch.2

Paul Millar

Add IN_ONLYDIR based error

Henry Wilson

Note errors that can occur for IN_MASK_CREATE

io_submit.2

Jeff Moyer

Fix the description of aio_data

aio_data is not a kernel-internal field.

madvise.2

Michal Hocko [Niklas Hambüchen]

MADV_FREE clarify swapless behavior

memfd_create.2

Marc-André Lureau

Update hugetlb file-sealing support

Lucas De Marchi

Fix header for memfd_create()

Joseph C. Sible

_GNU_SOURCE is required

mmap.2

Elliott Hughes

Explicitly state that the fd can be closed

Jann Horn [Michal Hocko, William Kucharski]

Fix description of treatment of the hint

The current manpage reads as if the kernel will always pick a free space close to the requested address, but that's not the case.

mount.2

Michael Kerrisk

Clearly distinguish per-mount-point vs per-superblock mount flags

Michael Kerrisk

MS_SILENT is ignored when changing propagation type

Michael Kerrisk

Attempts to change MS_SILENT setting during remount are silently ignored

Michael Kerrisk [Harry Mallon]

Document EROFS for read-only filesystems

See https://bugzilla.kernel.org/show_bug.cgi?id=200649

Michael Kerrisk

Clarify that per-superblock flags are shared during remount

Michael Kerrisk

Remove crufty sentence about MS_BIND + MS_REMOUNT

Michael Kerrisk

Mention /proc/PID/mountinfo

Many people are unaware of the /proc/PID/mountinfo file. Provide

a helpful clue here.

Michael Kerrisk

Mandatory locking also now requires CONFIG_MANDATORY_FILE_LOCKING

Michael Kerrisk [Simone Piccardi]

Add MS_STRICTATIME to list of flags that can be used in remount

Michael Kerrisk

EACCESS: note some reasons why a filesystem may be read-only

Michael Kerrisk

SEE ALSO: add ioctl_iflags(2)

msgop.2

Michael Kerrisk

Correct the capability description for msgsnd() EACCESS error

nfsservctl.2

Michael Kerrisk

Add VERSIONS section noting that this system call no longer exists

open.2

Lucas Werkmeister

Document ENXIO for sockets

Michael Kerrisk

Clarify a special use case of O_NONBLOCK for devices

Eugene Syromiatnikov

Mention presence of unused O_RSYNC definition

O_RSYNC is defined in <asm/fcntl.h> on HP PA-RISC, but is not used anyway.

Eugene Syromiatnikov

Document FASYNC usage

in Linux UAPI headers

Andrew Price

Remove O_DIRECT-related quotation

Remove a section that adds no benefit to the discussion of O_DIRECT.

Michael Kerrisk [Robin Kuzmin]

Clarify that O_NONBLOCK has no effect on poll/epoll/select

perf_event_open.2

Vince Weaver [Wang Nan]

Document the PERF_EVENT_IOC_PAUSE_OUTPUT ioctl

The PERF_EVENT_IOC_PAUSE_OUTPUT ioctl was introduced in Linux 4.7.

Vince Weaver

Fix wording in multiplexing description

Vince Weaver

Clarify exclude_idle

Vince Weaver

Document the PERF_EVENT_IOC_QUERY_BPF ioctl

Vince Weaver

Document the PERF_EVENT_IOC_MODIFY_ATTRIBUTES ioctl

Vince Weaver

Fix prctl behavior description

pivot_root.2

Elvira Khabirova

Explain the initramfs case and point to switch_root(8)

Joseph Sible [Joseph C. Sible]

Document EINVAL if root is rootfs

pkey_alloc.2

Michael Kerrisk [Szabolcs Nagy]

Switch

to glibc prototype in SYNOPSIS

poll.2

Michael Kerrisk

Note that poll() and ppoll() are not affected by O_NONBLOCK

posix_fadvise.2

Eugene Syromyatnikov

Describe the difference between fadvise64/fadvise64_64

prctl.2

Benjamin Peterson

PR_SET_MM_EXE_FILE may now be used as many times as desired

Michael Kerrisk

Add some further historical details on PR_SET_MM_EXE_FILE

Michael Kerrisk [Jann Horn]

Explain the circumstances in which the parent-death signal is sent

Michael Kerrisk

Rework the PR_SET_PDEATHSIG description a little, for easier readability

Michael Kerrisk

Add additional info on PR_SET_PDEATHSIG

The signal is process directed and the siginfo_t->si_pid

field contains the PID of the terminating parent.

Michael Kerrisk

Note libcap(3) APIs for operating on ambient capability set

(However, the libcap APIs do not yet seem to have

manual pages...)

Michael Kerrisk

Mention libcap APIs for operating on capability bounding set

ptrace.2

Dmitry V. Levin

Do not say that PTRACE_O_TRACESYSGOOD may not work

Jann Horn

BUGS: ptrace() may set errno to zero

readdir.2

Eugene Syromyatnikov

Fix struct old_linux_dirent in accordance with current definition

readv.2

Xiao Yang [Florian Weimer]

Fix wrong errno for an unknown flag

rename.2

Michael Kerrisk

glibc 2.28 adds library support for renameat2()

Tobias Klauser

Add feature test macro for renameat2()

The glibc wrapper for renameat2() was added in glibc 2.28 and requires `_GNU_SOURCE`.

Eugene Syromyatnikov

Some additional notes regarding `RENAME_WHITEOUT`

Lucas Werkmeister [Michael Kerrisk]

Add kernel versions for `RENAME_NOREPLACE` support

Michael Kerrisk

Rework list of supported filesystems for `RENAME_NOREPLACE`

Tobias Klauser

renameat2()

now has a glibc wrapper; remove mention of `syscall(2)`

s390_runtime_instr.2

Eugene Syromyatnikov

Add a note about `runtime_instr.h` availability

s390_sthyi.2

Eugene Syromyatnikov [Heiko Carstens]

Some minor additions

sched_setattr.2

Michael Kerrisk

Add a bit more detail for `SCHED_DEADLINE`

sched_setparam.2

Michael Kerrisk

Clarify that scheduling parameters are per-thread (not per-process)

seccomp.2

Michael Kerrisk

(Briefly) document `SECCOMP_FILTER_FLAG_SPEC_ALLOW`

Michael Kerrisk

SEE ALSO: add bpfc(1)

select.2

Michael Kerrisk

BUGS: the use of value-result arguments is a design bug

Michael Kerrisk [Robin Kuzmin]

Note that select() and pselect() are not affected by O_NONBLOCK

select_tut.2

Michael Kerrisk [Antonio Chirizzi]

Diagnose inet_aton() errors with simple fprintf() (not perror())

setgid.2

Michael Kerrisk

Clarify EPERM capability requirements with respect
to user namespaces

setns.2

Michael Kerrisk

When joining a user namespace, it must be a descendant user namespace

Michael Kerrisk

Note capability requirements for changing PID namespace

Note capability requirements for changing network, IPC, or UTS namespace

Note capability requirements for changing cgroup namespace

Michael Kerrisk

Some text restructuring and reordering

set_thread_area.2

Eugene Syromyatnikov

Mention related prctl() requests in SEE ALSO

Eugene Syromyatnikov

Mention that get_thread_area() is also Linux-specific

Eugene Syromyatnikov

Describe set_thread_area()/get_thread_area() on m68k/MIPS

setuid.2

Michael Kerrisk

Clarify EPERM capability requirements with respect to user namespaces

sigaction.2

Eugene Syromyatnikov [Michael Kerrisk]

Describe obsolete usage of struct sigcontext as signal handler argument

sigsuspend.2

Michael Kerrisk

Clarify that

sigsuspend() suspends the calling *thread*

socket.2

Michael Kerrisk

Remove references to external docs

This information is all in the new address_families(7)

Michael Kerrisk

Add cross reference to address_families(7)

Eugene Syromyatnikov

Reinstate AF_VSOCK mention

Michael Kerrisk

Simplify list of address families

Remove many of the details that are in address_families(7)

Nikola Forró

Remove notes concerning AF_ALG and AF_XDP

All address families are now documented in address_families.7.

Michael Kerrisk

Remove some more obscure protocols from address family list

The list of address families in this page is still
overwhelmingly long. So let's shorten it.

The removed entries are all in address_families(7).

Michael Kerrisk

Remove a few obsolete protocols

Documentation for these remains in address_families(7)

socketpair.2

Eugene Syromyatnikov

Note that AF_TIPC also supports socketpair(2)

Introduced by Linux commit v4.12-rc1~64^3~304^2~1.

stat.2

Michael Kerrisk [Alessandro Vesely]

ERRORS: ENOENT can occur where a path component is a dangling symlink

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=909789>

Benjamin Peterson

SEE ALSO: add statx(2)

statx.2

Tobias Klauser [Michael Kerrisk]

statx() now has a glibc wrapper; remove mention of syscall(2)

syscall.2

Eugene Syromyatnikov [Michael Kerrisk]

Elaborate x32 ABI specifics

snyh

Fix wrong retval register number in alpha architecture

Helge Deller

parisc needs care with syscall parameters

Michael Kerrisk

Rework table to render within 80 columns

syscalls.2

Eugene Syromyatnikov

Change example of a thin syscall wrapper to chdir()

As truncate(3) should dispatch between truncate/truncate64,
as noted

later in the page.

Eugene Syromyatnikov [Michael Kerrisk]

Update syscall table

Added: arc_gettls, arc_settls, arc_usr_cmpxchg, arch_prctl,
atomic_barrier, atomic_cmpxchg_32, bfin_spinlock, breakpoint,
clone2, cmpxchg, cmpxchg_badaddr, dma_memcpy, execv, get_tls,
getdomainname, getdtablesize, gethostname, getxgid, getxpid,
getxuid, metag_get_tls, metag_set_fpu_flags, metag_set_tls,
metag_set_global_bit, newfstatat, old_adjtimex, oldumount,
or1k_atomic, pread, pwrite, riscv_flush_icache,
sched_get_affinity, sched_set_affinity, set_tls, setaltroot,
sethae, setprgrp, spill, sram_alloc, sram_free, swapcontext,
switch_endian, sys_debug_setcontext, syscall, sysmips, timerfd,
usr26, usr32, xtensa.

Uncommented: memory_ordering

Renamed: ppc_rtas to rtas (__NR_rtas), ppc_swapcontext to
swapcontext (__NR_swapcontext).

Eugene Syromyatnikov

Note about s390x and old_mmap

Michael Kerrisk

Add s390_guarded_storage(2)

Michael Kerrisk

Update syscall list for Linux 4.18

Eugene Syromyatnikov

Note that not all architectures return errno negated

Helge Deller

parisc Linux does not any longer emulate HP-UX

Michael Kerrisk

Comment out details of a few system calls that only ever briefly existed

unshare.2

Michael Kerrisk [Shawn Landden]

Same EINVAL errors as for clone(2) can also occur with unshare(2)

Tycho Andersen

Note EINVAL when unsharing pid ns twice

The kernel doesn't allow unsharing a pid NS if it has
previously been unshared.

ustat.2

Michael Kerrisk

Starting with version 2.28, glibc no longer provides a wrapper function

vmsplice.2

Andrei Vagin

Note that vmsplice can splice pages from pipe to memory

wait.2

Michael Kerrisk

Add some cross references

to core(5)

write.2

Michael Kerrisk [Nadav Har'El]

RETURN VALUE: clarify details of partial write and

https://bugzilla.kernel.org/show_bug.cgi?id=197961

Goldwyn Rodrigues

Add details on partial direct I/O writes

alloca.3

Michael Kerrisk [Robin Kuzmin]

Prevent any misunderstanding about when allocated memory is released

bsd_signal.3

Xiao Yang

Fix the wrong version of _POSIX_C_SOURCE

bstring.3

Michael Kerrisk [Emil Fihlman]

Correct argument list for memmem() prototype

cmsg.3

Michael Kerrisk

Explain zero-initialization requirement for CMSG_NXTHDR()

Michael Kerrisk

Remove out of place mention of MSG_CTRUNC

This detail is covered in recvmsg(2), and now also in unix(7).

Michael Kerrisk

Note that CMSG_FIRSTHDR can return NULL

Michael Kerrisk

Remove unnecessary 'fdptr' intermediate variable in example code

des_crypt.3

encrypt.3

Michael Kerrisk

The functions described in these pages are removed in glibc 2.28

dlsym.3

Michael Kerrisk

Describe a case where a symbol value may be NULL

errno.3

Michael Kerrisk [Robert P. J. Day]

Mention that errno(1) is part of the 'moreutils' package

exec.3

Michael Kerrisk [Eugene Syromyatnikov]

Note that SPARC provides an execv() system call

exit.3

Mike Frysinger

Note wider sysexits.h availability

error.3

Elliot Hughes

Warn about closing the result of fileno()

fnmatch.3

Elliott Hughes

Clarify "shell wildcard pattern"

getaddrinfo.3

Michael Kerrisk [Eric Sanchis]

Fix off-by-one error in example client program

getcwd.3

Michael Kerrisk

Rework text on use of getcwd() system call

Make it clear that all of the library functions described on this page will use the getcwd() system call if it is present.

Michael Kerrisk

Add details on the getcwd() syscall and how it

used by libc functions

Michael Kerrisk

Reorder the text describing "(unreachable)" being returned by getcwd()

getmntent.3

Elliot Hughes

Clarify that endmntent() should be used rather than fclose()

isatty.3

Michael Kerrisk [Jakub Wilk]

Most non-tty files nowadays result in the error ENOTTY

Historically, at least FIFOs and pipes yielded the error EINVAL.

lockf.3

Ian Turner

ERRORS: add EINTR

malloc.3

Michael Kerrisk

Add reference to glibc MallocInternals wiki

Michael Kerrisk

Note that calloc() detects overflow when multiplying its arguments

Michael Kerrisk

Since glibc 2.29, reallocarray() is exposed by defining _DEFAULT_SOURCE

Info gleaned from glibc NEWS file.

pthread_attr_init.3

Michael Kerrisk [Göran Höggsjö, Jakub Wilk]

Use correct printf() specifier for "size_t" in example program

pthread_rwlockattr_setkind_np.3

Carlos O'Donell

Remove bug notes

pthread_setname_np.3

Jakub Wilk

Explain _np suffix

Add text to CONFORMING TO explaining that the "_np" suffix is because these functions are non-portable.

putenv.3

Michael Kerrisk

Note a glibc extension: putenv("NAME") removes an environment variable

resolver.3

Michael Becker

Add documentation of res_nclose()

strcmp.3

Heinrich Schuchardt

Clarify that strcmp() is not locale aware

strcpy.3

Matthew Kilgore

Fix example code for strncpy, which could pass an incorrect length

Michael Kerrisk [Frank Theile]

Use "destination" consistently (instead of "target" sometimes)

strfry.3

Keith Thompson

Remove incorrect reference to rand(3)

string.3

strlen.3

strnlen.3

Michael Kerrisk [Jakub Wilk]

Use 'bytes' not 'characters'

This is in line with POSIX terminology.

system.3

Michael Kerrisk [Jonny Grant]

Use '(char *) NULL' rather than '(char *) 0'

Michael

Kerrisk

Note that system() can fail for the same reasons as fork(2)

Arkadiusz Drabczyk

Mention that 'errno' is set on error

termios.3

Eugene Syromyatnikov

Note an XTABS alpha issue

trunc.3

Michael Kerrisk [Eric Benton, G. Branden Robinson]

Make the description a little clearer

Michael Kerrisk

Emphasize that the return value is a floating-point number

xcrypt.3

Jason A. Donenfeld

Warn folks not to use these functions

lirc.4

Sean Young

Fix broken link

Sean Young

Document error returns more explicitly

Sean Young

lirc.h include file is in /usr/include/linux/lirc.h

Sean Young [Alec Leamas, Mauro Carvalho Chehab]

Remove ioctl and feature bits which were never implemented

Sean Young

Unsupported ioctl() operations always return ENOTTY

Sean Young

LIRC_MODE_LIRCCODE has been replaced by LIRC_MODE_SCANCODE

Sean Young

Document remaining

ioctl (LIRC_GET_REC_TIMEOUT)

Now all ioctls are documented.

Sean Young

Timeout reports are enabled by default

Sean Young

Some devices are send only

Sean Young

Update SEE ALSO

Sean Young

LIRC_CAN_SET_REC_DUTY_CYCLE_RANGE was never supported

No driver ever supported such a thing.

Michael Kerrisk

Clarify the description LIRC_SET_REC_TIMEOUT

tty.4

Michael Witten

Add ``vcs(4)`` and ``pty(7)`` to the ``SEE ALSO`` section

vcs.4

Mattias Engdegård [Michael Witten]

Fix broken example code

core.5

Michael Kerrisk

Add cross reference to `vdso(7)` where "virtual DSO" is mentioned

filesystems.5

Eugene Syromyatnikov

Mention `sysfs(2)`

host.conf.5

Nikola Forró

Clarify `glibc` versions in which `spoof` options were removed

proc.5

Michael Kerrisk [Philip Dumont]

Document `/proc/[tid]`

See also https://bugzilla.kernel.org/show_bug.cgi?id=201441

Michael Kerrisk

Add an overview section describing the groups of files under `/proc`

Keno Fischer [Robert O'Callahan]

Correct description of `NStgid`

Lucas Werkmeister

Document `fdinfo` format for `timerfd`

Stephan Knauss

Mention `/proc/uptime` includes time spent in suspend

Michael Kerrisk

Reword `/proc/PID/fdinfo timerfd` field descriptions as a hanging list

Michael Kerrisk

SEE ALSO: add `htop(1)` and `pstree(1)`

`fs/proc/uptime.c:uptime_proc_show()` fetches time using

ktime_get_boottime which includes the time spent in suspend.

Michael Kerrisk

Document /proc/PID/status CoreDumping field

Michael Kerrisk

Mention choom(1) in discussion of /proc/[pid]/oom_score_adj

Michael Kerrisk

Add a few details on /proc/PID/fdinfo timerfd

Michael Kerrisk

Document /proc/meminfo KReclaimable field

Michael Kerrisk

Explain how to determine top-most mount in /proc/PID/mountinfo

Explain how to determine the top-most mount at a particular location by inspecting /proc/PID/mountinfo.

Michael Kerrisk [Jakub Wilk]

Remove bogus suggestion to use cat(1) to read files containing '\0'

Michael Kerrisk

Refer to mount(2) for explanation of mount vs superblock options

Michael Kerrisk

Fix description of /proc/PID/* ownership to account for user namespaces

Elvira Khabirova

Describe ambiguities in /proc/<pid>/maps

Michael Kerrisk [Nick Gregory]

Since Linux 4.5, "stack:" is no longer shown in /proc/PID/maps

Nikola Forró

Document /proc/[pid]/status Speculation_Store_Bypass field

Alan Jenkins

Vmalloc information is no longer calculated (Linux 4.4)

Michael Kerrisk [Alexander E. Patrakov, Jakub Wilk, Michael Kerrisk]

Use 'tr '\000' '\n' to display contents of /proc/PID/environ

Michael Kerrisk

Setting dumpable to 1 reverts ownership of /proc/PID/* to effective IDs

Michael Kerrisk

Document /proc/meminfo LazyFree field

Michael Kerrisk

Fix kernel source pathname for soft-dirty documentation

Michael Kerrisk

/proc/[pid]/status VmPMD field was removed in Linux 4.15

resolv.conf.5

Nikola Forró

Document no-reload (RES_NPRELOAD) option

tzfile.5

Paul Eggert

Sync from tzdb upstream

capabilities.7

Michael Kerrisk

Fix some imprecisions in discussion of namespaced file capabilities

The file UID does not come into play when creating a v3 security.capability extended attribute.

Michael Kerrisk

Note that v3 security.attributes are transparently created/retrieved

Michael Kerrisk

Improve the discussion of when file capabilities are ignored

The text stated that the `execve()` capability transitions are not performed for the same reasons that `setuid` and `setgid` mode bits may be ignored (as

described in `execve(2)`). But, that's not quite

correct: rather, the file capability sets are treated as empty for the purpose of the capability transition calculations.

Michael Kerrisk

Rework bounding set as per-thread set in transformation rules

Michael Kerrisk

Substantially rework "Capabilities and execution of programs by root"

Rework for improved clarity, and also to include missing details on the case where (1) the binary that is being executed has capabilities attached and (2) the real user ID of the process is not 0 (root) and (3) the effective user ID of the process is 0 (root).

Marcus Gelderie

Add details about `SECBIT_KEEP_CAPS`

The description of `SECBIT_KEEP_CAPS` is misleading about the effects on the effective capabilities of a process during a switch to nonzero UIDs. The effective set is cleared based on the

effective UID switching to a nonzero value, even if

`SECBIT_KEEP_CAPS` is set. However, with this bit set, the effective and permitted sets are not cleared if the real and saved set-user-ID are set to nonzero values.

Marcus Gelderie

Mention header for `SECBIT` constants

Mention that the named constants (`SECBIT_KEEP_CAPS` and others) are available only if the `linux/securebits.h` user-space header is included.

Michael Kerrisk

Add text introducing bounding set along with other capability sets

Michael Kerrisk [Allison Randal]

Update URL for location of POSIX.1e draft standard

Michael Kerrisk

`CAP_SYS_CHROOT` allows use of `setns()` to change the mount namespace

Michael Kerrisk [Pierre Chifflier]

Ambient capabilities do not trigger secure-execution mode

Michael Kerrisk

Add a subsection on per-user-namespace "set-user-ID-root" programs

Michael Kerrisk

Rework discussion of exec and UID 0, correcting a couple of details

Clarify the "Capabilities and execution of programs by root" section, and correct a couple of details:

* If a process with rUID == 0 && eUID != 0 does an exec, the process will nevertheless gain effective capabilities if the file effective bit is set.

* Set-UID-root programs only confer a full set of capabilities if the binary does not also have attached capabilities.

Michael Kerrisk

Update URL for libcap tarballs

The previous location does not seem to be getting updated.

(For example, at the time of this commit, libcap-2.26 had been out for two months, but was not present at <http://www.kernel.org/pub/linux/libs/security/linux-privs>.)

Michael Kerrisk

Clarify which capability sets capset(2) and capget(2) apply to capset(2) and capget(2) apply

operate only on the permitted, effective, and inheritable process capability sets.

Michael Kerrisk

Correct the description of SECBIT_KEEP_CAPS

Michael Kerrisk

Add background details on capability transformations during execve(2)

Add background details on ambient and bounding set when discussing capability transformations during execve(2).

Michael Kerrisk

Document the 'no_file_caps' kernel command-line option

cgroup_namespaces.7

Michael Kerrisk [Troy Engel]

Clarify the example by making an implied detail more explicit.

See https://bugzilla.kernel.org/show_bug.cgi?id=201047

cgroups.7

Michael Kerrisk

Add more detail on v2 'cpu' controller and realtime threads

Explicitly note the scheduling policies that are relevant for the v2 'cpu' controller.

Michael Kerrisk

Document the use of 'cgroup_no_v1=named' to disable v1 named hierarchies

This feature was added in Linux 5.0.

Michael Kerrisk [Mike Weilgart]

Complete partial sentence re kernel boot options and 'nsdelegate'

https://bugzilla.kernel.org/show_bug.cgi?id=201029

Michael Kerrisk

Reframe the text on delegation to include more details about cgroups v1

Michael Kerrisk [Leah Hanson]

Rework discussion of writing to cgroup.type file

In particular, it is possible to write "threaded" to a cgroup.type file if the current type is "domain threaded". Previously, the text had implied that this was not possible.

Michael Kerrisk [Balbir Singh, Marcus Gelderie]

Soften the discussion about delegation in cgroups v1

Balbir pointed out that v1 delegation was not an accidental feature.

epoll.7

Michael Kerrisk

Introduce the terms "interest list" and "ready list"

Michael Kerrisk

Consistently use the term "interest list" rather than "epoll set"

Michael Kerrisk

Reformat Q&A list

Michael Kerrisk

Note that edge-triggered notification wakes up only one waiter

Note a useful performance benefit of EPOLLET: ensuring that only one of multiple waiters (in `epoll_wait()`) is woken up when a file descriptor becomes ready.

Michael Kerrisk

Expand the discussion of the implications of file descriptor duplication

In particular, note that it may be difficult for an application to know about the existence of duplicate file descriptors.

feature_test_macros.7

Michael Kerrisk [Andreas Westfeld]

Add more detail on why FTMs must be defined before including any header

inotify.7

Michael Kerrisk [Paul Millar]

Note ENOTDIR error that can occur for IN_ONLYDIR

Note ENOTDIR error that occurs when requesting a watch on a nondirectory with IN_ONLYDIR.

ip.7

Bert Hubert

IP_RECVTTL error fixed

I need to get the TTL of UDP datagrams from userspace, so I set the `IP_RECVTTL` socket option. And as promised by ip.7, I then get `IP_TTL` messages from `recvfrom`. However, unlike what the manpage promises, the TTL field gets passed as a 32 bit integer.

man.7

Michael Kerrisk

SEE ALSO: remove mdoc.samples(7)

mount_namespaces.7

Michael Kerrisk

SEE ALSO: add findmnt(8)

namespaces.7

Michael Kerrisk

List factors that may pin a namespace into existence

Various factors may pin a namespace into existence, even when it has no member processes.

Michael Kerrisk [Tycho Kirchner]

Briefly explain why CAP_SYS_ADMIN is needed to create nonuser namespaces

Michael Kerrisk

Mention ioctl(2) in discussion of namespaces APIs

Michael Kerrisk

SEE ALSO: add pam_namespace(8)

pid_namespaces.7

Michael Kerrisk

Clarify the semantics for the adoption of orphaned

processes

Because of setns() semantics, the parent of a process may reside in the outer PID namespace. If that parent terminates, then the child is adopted by the "init" in the outer PID namespace (rather than the "init" of the PID namespace of the child).

Michael Kerrisk

Note a detail of /proc/PID/ns/pid_for_children behavior

After clone(CLONE_NEWPID), /proc/PID/ns/pid_for_children is empty until the first child is created. Verified by experiment.

Michael Kerrisk

Note that a process can do unshare(CLONE_NEWPID) only once

sched.7

Michael Kerrisk [Eugene Syromyatnikov]

In the kernel source SCHED_OTHER is actually called SCHED_NORMAL

Michael Kerrisk

SEE ALSO: add ps(1) and top(1)

Michael Kerrisk

SEE ALSO: add chcpu(1), lscpu(1)

signal.7

Michael Kerrisk [Robin Kuzmin]

Clarify that sigsuspend() and pause() suspend the calling *thread*

Helge

Deller

Add signal numbers for parisc

Michael Kerrisk

Unify signal lists into a signal table that embeds standards info
Having the signals listed in three different tables reduces readability, and would require more table splits if future standards specify other signals.

Michael Kerrisk

Reorder the architectures in the signal number lists
x86 and ARM are the most common architectures, but currently are in the second subfield in the signal number lists.
Instead, swap that info with subfield 1, so the most common architectures are first in the list.

Michael Kerrisk

Place signal numbers in a separate table
The current tables of signal information are unwieldy, as they try to cram in too much information.

Michael Kerrisk

Insert standards info into tables

Michael Kerrisk

SEE ALSO: add clone(2)

socket.7

Michael Kerrisk

Refer reader to unix(7) for information on SO_PASSSEC

Michael Kerrisk

SEE ALSO: add address_families(7)

socket.7

unix.7

Michael Kerrisk

Move text describing SO_PEERCREC from socket(7) to unix(7)
This is, AFAIK, an option specific to UNIX domain sockets, so place it in unix(7).

tcp.7

udp.7

Michael Kerrisk

Add a reference to socket(7) noting existence of further socket options

unix.7

Michael Kerrisk

Enhance the description of SCM_RIGHTS
The existing description is rather thin. More can be said.

Michael Kerrisk

There is a limit on the size of the file descriptor array for SCM_RIGHTS
The limit is defined in the kernel as SCM_MAX_FD (253).

Michael Kerrisk

Rework SO_PEERCREC text for greater clarity

Michael Kerrisk [Felipe Gasper]

Clarify SO_PASSCRED behavior

Michael Kerrisk

Explicitly note that SO_PASSCRED provides SCM_CREDENTIALS messages

Michael Kerrisk

If the buffer to receive SCM_RIGHTS FDs is too small, FDs are closed

Michael Kerrisk

One must send at least one byte of real data with ancillary data

Michael Kerrisk

Ancillary data forms a barrier when receiving on a stream socket

Michael Kerrisk

When sending ancillary data, only one item of each type may be sent

Michael Kerrisk

Improve wording describing socket option argument/return values

Michael Kerrisk

Clarify treatment of incoming ancillary data if 'msg_control' is NULL

Michael Kerrisk

Note behavior if buffer to receive ancillary data is too small

Michael Kerrisk

Fix a minor imprecision in description of SCM_CREDENTIALS

Michael Kerrisk

Refer reader to socket(7) for information about SO_PEEK_OFF

user_namespaces.7

Michael Kerrisk

Rework terminology describing ownership of nonuser namespaces

Prefer the word "owns" rather than

"associated with" when

describing the relationship between user namespaces and non-user namespaces. The existing text used a mix of the two terms, with "associated with" being predominant, but to my ear, describing the relationship as "ownership" is more comprehensible.

vdso.7

Helge Deller

Fix parisc gateway page description

ld.so.8

Michael Kerrisk [Florian Weimer, David Newall]

Document the --preload command-line option added in glibc 2.30

Michael Kerrisk

Note delimiters for 'list' in --audit and --inhibit-rpath

Michael Kerrisk

Place OPTIONS in alphabetical order

Michael Kerrisk

LD_PRELOAD-ed objects are added to link map in left-to-right order

zdump.8

Paul Eggert
Sync from tzdb upstream

zic.8

Paul Eggert
Sync from tzdb upstream

===== Changes in man-pages-5.01 =====

Released: 2019-05-09, Munich

Contributors

The

following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Abhinav Upadhyay <er.abhinav.upadhyay@gmail.com>
Andreas Korb <andreas.d.korb@gmail.com>
Anisse Astier <anisse@astier.eu>
Brice Goglin <Brice.Goglin@inria.fr>
Carlos O'Donnell <carlos@redhat.com>
Dr. Jürgen Sauermann <mail@xn--jrger-sauermann-zvb.de>
Egmont Koblinger <egmont@gmail.com>

Keegan Saunders <keeganwsaunders@gmail.com>
Lucas Werkmeister <mail@lucaswerkmeister.de>
Marcus Huewe <suse-tux@gmx.de>
Michael Kerrisk <mtk.manpages@gmail.com>
Michael Witten <mfwitten@gmail.com>
Seth Troisi <sethtroisi@google.com>
Slavomir Kaslev <kaslevs@vmware.com>
Vincent Lefevre <vincent@vinc17.net>
Wladimir
Mutel <muwlg@gmail.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

tsearch.3

Florian Weimer [Michael Kerrisk]

Document the `twalk_r()` function added in glibc 2.30

New and changed links

twalk_r.3

Michael Kerrisk

New link to `twalk(3)` page

Changes to individual pages

accept.2

Michael Kerrisk

Note that 'addrrlen' is left unchanged in the event of an error

See <http://austingroupbugs.net/view.php?id=836>.

bpf.2

Michael Kerrisk

Update kernel version info for JIT compiler

clone.2

Michael Kerrisk [Jakub Nowak]

`CLONE_CHILD_SETTID` has effect before `clone()` returns *in the child*

`CLONE_CHILD_SETTID` may not have had effect by the time `clone()`

returns in the parent, which could be relevant if the

`CLONE_VM` flag is employed. The relevant kernel code is in

`schedule_tail()`, which is called in `ret_from_fork()`

in the child.

See https://bugzilla.kernel.org/show_bug.cgi?id=203105

execve.2

exec.3

Michael Kerrisk [Dr. Jürgen Saueremann]

Consistently use the term 'pathname' (not 'path')

execve.2

Michael Kerrisk

Note that `stack+environ` size is also limited to 3/4 of `_STK_LIM`

In `fs/exec.c::prepare_arg_pages()`, we have:

```
limit = _STK_LIM / 4 * 3;
limit = min(limit, bprm->rlim_stack.rlim_cur / 4);
```

Michael Kerrisk [Dr. Jürgen Sauermann]
SEE ALSO: refer to `exec(3)` (rather than `execl(3)`)

pipe.2

Michael Kerrisk
Note that 'pipefd' is left unchanged in the event of an error
See <http://austingroupbugs.net/view.php?id=467>.

sched_setaffinity.2

Michael Kerrisk [Brice Goglin]
Correct details of return value of `sched_getaffinity()` syscall

setfsuid.2

Michael Kerrisk
Rewrite for improved
clarity and defer to `setfsuid()` for details
Rewrite for improved clarity and defer to `setfsuid(2)` for the
rationale of the fsGID rather than repeating the same details
in this page.

setfsuid.2

Michael Kerrisk
Rewrite for improved clarity and to hint history more explicitly
The current text reads somewhat clumsily. Rewrite it to introduce
the eUID and fsUID in parallel, and more clearly hint at the
historical rationale for the fsUID, which is detailed lower in
the page.

socketpair.2

Michael Kerrisk
Clarify that 'sv' is left unchanged in the event of an error
See also <http://austingroupbugs.net/view.php?id=483>.

splice.2

Slavomir Kaslev
EAGAIN can occur when called on nonblocking file descriptors

syscalls.2

Michael Kerrisk [Andreas Korb]
Remove crufty text about i386 syscall dispatch table
The removed text long ago ceased to be
accurate. Nowadays, the
dispatch table is autogenerated when building the kernel (via
the kernel makefile, `arch/x86/entry/syscalls/Makefile`).

tee.2

Slavomir Kaslev

EAGAIN can occur when called on nonblocking file descriptors

fopen.3

Elliot Hughes

Explain BSD vs glibc "a+" difference

Where is the initial read position for an "a+" stream?

POSIX leaves this unspecified. Most BSD man pages are silent, and MacOS has the ambiguous "The stream is positioned at the end of the file", not differentiating between reads and writes other than to say that fseek(3) does not affect writes. glibc's documentation explicitly specifies that the initial read position is the beginning of the file.

mallinfo.3

Elliott Hughes

Further discourage use of mallinfo()

The BUGS section already explains why you need to be cautious about using mallinfo,

but given the number of bug reports we see

on Android, it seems not many people are reading that far. Call it out up front.

malloc_trim.3

Carlos O'Donell

Update trimming information

Since glibc 2.8, commit 68631c8eb92, the malloc_trim function has iterated over all arenas and free'd back to the OS all page runs that were free. This allows an application to call malloc_trim to consolidate fragmented chunks and free back any pages it can to potentially reduce RSS usage.

posix_memalign.3

Elliot Hughes

Some functions set errno

True of bionic, glibc, and musl. (I didn't check elsewhere.)

resolver.3

Michael Kerrisk [Wladimir Mutel]

Mention that some functions set 'h_errno'

stdarg.3

Michael Kerrisk [Vincent Lefevre]

Remove the NOTES section describing the ancient varargs macros
stdarg.h is now 30 years old, and gcc long ago (2004)

ceased to

implement `<varargs.h>`. There seems little value in keeping this text.

