ASA5512-Xソフトウェアについても同様です。

作業1:前提条件の確認

FTDをインストールする前に、前提条件を確認します。

ソリューション:

FTDのインストールでは、次の2つのイメージを使用します。

- 1. OS イメージ(AKA ブート イメージ):ASA5506-X, ASA5506H-X, ASA5506W-X, ASA5508-X, ASA5516-X の Firepower Threat Defense では、\*.lfbff ファイルです。Saleen (ASA5512-X, ASA5515-X, ASA5525-X, ASA5545-X, ASA5555-X) の Firepower Threat Defense では、\*.cdisk ファイルです。
- 2. システムイメージ:これは.pkgファイルです。

FTDのインストールに進む前に、次のことを確認してください。

- ASAフラッシュには、少なくとも3.1 GBの空き領域(3 GBバイト+ブートイメージのサイズ)が必要です
- •ブート イメージは TFTP サーバにアップロードされます。
- ・システム イメージは HTTP または FTP サーバにアップロードされます。

• ASA5506/08/16 では、ROMMON は少なくともバージョン 1.1.8 である必要があります。 空き領域を確認します。

# 作業2:ASA5508-X ROMMONのアップグレード

前提条件で説明したように、ASA5506-X、ASA5508-X、およびASA5516-XデバイスはROMMON v1.1.8に存在する必要があります。そうでない場合は、asa5500-firmware-18.SPA Cisco ASAダウ ンロードページ)。

タスク要件:

ASA5508 ROMMONを1.1.1から1.1.8にアップグレードします。

ソリューション:

この手順は「ASA ROMMON アップグレードガイド」で説明しています。

ステップ1:既存のROMMONバージョンを確認します。

Update policy deployment information - add device configuration

You can register the sensor to a Firepower Management Center and use the Firepower Management Center to manage it. Note that registering the sensor to a Firepower Management Center disables on-sensor Firepower Services management capabilities.

When registering the sensor to a Firepower Management Center, a unique alphanumeric registration key is always required. In most cases, to register a sensor to a Firepower Management Center, you must provide the hostname or the IP address along with the registration key. 'configure manager add [hostname | ip address ] [registration key ]'

However, if the sensor and the Firepower Management Center are separated by a NAT device, you must enter a unique NAT ID, along with the unique registration key.

'configure manager add DONTRESOLVE [registration key ] [ NAT ID ]'

Later, using the web interface on the Firepower Management Center, you must use the same registration key and, if necessary, the same NAT ID when you add this sensor to the Firepower Management Center.

## 作業8:既存のFTDインストールの再イメージ化

### 要件

既存の FTD イメージを再適用し、バージョン 6.1.0-330 をインストールします。

### 解決方法

このタスクはコード 6.0.1.x を実行している FTD アプライアンスがあり、何らかの理由でイメージの再適用が必要となったと仮定しています(修復不能なデータベース破損、ソフトウェア アップグレードが不能な致命的な欠陥など)。

### 手順の概要

- 1. 互換性チェック。
- 2. FMCからFTDを登録解除します。
- 3. FTD アプライアンスをリロードし、BootCLI を起動します。
- 4. セットアップウィザードを実行します。
- 5. FTDシステムイメージをインストールします。
- 6. FTDをFMCに登録します。

### 手順の詳細

ステップ1:Firepowerリリースノートを確認し、使用するFTDイメージがFMCと互換性があること を確認します。そうでなければ、先に FMC をアップグレードします。

ステップ2:FMCからFTDを登録解除(削除)します。FTD にイメージを再適用すると、その UUID が変更されて再登録ができなくなるのに最初から追加される必要があるため、この登録削 除の手順が必要です。

### ステップ3:FTDアプライアンスをリロードし、BootCLIを入力します。既存の FTD イメージはす でにインストール済みなので、FTD ブート イメージのインストールは省略できます。

You can register the sensor to a Firepower Management Center and use the Firepower Management Center to manage it. Note that registering the sensor to a Firepower Management Center disables on-sensor Firepower Services management capabilities.

When registering the sensor to a Firepower Management Center, a unique alphanumeric registration key is always required. In most cases, to register a sensor to a Firepower Management Center, you must provide the hostname or the IP address along with the registration key. 'configure manager add [hostname | ip address ] [registration key ]'

However, if the sensor and the Firepower Management Center are separated by a NAT device, you must enter a unique NAT ID, along with the unique registration key.

'configure manager add DONTRESOLVE [registration key ] [ NAT ID ]'

Later, using the web interface on the Firepower Management Center, you must use the same registration key and, if necessary, the same NAT ID when you add this sensor to the Firepower Management Center.
