

Hardware Acceleration for Multicast VPN Extranet Support

The Hardware Acceleration for Multicast VPN Extranet Support feature introduces the linking of forwarding entries and the replication of packets in hardware for extranet MVPN services on Catalyst 6500 series switches.

Configuration Information

Configuration information is included in the “Configuring Multicast VPN Extranet Support” module, at the following URL:

<http://www.cisco.com/univercd/cc/td/doc/product/software/ios122sb/newft/122sb31/extvpnsb.htm>

The following sections provide information about this feature:

- Hardware Acceleration for Multicast VPN Extranet Support on Catalyst 6500 Series Switches
- Configuring MVPN Extranet Support

For a complete list of features included in the “Configuring Multicast VPN Extranet Support” module, see the Feature Information table located toward the end of the module.

Command Reference Information

This feature uses no new or modified commands.