See https://bugzilla.kernel.org/show_bug.cgi?id=202907

Michael Kerrisk [Egmont Koblinger]

Add a note that `"..."` in function signature means a variadic function

Egmont suggested adding this, because the string `"..."` appears at several other points in the page, but just to indicate that some text is omitted from example code.

`strerror.3`

Jakub Wilk

Don't discuss buffer size for `strerror_l()`

Unlike `strerror_r()`, `strerror_l()` doesn't take buffer length as an argument.

`strtol.3`

`strtoul.3`

Jakub Wilk

SEE ALSO: add `strtoimax(3)`, `strtoumax(3)`

`sysconf.3`

Michael Kerrisk [Hugues Evrard]

Clearly note that `_SC_PAGESIZE` and `_SC_PAGE_SIZE` are synonyms

`tsearch.3`

Florian Weimer

Do not use `const` arguments in `twalk()` callback

The `const` specifier is not

part of the prototype (it only applies

to the implementation), so showing it here confuses the reader.

Michael Kerrisk

SYNOPSIS: add missing definition of `'VISIT'` type

Michael Kerrisk

Reformat `twalk()` and `twalk_r()` prototypes for easier readability

`console_codes.4`

Jakub Wilk

Document that `\e[1;n]` and `\e[2;n]` support 16 colors

Source: `setterm_command()` in `drivers/tty/vt/vt.c`

`elf.5`

Michael Kerrisk [Keegan Saunders]

A data segment does not have `PF_X`

`proc.5`

Michael Witten [Anisse Astier]

Add missing Inode field to /proc/net/unix

hostname.7

Florian Weimer

HOSTALIASES/search path processing is DNS-specific

Other NSS modules do not necessarily honor these settings.

inode.7

Michael Kerrisk

Note that timestamp fields measure time starting at the Epoch

Michael Kerrisk

Timestamp fields are structures that include a nanosecond component

Michael Kerrisk

Add references to execve(2) to describe set-UID/set-GID behaviors

==== Changes in man-pages-5.02 =====

Released: 2019-08-02, Munich

Tomas Skäre <tomas.skare@gmail.com>
Yang Xu <xuyang2018.jy@cn.fujitsu.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

fanotify.7

fanotify_init.2

fanotify_mark.2

Matthew Bobrowski [Amir Goldstein, Jan Kara]

Document FAN_REPORT_FID and directory modification events

vdso.7

Tobias Klauser [Palmer Dabbelt]

Document vDSO for RISC-V

Renamed pages

sysvipc.7

svipc(7) is renamed to sysvipc(7).

The name sysvipc is a bit more natural, and is the name used in /proc/sysvipc.

New and

changed links

svipc.7

Michael Kerrisk

Add old name of sysvipc(7) page as a link

Global changes

Various pages

Michael Kerrisk

Change reference to svipc(7) to sysvipc(7)

Changes to individual pages

pldd.1

G. Branden Robinson [Michael Kerrisk]

Document glibc's unbreakage of tool

After a longstanding breakage, pldd now works again (glibc 2.30).

bpf.2

Michael Kerrisk

Correct kernel version for JIT support on s390

chdir.2

Michael Kerrisk

Add ENOTDIR error for fchdir()

execve.2

Michael Kerrisk [Eugene Syromyatnikov]

Since Linux 5.1, the limit on the #! line is 255 chars (rather than 127)

Shawn Landden [Michael Kerrisk]

Add more detail about Shebangs

Michael Kerrisk

Linux is not alone in ignoring the set-UID and set-GID bits for scripts

mount.2

Michael Kerrisk

ERRORS: Add a couple of EINVAL errors

for MS_MOVE

Michael Kerrisk

SEE ALSO: add chroot(2) and pivot_root(2)

mprotect.2

Mark Wielaard

pkey_mprotect() acts like mprotect() if pkey is set to -1, not 0

mprotect.2

pkey_alloc.2

Mark Wielaard [Florian Weimer]

_GNU_SOURCE is required for the pkey functions.

pivot_root.2

Michael Kerrisk

ERRORS: EINVAL occurs if 'new_root' or its parent has shared propagation

Michael Kerrisk

'new_root' must be a mount point

It appears that 'new_root' may not have needed to be a mount point on ancient kernels, but already in Linux 2.4.5 this changed.

Michael Kerrisk

'put_old' can't be a mount point with MS_SHARED propagation

Michael Kerrisk

SEE ALSO: add mount(2)

poll.2

Michael Kerrisk [Alan Stern]

Note that poll() equivalent code for ppoll() is not quite equivalent

prctl.2

Yang Xu [Cyrill Gorcunov]

Correct some details for PR_SET_TIMERSLACK

setxattr.2

Finn

O'Leary [Michael Kerrisk]

Add ERANGE to 'ERRORS' section

tkill.2

Michael Kerrisk

glibc 2.30 provides a wrapper for tkill()

dlopen.3

Michael Kerrisk

Clarify the rules for symbol resolution in a dlopen'ed object

The existing text wrongly implied that symbol look up first occurred in the object and then in main, and did not mention whether dependencies of main were used for symbol resolution.

Michael Kerrisk

Clarify when an executable's symbols can be used for symbol resolution

The --export-dynamic linker option is not the only way that main's global symbols may end up in the dynamic symbol table and thus be used to satisfy symbol reference in a shared object. A symbol may also be placed into the dynamic symbol table if ld(1) notices a dependency in another object during the static link.

Michael Kerrisk

An object opened with RTLD_LOCAL can be promoted to RTLD_GLOBAL

Michael Kerrisk

Note that symbol use might keep a dclose'd object in memory

Michael Kerrisk

On dclose(), destructors are called when reference count falls to 0

Michael Kerrisk

Make it clear that RTLD_NODELETE also affects global variables

Michael Kerrisk

Clarify that constructors are called only when library is first loaded

exec.3

Matthew Kenigsberg

Explain function groupings

I've found the exec man page quite difficult to read when trying to find the behavior for a specific function. Since the names of the functions are inline and the order of the descriptions isn't clear, it's hard to find which paragraphs apply to each function. I thought it would be much easier to read if the grouping based on letters is stated.

getutent.3

Michael Kerrisk [Thorsten Glaser]

Fix missing include file in EXAMPLE

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=932382>

on_exit.3

Michael Kerrisk [Sami Kerola]

Stack variables may be out of scope when exit handler is invoked

strcat.3

Michael Kerrisk [Eric Sanchis]

Fix off-by-one error in example code

cpuid.4

Michael Kerrisk

SEE ALSO: add cpuid(1)

elf.5

Michael Kerrisk

SEE ALSO: add ld.so(8)

proc.5

Michael Kerrisk

Correct description of /proc/PID/status 'ShdPnd' and 'SigPnd' fields
These fields are signal masks, not counters.

Michael Kerrisk

Clarify that various mask fields in /proc/PID/status are in hexadecimal

capabilities.7

Michael Kerrisk

Add a note about using strace on binaries that have capabilities

Michael Kerrisk

Add pivot_root(2) to CAP_SYS_ADMIN list

Michael Kerrisk

CAP_FOWNER also allows modifying user xattrs on sticky directories

cgroup_namespaces.7

Michael Kerrisk

Some wording fixes to improve

clarity

Michael Kerrisk

In the example shell session, give second shell a different prompt

credentials.7

Michael Kerrisk

Note that /proc/PID/status shows a process's credentials

Michael Kerrisk

SEE ALSO: add tcgetsid(3)

fanotify.7

Matthew Bobrowski

Reword FAN_REPORT_FID data structure inclusion semantics

Michael Kerrisk

Clarify logic in ESTALE check

Michael Kerrisk

Reorder text in EXAMPLE

Michael Kerrisk

Reformat program output to fit in 80 columns

mount_namespaces.7

Michael Kerrisk

Clarify implications for other NS if mount point is removed in one NS

If a mount point is deleted or renamed or removed in one mount

namespace, this will cause an object that is mounted at that

location in another mount namespace to be unmounted (as verified

by experiment). This was implied by the existing text, but it is

better to make this detail

explicit.

Michael Kerrisk

SEE ALSO: add pivot_root(2), pivot_root(8)

namespaces.7

Michael Kerrisk

Note initial values of hostname and domainname in a new UTS namespace

sched.7

Michael Kerrisk

SEE ALSO: add pthread_getschedparam(3)

signal.7

Michal Sekletar [Oleg Nesterov, Michael Kerrisk]

Clarify that signinfo_t isn't changed on coalescing

Michael Kerrisk

Various fields in /proc/PID/status show signal-related information

Michael Kerrisk

Add subsection on queuing and delivery semantics for standard signals

socket.7

Michael Kerrisk

select()/poll()/epoll honor SO_RCVLOWAT since Linux 2.6.28

unix.7

Michael Kerrisk

Note SCM_RIGHTS interaction with RLIMIT_NOFILE

If the file descriptors received in SCM_RIGHTS would cause the process to its exceed RLIMIT_NOFILE limit, the excess FDs are discarded.

user_namespaces.7

Michael Kerrisk

Describe the effect

of file-related capabilities inside user namespaces

Michael Kerrisk

Describe how kernel treats UIDs/GIDs when a process accesses files

vdso.7

Tobias Klauser

Mention removal of Blackfin port in Linux 4.17

ld.so.8

Michael Kerrisk [Matthias Hertel]

Note some further details of secure-execution mode

Note some further details of the treatment of environment variables in secure execution mode. In particular (as noted by Matthias Hertel), note that ignored environment variables are also stripped from the environment. Furthermore, there are some other variables, not used by the dynamic linker itself, that are also treated in this way (see the glibc source file sysdeps/generic/unsecvars.h).

Simone Piccardi <piccardi@truelite.it>

Vincent Lefevre <vincent@vinc17.net>

Yang Xu <xuyang2018.jy@cn.fujitsu.com>

Apologies if I missed anyone!

New and rewritten pages

pidfd_open.2

Michael Kerrisk [Christian Brauner, Florian Weimer,
Daniel Colascione]

New page documenting pidfd_open(2)

pidfd_send_signal.2

Michael Kerrisk [Florian Weimer, Christian Brauner]

New page documenting pidfd_send_signal(2)

pivot_root.2

Michael Kerrisk [Eric W. Biederman, Reid Priedhorsky, Philipp Wendler]

This page has been completely rewritten, adding a lot of missing details (including the use of pivot_root(".", ".")) and an example program. In addition, the text prevaricating on whether or not pivot_root() might change the root and current working directories has been eliminated, and replaced with a simple description of the behavior of the system call, which has not changed for 19 years, and will not change in the future. Many longstanding errors in the old version of the page have also been corrected.

ipc_namespaces.7

Michael Kerrisk

New page with content migrated from namespaces(7)

uts_namespaces.7

Michael Kerrisk

New page with content migrated from namespaces(7)

Newly documented interfaces in existing pages

clone.2

Christian Brauner, Michael Kerrisk

Document CLONE_PIDFD

Add an entry for CLONE_PIDFD. This flag is available starting with kernel 5.2. If specified, a process file descriptor ("pidfd") referring to the child process will be returned in

the ptid argument.

fanotify_mark.2

Jakub Wilk

Document FAN_MOVE_SELF

ptrace.2

Dmitry V. Levin [Michael Kerrisk]

Document PTRACE_GET_SYSCALL_INFO

regex.3

Rob Landley

Document REG_STARTEND

New and changed links

res_nclose.3

Michael Kerrisk

Add NEW link to resolver.3

Global changes

Various pages

Michael Kerrisk

SEE ALSO: correct list order

Various pages

Michael Kerrisk

Remove section number from references to function in its own page

Various pages

Michael Kerrisk

ERRORS: correct alphabetical order

Changes to individual pages

localedef.1

Marko Myllynen

Describe recently added options

Describe few recently added options (present in glibc-2.29).

clone.2

Michael Kerrisk

SEE ALSO: add pidfd_open(2)

copy_file_range.2

Amir Goldstein [Dave Chinner]

Kernel v5.3 updates

fanotify_mark.2

Jakub Wilk

Add kernel version numbers for some FAN_* constants

getdomainname.2

Michael Kerrisk

Add mention of UTS namespaces

gethostname.2

Michael Kerrisk [Jakub Wilk]

Mention UTS namespaces

io_submit.2

Matti Moell [Matti Möll]

Fix kernel version numbers for 'aio_rw_flags' flags

kill.2

Michael Kerrisk

SEE ALSO: add pidfd_send_signal(2)

mmap.2

Nikola Forró

Fix EINVAL conditions

Since introduction of MAP_SHARED_VALIDATE, in case flags contain both

MAP_PRIVATE and MAP_SHARED, mmap() doesn't fail with EINVAL, it succeeds.

The reason for that is that MAP_SHARED_VALIDATE is in fact equal to MAP_PRIVATE | MAP_SHARED.

mount.2

Michael Kerrisk [Reid Priedhorsky]

Describe the concept of "parent mounts"

Michael Kerrisk

NOTES: add subsection heading for /proc/[pid]/{mounts,mountinfo}

Michael Kerrisk

Rework the text on mount namespaces a little

Eliminate the term "Per-process namespaces" and add a reference to mount_namespaces(7).

move_pages.2

Yang Xu [Michael Kerrisk]

Mark E2BIG as deprecated

E2BIG was removed in 2.6.29, we should mark it as deprecated.

perf_event_open.2

Michael Kerrisk [Alexey Budankov]

SEE ALSO: add Documentation/admin-guide/perf-security.rst

prctl.2

Michael Kerrisk

Clarify that PR_GET_SPECULATION_CTRL returns value as function result

Michael Kerrisk

Clarify

that PR_MCE_KILL_GET returns value via function result

Michael Kerrisk

Clarify that PR_GET_FP_MODE returns value as function result

Michael Kerrisk

RETURN VALUE: add some missing entries

Note success return for PR_GET_SPECULATION_CTRL and PR_GET_FP_MODE.

rt_sigqueueinfo.2

Michael Kerrisk

Note that 'si_code' can't be specified as SI_KERNEL

Michael Kerrisk

The rules for 'si_code' don't apply when sending a signal to oneself

The restriction on what values may be specified in 'si_code'

apply only when sending a signal to a process other than the caller itself.

Michael Kerrisk

Rename 'uinfo' argument to 'info'

This is more consistent with the naming in other pages

that refer to a 'siginfo_t' structure.

Michael Kerrisk

SEE ALSO: add pidfd_send_signal(2)

sched_setaffinity.2

Michael Kerrisk

RETURN VALUE: sched_getaffinity() syscall differs

from the wrapper

setns.2

Mike Frysinger

Fix CLONE_NEWNS restriction info

sigaction.2

Michael Kerrisk

SEE ALSO: add pidfd_send_signal(2)

signalfd.2

Andrew Clayton, Michael Kerrisk

Note about interactions with epoll & fork

statx.2

Michael Kerrisk [Simone Piccardi]

Clarify details of a case where an invalid 'mask' value may be rejected

syscall.2

Shawn Anastasio

Add information for powerpc64

Michael Kerrisk [Adam Borowski, Florin Blanaru]

Update name of syscall instruction for riscv

syscalls.2

Michael Kerrisk

Add fsconfig(), fsmount(), fsopen(), fspick(), move_mount(), open_tree()

Michael Kerrisk [(), Michael(), Kerrisk(),]

Add new syscalls in 5.1

Add io_uring_enter(), io_uring_register(), io_uring_setup(), and pidfd_send_signal().

Michael Kerrisk

Add clone3() and pidfd_open()

uname.2

Michael Kerrisk

Replace reference to namespaces(7)

with reference to uts_namespaces(7)

errno.3

Rasmus Villemoes

Add some comments on EAGAIN/EWOULDBLOCK and EDEADLK/EDEADLOCK

fexecve.3

Michael Kerrisk [Simone Piccardi]

ENOSYS occurs only if the kernel provides no execveat() syscall

Michael Kerrisk [Simone Piccardi]

ERRORS: add ENOENT

getauxval.3

Raphael Moreira Zinsly

Add new cache geometry entries

printf.3

Vincent Lefevre

Add detail on the first digit with the %e format

pthread_setcancelstate.3

pthreads.7

signal-safety.7

Carlos O'Donell

Describe issues with cancellation points in signal handlers

strtok.3

Michael Kerrisk [eponymous alias]

Correct description of use of 'saveptr' argument in strtok_r()

Michael Kerrisk [eponymous alias]

The caller should not modify 'saveptr' between strtok_r() calls

Michael Kerrisk

Add portability note for strtok_r() '*saveptr' value

On some implementations, '*saveptr' must be

NULL on first call

to strtok_r().

smartpqi.4

Murthy Bhat [Don Brace, Kevin Barnett, Matt Perricone, Scott Benesh]

Add sysfs entries

Gilbert Wu [Don Brace, Kevin Barnett, Matt Perricone, Scott Benesh]

Add module param expose ld first

Dave Carroll [Don Brace, Kevin Barnett, Matt Perricone, Scott Benesh]

Add module param to hide vsep

core.5

Paul Wise

Explain the new situation with argument splitting

Things changed in Linux v5.3-rc3 commit 315c69261dd3 from
splitting after template expansion to splitting beforehand.

resolv.conf.5

Nikola Forró

Update information about search list

Since glibc 2.26, the number of domains in the search list is
no longer limited.

man-pages.7

Michael Kerrisk

Relocate and enhance the text on semantic newlines

Michael Kerrisk [Paul Wise]

Paragraphs should not be separated by blank lines

mount_namespaces.7

Michael

Kerrisk

Explain how a namespace's mount point list is initialized

Provide a more detailed explanation of the initialization of the mount point list in a new mount namespace.

Michael Kerrisk [Eric W. Biederman]

Clarify description of "less privileged" mount namespaces

Michael Kerrisk

SEE ALSO: refer to example in pivot_root(2)

Michael Kerrisk [Eric W. Biederman]

It may be desirable to disable propagation after creating a namespace

After creating a new mount namespace, it may be desirable to disable mount propagation. Give the reader a more explicit hint about this.

mq_overview.7

sysvipc.7

Michael Kerrisk

Adjust references to namespaces(7) to ipc_namespaces(7)

namespaces.7

Michael Kerrisk

Remove content migrated to new ipc_namespaces(7) page

Michael Kerrisk

Remove content migrated to uts_namespaces(7)

Michael Kerrisk

Include manual

page references in the summary table of namespace types

Make the page more compact by removing the stub subsections that list the manual pages for the namespace types. And while we're here, add an explanation of the table columns.

operator.7

Michael Kerrisk [Rick Stanley]

Prefix and postfix ++/-- have different precedences

Harbison and Steele also agree on this.

signal.7

Michael Kerrisk

Enhance the text on process-directed and thread-directed signals

clone(2) has a good description of these concepts; borrow from it liberally.

Michael Kerrisk

SEE ALSO: add pidfd_send_signal(2)

user_namespaces.7

Michael Kerrisk

Improve explanation of meaning of ownership of nonuser namespaces

==== Changes in man-pages-5.04 =====

Released: 2019-11-19, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Andrew Price <anprice@redhat.com>
Christian Brauner <christian.brauner@ubuntu.com>
Florian Weimer <fweimer@redhat.com>
Jakub Wilk <jwilk@jwilk.net>
Jan Kara <jack@suse.cz>
Jann Horn <jannah@google.com>
Kenigbolo Meya Stephen <kenigbol@ut.ee>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Mikael Magnusson <mikachu@gmail.com>
Robert Edmonds <edmonds@debian.org>
Silviu Popescu <silviupopescu1990@gmail.com>
Torin Carey <torin@tcarey.uk>
Witold Baryluk <witold.baryluk@gmail.com>
Yang Xu <xuyang2018.jy@cn.fujitsu.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

clone.2

Michael Kerrisk [Christian Brauner, Jakub Wilk]
Document clone3()

wait.2

Michael Kerrisk
Add P_PIDFD for waiting on a child referred to by a PID file descriptor

bpf-helpers.7

Michael Kerrisk
Refresh against kernel v5.4-rc7

New and changed links

clone3.2

Michael Kerrisk

New link to clone(2)

Changes to individual pages

clone.2

Michael Kerrisk

Rename arguments for consistency with clone3()

Make the names of the clone() arguments the same as the fields in the clone3() 'args' struct:

```
ctid    ==> child_pid
ptid    ==> parent_tid
newtls  ==> tld
child_stack ==> stack
```

Michael Kerrisk

Consistently order paragraphs for CLONE_NEW* flags

Sometimes the descriptions of these flags mentioned the corresponding section 7 namespace manual page and then the required capabilities, and sometimes the order was the reverse. Make it consistent.

Michael Kerrisk [Christian Brauner, Jann Horn]

EXAMPLE: Allocate child's

stack using mmap(2) rather than malloc(3)

Christian Brauner suggested mmap(MAP_STACK), rather than malloc(), as the canonical way of allocating a stack for the child of clone(), and Jann Horn noted some reasons why (MAP_STACK exists elsewhere, and mmap() returns a page-aligned block of memory, which is useful if we want to set up a guard page at the end of the stack).

Michael Kerrisk [Christian Brauner]

Tidy up the description of CLONE_DETACHED

The obsolete CLONE_DETACHED flag has never been properly documented, but now the discussion CLONE_PIDFD also requires mention of CLONE_DETACHED. So, properly document CLONE_DETACHED, and mention its interactions with CLONE_PIDFD.

Michael Kerrisk [Christian Brauner]

Give the introductory paragraph a new coat of paint

Change the text in the introductory paragraph (which was written

20 years ago) to reflect the fact that clone*() does more things nowadays.

Michael Kerrisk

Remove wording that suggests CLONE_NEW* flags are for containers

These flags are used for implementing many other interesting things by now.

Michael Kerrisk

Remove various details that are already covered in namespaces pages

Remove details of UTS, IPC, and network namespaces that are already covered in the corresponding namespaces pages in section 7.

clone.2

proc.5

Michael Kerrisk

Adjust references to namespaces(7)

Adjust references to namespaces(7) to be references to pages describing specific namespace types.

fallocate.2

Andrew Price

Add gfs2 to the list of punch hole-capable filesystems

ioctl_iflags.2

Michael Kerrisk [Robert Edmonds]

Emphasize that FS_IOC_GETFLAGS and FS_IOC_SETFLAGS argument is 'int *'

ioctl_list.2

Michael Kerrisk

Add reference to ioctl(2) SEE ALSO section

The referenced section lists various pages that document ioctls.

mmap.2

Michael Kerrisk

Note that MAP_STACK exists on some other systems

Michael Kerrisk

Some rewording of the description of MAP_STACK

Reword a little to allow for the fact that there are now *two* reasons to consider using this flag.

pidfd_open.2

Michael Kerrisk

Note the waitid() use case for PID file descriptors

Michael Kerrisk

Add a subsection header "Use cases for PID file descriptors"

Michael Kerrisk

Make it a little more explicit the CLONE_PIDFD returns a PID FD

pivot_root.2

Michael Kerrisk

EXAMPLE: allocate stack using mmap() MAP_STACK rather than malloc()

quotactl.2

Yang Xu [Jan Kara]

Add some details about Q_QUOTAON

seccomp.2

cgroups.7

Michael Kerrisk

Switch to "considerate language"

select.2

Michael Kerrisk

POLLIN_SET/POLLOUT_SET/POLLEX_SET

are now defined in terms of EPOLL*

Since kernel commit a9a08845e9acbd224e4ee466f5c1275ed50054e8, the equivalence between select() and poll()/epoll is defined in terms of the EPOLL* constants, rather than the POLL* constants.

wait.2

Michael Kerrisk

waitid() can be used to wait on children in same process group as caller

Since Linux 5.4, idtype == P_PGID && id == 0 can be used to wait on children in same process group as caller.

Michael Kerrisk

Clarify semantics of waitpid(0, ...)

As noted in kernel commit 821cc7b0b205c0df64cce59aacc330af251fa8f7, threads create an ambiguity: what if the calling process's PGID is changed by another thread while waitpid(0, ...) is blocked?

So, clarify that waitpid(0, ...) means wait for children whose PGID matches the caller's PGID at the time of the call to waitpid().

getauxval.3

Michael Kerrisk [Witold Baryluk]

Clarify that AT_BASE_PLATFORM and AT_EXECFN return pointers to strings

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=942207>

resolv.conf.5

Florian Weimer

Attempt clarify domain/search interaction

The domain directive is historic at this point; it should not be used.

netdevice.7

Michael Kerrisk [Silviu Popescu]

Small wording fix in description of SIOCGIFCONF

SIOCGIFCONF returns "network layer" addresses (not "transport layer").

uts_namespaces.7

Michael Kerrisk

Add a little more detail on scope of UTS namespaces

===== Changes in man-pages-5.05 =====

Released: 2020-02-09, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Yang Xu <xuyang2018.jy@cn.fujitsu.com>
Yu Jian Wu <yujian.wu1@gmail.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

clone.2

Adrian Reber [Christian Brauner, Michael Kerrisk]

Add clone3() set_tid information

Michael Kerrisk

Document CLONE_CLEAR_SIGHAND

fcntl.2

Joel Fernandes [Michael Kerrisk]

Update manpage with new memfd F_SEAL_FUTURE_WRITE seal

memfd_create.2

Joel Fernandes

Update manpage with new memfd F_SEAL_FUTURE_WRITE seal

loop.4

Yang Xu

Document LOOP_SET_BLOCK_SIZE

Yang Xu

Document LOOP_SET_DIRECT_IO

proc.5

Michael Kerrisk

Document /proc/sys/vm/unprivileged_userfaultfd

Changes to individual pages

capget.2

Michael Kerrisk [Yang Xu]

Add missing details in EPERM error for setting inheritable capabilities

clone.2

Michael Kerrisk

Note that CLONE_THREAD causes similar behavior to CLONE_PARENT

The introductory paragraphs note that "the calling process" is normally synonymous with the "the parent process", except in the case of CLONE_PARENT. The same is also true of CLONE_THREAD.

Christian Brauner [Michael Kerrisk]

Mention that CLONE_PARENT is off-limits for inits

Michael Kerrisk [Colin Ian King]

Add old EINVAL error for AArch64

Michael Kerrisk

ERRORS: add EINVAL for use of CLONE_PARENT by an init process

futex.2

Ponnuvel Palaniyappan

Fix

a bug in the example

listen.2

Michael Kerrisk [Peter Gajdos]

The 'somaxconn' default value has increased to 4096

modify_ldt.2

set_thread_area.2

Andy Lutomirski [Markus T Metzger]

Fix type of base_addr

move_pages.2

John Hubbard [Michal Hocko]

Remove ENOENT from the list of possible return values

open.2

Adam Borowski

No need for /proc to make an O_TMPFILE file permanent

In the example snippet, we already have the fd, thus there's no need to refer to the file by name. And, /proc/ might be not mounted or not accessible.

Michael Kerrisk [Joseph C. Sible]

In O_TMPFILE example, describe alternative linkat() call

This was already shown in an earlier version of the page, but Adam Borowski's patch replaced it with an alternative.

Probably, it is better to show both possibilities.

perf_event_open.2

Daniel Colascione

Mention EINTR for perf_event_open

ptrace.2

Denys Vlasenko

PTTRACE_EVENT_STOP does not always report SIGTRAP

quotactl.2

Michael Kerrisk

Don't show numeric values of Q_XQUOTAON XFS_QUOTA_?DQ_* flags

The programmer should not need to care about the numeric values,
and their inclusion is verbosity.

Yang Xu [Michael Kerrisk]

Add EINVAL error of Q_XQUOTARM operation

stime.2

Michael Kerrisk

Note that stime() is deprecated

syscall.2

Petr Vorel [Cyril Hrubis]

Update feature test macro requirements

sysctl.2

Michael Kerrisk

This system call was removed in Linux 5.5; adjust the page accordingly

userfaultfd.2

Yang Xu [Michael Kerrisk]

Add EPERM error

cmsg.3

Rich Felker

Clarify alignment issues and correct method of accessing CMSG_DATA()

From an email by Rich Felker:

It came to my attention while reviewing possible breakage with
move to 64-bit time_t that some applications

are dereferencing

data in socket control messages (particularly SCM_TIMESTAMP*)
in-place as the message type, rather than memcopy'ing it to
appropriate storage. This necessarily does not work and is not
supportable if the message contains data with greater alignment
requirement than the header. In particular, on 32-bit archs,
cmsghdr has size 12 and alignment 4, but struct timeval and
timespec may have alignment requirement 8.

Michael Kerrisk [Rich Felker]

Modify CMSG_DATA() example to use memcpy()

See previous patch to this page for rationale

exit.3

Benjamin Peterson [Mike Frylinger]

Use hex for the status mask

ftime.3

Michael Kerrisk

Note that this function is deprecated

getpt.3

Samuel Thibault

Remove mention of O_NOCTTY

The glibc implementation of getpt has actually never been setting

malloc.3

Vegard Nossum

Clarify realloc() return value

Petr Vorel

Remove duplicate _GNU_SOURCE

console_codes.4

Adam Borowski

Document `\e[90m to 97, 100 to 107`

Adam Borowski

`\e[21m` is now underline

Since 65d9982d7e523a1a8e7c9af012da0d166f72fc56 (4.17), it follows xterm rather than common sense and consistency, being the only command 1..9 where N+20 doesn't undo what N did. As libvte 0.51.90 got changed the same way, this behaviour will probably stay.

Adam Borowski

Update `\e[38m` and `\e[48m`

Supported since cec5b2a97a11ade56a701e83044d0a2a984c67b4 (3.16).

cgroups.7

Michael Kerrisk

The v2 freezer controller was added in Linux 5.2

Michael Kerrisk

Split discussion of cgroups.events file and v2 release notification

In preparation for adding a description of the "frozen" key.

Michael Kerrisk

Describe the cgroup.events "frozen" key

Michael Kerrisk

Improve the discussion of the advantages of v2 release notification

inotify.7

Nick Shipp

Merge late perror() into fprintf() in example code

netlink.7

Antonin Décimo

Fix alignment issue in example

packet.7

kevin sztern [Michael Kerrisk]

Add missing tpacket_auxdata field (tp_vlan_tpid)

rtnetlink.7

Antonin Décimo

ifa_index is an unsigned int

tcp.7

Michael Kerrisk

tcp_low_latency is ignored since Linux 4.14

unix.7

Michael Kerrisk

The PID sent with SCM_CREDENTIALS must match an existing process

vsock.7

Mikhail Golubev [Michael Kerrisk]

Add missing structure element

The structure 'struct sockaddr_vm' has additional element
'unsigned char svm_zero[]' since version v3.9-rc1.

ldconfig.8

DJ Delorie

Document file filter and symlink pattern expectations

==== Changes in man-pages-5.06 =====

Released: 2020-04-11, Munich

Walter Harms <wharms@bfs.de>
Zack Weinberg <zackw@panix.com>

Apologies if I missed anyone!

New and rewritten pages

openat2.2

Aleksa Sarai [Michael Kerrisk]

Document new openat2(2) syscall

pidfd_getfd.2

Michael Kerrisk [Christian Brauner]

New manual page documenting the pidfd_getfd() system call

select.2

Michael Kerrisk

Rewrite DESCRIPTION

Improve structure and readability, at the same time incorporating text and details that were formerly in select_tut(2). Also move a few details in other parts of the page into DESCRIPTION.

Michael Kerrisk

Consolidate the discussion of pselect into a headed subsection

Michael Kerrisk

Consolidate historical glibc pselect() details under one subhead

Michael Kerrisk

Consolidate info on usleep() emulation in one place

Michael Kerrisk

Place the discussion of the self-pipe technique in a headed subsection

Michael Kerrisk

Note that FD_SET() and FD_CLR() do not return errors

Michael Kerrisk

Remove details of historical #include requirements

The POSIX situation has been the norm for a long time now, and including ancient details overcomplicates the page.

Michael Kerrisk

Remove some ancient information about pre-POSIX types for 'timeout'

select_tut.2

Michael Kerrisk

Eliminate duplication of info across select_tut.2 and select2

There was a lot of a duplication of info in SYNOPSIS, DESCRIPTION RETURN VALUE, and SEE ALSO. Move all of the info to one place: the select(2) page.

sysvipc.7

Michael Kerrisk

Rewrite this page as just a summary of the System V IPC APIs

All of the other details in this page have by now been moved into the relevant *ctl(2) pages.

time_namespaces.7

Michael Kerrisk [Andrei Vagin, Dmitry Safonov, Thomas Gleixner]

New page documenting time namespaces

Newly documented interfaces in existing pages

arch_prctl.2

Keno Fischer

Add ARCH_SET_CPUID subcommand

clock_getres.2

Benjamin Peterson

Document CLOCK_TAI

Michael Kerrisk

Add CLOCK_REALTIME_ALARM and CLOCK_BOOTTIME_ALARM

prctl.2

Mike Christie [Michal Hocko, Michael Kerrisk, Bart Van Assche]

Document PR_SETIO_FLUSHER/GET_IO_FLUSHER

setns.2

Michael Kerrisk

Document CLONE_NEWTIME

statx.2

Eric Biggers

Document STATX_ATTR_VERITY

unshare.2

Michael Kerrisk

Document CLONE_NEWTIME

socket.7

Ricardo Biehl Pasquali, Michael Kerrisk

Add description of SO_SELECT_ERR_QUEUE

Alejandro Colomar [Michael Kerrisk]

Document SO_TIMESTAMPNS

Global changes

Various pages

Michael Kerrisk

Remove a few mentions of the ancient "Linux libc"

Various pages

Michael Kerrisk

Global formatting fix: disfavor nonstandard .TP indents

In many cases, these don't improve readability, and (when stacked)

they sometimes have the side effect of sometimes forcing text to be justified within a narrow column range.

Various pages

Michael Kerrisk [Christian Brauner]

Fix clumsy wording around "nonnegative file descriptors"

Changes to individual pages

clock_getres.2

Helge Deller [Michael Kerrisk]

Consecutive calls for CLOCK_MONOTONIC may return same value

Consecutive calls to clock_gettime(CLOCK_MONOTONIC) are guaranteed to return MONOTONIC values, which means that they either return the *SAME* time value like the last call, or a later (higher) time value.

Eric Rannaud

Dynamic POSIX clock devices can return other errors

Michael Kerrisk

Improve description of CPU-time clocks

Michael Kerrisk

Add an example program

Michael Kerrisk

CLOCK_REALTIME_COARSE is not settable

Michael Kerrisk

Note that CPU-time clocks are not settable.

