Critical
Cisco Security Advisory ID : cisco-sa-20190821-imcs-ucs-authbypass
Published : 2019-08-21 16:00
Version : 1.0 : Final
CVSS : 9.8
Workarounds : No workarounds available
Cisco Bug ID : CSCvq48630

[CVE-2019-1974](#)

Summary: A critical vulnerability exists in the Cisco IMC Supervisor and Cisco UCS Director Express for Big Data Web console, which could allow an attacker to bypass authentication and gain unauthorized access to the system.

Details:

Cisco Integrated Management Controller (IMC) Supervisor and Cisco UCS Director Express for Big Data Web console

Version: 3.5(2) and earlier

The vulnerability is located in the authentication module of the Web console. An attacker can exploit this vulnerability by sending a specially crafted request to the Web console, which will bypass the authentication process and allow the attacker to access the system as an administrator.

Impact: This vulnerability has a CVSS score of 9.8, which is considered critical. It allows an attacker to gain unauthorized access to the system and potentially steal sensitive information or disrupt services.

Workarounds: There are no workarounds available for this vulnerability. Cisco is working on a patch to address this issue.
