

# Information Technology Jobs Connect Us All

## Looking for a job? How about a career instead?

Information Technology (IT) professionals keep the network running that keeps us all connected.

## The industry needs all kinds of people, in all kinds of roles

IT needs people with passion, ambition, and ideas

## For a career in IT, begin with a technical certification

- 99% of technical hiring managers factor certifications into their decision making
- 97% of them give employees recognition and incentives for earning technical certs

From a 2019 survey of 300 technology managers

## Cisco® offers 3 certifications to get you started

CCNA® gives you the networking fundamentals you need to build IT infrastructure that **connects** us

Cisco Certified CyberOps Associate prepares you for high-energy, high-stakes Security Operations Center (SOC) teams, where you **secure** digital assets

Cisco Certified DevNet Associate focuses on writing software and maintaining apps and code that **automate** IT infrastructure and help build the network of the future

## To earn your certification, you'll need to study, practice, and pass an exam.

### Passing the exam gives you a credential and so much more

- Knowledge and skills
- Confidence
- Marketability
- The thrill of accomplishment
- A digital badge to share on your résumé and social media profiles

## It boils down to a few personality traits. Are you

- Persistent?
- Resourceful?
- Detail-oriented?
- Good at solving puzzles?
- Energized by a challenge?

Then IT needs you. Yes, you.

Take the next step today.