Explicitly note that CLOCK_PROCESS_CPUTIME_ID and CLOCK_PROCESS_CPUTIME_ID are not settable.

Michael Kerrisk

Clarify that CLOCK_TAI is nonsettable

Michael Kerrisk

Clarify that CLOCK_MONOTONIC is system-wide

Michael

Kerrisk

ERRORS: add EINVAL for attempt to set a nonsettable clock

Michael Kerrisk

Move text in BUGS to NOTES

The fact that CLOCK_PROCESS_CPUTIME_ID and CLOCK_PROCESS_CPUTIME_ID are not settable isn't a bug, since POSIX does allow the possibility that these clocks are not settable.

Michael Kerrisk

SEE ALSO: add time_namespaces(7)

clock_nanosleep.2

Michael Kerrisk

clock_nanosleep() can also sleep against CLOCK_TAI

Michael Kerrisk

clock_nanosleep() also supports CLOCK_BOOTTIME

Presumably (and from a quick glance at the source code)

since Linux 2.6.39, when CLOCK_BOOTTIME was introduced.

clock_nanosleep.2

timer_create.2

timerfd_create.2

Michael Kerrisk

Add various missing errors

Mostly verified by testing and reading the code.

There is unfortunately quite a bit of inconsistency across API~s:

clock_gettime clock_settime clock_nanosleep timer_create timerfd_create

CLOCK_BOOTTIME	y	n (EINVAL)	y	y	y	
CLOCK_BOOTTIME_ALARM	y	n (EINVAL)	y [1]	y [1]	y [1]	
CLOCK_MONOTONIC	y	n (EINVAL)	y	y	y	
CLOCK_MONOTONIC_COARSE	y	n (EINVAL)	n (ENOTSUP)	n (ENOTSUP)	n (EINVAL)	
CLOCK_MONOTONIC_RAW	y	n (EINVAL)	n (ENOTSUP)	n (ENOTSUP)	n (EINVAL)	
CLOCK_REALTIME	y	y	y	y	y	
CLOCK_REALTIME_ALARM	y	n (EINVAL)	y [1]	y [1]	y [1]	
CLOCK_REALTIME_COARSE	y	n (EINVAL)	n (ENOTSUP)	n (ENOTSUP)	n (EINVAL)	
CLOCK_TAI	y	n (EINVAL)	y	y	n (EINVAL)	
CLOCK_PROCESS_CPUTIME_ID						
y	n (EINVAL)	y	y	n (EINVAL)		
CLOCK_THREAD_CPUTIME_ID	y	n (EINVAL)	n (EINVAL [2])	y	n (EINVAL)	
pthread_getcpuclockid()	y	n (EINVAL)	y	y	n (EINVAL)	

[1] The caller must have CAP_WAKE_ALARM, or the error EPERM results.

[2] This error is generated in the glibc wrapper.

connect.2

Michael Kerrisk [Eric Dumazet]

Update the details on AF_UNSPEC

Update the details on AF_UNSPEC and circumstances in which socket can be reconnected.

dup.2

Michael Kerrisk

SEE ALSO: add pidfd_getfd(2)

epoll_ctl.2

Michael Kerrisk

Various minor additions and clarifications

epoll_wait.2

Michael Kerrisk

A few minor additions and rewrites

execve.2

Michael Kerrisk

Add a subhead for the discussion of effect on process attributes

Michael Kerrisk

Explicitly note

that `argv[argc] == NULL` in the new program

Michael Kerrisk

ERRORS: ENOENT does not occur for missing shared libraries

See http://sourceware.org/bugzilla/show_bug.cgi?id=12241.

_exit.2

Michael Kerrisk

Clarify that raw `_exit()` system call terminates only the calling thread

inotify_add_watch.2

Michael Kerrisk

EXAMPLE: add reference to example in `inotify(7)`

io_submit.2

Julia Suvorova

Add `IOCB_CMD_POLL` opcode

lseek.2

Michael Kerrisk [Matthew Wilcox]

ERRORS: ENXIO can also occur `SEEK_DATA` in middle of hole at end of file

madvise.2

Michael Kerrisk [Andrea Arcangeli]

Incorporate some (ancient) comments about `MADV_HUGEPAGE`

Back in 2011, a mail from Andrea Arcangeli noted some details

that I never got round to incorporating into the manual page.

mmap.2

Michael Kerrisk

Add a subhead for the 'flags' argument

Michael Kerrisk

Move some text hidden at the end of

DESCRIPTION to NOTES

msgctl.2

Michael Kerrisk

Add information on permission bits (based on `sysvipc(7)` text)

Michael Kerrisk

Copy information on 'msqid_ds' fields from sysvipc(7)

open.2

Michael Kerrisk

Clarify that O_NOFOLLOW is relevant (only) for basename of 'pathname'

Aleksa Sarai

Add references to new openat2(2) page

Michael Kerrisk

Note EINVAL error for invalid character in basename of 'pathname'

pidfd_open.2

Michael Kerrisk

Mention pidfd_getfd(2)

poll.2

Michael Kerrisk

Add an example program

Michael Kerrisk

Mention epoll(7) in the introductory paragraph

Michael Kerrisk

Improve description of EFAULT error

Michael Kerrisk

Fix description of ENOMEM error

select_tut.2

Michael Kerrisk

Adjust header file includes in example

Employ <sys/select.h>, rather than the historical header files.

semctl.2

Michael Kerrisk

Copy information

on 'semid_ds' fields from sysvipc(7)

Michael Kerrisk

Add a reference to the example in shmop(2)

Michael Kerrisk

Add information on permission bits (based on sysvipc(7) text)

semget.2

Michael Kerrisk

EXAMPLE: add an example program

semop.2

Michael Kerrisk

Add a reference to the semop(2) example in shmop(2)

shmctl.2

Michael Kerrisk

Add information on permission bits (based on sysvipc(7) text)

Michael Kerrisk

Note that execute permission is not needed for shmat() SHM_EXEC

Michael Kerrisk

Copy information on 'shmid_ds' fields from sysvipc(7)

Michael Kerrisk

Some small improvements to the description of the 'shmid_ds' structure

shmget.2

Michael Kerrisk

Add a reference to the example in shmop(2)

shmop.2

Michael Kerrisk

EXAMPLE: add a pair of example programs

Add example programs demonstrating usage of shmget(2), shmat(2),
semget(2), semctl(2),

and semop(2).

sigaction.2

signal.7

Zack Weinberg

Document kernel bugs in delivery of signals from CPU exceptions

stat.2

Michael Kerrisk

Clarify definitions of timestamp fields

In particular, make it clear that atime and mtime relate to the
file *data*.

syscalls.2

Michael Kerrisk

Add new Linux 5.6 system calls

Michael Kerrisk

Note that the 5.x series followed 4.20

timer_create.2

Michael Kerrisk

timer_create(2) also supports CLOCK_TAI

Michael Kerrisk

Mention clock_getres(2) for further details on the various clocks

timerfd_create.2

Michael Kerrisk [Thomas Gleixner]

Note a case where timerfd_settime() can fail with ECANCELED

Michael Kerrisk [devi R.K, Thomas Gleixner]

Negative changes to CLOCK_REALTIME may cause read() to return 0

Michael Kerrisk

Rework text for EINVAL for invalid clock ID

Michael Kerrisk

Refer reader to clock_getres(2) for further details on the clocks

unshare.2

Michael Kerrisk

Add CLONE_NEWCGROUP and CLONE_NEWTIME to example program

exit.3

Michael Kerrisk [Walter Harms]

Small improvement to the discussion of 'status' argument

ftok.3

Michael Kerrisk

EXAMPLE: add a reference to the example in semget(2)

getifaddrs.3

Michael Kerrisk [Michael Galassi]

EXAMPLE: remove unneeded loop variable

nl_langinfo.3

Eugene Syromyatnikov

Document era-related locale elements

Eugene Syromyatnikov

Add information about AM/PM time format locale elements

Eugene Syromyatnikov

Mention the respective strftime(3) conversion specifications

sem_init.3

Michael Kerrisk

Add references to example code in shm_open(3) and sem_wait(3)

sem_post.3

Michael Kerrisk

Add a reference to code example code in shm_open(3)

shm_open.3

Michael Kerrisk

EXAMPLE: add some example programs

strcmp.3

Michael Kerrisk

Add an example program

Michael Kerrisk [Andrew Micallef, Walter Harms]

Rework text describing return value to be clearer

Michael Kerrisk

Note that the comparison is done using unsigned char

Michael Kerrisk

SEE ALSO: add ascii(7)

strftime.3

Eugene Syromyatnikov [Michael Kerrisk]

Refer to the relevant nl_langinfo(3) items

Eugene Syromyatnikov

Expand %E and %O description

Eugene Syromyatnikov

Consistently document fall-back format string

proc.5

Mike Frysinger

Clarify /proc/[pid]/cmdline mutability

cgroups.7

Michael Kerrisk

Update list of cgroups v2 controllers

Update the list of cgroups v2 controllers (several controllers were missing).

Michael Kerrisk

Add a subsection on cgroup v2 mount options and include 'nsdelegate'

Michael Kerrisk

Document the cgroups v2 'memory_localevents' mount option

Michael Kerrisk

SEE ALSO: add Documentation/admin-guide/cgroup-v2.rst

namespaces.7

Michael Kerrisk

Add time namespaces information

Michael Kerrisk

Eliminate some superfluous info from display of /proc/PID/ns links

path_resolution.7

Aleksa Sarai

Update to mention openat2(2) features

socket.7

Michael Kerrisk

Note SCM message types for SO_TIMESTAMP and SO_TIMESTAMPNS

tcp.7

Michael Kerrisk

SEE ALSO: mention Documentation/networking/ip-sysctl.txt

time.7

Michael Kerrisk

Add small subsection on clocks and time namespaces

unix.7

Heinrich Schuchardt

Correct example

vsock.7

Stefano Garzarella [Jorgen Hansen, Stefan Hajnoczi]

Add VMADDR_CID_LOCAL description

===== Changes in man-pages-5.07 =====

Apologies if I missed anyone!

New and rewritten pages

ioctl_fslabel.2

Eric Sandeen

New page documenting filesystem get/set label ioctl(2) operations

Removed pages

ioctl_list.2

Michael Kerrisk [Heinrich Schuchardt, Eugene Syromyatnikov]

This page was first added more than 20 years ago. Since that time it has seen hardly any update, and is by now very much out of date, as reported by Heinrich Schuchardt and confirmed by Eugene Syromyatnikov.

As Heinrich says:

Man-pages like netdevices.7 or ioctl_fat.2 are what is needed to help a user who does not want to read through the kernel code.

If ioctl_list.2 has not been reasonably maintained since Linux 1.3.27 and hence is not a reliable source of information, shouldn't it be dropped?

My answer is, yes (but

let's move a little info into ioctl(2)).

Newly documented interfaces in existing pages

adjtimex.2

Arnd Bergmann [Richard Cochran, Michael Kerrisk]

Document clock_adjtime(2)

clock_getres.2

Richard Cochran [Michael Kerrisk]

Explain dynamic clocks

clone.2

Christian Brauner, Michael Kerrisk

Document the clone3() CLONE_INTO_CGROUP flag

mremap.2

Brian Geffon, Michael Kerrisk [Lokesh Gidra]

Document MREMAP_DONTUNMAP

open.2

Joseph C. Sible [Michael Kerrisk]

Document fs.protected_fifos and fs.protected_regular

prctl.2

Dave Martin

Add PR_SPEC_INDIRECT_BRANCH for SPECULATION_CTRL prctls

Dave Martin

Add PR_SPEC_DISABLE_NOEXEC for SPECULATION_CTRL prctls

Dave Martin

Add PR_PAC_RESET_KEYS (arm64)

ptrace.2

Joseph C. Sible

Document PTRACE_SET_SYSCALL

proc.5

Michael Kerrisk

Document /proc/sys/fs/protected_regular

Michael

Kerrisk

Document /proc/sys/fs/protected_fifos

Michael Kerrisk

Document /proc/sys/fs/aio-max-nr and /proc/sys/fs/aio-nr

New and changed links

clock_adjtime.2

Arnd Bergmann

New link to adjtimex(2)

Global changes

Various pages

Michael Kerrisk

Retitle EXAMPLE section heading to EXAMPLES

EXAMPLES appears to be the wider majority usage across various projects' manual pages, and is also what is used in the POSIX manual pages.

Various pages

Michael Kerrisk

Correct bogus POSIX.1 standards names

POSIX.1-2003 ==> POSIX.1-2001 TC1

POSIX.1-2004 ==> POSIX.1-2001 TC2

POSIX.1-2013 ==> POSIX.1-2008 TC1

POSIX.1-2016 ==> POSIX.1-2008 TC2

Various pages

Michael Kerrisk

Add section number in page cross-reference.

Various pages

Kir Kolyshkin

Add missing commas in SEE ALSO

Various pages

Michael Kerrisk

Remove AVAILABILITY section heading

In the few pages where this heading (which is "nonstandard" within man-pages) is used, it always immediately follows CONFORMING TO and generally contains information related to standards. Remove the section heading, thus incorporating AVAILABILITY into CONFORMING TO.

Various pages

Michael Kerrisk

Remove section number in page self-references

Various pages

Michael Kerrisk

Put SEE ALSO entries in alphabetical order

Various pages

Michael Kerrisk

Place SH sections in standard order

Fix various pages that deviated from the norm described in man-pages(7).

Various "aio" pages

Michael Kerrisk [Andi Kleen, Jeff Moyer]

Change uses of aio_context_t to io_context_t

Changes to individual pages

bpf.2

Peter Wu

Update enum bpf_map_type and enum bpf_prog_type

Richard Palethorpe

Change note on unprivileged access

The kernel now allows calls to bpf() without CAP_SYS_ADMIN under some circumstances.

clone.2

Michael Kerrisk

Add kernel version numbers for clone_args fields

Michael Kerrisk

Combine separate NOTES sections

close.2

Michael Kerrisk [Lukas Czerner, Peter Schiffer, Thierry Lelegard]

Note behavior when close() happens in a parallel thread

If one thread is blocked in an I/O system call on a file descriptor that is closed in another thread, then the blocking system call does not return immediately, but rather when the I/O operation completes. This surprises some people, but is longstanding behavior.

connect.2

Stefan Puiu

Can return EACCES because of SELinux

execve.2

Michael Kerrisk [Eric Hopper]

Changes to the "dumpable" flag may change ownership of /proc/PID files

Michael Kerrisk

Improve/correct

discussion of changes to dumpable flag during execve(2)

The details were not quite accurate. Defer to prctl(2)
for the more complete picture.

Nikola Forró

Clarify signal sent to the process on late failure

Michael Kerrisk

SEE ALSO: add capabilities(7)

fanotify_init.2

Amir Goldstein [Matthew Bobrowski]

Move out of place entry FAN_REPORT_FID

It was inserted in the middle of the FAN_CLASS_multi flags bit
and broke the multi flag documentation.

Michael Kerrisk [Alexander Morozov, Amir Goldstein, Jan Kara]

Remove mention of FAN_Q_OVERFLOW as an input value in 'mask'

See https://bugzilla.kernel.org/show_bug.cgi?id=198569.

Amir Goldstein [Jan Kara, Matthew Bobrowski]

Clarification about FAN_EVENT_ON_CHILD and new events

Amir Goldstein [Jan Kara, Matthew Bobrowski]

Clarification about FAN_MARK_MOUNT and FAN_REPORT_FID

getdents.2

Petr Vorel [Michael

Kerrisk]

Mention glibc support for getdents64()

Support was added in glibc 2.30.

Chris Lamb

Correct linux_dirent definition in example code

It is "unsigned long" earlier up in the file

gettid.2

Michael Kerrisk [Joseph C. Sible]

Document header file and feature test macro requirements for gettid()

ioctl.2

Michael Kerrisk

SEE ALSO: add ioctl_fslabel(2)

Michael Kerrisk

Remove mentions of ioctl_list(2)

Michael Kerrisk

Move subsection on "ioctl structure" from ioctl_list(2) to ioctl(2)

io_setup.2

Michael Kerrisk

Tweak description of /proc/sys/fs/aio-max-nr

mbind.2

Li Xinhai [Michael Kerrisk]

Remove note about MPOL_MF_STRICT been ignored

mmap.2

Michael Kerrisk [Heinrich Schuchardt]

Don't mark MAP_ANON as deprecated

move_pages.2

Yang Shi [Michal Hocko]

Returning positive value is a new error case

mremap.2

Michael Kerrisk

Remove

mention of "Segmentation fault" in EFAULT text

"Segmentation fault" (SIGSEGV) is not exactly the same thing as EFAULT.

Michael Kerrisk

Reorder some paragraphs in NOTES

Michael Kerrisk

Move a paragraph from DESCRIPTION to NOTES

msgctl.2

Michael Kerrisk

Correct description of 'msg_ctime' field

Verified by inspecting kernel source.

nfsservctl.2

Michael Kerrisk

SEE ALSO: add nfsd(7)

open.2

Michael Kerrisk

Some '*at' APIs have functionality that isn't in conventional APIs

Note that another reason to use the *at() APIs is to access 'flags' functionality that is not available in the corresponding conventional APIs.

Michael Kerrisk

Add a few more APIs to list in "Rationale for openat()..."

There have been a few more dirfd APIs added in recent times.

Michael Kerrisk

Explain ways in which a 'directory file descriptor' can be obtained

Michael Kerrisk

Add openat2() to list of APIs that take a 'dirfd' argument

openat2.2

Michael Kerrisk [Aleksa Sarai]

Various changes after feedback from Aleksa Sarai

poll.2

Michael Kerrisk

Add license to example program

prctl.2

Dave Martin

Sort prctls into alphabetical order

Dave Martin

Clarify that prctl can apply to threads

The current synopsis for prctl(2) misleadingly claims that prctl operates on a process. Rather, some (in fact, most) prctls operate

Dave Martin [Dave Hansen]

Document removal of Intel MPX prctls

Dave Martin

Fix mis-description of thread ID values in procfs

Dave Martin

Work around bogus constant "maxsig" in PR_SET_PDEATHSIG

Michael Kerrisk

Add reference to proc(5) for /proc/self/task/[tid]/comm

Dave Martin [Michael Kerrisk]

Add health warning

Dave Martin

Clarify the unsupported hardware case of EINVAL

rename.2

Michael Kerrisk

SEE ALSO: add rename(1)

s390_runtime_instr.2

Heiko Carstens [Eugene Syromyatnikov, Michael Kerrisk]

Document signum argument behavior change

Document that the signum argument is ignored in newer kernels, but that user space should pass a valid real-time signal number for backwards compatibility.

semctl.2

Michael Kerrisk [Manfred Spraul]

Correct description of sem_ctime field

semget.2

Michael Kerrisk

Add license to example program

shmctl.2

Michael Kerrisk

Correct 'shm_ctime' description

shmop.2

Michael Kerrisk

Add license to example programs

statfs.2

Michael Kerrisk [David Adam]

Add SMB2 constant to filesystem types list

syscall.2

Dave Martin [Will Deacon]

arm64: Fix syscall number register size

Dave Martin [Russell King]

arm: Use real register names for arm/OABI

sysfs.2

Michael Kerrisk

SEE

ALSO: add proc(5) and sysfs(5)

utimensat.2

Goldwyn Rodrigues

Immutable flag returns EPERM

Linux kernel commit 337684a1746f "fs: return EPERM on immutable inode" changed the return value of the utimensat(2) from -EACCES to -EPERM in case of an immutable flag.

wait4.2

Michael Kerrisk

Update wait3() feature test macro requirements for changes in glibc 2.26

cexp.2.3

Michael Kerrisk

Still not present in glibc 2.31

cmsg.3

Michael Kerrisk

CONFORMING TO: note which CMSG_* APIs are in current and upcoming POSIX

dirfd.3

Michael Kerrisk

SEE ALSO: add openat(2)

dlsym.3

Alexander Monakov

Extend discussion of NULL symbol values

Avoid implying that use of IFUNC is the only way to produce a symbol with NULL value. Give more scenarios how a symbol may get NULL value, but explain that in those scenarios dlsym() will fail

with Glibc's ld.so due
to an implementation inconsistency.

err.3

Michael Kerrisk

EXAMPLES: use EXIT_FAILURE rather than 1 as exit status

expm1.3

Michael Kerrisk

The expm1() bogus underflow floating-point exception has been fixed

See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6778

Michael Kerrisk

The bogus invalid floating-point exception bug has been fixed

https://www.sourceware.org/bugzilla/show_bug.cgi?id=6814.

fdim.3

Michael Kerrisk

BUGS: these functions did not set errno on some architectures

https://www.sourceware.org/bugzilla/show_bug.cgi?id=6796

ftw.3

Michael Kerrisk

glibc eventually fixed a regression in FTW_SLN behavior

For details, see:

https://bugzilla.redhat.com/show_bug.cgi?id=1422736

<http://austingroupbugs.net/view.php?id=1121>

https://bugzilla.redhat.com/show_bug.cgi?id=1422736

getauxval.3

YunQiang Su

MIPS, AT_BASE_PLATFORM passes

ISA level

getdtablesize.3

Michael Kerrisk

Remove redundant statement that getdtablesize() is a library function

malloc.3

Michael Kerrisk

Add 'reallocarray' in NAME

Michael Kerrisk

Add VERSIONS section noting when reallocarray() was added to glibc

newlocale.3

Michael Kerrisk [Piotr Caban]

Fix a valgrind issue in example program

See https://bugzilla.kernel.org/show_bug.cgi?id=202977.

nextafter.3

Michael Kerrisk

Since glibc 2.23, these functions do set errno

See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6799.

posix_spawn.3

Olivier Gayot [Adhemerval Zanella]

Clarify by using name of steps rather than syscalls

Olivier Gayot [Adhemerval Zanella]

Document implementation using clone() since glibc 2.24

Olivier Gayot [Adhemerval Zanella]

Document POSIX_SPAWN_USEVFORK

Added a few lines about POSIX_SPAWN_USEVFORK so that it appears

clearly that since glibc 2.24, the flag has no effect.

Olivier Gayot [Adhemerval Zanella]

Document the POSIX_SPAWN_SETSID attribute

pow.3

Michael Kerrisk

BUGS: pow() performance problem for some (rare) inputs has been fixed

See https://sourceware.org/bugzilla/show_bug.cgi?id=13932

Michael Kerrisk

Several bugs in glibc's pow() implementation were fixed in glibc 2.16

See https://www.sourceware.org/bugzilla/show_bug.cgi?id=3866.

Michael Kerrisk

Add a subheading to mark off historical bugs that are now fixed

printf.3

Tobias Stoeckmann

Prevent signed integer overflow in example

ptsname.3

Bruno Haible

Fix description of failure behaviour of ptsname_r()

random.3

John Marshall

Change "RAND_MAX" to "2^31-1"

scalb.3

Michael Kerrisk

These functions now correctly set errno for the EDOM and ERANGE cases

See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6803

and https://www.sourceware.org/bugzilla/show_bug.cgi?id=6804

scalbln.3

Michael Kerrisk

These functions now correctly set errno for the ERANGE case
See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6803

scanf.3

Michael Kerrisk [Jürgen Saueremann]

Clarify that 'x' specifier allows a 0x/0X prefix in input string

sem_getvalue.3

Michael Kerrisk [Andrea Galbusera]

Note that glibc's sem_getvalue() doesn't return EINVAL errors

See https://bugzilla.kernel.org/show_bug.cgi?id=204273

setlogmask.3

Michael Kerrisk

Note that LOG_UPTO() is included in the next POSIX release

shm_open.3

Michael Kerrisk

Add license to example programs

sincos.3

Michael Kerrisk

The glibc implementation does now give EDOM for a domain error

See https://www.sourceware.org/bugzilla/show_bug.cgi?id=15467

stdarg.3

Michael Kerrisk

SEE ALSO: add vprintf(3), vscanf(3), vsyslog(3)

streq.3

Michael Kerrisk

Add license to example programs

strftime.3

Urs Thuermann

ISO week number can be 52, add example

y0.3

Michael Kerrisk

These functions now correctly diagnose a pole error

https://sourceware.org/bugzilla/show_bug.cgi?id=6807

Michael Kerrisk

errno is now correctly set to ERANGE on underflow

https://www.sourceware.org/bugzilla/show_bug.cgi?id=6808

loop.4

Michael Kerrisk [Vlad]

'lo_flags' is nowadays "r/w"

See https://bugzilla.kernel.org/show_bug.cgi?id=203417

veth.4

Devin J. Pohly

Add a more direct example

iproute2 allows you to specify the netns for either side of a veth interface at creation time. Add an example of this to veth(4) so it doesn't sound like you have to move the interfaces in a separate step.

core.5

Michael Kerrisk [Jonny Grant]

Mention 'sysctl -w' as a way of changing core_pattern

setting

Michael Kerrisk [Jonny Grant]

Note that not dumping core of an unreadable binary is a security measure

Michael Kerrisk [Jonny Grant]

Explain that core_pattern %e is process/thread 'comm' value

The 'comm' value is typically the same as the (possibly truncated) executable name, but may be something different.

filesystems.5

Michael Kerrisk

SEE ALSO: add sysfs(5) and xfs(5)

locale.5

Michael Kerrisk [Helge Kreutzmann]

Improve description of 'first_weekday'

proc.5

Michael Kerrisk

Note kernel version for /proc/PID/smmaps VmFlags "wf" flag

Michael Kerrisk

Add "um" and "uw" to VmFlags in /proc/[pid]/smmaps

Michael Kerrisk

Add "mp" to VmFlags in /proc/[pid]/smmaps

Michael Kerrisk

Note kernel version that removed /proc/PID/smmaps VmFlags "nl" flag

Ian Rogers

Add "wf" to VmFlags in /proc/[pid]/smmaps

Michael Kerrisk

Note kernel version for /proc/PID/smmaps

VmFlags "dd" flag

Michael Kerrisk

Add "sf" to VmFlags in /proc/[pid]/smmaps

Michael Kerrisk [Kirill A. Shutemov]

Remove "mp" under VmFlags in /proc/[pid]/smmaps

Michael Kerrisk [Eric Hopper]

Alert the reader that UID/GID changes can reset the "dumpable" attribute

Keno Fischer

Fix an outdated note about map_files

The restriction to CAP_SYS_ADMIN was removed from map_files in 2015.

Michael Kerrisk [Helge Kreutzmann]

Better explanation of some /proc/ide fields

Michael Kerrisk

TASK_COMM_LEN limit includes the terminating '\0'

Clarify this detail in the discussion of /proc/[pid]/comm.

Michael Kerrisk

Add a detail to /proc/[pid]/comm

Note the connection to the "%e" specifier in
/proc/sys/kernel/core_pattern.

securetty.5

Michael Kerrisk [Helge Kreutzmann]

Improve wording of .SH one-line description

tzfile.5

Michael Kerrisk

Sync

to 2020a tzdb release

From <https://www.iana.org/time-zones>, version 2020a.

Michael Kerrisk

Explain UT abbreviation

ascii.7

Michael Kerrisk [Helge Kreutzmann]

SEE ALSO: fix sort order in entries

bpf-helpers.7

Michael Kerrisk

Resync against kernel 5.7

cgroups.7

Marcus Gelderie

Mention cgroup.sane_behavior file

The cgroup.sane_behavior file returns the hard-coded value "0" and
is kept for legacy purposes. Mention this in the man-page.

Michael Kerrisk

Note the existence of the clone3() CLONE_INTO_CGROUP flag

credentials.7

Michael Kerrisk

Alert reader that UID/GID changes can affect process capabilities

Michael Kerrisk

Changes to process UIDs/GIDs can effect the "dumpable" attribute

Michael Kerrisk

Add a list of the APIs that change a process's credentials

fanotify.7

Amir Goldstein [Jan Kara, Matthew Bobrowski]

Fix fanotify_fid.c example

Michael Kerrisk

Wrap some long lines in example program

fanotify.7

fanotify_mark.2

Amir Goldstein [Matthew Bobrowski]

Clarify FAN_ONDIR in output mask

FAN_ONDIR was an input only flag before introducing

FAN_REPORT_FID. Since the introduction of FAN_REPORT_FID, it can

also be in output mask.

hier.7

Thomas Piekarski [Gary Perkins]

Updating from FHS 2.3 to 3.0

See https://bugzilla.kernel.org/show_bug.cgi?id=206693

inotify.7

Michael Kerrisk [Jason Etherton]

Add missing #include in example program

ip.7

Michael Kerrisk [Martin Doucha]

Note a few more valid 'protocol' values

See https://bugzilla.kernel.org/show_bug.cgi?id=204981

Michael Kerrisk

SEE ALSO: add netdevice(7)

man-pages.7

Michael Kerrisk

Rename EXAMPLE to EXAMPLES

Michael Kerrisk

Describe COPYRIGHT section

man-pages doesn't use COPYRIGHT sections in manual pages,

but

various projects do. Make some recommendations about placement of the section.

Michael Kerrisk

Add REPORTING BUGS section

man-pages doesn't have a REPORTING BUGS section in manual pages,

but many other projects do. Make some recommendations about placement of that section.

Michael Kerrisk

Mention AUTHORS in summary section list

Although man-pages doesn't use AUTHORS sections, many projects do use an AUTHORS section in their manual pages, so mention it in man-pages to suggest some guidance on the position at which to place that section.

mount_namespaces.7

Michael Kerrisk

SEE ALSO: add mount(8), umount(8)

namespaces.7

Michael Kerrisk

Document /proc/sys/user/max_time_namespaces

netlink.7

Michael Kerrisk [Idan Katz]

Update path for NETLINK_CONNECTOR docs in kernel source tree

Michael Kerrisk [Fabien Siron]

Note that NETLINK_SOCKET_DIAG is preferred over NETLINK_INET_DIAG

pid_namespaces.7

Michael Kerrisk

Note that /proc/sys/kernel/ns_last_pid is virtualized per PID NS

Michael Kerrisk

Correct capability requirements for write to /proc/sys/kernel/ns_last_pid

CAP_SYS_ADMIN is needed in the user NS that owns the PID NS.

rtnetlink.7

Jan Moskyto Matejka [Michael Kerrisk]

Add missing RTA_* attributes

standards.7

Michael Kerrisk [Geoff Clare]

Add some more standards

Add: SUSv4 2016 edition, POSIX.1-2017, and SUSv4 2018 edition

Michael Kerrisk

Remove mention of bogus "POSIX" names

The terms POSIX.1-{2003,2004,2013,2016} were inventions of my imagination, as confirmed by consulting Geoff Clare of

The Open Group. Remove these names.

symlink.7

Michael Kerrisk

Describe differences in the treatment of symlinks in the dirname

Describe differences in

the treatment of symlinks in the dirname

part of pathname.

tcp.7

Michael Kerrisk [vrafaeli@msn.com]

Update info on tcp_syn_retries default value

See https://bugzilla.kernel.org/show_bug.cgi?id=202885.

user_namespaces.7

Michael Kerrisk [Léo Stefanescu]

Clarify that "system time" means "calendar time"

xattr.7

Achilles Gaikwad

Add attr(1) as relevant page to SEE ALSO

ldconfig.8

Florian Weimer

Mention new default for --format in glibc 2.32

zdump.8

Michael Kerrisk [Marco Curreli, Paul Eggert]

Update to latest upstream tz release

Look under "Latest version", which is 2020a.

==== Changes in man-pages-5.08 =====

Released: 2020-08-13, Munich

Apologies if I missed anyone!

Newly documented interfaces in existing pages

prctl.2

Dave Martin

Add SVE prctls (arm64)

Add documentation for the PR_SVE_SET_VL and PR_SVE_GET_VL prctls added in Linux 4.15 for arm64.

Dave Martin [Catalin Marinas]

Add tagged address ABI control prctls (arm64)

Add documentation for the PR_SET_TAGGED_ADDR_CTRL and PR_GET_TAGGED_ADDR_CTRL prctls added in Linux 5.4 for arm64.

setns.2

Michael Kerrisk

Document the use of PID file descriptors with setns()

Starting with Linux 5.8, setns() can take a PID file descriptor as an argument, and move the caller

into or more of the namespaces of the thread referred to by that descriptor.

capabilities.7

Michael Kerrisk

Document CAP_BPF
Michael Kerrisk
Add CAP_PERFMON

symlink.7

Aleksa Sarai
Document magic links more completely

Global changes

A few pages

Michael Kerrisk
Use `\`` rather than ```
`\`` produces better rendering in PDF.

Various pages

Michael Kerrisk [Geoff Clare]
Use `"\(\ti"` instead of `"~"`
A naked tilde (`"~"`) renders poorly in PDF. Instead use `"\(\ti"`, which renders better in a PDF, and produces the same glyph when rendering on a terminal.

Various pages

Michael Kerrisk [Geoff Clare]
Use `"\(\ha"` rather than `"^"` in code
This renders better in PDF.

Various pages

Mike Frysinger
Drop `"coding: UTF-8"` header
This header is used inconsistently -- man pages are UTF-8 encoded but not setting this marker.
It's only respected by the `man-db` package, and seems a bit anachronistic at this point when UTF-8 is the standard default nowadays.

Various pages

Mike Frysinger
Trim leading blank comment line
Very few pages do this, so trim them.

Various pages

Mike Frysinger
Use standard `.\`` comment style
The `\`` comment produces blank lines. Use the `.\`` that the vast majority of the codebase uses instead.

Various pages

Mike Frysinger [G. Branden Robinson]

Various pages: Drop t comment header

Historically, a comment of the following form at the top of a manual page was used to indicate too man(1) that the use of tbl(1) was required in order to process tables:

```
" t
```

However, at least as far back as 2001 (according to Branden), man-db's man(1) automatically uses tbl(1) as needed, rendering this comment unnecessary.

And indeed many existing pages in

man-pages that have tables don't have this comment at the top of the file. So, drop the comment from those files where it is present.

Changes to individual pages

ioctl_tty.2

Michael Kerrisk

Fix a confusing wording error in description of TIOCSPTLCK

iopl.2

Thomas Piekarski [victorm007@yahoo.com]

Updating description of permissions and disabling interrupts
Update description of permissions for port-mapped I/O set per-thread and not per-process. Mention that iopl() can not disable interrupts since Linux 5.5 anymore and is in general deprecated and only provided for legacy X servers.

