New Software Features in Cisco iNode Manager 24.1

Feature	Description
Infrastructure Enhancements	
Integration with SCEP Key Server	In this release, the Cisco Intelligent Node Manager integrates with a Simple Certificate Enrolment Protocol (SCEP) server version 2.2.0. The integration allows you to manage an SCEP server independently, which acts as a centralized and secure certificate management solution.
	The benefit of using an SCEP server is that you can create your own application like the iNode manager to manage the nodes.

Intelligent Node software version 4.0.0 is the only version compatible with iNode Manager 24.1.
