

# Release Bundle Contents for Cisco UCS Manager, Release 2.5, for Cisco UCS M-Series Servers

---

First Published: April 07, 2015

Last Updated: August 24, 2015

This document lists the bundle contents for Cisco UCS Manager Release 2.5, including all related firmware and BIOSes on blade servers and other Cisco Unified Computing System (UCS) components associated with the release. Use this document with the documents listed in the Documentation Roadmap.

#### Note

We sometimes update the documentation after original publication. Therefore, you should also review the documentation on Cisco.com for any updates. Documentation updates and errata are also in these release notes. The documentation roadmap for this product is available at <http://www.cisco.com/go/unifiedcomputing/m-series-doc>

#### Warning

**Cisco UCS Manager Release 2.5 supports only Cisco UCS M-Series Servers. It does not support Cisco UCS B-Series Servers and Cisco C-Series Servers.**

[Table 1](#) shows the online change history for this document.

## Introduction

The Cisco Unified Computing System is a next-generation data center platform that unites compute, network, storage access, and virtualization into a cohesive system designed to reduce total cost of ownership (TCO) and increase business agility. The system integrates a low-latency, lossless 10GB Ethernet unified network fabric with enterprise-class, x86-architecture servers. The system is an integrated, scalable, multi-chassis platform in which all resources participate in a unified management domain.

## Updating Cisco UCS Versions

To update the Cisco UCS software and firmware, see the appropriate [Upgrading Cisco UCS](#) document for your installation.

Use the **scope firmware** and **show package filename expand** CLI commands to view the contents of a given release package. Filenames in [Table 2](#) are accurate for their initial release; expect small changes for subsequent patch releases.