See https://bugzilla.kernel.org/show_bug.cgi?id=205317

keyctl.2

Oleksandr Kravchuk

Declare auth_key to fix a compilation error in example code

lseek.2

Andrew Price

List gfs2 support for SEEK_HOLE/SEEK_DATA

mount.2

Michael Kerrisk

ERRORS: add EINVAL for bind mount of mount namespace inode

open.2

Michael Kerrisk

Say a bit more about what happens when 'mode' is wrongly omitted

pidfd_open.2

Michael Kerrisk

Add the setns(2) use case for PID file descriptors

Michael Kerrisk

Close the pidfd in EXAMPLE

Close the PID file descriptor in the example program, to hint to the reader that like every other kind of file descriptor, a PID FD should be closed.

prctl.2

Michael Kerrisk

The parent death signal is cleared on some credential changes

See kernel/cred.c::commit_creds() in the Linux 5.6 source code.

seccomp.2

Andy Lutomirski

Improve x32 and nr truncation notes

send.2

recv.2

Alyssa Ross

Add msg_iovlen POSIX note

msg_iovlen is incorrectly typed (according to POSIX) in addition to msg_controllen, but unlike msg_controllen, this wasn't mentioned for msg_iovlen.

setns.2

Michael Kerrisk

EXAMPLE: use O_CLOEXEC when opening namespace file descriptor

Michael Kerrisk

It is possible to setns() to the caller's current PID namespace

The page currently incorrectly says that 'fd' must refer to a descendant PID namespace. However, 'fd' can also refer to the caller's current PID namespace. Verified by experiment, and also comments in kernel/pid_namespace.c (Linux 5.8-rc1).

sync.2

Jeff Layton

syncfs() now returns errors if writeback fails

A patch has been merged for v5.8 that changes how syncfs() reports errors. Change the sync() manpage accordingly.

syscalls.2

Michael Kerrisk

Add `faccessat2()`, added in Linux 5.8

sysctl.2

Michael Kerrisk

glibc removed support for `sysctl()` starting in version 2.32

atoi.3

Arkadiusz Drabczyk

Explain disadvantages of `atoi()`

Michael Kerrisk

Relocate BUGS section

Michael Kerrisk

Add NOTES section explaining 0 return value on error

And note that this is not specified by POSIX.

fread.3

Arkadiusz Drabczyk

Add example

Arkadiusz Drabczyk

Explain that file position is moved after calling `fread()/fwrite()`

Corresponding manpage on FreeBSD already contains that information.

getpt.3

posix_openpt.3

pts.4

Michael Kerrisk

Use the term "pseudoterminal multiplexor device" for `/dev/ptmx`

Let's use some consistent terminology for this device.

posix_memalign.3

Bruno Haible

Clarify how to free the result of `posix_memalign`

pthread_rwlockattr_setkind_np.3

Carlos O'Donnell [Kumar Kartikeya Dwivedi]

Clarify a `PTHREAD_RWLOCK_PREFER_WRITER_NP` detail

queue.3

Alejandro Colomar

Remove wrong code from example

Alejandro Colomar

Comment out text for functions not in glibc (related: 6559169cac)

pts.4

Michael Kerrisk

Remove NOTES on BSD pseudoterminals

This information is already covered better in `pty(7)`. No need to

mention it again here.

hosts.5

Thomas Bartelsmeier

Clarify capability for IPv6 outside of examples

Resolves https://bugzilla.kernel.org/show_bug.cgi?id=208279

proc.5

Jakub Wilk

Use "pwd -P" for printing cwd

"/bin/pwd" happens to work with the GNU coreutils implementation, which has -P as the default, contrary to POSIX requirements.

Use "pwd -P" instead, which is shorter, easier to type, and should work everywhere.

Arkadiusz Drabczyk

Inform that comm in /proc/pid/{stat,status} might also be truncated

pgrep for example searches for a process name in /proc/pid/status

resolv.conf.5

Michael Kerrisk [Helge Kreutzmann]

Clarify that ip6-bytestring was removed in 2.25

capabilities.7

Dan Kenigsberg

Clarify

that CAP_SYS_NICE relates to *lowering* the nice value

Saikiran Madugula

CAP_SYS_RESOURCE: add two more items for POSIX message queues

CAP_SYS_RESOURCE also allows overriding /proc/sys/fs/mqueue/msg_max and /proc/sys/fs/mqueue/msgsize_max.

Michael Kerrisk [Dan Kenigsberg]

Clarify wording around increasing process nice value

Michael Kerrisk

SEE ALSO: add getpcaps(8)

cgroups.7

cpuset.7

Sven Hoexter

Update kernel cgroup documentation references

cgroups-v1/v2 documentation got moved to the "admin-guide" subfolder and converted from .txt files to .rst

ip.7

Michael Kerrisk [Stephen Hemminger]

Remove mention of ipfw(4) which was in long obsolete ipchains project

man-pages.7

Michael Kerrisk

Add some notes on generating optimal glyphs
Getting nice renderings of ^ ` and ~ requires special
steps in the page source.

pty.7

Michael Kerrisk

Explicitly mention CONFIG_LEGACY_PTYS
Explicitly mention CONFIG_LEGACY_PTYS, and note that it is disabled
by default since Linux 2.6.30.

Michael Kerrisk

Relocate a paragraph to NOTES

standards.7

Michael Kerrisk

Add an entry for POSIX.1-1988

Michael Kerrisk [Geoff Clare]

Correct various details in the explanation of XPG/POSIX/SUS

ld.so.8

Florian Weimer [Michael Kerrisk]

List more places in which dynamic string tokens are expanded
This happens for more than just DT_RPATH/DT_RUNPATH.

Arkadiusz Drabczyk

Explain that empty entry in LD_LIBRARY_PATH means cwd

zic.8

Michael Kerrisk

Sync to 2020a tzdb release

From <https://www.iana.org/time-zones>, version 2020a.

==== Changes in man-pages-5.09 =====

Released: 2020-11-01, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog
below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages

circleq.3

Alejandro Colomar

New page with 'circleq' content extracted from queue(3)

list.3

Alejandro Colomar

New page with 'list' content extracted from queue(3)

pthread_attr_setsigmask_np.3

Michael Kerrisk

New page for pthread_attr_setsigmask_np() + pthread_attr_getsigmask_np()

Add a page documenting the pthread_attr_setsigmask_np(3) and pthread_attr_getsigmask_np(3) functions added in glibc 2.32.

slist.3

Alejandro Colomar

New page with 'slist' content extracted from queue(3)

stailq.3

Alejandro Colomar

New page with 'stailq' content extracted from queue(3)

tailq.3

Alejandro Colomar

New page with 'tailq' content extracted from queue(3)

system_data_types.7

Alejandro Colomar, Michael Kerrisk

A new page documenting a wide range of system data types.

kernel_lockdown.7

David Howells, Heinrich Schuchardt [Michael Kerrisk]

New page documenting the Kernel Lockdown feature

queue.7

Alejandro Colomar

Create summary page for 'queue' APIs

The former queue(3) page was rather unwieldy, as it attempted to describe too many APIs. After splitting that content out into a number of smaller pages (circleq.3, list.3, slist.3, stailq.3, and

tailq.3) move the much-reduced queue(3) page, which is now essentially a summary of those APIs, from Section 3 to Section 7.

Newly documented interfaces in existing pages

fanotify_init.2

fanotify.7

Amir Goldstein [Jan Kara, Matthew Bobrowski]
Document FAN_REPORT_DIR_FID

fanotify_init.2

fanotify.7

Amir Goldstein [Jan Kara, Matthew Bobrowski]
Document FAN_REPORT_NAME

statx.2

Ira Weiny

Add STATX_ATTR_DAX

strerror.3

Michael Kerrisk

Document strerrorname_np() and strerrordesc_np()
strerrorname_np() and strerrordesc_np() were added in glibc 2.32.

strsignal.3

Michael Kerrisk

Document sigabbrev_np() and sigdescr_np().
sigabbrev_np() and sigdescr_np() were added in glibc 2.32.

loop.4

Yang Xu

Document LOOP_CONFIGURE ioctl

Yang Xu

Document LO_FLAGS_DIRECT_IO flag

capabilities.7

Michael Kerrisk

Document the CAP_CHECKPOINT_RESTORE
capability added in Linux 5.9

ip.7

Stephen Smalley [Paul Moore]

Document IP_PASSESEC for UDP sockets

ip.7

socket.7

Stephen Smalley

Document SO_PEERSEC for AF_INET sockets

Sridhar Samudrala

Document SO_INCOMING_NAPI_ID

socket.7

unix.7

Stephen Smalley [Serge Hallyn, Simon McVittie]

Add initial description for SO_PEERSEC

New link to strerror(3)

sys_siglist.3

Michael Kerrisk

New link to strsignal(3)

Global changes

Various pages

Alejandro Colomar

Use `sizeof` consistently through all the examples in the
following way:

- Use the name of the variable instead of its type as argument for
`sizeof`.

Various pages

Alejandro Colomar

Use `sizeof()` to get buffer size (instead of hardcoding macro name)

Various pages

Michael Kerrisk

Use `\(aq` instead of `'` inside monospace fonts

Use `\(aq` to get an unslanted single quote inside monospace code blocks. Using a simple `'` results in a slanted quote inside PDFs.

Various pages

Michael Kerrisk, Alejandro Colomar

Use C99 style to declare loop counter

variables

Rather than:

```
sometype x;
```

```
for (x = ....; ...)
```

use

```
for (sometype x = ...; ...)
```

This brings the declaration and use closer together (thus aiding readability) and also clearly indicates the scope of the loop counter variable.

Various pages

Alejandro Colomar

Switch `printf()` casts to use `[u]intmax_t + %ju / %jd`

Let's move to the 21st century. Instead of casting system data types to `long/long long/etc.` in `printf()` calls, instead cast to `intmax_t` or `uintmax_t`, the largest available signed/unsigned integer types.

Various pages

Alejandro Colomar

Omit `'int'` keyword for `'short'`, `'long'` and `'long long'` types

Various pages

Alejandro Colomar

Remove unneeded casts

Various pages

Alejandro Colomar

In `printf()`: `s/0x%/ %#/` except when followed by `X` instead of `x`

Use `printf()`'s

`#` flag character to prepend the string `"0x"`.

However, when the number is printed in uppercase, and the prefix is in lowercase, the string `"0x"` needs to be manually written.

Various pages

Michael Kerrisk

Use C99-style declarations for readability

Rather than writing things such as:

```
struct sometype *x;  
...  
x = malloc(sizeof(*x));
```

let's use C99 style so that the type info is in the same line as
the allocation:

```
struct sometype *x = malloc(sizeof(*x));
```

Various pages

Alejandro Colomar

Cast to 'unsigned long' rather than 'long' when printing with "%lx"

stdarg.3

Alejandro Colomar

Declare variables with different types in different lines

In particular, don't mix a variable and a pointer declaration
on the same line: TYPE x, *p;

Changes to individual pages

memusage.1

Michael Kerrisk

EXAMPLES: remove doubled calculations

The same calculations are repeated in malloc() and printf() calls.

For better readability, do the calculations once.

Michael Kerrisk

Use %zu rather than %zd when printing 'size_t' values

clock_getres.2

Alejandro Colomar

EXAMPLES: use 'const' when appropriate

Alejandro Colomar [Jakub Wilk]

Cast 'time_t' to 'int' for printf() and fix the length modifiers

Michael Kerrisk [Tony May]

Fix type and variable name in dynamic clock code example

clone.2

Michael Kerrisk

CAP_CHECKPOINT_RESTORE can now be used to employ 'set_tid'

epoll_ctl.2

Michael Kerrisk

epoll instances can be nested to a maximum depth of 5

This limit appears to be an off-by-one count against
EP_MAX_NESTS (4).

Michael Kerrisk

Move some version info from CONFORMING TO to VERSIONS

eventfd.2

Alejandro Colomar

Use 'PRIxN' macros when printing
C99 fixed-width integer types

futex.2

Alejandro Colomar

Use appropriate types

getdents.2

Alejandro Colomar

SYNOPSIS: add missing header and feature test macro

intro.2

intro.3

credentials.7

feature_test_macros.7

standards.7

Michael Kerrisk

SEE ALSO: add system_data_types(7)

ioctl_ns.2

stat.2

Alejandro Colomar [Konstantin Bukin]

Fix signedness of printf specifiers

membarrier.2

Alejandro Colomar

Note that glibc does not provide a wrapper

mprotect.2

Alejandro Colomar

Use "%p" rather than casting to 'long' when printing pointer values

mq_getsetattr.2

Alejandro Colomar

Use 'const' when appropriate

msgop.2

Yang Xu

Add restriction on ENOSYS error

open.2

Michael Kerrisk [henrik@optoscale.no]

ERRORS: add EBUSY

openat.2

Alejandro Colomar

SYNOPSIS: return long

The Linux kernel uses long as the return type for this syscall.

As glibc provides

no wrapper, use the same type the kernel uses.

open_by_handle_at.2

Alejandro Colomar

Use "%u" rather than "%d" when printing 'unsigned int' values

perf_event_open.2

Alexey Budankov

Update the man page with CAP_PERFMON related information

recv.2

send.2

Michael Kerrisk

Add cross references to pages with further info about ancillary data

sched_getattr.2

Aleksa Sarai

Update to include changed size semantics

seccomp.2

Michael Kerrisk [Jann Horn]

Warn reader that SECCOMP_RET_TRACE can be overridden

Highlight to the reader that if another filter returns a

higher-precedence action value, then the ptracer will not

be notified.

Michael Kerrisk [Rich Felker]

Warn against the use of SECCOMP_RET_KILL_THREAD

Killing a thread with SECCOMP_RET_KILL_THREAD is very likely

to leave the rest of the process in a broken state.

Michael Kerrisk [Rich Felker]

EXAMPLES: use SECCOMP_RET_KILL_PROCESS rather than SECCOMP_RET_KILL

Alejandro Colomar

Use ARRAY_SIZE() macro instead of raw sizeof division

setns.2

Michael Kerrisk

Correct the version for time namespace support

sigaction.2

Michael Kerrisk [Alejandro Colomar]

Use correct POSIX type for `siginfo_t.si_value`

syscalls.2

Michael Kerrisk

Move system calls from discontinued ports out of main syscall list

Various ports that had their own indigenous system calls have been discontinued. Remove those system calls (none of which had manual pages!) to a separate part of the page, to avoid cluttering the main list of system calls.

Michael Kerrisk

Add `close_range` (Linux 5.9)

timerfd_create.2

Alejandro Colomar

Use 'PRIxN' macros when printing C99 fixed-width integer types

userfaultfd.2

Michael Kerrisk

Use a better type (`uint64_t`) for 'len' in EXAMPLES

Alejandro

Colomar

Use 'PRIx64' rather than "%llx" when printing 64-bit fixed-width types

argz_add.3

envz_add.3

Michael Kerrisk [Jonny Grant]

Point out that 'error_t' is an integer type

bsearch.3

Alejandro Colomar

Fix intermediate type and remove unneeded casts

bswap.3

Jakub Wilk

Use `strtoull()` for parsing 64-bit numbers

dlopen.3

Michael Kerrisk

Clarify `DT_RUNPATH/DT_RPATH` details

It is the `DT_RUNPATH/DT_RPATH` of the calling object (not the executable) that is relevant for the library search. Verified by experiment.

errno.3

Michael Kerrisk [Alejandro Colomar]

Note that the pthreads APIs do not set errno

fopencookie.3

Alejandro Colomar

printf()'s .* expects an int; cast accordingly

Alejandro Colomar

Fix bugs in example

fread.3

Alejandro Colomar

Move ARRAY_SIZE logic into macro

freeaddrinfo.3

Marko Hrastovec

Fix memory leaks in freeaddrinfo()

examples

getline.3

Alejandro Colomar

Use %zd rather than %zu when printing 'ssize_t' values

lseek64.3

Michael Kerrisk

Since glibc 2.28, the 'llseek' symbol is no longer available

mallinfo.3

Michael Kerrisk

The 'usmblks' field is nowadays always 0

offsetof.3

Alejandro Colomar

Use "%zu" rather than "%zd" when printing 'size_t' values

perror.3

Michael Kerrisk

sys_errlist and sys_nerr are no longer exposed by <stdio.h>

The change came with the release of glibc 2.32.

posix_fallocate.3

Érico Rolim

Add EOPNOTSUPP error code.

psignal.3

strsignal.3

Michael Kerrisk

Consolidate information on 'sys_siglist' in one page (strsignal(3))

pthread_attr_init.3

Michael Kerrisk

SEE ALSO: add pthread_attr_init(3)

pthread_attr_init.3

pthread_create.3

pthread_getattr_np.3

Michael Kerrisk

Use correct type (size_t) for some variables

pthread_getattr_np.3

Alejandro Colomar

Use "%zu" and "%zx" when printing 'size_t' values

pthread_sigmask.3

Michael Kerrisk

SEE ALSO: add pthread_attr_setsigmask_np(3)

qsort.3

Alejandro Colomar

Fix casts

Alejandro Colomar

SYNOPSIS: move code from queue.3 to stailq.3

regex.3

Alejandro Colomar

Add example program

Alejandro Colomar

Remove unnecessary include

strsignal.3

Michael Kerrisk [Hauke Fath]

Note that starting with v2.32, glibc no longer exports 'sys_siglist'

Michael Kerrisk

Further addition on version range for sys_siglist

Michael Kerrisk

Note that 'sys_siglist' is nonstandard

strtod.3

Jonathan Wakely

Fix return value for underflow

strtol.3

Alejandro Colomar

EXAMPLES: simplify errno checking

Alejandro Colomar

EXAMPLES: as the default base, use special value 0

Alejandro Colomar

EXAMPLES: delimit output string using ""

tsearch.3

Alejandro Colomar

Simplify

type usage and remove unneeded casts

Alejandro Colomar

Use size_t for malloc() argument

loop.4

Yang Xu

Add some details about lo_flags

core.5

Alejandro Colomar

Use adequate type

locale.5

Florian Weimer

Decimal points, thousands separators must be one character

proc.5

Michael Kerrisk

Update capability requirements for accessing /proc/[pid]/map_files

Jann Horn [Mark Mossberg]

Document inaccurate RSS due to SPLIT_RSS_COUNTING

Michael Kerrisk

Note "open file description" as (better) synonym for "file handle"

resolv.5

Florian Weimer

Document the trust-ad option

aio.7

Alejandro Colomar

Use perror() directly

bpf-helpers.7

Michael Kerrisk [Jakub Wilk]

Resync with current kernel source

capabilities.7

Michael Kerrisk

Under CAP_SYS_ADMIN, group "sub-capabilities" together

CAP_BPF, CAP_PERFMON, and CAP_CHECKPOINT_RESTORE have all been

added to split out the power of CAP_SYS_ADMIN into weaker pieces.

Group all of these capabilities together in the list under

CAP_SYS_ADMIN, to make it clear that there is a pattern to these

capabilities.

Michael Kerrisk

CAP_SYS_ADMIN implies CAP_CHECKPOINT_RESTORE

But the latter, weaker capability is preferred.

Michael Kerrisk

Add kernel doc reference for CAP_PERFMON

fanotify.7

Alejandro Colomar

Pass array to read(2) directly instead of a pointer to it

fanotify.7

fanotify_mark.2

Amir Goldstein [Jan Kara, Matthew Bobrowski]

Generalize documentation of FAN_REPORT_FID

feature_test_macros.7

Jakub Wilk

Update list of macros that inhibit default definitions

man.7

Michael Kerrisk [G. Branden Robinson]

Clarify that alternating typeface macros print arguments without spaces

man-pages.7

Michael Kerrisk

Add some more requests re code examples

Michael Kerrisk

Soften the statement that ideal programs should be short

namespaces.7

Michael Kerrisk

A 'time_for_children' symlink can also pin a namespace

pid_namespaces.7

Michael Kerrisk

Update capability requirements for /proc/sys/kernel/ns_last_pid

pthread.7

Michael Kerrisk

Explicitly note that pthread APIs return an errno-style value on error

rtld-audit.7

Florian Weimer [Carlos O'Donell]

Clarify la_version handshake

Returning its argument without further checks is almost always wrong for la_version.

Alejandro Colomar

Use "%u" rather than "%d" when printing 'unsigned int' values

sigevent.7

Michael Kerrisk

Note that 'sigev_notify_thread_id' is Linux-specific

socket.7

Michael Kerrisk

SEE ALSO: add ipv6(7)

RELEASE

The Linux man page maintainer proudly announces. . .

man-pages-5.10.tar.gz - man pages for Linux

Differences from the previous manual pages release are listed in
the file "Changes".

For further information, visit <http://www.kernel.org/doc/man-pages/>

POSIX PAGES

This package used to contains a copy of the POSIX 1003.1-2003
man pages. The POSIX pages are now distributed in the separate
man-pages-posix package.

THE PAGES

These pages are most of the section 2, 3, 4, 5, 7 man pages for Linux. A few pages are provided in sections 1 and 8 for commands that are not documented in other packages, and there are a few pages in sections 5 and 8 for the timezone utilities.

[The timezone pages were taken from
<ftp://elsie.nci.nih.gov/pub/tzcode2001a.tar.gz>.]

[The section 3 man pages for the db routines have been taken from
<ftp://ftp.terra.net/pub/sleepycat/db.1.86.tar.gz>.]

[The rpc man pages were taken from the 4.4BSD-Lite
CDROM.]

Here is a breakdown of what this distribution contains:

- Section 1 = user commands (intro, plus a few other pages)
- Section 2 = system calls
- Section 3 = libc calls
- Section 4 = devices (e.g., hd, sd)
- Section 5 = file formats and configuration files (e.g., wtmp, /etc/passwd)
- Section 6 = games (intro only)
- Section 7 = overviews, conventions, macro packages, etc.
- Section 8 = system administration (intro, plus a few other pages)

This package contains no, or very few, section 1, 6, and 8 man pages because these should be distributed with the binaries they are written for. Sometimes Section 9 is used for man pages describing parts of the kernel.

Note that only Section 2 is rather complete, but Section 3 contains several hundred man pages. If you want to write some man pages, or suggest improvements to existing pages, please visit <http://www.kernel.org/doc/man-pages/>.

Copyright information:

These man pages are distributed under a variety of copyright licenses. Although these licenses permit free distribution of the nroff sources contained in this package, commercial distribution may impose other requirements (e.g., acknowledgement of copyright or inclusion of the raw nroff sources with the commercial distribution). If you distribute these man pages commercially, it is your responsibility to figure out your obligations. (For many man pages, these obligations require you to distribute nroff sources with any pre-formatted man pages that you provide.) Each file that contains nroff source for a man page also contains the author(s) name, email

address, and copyright notice.

1.160 hashicorp-go-secure-stdlib-strutil 0.1.2

1.160.1 Available under license :

Mozilla Public License, version 2.0

1. Definitions

1.1. "Contributor"

means each individual or legal entity that creates, contributes to the creation of, or owns Covered Software.

1.2. "Contributor Version"

means the combination of the Contributions of others (if any) used by a Contributor and that particular Contributor's Contribution.

1.3. "Contribution"

means Covered Software of a particular Contributor.

1.4. "Covered Software"

means Source Code Form to which the initial Contributor has attached the notice in Exhibit A, the Executable Form of such Source Code Form, and Modifications of such Source Code Form, in each case including portions thereof.

1.5. "Incompatible With Secondary Licenses"

means

a. that the initial Contributor has attached the notice described in Exhibit B to the Covered Software; or

b. that the Covered Software was made available under the terms of version 1.1 or earlier of the

License, but not also under the terms of a Secondary License.

1.6. "Executable Form"

means any form of the work other than Source Code Form.

1.7. "Larger Work"

means a work that combines Covered Software with other material, in a separate file or files, that is not Covered Software.

1.8. "License"

means this document.

1.9. "Licensable"

means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently, any and all of the rights conveyed by this License.

1.10. "Modifications"

means any of the following:

- a. any file in Source Code Form that results from an addition to, deletion from, or modification of the contents of Covered Software; or
- b. any new file in Source Code Form that contains any Covered Software.

1.11. "Patent Claims" of a Contributor

means any patent claim(s), including without limitation, method, process, and apparatus claims, in any patent Licensable by such Contributor that would be infringed, but for the grant of the License, by the making, using, selling, offering for sale, having made, import, or transfer of either its Contributions or its Contributor Version.

1.12. "Secondary License"

means either the GNU General Public License, Version 2.0, the GNU Lesser General Public License, Version 2.1, the GNU Affero General Public License, Version 3.0, or any later versions of those licenses.

1.13. "Source Code Form"

means the form of the work preferred for making modifications.

1.14. "You" (or "Your")

means an individual or a legal entity exercising rights under this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants and Conditions

2.1. Grants

Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

- a. under intellectual property rights (other than patent or trademark) Licensable by such Contributor to use, reproduce, make available, modify, display, perform, distribute, and otherwise exploit its Contributions, either on an unmodified basis, with Modifications, or as part of a Larger Work; and
- b. under Patent Claims of such Contributor to make, use, sell, offer for sale, have made, import, and otherwise transfer either its Contributions or its Contributor Version.

2.2. Effective Date

The licenses granted in Section 2.1 with respect to any Contribution become effective for each Contribution on the date the Contributor first distributes such Contribution.

2.3. Limitations on Grant Scope

The licenses granted in this Section 2 are the only rights granted under this License. No additional rights or licenses will be implied from the distribution or licensing of Covered Software under this License. Notwithstanding Section 2.1(b) above, no patent license is granted by a Contributor:

- a. for any code that a Contributor has removed from Covered Software; or
- b. for infringements caused by: (i) Your and any other third party's modifications of Covered Software, or (ii) the combination of its Contributions with other software (except as part of its Contributor Version); or

c. under Patent Claims infringed by Covered Software in the absence of its Contributions.

This License does not grant any rights in the trademarks, service marks, or logos of any Contributor (except as may be necessary to comply with the notice requirements in Section 3.4).

2.4. Subsequent Licenses

No Contributor makes additional grants as a result of Your choice to distribute the Covered Software under a subsequent version of this License (see Section 10.2) or under the terms of a Secondary License (if permitted under the terms of Section 3.3).

2.5. Representation

Each Contributor represents that the Contributor believes its Contributions are its original creation(s) or it has sufficient rights to grant the rights to its Contributions conveyed by this License.

2.6. Fair Use

This License is not intended to limit any rights You have under applicable copyright doctrines of fair use, fair dealing, or other equivalents.

2.7. Conditions

Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted in Section 2.1.

3. Responsibilities

3.1. Distribution of Source Form

All distribution of Covered Software in Source Code Form, including any Modifications that You create or to which You contribute, must be under the terms of this License. You must inform recipients that the Source Code Form of the Covered Software is governed by the terms of this License, and how they can obtain a copy of this License. You may not attempt to alter or restrict the recipients' rights in the Source Code Form.

3.2. Distribution of Executable Form

If You distribute Covered Software in Executable Form then:

- a. such Covered Software must also be made available in Source Code Form, as described in Section 3.1, and You must inform recipients of the Executable Form how they can obtain a copy of such Source Code Form by reasonable means in a timely manner, at a charge no more than the cost of distribution to the recipient; and
- b. You may distribute such Executable Form under the terms of this License, or sublicense it under different terms, provided that the license for the Executable Form does not attempt to limit or alter the recipients' rights in the Source Code Form under this License.

3.3. Distribution of a Larger Work

You may create and distribute a Larger Work under terms of Your choice, provided that You also comply with the requirements of this License for the Covered Software. If the Larger Work is a combination of Covered Software with a work governed by one or more Secondary Licenses, and the Covered Software is not Incompatible With Secondary Licenses, this License permits You to additionally distribute such Covered Software under the terms of such Secondary License(s), so that the recipient of the Larger Work may, at their option, further distribute the Covered Software under the terms of either this License or such Secondary License(s).

3.4. Notices

You may not remove or alter the substance of any license notices (including copyright notices, patent notices, disclaimers of warranty, or limitations of liability) contained within the Source Code Form of the Covered Software, except that You may alter any license notices to the extent required to remedy known factual inaccuracies.

3.5. Application of Additional Terms

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, You may do so only on Your own behalf, and not on behalf of any Contributor. You must make it absolutely clear that any such warranty, support, indemnity, or liability obligation is offered by You alone, and You hereby agree to indemnify every Contributor for any liability incurred by such Contributor as a result of warranty, support, indemnity or liability terms You offer. You may include additional disclaimers of warranty and limitations of liability specific to any

jurisdiction.

4. Inability to Comply Due to Statute or Regulation

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Software due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be placed in a text file included with all distributions of the Covered Software under this License. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Termination

5.1. The rights granted under this License will terminate automatically if You fail to comply with any of its terms. However, if You become compliant, then the rights granted under this License from a particular Contributor are reinstated (a) provisionally, unless and until such Contributor explicitly

and finally terminates Your grants, and (b) on an ongoing basis, if such Contributor fails to notify You of the non-compliance by some reasonable means prior to 60 days after You have come back into compliance. Moreover, Your grants from a particular Contributor are reinstated on an ongoing basis if such Contributor notifies You of the non-compliance by some reasonable means, this is the first time You have received notice of non-compliance with this License from such Contributor, and You become compliant prior to 30 days after Your receipt of the notice.

5.2. If You initiate litigation against any entity by asserting a patent infringement claim (excluding declaratory judgment actions, counter-claims, and cross-claims) alleging that a Contributor Version directly or indirectly infringes any patent, then the rights granted to You by any and all Contributors for the Covered Software under Section 2.1 of this License shall terminate.

5.3. In the event of termination under Sections 5.1 or 5.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or Your distributors under this License prior to termination shall survive termination.

6. Disclaimer of Warranty

Covered Software is provided under this License on an "as is" basis,

without warranty of any kind, either expressed, implied, or statutory, including, without limitation, warranties that the Covered Software is free of defects, merchantable, fit for a particular purpose or non-infringing. The entire risk as to the quality and performance of the Covered Software is with You. Should any Covered Software prove defective in any respect, You (not any Contributor) assume the cost of any necessary servicing, repair, or correction. This disclaimer of warranty constitutes an essential part of this License. No use of any Covered Software is authorized under this License except under this disclaimer.

7. Limitation of Liability

Under no circumstances and under no legal theory, whether tort (including negligence), contract, or otherwise, shall any Contributor, or anyone who distributes Covered Software as permitted above, be liable to You for any direct, indirect, special, incidental, or consequential damages of any character including, without limitation, damages for lost profits, loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses, even if such party shall have been informed of the possibility of such damages. This limitation of liability shall not apply to liability for death or personal injury resulting from such party's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to You.

8. Litigation

Any litigation relating to this License may be brought only in the courts of a jurisdiction where the defendant maintains its principal place of business and such litigation shall be governed by laws of that jurisdiction, without reference to its conflict-of-law provisions. Nothing in this Section shall prevent a party's ability to bring cross-claims or counter-claims.

9. Miscellaneous

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not be used to construe this License against a Contributor.

10. Versions of the License

10.1. New Versions

Mozilla Foundation is the license steward. Except as provided in Section

10.3, no one other than the license steward has the right to modify or publish new versions of this License. Each version will be given a distinguishing version number.

10.2. Effect of New Versions

You may distribute the Covered Software under the terms of the version of the License under which You originally received the Covered Software, or under the terms of any subsequent version published by the license steward.

10.3. Modified Versions

If you create software not governed by this License, and you want to create a new license for such software, you may create and use a modified version of this License if you rename the license and remove any references to the name of the license steward (except to note that such modified license differs from this License).

10.4. Distributing Source Code Form that is Incompatible With Secondary Licenses If You choose to distribute Source Code Form that is Incompatible

With Secondary Licenses under the terms of this version of the License, the notice described in Exhibit B of this License must be attached.

Exhibit A - Source Code Form License Notice

This Source Code Form is subject to the terms of the Mozilla Public License, v. 2.0. If a copy of the MPL was not distributed with this file, You can obtain one at <http://mozilla.org/MPL/2.0/>.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

Exhibit B - "Incompatible With Secondary Licenses" Notice

This Source Code Form is "Incompatible
With Secondary Licenses", as defined by
the Mozilla Public License, v. 2.0.

The full text of the GNU GENERAL PUBLIC LICENSE Version 2 is included
below.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Library General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price. Our General Public

Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it

in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and

can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program
(or a work based on it,
under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program
in object code or executable form with such
an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary

form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then

the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free

Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either

version 2 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program; if not, write to the Free Software
Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical
commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this is what you want to do, use the GNU Library General
Public License instead of this
License.

1.164 scowl 2019.10.06-1

1.164.1 Available under license :

This English word list is comes directly from SCOWL and is thus under the same copyright of SCOWL. The affix file (only included in the aspell6 package) is based on the Ispell one which is under the same copyright of Ispell. Part of SCOWL is also based on Ispell thus the Ispell copyright is included with the SCOWL copyright. The collective work is Copyright 2000-2019 by Kevin Atkinson as well as any of the copyrights mentioned below:

Copyright 2000-2019 by Kevin Atkinson

Permission to use, copy, modify, distribute and sell these word lists, the associated scripts, the output created from the scripts, and its documentation for any purpose is hereby granted without fee, provided that the above copyright notice appears in all copies and that both that copyright notice and this permission notice appear in supporting documentation. Kevin Atkinson makes no representations about the suitability of this array for any purpose. It is provided "as is" without express or implied warranty.

Alan Beale <biljir@pobox.com> also deserves special credit as he has, in addition to providing the 12Dicts package and being a major contributor to the ENABLE word list, given me an incredible amount of feedback and created a number of special lists (those found in the Supplement) in order to help improve the overall quality of SCOWL.

The 10 level includes the 1000 most common English words (according to the Moby (TM) Words II [MWords] package), a subset of the 1000 most common words on the Internet (again, according to Moby Words II), and frequently class 16 from Brian Kelk's "UK English Wordlist with Frequency Classification".

The MWords package was explicitly placed in the public domain:

The Moby lexicon project is complete and has been place into the public domain. Use, sell, rework, excerpt and use in any way on any platform.

Placing this material on internal or public servers is also encouraged. The compiler is not aware of any export restrictions so freely distribute world-wide.

You can verify the public domain status by contacting

grady@netcom.com
grady@northcoast.com

The "UK English Wordlist With Frequency Classification" is also in the Public Domain:

Date: Sat, 08 Jul 2000 20:27:21 +0100
From: Brian Kelk <Brian.Kelk@cl.cam.ac.uk>

> I was wondering what the copyright status of your "UK English
> Wordlist With Frequency Classification" word list as it seems to
> be lacking any copyright notice.

There were many many sources in total, but any text marked "copyright" was avoided. Locally-written documentation was one source. An earlier version of the list resided in a filespace called PUBLIC on the University mainframe, because it was considered public domain.

Date: Tue, 11 Jul 2000 19:31:34 +0100

> So are you saying your word list is also in the public domain?

That is the intention.

The 20 level includes frequency classes 7-15 from Brian's word list.

The 35 level includes frequency classes 2-6 and words appearing in at least 11 of 12 dictionaries as indicated in the 12Dicts package. All words from the 12Dicts package have had likely inflections added via my inflection database.

The 12Dicts package and Supplement is in the Public Domain.

The WordNet database, which was used in the creation of the Inflections database, is under the following copyright:

This software and database is being provided to you, the LICENSEE, by Princeton University under the following license. By obtaining, using and/or copying this software and database, you agree that you have read, understood, and will comply with these terms and conditions.:

Permission to use, copy, modify and distribute this software and database and its documentation for any purpose and without fee or royalty is hereby granted, provided that you agree to comply with the following copyright notice and statements, including the disclaimer, and that the same appear on ALL copies of the software, database and documentation, including modifications that you make for internal use or for distribution.

WordNet 1.6 Copyright 1997 by Princeton University. All rights reserved.

THIS SOFTWARE AND DATABASE IS PROVIDED "AS IS" AND PRINCETON UNIVERSITY MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PRINCETON UNIVERSITY MAKES NO REPRESENTATIONS OR WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE LICENSED SOFTWARE, DATABASE OR DOCUMENTATION WILL NOT INFRINGE ANY THIRD PARTY PATENTS, COPYRIGHTS, TRADEMARKS OR OTHER RIGHTS.

The name of Princeton University or Princeton may not be used in advertising or publicity pertaining to distribution of the software and/or database. Title to copyright in this software, database and any associated documentation shall at all times remain with Princeton University and LICENSEE agrees to preserve same.

The 40 level includes words from Alan's 3esl list found in version 4.0 of his 12dicts package. Like his other stuff the 3esl list is also in the public domain.

The 50 level includes Brian's frequency class 1, words appearing in at least 5 of 12 of the dictionaries as indicated in the 12Dicts package, and uppercase words in at least 4 of the previous 12 dictionaries. A decent number of proper names is also included: The top 1000 male, female, and Last names from the 1990 Census report; a list of names sent to me by Alan Beale; and a few names that I added myself. Finally a small list of abbreviations not commonly found in other word lists is included.

The name files from the Census report is a government document which I don't think can be copyrighted.

The file special-jargon.50 uses common.lst and word.lst from the "Unofficial Jargon File Word Lists" which is derived from "The Jargon File". All of which is in the Public Domain.

This file also contain
a few extra UNIX terms which are found in the file "unix-terms" in the
special/ directory.

The 55 level includes words from Alan's 2of4brif list found in version
4.0 of his 12dicts package. Like his other stuff the 2of4brif is also
in the public domain.

The 60 level includes all words appearing in at least 2 of the 12
dictionaries as indicated by the 12Dicts package.

The 70 level includes Brian's frequency class 0 and the 74,550 common
dictionary words from the MWords package. The common dictionary words,
like those from the 12Dicts package, have had all likely inflections
added. The 70 level also included the 5desk list from version 4.0 of
the 12Dics package which is in the public domain.

The 80 level includes the ENABLE word list, all the lists in the
ENABLE supplement package (except for ABLE), the "UK Advanced Cryptics
Dictionary" (UKACD), the list of signature words from the YAWL package,
and the 10,196 places list from the MWords package.

The
ENABLE package, mainted by M\Cooper <thegrendel@theriver.com>,
is in the Public Domain:

The ENABLE master word list, WORD.LST, is herewith formally released
into the Public Domain. Anyone is free to use it or distribute it in
any manner they see fit. No fee or registration is required for its
use nor are "contributions" solicited (if you feel you absolutely
must contribute something for your own peace of mind, the authors of
the ENABLE list ask that you make a donation on their behalf to your
favorite charity). This word list is our gift to the Scrabble
community, as an alternate to "official" word lists. Game designers
may feel free to incorporate the WORD.LST into their games. Please
mention the source and credit us as originators of the list. Note
that if you, as a game designer, use the WORD.LST in your product,
you may still copyright and protect your product, but you may *not*
legally copyright or in any way restrict redistribution of the
WORD.LST portion
of your product. This *may* under law restrict your
rights to restrict your users' rights, but that is only fair.

UKACD, by J Ross Beresford <ross@bryson.demon.co.uk>, is under the
following copyright:

Copyright (c) J Ross Beresford 1993-1999. All Rights Reserved.

The following restriction is placed on the use of this publication:
if The UK Advanced Cryptics Dictionary is used in a software package
or redistributed in any form, the copyright notice must be
prominently displayed and the text of this document must be included
verbatim.

There are no other restrictions: I would like to see the list
distributed as widely as possible.

The 95 level includes the 354,984 single words, 256,772 compound
words, 4,946 female names and the 3,897 male names, and 21,986 names
from the MWords package, ABLE.LST from the ENABLE Supplement, and some
additional words found in my part-of-speech database that were not
found anywhere else.

Accent information was taken from UKACD.

The

VarCon package was used to create the American, British, Canadian,
and Australian word list. It is under the following copyright:

Copyright 2000-2016 by Kevin Atkinson

Permission to use, copy, modify, distribute and sell this array, the
associated software, and its documentation for any purpose is hereby
granted without fee, provided that the above copyright notice appears
in all copies and that both that copyright notice and this permission
notice appear in supporting documentation. Kevin Atkinson makes no
representations about the suitability of this array for any
purpose. It is provided "as is" without express or implied warranty.

Copyright 2016 by Benjamin Titze

Permission to use, copy, modify, distribute and sell this array, the
associated software, and its documentation for any purpose is hereby

The name of Princeton University or Princeton may not be used in advertising or publicity pertaining to distribution of the software and/or database. Title to copyright in this software, database and any associated documentation shall at all times remain with Princeton University and LICENSEE agrees to preserve same.

The 40 level includes words from Alan's 3esl list found in version 4.0 of his 12dicts package. Like his other stuff the 3esl list is also in the

public domain.

The 50 level includes Brian's frequency class 1, words appearing in at least 5 of 12 of the dictionaries as indicated in the 12Dicts package, and uppercase words in at least 4 of the previous 12 dictionaries. A decent number of proper names is also included: The top 1000 male, female, and Last names from the 1990 Census report; a list of names sent to me by Alan Beale; and a few names that I added myself. Finally a small list of abbreviations not commonly found in other word lists is included.

The name files from the Census report is a government document which I don't think can be copyrighted.

The file special-jargon.50 uses common.lst and word.lst from the "Unofficial Jargon File Word Lists" which is derived from "The Jargon File". All of which is in the Public Domain. This file also contain a few extra UNIX terms which are found in the file "unix-terms" in the special/ directory.

The 55 level includes words from Alan's 2of4brif list found in version 4.0 of his 12dicts package. Like his other stuff the 2of4brif is also in the public domain.

The 60 level includes all words appearing in at least 2 of the 12 dictionaries as indicated by the 12Dicts package.

The 70 level includes Brian's frequency class 0 and the 74,550 common dictionary words from the MWords package. The common dictionary words, like those from the 12Dicts package, have had all likely inflections added. The 70 level also included the 5desk list from version 4.0 of the 12Dics package which is in the public domain.

The 80 level includes the ENABLE word list, all the lists in the ENABLE supplement package (except for ABLE), the "UK Advanced Cryptics Dictionary" (UKACD), the list of signature words from the YAWL package, and the 10,196 places list from the MWords package.

The ENABLE package, mainted by M\Cooper <thegrendel@theriver.com>, is in the Public Domain:

The ENABLE master word list, WORD.LST, is herewith formally released into the Public Domain. Anyone is free to use it or distribute it in any manner they see fit. No fee or registration is required for its use nor are "contributions"

solicited (if you feel you absolutely must contribute something for your own peace of mind, the authors of the ENABLE list ask that you make a donation on their behalf to your favorite charity). This word list is our gift to the Scrabble community, as an alternate to "official" word lists. Game designers may feel free to incorporate the WORD.LST into their games. Please mention the source and credit us as originators of the list. Note that if you, as a game designer, use the WORD.LST in your product, you may still copyright and protect your product, but you may *not* legally copyright or in any way restrict redistribution of the WORD.LST portion of your product. This *may* under law restrict your rights to restrict your users' rights, but that is only fair.

UKACD, by J Ross Beresford <ross@bryson.demon.co.uk>, is under the following copyright:

Copyright (c) J Ross Beresford 1993-1999. All Rights Reserved.

The following restriction is placed on the use of this publication:

if The UK Advanced Cryptics Dictionary is used in a software package or redistributed in any form, the copyright notice must be prominently displayed and the text of this document must be included verbatim.

There are no other restrictions: I would like to see the list distributed as widely as possible.

The 95 level includes the 354,984 single words, 256,772 compound words, 4,946 female names and the 3,897 male names, and 21,986 names from the MWords package, ABLE.LST from the ENABLE Supplement, and some additional words found in my part-of-speech database that were not found anywhere else.

Accent information was taken from UKACD.

The VarCon package was used to create the American, British, Canadian, and Australian word list. It is under the following copyright:

Copyright 2000-2016 by Kevin Atkinson

Permission to use, copy, modify, distribute and sell this array, the associated software, and its documentation for any purpose is hereby granted without fee, provided that the above copyright notice appears in all copies and that both that copyright notice and this permission notice appear in supporting documentation. LICENSE

The YAWL list, word.list, is in the Public Domain. There are no restrictions on its use or distribution.

The author decided to release the list into the Public Domain because it is based primarily on other Public Domain lists by the author and his colleague, Alan Beale, and applying the stricter GPL to it would therefore be of doubtful validity.

The author has also released the source code to "anagram" and "multi" (multiple word anagram) into the Public Domain. He had previously posted these utilities on the "alt.sources" newsgroup in shar archive form.

Please feel free to use the word list and/or source code in your own projects. It is, in fact, the intent of the author that this package inspire word game software for the Linux platform. If you use any portion of YAWL, please, as a courtesy, give credit to its author.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of,

the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You

meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding

those notices that do not

pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate

comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of,

publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this

License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding

those notices that do not

pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and

wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the

Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

The Apache Software Foundation (<http://www.apache.org/>).

1.167 go-immutable-radix 1.3.1

1.167.1 Available under license :

Mozilla Public License, version 2.0

1. Definitions

1.1. "Contributor"

means each individual or legal entity that creates, contributes to the creation of, or owns Covered Software.

1.2. "Contributor Version"

means the combination of the Contributions of others (if any) used by a Contributor and that particular Contributor's Contribution.

1.3. "Contribution"

means Covered Software of a particular Contributor.

1.4. "Covered Software"

means Source Code Form to which the initial Contributor has attached the notice in Exhibit A, the Executable Form of such Source Code Form, and Modifications of such Source Code Form, in each case including portions thereof.

1.5. "Incompatible With Secondary Licenses"

means

a. that the initial Contributor has attached the notice described in Exhibit B to the Covered Software; or

b. that the Covered Software was made available under the terms of version 1.1 or earlier of the

License, but not also under the terms of a Secondary License.

1.6. "Executable Form"

means any form of the work other than Source Code Form.

1.7. "Larger Work"

means a work that combines Covered Software with other material, in a

separate file or files, that is not Covered Software.

1.8. "License"

means this document.

1.9. "Licensable"

means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently, any and all of the rights conveyed by this License.

1.10. "Modifications"

means any of the following:

- a. any file in Source Code Form that results from an addition to, deletion from, or modification of the contents of Covered Software; or
- b. any new file in Source Code Form that contains any Covered Software.

1.11. "Patent Claims" of a Contributor

means any patent claim(s), including without limitation, method, process, and apparatus claims, in any patent Licensable by such Contributor that would be infringed, but for the grant of the License, by the making, using, selling, offering for sale, having made, import, or transfer of either its Contributions or its Contributor Version.

1.12. "Secondary License"

means either the GNU General Public License, Version 2.0, the GNU Lesser General Public License, Version 2.1, the GNU Affero General Public License, Version 3.0, or any later versions of those licenses.

1.13. "Source Code Form"

means the form of the work preferred for making modifications.

1.14. "You" (or "Your")

means an individual or a legal entity exercising rights under this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by

contract or

otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants and Conditions

2.1. Grants

Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

- a. under intellectual property rights (other than patent or trademark) Licensable by such Contributor to use, reproduce, make available, modify, display, perform, distribute, and otherwise exploit its Contributions, either on an unmodified basis, with Modifications, or as part of a Larger Work; and
- b. under Patent Claims of such Contributor to make, use, sell, offer for sale, have made, import, and otherwise transfer either its Contributions or its Contributor Version.

2.2. Effective Date

The licenses granted in Section 2.1 with respect to any Contribution become effective for each Contribution on the date the Contributor first distributes such Contribution.

2.3. Limitations on Grant Scope

The licenses granted in this Section 2 are the only rights granted under this License. No additional rights or licenses will be implied from the distribution or licensing of Covered Software under this License. Notwithstanding Section 2.1(b) above, no patent license is granted by a Contributor:

- a. for any code that a Contributor has removed from Covered Software; or
- b. for infringements caused by: (i) Your and any other third party's modifications of Covered Software, or (ii) the combination of its Contributions with other software (except as part of its Contributor Version); or
- c. under Patent Claims infringed by Covered Software in the absence of its Contributions.

This License does not grant any rights in the trademarks, service marks,

or logos of any Contributor (except as may be necessary to comply with the notice requirements in Section 3.4).

2.4. Subsequent Licenses

No Contributor makes additional grants as a result of Your choice to distribute the Covered Software under a subsequent version of this License (see Section 10.2) or under the terms of a Secondary License (if permitted under the terms of Section 3.3).

2.5. Representation

Each Contributor represents that the Contributor believes its Contributions are its original creation(s) or it has sufficient rights to grant the rights to its Contributions conveyed by this License.

2.6. Fair Use

This License is not intended to limit any rights You have under applicable copyright doctrines of fair use, fair dealing, or other equivalents.

2.7. Conditions

Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted in Section 2.1.

3. Responsibilities

3.1. Distribution of Source Form

All distribution of Covered Software in Source Code Form, including any Modifications that You create or to which You contribute, must be under the terms of this License. You must inform recipients that the Source Code Form of the Covered Software is governed by the terms of this License, and how they can obtain a copy of this License. You may not attempt to alter or restrict the recipients' rights in the Source Code Form.

3.2. Distribution of Executable Form

If You distribute Covered Software in Executable Form then:

- a. such Covered Software must also be made available in Source Code Form, as described in Section 3.1, and You must inform recipients of the

Executable Form how they can obtain a copy of such Source Code Form by reasonable means in a timely manner, at a charge no more than the cost of distribution to the recipient; and

b. You may distribute such Executable Form under the terms of this License, or sublicense it under different terms, provided that the license for the Executable Form does not attempt to limit or alter the recipients' rights in the Source Code Form under this License.

3.3. Distribution of a Larger Work

You may create and distribute a Larger Work under terms of Your choice, provided that You also comply with the requirements of this License for the Covered Software. If the Larger Work is a combination of Covered Software with a work governed by one or more Secondary Licenses, and the Covered Software is not Incompatible With Secondary Licenses, this License permits You to additionally distribute such Covered Software under the terms of such Secondary License(s), so that the recipient of the Larger Work may, at their option, further distribute the Covered Software under the terms of either this License or such Secondary License(s).

3.4. Notices

You may not remove or alter the substance of any license notices (including copyright notices, patent notices, disclaimers of warranty, or limitations of liability) contained within the Source Code Form of the Covered Software, except that You may alter any license notices to the extent required to remedy known factual inaccuracies.

3.5. Application of Additional Terms

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, You may do so only on Your own behalf, and not on behalf of any Contributor. You must make it absolutely clear that any such warranty, support, indemnity, or liability obligation is offered by You alone, and You hereby agree to indemnify every Contributor for any liability incurred by such Contributor as a result of warranty, support, indemnity or liability terms You offer. You may include additional disclaimers of warranty and limitations of liability specific to any jurisdiction.

4. Inability to Comply Due to Statute or Regulation

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Software due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be placed in a text file included with all distributions of the Covered Software under this License. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Termination

5.1. The rights granted under this License will terminate automatically if You fail to comply with any of its terms. However, if You become compliant, then the rights granted under this License from a particular Contributor are reinstated (a) provisionally, unless and until such Contributor explicitly

and finally terminates Your grants, and (b) on an ongoing basis, if such Contributor fails to notify You of the non-compliance by some reasonable means prior to 60 days after You have come back into compliance. Moreover, Your grants from a particular Contributor are reinstated on an ongoing basis if such Contributor notifies You of the non-compliance by some reasonable means, this is the first time You have received notice of non-compliance with this License from such Contributor, and You become compliant prior to 30 days after Your receipt of the notice.

5.2. If You initiate litigation against any entity by asserting a patent infringement claim (excluding declaratory judgment actions, counter-claims, and cross-claims) alleging that a Contributor Version directly or indirectly infringes any patent, then the rights granted to You by any and all Contributors for the Covered Software under Section 2.1 of this License shall terminate.

5.3. In the event of termination under Sections 5.1 or 5.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or Your distributors under this License prior to termination shall survive termination.

6. Disclaimer of Warranty

Covered Software is provided under this License on an "as is" basis, without warranty of any kind, either expressed, implied, or statutory, including, without limitation, warranties that the Covered Software is free of defects, merchantable, fit for a particular purpose or non-infringing.

The entire risk as to the quality and performance of the Covered Software is with You. Should any Covered Software prove defective in any respect,

You (not any Contributor) assume the cost of any necessary servicing, repair, or correction. This disclaimer of warranty constitutes an essential part of this License. No use of any Covered Software is authorized under this License except under this disclaimer.

7. Limitation of Liability

Under no circumstances and under no legal theory, whether tort (including negligence), contract, or otherwise, shall any Contributor, or anyone who distributes Covered Software as permitted above, be liable to You for any direct, indirect, special, incidental, or consequential damages of any character including, without limitation, damages for lost profits, loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses, even if such party shall have been informed of the possibility of such damages. This limitation of liability shall not apply to liability for death or personal injury resulting from such party's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to You.

8. Litigation

Any litigation relating to this License may be brought only in the courts of a jurisdiction where the defendant maintains its principal place of business and such litigation shall be governed by laws of that jurisdiction, without reference to its conflict-of-law provisions. Nothing in this Section shall prevent a party's ability to bring cross-claims or counter-claims.

9. Miscellaneous

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not be used to construe this License against a Contributor.

10. Versions of the License

10.1. New Versions

Mozilla Foundation is the license steward. Except as provided in Section

10.3, no one other than the license steward has the right to modify or publish new versions of this License. Each version will be given a distinguishing version number.

10.2. Effect of New Versions

You may distribute the Covered Software under the terms of the version of the License under which You originally received the Covered Software, or under the terms of any subsequent version published by the license steward.

10.3. Modified Versions

If you create software not governed by this License, and you want to create a new license for such software, you may create and use a modified version of this License if you rename the license and remove any references to the name of the license steward (except to note that such modified license differs from this License).

10.4. Distributing Source Code Form that is Incompatible With Secondary Licenses If You choose to distribute Source Code Form that is Incompatible

With Secondary Licenses under the terms of this version of the License, the notice described in Exhibit B of this License must be attached.

Exhibit A - Source Code Form License Notice

This Source Code Form is subject to the terms of the Mozilla Public License, v. 2.0. If a copy of the MPL was not distributed with this file, You can obtain one at <http://mozilla.org/MPL/2.0/>.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

Exhibit B - "Incompatible With Secondary Licenses" Notice

This Source Code Form is "Incompatible With Secondary Licenses", as defined by the Mozilla Public License, v. 2.0.

1.171.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership

of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual,

worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this

License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not

pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or

documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct,

indirect, special,

incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Version 2.0, January 2004

<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of

the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this

License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or

agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership
of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source, and configuration files.

"Object" form shall mean any form resulting from mechanical

transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made,

use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding

those notices that do not

pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity,

or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

THIS SOFTWARE IS PROVIDED BY ERIC YOUNG ``AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The license and distribution terms for any publically available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution license [including the GNU Public License.]

The reason behind this being stated in this direct manner is past experience in code simply being copied and the attribution removed from it and then being distributed as part of other packages. This

implementation was a non-trivial and unpaid effort.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts
as the successor of the GNU Library Public License, version 2, hence
the version number 2.1.]

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
Licenses are intended to guarantee your freedom to share and change
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some
specially designated software packages--typically libraries--of the
Free Software Foundation and other authors who
decide to use it. You
can use it too, but we suggest you first think carefully about whether
this license or the ordinary General Public License is the better
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,
not price. Our General Public Licenses are designed to make sure that
you have the freedom to distribute copies of free software (and charge
for this service if you wish); that you receive source code or can get
it if you want it; that you can change the software and use pieces of
it in new free programs; and that you are informed that you can do
these things.

To protect your rights, we need to make restrictions that forbid
distributors to deny you these rights or to ask you to surrender these
rights. These restrictions translate to certain responsibilities for
you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library,
whether gratis
or for a fee, you must give the recipients all the rights that we gave
you. You must make sure that they, too, receive or can get the source
code. If you link other code with the library, you must provide
complete object files to the recipients, so that they can relink them
with the library after making changes to the library and recompiling
it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the

library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting

the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation

and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any

application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public

License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding

machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse

engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)
- b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
- c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is

normally

distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the

Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey

the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990

Ty Coon, President of Vice

That's all there is to it!

No license file was found, but licenses were detected in source scan.

This file maps Internet media types to unique file extension(s).
Although created for httpd, this file is used by many software systems
and has been placed in the public domain for unlimited redistribution.

```

#
# The table below contains both registered and (common) unregistered types.
# A type that has no unique extension can be ignored -- they are listed
# here to guide configurations toward known types and to make it easier to
# identify "new" types. File extensions are also commonly used to indicate
# content languages and encodings, so choose them carefully.
#
# Internet media types should be registered as described in RFC 4288.
# The registry is at <https://www.iana.org/assignments/media-types/>.
#
# This file was retrieved from
https://svn.apache.org/viewvc/httpd/httpd/trunk/docs/conf/mime.types?revision=1752884&view=co

PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using this software ("Python") in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006 Python Software Foundation; All Rights Reserved" are retained in Python alone or in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF

trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python, Licensee agrees to be bound by the terms and conditions of this License Agreement.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your

freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price.

Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively

when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is

allowed only for noncommercial distribution
and only if you
received the program in object code or executable form with such
an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute
it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

<signature of Ty Coon>, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this

is what you want to do, use the GNU Lesser General Public License instead of this License.

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps:

(1)

assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand

ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and

"recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work

in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The

"System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system

(if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed;

section 10
makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from

a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work,

for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions;

the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and

propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights

granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a

party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this

License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17.

Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where

the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <<http://www.gnu.org/licenses/>>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>  
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <<http://www.gnu.org/licenses/>>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <<http://www.gnu.org/philosophy/why-not-lgpl.html>>.

XZ Utils Licensing
=====

Different licenses apply to different files in this package. Here is a rough summary of which licenses apply to which parts of this package (but check the individual files to be sure!):

- liblzma is in the public domain.
- xz, xzdec, and lzmadec command line tools are in the public domain unless GNU getopt_long had to be compiled and linked in from the lib directory. The getopt_long code is under GNU LGPLv2.1+.
- The scripts to grep, diff, and view compressed files have been adapted from gzip. These scripts and their documentation are under GNU GPLv2+.
- All the documentation in the doc directory and most of the XZ Utils specific documentation files in other directories are in the public domain.
- Translated messages are in the public domain.
- The build system contains public domain files, and files that are under GNU GPLv2+ or GNU GPLv3+. None of these files end up in the binaries being built.
- Test files and test code in the tests directory, and debugging utilities in the debug directory are in the public domain.
- The extra directory may contain public domain files, and files that are under various free software licenses.

You can do whatever you want with the files that have been put into the public domain. If you find public domain legally problematic, take the previous sentence as a license grant. If you still find the lack of copyright legally problematic, you have too many lawyers.

As usual, this software is provided "as is", without any warranty.

If you copy significant amounts of public domain code from XZ Utils into your project, acknowledging this somewhere in your software is polite (especially if it is proprietary, non-free software), but naturally it is not legally required. Here is an example of a good notice to put into "about box" or into documentation:

This software includes code from XZ Utils <<https://tukaani.org/xz/>>.

The following license texts are included in the following files:

- COPYING.LGPLv2.1: GNU Lesser General Public License version 2.1
- COPYING.GPLv2: GNU General Public License version 2
- COPYING.GPLv3: GNU General Public License version 3

Note that the toolchain (compiler, linker etc.) may add some code pieces that are copyrighted. Thus, it is possible that e.g. liblzma binary wouldn't actually be in the public domain in its entirety even though it contains no copyrighted code from the XZ Utils source package.

If you have questions, don't hesitate to ask the author(s) for more information.

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps:

(1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand

ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of

interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The

"System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not

convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to

produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

- a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years

and valid for as

long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular

product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the

entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains

a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work

occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant

patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this

License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory

patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the

GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17.

Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>  
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <<http://www.gnu.org/philosophy/why-not-lgpl.html>>.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity

exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the

Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this

License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents

of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill,

work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner

or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices

stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership
of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source, and configuration files.

"Object" form shall mean any form resulting from mechanical

transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made,

use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding

those notices that do not

pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity,

or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

Mozilla Public License Version 2.0

=====

1. Definitions

1.1. "Contributor"

means each individual or legal entity that creates, contributes to the creation of, or owns Covered Software.

1.2. "Contributor Version"

means the combination of the Contributions of others (if any) used by a Contributor and that particular Contributor's Contribution.

1.3. "Contribution"

means Covered Software of a particular Contributor.

1.4. "Covered Software"

means Source Code

Form to which the initial Contributor has attached the notice in Exhibit A, the Executable Form of such Source Code Form, and Modifications of such Source Code Form, in each case including portions thereof.

1.5. "Incompatible With Secondary Licenses"

means

(a) that the initial Contributor has attached the notice described in Exhibit B to the Covered Software; or

(b) that the Covered Software was made available under the terms of version 1.1 or earlier of the License, but not also under the terms of a Secondary License.

1.6. "Executable Form"

means any form of the work other than Source Code Form.

1.7. "Larger Work"

means a work that combines Covered Software with other material, in a separate file or files, that is not Covered Software.

1.8. "License"

means this document.

1.9. "Licensable"

means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently, any and all of the rights conveyed by this License.

1.10. "Modifications"

means any of the following:

(a) any file in Source Code Form that results from an addition to, deletion from, or modification of the contents of Covered Software; or

(b) any new file in Source Code Form that contains any Covered Software.

1.11. "Patent Claims" of a Contributor

means any patent claim(s), including without limitation, method, process, and apparatus claims, in any patent Licensable by such Contributor that would be infringed, but for the grant of the License, by the making, using, selling, offering for sale, having made, import, or transfer of either its Contributions or its Contributor Version.

1.12. "Secondary License"

means either the GNU General Public License, Version 2.0, the GNU Lesser General Public License, Version 2.1, the GNU Affero General Public License, Version 3.0, or any later versions of those

licenses.

1.13. "Source Code Form"

means the form of the work preferred for making modifications.

1.14. "You" (or "Your")

means an individual or a legal entity exercising rights under this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants and Conditions

2.1. Grants

Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

- (a) under intellectual property rights (other than patent or trademark) Licensable by such Contributor to use, reproduce, make available, modify, display, perform, distribute, and otherwise exploit its Contributions, either on an unmodified basis, with Modifications, or as part of a Larger Work; and
- (b) under Patent Claims of such Contributor to make, use, sell, offer for sale, have made, import, and otherwise transfer either its Contributions or its Contributor Version.

2.2. Effective Date

The licenses granted in Section 2.1 with respect to any Contribution become effective for each Contribution on the date the Contributor first distributes such Contribution.

2.3. Limitations on Grant Scope

The licenses granted in this Section 2 are the only rights granted under this License. No additional rights or licenses will be implied from the distribution or licensing of Covered Software under this License. Notwithstanding Section 2.1(b) above, no patent license is granted by a Contributor:

- (a) for any code that a Contributor has removed from Covered Software; or
- (b) for infringements caused by: (i) Your and any other third party's modifications

of Covered Software, or (ii) the combination of its Contributions with other software (except as part of its Contributor Version); or

(c) under Patent Claims infringed by Covered Software in the absence of its Contributions.

This License does not grant any rights in the trademarks, service marks, or logos of any Contributor (except as may be necessary to comply with the notice requirements in Section 3.4).

2.4. Subsequent Licenses

No Contributor makes additional grants as a result of Your choice to distribute the Covered Software under a subsequent version of this License (see Section 10.2) or under the terms of a Secondary License (if permitted under the terms of Section 3.3).

2.5. Representation

Each Contributor represents that the Contributor believes its Contributions are its original creation(s) or it has sufficient rights to grant the rights to its Contributions conveyed by this License.

2.6. Fair Use

This License is not intended to limit any rights You have under applicable copyright doctrines of fair use, fair dealing, or other equivalents.

2.7. Conditions

Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted in Section 2.1.

3. Responsibilities

3.1. Distribution of Source Form

All distribution of Covered Software in Source Code Form, including any Modifications that You create or to which You contribute, must be under the terms of this License. You must inform recipients that the Source Code Form of the Covered Software is governed by the terms of this License, and how they can obtain a copy of this License. You may not attempt to alter or restrict the recipients' rights in the Source Code Form.

3.2. Distribution of Executable Form

If You distribute Covered Software in Executable Form then:

- (a) such Covered Software must also be made available in Source Code Form, as described in Section 3.1, and You must inform recipients of the Executable Form how they can obtain a copy of such Source Code Form by reasonable means in a timely manner, at a charge no more than the cost of distribution to the recipient; and
- (b) You may distribute such Executable Form under the terms of this License, or sublicense it under different terms, provided that the license for the Executable Form does not attempt to limit or alter the recipients' rights in the Source Code Form under this License.

3.3. Distribution of a Larger Work

You may create and distribute a Larger Work under terms of Your choice, provided that You also comply with the requirements of this License for the Covered Software. If the Larger Work is a combination of Covered Software with a work governed by one or more Secondary Licenses, and the Covered Software is not Incompatible With Secondary Licenses, this License permits You to additionally distribute such Covered Software under the terms of such Secondary License(s), so that the recipient of the Larger Work may, at their option, further distribute the Covered Software under the terms of either this License or such Secondary License(s).

3.4. Notices

You may not remove or alter the substance of any license notices (including copyright notices, patent notices, disclaimers of warranty, or limitations of liability) contained within the Source Code Form of the Covered Software, except that You may alter any license notices to the extent required to remedy known factual inaccuracies.

3.5. Application of Additional Terms

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, You may do so only on Your own behalf, and not on behalf of any Contributor. You must make it absolutely clear that any such warranty, support, indemnity, or liability obligation is offered by You alone, and You hereby agree to indemnify every Contributor for any liability incurred by such Contributor as a result of warranty, support,

indemnity or liability terms You offer. You may include additional disclaimers of warranty and limitations of liability specific to any jurisdiction.

4. Inability to Comply Due to Statute or Regulation

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Software due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be placed in a text file included with all distributions of the Covered Software under this License. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Termination

5.1. The rights granted under this License will terminate automatically if You fail to comply with any of its terms. However, if You become compliant, then the rights granted under this License from a particular Contributor are reinstated (a) provisionally, unless and until such Contributor explicitly and finally terminates Your grants, and (b) on an ongoing basis, if such Contributor fails to notify You of the non-compliance by some reasonable means prior to 60 days after You have come back into compliance. Moreover, Your grants from a particular Contributor are reinstated on an ongoing basis if such Contributor notifies You of the non-compliance by some reasonable means, this is the first time You have received notice of non-compliance with this License from such Contributor, and You become compliant prior to 30 days after Your receipt of the notice.

5.2. If You initiate litigation against any entity by asserting a patent infringement claim (excluding declaratory judgment actions, counter-claims, and cross-claims) alleging that a Contributor Version directly or indirectly infringes any patent, then the rights granted to You by any and all Contributors for the Covered Software under Section 2.1 of this License shall terminate.

5.3. In the event of termination under Sections 5.1 or 5.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or Your distributors under this License prior to termination shall survive termination.

* *
 * 6. Disclaimer of Warranty *
 * ----- *
 * *
 * Covered Software is provided under this License on an "as is" *
 * basis, without warranty of any kind, either expressed, implied, or *
 * statutory, including, without limitation, warranties that the *
 * Covered Software is *
 * free of defects, merchantable, fit for a *
 * particular purpose or non-infringing. The entire risk as to the *
 * quality and performance of the Covered Software is with You. *
 * Should any Covered Software prove defective in any respect, You *
 * (not any Contributor) assume the cost of any necessary servicing, *
 * repair, or correction. This disclaimer of warranty constitutes an *
 * essential part of this License. No use of any Covered Software is *
 * authorized under this License except under this disclaimer. *
 * *

* *
 * 7. Limitation of Liability *
 * ----- *
 * *
 * *
 * Under no circumstances and under no legal theory, whether tort *
 * (including negligence), contract, or otherwise, shall any *
 * Contributor, or anyone who distributes Covered Software as *
 * permitted above, be liable to You for any direct, indirect, *
 * special, incidental, or consequential damages of any character *
 * including, without limitation, damages for lost profits, loss of *
 * goodwill, work stoppage, computer failure or malfunction, or any *
 * and all other commercial damages or losses, even if such party *
 * shall have been informed of the possibility of such damages. This *
 * limitation of liability shall not apply to liability for death or *
 * personal injury resulting from such party's negligence to the *
 * extent applicable law prohibits such limitation. Some *
 * jurisdictions do not allow the exclusion or limitation *
 * of *
 * incidental or consequential damages, so this exclusion and *
 * limitation may not apply to You. *
 * *

8. Litigation

Any litigation relating to this License may be brought only in the courts of a jurisdiction where the defendant maintains its principal place of business and such litigation shall be governed by laws of that jurisdiction, without reference to its conflict-of-law provisions. Nothing in this Section shall prevent a party's ability to bring cross-claims or counter-claims.

9. Miscellaneous

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not be used to construe this License against a Contributor.

10. Versions of the License

10.1. New Versions

Mozilla Foundation is the license steward. Except as provided in Section 10.3, no one other than the license steward has the right to modify or publish new versions of this License. Each version will be given a distinguishing version number.

10.2. Effect of New Versions

You may distribute the Covered Software under the terms of the version of the License under which You originally received the Covered Software, or under the terms of any subsequent version published by the license steward.

10.3. Modified Versions

If you create software not governed by this License, and you want to create a new license for such software, you may create and use a modified version of this License if you rename the license and remove any references to the name of the license steward (except to note that such modified license differs from this License).

10.4. Distributing Source Code Form that is Incompatible With Secondary Licenses

If You choose to distribute Source Code Form that is Incompatible With Secondary Licenses under the terms of this version of the License, the notice described in Exhibit B of this License must be attached.

Exhibit A - Source Code Form License Notice

This Source Code Form is subject to the terms of the Mozilla Public License, v. 2.0. If a copy of the MPL was not distributed with this file, You can obtain one at <http://mozilla.org/MPL/2.0/>.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

Exhibit B - "Incompatible With Secondary Licenses" Notice

This Source Code Form is "Incompatible With Secondary Licenses", as defined by the Mozilla Public License, v. 2.0.

1.204.1 Available under license :

Mozilla Public License, version 2.0

1. Definitions

1.1. "Contributor"

means each individual or legal entity that creates, contributes to the creation of, or owns Covered Software.

1.2. "Contributor Version"

means the combination of the Contributions of others (if any) used by a Contributor and that particular Contributor's Contribution.

1.3. "Contribution"

means Covered Software of a particular Contributor.

1.4. "Covered Software"

means Source Code Form to which the initial Contributor has attached the notice in Exhibit A, the Executable Form of such Source Code Form, and Modifications of such Source Code Form, in each case including portions thereof.

1.5. "Incompatible With Secondary Licenses"

means

a. that the initial Contributor has attached the notice described in Exhibit B to the Covered Software; or

b. that the Covered Software was made available under the terms of version 1.1 or earlier of the License, but not also under the terms of a Secondary License.

1.6. "Executable Form"

means any form of the work other than Source Code Form.

1.7. "Larger Work"

means a work that combines Covered Software with other material, in a separate file or files, that is not Covered Software.

1.8. "License"

means this document.

1.9. "Licensable"

means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently, any and all of the rights conveyed by this License.

1.10. "Modifications"

means any of the following:

a. any file in Source Code Form that results from an addition to, deletion from, or modification of the contents of Covered Software; or

b. any new file in Source Code Form that contains any Covered Software.

1.11. "Patent Claims" of a Contributor

means any patent claim(s), including without limitation, method, process, and apparatus claims, in any patent Licensable by such Contributor that would be infringed, but for the grant of the License, by the making, using, selling, offering for sale, having made, import, or transfer of either its Contributions or its Contributor Version.

1.12. "Secondary License"

means either the GNU General Public License, Version 2.0, the GNU Lesser General Public License, Version 2.1, the GNU Affero General Public License, Version 3.0, or any later versions of those licenses.

1.13. "Source Code Form"

means the form of the work preferred for making modifications.

1.14. "You" (or "Your")

means an individual or a legal entity exercising rights under this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants and Conditions

2.1. Grants

Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

- a. under intellectual property rights (other than patent or trademark) Licensable by such Contributor to use, reproduce, make available, modify, display, perform, distribute, and otherwise exploit its Contributions, either on an unmodified basis, with Modifications, or as part of a Larger Work; and
- b. under Patent Claims of such Contributor to make, use, sell, offer for sale, have made, import, and otherwise transfer either its

Contributions or its Contributor Version.

2.2. Effective Date

The licenses granted in Section 2.1 with respect to any Contribution become effective for each Contribution on the date the Contributor first distributes such Contribution.

2.3. Limitations on Grant Scope

The licenses granted in this Section 2 are the only rights granted under this License. No additional rights or licenses will be implied from the distribution or licensing of Covered Software under this License. Notwithstanding Section 2.1(b) above, no patent license is granted by a Contributor:

- a. for any code that a Contributor has removed from Covered Software; or
- b. for infringements caused by: (i) Your and any other third party's modifications of Covered Software, or (ii) the combination of its Contributions with other software (except as part of its Contributor Version); or
- c. under Patent Claims infringed by Covered Software in the absence of its Contributions.

This License does not grant any rights in the trademarks, service marks, or logos of any Contributor (except as may be necessary to comply with the notice requirements in Section 3.4).

2.4. Subsequent Licenses

No Contributor makes additional grants as a result of Your choice to distribute the Covered Software under a subsequent version of this License (see Section 10.2) or under the terms of a Secondary License (if permitted under the terms of Section 3.3).

2.5. Representation

Each Contributor represents that the Contributor believes its Contributions are its original creation(s) or it has sufficient rights to grant the rights to its Contributions conveyed by this License.

2.6. Fair Use

This License is not intended to limit any rights You have under

applicable copyright doctrines of fair use, fair dealing, or other equivalents.

2.7. Conditions

Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted in Section 2.1.

3. Responsibilities

3.1. Distribution of Source Form

All distribution of Covered Software in Source Code Form, including any Modifications that You create or to which You contribute, must be under the terms of this License. You must inform recipients that the Source Code Form of the Covered Software is governed by the terms of this License, and how they can obtain a copy of this License. You may not attempt to alter or restrict the recipients' rights in the Source Code Form.

3.2. Distribution of Executable Form

If You distribute Covered Software in Executable Form then:

- a. such Covered Software must also be made available in Source Code Form, as described in Section 3.1, and You must inform recipients of the Executable Form how they can obtain a copy of such Source Code Form by reasonable means in a timely manner, at a charge no more than the cost of distribution to the recipient; and
- b. You may distribute such Executable Form under the terms of this License, or sublicense it under different terms, provided that the license for the Executable Form does not attempt to limit or alter the recipients' rights in the Source Code Form under this License.

3.3. Distribution of a Larger Work

You may create and distribute a Larger Work under terms of Your choice, provided that You also comply with the requirements of this License for the Covered Software. If the Larger Work is a combination of Covered Software with a work governed by one or more Secondary Licenses, and the Covered Software is not Incompatible With Secondary Licenses, this License permits You to additionally distribute such Covered Software under the terms of such Secondary License(s), so that the recipient of the Larger Work may, at their option, further distribute the Covered

Software under the terms of either this License or such Secondary License(s).

3.4. Notices

You may not remove or alter the substance of any license notices (including copyright notices, patent notices, disclaimers of warranty, or limitations of liability) contained within the Source Code Form of the Covered Software, except that You may alter any license notices to the extent required to remedy known factual inaccuracies.

3.5. Application of Additional Terms

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, You may do so only on Your own behalf, and not on behalf of any Contributor. You must make it absolutely clear that any such warranty, support, indemnity, or liability obligation is offered by You alone, and You hereby agree to indemnify every Contributor for any liability incurred by such Contributor as a result of warranty, support, indemnity or liability terms You offer. You may include additional disclaimers of warranty and limitations of liability specific to any jurisdiction.

4. Inability to Comply Due to Statute or Regulation

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Software due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be placed in a text file included with all distributions of the Covered Software under this License. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Termination

5.1. The rights granted under this License will terminate automatically if You fail to comply with any of its terms. However, if You become compliant, then the rights granted under this License from a particular Contributor are reinstated (a) provisionally, unless and until such Contributor explicitly and finally terminates Your grants, and (b) on an ongoing basis, if such Contributor fails to notify You of the non-compliance by some reasonable means prior to 60 days after You have come back into

compliance. Moreover, Your grants from a particular Contributor are reinstated on an ongoing basis if such Contributor notifies You of the non-compliance by some reasonable means, this is the first time You have received notice of non-compliance with this License from such Contributor, and You become compliant prior to 30 days after Your receipt of the notice.

5.2. If You initiate litigation against any entity by asserting a patent infringement claim (excluding declaratory judgment actions, counter-claims, and cross-claims) alleging that a Contributor Version directly or indirectly infringes any patent, then the rights granted to You by any and all Contributors for the Covered Software under Section 2.1 of this License shall terminate.

5.3. In the event of termination under Sections 5.1 or 5.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or Your distributors under this License prior to termination shall survive termination.

6. Disclaimer of Warranty

Covered Software is provided under this License on an "as is" basis, without warranty of any kind, either expressed, implied, or statutory, including, without limitation, warranties that the Covered Software is free of defects, merchantable, fit for a particular purpose or non-infringing. The entire risk as to the quality and performance of the Covered Software is with You. Should any Covered Software prove defective in any respect, You (not any Contributor) assume the cost of any necessary servicing, repair, or correction. This disclaimer of warranty constitutes an essential part of this License. No use of any Covered Software is authorized under this License except under this disclaimer.

7. Limitation of Liability

Under no circumstances and under no legal theory, whether tort (including negligence), contract, or otherwise, shall any Contributor, or anyone who distributes Covered Software as permitted above, be liable to You for any direct, indirect, special, incidental, or consequential damages of any character including, without limitation, damages for lost profits, loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses, even if such party shall have been informed of the possibility of such damages. This limitation of liability shall not apply to liability for death or personal injury resulting from such party's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may

not
apply to You.

8. Litigation

Any litigation relating to this License may be brought only in the courts of a jurisdiction where the defendant maintains its principal place of business and such litigation shall be governed by laws of that jurisdiction, without reference to its conflict-of-law provisions. Nothing in this Section shall prevent a party's ability to bring cross-claims or counter-claims.

9. Miscellaneous

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not be used to construe this License against a Contributor.

10. Versions of the License

10.1. New Versions

Mozilla Foundation is the license steward. Except as provided in Section

10.3, no one other than the license steward has the right to modify or publish new versions of this License. Each version will be given a distinguishing version number.

10.2. Effect of New Versions

You may distribute the Covered Software under the terms of the version of the License under which You originally received the Covered Software, or under the terms of any subsequent version published by the license steward.

10.3. Modified Versions

If you create software not governed by this License, and you want to create a new license for such software, you may create and use a modified version of this License if you rename the license and remove any references to the name of the license steward (except to note that such modified license differs from this License).

10.4. Distributing Source Code Form that is Incompatible With Secondary

Licenses If You choose to distribute Source Code Form that is Incompatible With Secondary Licenses under the terms of this version of the License, the notice described in Exhibit B of this License must be attached.

Exhibit A - Source Code Form License Notice

This Source Code Form is subject to the terms of the Mozilla Public License, v. 2.0. If a copy of the MPL was not distributed with this file, You can obtain one at <http://mozilla.org/MPL/2.0/>.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

Exhibit B - "Incompatible With Secondary Licenses" Notice

This Source Code Form is "Incompatible With Secondary Licenses", as defined by the Mozilla Public License, v. 2.0.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by

the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price.

Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed

under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this

License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for

making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot

distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of

this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify
it under the terms of the GNU

General Public License as published by

the Free Software Foundation; either version 2 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License along
with this program; if not, write to the Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author

Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.

This is free software, and you are welcome to redistribute

it

under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program

`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this

is what you want to do, use the GNU Lesser General Public License instead of this License.

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them

with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes

a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public

License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or

derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a

work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)
- b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
- c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the

Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying

the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse

you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system

which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus

excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF

SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

UNICODE, INC. LICENSE AGREEMENT - DATA FILES AND SOFTWARE

Unicode Data Files include all data files under the directories <http://www.unicode.org/Public/>, <http://www.unicode.org/reports/>, and <http://www.unicode.org/cldr/data/>. Unicode Data Files do not include PDF online code charts under the directory <http://www.unicode.org/Public/>. Software includes any source code published in the Unicode Standard or under the directories <http://www.unicode.org/Public/>, <http://www.unicode.org/reports/>, and <http://www.unicode.org/cldr/data/>.

This software is not subject to any license of the American Telephone and Telegraph Company or of the Regents of the University of California.

Permission is granted to anyone to use this software for any purpose on any computer system, and to alter it and redistribute it, subject to the following restrictions:

1. The author is not responsible for the consequences of use of this software, no matter how awful, even if they arise from flaws in it.
2. The origin of this software must not be misrepresented, either by

explicit claim or by omission. Since few users ever read sources, credits must appear in the documentation.

3. Altered versions must be plainly marked as such, and must not be misrepresented as being the original software. Since few users ever read sources, credits must appear in the documentation.
4. This notice may not be removed or altered.

The file `posix/PCRE.tests`
is copyright University of Cambridge:

Copyright (c) 1997-2003 University of Cambridge

Permission is granted to anyone to use this software for any purpose on any computer system, and to redistribute it freely, subject to the following restrictions:

1. This software is distributed in the hope that it will be useful, but **WITHOUT ANY WARRANTY**; without even the implied warranty of **MERCHANTABILITY** or **FITNESS FOR A PARTICULAR PURPOSE**.
2. The origin of this software must not be misrepresented, either by explicit claim or by omission. In practice, this means that if you use PCRE in software that you distribute to others, commercially or otherwise, you must put a sentence like this

Regular expression support is provided by the PCRE library package, which is open source software, written by Philip Hazel, and copyright by the University of Cambridge, England.

somewhere reasonably visible in your documentation and in any relevant files or online help data or similar. A reference to the ftp site for the source, that is, to

`ftp://ftp.csx.cam.ac.uk/pub/software/programming/pcre/`

should also be given in the documentation. However, this condition is not intended to apply to whole chains of software. If package A includes PCRE, it must acknowledge it, but if package B is software that includes package A, the condition is not imposed on package B (unless it uses PCRE independently).

3. Altered versions must be plainly marked as such, and must not be misrepresented as being the original software.
4. If PCRE is embedded in any software that is released under the GNU

General Purpose Licence (GPL), or Lesser General Purpose Licence (LGPL), then the terms of that licence shall supersede any condition above with which it is incompatible.

1.207 open-ldap 2.4.57+dfsg-3+deb11u1

1.207.1 Available under license :

This package was downloaded from:

<<http://www.openldap.org/>>

The upstream distribution has been repackaged to remove the RFCs and Internet-Drafts included in the upstream distribution, since the Internet Society license does not meet the Debian Free Software Guidelines. The schema files that contain verbatim text from RFCs or Internet-Drafts have similarly been removed and are replaced during the package build with versions stripped of the literal RFC or Internet-Draft text.

```

This license was present in the copies of several schema files and one LDIF file as distributed upstream. The relevant content has been removed except where it is purely functional (descriptions of an LDAP schema). The copyright notice has been retained with a clarifying comment. The provisions in the above license that prohibit modification therefore should no longer apply to any files distributed with the Debian package.

Several files in libraries/libldap also reference this license as the copyright on ABNF sequences embedded as comments in those files. These too are purely functional interface specifications distributed as part of the LDAP protocol standard and do not contain creative work such as free-form text.

Local-Date: Fri, 06 Jun 2003 13:18:52 -0400
Date: Fri, 6 Jun 2003 10:18:52 -0700
From: Juan Gomez <juang@us.ibm.com>
To: Stephen Frost <sfrost@debian.org>
X-Mailer: Lotus Notes Release 5.0.2a (Intl) 23 November 1999
Subject: Re: Juan C. Gomez license in OpenLDAP Source

Stephen,

"There is no restriction on modifications and derived works" on the work I did for the openldap server as long as this is consistent with the openldap license. Please forward this email to Kurt so he does the appropriate changes to the files to reflect this.

Regards, Juan

Date: Thu, 5 Jun 2003 16:53:32 -0400 (EDT)
From: Mark Adamson <adamson@andrew.cmu.edu>

To: Stephen Frost <sfrost@debian.org>
Subject: Re: Mark Adamson license in OpenLDAP source

Hi Stephen,

I don't see how this conflicts with the Debian FSG. The first statement in the copyright pertaining to CMU say only that we don't license out the software. The second mention denies the right to say things like,

"Now!

Powered by software from Carnegie Mellon!" There is no restriction on modifications and derived works.

After discussing this license with the OpenLDAP Foundation we received clarification on it:

- * To: Stephen Frost <sfrost@snowman.net>
- * Subject: Re: OpenLDAP Licenseing issues
- * From: "Kurt D. Zeilenga" <Kurt@OpenLDAP.org>
- * Date: Wed, 28 May 2003 10:55:44 -0700
- * Cc: Steve Langasek <vorlon@netexpress.net>,debian-legal@lists.debian.org, openldap-devel@OpenLDAP.org
- * In-reply-to: <20030528162613.GB8524@ns.snowman.net>
- * Message-id: <5.2.0.9.0.20030528094229.02924780@127.0.0.1>
- * Old-return-path: <Kurt@OpenLDAP.org>

Steven,

The OpenLDAP Foundation believes it the Regents' statement grants a license to redistribute derived works and is confident that the University, who is quite aware of our actions (as they actively participate in them), does not consider our actions to infringe on their rights. You are welcomed to your opinions. I suggest, however, that before you rely on your or other people's opinions (including ours), that you consult with a lawyer familiar with applicable law and the particulars of your situation.

The Foundation sees no reason for it to expend its limited resources seeking clarifications which it believes are unnecessary. You are, of course, welcomed to expend time and energy seeking clarifications you think are necessary. I suggest you contact University's general counsel office (<http://www.umich.edu/~vpgc/>).

Regards, Kurt

SQLITE has

been put into the public-domain by its author D. Richard Hipp:
The author disclaims copyright to this source code. In place of a legal notice, here is a blessing:

May you do good and not evil.

May you find forgiveness for yourself and forgive others.

May you share freely, never taking more than you give.

[Note that only a few files are distributed under this license.]

Creative Commons Legal Code

CC0 1.0 Universal

CREATIVE COMMONS CORPORATION IS NOT A LAW FIRM AND DOES NOT PROVIDE LEGAL SERVICES. DISTRIBUTION OF THIS DOCUMENT DOES NOT CREATE AN ATTORNEY-CLIENT RELATIONSHIP. CREATIVE COMMONS PROVIDES THIS INFORMATION ON AN "AS-IS" BASIS. CREATIVE COMMONS MAKES NO WARRANTIES REGARDING THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS PROVIDED HEREUNDER, AND DISCLAIMS LIABILITY FOR DAMAGES RESULTING FROM THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS PROVIDED HEREUNDER.

Statement of Purpose

The laws of most jurisdictions throughout the world automatically confer exclusive Copyright and Related Rights (defined below) upon the creator and subsequent owner(s) (each and all, an "owner") of an original work of authorship and/or a database (each, a "Work").

Certain owners wish to permanently relinquish those rights to a Work for the purpose of contributing to a commons of creative, cultural and scientific works ("Commons") that the public can reliably and without fear of later claims of infringement build upon, modify, incorporate in other works, reuse and redistribute as freely as possible in any form whatsoever and for any purposes, including without limitation commercial purposes. These owners may contribute to the Commons to promote the ideal of a free culture and the further production of creative, cultural and scientific works, or to gain reputation or greater distribution for their Work in part through the use and efforts of others.

For these and/or other purposes and motivations, and without any expectation of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the extent that he or she is an owner of Copyright and Related Rights in the Work, voluntarily elects to apply CC0 to the Work and publicly distribute the Work under its terms, with knowledge of his or her Copyright and Related Rights in the Work and the meaning and intended legal effect of CC0 on those rights.

1. Copyright and Related Rights. A Work made available under CC0 may be protected by copyright and related or neighboring rights ("Copyright and Related Rights"). Copyright and Related Rights include, but are not limited to, the following:

- i. the right to reproduce, adapt, distribute, perform, display, communicate, and translate a Work;
- ii. moral rights retained by the original author(s) and/or performer(s);
- iii. publicity and privacy rights pertaining to a person's image or likeness depicted in a Work;
- iv. rights protecting against unfair competition in regards to a Work, subject to the limitations in paragraph 4(a), below;
- v. rights protecting the extraction, dissemination, use and reuse of data in a Work;
- vi. database rights (such as those arising under Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, and under any national implementation thereof, including any amended or successor version of such directive); and
- vii. other similar, equivalent or corresponding rights throughout the world based on applicable law or treaty, and any national implementations thereof.

2. Waiver. To the greatest extent permitted by, but not in contravention of, applicable law, Affirmer hereby overtly, fully, permanently,

irrevocably and unconditionally waives, abandons, and surrenders all of Affirmer's Copyright and Related Rights and associated claims and causes of action, whether now known or unknown (including existing as well as future claims and causes of action), in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "Waiver"). Affirmer makes the Waiver for the benefit of each member of the public at large and to the detriment of Affirmer's heirs and successors, fully intending that such Waiver shall not be subject to revocation, rescission, cancellation, termination, or any other legal or equitable action to disrupt the quiet enjoyment of the Work by the public as contemplated by Affirmer's express Statement of Purpose.

3. Public License Fallback. Should any part of the Waiver for any reason be judged legally invalid or ineffective under applicable law, then the Waiver shall be preserved to the maximum extent permitted taking into account Affirmer's express Statement of Purpose. In addition, to the extent the Waiver is so judged Affirmer hereby grants to each affected person a royalty-free, non transferable, non sublicensable, non exclusive, irrevocable and unconditional license to exercise Affirmer's Copyright and Related Rights in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "License"). The License shall be deemed effective as of the date CC0 was applied by Affirmer to the Work. Should any part of the License for any reason be judged legally invalid or ineffective under applicable law, such partial invalidity or ineffectiveness shall not invalidate the remainder of the License, and in such case Affirmer hereby affirms that he or she will not (i) exercise any of his or her remaining Copyright and Related Rights in the Work or (ii) assert any associated claims and causes of action with respect to the Work, in either case contrary to Affirmer's express Statement of Purpose.

4. Limitations and Disclaimers.

- a. No trademark or patent rights held by Affirmer are waived, abandoned, surrendered, licensed or otherwise affected by this document.
- b. Affirmer offers the Work as-is and makes no representations or warranties of any kind concerning the Work, express, implied, statutory or otherwise, including without limitation warranties of title, merchantability, fitness for a particular purpose, non

infringement, or the absence of latent or other defects, accuracy, or the present or absence of errors, whether or not discoverable, all to the greatest extent permissible under applicable law.

- c. Affirmer disclaims responsibility for clearing rights of other persons that may apply to the Work or any use thereof, including without limitation any person's Copyright and Related Rights in the Work. Further, Affirmer disclaims responsibility for obtaining any necessary consents, permissions or other rights required for any use of the Work.
- d. Affirmer understands and acknowledges that Creative Commons is not a party to this document and has no duty or obligation with respect to this CC0 or use of the Work.

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<https://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To

"modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices"

to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than

the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do

not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users'

Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer

support for that product

model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge.

You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product

is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute

modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately

under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do

not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free

patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement,

or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <<https://www.gnu.org/licenses/>>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>

This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.

This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <<https://www.gnu.org/licenses/>>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you

may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read

<<https://www.gnu.org/philosophy/why-not-lgpl.html>>.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price.

Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING

WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR

THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU

General Public License as published by

the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author

Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.

This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.
[Note that only a few files are distributed under this license.]

GNU LESSER GENERAL PUBLIC LICENSE Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
59 Temple Place, Suite 330, Boston, MA 02111-1307 USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically

libraries--of the

Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

^L

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The

former contains code derived from the library,
whereas the latter must
be combined with the library in order to run.
^L

GNU LESSER GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to

exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

^L

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections

1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library

(because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

^L

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified

executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

- b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
- c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

^L

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

^L

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then

the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

^L

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is

copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

^L

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library.

It

is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

LICENSE TERMS

Copyright (c) 2000, Dimitrios Souflis
All rights reserved.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

Neither the name of Dimitrios Souflis nor the names of the contributors may be used to endorse or promote products derived from this software without specific prior written permission.

THIS SOFTWARE IS PROVIDED BY THE COPYRIGHT HOLDERS AND CONTRIBUTORS ``AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.

IN NO EVENT SHALL THE REGENTS OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

[Note that only a few files are distributed under this license.]

GNU LESSER GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<https://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates the terms and conditions of version 3 of the GNU General Public License, supplemented by the additional permissions listed below.

0. Additional Definitions.

As used herein, "this License" refers to version 3 of the GNU Lesser General Public License, and the "GNU GPL" refers to version 3 of the GNU General Public License.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library.

Defining a subclass of a class defined by the Library is deemed a mode of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library

with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

- a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or
- b) under the GNU GPL, with none of the additional permissions of this License applicable to that copy.

3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

- a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the object code with a copy of the GNU GPL and this license document.

4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the Combined Work with a copy of the GNU GPL and this license document.

c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.

1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the

Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this

License, and convey such a combined library under terms of your choice, if you do both of the following:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities, conveyed under the terms of this License.
- b) Give prominent notice with the combined library that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version of the GNU Lesser General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that published version or of any later version published by the Free Software Foundation. If the Library as you received it does not specify a version number of the GNU Lesser General Public License, you may choose any version of the GNU Lesser General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide whether future versions of the GNU Lesser General Public License shall apply, that proxy's public statement of acceptance of any version is permanent authorization for you to choose that version for the Library.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as

distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW.

EXCEPT WHEN

OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN

IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License,

or

(at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

GNU Free Documentation License
Version 1.3, 3 November 2008

Copyright (C) 2000, 2001, 2002, 2007, 2008 Free Software Foundation, Inc.
<<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

0. PREAMBLE

The purpose of this License is to make a manual, textbook, or other functional and useful document "free" in the sense of freedom: to assure everyone the effective freedom to copy and redistribute it, with or without modifying it, either commercially or noncommercially. Secondly, this License preserves for the author and publisher a way to get credit for their work, while not being considered responsible for modifications made by others.

This License is a kind of "copyleft", which means that derivative works of the document must themselves be free in the same sense. It complements the GNU General Public License, which is a copyleft license designed for free software.

We

have designed this License in order to use it for manuals for free software, because free software needs free documentation: a free program should come with manuals providing the same freedoms that the software does. But this License is not limited to software manuals; it can be used for any textual work, regardless of subject matter or whether it is published as a printed book. We recommend this License principally for works whose purpose is instruction or reference.

1. APPLICABILITY AND DEFINITIONS

This License applies to any manual or other work, in any medium, that contains a notice placed by the copyright holder saying it can be distributed under the terms of this License. Such a notice grants a world-wide, royalty-free license, unlimited in duration, to use that work under the conditions stated herein. The "Document", below, refers to any such manual or work. Any member of the public is a licensee, and is addressed as "you". You accept the license if you copy, modify or distribute the work in a way requiring permission under copyright law.

A "Modified Version" of the Document means any work containing the Document or a portion of it, either copied verbatim, or with modifications and/or translated into another language.

A "Secondary Section" is a named appendix or a front-matter section of the Document that deals exclusively with the relationship of the publishers or authors of the Document to the Document's overall subject (or to related matters) and contains nothing that could fall directly within that overall subject. (Thus, if the Document is in part a textbook of mathematics, a Secondary Section may not explain any mathematics.) The relationship could be a matter of historical connection with the subject or with related matters, or of legal,

commercial, philosophical, ethical or political position regarding them.

The "Invariant Sections" are certain Secondary Sections whose titles are designated, as being those of Invariant Sections, in the notice that says that the Document is released under this License. If a section does not fit the above definition of Secondary then it is not allowed to be designated as Invariant. The Document may contain zero Invariant Sections. If the Document does not identify any Invariant Sections then there are none.

The "Cover Texts" are certain short passages of text that are listed, as Front-Cover Texts or Back-Cover Texts, in the notice that says that the Document is released under this License. A Front-Cover Text may be at most 5 words, and a Back-Cover Text may be at most 25 words.

A "Transparent" copy of the Document means a machine-readable copy, represented in a format whose specification is available to the general public, that is suitable for revising the document straightforwardly with generic text editors or (for images composed of pixels) generic paint programs or (for drawings) some widely available drawing editor, and that is suitable for input to text formatters or for automatic translation to a variety of formats suitable for input to text formatters. A copy made in an otherwise Transparent file format whose markup, or absence of markup, has been arranged to thwart or discourage subsequent modification by readers is not Transparent. An image format is not Transparent if used for any substantial amount of text. A copy that is not "Transparent" is called "Opaque".

Examples of suitable formats for Transparent copies include plain ASCII without markup, Texinfo input format, LaTeX input format, SGML or XML using a publicly available DTD, and standard-conforming simple HTML, PostScript or PDF designed for human modification. Examples of transparent image formats include PNG, XCF and JPG. Opaque formats include proprietary formats that can be read and edited only by proprietary word processors, SGML or XML for which the DTD and/or processing tools are not generally available, and the machine-generated HTML, PostScript or PDF produced by some word processors for output purposes only.

The "Title Page" means, for a printed book, the title page itself, plus such following pages as are needed to hold, legibly, the material this License requires to appear in the title page. For works in formats which do not have any title page as such, "Title Page" means the text near the most prominent appearance of the work's title,

preceding the beginning of the body of the text.

The "publisher" means any person or entity that distributes copies of the Document to the public.

A section "Entitled XYZ" means a named subunit of the Document whose title either is precisely XYZ or contains XYZ in parentheses following text that translates XYZ in another language. (Here XYZ stands for a specific section name mentioned below, such as "Acknowledgements", "Dedications", "Endorsements", or "History".) To "Preserve the Title" of such a section when you modify the Document means that it remains a section "Entitled XYZ" according to this definition.

The

Document may include Warranty Disclaimers next to the notice which states that this License applies to the Document. These Warranty Disclaimers are considered to be included by reference in this License, but only as regards disclaiming warranties: any other implication that these Warranty Disclaimers may have is void and has no effect on the meaning of this License.

2. VERBATIM COPYING

You may copy and distribute the Document in any medium, either commercially or noncommercially, provided that this License, the copyright notices, and the license notice saying this License applies to the Document are reproduced in all copies, and that you add no other conditions whatsoever to those of this License. You may not use technical measures to obstruct or control the reading or further copying of the copies you make or distribute. However, you may accept compensation in exchange for copies. If you distribute a large enough number of copies you must also follow the conditions in section 3.

You may also lend copies, under the same conditions stated above, and you may publicly display copies.

3. COPYING IN QUANTITY

If you publish printed copies (or copies in media that commonly have printed covers) of the Document, numbering more than 100, and the Document's license notice requires Cover Texts, you must enclose the copies in covers that carry, clearly and legibly, all these Cover Texts: Front-Cover Texts on the front cover, and Back-Cover Texts on the back cover. Both covers must also clearly and legibly identify you as the publisher of these copies. The front cover must present the full title with all words of the title equally prominent and

visible. You may add other material on the covers in addition. Copying with changes limited to the covers, as long as they preserve the title of the Document and satisfy these conditions, can be treated as verbatim copying in other respects.

If the required texts for either cover are too voluminous to fit legibly, you should put the first ones listed (as many as fit reasonably) on the actual cover, and continue the rest onto adjacent pages.

If you publish or distribute Opaque copies of the Document numbering more than 100, you must either include a machine-readable Transparent copy along with each Opaque copy, or state in or with each Opaque copy a computer-network location from which the general network-using public has access to download using public-standard network protocols a complete Transparent copy of the Document, free of added material. If you use the latter option, you must take reasonably prudent steps, when you begin distribution of Opaque copies in quantity, to ensure that this Transparent copy will remain thus accessible at the stated location until at least one year after the last time you distribute an Opaque copy (directly or through your agents or retailers) of that edition to the public.

It is requested, but not required, that you contact the authors of the Document well before redistributing any large number of copies, to give them a chance to provide you with an updated version of the Document.

4. MODIFICATIONS

You may copy and distribute a Modified Version of the Document under the conditions of sections 2 and 3 above, provided that you release the Modified Version under precisely this License, with the Modified Version filling the role of the Document, thus licensing distribution and modification of the Modified Version to whoever possesses a copy of it. In addition, you must do these things in the Modified Version:

- A. Use in the Title Page (and on the covers, if any) a title distinct from that of the Document, and from those of previous versions (which should, if there were any, be listed in the History section of the Document). You may use the same title as a previous version if the original publisher of that version gives permission.
- B. List on the Title Page, as authors, one or more persons or entities responsible for authorship of

- the modifications in the Modified Version, together with at least five of the principal authors of the Document (all of its principal authors, if it has fewer than five), unless they release you from this requirement.
- C. State on the Title page the name of the publisher of the Modified Version, as the publisher.
- D. Preserve all the copyright notices of the Document.
- E. Add an appropriate copyright notice for your modifications adjacent to the other copyright notices.
- F. Include, immediately after the copyright notices, a license notice giving the public permission to use the Modified Version under the terms of this License, in the form shown in the Addendum below.
- G. Preserve in that license notice the full lists of Invariant Sections and required Cover Texts given in the Document's license notice.
- H. Include an unaltered copy of this License.
- I. Preserve the section Entitled "History", Preserve its Title, and add to it an item stating at least the title, year, new authors, and publisher of the Modified Version as given on the Title Page. If there is no section Entitled "History" in the Document, create one stating the title, year, authors, and publisher of the Document as given on its Title Page, then add an item describing the Modified Version as stated in the previous sentence.
- J. Preserve the network location, if any, given in the Document for public access to a Transparent copy of the Document, and likewise the network locations given in the Document for previous versions it was based on. These may be placed in the "History" section. You may omit a network location for a work that was published at least four years before the Document itself, or if the original publisher of the version it refers to gives permission.
- K. For any section Entitled "Acknowledgements" or "Dedications", Preserve the Title of the section, and preserve in the section all the substance and tone of each of the contributor acknowledgements and/or dedications given therein.
- L. Preserve all the Invariant Sections of the Document, unaltered in their text and in their titles. Section numbers or the equivalent are not considered part of the section titles.
- M. Delete any section Entitled "Endorsements". Such a section may not be included in the Modified Version.
- N. Do not retitle any existing section to be Entitled "Endorsements" or to conflict in title with any Invariant Section.
- O. Preserve any Warranty Disclaimers.

If the Modified Version includes new front-matter sections or appendices that qualify as Secondary Sections and contain no material copied from the Document, you may at your option designate some or all of these sections as invariant. To do this, add their titles to the

list of Invariant Sections in the Modified Version's license notice.
These titles must be distinct from any other section titles.

You may add a section Entitled "Endorsements", provided it contains nothing but endorsements of your Modified Version by various parties--for example, statements of peer review or that the text has been approved by an organization as the authoritative definition of a standard.

You may add a passage of up to five words as a Front-Cover Text, and a passage of up to 25 words as a Back-Cover Text, to the end of the list of Cover Texts in the Modified Version. Only one passage of Front-Cover Text and one of Back-Cover Text may be added by (or through arrangements made by) any one entity. If the Document already includes a cover text for the same cover, previously added by you or by arrangement made by the same entity you are acting on behalf of, you may not add another; but you may replace the old one, on explicit permission from the previous publisher that added the old one.

The author(s) and publisher(s) of the Document do not by this License give permission to use their names for publicity for or to assert or imply endorsement of any Modified Version.

5. COMBINING DOCUMENTS

You may combine the Document with other documents released under this License, under the terms defined in section 4 above for modified versions, provided that you include in the combination all of the Invariant Sections of all of the original documents, unmodified, and list them all as Invariant Sections of your combined work in its license notice, and that you preserve all their Warranty Disclaimers.

The combined work need only contain one copy of this License, and multiple identical Invariant Sections may be replaced with a single copy. If there are multiple Invariant Sections with the same name but different contents, make the title of each such section unique by adding at the end of it, in parentheses, the name of the original author or publisher of that section if known, or else a unique number. Make the same adjustment to the section titles in the list of Invariant Sections in the license notice of the combined work.

In the combination, you must combine any sections Entitled "History" in the various original documents, forming one section Entitled "History"; likewise combine any sections Entitled "Acknowledgements",

and any sections Entitled "Dedications". You must delete all sections Entitled "Endorsements".

6. COLLECTIONS OF DOCUMENTS

You may make a collection consisting of the Document and other documents released under this License, and replace the individual copies of this License in the various documents with a single copy that is included in the collection, provided that you follow the rules of this License for verbatim copying of each of the documents in all other respects.

You may extract a single document from such a collection, and distribute it individually under this License, provided you insert a copy of this License into the extracted document, and follow this License in all other respects regarding verbatim copying of that document.

7. AGGREGATION WITH INDEPENDENT WORKS

A compilation of the Document or its derivatives with other separate and independent documents or works, in or on a volume of a storage or distribution medium, is called an "aggregate" if the copyright resulting from the compilation is not used to limit the legal rights of the compilation's users beyond what the individual works permit. When the Document is included in an aggregate, this License does not apply to the other works in the aggregate which are not themselves derivative works of the Document.

If the Cover Text requirement of section 3 is applicable to these copies of the Document, then if the Document is less than one half of the entire aggregate, the Document's Cover Texts may be placed on covers that bracket the Document within the aggregate, or the electronic equivalent of covers if the Document is in electronic form. Otherwise they must appear on printed covers that bracket the whole aggregate.

8. TRANSLATION

Translation is considered a kind of modification, so you may distribute translations of the Document under the terms of section 4.

Replacing Invariant Sections with translations requires special permission from their copyright holders, but you may include

translations of some or all Invariant Sections in addition to the original versions of these Invariant Sections. You may include a translation of this License, and all the license notices in the Document, and any Warranty Disclaimers, provided that you also include the original English version of this License and the original versions of those notices and disclaimers. In case of a disagreement between the translation and the original version of this License or a notice or disclaimer, the original version will prevail.

If a section in the Document is Entitled "Acknowledgements", "Dedications", or "History", the requirement (section 4) to Preserve its Title (section 1) will typically require changing the actual title.

9. TERMINATION

You may not copy, modify, sublicense, or distribute the Document except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, or distribute it is void, and will automatically terminate your rights under this License.

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, receipt of a copy of some or all of the same material does not give you any rights to use it.

10. FUTURE REVISIONS OF THIS LICENSE

The Free Software Foundation may publish new, revised versions of the

GNU Free Documentation License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. See <http://www.gnu.org/copyleft/>.

Each version of the License is given a distinguishing version number. If the Document specifies that a particular numbered version of this License "or any later version" applies to it, you have the option of following the terms and conditions either of that specified version or of any later version that has been published (not as a draft) by the Free Software Foundation. If the Document does not specify a version number of this License, you may choose any version ever published (not as a draft) by the Free Software Foundation. If the Document specifies that a proxy can decide which future versions of this License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Document.

11. RELICENSING

"Massive Multiauthor Collaboration Site" (or "MMC Site") means any World Wide Web server that publishes copyrightable works and also provides prominent facilities for anybody to edit those works. A public wiki that anybody can edit is an example of such a server. A "Massive Multiauthor Collaboration" (or "MMC") contained in the site means any set of copyrightable works thus published on the MMC site.

"CC-BY-SA" means the Creative Commons Attribution-Share Alike 3.0 license published by Creative Commons Corporation, a not-for-profit corporation with a principal place of business in San Francisco, California, as well as future copyleft versions of that license published by that same organization.

"Incorporate" means to publish or republish a Document, in whole or in part, as part of another Document.

An MMC is "eligible for relicensing" if it is licensed under this License, and if all works that were first published under this License somewhere other than this MMC, and subsequently incorporated in whole or in part into the MMC, (1) had no cover texts or invariant sections, and (2) were thus incorporated prior to November 1, 2008.

The operator of an MMC Site may republish an MMC contained in the site under CC-BY-SA on the same site at any time before August 1, 2009, provided the MMC is eligible for relicensing.

ADDENDUM: How to use this License for your documents

To use this License in a document you have written, include a copy of the License in the document and put the following copyright and license notices just after the title page:

Copyright (c) YEAR YOUR NAME.

Permission is granted to copy, distribute and/or modify this document under the terms of the GNU Free Documentation License, Version 1.3 or any later version published by the Free Software Foundation; with no Invariant Sections, no Front-Cover Texts, and no Back-Cover Texts. A copy of the license is included in the section entitled "GNU Free Documentation License".

If you have Invariant Sections, Front-Cover Texts and Back-Cover Texts, replace the "with...Texts." line with this:

with the Invariant Sections being LIST THEIR TITLES, with the Front-Cover Texts being LIST, and with the Back-Cover Texts being LIST.

If you have Invariant Sections without Cover Texts, or some other combination of the three, merge those two alternatives to suit the situation.

If your document contains nontrivial examples of program code, we recommend releasing these examples in parallel under your choice of free software license, such as the GNU General Public License, to permit their use in free software.

@c The GNU Free Documentation License.

@center Version 1.3, 3 November 2008

@c This file is intended to be included within another document,

@c hence no sectioning command or @node.

@display

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

@end display

@enumerate 0

@item

PREAMBLE

The purpose of this License is to make a manual, textbook, or other

functional and useful document @dfn{free} in the sense of freedom: to assure everyone the effective freedom to copy and redistribute it, with or without modifying it, either commercially or noncommercially. Secondly, this License preserves for the author and publisher a way to get credit for their work, while not being considered responsible for modifications made by others.

This License is a kind of ``copyleft'', which means that derivative works of the document must themselves be free in the same sense. It complements the GNU General Public License, which is a copyleft license designed for free software.

We have designed this License in order to use it for manuals for free software, because free software needs free documentation: a free program should come with manuals providing the same freedoms that the software does. But this License is not limited to software manuals; it can be used for any textual work, regardless of subject matter or whether it is published as a printed book. We recommend this License principally for works whose purpose is instruction or reference.

@item

APPLICABILITY AND DEFINITIONS

This License applies to any manual or other work, in any medium, that contains a notice placed by the copyright holder saying it can be distributed under the terms of this License. Such a notice grants a world-wide, royalty-free license, unlimited in duration, to use that work under the conditions stated herein. The ``Document'', below, refers

to any such manual or work. Any member of the public is a licensee, and is addressed as ``you''. You accept the license if you copy, modify or distribute the work in a way requiring permission under copyright law.

A ``Modified Version'' of the Document means any work containing the Document or a portion of it, either copied verbatim, or with modifications and/or translated into another language.

A ``Secondary Section'' is a named appendix or a front-matter section of the Document that deals exclusively with the relationship of the publishers or authors of the Document to the Document's overall subject (or to related matters) and contains nothing that could fall directly within that overall subject. (Thus, if the Document is in part a textbook of mathematics, a Secondary Section may not explain any mathematics.) The relationship could be a matter of historical connection with the subject or with related matters, or of legal, commercial, philosophical, ethical or political

position regarding them.

The "Invariant Sections" are certain Secondary Sections whose titles are designated, as being those of Invariant Sections, in the notice that says that the Document is released under this License. If a section does not fit the above definition of Secondary then it is not allowed to be designated as Invariant. The Document may contain zero Invariant Sections. If the Document does not identify any Invariant Sections then there are none.

The "Cover Texts" are certain short passages of text that are listed, as Front-Cover Texts or Back-Cover Texts, in the notice that says that the Document is released under this License. A Front-Cover Text may be at most 5 words, and a Back-Cover Text may be at most 25 words.

A "Transparent" copy of the Document means a machine-readable copy, represented in a format whose specification is available to the general public, that is suitable for revising the document straightforwardly with generic text editors or (for images composed of pixels) generic paint programs or (for drawings) some widely available drawing editor, and that is suitable for input to text formatters or for automatic translation to a variety of formats suitable for input to text formatters. A copy made in an otherwise Transparent file format whose markup, or absence of markup, has been arranged to thwart or discourage subsequent modification by readers is not Transparent. An image format is not Transparent if used for any substantial amount of text. A copy that is not "Transparent" is called "Opaque".

Examples of suitable formats for Transparent copies include plain `@sc{ascii}` without markup, Texinfo input format, `La@TeX{}` input format, `@acronym{SGML}` or `@acronym{XML}` using a publicly available `@acronym{DTD}`, and standard-conforming simple `@acronym{HTML}`, PostScript or `@acronym{PDF}` designed for human modification. Examples of transparent image formats include `@acronym{PNG}`, `@acronym{XCF}` and `@acronym{JPG}`. Opaque formats include proprietary formats that can be read and edited only by proprietary word processors, `@acronym{SGML}` or `@acronym{XML}` for which the `@acronym{DTD}` and/or processing tools are not generally available, and the machine-generated `@acronym{HTML}`, PostScript or `@acronym{PDF}` produced by some word processors for output purposes only.

The "Title Page" means, for a printed book, the title page itself, plus such following pages as are needed to hold, legibly, the material this License requires to appear in the title page. For works in formats which do not have any title page as such, "Title Page" means

the text near the most prominent appearance of the work's title, preceding the beginning of the body of the text.

The "publisher" means any person or entity that distributes copies of the Document to the public.

A section "Entitled XYZ" means a named subunit of the Document whose title either is precisely XYZ or contains XYZ in parentheses following text that translates XYZ in another language. (Here XYZ stands for a specific section name mentioned below, such as "Acknowledgements", "Dedications", "Endorsements", or "History".) To "Preserve the Title" of such a section when you modify the Document means that it remains a section "Entitled XYZ" according to this definition.

The Document may include Warranty Disclaimers next to the notice which states that this License applies to the Document. These Warranty Disclaimers are considered to be included by reference in this License, but only as regards disclaiming warranties: any other implication that these Warranty Disclaimers may have is void and has no effect on the meaning of this License.

@item

VERBATIM COPYING

You may copy and distribute the Document in any medium, either commercially or noncommercially, provided that this License, the copyright notices, and the license notice saying this License applies to the Document are reproduced in all copies, and that you add no other conditions whatsoever to those of this License. You may not use technical measures to obstruct or control the reading or further copying of the copies you make or distribute. However, you may accept compensation in exchange for copies. If you distribute a large enough number of copies you must also follow the conditions in section 3.

You may also lend copies, under the same conditions stated above, and you may publicly display copies.

@item

COPYING IN QUANTITY

If you publish printed copies (or copies in media that commonly have printed covers) of the Document, numbering more than 100, and the Document's license notice requires Cover Texts, you must enclose the copies in covers that carry, clearly and legibly, all these Cover Texts: Front-Cover Texts on the front cover, and Back-Cover Texts on the back cover. Both covers must also clearly and legibly identify

you as the publisher of these copies. The front cover must present the full title with all words of the title equally prominent and visible.

You may add other material on the covers in addition.

Copying with changes limited to the covers, as long as they preserve the title of the Document and satisfy these conditions, can be treated as verbatim copying in other respects.

If the required texts for either cover are too voluminous to fit legibly, you should put the first ones listed (as many as fit reasonably) on the actual cover, and continue the rest onto adjacent pages.

If you publish or distribute Opaque copies of the Document numbering more than 100, you must either include a machine-readable Transparent copy along with each Opaque copy, or state in or with each Opaque copy a computer-network location from which the general network-using public has access to download using public-standard network protocols a complete Transparent copy of the Document, free of added material.

If you use the latter option, you must take reasonably prudent steps, when you begin distribution of Opaque copies in quantity, to ensure that

this Transparent copy will remain thus accessible at the stated location until at least one year after the last time you distribute an Opaque copy (directly or through your agents or retailers) of that edition to the public.

It is requested, but not required, that you contact the authors of the Document well before redistributing any large number of copies, to give them a chance to provide you with an updated version of the Document.

@item

MODIFICATIONS

You may copy and distribute a Modified Version of the Document under the conditions of sections 2 and 3 above, provided that you release the Modified Version under precisely this License, with the Modified Version filling the role of the Document, thus licensing distribution and modification of the Modified Version to whoever possesses a copy of it. In addition, you must do these things in the Modified Version:

@enumerate A

@item

Use in the Title Page (and on the covers, if any) a title distinct from that of the Document, and from those of previous versions

(which should, if there were any, be listed in the History section of the Document). You may use the same title as a previous version

if the original publisher of that version gives permission.

@item

List on the Title Page, as authors, one or more persons or entities responsible for authorship of the modifications in the Modified Version, together with at least five of the principal authors of the Document (all of its principal authors, if it has fewer than five), unless they release you from this requirement.

@item

State on the Title page the name of the publisher of the Modified Version, as the publisher.

@item

Preserve all the copyright notices of the Document.

@item

Add an appropriate copyright notice for your modifications adjacent to the other copyright notices.

@item

Include, immediately after the copyright notices, a license notice giving the public permission to use the Modified Version under the terms of this License, in the form shown in the Addendum below.

@item

Preserve in that license notice the full lists of Invariant Sections and required Cover Texts given in the Document's license notice.

@item

Include an unaltered copy of this License.

@item

Preserve the section Entitled ``History'', Preserve its Title, and add to it an item stating at least the title, year, new authors, and publisher of the Modified Version as given on the Title Page. If there is no section Entitled ``History'' in the Document, create one stating the title, year, authors, and publisher of the Document as given on its Title Page, then add an item describing the Modified Version as stated in the previous sentence.

@item

Preserve the network location, if any, given in the Document for public access to a Transparent copy of the Document, and likewise the network locations given in the Document for previous versions it was based on. These may be placed in the ``History'' section. You may omit a network location for a work that was published at

least

four years before the Document itself, or if the original publisher of the version it refers to gives permission.

@item

For any section Entitled ``Acknowledgements" or ``Dedications", Preserve the Title of the section, and preserve in the section all the substance and tone of each of the contributor acknowledgements and/or dedications given therein.

@item

Preserve all the Invariant Sections of the Document, unaltered in their text and in their titles. Section numbers or the equivalent are not considered part of the section titles.

@item

Delete any section Entitled ``Endorsements". Such a section may not be included in the Modified Version.

@item

Do not retitle any existing section to be Entitled ``Endorsements" or to conflict in title with any Invariant Section.

@item

Preserve any Warranty Disclaimers.

@end enumerate

If the Modified Version includes new front-matter sections or appendices that qualify as Secondary Sections and contain no material copied from the Document,

you may at your option designate some or all of these sections as invariant. To do this, add their titles to the list of Invariant Sections in the Modified Version's license notice. These titles must be distinct from any other section titles.

You may add a section Entitled ``Endorsements", provided it contains nothing but endorsements of your Modified Version by various parties---for example, statements of peer review or that the text has been approved by an organization as the authoritative definition of a standard.

You may add a passage of up to five words as a Front-Cover Text, and a passage of up to 25 words as a Back-Cover Text, to the end of the list of Cover Texts in the Modified Version. Only one passage of Front-Cover Text and one of Back-Cover Text may be added by (or through arrangements made by) any one entity. If the Document already includes a cover text for the same cover, previously added by you or by arrangement made by the same entity you are acting on behalf

of,
you may not add another; but you may replace the old one, on explicit permission from the previous publisher that added the old one.

The author(s) and publisher(s) of the Document do not by this License give permission to use their names for publicity for or to assert or imply endorsement of any Modified Version.

@item

COMBINING DOCUMENTS

You may combine the Document with other documents released under this License, under the terms defined in section 4 above for modified versions, provided that you include in the combination all of the Invariant Sections of all of the original documents, unmodified, and list them all as Invariant Sections of your combined work in its license notice, and that you preserve all their Warranty Disclaimers.

The combined work need only contain one copy of this License, and multiple identical Invariant Sections may be replaced with a single copy. If there are multiple Invariant Sections with the same name but different contents, make the title of each such section unique by adding at the end of it, in parentheses, the name of the original author or publisher of that section if known, or else a unique number. Make the same adjustment to the section titles in the list of Invariant Sections in the license notice of the combined work.

In the combination, you must combine any sections Entitled ``History" in the various original documents, forming one section Entitled ``History"; likewise combine any sections Entitled ``Acknowledgements", and any sections Entitled ``Dedications". You must delete all sections Entitled ``Endorsements."

@item

COLLECTIONS OF DOCUMENTS

You may make a collection consisting of the Document and other documents released under this License, and replace the individual copies of this License in the various documents with a single copy that is included in the collection, provided that you follow the rules of this License for verbatim copying of each of the documents in all other respects.

You may extract a single document from such a collection, and distribute it individually under this License, provided you insert a copy of this License into the extracted document, and follow this License in all other respects regarding verbatim copying of that document.

@item

AGGREGATION WITH INDEPENDENT WORKS

A compilation of the Document or its derivatives with other separate and independent documents or works, in or on a volume of a storage or distribution medium, is called an ``aggregate" if the copyright resulting from the compilation is not used to limit the legal rights of the compilation's users beyond what the individual works permit. When the Document is included in an aggregate, this License does not apply to the other works in the aggregate which are not themselves derivative works of the Document.

If the Cover Text requirement of section 3 is applicable to these copies of the Document, then if the Document is less than one half of the entire aggregate, the Document's Cover Texts may be placed on covers that bracket the Document within the aggregate, or the electronic equivalent of covers if the Document is in electronic form. Otherwise they must appear on printed covers that bracket the whole aggregate.

@item

TRANSLATION

Translation is considered a kind of modification, so you may distribute translations of the Document under the terms of section 4. Replacing Invariant Sections with translations requires special permission from their copyright holders, but you may include translations of some or all Invariant Sections in addition to the original versions of these Invariant Sections. You may include a translation of this License, and all the license notices in the Document, and any Warranty Disclaimers, provided that you also include the original English version of this License and the original versions of those notices and disclaimers. In case of a disagreement between the translation and the original version of this License or a notice or disclaimer, the original version will prevail.

If a section in the Document is Entitled ``Acknowledgements", ``Dedications", or ``History", the requirement (section 4) to Preserve its Title (section 1) will typically require changing the actual title.

@item

TERMINATION

You may not copy, modify, sublicense, or distribute the Document

except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, or distribute it is void, and will automatically terminate your rights under this License.

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, receipt of a copy of some or all of the same material does not give you any rights to use it.

@item

FUTURE REVISIONS OF THIS LICENSE

The Free Software Foundation may publish new, revised versions of the GNU Free Documentation License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. See [@uref{http://www.gnu.org/copyleft/}](http://www.gnu.org/copyleft/).

Each version of the License is given a distinguishing version number. If the Document specifies that a particular numbered version of this License ``or any later version" applies to it, you have the option of following the terms and conditions either of that specified version or of any later version that has been published (not as a draft) by the Free Software Foundation. If the Document does not specify a version number of this License, you may choose any version ever published (not as a draft) by the Free Software Foundation. If the Document specifies that a proxy can decide which future versions of this License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Document.

@item

RELICENSING

``Massive Multiauthor Collaboration Site" (or ``MMC Site") means any World Wide Web server that publishes copyrightable works and also provides prominent facilities for anybody to edit those works. A public wiki that anybody can edit is an example of such a server. A ``Massive Multiauthor Collaboration" (or ``MMC") contained in the site means any set of copyrightable works thus published on the MMC site.

``CC-BY-SA" means the Creative Commons Attribution-Share Alike 3.0 license published by Creative Commons Corporation, a not-for-profit corporation with a principal place of business in San Francisco, California, as well as future copyleft versions of that license published by that same organization.

``Incorporate" means to publish or republish a Document, in whole or in part, as part of another Document.

An MMC is ``eligible for relicensing" if it is licensed under this License, and if all works that were first published under this License somewhere other than this MMC, and subsequently incorporated in whole or in part into the MMC, (1) had no cover texts or invariant sections, and (2) were thus incorporated prior to November 1, 2008.

The operator of an MMC Site may republish an MMC contained in the site under CC-BY-SA on the same site at any time before August 1, 2009, provided the MMC is eligible for relicensing.

@heading ADDENDUM: How to use this License for your documents

To use this License in a document you have written, include a copy of the License in the document and put the following copyright and license notices just after the title page:

@smallexample

@group

Copyright (C) @var{year} @var{your name}.

Permission is granted to copy, distribute and/or modify this document under the terms of the GNU Free Documentation License, Version 1.3 or any later version published by the Free Software Foundation; with no Invariant Sections, no Front-Cover Texts, and no Back-Cover

Texts. A copy of the license is included in the section entitled ``GNU Free Documentation License".

@end group

@end smallexample

If you have Invariant Sections, Front-Cover Texts and Back-Cover Texts, replace the ``with@dots{ }Texts." line with this:

@smallexample

@group

with the Invariant Sections being @var{list their titles}, with the Front-Cover

Texts being @var{list}, and with the Back-Cover Texts

being @var{list}.

@end group

@end smallexample

If you have Invariant Sections without Cover Texts, or some other combination of the three, merge those two alternatives to suit the situation.

If your document contains nontrivial examples of program code, we recommend releasing these examples in parallel under your choice of free software license, such as the GNU General Public License, to permit their use in free software.

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to

your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps:

(1)

assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand

ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could

make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The

"System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of

copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered

by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code;

keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms

of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as

long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded

from the Corresponding Source
as a System Library, need not be
included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly

documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions.

Additional permissions that are applicable to the entire Program shall

be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for

any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the

licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to

address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17.

Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <<http://www.gnu.org/licenses/>>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>

This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.

This is free software, and you are welcome to redistribute it

under certain conditions; type ``show c'` for details.

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <http://www.gnu.org/philosophy/why-not-lgpl.html>.

1.215 unzip 6.0-26+deb11u1

1.215.1 Available under license :

This is version 2009-Jan-02 of the Info-ZIP license.

The definitive version of this document should be available at
<ftp://ftp.info-zip.org/pub/infozip/license.html> indefinitely and
a copy at <http://www.info-zip.org/pub/infozip/license.html>.

Copyright (c) 1990-2009 Info-ZIP. All rights reserved.

For the purposes of this copyright and license, "Info-ZIP" is defined as
the following set of individuals:

Mark Adler, John Bush, Karl Davis, Harald Denker, Jean-Michel Dubois,
Jean-loup Gailly, Hunter Goatley, Ed Gordon, Ian Gorman, Chris Herborth,
Dirk Haase, Greg Hartwig, Robert Heath, Jonathan Hudson, Paul Kienitz,
David Kirschbaum, Johnny Lee, Onno van der Linden, Igor Mandrichenko,
Steve P. Miller, Sergio Monesi, Keith Owens, George Petrov, Greg Roelofs,
Kai Uwe Rommel, Steve Salisbury, Dave Smith, Steven M. Schweda,
Christian Spieler, Cosmin Truta, Antoine Verheijen, Paul von Behren,

Rich Wales, Mike White.

This software is provided "as is," without warranty of any kind, express or implied. In no event shall Info-ZIP or its contributors be held liable for any direct, indirect, incidental, special or consequential damages arising out of the use of or inability to use this software.

Permission is granted to anyone to use this software for any purpose, including commercial applications, and to alter it and redistribute it freely, subject to the above disclaimer and the following restrictions:

1. Redistributions of source code (in whole or in part) must retain the above copyright notice, definition, disclaimer, and this list of conditions.
2. Redistributions in binary form (compiled executables and libraries) must reproduce the above copyright notice, definition, disclaimer, and this list of conditions in documentation and/or other materials provided with the distribution. Additional documentation is not needed for executables where a command line license option provides these and a note regarding this option is in the executable's startup banner. The sole exception to this condition is redistribution of a standard UnZipSFX binary (including SFXWiz) as part of a self-extracting archive; that is permitted without inclusion of this license, as long as the normal SFX banner has not been removed from the binary or disabled.
3. Altered versions--including, but not limited to, ports to new operating systems, existing ports with new graphical interfaces, versions with modified or added functionality, and dynamic, shared, or static library versions not from Info-ZIP--must be plainly marked as such and must not be misrepresented as being the original source or, if binaries, compiled from the original source. Such altered versions also must not be misrepresented as being Info-ZIP releases--including, but not limited to, labeling of the altered versions with the names "Info-ZIP" (or any variation thereof, including, but not limited to, different capitalizations), "Pocket UnZip," "WiZ" or "MacZip" without the explicit permission of Info-ZIP. Such altered versions are further prohibited from misrepresentative use of the Zip-Bugs or Info-ZIP e-mail addresses or the Info-ZIP URL(s), such as to imply Info-ZIP will provide support for the altered versions.
4. Info-ZIP retains the right to use the names "Info-ZIP," "Zip," "UnZip," "UnZipSFX," "WiZ," "Pocket UnZip," "Pocket Zip," and "MacZip" for its own source and binary releases.

This is the Info-ZIP file COPYING (for UnZip), last updated 17 Jul 2000.

FIRST NOTE:

This file contains some details about the copyright history of contributions to the UnZip project.

Additionally, it summarises some exceptions to the general BSD-like copyright found in LICENSE that covers our generic code and most of the system specific ports.

Please read LICENSE first to find out what is allowed to do with Info-ZIP's UnZip code.

There are currently two explicit copyrights on portions of UnZip code (at least, of which Info-ZIP is aware):

Jim Luther's Mac OS File Manager interface code; and Christopher Evans' MacBinaryIII coding code (for the MacOS port).. These copyrights are discussed in more detail below.

All remaining code is now (starting with UnZip version 5.41) covered by the new Info-ZIP license. For details, please read the accompanying file LICENSE. The terms and conditions in this license supersede the copyright conditions of the contributions by Igor Mandrichenko (vms/vms.c), Greg Roelofs (zipinfo.c, new version of unshrink.c), Mike White (Windows DLL code in "windll/*"), Steve P. Miller (Pocket UnZip GUI "wince/*"), and Mark Adler (inflate/explode decompression core routines, previously put into the public domain). All these Info-ZIP contributors (or "primary" authors) have permitted us to replace their copyright notes by the Info-ZIP License.

Frequently Asked Questions regarding (re)distribution of Zip and UnZip are near the end of this file.

There are no known patents on any of the code in UnZip. Unisys claims a patent on LZW encoding and on LZW decoding in an apparatus that performs LZW encoding, but the patent appears to exempt a stand-alone decoder (as in UnZip's unshrink.c). Unisys has publicly claimed otherwise, but the issue has never been tested in court. Since this point is unclear, unshrinking is not enabled by default. It is the responsibility of the user to make his or her peace with Unisys and its licensing requirements. (unshrink.c may be removed from future releases altogether.)

The original unzip source code has been extensively modified and almost entirely rewritten (changes include random zipfile access rather than sequential; replacement of unimplode() with explode(); replacement of old unshrink() with new (unrelated) unshrink(); replacement of output routines; addition of inflate(), wildcards, filename-mapping, text translation, ...; etc.). As far as we can tell, only the core code of the unreduce method remained substantially similar to Mr. Smith's original source. As of UnZip

5.42, the complete

core code is now covered by the Info-ZIP Licence. Therefore, support for the reduce method has been removed.

The drop of the reduce method should only affect some test archives, reducing was never used in any publically distributed Zip program.

For pathologic cases where support for reduced archive entries is needed, the unreduce code copyrighted by Samuel H. Smith is available as a separate distribution (the restricted copyright of this code is cited below in the "historical" section).

The following copyright applies to the Mac OS File Manager interface code (macos/source/macstuff.[ch]), distributed with UnZip 5.4 and later:

```
* MoreFiles
*
* A collection of File Manager and related routines
*
* by Jim Luther (Apple Macintosh Developer Technical Support Emeritus)
* with significant code contributions by Nitin Ganatra
* (Apple Macintosh Developer Technical Support Emeritus)
* Copyright 1992-1998
```

Apple Computer, Inc.

```
* Portions copyright 1995 Jim Luther
* All rights reserved.
* The Package "More Files" is distributed under the following
* license terms:
*
* "You may incorporate this sample code into your
* applications without restriction, though the
* sample code has been provided "AS IS" and the
* responsibility for its operation is 100% yours.
* However, what you are not permitted to do is to
* redistribute the source as "DSC Sample Code" after
* having made changes. If you're going to
* redistribute the source, we require that you make
* it clear in the source that the code was descended
* from Apple Sample Code, but that you've made
* changes."
```

The usage terms of this copyright note are compatible with the

Info-ZIP license, they do not add further restrictions.

The following
copyright applies to the Mac OS "macbin3" decoding code
(extra field compatibility with ZipIt):

- * MacBinaryIII.h
- *
- * Copyright 1997 Christopher Evans (cevens@poppybank.com)
- *
- * Basic encoding and decoding of Macintosh files to the
- * MacBinary III spec.
- * -----
- * This source is copyrighted by Christopher Evans (cevens@poppybank.com)
- * (available at ftp://ftp.lazerware.com/MacBinaryIII_src_C.sit
- * homepage of Leonard Rosenthol leonardr@netcom.com)

This copyright note does not contain any usage terms. So, we assume
that this code is freely reusable until we are proved wrong...

The remaining copyright notes have been superseded by the new
Info-ZIP license, with explicit permission from the respective
original authors. They are cited here for historical reasons,
only:

The following copyright applies to the full-featured unreduce.c
(now distributed separately):

- * Copyright 1989 Samuel H. Smith; All rights reserved
- *
- * Do not distribute modified versions without my permission.
- * Do not remove or alter this notice or any other copyright notice.
- * If you use this in your own program you must distribute source code.
- * Do not use any of this in a commercial product.

Regarding the first stipulation, Mr. Smith was tracked down in southern
California some years back [Samuel H. Smith, The Tool Shop; as of mid-
May 1994, (213) 851-9969 (voice), (213) 887-2127(?) (subscription BBS),
71150.2731@compuserve.com]:

"He says that he thought that whoever contacted him understood that
he has no objection to the Info-ZIP group's inclusion of his code.
His primary concern is that it remain freely distributable, he said."

Despite the fact that our "normal" code has been entirely rewritten

and by default

no longer contains any of Mr. Smith's code, Info-ZIP

remains indebted and grateful to him. We hope he finds our contributions as useful as we have his.

Note that the third and fourth stipulations still apply to any company that wishes to incorporate the unreduce code into its products; if you wish to do so, you must contact Mr. Smith directly regarding licensing.

The following copyright applied to most of the VMS code in vms.c, distributed with UnZip version 4.2 and later:

- * Copyright (c) 1992-93 Igor Mandrichenko.
- * Permission is granted to any individual or institution to use, copy,
- * or redistribute this software so long as all of the original files
- * are included unmodified and that this copyright notice is retained.

The following copyright applied to the new version of unshrink.c, distributed with UnZip version 5.2 and later:

- * Copyright (c) 1994 Greg Roelofs.
- * Permission is granted to any individual/institution/corporate
- * entity to use, copy, redistribute or modify this software for
- * any purpose whatsoever, subject to the conditions noted in the
- * Frequently Asked Questions section below, plus one additional
- * condition: namely, that my name not be removed from the source
- * code. (Other names may, of course, be added as modifications
- * are made.) Corporate legal staff (like at IBM :-)) who have
- * problems understanding this can contact me through Zip-Bugs...

The following copyright applied to the Windows DLL code (windll/*), distributed with UnZip version 5.2 and later:

- * Copyright (c) 1996 Mike White.
- * Permission is granted to any individual or institution to use,
- * copy, or redistribute this software so long as all of the original
- * files are included, that it is not sold for profit, and that this
- * copyright notice is retained.

The following copyright applied to the Windows
CE GUI port, ``Pocket
UnZip," distributed with UnZip version 5.3 and later:

- * All the source files for Pocket UnZip, except for components
- * written by the Info-ZIP group, are copyrighted 1997 by Steve P.
- * Miller. The product "Pocket UnZip" itself is property of the
- * author and cannot be altered in any way without written consent
- * from Steve P. Miller.

The remaining code was written by many people associated with the Info-ZIP group, with large contributions from (but not limited to): Greg Roelofs (overall program logic, ZipInfo, unshrink, filename mapping/portability, etc.), Mark Adler (inflate, explode, funzip), Kai Uwe Rommel (OS/2), John Bush and Paul Kienitz (Amiga), Antoine Verheijen (Macintosh), Hunter Goatley (more VMS), Mike White (Windows DLLs), Christian Spieler (overall logic, optimization, VMS, etc.) and others. See the file CONTRIBS in the source distribution for a much more complete list of contributors.

The decompression core code for the deflate method (inflate.[ch], explode.c) was originally written by Mark Adler who submitted it as public domain code.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a

copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a

cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding

those notices that do not

pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with

the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability

incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

MiniZip - Copyright (c) 1998-2010 - by Gilles Vollant - version 1.1 64 bits from Mathias Svensson

Introduction

MiniZip 1.1 is built from MiniZip 1.0 by Gilles Vollant (<http://www.winimage.com/zLibDll/minizip.html>)

When adding ZIP64 support into minizip it would result into risk of breaking compatibility with minizip 1.0. All possible work was done for compatibility.

Background

When adding ZIP64 support Mathias Svensson found that Even Rouault have added ZIP64 support for unzip.c into minizip for a open source project called gdal (<http://www.gdal.org/>)

That was used as a starting point. And after that ZIP64 support was added to zip.c some refactoring and code cleanup was also done.

Changed from MiniZip 1.0 to MiniZip 1.1

-
- * Added ZIP64 support for unzip (by Even Rouault)
 - * Added ZIP64 support for zip (by Mathias Svensson)
 - * Reverted some changed that Even Rouault did.
 - * Bunch of patches received from Gilles Vollant that he received for MiniZip from various users.
 - * Added unzip patch for BZIP Compression method (patch create by Daniel Borca)
 - * Added BZIP Compress method for zip
 - * Did some refactoring and code cleanup

Credits

Gilles Vollant - Original MiniZip author
Even Rouault - ZIP64 unzip Support
Daniel Borca - BZip Compression method support in unzip
Mathias Svensson - ZIP64 zip support
Mathias Svensson - BZip Compression method support in zip

Resources

ZipLayout <http://result42.com/projects/ZipFileLayout>

Command line tool for Windows that shows the layout and information of the headers in a zip archive.
Used when debugging and validating the creation of zip files using MiniZip64

ZIP App Note <http://www.pkware.com/documents/casestudies/APPNOTE.TXT>
Zip File specification

Notes.

- * To be able to use BZip compression method in zip64.c or unzip64.c the BZIP2 lib is needed and HAVE_BZIP2 need to be defined.

For more info read MiniZip_info.txt

Decryption code comes from crypt.c by Info-ZIP but has been greatly reduced in terms of compatibility with older software. The following is from the original crypt.c.

Code woven in by Terry Thorsen 1/2003.

Copyright (c) 1990-2000 Info-ZIP. All rights reserved.

See the accompanying

file LICENSE, version 2000-Apr-09 or later

(the contents of which are also included in zip.h) for terms of use.

If, for some reason, all these files are missing, the Info-ZIP license also may be found at: <ftp://ftp.info-zip.org/pub/infozip/license.html>

crypt.c (full version) by Info-ZIP. Last revised: [see crypt.h]

The encryption/decryption parts of this source code (as opposed to the non-echoing password parts) were originally written in Europe. The whole source package can be freely distributed, including from the USA. (Prior to January 2000, re-export from the US was a violation of US law.)

This encryption code is a direct transcription of the algorithm from Roger Schlafly, described by Phil Katz in the file appnote.txt. This file (appnote.txt) is distributed with the PKZIP program (even in the version without encryption capabilities).

Changes in unzip.c

2007-2008 - Even Rouault - Addition of cpl_unzGetCurrentFileZStreamPos
2007-2008 - Even Rouault - Decoration of symbol names unz* -> cpl_unz*
2007-2008 - Even Rouault - Remove old C style function prototypes
2007-2008 - Even Rouault - Add unzip support for ZIP64

Copyright (C) 2007-2008 Even Rouault

Oct-2009 - Mathias Svensson - Removed cpl_* from symbol names (Even Rouault added them but since this is now moved to a new project (minizip64) I renamed them again).

Oct-2009 - Mathias Svensson - Fixed problem if uncompressed size was > 4G and compressed size was <4G should only read the compressed/uncompressed size from the Zip64 format if the size from normal header was 0xFFFFFFFF

Oct-2009 - Mathias Svensson - Applied some bug fixes from patches received from Gilles Vollant

Oct-2009 - Mathias Svensson - Applied support to unzip files with compression method BZIP2 (bzip2 lib is required)

Patch created by Daniel Borca

Jan-2010 - back to unzip and minizip 1.0 name scheme, with compatibility layer

Copyright (C) 1998 - 2010 Gilles Vollant, Even Rouault, Mathias Svensson

ZLIB DATA COMPRESSION LIBRARY

zlib 1.2.11 is a general purpose data compression library. All the code is thread safe. The data format used by the zlib library is described by RFCs (Request for Comments) 1950 to 1952 in the files <http://tools.ietf.org/html/rfc1950> (zlib format), rfc1951 (deflate format) and rfc1952 (gzip format).

All functions of the compression library are documented in the file `zlib.h` (volunteer to write man pages welcome, contact zlib@gzip.org). A usage example of the library is given in the file `test/example.c` which also tests that the library is working correctly. Another example is given in the file `test/minigzip.c`. The compression library itself is composed of all source files in the root directory.

To compile all files and run the test program, follow the instructions given at the top of Makefile.in. In short `./configure; make test`, and if that goes well, `make install` should work for most flavors of Unix. For Windows, use one of the special makefiles in `win32/` or `contrib/vstudio/`. For VMS, use `make_vms.com`.

Questions about zlib should be sent to [<zlib@gzip.org>](mailto:zlib@gzip.org), or to Gilles Vollant [<info@winimage.com>](mailto:info@winimage.com) for the Windows DLL version. The zlib home page is <http://zlib.net/>. Before reporting a problem, please check this site to verify that you have the latest version of zlib; otherwise get the latest version and check whether the problem still exists or not.

PLEASE read the zlib FAQ http://zlib.net/zlib_faq.html before asking for help.

Mark Nelson [<markn@ieee.org>](mailto:markn@ieee.org) wrote an article about zlib for the Jan. 1997 issue of Dr. Dobbs's Journal; a copy of the article is available at <http://marknelson.us/1997/01/01/zlib-engine/>.

The changes made in version 1.2.11 are documented in the file `ChangeLog`.

Unsupported third party contributions are provided in directory `contrib/`.

zlib is available in Java using the `java.util.zip` package, documented at <http://java.sun.com/developer/technicalArticles/Programming/compression/>.

A Perl interface to zlib written by Paul Marquess [<pmqs@cpan.org>](mailto:pmqs@cpan.org) is available at CPAN (Comprehensive Perl Archive Network) sites, including <http://search.cpan.org/~pmqs/IO-Compress-Zlib/>.

A Python interface to zlib written by A.M. Kuchling [<amk@amk.ca>](mailto:amk@amk.ca) is available in Python 1.5 and later versions, see <http://docs.python.org/library/zlib.html>.

zlib is built into tcl: <http://wiki.tcl.tk/4610>.

An experimental package to read and write files in `.zip` format, written on top of zlib by Gilles Vollant [<info@winimage.com>](mailto:info@winimage.com), is available in the `contrib/minizip` directory of zlib.

Notes for some targets:

- For Windows DLL versions, please see `win32/DLL_FAQ.txt`
- For 64-bit Irix, `deflate.c` must be compiled without any optimization. With `-O`, one `libpng` test fails. The test works in 32 bit mode (with the `-n32`

compiler flag). The compiler bug has been reported to SGI.

- zlib doesn't work with gcc 2.6.3 on a DEC 3000/300LX under OSF/1 2.1 it works when compiled with cc.
- On Digital Unix 4.0D (formely OSF/1) on AlphaServer, the cc option -std1 is necessary to get gzprintf working correctly. This is done by configure.
- zlib doesn't work on HP-UX 9.05 with some versions of /bin/cc. It works with other compilers. Use "make test" to check your compiler.
- gzdopen is not supported on RISCOS or BEOS.
- For PalmOs, see <http://palmzlib.sourceforge.net/>

Acknowledgments:

The deflate format used by zlib was defined by Phil Katz. The deflate and zlib specifications were written by L. Peter Deutsch. Thanks to all the people who reported problems and suggested various improvements in zlib; they are too numerous to cite here.

Frequently Asked Questions about zlib

If your question is not there, please check the zlib home page <http://zlib.net/> which may have more recent information. The latest zlib FAQ is at http://zlib.net/zlib_faq.html

1. Is zlib Y2K-compliant?

Yes. zlib doesn't handle dates.

2. Where can I get a Windows DLL version?

The zlib sources can be compiled without change to produce a DLL. See the file win32/DLL_FAQ.txt in the zlib distribution. Pointers to the precompiled DLL are found in the zlib web site at <http://zlib.net/>.

3. Where can I get a Visual Basic interface to zlib?

See

- * <http://marknelson.us/1997/01/01/zlib-engine/>
- * win32/DLL_FAQ.txt in the zlib distribution

4. compress() returns Z_BUF_ERROR.

Make sure that before the call of compress(), the length of the compressed buffer is equal to the available size of the compressed buffer and not zero. For Visual Basic, check that this parameter is passed by reference ("as any"), not by value ("as long").

5. deflate() or inflate() returns Z_BUF_ERROR.

Before making the call, make sure that avail_in and avail_out are not zero. When setting the parameter flush equal to Z_FINISH, also make sure that avail_out is big enough to allow processing all pending input. Note that a Z_BUF_ERROR is not fatal--another call to deflate() or inflate() can be made with more input or output space. A Z_BUF_ERROR may in fact be unavoidable depending on how the functions are used, since it is not possible to tell whether or not there is more output pending when strm.avail_out returns with zero. See http://zlib.net/zlib_how.html for a heavily annotated example.

6. Where's the zlib documentation (man pages, etc.)?

It's in zlib.h. Examples of zlib usage are in the files test/example.c and test/minigzip.c, with more in examples/.

7. Why don't you use GNU autoconf or libtool or ...?

Because we would like to keep zlib as a very small and simple package. zlib is rather portable and doesn't need much configuration.

8. I found a bug in zlib.

Most of the time, such problems are due to an incorrect usage of zlib.

Please try to reproduce the problem with a small program and send the corresponding source to us at zlib@gzip.org . Do not send multi-megabyte data files without prior agreement.

9. Why do I get "undefined reference to gzputc"?

If "make test" produces something like

```
example.o(.text+0x154): undefined reference to `gzputc'
```

check that you don't have old files libz.* in /usr/lib, /usr/local/lib or /usr/X11R6/lib. Remove any old versions, then do "make install".

10. I need a Delphi interface to zlib.

See the contrib/delphi directory in the zlib distribution.

11. Can zlib handle .zip archives?

Not by itself, no. See the directory contrib/minizip in the zlib distribution.

12.

Can zlib handle .Z files?

No, sorry. You have to spawn an uncompress or gunzip subprocess, or adapt the code of uncompress on your own.

13. How can I make a Unix shared library?

By default a shared (and a static) library is built for Unix. So:

```
make distclean
./configure
make
```

14. How do I install a shared zlib library on Unix?

After the above, then:

```
make install
```

However, many flavors of Unix come with a shared zlib already installed. Before going to the trouble of compiling a shared version of zlib and trying to install it, you may want to check if it's already there! If you can `#include <zlib.h>`, it's there. The `-lz` option will probably link to it. You can check the version at the top of `zlib.h` or with the `ZLIB_VERSION` symbol defined in `zlib.h` .

15. I have a question about OttoPDF.

We are not the authors of OttoPDF. The real author is on the OttoPDF web site: Joel Hainley, jhainley@myndkryme.com.

16.

Can zlib decode Flate data in an Adobe PDF file?

Yes. See <http://www.pdflib.com/> . To modify PDF forms, see <http://sourceforge.net/projects/acroformtool/> .

17. Why am I getting this "register_frame_info not found" error on Solaris?

After installing zlib 1.1.4 on Solaris 2.6, running applications using zlib generates an error such as:

```
ld.so.1: rpm: fatal: relocation error: file /usr/local/lib/libz.so:
symbol __register_frame_info: referenced symbol not found
```

The symbol `__register_frame_info` is not part of zlib, it is generated by the C compiler (cc or gcc). You must recompile applications using zlib which have this problem. This problem is specific to Solaris. See <http://www.sunfreeware.com> for Solaris versions of zlib and applications using zlib.

18. Why does gzip give an error on a file I make with compress/deflate?

The compress and deflate functions produce data in the zlib format, which is different and incompatible with the gzip format. The `gz*` functions in zlib on the other hand use the gzip format. Both the zlib and gzip formats use the same compressed data format internally, but have different headers and trailers around the compressed data.

19. Ok, so why are there two different formats?

The gzip format was designed to retain the directory information about a single file, such as the name and last modification date. The zlib format on the other hand was designed for in-memory and communication channel applications, and has a much more compact header and trailer and uses a faster integrity check than gzip.

20. Well that's nice, but how do I make a gzip file in memory?

You can request that deflate write the gzip format instead of the zlib format using `deflateInit2()`. You can also request that inflate decode the gzip format using `inflateInit2()`. Read `zlib.h` for more details.

21. Is zlib thread-safe?

Yes. However any library routines that zlib uses and any application-provided memory allocation routines must also be thread-safe. zlib's gz* functions use stdio library routines, and most of zlib's functions use the library memory allocation routines by default. zlib's *Init* functions allow for the application to provide custom memory allocation routines.

Of course, you should only operate on any given zlib or gzip stream from a single thread at a time.

22. Can I use zlib in my commercial application?

Yes. Please read the license in zlib.h.

23. Is zlib under the GNU license?

No. Please read the license in zlib.h.

24. The license says that altered source versions must be "plainly marked". So what exactly do I need to do to meet that requirement?

You need to change the ZLIB_VERSION and ZLIB_VERNUM #defines in zlib.h. In particular, the final version number needs to be changed to "f", and an identification string should be appended to ZLIB_VERSION. Version numbers x.x.x.f are reserved for modifications to zlib by others than the zlib maintainers. For example, if the version of the base zlib you are altering is "1.2.3.4", then in zlib.h you should change ZLIB_VERNUM to 0x123f, and ZLIB_VERSION to something like "1.2.3.f-zachary-mods-v3". You can also update the version strings in deflate.c and infrees.c.

For altered source distributions, you should also note the origin and nature of the changes in zlib.h, as well as in ChangeLog and README, along with the dates of the alterations. The origin should include at least your name (or your company's name), and an email address to contact for help or issues with the library.

Note that distributing a compiled zlib library along with zlib.h and zconf.h is also a source distribution, and so you should change ZLIB_VERSION and ZLIB_VERNUM and note the origin and nature of the changes in zlib.h as you would for a full source distribution.

25.

Will zlib work on a big-endian or little-endian architecture, and can I exchange compressed data between them?

Yes and yes.

26. Will zlib work on a 64-bit machine?

Yes. It has been tested on 64-bit machines, and has no dependence on any data types being limited to 32-bits in length. If you have any difficulties, please provide a complete problem report to zlib@gzip.org

27. Will zlib decompress data from the PKWare Data Compression Library?

No. The PKWare DCL uses a completely different compressed data format than does PKZIP and zlib. However, you can look in zlib's contrib/blast directory for a possible solution to your problem.

28. Can I access data randomly in a compressed stream?

No, not without some preparation. If when compressing you periodically use `Z_FULL_FLUSH`, carefully write all the pending data at those points, and keep an index of those locations, then you can start decompression at those points. You have to be careful to not use `Z_FULL_FLUSH` too often, since it can significantly degrade compression. Alternatively, you can scan a deflate stream once to generate an index, and then use that index for random access. See `examples/zran.c`.

29. Does zlib work on MVS, OS/390, CICS, etc.?

It has in the past, but we have not heard of any recent evidence. There were working ports of zlib 1.1.4 to MVS, but those links no longer work. If you know of recent, successful applications of zlib on these operating systems, please let us know. Thanks.

30. Is there some simpler, easier to read version of inflate I can look at to understand the deflate format?

First off, you should read RFC 1951. Second, yes. Look in zlib's contrib/puff directory.

31. Does zlib infringe on any patents?

As far as we know, no. In fact, that was originally the whole point behind zlib. Look here for some more information:

<http://www.gzip.org/#faq11>

32. Can zlib work with greater than 4 GB of data?

Yes. `inflate()` and `deflate()` will process any amount of data correctly. Each call of `inflate()` or `deflate()` is limited to input and output chunks of the maximum value that can be stored in the compiler's "unsigned int" type, but there is no limit to the number of chunks. Note however that the `strm.total_in` and `strm_total_out` counters may be limited to 4 GB. These counters are provided as a convenience and are not used internally by `inflate()` or `deflate()`. The application can easily set up its own counters updated after each call of `inflate()` or `deflate()` to count beyond 4 GB. `compress()` and `uncompress()` may be limited to 4 GB, since they operate in a single call. `gzseek()` and `gztell()` may be limited to 4 GB depending on how `zlib` is compiled. See the `zlibCompileFlags()` function in `zlib.h`.

The word "may" appears several times above since there is a 4 GB limit only if the compiler's "long" type is 32 bits. If the compiler's "long" type is 64 bits, then the limit is 16 exabytes.

33. Does `zlib` have any security vulnerabilities?

The only one that we are aware of is potentially in `gzprintf()`. If `zlib` is compiled to use `sprintf()` or `vsprintf()`, then there is no protection against a buffer overflow of an 8K string space (or other value as set by `gzbuffer()`), other than the caller of `gzprintf()` assuring that the output will not exceed 8K. On the other hand, if `zlib` is compiled to use `snprintf()` or `vsnprintf()`, which should normally be the case, then there is no vulnerability. The `./configure` script will display warnings if an insecure variation of `sprintf()` will be used by `gzprintf()`. Also the `zlibCompileFlags()` function will return information on what variant of `sprintf()` is used by `gzprintf()`.

If you don't have `snprintf()` or `vsnprintf()` and would like one, you can find a portable implementation here:

<http://www.ijs.si/software/snprintf/>

Note that you should be using the most recent version of `zlib`. Versions 1.1.3 and before were subject to a double-free vulnerability, and versions 1.2.1 and 1.2.2 were subject to an access exception when decompressing invalid compressed data.

34. Is there a Java version of `zlib`?

Probably what you want is to use `zlib` in Java. `zlib` is already included as part of the Java SDK in the `java.util.zip` package. If you really want a version of `zlib` written in the Java language, look on the `zlib` home page for links: <http://zlib.net/>.

35. I get this or that compiler or source-code scanner warning when I crank it

up to maximally-pedantic. Can't you guys write proper code?

Many years ago, we gave up attempting to avoid warnings on every compiler in the universe. It just got to be a waste of time, and some compilers were downright silly as well as contradicted each other. So now, we simply make sure that the code always works.

36. Valgrind (or some similar memory access checker) says that deflate is performing a conditional jump that depends on an uninitialized value. Isn't that a bug?

No. That is intentional for performance reasons, and the output of deflate is not affected. This only started showing up recently since zlib 1.2.x uses malloc() by default for allocations, whereas earlier versions used calloc(), which zeros out the allocated memory. Even though the code was correct, versions 1.2.4 and later was changed to not stimulate these checkers.

37. Will zlib read the (insert any ancient or arcane format here) compressed data format?

Probably not. Look in the comp.compression FAQ for pointers to various formats and associated software.

38. How can I encrypt/decrypt zip files with zlib?

zlib doesn't support encryption. The original PKZIP encryption is very weak and can be broken with freely available programs. To get strong encryption, use GnuPG, <http://www.gnupg.org/>, which already includes zlib compression. For PKZIP compatible "encryption", look at <http://www.info-zip.org/>

39. What's the difference between the "gzip" and "deflate" HTTP 1.1 encodings?

"gzip" is the gzip format, and "deflate" is the zlib format. They should probably have called the second one "zlib" instead to avoid confusion with the raw deflate compressed data format. While the HTTP 1.1 RFC 2616 correctly points to the zlib specification in RFC 1950 for the "deflate" transfer encoding, there have been reports of servers and browsers that incorrectly produce or expect raw deflate data per the deflate specification in RFC 1951, most notably Microsoft. So even though the "deflate" transfer encoding using the zlib format would be the more efficient approach (and in fact exactly what the zlib format was designed for), using the "gzip" transfer encoding is probably more reliable due to an

unfortunate choice of name on the part of the HTTP 1.1 authors.

Bottom line: use the gzip format for HTTP 1.1 encoding.

40. Does zlib support the new "Deflate64" format introduced by PKWare?

No. PKWare has apparently decided to keep that format proprietary, since they have not documented it as they have previous compression formats. In any case, the compression improvements are so modest compared to other more modern approaches, that it's not worth the effort to implement.

41. I'm having a problem with the zip functions in zlib, can you help?

There are no zip functions in zlib. You are probably using minizip by Giles Vollant, which is found in the contrib directory of zlib. It is not part of zlib. In fact none of the stuff in contrib is part of zlib. The files in there are not supported by the zlib authors. You need to contact the authors of the respective contribution for help.

42. The match.asm code in contrib is under the GNU General Public License.

Since it's part of zlib, doesn't that mean that all of zlib falls under the GNU GPL?

No. The files in contrib are not part of zlib. They were contributed by other authors and are provided as a convenience to the user within the zlib distribution. Each item in contrib has its own license.

43. Is zlib subject to export controls? What is its ECCN?

zlib is not subject to export controls, and so is classified as EAR99.

44. Can you please sign these lengthy legal documents and fax them back to us so that we can use your software in our product?

No. Go away. Shoo.

python-webencodings

=====

This is a Python implementation of the `WHATWG Encoding standard`
<<http://encoding.spec.whatwg.org/>>` _.

- * Latest documentation: <http://packages.python.org/webencodings/>
- * Source code and issue tracker:
<https://github.com/gsnedders/python-webencodings>
- * PyPI releases: <http://pypi.python.org/pypi/webencodings>
- * License: BSD
- * Python 2.6+ and 3.3+

In order to be compatible with legacy web content when interpreting something like ``Content-Type: text/html; charset=latin1``, tools need to use a particular set of aliases for encoding labels as well as some overriding rules.

For example, ``US-ASCII`` and ``iso-8859-1`` on the web are actually aliases for ``windows-1252``, and an UTF-8 or UTF-16 BOM takes precedence over any other encoding declaration.

The Encoding standard defines all such details so that implementations do not have to reverse-engineer each other.

This module has encoding labels and BOM detection, but the actual implementation for encoders and decoders is Python's.

Description: python-webencodings

=====

This is a Python implementation of the `WHATWG Encoding standard`
[<http://encoding.spec.whatwg.org/>](http://encoding.spec.whatwg.org/)`_.

* Latest documentation: <http://packages.python.org/webencodings/>

* Source code and issue tracker:

<https://github.com/gsnedders/python-webencodings>

* PyPI releases: <http://pypi.python.org/pypi/webencodings>

- * License: BSD
- * Python 2.6+ and 3.3+

In order to be compatible with legacy web content when interpreting something like ``Content-Type: text/html; charset=latin1``, tools need to use a particular set of aliases for encoding labels as well as some overriding rules. For example, ``US-ASCII`` and ``iso-8859-1`` on the web are actually aliases for ``windows-1252``, and an UTF-8 or UTF-16 BOM takes precedence over any other encoding declaration. The Encoding standard defines all such details so that implementations do not have to reverse-engineer each other.

This module has encoding labels and BOM detection, but the actual implementation for encoders and decoders is Python's.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including

the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or

Derivative Works a copy of this License; and

- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the

origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

This software is made available under the terms of *either* of the licenses found in LICENSE.APACHE or LICENSE.BSD. Contributions to this software is made under the terms of *both* these licenses.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems,

and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this

License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work,

excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding

those notices that do not

pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the

content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions

of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

IPTC Photo Metadata descriptions are taken from the IPTC Photo Metadata Standard, July 2010, Copyright 2010 International Press Telecommunications Council.

1. The Specifications and Materials are licensed for use only on the condition that you agree to be bound by the terms of this license. Subject to this and other licensing requirements contained herein, you may, on a non-exclusive basis, use the Specifications and Materials.
2. The IPTC openly provides the Specifications and Materials for voluntary use by individuals, partnerships, companies, corporations, organizations and any other entity for use at the entity's own risk. This disclaimer, license and release is intended to apply to the IPTC, its officers, directors, agents, representatives, members, contributors, affiliates, contractors, or co-venturers acting jointly or severally.
3. The Document and translations thereof may be copied and furnished to others, and derivative works that comment on or otherwise explain it or assist in its implementation may be prepared, copied, published and distributed, in whole or in part, without restriction of any kind, provided that the copyright and license notices and references to the IPTC appearing in the Document and the terms of this Specifications License Agreement are included on all such copies and derivative works. Further, upon the receipt of written permission from the IPTC, the Document may be modified for the purpose of developing applications that use IPTC Specifications or as required to translate the Document into languages other than English.
4. Any use, duplication, distribution, or exploitation of the Document and Specifications and Materials in any manner is at your own risk.
5. NO WARRANTY, EXPRESSED OR IMPLIED, IS MADE REGARDING THE ACCURACY, ADEQUACY,

COMPLETENESS, LEGALITY, RELIABILITY OR USEFULNESS OF ANY INFORMATION CONTAINED IN THE DOCUMENT OR IN ANY SPECIFICATION OR OTHER PRODUCT OR SERVICE PRODUCED OR SPONSORED BY THE IPTC. THE DOCUMENT AND THE INFORMATION CONTAINED HEREIN AND INCLUDED IN ANY SPECIFICATION OR OTHER PRODUCT OR SERVICE OF THE IPTC IS PROVIDED ON AN "AS IS" BASIS. THE IPTC DISCLAIMS ALL WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY ACTUAL OR ASSERTED WARRANTY OF NON-INFRINGEMENT OF PROPRIETARY RIGHTS, MERCHANTABILITY, OR FITNESS FOR A PARTICULAR PURPOSE. NEITHER THE IPTC NOR ITS CONTRIBUTORS SHALL BE HELD LIABLE FOR ANY IMPROPER OR INCORRECT USE OF INFORMATION. NEITHER THE IPTC NOR ITS CONTRIBUTORS ASSUME ANY RESPONSIBILITY FOR ANYONE'S USE OF INFORMATION PROVIDED BY THE IPTC. IN NO EVENT SHALL THE IPTC OR ITS CONTRIBUTORS BE LIABLE TO ANYONE FOR DAMAGES OF ANY KIND, INCLUDING

BUT NOT LIMITED TO, COMPENSATORY DAMAGES, LOST PROFITS, LOST DATA OR ANY FORM OF SPECIAL, INCIDENTAL, INDIRECT, CONSEQUENTIAL OR PUNITIVE DAMAGES OF ANY KIND WHETHER BASED ON BREACH OF CONTRACT OR WARRANTY, TORT, PRODUCT LIABILITY OR OTHERWISE.

6. The IPTC takes no position regarding the validity or scope of any Intellectual Property or other rights that might be claimed to pertain to the implementation or use of the technology described in the Document or the extent to which any license under such rights might or might not be available. The IPTC does not represent that it has made any effort to identify any such rights. Copies of claims of rights made available for publication, assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of the Specifications and Materials, can be obtained from the Managing Director of the IPTC.

7. By using the Specifications and Materials including the Document in any manner or for any purpose, you release the IPTC from all liabilities, claims, causes of action, allegations, losses, injuries, damages, or detriments of any nature arising from or relating to the use of the Specifications, Materials or any portion thereof. You further agree not to file a lawsuit, make a claim, or take any other formal or informal legal action against the IPTC, resulting from your acquisition, use, duplication, distribution, or exploitation of the Specifications, Materials or any portion thereof. Finally, you hereby agree that the IPTC is not liable for any direct, indirect, special or consequential damages arising from or relating to your acquisition, use, duplication, distribution, or exploitation of the Specifications, Materials or any portion thereof.

8. Specifications and Materials may be downloaded or copied provided that ALL copies retain the ownership, copyright and license notices.

9. Materials may not be edited, modified, or presented in a context that creates a misleading or false impression or statement as to the positions, actions, or statements of the IPTC.

10. The name and trademarks of the IPTC may not be used in advertising, publicity, or in relation to products or services and their names without the specific, written prior permission of the IPTC. Any permitted use of the trademarks of the IPTC, whether registered or not, shall be accompanied by an appropriate mark and attribution, as agreed with the IPTC.

11. Specifications may be extended by both members and non-members to provide additional functionality (Extension Specifications) provided that there is a clear recognition of the IPTC IP and its ownership in the Extension Specifications and the related documentation and provided that the extensions are clearly identified and provided that a perpetual license is granted by the creator of the Extension Specifications for other members and non-members to use the Extension Specifications

and to continue extensions of the Extension Specifications. The IPTC does not waive any of its rights in the Specifications and Materials in this context. The Extension Specifications may be considered the intellectual property of their creator. The IPTC expressly disclaims any responsibility for damage caused by an extension to the

Specifications.

12. Specifications and Materials may be included in derivative work of both members and non-members provided that there is a clear recognition of the IPTC IP and its ownership in the derivative work and its related documentation. The IPTC does not waive any of its rights in the Specifications and Materials in this context. Derivative work in its entirety may be considered the intellectual property of the creator of the work .The IPTC expressly disclaims any responsibility for damage caused when its IP is used in a derivative context.

13. This Specifications License Agreement is perpetual subject to your conformance to the terms of this Agreement. The IPTC may terminate this Specifications License Agreement immediately upon your breach of this Agreement and, upon such termination you will cease all use, duplication, distribution, and/or exploitation in any manner of the Specifications and Materials.

14. This Specifications License Agreement reflects the entire agreement of the parties regarding the subject matter hereof and supersedes all prior agreements or representations regarding such matters, whether written or oral. To the extent any portion or provision of this Specifications License Agreement is found to be illegal or unenforceable, then the remaining provisions of this Specifications License Agreement will remain in full force and effect and the illegal or unenforceable provision will be construed to give it such effect as it may properly have that is consistent with the intentions of the parties.

15. This Specifications License Agreement may only be modified in writing signed by an authorized representative of the IPTC.

16. This Specifications License Agreement is governed by the law of United Kingdom, as such law is applied to contracts made and fully performed in the United Kingdom. Any disputes arising from or relating to this Specifications License Agreement will be resolved in the courts of the United Kingdom. You consent to the jurisdiction of such courts over you and covenant not to assert before such courts any objection to proceeding in such forums.

JUnRAR (<https://github.com/edmund-wagner/junrar/>)

JUnRAR is based on the UnRAR tool, and covered by the same license
It was formerly available from <http://java-unrar.svn.sourceforge.net/>

```

FREE portable version
~~~~~

The source code of UnRAR utility is freeware. This means:

1. All copyrights to RAR and the utility UnRAR are exclusively owned by the author - Alexander Roshal.
2. The UnRAR sources may be used in any software to handle RAR archives without limitations free of charge, but cannot be used to re-create the RAR compression algorithm, which is proprietary. Distribution of modified UnRAR sources in separate form or as a part of other software is permitted, provided that it is clearly

stated in the documentation and source comments that the code may not be used to develop a RAR (WinRAR) compatible archiver.

3. The UnRAR utility may be freely distributed. It is allowed to distribute UnRAR inside of other software packages.

4. THE RAR ARCHIVER AND THE UnRAR UTILITY ARE DISTRIBUTED "AS IS". NO WARRANTY OF ANY KIND IS EXPRESSED OR IMPLIED.

YOU USE AT

YOUR OWN RISK. THE AUTHOR WILL NOT BE LIABLE FOR DATA LOSS, DAMAGES, LOSS OF PROFITS OR ANY OTHER KIND OF LOSS WHILE USING OR MISUSING THIS SOFTWARE.

5. Installing and using the UnRAR utility signifies acceptance of these terms and conditions of the license.

6. If you don't agree with terms of the license you must remove UnRAR files from your storage devices and cease to use the utility.

Thank you for your interest in RAR and UnRAR. Alexander L. Roshal

## 1.229 selinux 3.1-3

### 1.229.1 Available under license :

This library (libselinux) is public domain software, i.e. not copyrighted.

#### Warranty Exclusion

---

You agree that this software is a non-commercially developed program that may contain "bugs" (as that term is used in the industry) and that it may not function as intended. The software is licensed "as is". NSA makes no, and hereby expressly disclaims all, warranties, express, implied, statutory, or otherwise with respect to the software, including noninfringement and the implied warranties of merchantability and fitness for a particular purpose.

#### Limitation of Liability

---

In no event will NSA be liable for any damages, including loss of data, lost profits, cost of cover, or other special, incidental, consequential, direct or indirect damages arising from the software or the use thereof, however caused and on any theory of liability. This limitation will apply even if NSA has been advised of the possibility

of such damage. You acknowledge that this is a reasonable allocation of risk.

# 1.230 libsemanage-common 3.1-1+b2

## 1.230.1 Available under license :

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.

51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages

are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

## GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a

portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses

the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves,

then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License.

Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables

containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are

prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR

## CONSEQUENTIAL

DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the library's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

```
This library is free software; you can redistribute it and/or  
modify it under the terms of the GNU Lesser General Public  
License as published by the Free Software Foundation; either  
version 2.1 of the License, or (at your option) any later version.
```

```
This library is distributed in the hope that it will be useful,  
but WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU  
Lesser General Public License for more details.
```

```
You should have received a copy of the GNU Lesser General Public  
License along with this library; if not, write to the Free Software  
Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA
```

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990  
Ty Coon, President of Vice

That's all there is to it!  
This is the Debian package for libsemanage, and it is built from sources obtained from: <http://www.nsa.gov/selinux/code/download5.cfm>.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts  
as the successor of the GNU Library Public License, version 2, hence  
the version number 2.1.]

### Preamble

The licenses for most software are designed to take away your  
freedom to share and change it. By contrast, the GNU General Public  
Licenses are intended to guarantee your freedom to share and change  
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some  
specially designated software packages--typically libraries--of the  
Free Software Foundation and other authors who  
decide to use it. You  
can use it too, but we suggest you first think carefully about whether  
this license or the ordinary General Public License is the better  
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,  
not price. Our General Public Licenses are designed to make sure that  
you have the freedom to distribute copies of free software (and charge  
for this service if you wish); that you receive source code or can get  
it if you want it; that you can change the software and use pieces of  
it in new free programs; and that you are informed that you can do  
these things.

To protect your rights, we need to make restrictions that forbid  
distributors to deny you these rights or to ask you to surrender these  
rights. These restrictions translate to certain responsibilities for

you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General

Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

## GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work

which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the

terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

### 3. You may opt to apply the terms of the ordinary GNU General Public

License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally

distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. #### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

Ty Coon, President of Vice

That's all there is to it!

GNU GENERAL PUBLIC LICENSE  
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price.

Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their

rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

#### GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the

notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is

void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed

through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS

TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute
it
under certain conditions; type `show c' for details.
```

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than ``show w'` and ``show c'`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

GNU GENERAL PUBLIC LICENSE  
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<https://fsf.org/>>  
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

#### Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to

any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps:

(1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to

avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

## TERMS AND CONDITIONS

### 0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a

menu, a prominent item in the list meets this criterion.

## 1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The

"System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

## 2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is

covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

### 3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

### 4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately

publish on each copy an appropriate copyright notice;  
keep intact all notices stating that this License and any

non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

#### 5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

#### 6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

- a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.
- b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.
- c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.
- d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.
- e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided,

in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

## 7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of

it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on

those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

## 8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

#### 9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

#### 10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

#### 11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

#### 12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

#### 13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

#### 14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will

be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

#### 15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

#### 16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### 17.

Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see [<https://www.gnu.org/licenses/>](https://www.gnu.org/licenses/).

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>  
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w` and `show c` should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <https://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <https://www.gnu.org/licenses/why-not-lgpl.html>.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions

to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the

content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
  
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
  
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object

form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. ## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity

exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the

Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this

License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents

of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill,

work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the

outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of

this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License,

each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding

those notices that do not

pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed

as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct,

indirect, special,

incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. # 1.238 libgoogle-gson-java 2.8.6-1+deb11u1

## 1.238.1 Available under license :

Google Gson

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,  
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by  
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all  
other entities that control, are controlled by, or are under common  
control with that entity. For the purposes of this definition,  
"control" means (i) the power, direct or indirect, to cause the  
direction or management of such entity, whether by contract or  
otherwise, or (ii) ownership of fifty percent (50%) or more of the  
outstanding shares, or (iii) beneficial  
ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity  
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,  
including but not limited to software source code, documentation  
source, and configuration files.

"Object" form shall mean any form resulting from mechanical  
transformation or translation of a Source form, including but  
not limited to compiled object code, generated documentation,  
and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or  
Object form, made available under the License, as indicated by a  
copyright notice that is included in or attached to the work

(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct

or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE

file, excluding those notices that do not

pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,

any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership

of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual,

worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this

License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not

pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or

documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct,

indirect, special,

incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

<http://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial

revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this

License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.
